Hon. J. C. Patterson was born at Armagh, Ireland, in 1830. He adopted the legal profession, being called to the Bar of Ontario. He first entered the House of Commons in 18:8, and in Dee. 1892, upon the reconstruction of the Cabinet, was appointed Minister of Militia,

Hon. T. M. Daly was born at Stratford, Ont., in August, 1852, and was educated at Toronto. He was enlied to the Ontario Bar in 1876, but a few years later commenced to practise in Brandon, M initoba, identifying himself with the public life of the new Province. In 1879 he married Miss Jtrvis, of Stratford, Ont. In 1887 he entered the House of Commons. In Uctober, 1892, be was made Minister of the Interior, being re-elected M.P. for Selkirk without opposition.

Hon Auguste Real Angers was born in October, 1838, in Quebec, and educated at the Nicolet College and Quebec Seminary. He studied law, and was called to the Bar of L. C. in 1860 and appointed a Q. C. in 1874. He entered the Legislative Assembly of Quebec in 1874, and was appointed a member of the Executive Council, 22 nd Sept., 1574, and held the office of Solicitor-General up to 1876, and from that date up to 1878 Attorney-Geaeral, when the Ministry was dismissed by the late Lieut.-Governor Letellier do St. Just. He was the leader of the Conservatives in the Assembly for three years. Was appointed a Judge of the Superior Court of P. Q. in November, 1880, and resigned this office 23 th Ociober, 1887 , on being appointed Lieut.Governor of the Province of Quebec. He has been twice married, first to a daughter of the late Senator Chilic, and secondly to Mdme. Hamel, widow of a former Quebee merchant,

Hon. William Bullock Ives was born in the County of Compton, 17th Nov., 1841. He is mainly self educated, only taking a short course in the Compton Academy. He gave his attention in early life to agricultural pursuits, though he studied law, being called to the Bar of Quebec in 1867 and appointed a Q.C. in 18\%0. He married in 1869 , the only daughter of the late Hon. John H. Pope. He entered the House of Commons for Richmond and Wolfe in 1878 which he represented up to the general election in 1891, when he was returned for his present seat, Sherbrooke.

Hon. Frank Smith was born at Armagh, Ireland, in 1822, and came out here in 1832, his family settling in Ontario. He engaged in commercial operations, and took an active part in the municipal polities of London, Ont. He was appointed a Senator in 1871, and in July, 1882,
became a Privy Councilior, became a Privy Councillor.

HoN, JuHN Carling was born in London, Ont., 23rd January, 1828, and educated there he engaged in mercantile pursuits. In 1867 he entered the House of Commons, and also did political service in the Provincial Legislature. In May, 1882, he became Postmaster-General, changing to Minister of Agriculture in 1885 . In 1891, he was called to the Senate, but resigned
that position and re-entered the House of Commons.
N. CLAREE WALLACE Was born in Woodbridge, county of York, in 1844, and was educated at the public schools. He taught school from 186410 1869, and then went into business as merchant and flour miller. He has held all the highest municipal honors, and is a prominent Orangeman, being at present the Grand Master of the order in British North America. He first entered the Commons in 1878, and has represented his present constituency, est York, ever since. He married, in 1877, a daughter of the late James Gilmour, of Ottawa.
JOHN Joserfi Curran, Q. C., B.C. L., LL. D., is a son of the late Charles Curran, a native of County Down, Ireland, who came to Canada early in the present century. The hon. member for Montreal Centre was born in Montreal on the 22nd of February, 1842, and was educated at St. Mary's College, Montreal, and at the Ottawa University. He graduated as a B.C.L. from MeGill College in 1462; and was called to the Bar of Quebec province one year later. He was appointed a Queen's Counsel by the Dominion Government in 1882. The Manhattan College, New York, under the presideney of the late Cardinal McCloskey, conferred the degree of LLL.D,
on him in 1881, Mr. Curran first entered Parliament in 1882, and was re-elected at each subseon him in 1881. Mr. Curran first entered Parliament in 1882, and was re-elected at each subse-
quent election.

JOHN Fisher Wood, Q.C., was born at Elizabethtown, Ontario, and is of Scotch descent. He adopted the legal profession, and was called to the Ontario Bar in 1876, becoming a Q.C. in 1890. He first entered the House of Commons in 1882, and was re-elected at the general elections
of 1887 and 1891 .

## THE LATE CABINET.

Upon the lamented death of Sir John A. Maedonald, G.C.B., P.C., on 6th June, 1891, the Hon. J. J. C. Abbott was called upon to form a Cabinet by His Excellency the Governor-General, and on li th June, 1891, he was sworn in as President of the Council. Owing to failing health he resigned the office on 25 th November, $18: 2$, when his Cabinet consisted of the following members :

## Instronomital.

## [By Walter H. Smith, Montreal.]

Astronomy is the most ancient of the sciences, Looking back through mists that encompass he earlier ages of the world, the infancy, perhaps much of the you th also, of this fairest of the Sciences is completely and hopelessly obscured. We can, howeve; imagine Astronomy-celesial creature-nursed in her infancy by the shepherds of Chaldea, "simply chatting in a rustic row" through their night watches. Jews, Persians and Arabians preserve the tradition that Seth, the son of Adam, was its first teacher. The Egyptians attribute it to the same source, Seth or Thoth, said to be the same as Hermes Trismegistus, "the thrice great." Therefore they adored Astronomy, always taught by them and the Chaldeans in connection with Astrology and the supposed influences of the planets and constellations. To honor her they raised those gigantic structures, the Pyramids, with the aid of thousands of pairg of dusky hands, at a period so long since that an entirely different constellation-Draco, and not Ursa Minor (the Dragon and not the Little Bear)-then "circled its ceaseless journey round the pole" of the heavens. Symbolized on each palace wall of those mighty cities, of which scarcely a wreck remains, Nineveh and Babylon, it is more than probable that some great astronomical discoveries had been made long before actual records begin. For it is more than likely that the simplest form of the telescope was, to certain of these ancient peoples, an accomplished fact, else how should they have come to represent Jupiter as a king supported by four smaller kings, or Saturn as a prince circled with a jewelled ring? Only the telescope could have shown them the planet Jupiter with his four moons, and the planet Saturn with his yet more wonderful ring system. The discovery of the apparent movements of Sun and Moon; the discovery of the planets, wanderers amongst the other stars, by their movements, came long before, in the earliest dawn of the science.

For the first problem to be mastered was the rising aud setting of the Sun. That alone must have taken an incredible space of time. To measure the shortening or lengthening shadows
made by the Sun in his annual progress was no mean task; to apportion him his true pigee in the made by the Sun in his annual progress was no mean task; to apportion him his trueplace in the constellations, as, day by day, each evening, the western constellations drew nearer and nearer to him, and day by day, each morning, the eastern constellations receded farther from him. To us, knowing. What we know, this is simple, easily explained and understood. Not simple, not easy, not readily explainable or quickly to be understood to that lonely shepherd watcher thousands of years since. For him there were no "Introductions to Astronomy," no "Easy Guides to the Constellations," save the introduction and guidance that Nature and Mother Wit gave him.

But at last the Sun's track was learned and mastered. It was known to be the same, year after year. In fact the Sun's track completed was found to complete the year itself. It was, indeed, the year in whose rounded circle, seed time and harvest, summer and winter, day and hight, had their being and periodical recurrence. The Sun was seen to have passed through a belt of constellations, now designated the Zodiac ; the exact path of the Sun within the Zodiac being termed the Ecliptic. They divided the Zodiac into twelve equal parts or signs, one for each month, to indicate the stages of the solar progress. The six during which the'Sun was above the horizon longer than he was below it (March to September) were termed "Northern" signs; the six in which the Sun was below the horizon longer than he was above it were termed "Southern" signs, The names assigned to the fancied figures seen in the stars composing these constellations or "signs " were:-

P Aries, the Ram; 8 Taurus, the Bull; II Gemini, the Twins; ${ }^{\sigma}$ Cancer, the Crab; $\Omega$ Leo, the Lion ; In Virgo, the Virgin; $\bumpeq$ Libra, the Balance; I Scorpio, the Scorpion ; I'Sagittarius, the Archer; Wo Capricornus, the Goat; $m$ Aquarius, the Water Bearer, and forsees, the Fishes. By this method, added to close application and continuous watching, the duration of the year in the earliest ages became very accurately known. Each sign then as now consisted of thirty degrees, it forming in itself a semi-sextile, or twelfth portion of the heavens; two signs $60^{\circ}$ (a sextile or sixth portion); three signs $90^{\circ}$ or one-fourth (Quadrature); four signs $120^{\circ}$ or one-third (Trine) ; six signs 1800 or one half (Opposition) ; the whole circle of the Heavens being $360^{\circ}$. Through this the Sun was found to move-apparently, for it is the Earth and not the Sun that moves-once every year.

The motion of the Moon amongst the constellations must have been easier to discover than that of the Sun. Her progress from night to night, whenever visible, is so rapid, and consequently so palpable, that it would be readfly noticed, Her phases from a slender streak, scarcely a crescent of light, just visible after sunset, increasing night after night to the half Moon or "quadrature" phase at first quarter, through gibbous to full Moon, rising as the Sun set ; then as steadily decreasing, going through all her phases in an inverse ratio, until she became barely visible as a streak of light, rising before the Sun, must have called attention to her fis the veriest infancy of Astronomy.

The Moon's motion was accordingly discovered and explained. So also were the striking phenomena of solar and lunar eclipses, when Sun or Moon are totally or partially obscured. When the Sun was eclipsed-it was correctly explained-the effect was due to the dark body of
the Moon coming between the Earth and Sun. They did not know, perhans those ancient astrothe Moon coming between the Earth and Sun. They did not know, perhaps, those ancient astronomers, that the shadow cast by the Moon can never exceed in width one hundred miles, or that this dark streak moved at a pace compared with which the fastest express train is a veritable snail-thirty miles per minute, or even that the duration of a total eclipse at any one spot cannot
expeed 7 min , 58 sec. But in China they made the prediction of eclipses a matter of state policy, exceed 7 min , 58 sec. But in China they made the prediction of eclipses a matter of state policy,
in Mexico the natives fasted and afficted themselves when an eclipse occurred, he North Amerimaginary causeg ined cone moon wounded, or that she was about to be swallowed up, both these Sun and Moon were reduced in more and proper occasions for grief. Finally, the movements of those "five other wandering fires that move" through perfect order. The "mystic dance" of allude to the visib'e planets, Mercury, Venus, Mas s , Jupiter illimitable expanse of heaven-1 wandering mazes correctly' threaded ; their config, Jupiter and Saturn-was learned and its with each other, were found to be co-related. Their apparently the Sun and Moon, as well as to obey certain fixed laws, and theories were propeupparently curious movements were found

It was not until the middle ef the fifteenth pounded to explain the same. astronomers so much as began to accept the tru century of the Christian Era, however, that with false theories they struggled alopg the true theory of the system of the Universe. Content order with ever-increasing difticulty, inventingting to turn the chaos of the false systems into contrary to nature, in order to carry themselves and their theles, orbits within orbits, etc, remained for Copernicus, a native of thorne in P and their theory over difficult spots. It rounded the study of Astronomy, he asserne, in Prussia, to let light into the darkness that sur the centre of the solar system ; that the Earth is after thirty years patient labor, that the Sun is it and all the other planets circle around the Sun. It remained only forder from the Sun; that not actually to invent, the telescope, to prove sun. it remained only for Galileo to perfect, if exhibiting Venus-a planet between the Sun and Earth-with Copernicus true, which he did'by only for Galileo to do this, and Kepler to prove tharth-with phases like the Moon ; it remained and not circles about the Sun, determining at the same time their ve planets are all ellipses, lution, etc. Still later, Newton was enabled the same time their ve:ocities, their times of revothe fall of an apple to the Farth, Earth and the other planets around the Sun, Moon in its orbit around the Earth, as well as the

## ECLIPSES,

In her passage around the Earth, deriving her light from the Sun, the Moon casts a shadow toward that part of the heavens opposite to the Sun. The Earth, in its passage around the Sun, cast converge to a point, in the form of both are smaller than the Sun, the shadows which they Sun. An eclipse of the Sun takes place when the dark to their size and distance from the between the Earth and Sun, intercepting the Sun's dark body of the Moon passes directly or New Moon

An eclipse of the Moon takes place when the dark body of the the Sun and Moon, intercepting the Su'sen the dark body of the Earth comes directly between only hapren at Opposition or Full Moon. If the Mon's throw shadow on the Moon. This can Earth in its passage around the Sun, the Moon would eclipse the Sun exactly with that of the be eclipsed herself at every Opposition or "Full" but her orbit the Sun at every change, and (called the Ecliptic) over $5^{\circ}$, she sometimes "Fasses above, sorbit departing from that of the Earth of "New" and"Full" Moon. Eclipses of the Moon are sometimes below the Sun at the times of the Sun, owing to the diameter of the Earth's shadow of much longer duration than eclipses three times as large as the diameter of the Marth's shadow at the Moon's distance being nearly as great as the Moon's distance, exceeding it in and the length of the shadow nearly four times the Moon's.
as Moon always come on from the come on from the West, and pass over eastward. Eclipses of the motion of the Moon in its orbit.
. This is the result of the easterly Umbra, the lighter part the Penumbre are not equally dense. The darkest part is called the miles, its breadth at the Moon's distance The average length of the Earth's Umbra is 860,000 Umbra is about 239,000 miles, its greatest diamt 6,000 miles. The average length of the Moon's eclipse is one where only part of the Sun or Moon is obscured's surface 170 miles. A partial places outside the Umbra. Inside the Umbra, it is total.

## HOW ASTRONOMICAL EVENTS ARE FORETOLD.

In predicting eclipses, a knowiedge of the path taken by the Moon around the Earth has first to be obtained. This path being sometlmes above, sometimes below, the shadow of the Earth, "Nodes," that is, ascendiug from South Full" Moon, but only when the Moon is at one of her and then only are eclipses possible By wath to North, or descending from North to South. Then eclipses, transits, etc., are calculated by former ph, it was found that after 223 lunations, -for all and Earth returned so nearly to the same position with respeet to each othere, the Sun, Moon regular return of the same phenomena. This grand periespect to each other that there was a They named it "Saros," If, therefore 7 hours, 42 minutes and 31 seconds, we have a return of that any eclipse we add 18 years, 11 days, eclipses, 41 of the Sun and 29 of the Moon.

To foretell a transit of Mercury across planet with the mean motion of the Farth ine Sun's disc, we compare the mean motion of the both return to the same positions. The kn, in order to cetermine the period in which they will the hour when the planet rises, souths, or sets, in fact these periods also elables us to determine relative position of Earth, planet and Sun, because at the the phenomena depel dent npon the again, recurring in the same order.

Whence we find that 7 periodical revoluions of the Earth are equal to 29 of Mercury, 13 revolutions of the Earth are equal to 54 of fercury, 33 of the Earth to 137 of Mercury, 46 of the Earth equal to 191 of Mercury, etc. Thereore a transit of Mercury, at his ascending or descending node-for at such times only can a ransit occur-will happen at intervals of $7,13,38,46$, etc., years. Transits of Venus calculated 1 a similar manner are found to occur at the same node at intervals of 8 and 235 years,

## DISTANCES OF THE STARS.

On looking up to the vault of heaven any fine night, the first idea in relation to the distance the stars is, that they are placed at an equal distance, every one of them, upon the surface timate of their distances. In the telescope, the heavens become, we are unable to form any cle. New stars burst upon the sight in every directions become a still more brilliant specithout end, at immense distances from us and frion, not a thousand or two but multitudes hole of space appears to be illuminated with star spheres. oner, yet so numerous that the umber at one hur dred millions, all of them suns, many of them far larger, more brilligut the orious than our Sun, each presumably with its attendant system of worger, more brilliant and Such is their immense distance that only in a few instances has worlds.
hese bodies been detected, even when measured with the longest my visible displacement of stronomers, viz., the earth's orbit, a line one bud the longest measuring rod available to ength. In no case can the apparent displacene hundred and eighty-five millions of miles in ost delicate measurements. Half of this displacement is called, except by the most careful, the ase has a parallax of one second of arc been detected. The star whose parallax is one second would
arth from the Sun, or say, nineteen million million miles, 206,265 times the distance of the is. The velocity with which light moves would carry it. No star is nearer to the earth than mes in one second. Yet it would take it, at this rate, more than three years to reaen and a half istance. Suppose all the stars blotted out of existence to-night, it years to reach usfrom that car s before we missed a single one of them. The nearest of the stars is supposed to be
ar in the Constellation Centaur. It is estimated thas we know-Alpha Centauri ; the brightest ight is believed to take over 16 years to reach us from Siright takes about 3/ years to reach us. 5 years to reach us from Arcturus, and over 40 years from -tances it is thought it takes the light of stars hundreds of years (the Po'e star). In many arth, in some instances perhaps thousands of years.

## Fome Congtellations, and hoto to find them.

I have often thought it strange that the constellations-by this I mean the leading constelions, not the less important groups-are so little known. Little known, not only to the genrs look down on them education who know a great deal respecting other things, Yet the thout receiving from them so much as an, intelling ceaseless courses through the illimitable eir whole lives unrecognized and unknown. Much of the ignorance concerning the na,
er, to the mistak $\mathbf{n}$ idea that char's and names of the constellations and stars is due, I consincied figures-bears, lions, bulls, goats, etc, with which the celestial sphere must contain those k . The resemblance, in only a very feve cases, exists in the ancient astronomers covered the nd worse than useless, because they confuse the student. Whe rest the figures are arbitrary ames and forms of the constellations, these figures ient season. He sh .uld begin with one well-gures should be carefully kept until a more conveould observe its exact loeation and appearance for constellation, then proceed to another. He inple chart showing the brightest stars oaly. The several nights, using at the same time a me of them should be observed in a telescope,-by telescope 1 do not mes should be learned; at a small hand glass properly steadied, costing,-by telescope 1 do not mean a large instrument ill do a great deal of good and useful work. By means such as these, thars; even an opera glass ach an intelligent knowledge of the constellations:

## "For ever singing as they shine, The hand that made us is divine."

The whole heavens appear to turn around us once a day. If any fine evening throughout the ove. Just award the North, we find a point high up, round which all the other stars appear to pha Polaris by modern nations by the of medium magnitude. That is the pole star, called he stars near the Pole Star never set, but circle round it, rand by the Arabians Alruccabah. orizon of Canada.
The two most important groups in the ear), and Gassiopela (the Lady). The Great Bea of the Pole Star ara Ursa Major (the Great $s$ chipf stars (seven in number) being variously called "then of all the constellations, hurles' Wain," (corrupted into "Charles"Wain) ete "the Plough," "the Dipper." "the ointers-always point toward the Pole Star. The Plough never sets In the stars-called the is low down, under the Pole Star ; in the winter evenings, it is in the the autumn evenings enings nearly overhead ; in the summer evenings it is in the North West. North East; in spring

The Plough or Dippar,

Cassiopera.

Another boautiful and interesting group of stars is the constellation Cassiopeia, sometime called the Lady in the Chair. Its five most important stars appear very much like a capital "W," one half a little more flattened than the other. The place of Cassiopeia is easily found when we know the Plough and Pole Star the latter being about half way between the two constellations. That is to say, Cassiopeia is on the opposite side of the Pole Star When the Plough is low down in the North Cassiopeia is overhead; when the Plough is overhead, Cassiopeia is in the North. Wher ever one is seen, the other is directly opposite

It was in this constellation, on November 8th 1572, that Tycho Brahe, a celebrated Danish astronomer, first noticed the outbreak of a new star, which became so brilliant all at once that i surpassed the brightest p'anets and was seen at noonday. Gradually its great brilliancy faded away, until March, 1573, when the star became
extinct. Some imagined that it had appeared before in 945 and 1264 ; they predicted its appear ance again during the present century, but nothing has been seen of it.

## Che \$xtience of 3 sptrology.

## [By Walter H. Smith, Montreal.]

Sinca the forbidding, by an Act of the English Parliament, of the practice of this Ancient Science, it has fallen greatly into disrepute. Wisely perhaps in most instances, Astrology having been degraded to such an extent by those professing it, until it became a by-word and a shame. The lowest charlatan, the commonest disreputable woman, prior to the statute against it, did not hesitate to pretend to a knowledge of Astrology for the sake of gain. Now that we can look at the question in all calmness, after examining the claims of what has been reseued of this ancient science-for it is a science, true or false-from the dirt and rubbish its pretended practitioners heaped upon it, there would appear to be room at least for candid investigation into the claims of its supporters of the present day.

As a candid investigator, as becomes all those who are sincere searchers to announce when convinced of a supposed fact, I have no hesitation in announcing that some of the coincidences that I have noted are remarkable. The designation of the planet Saturn as the "greater incortune, seems to have foundation in fact. It is claimed by nineteenth century astrologers that at least seven out of every ten persons born with this planet in elevalion, i.e., on the meridian (due South or nearly due South) will, no matter how brilliant or successful their careers, come to some grievous or disastrous end. A notable instance of this rule is found in the lives and nativities of the three Napoleons. The first, as Consul, Dictator, Emperor, raises himself to the highest pinnacle of power, only to die, eating out his heart on the surf-beaten shores of an island in mid ocean, the captive prisoner of his hereditary foes! The nephew, although less and die at last under the shis uncle's throne, only to suffer similar shipwreck of his fortunes, apportunities, patience surgeon's knife, an exile, in a strange land! The Prince Imperial with opportunities, patience and hope might have sat on the throne of his father, had he not, with reckless impetuosity, sought favor in the world's eyes as an ally of the British arms, only to be killed in the early flower of his youth in Southern Africa, These three men were all born with Saturn on the Meridian. Moreover, they all had the sign Capricorn rising at birth. Capricorn, considered a sign favorable for lasting fame, is also considered ery unfortunate, where
benefic things do not assist.

Now I admit that it seems absurd that the prsitions of the heavenly bodies at the moment of hirth should affect a child. I have been one of the loudest in my ridicule of Astrology ; it is from examination alone that I have been convinced. Not, however, of all the claims, even of its most modern and least enthuslastic professors. There are many things which even they profess that Astrology cannot tell, perliaps never will tell, no matter how thoroughly it may be un lerstood; but, like the science of Phrenology, this "Scieuce of the Stars," as the votaries of molern Astrology and Planetary Influences love to call it, has for its foundation a basis of fact There may be, indeed, I might say plainly there is without doubt, a deal of rubbish in the snperstructure. Thie nice turns of the art lead astray, the broad features cannot very well be mistaken even by a person of average intelligence.

Man, horn into the world, is free. Free to choose his path, yet who is there that is not more or iuss a slave to his surroundings? He may become the architect of his fortune ; he may foll
wer and lower in eserved," he dies ngs of hunger. the filler percep own hand! wer and lower into the most abject poverty, until, like the immortal Otway, author of "Venice reserved," he dies by the roadside, gnawing a crust of bread that he had begged to appease the ngs of hunger. He may have the brain of a clod, yet amass wealth and honor; he may have the finer perceptions and capacities of the poet, artist or gifted musician, yet die in want, by sown hand! He may "save every cent,"-he generally does if Saturn is very strong at lis rth; he may lavishaway his millions on princely establishments and riotous living, if Venus d Mars have the upper hand !
Astrology, therefore, serves to emphasize the text : " the race is not always to the swift, nor $\theta$ battle to the strong, neither yet bread to the wise, nor yet riches to men of understanding; r yet favor to men of skill ; but time and chance happeneth to them all." Literally, times good events and of evil events happen to all. Taleut, energy, pluck, perseverance will do ch, backed by good health, and a man born with a bad nativity may make his mark. He has, wever, to fight against odds, while his comrade, born under favorable aspects, finds every event portune to his purpose, finds everything on the stream of life run smooth. Success attemls d Meridian free from the aspects of Satrologers, who have the Sun, Moon, ascending degree piter and Venus, Jupiter located within the first 60 degrees from and below the horizon the "ascendant") or near the meridian (in the "Midheaven"), especially if configurated (in pect) with the Moon or the Sun, is considered very furtunate. Saturn thus placed, instead of piter, is credited-as in the case of the three Napoleons-with ultimate ruin, and severe misrtune, if not an early death. In this connection, a modern astrologer has pointed out (London ectator, Feb, 22nd, 1862), that the nativities of the Bourbon family, from Louis XVI down, riI. Princess Elizabeth, Duc de Berri, etc, ete. His list included Marie Antoinette, Louis II. Princess Elizabeth, Duc de Berri, etc., ete.

Of almost equal importance to success in the world is the choice of a partner in life. Marh other's burdens cheerfully which these ensure, is the sourest of failur and the bearing of ad Sea fruit, According to Astrology, sympathy is produced in persons whose nativities exbit harmonious configurations of the Sul and Moon, Venus being at the same time in favore configuration is said to prove an additional and most powerful testimony. With such pects, it becomes a case of "love at first sight," strengthening and augmenting throughout e rest of life. I have examined instances of this and found what may be termed the "coinci-nees"-are they not rather scientific facts ?-remarkable to a degree.
The study of this much abused science throws a flood of light on the grave questions of atrimonial felicity and infelicity. We take pains to pair our horses and dogs, even our sheep d swine, yet leave the selection of our partner and the mother of our children, who are as the ple of our eye, to blind chance. When the nativities of a pair of "star orossed" lovers are cordant, no lasting evil will ensue if they are separated. I have a case in my mind where thing but evil has ensued from the marriage of a truly unfortunate pair of lovers. Such ngs, to quote the words of the great Kepler, after similar investigations, lead me to aver that most unfailing experience of the excitement of sublunary natures by the conjunctions and Perts of the planets has instructed and compelled my unwilling belief,"
Pelogys by whiche, to sum up-for it is impossible in this short article to treat of "Mundane" rology, by which publiceventsare sought to be foretold; or of "Astro Meteorology," the art oreteining the weather by the aspects and positions of Sun, Moon and planets ; of "Horary" re well not entirely nor every-day occurrences are sought to be elvidated; perhaps, I say, it dern eharlatanisn but to investigaince as wholly compounded of ancient superstition and id fast only that which is good in it, whether it spring direct from, to the end that we may ology, or from the later buds of Planetary Influence, Solar Biology, ete root of the Ancient

Half to brother and half to wife,
Equally.
Half to wife, one-fourth to mother, one-fourth $p c$ stirpes to deceased brother or sister's children.
Half to wife, one-fourth to brother or sister per capita, on fourth to deceased brother or sister's child per stirpe Half to brother or sister per capita, half to children deceased brocher or sister per stirpes.
All to brother.
By the 23rd section of R, S. O., c. 132 , it is enacted that the separate personal property of married woman dying intestate shall be distributed in the same proportion between he husband and children as the pers onal property of a husband dying intestate is to be distribute between his wife and children. And if there be no child or children living at the death of th wife so dying intestate, then such property shall pass or be distributed as if that Act had not passe Descendants of intestates always take per stirpes: Re Natt, 37 Chy. Div. 517.

## Real Estate of Intestutes.

Since 1 July, 1886, realty descends to personal representatives, whether the deceased die testate or intestate. In case of intestacy to be distributed in the same way as personal estate subject to the following modifications:-

A widow is entitled to elect whether she will take dower, or a distributive share of he deceased husband's real estate (R.S.O. e. 108, 8, 4, s-s, 2).

A husband entitled to courtesy may, by deed executed within six calendar months of his wife's death, eleet to take courtesy in lieu of a distrihutive share (R.S.O. c. 108, s. 4, 8-8. 3).

The father, mother, brothers and sisters of an intestate dying without issue are to share equa ly in real and personal estate, to the exclusion of grandfather and grandmother (R.S.O. c. 118, s. 6

As to real estate not disposed of or conveyed by executor or administrator within 12 month after decease of the testator or intestate , see 54 Vict., c. 18,s. 1.

## The First Fire Brigade.

It was not till 1830 that Braithwaite, of London, constructed the first steam fire engine, an it was not till 1852 that its value was recognized by public use, either in New York or by th London Fire Brigade. Water engines were known early in the eighteenth century, and wen the invention of a Dutchman named Heyden. By 1740 these engines were brought to "such pitch of perfection that by their means water might be forced up to a surprising height, wit almost incredible swiftness, in a large and continued stream."

## The First Emigrant Ship.

When emigration is spoken of we are supposed to refer, not to those who went forth in th Mayflower a:d other vessels to seek more political and religious liberty in the New World the they could enjoy at home, but to that which now bears the name and is comparatively a ne thing. It did not attain any dimensions until the close of the great European wars ; but $t$ total number of emigrants in 1810 was only 2,081 . The first emigrant ship, properly so called, $w$ the B naventure, which left London on January 2nd, 1634, under the command of Jam Rycroft, bound for Virginia with 170 emigrants,-men, women and children.

## The Discovery of Canada.

If we except the vague statements about Scandinavian voyagers having previously lande there, it may be s tid that Canada was d'scovered by John and Sebastian Cabot, in June, 1497 but no permanent settlement was formed until the French arrived in the sixteenth centur According to a Castilian tradition, the Spaniards visited the country before the French, al finding neither gold nor riches of anv description, exclaimed, "Aca vada" "Here nothing ") in the presence of the natives, Hence the name Canada. The derivation of th term'generally received is that of Charlevoix. He says that Canada, signifying in the Iroquo language " a number of huts," was applied by the inhabitants to the first settlements made b the French, and that the entire province afterwards received the designation.

## fracts about Canada.

if Dominion of Canada covers the largest portion of the North American continent der one government. Exclusive of Newfoundland and Labrador, which have not yet come to Confederation, Canada has an area of $3,456,383$ square miles; while the United States, ich comes next, possesses, even including Alaska, only $3,025,600$ square miles of territory. nada is conspicuously a land of natural opportunities. Unequalled fisheries line the east ast ; coal and lumber dispute with great gardens of fruit the position of the pre-eminent aracteristic of the Maritime Provinces ; into the lap of " Old Canada" nature has tossed a thora of gifts from the mines of Lake Superior and the forests of the Ottawa to the farms of tario and Quebec. The prairies of the West present the largest uncultivated wheat area of the rld, with a land of admitted superiority in quality ; while the Rockies, with their slopes to the cific and to the east, bind down under ridged reaches of rock a mineral wealth that no one yet estimate.
It is about 3,500 miles from Atlantic to Pacific, and about 1,400 miles from the Aretic ocean
he American boundary. The great fresh-water lakes of the Dominion make one of the modern aders of the world. Four come like giant foot-prints down from the basin of the Mackenzie r-the Great Bear ( 11,200 square miles), the Great Slave ( 10,100 square miles), Arthabasea ( 4,400 are miles) and Winnipeg ( 9,400 square miles). Lakes Wimipegoosis and Manitoba lie about larger Winnipeg, as if the giant had paused to rest a $n$ oment before starting down erior, Huron, Erie and Ontario (having with Lake Michigan a total area of 120,000 square es) to the sea. The four great rivers of Canada-the St. Lawrence, the Saskatchewan, the ckenzie and the Fraser-are world-renowned ; while we have a bundle of others that would $k$ high in a country of less gigantic proportions. Under one flag roll the waters of the Gulf t. Lawrence, Hudson's Bay ( 1,000 miles long, 600 miles wide and 350,000 square miles in area), Bay of Fundy, and the Straits of Georgia. Peaks of the Rockies tap the clouds at a height 6,700 feet, and Canadian enterprise has swung a railroad over them at an altitude of 5,300 The Laurentian range in Old Canada, the Notre Dame mountains in Quebec, the North and South mountains and the Cobequid mountains of Noya Scotia, and the Cascades lying west of the Rockies in British Columbia, make up the remainder of our hill scenery.

The Dominion of Canada" owes its birth to the adoption of the British North America

Aet off 1867 by the Imperial Parliament. Prior to that date, the colonies in British North

America led a separate existence, the present provinces of Ontario and Quebec only being united as the " two Canadas." A movement for the union of the Maritime Provinces springing up at a moment when the Government of the "Canadas" had reached a deadlock, the larger idea recommended itself to our statesmen that the British Colonies on this continent should come ther. Delegates from the Canadian Parliament met a Conference of Maritime representain Prince Edward Island, and the famous gatliering at Quebec followed, when resolutions passed upon whieh the B. N. A. Act-the Federal Constitution-was drafted. This came foree on July 1st, 1867, when the Dominion was composed of Quebec, Ontario, New Brunsand Nova Scotia. Manitoba and the Northwest Territories were added on July 15th, 1870 ; ish Columbia on July 20th, 1871 ; and Prince Edward Island on July 1st, 1873. Aside from agricultural possibilities of the prairies, the richest corner of Canada's natural store-house at which holds her minerals. With the single exception of tin, there is no mineral of ked eeonomie value that she is not known to possess ; and much of her mineral land is yet plored. The following is the list of Canadian minerals, shown with samples by the GeoloSurvey at Ottawa
1.) Metals and their Ores.-Native iron, magnetic iron ore, iron sand, hematite, ilmeor titaniferous iron ore, limonite (including bog iron ore), spathic iron ore, clay ironstone, e eopper, sulphides of copper, sulphide of zine, sulphide of lead or galena, native silver ores of silver, gold, platinum, sulphide of antimony, oxysulphide of antimony, and sulphide ismuth.
(2.) Materlals used in the Production of Heat and light.-Anthracite, bitumicoal, lignite or brown coal, bituminous shale, petroleum, peat.
(3.) Materials applicable to certain Chemical Manufactures and their feodects.-Iron pyrites, sulphuric acid, \&o., pyrrhotine or magnetic iron pyrites, apatite or hosphate of lime, magnesite or carbonate of magnesia, calcite or carbonate of lime, chromic ron, oxides of manganese.
(4.) Mineral Manures.-Gypsum, shell-marl,
(5.) Mineral Pigments and Detergents.-Iron ochres, \&c., barytes or heavy spar, soap clay.
(6.) Salt, Brines and Mineral Waters.-Salt and brine, mineral waters.
(7.) Minerals applicable to Common and Decorative Construction--Limestones, dolomites, sandstones, granite and syenite, gneiss, Labradorite rock, marbles (limestones), serpentines, breccias, slates, flagstones, common lime, hydraulic lime and brick clays.
(8.) Refractory Materials, Pottery Clays and Pottery.-Plumbago or graphite, soapstone, potstone, mica rock, mica, asbestos, fire clays, sandstone (refractory), and pottery clay.
(9.) Materials for Grinding and Polishing.-Stone for manufacturing whetstones, hones, bath-brick, Tripoli, grindstones and millstones.
(10.) Minerals applicable to the Fine Arts and Jewellenty.-Lithographic stone porphrites, Labradorite, albite, perthite, jasper conglomerates, amethystine, quartz, agates, amber, Canadian precious stones.
(11.) Miscellaneous.-Sandstone for glass making moulding sand and clay, carbonaceous shale, artificial stone.

Although nothing but the feeblest enterprise has yet scratched the surface of our mineral deposits, the production for 1891 is put at $\$ 20,368,901$. The highest items in this list are -coal $\$ 7,792,175$; asbestos, $\$ 1,000,000$; copper, $\$ 1,238,780$; nickel, $\$ 2,775,976$ and petroleum, $\$ 1,004,546$

The climate of Canada has suffered greatly in reputation in the past from the mistakel notions of the world. In the first place, it is proper to speak of the climates of Canada, for we are too big to have our weather in the singular. On the prairies, the temperature goes down it the winter to a low figure, but the dryness of the atmosphere prevents severe cold from being felt. In many parts cattle graze out all winter, and on the British Columbia coast, the mea: winter temperature runs from 40.4 at Esquimalt to 33.8 at Vancouver. The winters in Old Canada are invigorating and enjoyable, the mean winter temperature for a number of place being as follows :-

| Charlottetown, P. E. | 19.9 | Montreal, Que............16.7 |
| :---: | :---: | :---: |
| Halifax, N. S | 30.2 | Toronto, Ont ....... ... 24.6 |
| St. John, N. B | . 21.5 | Windsor, Ont. . . . . . . . . . 25.9 |

The prosperity of our people may be seen by the bank statistics. In the Government pot office savings banks there was on deposit at the close of the fliscal year of 1891, $\$ 21,738,648-2$ average of $\$ 194.44$ per depositor. The average in Great Britain and Ireland is only $\$ 68.19$. A bot $\$ 20,000,000$ was also on deposit in the Government savings banks-distinct from the post officein Nova Scotia, New Brunswick, Toronto, Winnipeg, British Columbia and Prince Edwar Island. These latter banks are being transferred to the post office department as the position superintendent at each place becomes vacant. The Canadian banks have a paid-up capital $\$ 60,742,366$; notes in circulation to the amount of $\$ 31,379,866$; total deposits of $\$ 149,431,57$ and assets amounting to $\$ 269,491,153-\$ 81,153,649$ over liabilities. Bradstreet's agency shor that while only 11.4 per cent. of the failures in Canada were uncontrollable, 20.3 per cen of the failures in the United States come under this head. The other failures were caused $\mid$ incompetence, inexperience, unwise credits, speculation, etc.

The possession by Canada of the great water-way from the heart of the continent at Po Arthur, Duluth and Chicago, to the sea, has given her the opportunity of building a magnif cent system of canals. From Port Arthur to Belle Isle 2,260 miles of continuous navigatic has been opened up, in which is included $71 \frac{3}{8}$ miles of canalling. So soon as the Canadis canal at the Sault is completed a ship can pass over every mile of this under the British flas The present Canadian canals on this route are :-

The Welland has a depth of 14 feet, and the other canals are being brought to the sar standard. A ship channel below Montreal enables vessels drawing $27 \frac{1}{2}$ feet to reach that po from the sea. Other Canadians canals are :-

The Rideau system connecting Ottawa and Kingston.
The Ottawa system rendering the Ottawa river navigable from Montreal to Ottawa.
The Chambly system connecting the St. Lawrence and Lake Champlain.
The Murray Canal-5 1-6 miles from Lake Ontario to Bay Quinte.
St. Peter's Canal, Cape Breton, N. S., from the Atlantic to Bras d'Or Lakes.
Burlington Bay Canal, from Lake Ontario to the Port of Hamilton.
The light draft Trent river system about 155 miles in length.
The total amount expended in the construction alone of the Canadian canals is $\$ 57,214,28$ and in 1890 they carried a total tonnage of $3,860,869$ tons.

Her Majesty Queen Victoria was the only child of Edward, Duke of Kent, fourth son of George III., by his marriage with Victoria, daughter of the Duke of Saxe Cobourg. Her Majesty was born in London, at Kensington Palace, on 24th May, 1819, and christened Alexandrina Victoria. At that time George III. was still King, and she was not the direct heir to the Throne, to which upon the death of William IV., June 20, 1837, she succeeded. The formal coronation ceremonies took place in Westminster Abbey on June 28th, 1838, and on the 10th her cousin Francis Albert Ael Royal, St. James' Palace, London, Her Majesty was married to Saxony three monthert Augustus Charles Emmanuel, of Saxe Cobourg and Gotha, Duke of Saxony, three months her junior, afterwards on 25th Jane, 1857, endowed with the title of at Delhi Her Majesty was proclaimed Empress Victoria, by the Grace of God, of the United Kingdom, and her full title is now Her Majesty Defender of the Faith, Empress of India (ed Kingdom of Great Britain and Ireland Queen

## The wopal wineage.

Upon the death of Queen Anne, daughter of James II., without issue, the succession to the rown devolved upon the House of Hanover.

George I., Elector of Hanover, was the eldest son of Sophia, daughter of James I., by her narriage with Ernest Augustus, Duke of Brunswick, Lunenburg, Elector of Hanover,
George I. was succeeded by his eldest son as George II.
George II, was succeeded by his grandson, the eldest son of the Prince of Wales (who died George IIII, in his father's life time).
George III. reigned from 25th October, 1760, to 29th January, 1820, the longest reign in the annals of England. He was succeeded by his eldest son, who as Regent had previously exercised George IV.
the title of King of France. English King since Edward III. who at his succession discontinued married Prince Leopold George Frederick, afterwards King of the Belgians. Her death in ird son of George III William IV. succeeded next surviving brother of George IV.
at his death the Crown went to our June, 1830. His only two children died in infancy, and present Queen, who was the only danghter of Edward Duke Kent for a time commeorge III., younger brother to George IV. and William IV. sent Duke of Cambridge.
Mary Adelaide, Duches.
has four children, the yonngeck, born Nov. 27, 1833, sister to the present Duke of Cambridge,
Claudine Agnes, familiarly known as the Princess May of Teck, Mary Augusta Louise Olga Pauline
the late Duke of Clarence.
Ernest Augustus Ernest,
878, to Princess Thyra of Denmark.

## The Civil JList.

The Civil List dates from 1697, and was thence voted at the accession of each Sovereign ; but until 1837 many items, such as the salaries of judges, ambassadors and ministers of State, were included, and on the other hand the hereditary revenues from the Crown lands were supplemented by parliamentary grant. Upon the accession of Queen Victoria the Crown lands were surrendered to the direct control of Parliament, and upon the recommendation of a Select Committee the Civil List was fixed at the sum of $£ 385,000$ per annum, made up as follows :

Class I. Her Majesty's Privy Purse
II. Salaries of Her Majesty's Household, and retiring allowances. See details below
£60,000
" III. Expenses of Her Majesty's Household,
131,260
172,500
Royal bounty, alms and spec
Sundry unspecified expenses
13,200
8,040
The payments into the National Exchequer out of the net income from the woods, forests and land revenues, formerly received by the Sovereign, have ranged from $£ 10,000$ to over $£ 400$, 000 per annum. The average during the present reign has been about $£ 375,000$.

The salaries of the several departments of the Royal Household and Superannuation allowances amounting to $£ 131,260$, are made up as follows:

1874, an who gav

After the death of Sir John Macdonald on June 6th, 1891, Sir John Thompson was asked to form a Ministry but declined. Mr. (now Sir John) Abbott undertook the task, and continued the Ministers of the late Cabinet in their respective portfolios until the reorganization of the administration which resulted in the present Government.

EDominion foarliamentgi Since 1867.

## Parliamentary Procedure.

Feby., Feby., April, 10

SPRaker-This title comes from the British usage of allowing "the faithful Commons"
oose one member who should "Speat" for them to the monarch. He also presided as
ver the sittings
e, but the Speaker of the Senate is nominated by the Government of the day vote of the aker" has been translated into French as "L"Orateur." Government of the day. The term PUTY SPEAKER-Is really the Chairman "LOrateur."
hole House, and in the absence of the Speaker when Parliament is in in at all committees of Governor in Councll-This phrase means the Cabinet in Councll with ral.
AL Assent-All bills after passing both the Commons and Senate, mel nt absence Governor, which is given with considerable ceremony in the Senate Chamber. eabsence of the Governor, a Justice of the Supreme Court frequently takes his place
Gentleman Usher of the Black Rod-Is an official of the senate who summone.
ESTION OF PReet the Governor, and conducts all ceremonies of importance.
gstion of Privilege - When any of the privileges of a Member of Parliament have been
yed, he may bring it up as a "Question of Privilege" without notice and at any time. It
Is also a Civil Serviee Examiner.

Government Days-Government business is given the precedence on Government Days; an private business on Private Members Days. Members are frequently allowed to put questions the Ministers early in the sitting on Governinent days.

BILLS-There are three kinds of bills. Private bills are introduced by private members deal with questions touching individual citizens, such as railway incorporation, divorce, et Publics bills are intended to be laws affecting the whole people. Government bills are eac introduced by a minister of the Crown with the consent of his colleagues. All bills are re three times in each House, and considered in Committee of the whole. Private bills go likewi before the appropriate Standing Committee of each House.
Adjournment - Is the rising of the House from day to day. Prorogation is the closing o session, and dissolution is the final civil death of a Parliament, after which a new one must elected. The Speaker leaves the chair every day of the session from $6 \mathrm{p} . \mathrm{m}$. until, $7.30 \mathrm{p} . \mathrm{m}$. duri which time the House takes recess.
Treasuby Board-A committee of the Cabinet consisting of the Ministers of Finan Customs, Inland Revenue, Justice and one other nominated by the Governor-in-Council, havi to do with all matters of finance. The Minister of Finance is Chairman and his Deputy, Seer tary.
The Budget-Is the annual financial statement of the Finance Minister.
Estimates-The estimated expenditure of Government for the coming year submitted Parliament by the Minister of Finance.
SUPPLY - When the House resolves itself into committee of the whole to consider estimates, it is said to be "in supply ${ }^{\prime}$,'
Ways and Means-all measures for raising the revenne, $i e$, providing ways or means paying the expenses of Government-are considered by the House in Committee of the who cafled the Committee of Way and Means.
Concurrence-After the House has passed the estimates in Committee of Supply, the C mons "concurs" in each item with the Speaker in the chair. This is the only time when House can be divided upon an item.
DIVIsion-The Commons vote by standing-first the "Yeas" and then the "Nays"-ea member in his place until his name is called by the Assistant Clerk, the Clerk keeping record. In the Senate, they are recorded as "Contents" and "Non-Contents."
Property qualification-None for Commoners, and $\$ 4,000$ real and personal estate Senators.
Strangers in the Gallery-An old fletion is that nostrangers are allowed in the galler The House can now clear the galleries by a majority vote, but once a single member could so by calling the attention of the Speaker to the presence of "Strangers "there.

## 

The B. N. A. Act was passed by the Imperial Parliament in 1867 at the instance of the representatives of the Provinces of Canada, New Brunswick and Nova Scotia, and constitutes with its amendments the Constitution of the Dominion of Canada.
An Act for the Uinon of Canada, Nova Scotia and New Brunswick, and the Government thereof, and for Purposes connected therewith.

## [29th March, 1867.]

Whereas the Provinces of Canada, Nova Sco ${ }^{-}$ tia, and New Brunswick have expressed their Desire to be federally united into One Dominion under the Crown of the United Kingdom of Great Britain and Ireland, with a Constitution similar in Principle to that of the United Kingdom:
And whereas such a Union would conduce to the Welfare of the Provinces and promote the Interests of the British Empire :

And whereas on the Establishment of the Union by Authority of Parliament it is expedient, not only that the Constitution of the Legislative Authority in the Dominion be provided for, but also that the Nature of the Executive Government therein be declared :

And whereas it is expedient that Provision be made for the eventual Admission into the Union of other Parts of British North America:
Be it therefore enacted and declared by the Queen's most Excellent Majesty, by and with the Advice and Consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the Authority of the same, as follows :

## I.-Preliminary.

1. This Act may be cited as The Brit North America Act, 1867.

## III.-Executive Power.

The Executive Government and Authority and over Canada is hereby declared ontinue and be vested in the Queen.
. The Provisions of this Act referring to Governor General extend and apply to Governor General for the Time being of da, or other the Chief Executive Officer dministrator for the Time being carrying e Government of Canada on behalf and e Name of the Queen, by whatever Title designated.
There shall be a Council to aid and adIn the Government of Canada, to bestyled Queen's Privy Council for Canada ; and Persons who are to be Members of that heil shall be from Time to Time chosen summoned by the Governor General and m in as Privy Councillors, and Members of may be from Time to Time removed e Governor General.
All Powers, Authorities, and functions under any Act of the Parliament of Britain, or of the Parliament of the d Kingdom of Great Britain and Ireland, the Legislature of Upper Canada, Canada, Canada, Nova Scotia, or New wick, are at the Union vested in or exable by the respective Governors or Lieut Governors of those Provinces, with dvice, or with the Advice and ('onsent e respective Executive Councils thereof, conjunetion with those Councils, or with Number of Members thereof, or by those rnors or Lieutenant Governors indivi$y$, shall, as far as the same continue in ence and capable of being exercised after Inion in relation to the Government of la, be vested in and exerciseable by lovernor General, with the Advice or the Advice and Consent of or in conon with the Queen's Privy Councll nada, or any Members thereof, or by Aovernor General individually, as the requires, subject nevertheless (except respect to such as exist under Acts of rliament of Great Britain or of the Part of the United Kingdom of - Great n and Ireland) to be abolished or altered Parliament of Canada.
The Provisions of this Act referring Governor General in Council shall be ued as referring to the Governor Generng by and with the Advice of the Queen's Council for Canada.
It ghall be lawful for the Queen, if Her ty thinks fit, to authorize the Governor al from. Time to Time to appoint any H or any Persons jointly or severally to Deputy or Deputies within any Part or of Canada, and in that Oapadity to exer-
cise during the Pleasure of the Gavernor General such of the Powers, Authorities, and Functions of the Governor General as the Governor General deems it necessary or expedient to assign to him or them, subject to any Limitations or Directions expressed or given by the Queen ; but the Appointment of such a Deputy or Deputies shall not affect the Exercise by the Governor General himself of any Power, Authority, or Function.
15. The Command-in-Chief of the Land and Naval Militia, and of all Naval and Military Forces of and in Canada, is hereby declared to continue and be vested in the Queen.
16. Until the Queen otherwise directs the Seat of Government of Canada shall be Ottawa.

## $I V$.-Iregislative Fower.

17. There shall be One Parliament for Canada, Consisting of the Queen, \&n Upper House styled the Senate, and the House of Commons.
18. The Privileges, Immunities, and Powers to be held, enjoyed, and exercised by the Senate and by the House of Commons and by the Members thereof respectively shall be such as are from Time to Time defined by Act of the Parliament of Canada, but so that the same shall never exceed those at the passing of this Aet held, enjoyed, and exercised by the Commons House of Parliament of the United Kingdom of Great Britain and Ireland and by the Members thereof. See Appendix B.
19. The Parliament of Canada shall be called together not later than Six Months after the Union.
20. There shall be a Session of the Parliament of Canada once at least in every Year, so that Twelve Months shall not intervene between the last Sitting of the Parliament in one Session and its first Sitting in the next Session.

## The Sevate.

21. The Senate shall, subject to the Provisions of this Act, consist of Seventy-two Members who shall be styled Senators.
22. In relation to the Constitution of the Senate, Canada shall be deemed to consist of Three Divisions-
23. Ontario ;
24. Quebec
25. TheMaritime Provinces, Nova Scotia and New Brunswick ; which Three Divisions shall (subject to the Provisions of this Act) be equally represented in the Senate as follows: Ontario by Twenty-four Senators ; Quebec by Twenty-four Senators and the Maritime Provinces by Twenty-four Senators, twelve thereof representing Nova Scotia, and twelve thereof representing New Brunswick.
In the Case of Quebee each of the Twentyfour Senators representing that Province shall be appointed for One of the Twenty-four Electoral Divisions of Lower Canada specified in Schedule A. to Chapter One of the Consolidated Statutes of Canada.
26. The Qualification of a Senator shall be as follows :-
(1.) He shall be of the full Age of Thirty Years :
(2.) He shall be either a Natural-born Subjeet of the Queen, or a Subject of the Queen naturalized by an Act of the Parliament of Great Britain, or of the Parliament of the United Kingdom of Great Britain and Ireland, or of the Leglslature of One of the Provinces of Upper Canada, Lower Canada, Canada, Nova Scotia, or

New Brunswick, before the Union, or of the Parliament of Canada after the Union :
(3.) He shall be legally or equitably seised as of Freehold for his own Use and Benefit of Lands or Tenements held in free and common Socage, or seised or possessed for his own Use and Benefit of Lands or Tenements held in Franc-aleu or in Roture, within the Province for which he is appointed, of the Value of Four thousand Dollars, over and above all Rents, Dues, Debts, Charges, Mortgages, and Incumbrances due or payable out of or charged on or affecting the same :
(4.) His Real and Personal Property shall be together worth Four thousand Dollars over and above his Debts and Liabilities :
(5.) He shall be resident in the Province for which he is appointed:
(6.) In the Case of Quebec he shall have his Real Property Qualification in the Electoral Division for which he is appointed, or shall be resident in that Division :
24. The Governor General shall from Time to Time, in the Queen's Name, by Instrument under the Great Seal of Canada, summon qualified Persons to the Senate ; and, subject to the Provisions of this Act, every Person so summoned shall become and be a Member of the Senate and a Senator.
25. Such Persons shall be first summoned to the Senate as the Queen by Warrant under Her Majesty's Royal Sign Manual thinks fit to approve, and their Names shall be inserted in the Queen's Proclamation of Union.
26. If at any Time on the Recommendation of the Governor General the Queen thinks fit to direct that Three or Six Members be added to the Senate, the Governor General may by Summons to Three or Six qualified Persons (as the Case may be), representing equally the Three Divisions of Canada, add to the Senate aecordingly.
27. In case of such Addition being at any Time made the Governor General shall not summon any Person to the Senate, except on a further like Direction by the Queen on the like Recommendation, until each of the Three Divisions of Canada is represented by Twentyfour Senators and no more.
28. The Number of Senators shall not at any Time exceed Seventy-eight.
29. A Senator shall, subject to the Provisions of this Act, hold his Place in the Senate for Life.
30. A Senator may by writing under his Hand addressed to the Governor General resign his Place in the Senate, and thereupon the same shall be vacant.
31. The Place of a Senator shall become vacant in any of the following Cases :-
(1.) If for Two consecutive Sessions of the Parliament he fails to give his Attendance in the Senate :
(2.) If he takes an Oath or makes a Declaration or Acknowledgment of Allegiance, Obedience, or Adherence to a Foreign Power, or does an Act whereby he becomes a Subject or Citizen, or entitled to the Rights or Privileges of a Subject or Citizen, of a Foreign Power :
(3.) If he is adjudged Bankrupt or Insolvent or applies for the Benefit of any Law relating to Insolvent Debtors, or becomes a public Defaulter:
(4.) If he is attained of Treason or convieted of Felony or of any infamous Crime:
(5.) If he ceases to be qualiffed in respect Property or of Residence ; provide that a Senator shall not be deemed t have ceased to be qualified in respect Residence by reason only of his residin at the Seat of the Government of Canad while holding an Office under that Gor ernment requiring his Presence there.
32. When a Vacancy happens in the Senat by Resignation, Death, or otherwise, the Gor ernor General shall by Summons to a fit an qualifled Person fill the Vacancy.
33. If any Question arises respecting th Qualification of a Senator or a Vacaney in th Senate the same shall be heard and determine by the Senate.
34. The Governor General may from Tim to Time, by Instrument under the Great Se of Canada, appoint a Senator to be Speaker the Senate, and may remove him and appois another in his Stead.
35. Until the Parliament of Canada othe wise provides, the Presence of at least Fiftee Senators, including the Speaker, shall necessary to constitute a Meeting of the Senal for the Exercise of its Powers.
36. Questions arising in the Senate shall decided by a Majority of Voices, and th Speaker shall in all Cases have a Vote, an when the Voices are equal the Decision sha be deemed to be in the Negative.

## The House of Commons.

37. The House of Commons shall, subje to the Provisions of this Act, consist of On hundred and eighty-one Members, of whon Eighty-two shall be elected for Ontario, Sixt five for Quebec, Nineteen for Nova Scotia, an Fifteen for New Brunswick.
38. The Governor General shall from Tim to Time, in the Queen's Name, by Instrumer under the Great Seal of Canada, summon an call together the House of Commons.
39. A Senator shall not be capable of bep elected or of sitting or voting as a Member the House of Commons.

44. The House of Commons on its first assembling after a General Election shall proeed with all practicable Speed to elect One f its Members to be Speaker.
45. In case of a Vacancy happening in the Dffice of Speaker by Death, Resignation, or therwise, the House of Commons shall with
all practicable Speed proceed to elect another of its Members to be Speaker.
48. The Speaker shall prestde at all Meetings of the House of Commons.
47. Until the Parliament of Canada otherWise provides, in case of the Absence for any Reason of the Speaker from the Chair of the House of Commons for a Period of Fortyeight consecutive Hours, the House may elect another of its Members to act as Speaker, and the Member so elected shall during the Continuance of such Absence of the Speaker have and execute all the Powers, Privileges, and Duties of Speaker.
48. The Presence of at least Twenty mem bers of the House of Commons shall be necessary to constitute a Meeting of the House for the Exercise of its Powers; and for that purpose the Speaker shall be reckoned as a Member.
49. Questions arising in the House of Commons shall be decided by a Majority of Voices other than that of the Speaker, and when the Voices are equal, but not otherwise, the Speaker shall have a Vote.
50. Every House of Commons shall continue for Five Years from the Day of the Return of the Writs for choosing the House (subject to be sooner dissolved by the Governor General), and no longer.
51. On the Completion of the Census in the Year One thousand eight hundred and seventyone, and of each subsequent decennial Census, the Representation of the Four Provinces shall be readjusted by such Authority, in such Manner, and from such Time, as the Parliament of Canada from Time to Time provides subject and according to the following Rules :
(1.) Quebec shall have the fixed Number of Sixty-five Members:
(2.) There shall be assigned to each of the other Provinces such a Number of Members as will bear the same Proportion to the Number of its Population (ascertained at such Census) as the Number Sixty-five bears to the Number of the Population of Quebec (so ascertained) :
(3). In the Computation of the Number of Members for a Province a fractional Part not exceeding One Half of the whole Number requisite for entitling the Province to a Member shall be disregarded; but a fractional Part exceeding One Half of that Number shall be equivalent to the whole Number :
(4). On any such Re-adjustment the Number of Members for a Province shall not be reduced unless the Proportion which the Number of the Population of the Province bore to the Number of the aggregate Population of Canada at the then last preceding Re-adjustment of the Number of Members for the Province is ascertained at the then last Census to be diminished by One Twentieth Part or upwards:
(5). Such Re-adjustment shall not take effeet until the Termination of the then existing Parliament.
52. The Number of Members of the House of Commons may be from Time to Time increased by the Parliament of Canada, Provided the proportionate Representation of the Provinces prescribed by this Act is not thereby disturbed.

Money Totes; Royal Assent.
53, Bills for appropriating any Partot the

Publle Revenue, or for imposing any Tax or Impost, shall originate in the House of Commons.
54. It shall not be lawful for the House of Commons to adopt or pass any Vote, Resolution, Address, or 1311 for the Appropriation of any Part of the Public Reventie, of of any Tax or Impost, to any Purpose that has not been first recommended to that House by Message of the Governor General in the Session in which such Vote, Resolution, Address, or Bill is proposed.
55. Where a Bill passed by the House of the Parliament is presented to the Governor General for the Queen's Assent, he shall declare, according to his discretion, but subject to the Provisions of this Act and to Her Majesty's Instructions, either that he assents thereto in the Queen's Name, or that he withholds the Queen's Assent, or that he reserves the Bill for the Signification of the Queen's Pleasure.
56. Where the Governor General assents to a Bill in the Queen's Name, he shall by the flrst convenient Opportunity send an authentic Copy of the Act to One of Her Majesty's Principal Secretaries of State, and if the Queen in Council within Two Years after Receipt thereof by the Secretary of State thinks flt to disallow the Act, such Disallowance (with a Certiffcate of the Secretary of State of the Day on which the Act was received by him) being signiffed by the Governor General, by Speech or Message to each of the Houses of the Parliament or by Proclamation, shall annul the Act from and after the Day of such Signification.
57. A Bill reserved for the Signification of the Queen's Pleasure shall not have any Force unless and until within Two Years from the Day on which it was presented to the Governor General for the Queen's Assent, the Governor General signiffes, by Speech or Message to each of the Houses of the Parliament or by Proclamation, that it has received the Assent of the Queen in Council.
An Entry of every such Speech, Message, or Proclamation shall be made in the Journal of each House, and a Duplicate thereof duly attested shall be delivered to the proper Officer to be kept among the Records of Canada.

84. Until the Legislatures of Ontario and Quebee respectively otherwise provide, all Laws which at the Union are in force in those Provinces respectively, relative to the following Matters, or any of them, namely :- the Qualifications and Disqualifications of Persons to be elected or to sit or vote as Members of the Assembly of Canada, the Qualifications or Disqualifications of Voters, the Oaths to be taken by Voters, the Returning Otficers, their Powers and Duties, the Proceedings at Elections, the Periods during which such Elections, may be continued, and the Trial of controverted Elections and the Proceedings incident thereto, the vacating of the Seats of Members and the issuing and Execution of new Writs in case of Seats vacated otherwise than by Dissolution, shall respectively apply to Elections of Members to serve in the respective Legislative Assemblies of Ontario and Quebec.
Provided that until the Legislature of Ontario otherwise provides, at any Election for a Member of the Legislative Assembly of Ontario for the District of Algoma, in addition to Persons qualified by the Law of the Province of Canada to vote, every British Subject, aged Twenty-one Years or upwards, being a Householder, shall have a Vote.
85. Every Legislative Assembly of Ontario and every Legislative Assembly of Quebee shall continue for Four Years from the Day of the Return of the Writs for choosing the same (subject nevertheless to either the Legislative Assembly of Ontario or the Legislative Assembly of Quebee being sooner dissolved by the Lieutenant Governor of the Province), and no longer.
86. There shall be a session of the Legislature of Ontario and of that Quebec once at least in every Year, so that Twelve Months shall not intervene between the last Sitting of the Legislature in each Province in one Session and its first Sitting in the next Session.
87. The following Provisions of this Act respecting the House of Commons of Canada shall extend and apply to the Legislative Assemblies of Ontario and Quebec, that is to say,-the Provisions relating to the Election of a Speaker originally and on Vacancies, the Duties of the Speaker, the absence of the Speaker, the Quorum, and the Mode of voting, as if those Provisions were here re-enacted and made applicable in Terms to each such Legislative Assembly.

## 4.-NOVA SCOTLA AND NEW BRUNSWICK.

88. The Constitution of the Legislature of each of the Provinces of Nova Scotia and New Brunswick shall, subject to the Provisions of this Act, continue as it exists at the Union until altered under the Authority of this Act; and the House of Assembly of New Brunswick existing at the passing of this Act shall, unless sooner dissolved, continue for the Period for which it was elected.

## E.-ONTARIO, QUEBEC, AND NOVA. SCOTLA.

-89. Each of the Lieutenant Governors of Ontario, Quebec, and Nova Scotia shall cause Writs to be issued for the First Election of Members of the Legislative Assembly thereof in such Form and by such Person as he thinks fit, and at such Time and Addressed to Such Returning Officer as the Governor General directs, and so that the First Election of Member of Assembly for any Electoral District or any Subdivision thereof shall be held at the same Time and at the same Places as the Election for a Member to serve in the House of Commons of Canada for that Electoral District.

## 6. TRE FOUR PROVINOES.

90. The following Provisions of this Act respecting the Parliament of Canada, namely, - the Provisions relating to Appropriation and Tax Bills, the Recommendation of Money Notes, the Assent to Bills, the Disallowance of Acts, and the Signification of Pleasure on Bills reserved,-shall extend and apply to the Legislatures of the Several Provinces as if those Provisions were here re-enacted and made applicable in Terms to the respective Provinces and the Legislatures thereof, with the Substitution of the Lieutenant Governor of the Province for the Governor General, of the Governor General for the Queen and for a Secretary of State, of One Year for Two Years, and of the Province for Canada.

## VI.-Distribution of Legislative Powers. Powers of the Parliament.

91. It shall be lawful for the Queen, by and with the Advice and Consent of the Senate and House of Commons, to make Laws for the Peace, Order and good Government of Canada, in relation to all Matters not coming within the Classes of Subjects by this Act assigned exclusively to the Legislatures of the Provinces ; and for greater Certainty, but not so as to restrict the Generality of

## IX.-MISCELLANEOUS PRO- <br> VISIONS.

General.
27. If any Person being at the passing of 5 Act a Member of the Legislative Council Canada, Nova Scotia, or New Brunswiek, whom a Place in the Senate is offered, does Within Thirty Days thereafter, by Writunder his Hand addressed to the Governor

General of the Province of Canada, to the Lieutenant Governor of Nova Scotia or New Brunswick (as the Case may be), accept the same, he shall be deemed to have declined the same; and any Person who, being at the passing of this Act a Member of the Legislative Council of Nova Scotia or New BrunsWick, accepts a Place in the Senate shall thereby vacate his Seat in such Legislative
128. Every Member of the Senate or House of Commons of Canada shall before taking his Seat therein take and subscribe before the Governor General or some Person authorized by him, and every Member of a Leglslative Council or Legislative Assembly of any Province shall before taking his Seat therein take and subscribe before the Lieutenant Governor of the Province or some Person authorized by him, the Oath of Allegiance contained in the Fifth Schedule to this Act ; and every Member of the Senate of Canada and every Member of the Legislative Council of Quebec shall also, before taking his Seat therein, take and subscribe before the Gover-nor-General, or some Person authorized by him, the Declaration of Qualification contained in the same Schedule.
129. Except as otherwise provided by this Aet, all Laws in force in Canada, Nova Scotia, or New Brunswick at the Union, and all Courts of 'ivil and Criminal Jurisdiction, and all legal Commissions, Powers, and Authorities, and all Officers, Judicial, Administrative, and Ministerial, existing therein at the Union, shall continue in Ontario, Quebee, Nova Scotia, and New Brunswick respectively, as if the Union had not been made ; subject nevertheless (except with respect to such as are enacted by or exist under Acts of the Parliament of Great Britain, or of the Parliament of the United Kindom of Great Britain and Ireland), to be repealed, abolished, or altered by the Parliament of Canada, or by the Legislature of the respective Province according to the Authority of the Parliament, or of that Legislature under this Act.
130. Until the Parliament of Canada otherwise provides, all Officers of the several Provinces having Duties to discharge in relation to Matters other than those coming within the classes of Subjects by this Act assigned exclusively to the Legislatures of the Provinces shall be Officers of Canada, and shall continue to discharge the Dutfes of their respective Offices under the same Liabilites, Responsibilities, and Penalties as if the Union had not been made.
131. Until the Parliament of Canada otherwise provides, the Governor General in Council may from Time to Time appoint such Officers as the Governor General in Council deems neecessary or proper for the effectual Execution of this Act.
122. The Parliament and Government of Canada shall have all Powers necessary or proper for preforming the Obligations of Canada or of any Province thereof, as Part of the British Empire, towards Foreign Countries, arising under Treaties between the Empire and such Foreign Countries.
133. Either the English or the French Language may be used by any Person in the Debates of the Houses of the Parliament of Canada and of the Houses of the Legislature of Quebee ; and both those Languages shall be used in the respective Records and Journals of those Houses; and either of those Lan-
guages may be used by any Person or in any Pleading or Process in or issuing from any Court of Canada established under this Act and in or from all or any of the Courts of Quebec.
The Acts of the Parliament of Canada and of the Legislature of Quebec shall be printed and published in both those Languages.

## Ontario and Quebec.

134. Until the Legislature of Ontario or of Quebee otherwise provides, the Lieutenant Governors of Ontario and Quebec may each appoint, under the Great Seal of the Province, the following Officers, to hold Office during Pleasure, that is to say,-the Attorney General, the Secretary and Registrar of the Province, the Treasurer of the Province, the Commissioner of Crown Lands, and the Commissioner of Agriculture and Public Works, and in the Case of Quebec the Solicitor General ; and may, by Order of the Lieutenant Governor in Council, from Time to Time preseribe the Duties of those Officers and of the several Departments over which they shall preside or to which they shall belong, and of the Officers and Clerks thereof; and may also appoint other and additional Officers to hold Office during Pleasure, and may from Time to Time prescribe the Duties of those Offlcers, and of the several Departments over which they shall preside or to which they shall belong, and of the Officers and Clerks thereof.
135. Until the Legislature of Ontario or Quebec otherwise provides, all Rights, Powers, Duties, Functions, Responsibilities, or Authorities at the passing of this Act vested in or imposed on the Attorney General, Solicitor General, Secretary and Registrar of the Province of Canada, Minister of Finance, Commissioner of Crown Lands, Commissioner of Public Works, and Minister of Agriculture and Receiver General, by any Law, Statute or Ordinance of Upper Canada, Lower Canada, or Canada, and not repugnant to this Act, shall be vested in or imposed on any Officer to be appointed by the Lieutenant Govenor for the Discharge of the same or any of them ; and the Commissioner of Agriculture and Public Works shall preform the Duties and Functions of the Office of Minister of Agriculture at the passing of this Act imposed by the Law of the Province of Canadia, as well as those of the Commissioner of Public Works.
136. Until altered by the Lieutenant Governor in Council, the Great Seals of Ontario and Quebec respectively shall be the same, or of the same Design, as those used in the Provinces of Upper Canada and Lower Canada respectively before their Union as the Province of Canada.
137. The Words "and from thence to the End of the then next ensuing Session of the Legislature," or Words to the same Effect, used in any temporary Act of the Province of Canada not expired before the Union, shall be construed to extend and apply to the next Session of the Parliament of Canada, if the Subject Matter of the Act is within the Powers of the same, as defined by this Act, or to the next Sessions of the Legislatures of Ontario and Quebec respectively, if the Subject Matter of the Act is within the Powers of the same as defined by this Act.
138. From and after the Union the Use of the Words "Upper Canada" instead of "Ontario," or "Lower Canada" instead of "Quebee," in any Deed, Writ, Process, Plead-
ing, Document, Matter, or Thing, shall nc invalidate the same.
139. Any Proclamation under the Grea Seal of the Province of Canada issued befor the Union to take effect at a Time which subsequent to the Union, whether relating t that Province, or to Upper Canada, or t Lower Canada, and the several Matters an Things therein proclaimed shall be and con tinue of like Force and Effect as if the Unio had not been made.

## APPENDIX A.

## An Act respecting the establishment of Provinces in the Dominion of Canada. 29 June, 1871.

Whereas doubts have been entertained respecting the powers of the Parliament of Canada to establish Provinces in Territories admitted, or which may be hereafter admitted into the Dominion of Canada, and to provide for the representation of such Provinces in the said Parliament, and it is expedient to remove such doubts, and to vest such powers in the said Parlia-ment:-

Be it enacted, by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :-

1. This Act may be cited for all purposes as "The British North America Act, 1871."
2. The Parliament of Canada may, from time to time, establish new Provinces in any Territories forming for the time being part of the Dominion of Canada, but not included in any Province thereof, and may, at the time of such establishment, make provision for the constitution and administration of any Province, and for the passing of laws for the peace, order and good government of such Province, and for its representation in the said Parliament.
3. The Parliament of Canada may, from time to time, with the consent of the Legislature of any Province of the said Dominion, increase, diminish or otherwise alter the limits of such Province, upon such terms and conditions as may be agreed to by the said Legislature, and may with the like consent, make provision respecting the effect and operation of any such increasc or diminution or alteration of Territory in relation to any Province affected thereby.
4. The Parliament of Canada may, from time to time, make provision for the administration, peace, order and good government of any Territory not for the time being included in any Province.
5. The following Acts passed by the said Parliament of Canada, and intituled respectively " An Act for the temporary government of Rupert's Land and the North Western Territory when " united with Canada," and "An Act to amend and continue the Act 32 and 33 Victoria, "chapter 3, and to establish and provide for the Government of the Province of Manitoba," shall be and be deemed to have been valid and effectual for all purposes whatsoever from the date at which they respectively received the assent, in the Queen's name, of the Governor General of the said Dominion of Canada.
6. Except as provided by the third Section of this Act, it shall not be competent for the Parliament of Canada to alter the provisions of the last mentioned Act of the said Parliament in so far as it relates to the Province of Manitoba, or of any other Act hereafter establishing new Provinces in the said Dominion, subject always to the right of the Legislature of th Province of Manitoba to alter from time to time the provisions of any law respecting the qualifica tions of Electors and members of the Legislative Assembly, and to make laws respecting eled tions in the same Province.

## APPENDIX B.

An Act to remove certain doubts with respect to the powers of the Parliament Canada, under Section 18 of the British North America Act, 1867.

## 19 July, 1875.

Whereas, by section eighteen of the British North America Act 1867, it is provided as follows:"The privileges, immunities and powers to be held, enjoyed and exercised by the Senat " and by the House of Commons, and by the members thereof respectively, shall be such as an " from time to time defined by Act of the Parliament of Canada, but so that the same sha " never exceed those at the passing of this Act, held, enjoyed and exercised by the Common "House of Parliament of the United Kingdom of Great Britain and Ireland, and by th " members thereof."

And, whereas doubts have arisen with regard to the power of defining by an Act of $t$ Parliament of Canada, in pursuance of the said section, the said privileges, powers or immul ties ; and it is expedient to remove such doubts :-

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advi and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliame assembled, and by the authority of the same, as follows :-

1. Section eighteen of the British North America Act, 1867, is hereby repealed, witho prejudice to anything done under that Section, and the following section shall be ubstitut for the Section so repealed.

The privileges, immunities, and powers to be held, enjoyed and exercised by the Senate an by the House of Commons, and by the members thereof respectively, shall be such as are fro time to time defined by Act of the Parliament of Canada, but so that any Act of the Parliame of Canada defining such privileges, immunities and powers shall not confer any privileg immunities or powers exceeding those at the passing of such Act held, enjoyed and exercised the Commons House of Parliament of the United Kingdom of Great Britain and Ireland, a by the members thereof.
2. The Act of the Parliament of Canada, passed in the thirty-first year of the Reign of B present Majesty, Chapter twenty-four, intituled. "An Act to provide for oaths to witness "being administered in certain cases for the purposes of either House of Parliament," shall deemed to be valid, and to have been valid as from the date at which the Royal assent in given thereto by the Governor-General of the Dominion of Canada.
3. This Act may be cited as "The Parliament of Canada Act, 1875."

## APPENDIX C .

In Act respecting the Representatives in the Parliament of Canada of Territories which for the time being form part of the Dominion of Canada, "ut are not included in any Province.

## 25 June, 1886

hereas it is expedient to empower the Parliament of Canada to provide for the representaion in the Senate and House of Commons of Canada, or either of them, of any Territory which or the time being forms part of the Dominion of Canada, but is not included in any l'rovince.
Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and onsent of the Lords Spiritual and Temporal and Commons in this present Parliament assemled, and by the authority of the same, as follows :-

1. The Parliament of Canada may from time to time make provision for the representation the Senate and IIouse of Commons of Canada, or in either of them, of any Territories which or the time being form part of the Dominion of Canada, but are not included in any Province hereof.
2. Any Act passed by the Parliament of Canada before the passing of this Act for the urpose mentioned in this Act shall, if not disallowed by the Queen, be, and shall be deemed to ave been, valid and effectual from the date at which it received the assent, in Her Majesty's ame, of the Governor-General of Canada.

It is hereby declared that any Act passed by the Parliament of Canada, whether before or fter the passing of this Act, for the purpose mentioned in this Act or in the British North merica Act 1871, has effect, notwithstanding anything in the British North America Act, 1867, nd the number of Senators or the number of members of the House of Commons specified in he last mentioned Act is increased by the number of Senators or of members, as the case may e, proviled by any such Act of the Parliament of Canada for the representation of any rovinces or Territories of Canada.
3. This Act may be cited as "The British North America Act, 1886."

This Act and the British North America Act, 1867, and the British North America Act, 1871 hall be construed together and may be cited together as "The British North America Acts, 867 to 1886 ."

## Extracts from Her Majesty's Instructions to the Governor-General.

Wereas, by the 12th section of "The British North America Act, 1867," certain powers, hathoricis, and functions were duclared to be vested in t'he Governor General ; and whereas, e are desirous of making effectual and permanent provision for the office of Governor-learal in and over Our said Dominion of Canada, without making new Letters-Patent on each emise of the said Office : now, know ye, that : * * * * * * * * * * * * * * * *
III. We do further authorize and empower Our said Governor-General to constitute and ppoint, in Our name and on Our behalf, all such Judges, Commissioners, Justices of the Peace, fid other necessary Officers and Ministers of Our said Dominion, as may be lawfully constituted appointed by Us.
IV. And we do further authorize and empower Our said Governor-General, so far as we wfully may, upon sufficient cause to him appearing, to removefrom his office, or to suspend om the exercise of the same, any person exercising any office within Our said Dominion, under by virtue of any Commission or Warrant granted, or which may be granted, by Us, in Our ame, or under Our authority.
V. And we do further authorize and empower Our said Governor-General to exercise all inwers lawfully belonging to Us, in respect of the summoning, proroguing, or dissoiving the ar. iament of Our said Dominion.
VI. And whereas by "The Dritish North America Act, 18c7," it is amongst other things nacted, that it shall be lawful for Us, if we think fit, to authorize the Governor-General of Our ominion of Canada to appoint any person or persons, jointly or severally, to be his Deputy or Le-
ities within any part or parts of Gur said Dominion, and in that capacity, to exercise, during
epleasure of Our said Governor-General, such of the powers, authorities, and functions of Our id tiovernor-Gieneral as he may deem it nccessary or expedient to assign to such Deputy or $\mathrm{De}-$ uties, subject to any limitations or directions from time to time expressed or given by Us. Now, edohereby autho:ize and empower Our said Governor-General, subject to such limitations d directions as aforesaid, to appoint asy person or persons, jointly or ssverally, to be s Deputy or Deputies within any part or parts of Our said Dominion of Canada, and in that pacity to exercise, during his pleasure, such of his powers, functions and authorities, as he $y$ dcem it necessary or expedient to assign to him or them. Provided always, that the pointment of such a Deputy or Deputies shall not affect the exercise of any such power, thority or function by Uur sa:d Governor-General in person.
VII. And we do hereby dec!are Our pleasure to be that, in the event of death, incapacity, moval, or absence of Our said Governor-General cut of Our said Dominion, all and evt. y the Wers a:d authori. es herein granted to him shall, until Our further pleasure is signified erein, be vested in such person as may be appointed by Us under our Sign-Manual and gnet to be our Lieutenant-Governor of Our said Dominion, or if there shall be no such eutenant-Governor in Our said Dominion, then in such person or persons as may be pointed by Us under Our Sign-Manual and Signet to administer the fovernment of the me ; and in case there shall be no person or persons within Our said Dominion so appointby Us, then in the Senior Officer for the time being in command of Our regular troops in ar said Dominion, Provided that no such powers or authorities shall vest in such Lieutenantvernor, or such other person or persons, until he or they shall have taken the oaths appointIto be taken by the Governor-General of Our said Dominion, and in the manner provided by e Instructions accompanying these Our Letters-Patent.
VIII. And we do hereby require and command all Our Officers and Ministers, Civilan Military, and all other the inhabitants of Our said Dominion, to be obedient, aiding and assish ing, unto Our said Governor-dieneral, or, in the event of his death, incapacity, or absence, $t$ such person or persons as may from time to time, under the provisions of these Our Letter Patent, administer the Government of Our said Dominion.
IX. And we do hereby reserve Ourselves, Uur heirs and Successors full power and authority from time to time, to revoke, alter or amend these Our Letters-Fatent as to Us or them shil seem meet.
X. And we do further direct and enjoin, that these Our Letters-Patent shall be read an proclaimed at such place or places as Our said Governor (ieneral shall think fit within On said Dominion of Canada.

## Instructions to our Governor-General in and over Our Dominion of Canada, or i his absence, to Our Lieutenant-Governor, or the Officer for the time beim, administering the Government $C_{j}^{\gamma}$ Our said Dominion.

Whereas by certain Letters-Patent bearing even date herewith, we have constituted, ordered and declared, that there shall be a Governor-General (hereinafter called Uur said Governot General) in and over Uur Dominion of Canada (hereinafter called Uur said Dominion), and have thereby authorized and commanded Our said Governor-General to do and execute indu manner all things that shall belong to his said command, and to the trust we have reposedit him according to the several powers and authorities granted or appointed him by virtue of the said Letters-Patent and of such Commission as may be issued to him under Our Sign-Manu and Signet, and according to such Instructions as may, from time to time, be given to him under Our Sign-Manual and Signet, or by Our Order in Our Privy Council, or by Us throug one of Our Principal Secretaries of State, and to such Laws as are or shall hereafter be force in Our said Dominion. Now, therefore, we do, by these Our Instructions under Our Sig: Manual and Signet, declare Our pleasure to be that Our said Governor-General for the tim being shall, with all due solemnity, cause Our Commission, under Our Sign-Manual and Signe appointing Our said Governor-General for the time being, to be read and published in th presence of the Chief Justice for the time being, or other judge of the Supreme Court of 0 said Dominion. And we do further declare Our pleasure to be that Our said Governor-Genera and very other officer appointed to administer the Government of Our said Dominion, shal take the oath of Allegiance in the form provided by an Act passed in the Session holden in th thirty-first and thirty-second years of Our Reign, intituled, "An Act to Amend the Law rels ting to Promissory Oaths;" and likewise that he or they shall take the usual Oath for the duw execution of the Office of Our Governor-General in and over Our said Dominion, and for the due and impartial administration of Justice, which Oaths the said Chief Justice for the time being of Our said Dominion, or, in his absence, or in the event of his being otherwise incapaci tated, any Judge of the Supreme Court of Our said Dominion, shall, and he is hereby require to tender and administer unto him or them.
II. And we do authorize and require Our said Governor-General, from time to time, himself or by any other person authr rized by him in that behalf, to administer to all and every person or persons as he shall think fit, who shall hold any office or place of trust e profit in Our said Dominion, the said Oath of Allegiance, together with such other Oath of Oaths as may, from time to time, be prescribed by any Laws or Statutes in that behalf made and provided.
III. And we do require Our said Governor-General to communicate forthwith to the Prir Council for Our said Dominion these Our Instructions, and likewise all such others, from timb to time, as he shall find convenient for Our Service to be imparted to them.
IV. Our said Governor-General is to take care that all laws assented to by him in 0us name, or reserved for the signification of Our pleasure thereon, shall, when transmitted by him, be fairly abstracted in the margins, and be accompanied, in such cases as may seem to him necessary, with such explanatory observations as may be required to exhibit the reasons and occasions for proposing such laws; and he shall also transmit fair copies of the Jour nals and Minutes of the proceedings of the Parliament of Our said Dominion, which he is to require from the clerks, or other proper Officers in that behalf, of the said Parliament.
V. And we do further authorize and empower Our said Governor-General, as he shall sed occasion, in Our name and on Our behalf when any crime has been committed for which the offender may be tried within Uur said Dominion, to grant a pardon to any accomplice, no being the actual perpetrator of such crime, who shall givesuch information as shall lead to the conviction of the principal offender; and, further, to grant to any offender convicted of any crime in any Court or before any Judge, Justice, or Magistratu within Our said Dominion, a pardoi either free or subject to lawful conditions, or any respite of the execution of the sentence o any such offender, for such period as to (Jur said Governor-General may seem fit, and to remil any fines, penalties, or forfeitures which may become due and payable to Us,

Provided always, that Our said Governor-General shall not in any case, except where the offence has been of a political nature, make it a condition of any pardon or remission of sen tence that the offender shall be banished from or shall absent himself from Our said Dominion And we do hereby direct and enjoin that Our said Governor-General shall not pardon or reprier any such offender, without first receiving in capital cases the advice of the Privy Council fot Our said Dominion, and in other cases the advice of one, at least, of his Ministers; and in any case in which such pardon or reprieve might directly affect the interest of Our Empire, or of any country or place beyond the jurisdiction of the Government of Our said Dominion, Our said Governor-General shall, before deciding as to either pardon or reprieve, take those interestu specially into his own personal consideration in conjunction with such advice as aforesaid.
VI. And whereas great prejudice may happen to Our service and to the security of Our Dominion by the absence of Our said Governor-General, he shall not, upon any pretence what ever, quit Our said Dominion without having first obtained leave from Us for so doing undet Qur Sign-Manual and Signet, or through one of Our Principal Secretaries of State.

## The Indian Population.

The following figures are in some cases necessarily approximate, but there can be small (ibt but that the Indian population has not decreased since 1881 ,

|  | 1890. | 1891. |  | 1890. | 1891. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| British Columbia. | 34,416 | 35,202 | New Brunswick .......... | 1,569 | 1,521 314 |
| Ianitoba \& N, W.T. | 42,781 | 42,233 | Prince Edward Island ..... | 5,016 | 5,016 |
| ontario.... . . . . . . . . . . . . . | 17,776 | 17,915 13,361 | Labrador and Rupe | 4,000 | 4,000 |

| va Scotia.... . . . . . . . . . . | 2,107 | 2,076 |  |  |  |

A consideration of the following figures seems to prove that the Indians are becoming more live to the advantages of allowing their children to be educated.

Number of Pupils at the Indian Schools in the Several Provinces in the Years

| 1881. | 1888. | 1889. | 1890. | 1891. |
| ---: | ---: | ---: | ---: | ---: |
| 1,907 | 1,974 | 2,036 | 2,155 | 2,210 |
| 404 | 455 | 528 | 516 | 562 |
| 107 | 131 | 123 | 121 | 121 |
| 67 | 91 | 94 | 101 | 99 |
| 652 | 512 | 453 | 491 | 685 |
| 18 | 23 | 19 | 19 | 21 |
| 971 | 2,941 | 3,206 | 3,268 | 3,856 |
|  | 6,127 | 6,459 | 6,671 | 7,554 |

## TMMIGRATION,

It is impossible to verify the figures and define exactly where the thousands of persons who enter the Dominion eventually settle, and how many who arrive from Europe merely pass hrough ; but the undermentioned show the number of immigrant arrivals who recorded their Intention to settle here.

Immigrant Settlersoin Canada, 1880-91.

Canada is the largest of all the British possessions, the estimated area being $3,456,383$ square miles, or nearly one-half the Empire. According to the last census the density of population in the various provinces was as follows :-
$\qquad$ 54.5 Quebec
6.5

Prince Edward Island.
22.0 Manitoba
2.4

Nova Scotia
0.3

New Brunswick ........................................... 11.4 British Columbia
1.5

Ontario ................................... 10,0 The Dominion................................... 1.5
In connection with these figures it is interesting to note the following ta that of all foreign tion and are
countries:-

## Foast ©fftce.

An Act of the Imperial Parliament in 1851 transferred the control of the Post Office system in British North America to the various provincial authorities, and after contederation there was no uniform system nutil ist April, 1868 , when the 1 ost Office Act came into force, estabushing uniform rates and regulations throughout the Dominion.

In 1875 an arrangement was concluded with the United States providing for a common rate of postage between the two countries, contirmed in 1888 and supplemented by a parcel post service.

On the 1st July, 1879, Canada was admitted a member of the International Postal Union.
The undermentioned are the principal officers in the Post Oftice Department-Ofticia address Ottawa.

United Kingdom only.-The size may be 12 inches by 8 by 4, and the weight up to 18 ounces. Rate, 1 cent per 2 ounces.

Parcel Post (Dominion).-Each parcel must not exceed 5 lbs , weight or 2 feet by 1 foot by in size, and must be marked "Parcel Post." The rate is, for each 4 ounces or portions thered 6 cents.

Parcel Post.-(United Kingdom, Newfoundland, Japan, British West Indies and thos Countries and Colonies with which the United Kingdom maintains a Parcel Post.) Parcelsmus not exceed 7 lbs weight (Japan 5 lbs .), or be more than 2 feet long by 1 foot by 1 foot.

A customs declaration of contents and value of each parcel must be filled up and signed br sender and attached by mucilage or paste to the parcel. Certain articles are prohibited to certain places. Rate, 25 cents per pound. Newfoundland, 15 cents per pound.

Parcel Post. (United States.)-The same rate and regulations as for the Dominion The matter being subject to Customs examination on arrival and to the collection of duty for which liable.

Letters or Parcels containtng Contraband Goods.-The Postmaster-General, of any Postmaster by him to that effect duly authorized, may detain any Post Letter or other article of mail matter suspected to contain any contraband goods, wares or merchandise, or ay goods, wares or merchandise on the importation of which into Canada any duties of customs in by law payable, and suspected to have been enclosed therein, and sent by post, to evid payment of such duties, and forward the same to the nearest Collector of Her Majes: Customs, who, in the presence of the person to whom the same may be addressed, or, in bin absence, in case of non-attendance after due notice in writing from such collector requiring biis attendance, left at or forwarded by the post, according to the address on the letter or othe article of mail matter, may open and examine the same.

And if, on any scich examination, any contraband goods, wares or merchandise, or any goods wares or merchandise on the importation of which into Canada any duties of customs an payable, are discovered, such collector may detain the letter or other article of mail matter ant its contents, for the purpose of prosecution ; and if no contraband goods, wares or merchandist or any goods, wares or merchandise on the importation of which into Canada any duties o customs are by law payable, are discovered in such letter or other article of mail matter, shall, i. the party to whom it is addressed is present, be handed over to him on his paying th postage (if any) charged thereon; or, if he is not present, it shall be returned to the Post Uffice to be forwarded to the place of its address.

General Hint*-Address the Postmaster-General, Ottawa, or the Inspector of Division, whel any occasion for complaint arises, and give details fully. Always register letters containin, valuables.

Transmit money by Money Order only.
All letters or parcels should contain the sender's name, so that they can be returnedif undelivered.

Postmasters are not compelled to give change.
A letter once posted cannot be handed back to sender.
Letters imperfectly or mproperly addressed, or upon which the necessary postage has not been paid go to the Dead Letter Offlce. Add County, Province or Country after the ordinar address, otherwise, for instance, a letter intended for London, England, might go to London Ontario, or vice versa.

Letters, etc., for foreign Countries intended to go via New York, should be so marked a left hand corner of the envelope.

Always affix stamps on right hand corner of the envelope.

## Money Orders.

Within the Dominion.-Money orders not exceeding $\$ 100$ each in value can b obtainel at any Money Order Post Office payable to any other Money Order Post Office at the followim rates:-

| Sums not exceeding |  |  |  | \$ 4 | 2 cents. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Over | 4 | but | eeding | 10 | 5 |  |
| \% | 10 | " | 6 | 20 | 10 | 4 |
| " | 20 | ${ }^{6}$ | 6 | 40 | 20 | 6 |
| " | 40 | 6 | 6 | 60 | 30 | 6 |
| " | 60 | ${ }^{6}$ | " | 80 | 40 | " |
| 4 | 80 | 6 | " | 100 | 50 | 6 |

The printed form of application supplied at the Post Office should always be carefully fille up, and, as there are many places of the same name, the County, Province, or State must added.

United Kingdom, United States, Newfoundland and other Countries.
Money orders not exceeding $\$ 50$ each in value can be obtained, payable in almost any Foreip Country or British possession fincluded in the Postal Unicn (and some Countries not so included The charge for such orders is :

| Sums not | - | 通 |  | \$10 |  | sen |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Exceedi | 10 | but | de | 20 | 20 | * |

## 1)

The extension of the Railway system has enabled an increase to be made in the number of Post Offices where monies can be deposited or withdrawn on the Savings Bank system.

Deposits of not less than one dollar or of any number of dollars can be paid into a Post office Savings Bank, but not more than $\$ 1,000$ can be paid in any one year ending 60 th June, and no deposit must exceed $\$ 3,000$ exclusive of interest at any time.

Interest at the rate of $3 \frac{1}{2}$ per cent. is allowed and calculated yearly to the 30 th June, being then credited in the Depositor's book.

On each anniversary of the day upon which the Depositor first opened an account the book must be sent to the Postmaster-General for comparison with the books of the department and the addition of the interest due.

The amount of one dollar or any number of dollars can be withdrawn, and the order can be made payable at any Savings Bank Post Offlce in the Dominion.

Proper forms of withdrawal, covers for Depositors' books, and detailed information as to this useful branch of the Post Office, can be obtained at any Savings Bank Post Office.

Postal Operations in Canada Compared, 1868 and 1891.

| Year, | $\begin{aligned} & \text { Number } \\ & \text { of } \\ & \text { Offices, } \end{aligned}$ | Number of Money Order Offices. |  | Miles Travelled | Amount paid for conveyance of Mails. | Number of Letters, \&c. | Number of Newspapers, \&c. | Total Cost per Head. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1868 | 3,6 |  | 27,674 | 10,622,216 | 543,109 | 18,100,000 | 18,884,800 | \$0 31 |
| 1891.. | 8,061 | 1,080 | 58,905 | 7,152,543 | 1,918,198 | 118,275,000 | 90,425,346 | 086 |

In 1868 the conveyance of mails over $10,622,216$ miles cost per mile $51-10$ cents, and the transmission of $36,984,800$ letters, newspapers, etc., cost $14-10$ cents apiece; in 1891 the conveynuce of mails over $27,152,543$ miles cost 7 cents per mile, and the transmission of $208,700,346$ etters, newspapers, etc., $9-10$ of 1 cent apiece ; so that there is a decrease in the cost of each rticle carried of about $\frac{1}{2}$ of 1 cent ; and it must not be overlooked that, if newspapers were carried now at the old rate of 1 cent per lb, a sum of not less than $\$ 100,000$ would be added to the revenue each year.

Estimated Number of Letters and Post Cards, by Provinces, 1887 to 1891.

With the exception of the years 1882, 1883 and 1890, the trade of 1891 was the largest in the history of the Dominion, while, separately, the imports have only been exceeded five times and the exports only once in the same period. The imports exceeded the average of 24 years br $\$ 14,668,172$, and the exports exceeded the same by $\$ 13,854,342$. The average annual value per head during the twenty-four years has been : of imports, $\$ 25,39$; of exports, $\$ 20,40$; and of the total trade, 845.83 ; so that in 1891 the value per head of imports was 62 cents, exports were 88 exports have only trade 74 cents below the average. During the last twenty-four years the exports have only once exceeded the imports, viz., in 1880, in every other year there having This excess of imports.
This subjoined table shows the value of imports, exports and duty collected, per head of the population, and the value of goods entered for consumption since Confederation.

| Year ended 30th June. | Value of Imports per Head. | Value of Exports per Head. | Goods <br> ent. for <br> consump- <br> tion. | Duties collected. |  |  |  | $\begin{gathered} \text { Percentage of } \\ \text { Exp. of Col } \\ \text { lection of } \\ \text { Customs Rer. } \end{gathered}$ |

'Lotal

The Articles on which export duty was collected were, pine, oak and spruce logs, and shingle d stave bolts.
The amount of duty collected was only exceeded in the years 1890 and 1889, while the amount or head was less than in 1890,1889, 1887, 1883 and 1882. The duty collected on exports was for ree months and one-half only, as the export duties were removed by proclamation on 15th ctober, $18 \% 0$. The percentage of duty collected on the value of total imports was 19.52 , as ompared with $19^{\circ} 63$ in 1830 , and on the value of goods entered for consumption it was $20^{\circ} 66$, per int, in 1891, and $21 \cdot 21$ per cent. in 1890.
The volume of trade of the United States is only exceeded by three countries in the world, ad is consequently very many times larger than the trade of the Dominion of Canada, though proportion to population the trade of the Dominion is considerably in advance of that of the nited States, as is shown by the following statement :-

Foreign trade of Canada and the United States, per capita, 1891.

| Country. | Imports. | Exports. | Total Trade. |
| :---: | :---: | :---: | :---: |

The following table shows the value of goods entered for home consumption by Provinces
the year 1891 :or the year 1891 :-

| Province. | Dutiable Goods, | Free Goods. | Total. | Duty Collected. |
| :---: | :---: | :---: | :---: | :---: |
| Ontario | \$29,069,586 | \$13,641,820 |  |  |
| Quebee ${ }_{\text {Nova Scoti }}$ | 29,608,284 | 17,548,334 | -47,156,618 | \$ $10,101,717$ |
| New Brunswick, | 5,926,047 | $3,393,201$ 1,$932 ; 338$ | 8,741,295 | 1,875,596 |
| Manitoba.... | 1,953,469 | 1,932,323 | $5,858,385$ $2,795,806$ | 1,393,012 |
| British Columbia ......... | 4,064,040 | 1,080,229 | 5,144,269 | 620,395 |
| Prince Edward Island..... | 411,270 | 213,050 | -624,320 | 1,346,059 |
| The Territories. | 155,246 | 157,779 | 313,025 | $\begin{array}{r} 155,952 \\ 42,241 \end{array}$ |
| Totals | \$74,536,036 | \$38,809,088 | \$113,345,124 | \$23,416,266 |

Of the total amount of duty collected, $\$ 9,114,272$, or 38 per cent, was collected on goods from reat Britain, and $\$ 7,734,515$, or 33 per cent, on goods from the United States, the reason for is being that 44 per cent. of the imports from the United States were free goods, principally w material, while only 25 per cent, of the imports from Great Britain were on the free list. he next largest amounts were collected as follows : on goods from the West Indies, $\$ 1,337,754$; om Germany, $\$ 1,320,583$; from France, $\$ 932,033$, and from Holland, $\$ 741,462$. The figures in e preceding table must only be taken as indicative of the channels by which goods enter the ominion, and not as by any means representing the individual consumption of each province. uebec contains the principal ports of entry by the St. Lawrence, and Ontario the principal orts of entry for goods from the United States; therefore it is clear that a very large portion the duty collected is really paid by the other provinces, and it is probable that the largest prtion of the duty collected in the Province of Quebec is actually paid by the Province of Ont-
tio. The same remarks are equally applicable to exports.

There was an increase in imports from twenty-six countries, and a decrease from twenty, largest increases being $\$ 902,330$ and $\$ 280,687$ in imports from the Spanish possessions in the fic, and Newfoundland, respectively. The largest decreases were in the trade with the ted Kingdom and the United States, which fell off $\$ 1,424,779$ and $\$ 794,036$, respectively. The orts from St. Pierre et Miquelon consist principally of fish landed at Nova Scotian ports, afterwards shipped out of the country.
The following is a statement of the amount of free goods imported and entered for consump-
for 1891 :-
Articles. Value of goods imported. Value of Goods entered for consumption.

Year ending June, 1891.

Catement by countries of the value of Imports into Canada for Home cunsumption in the yeurs 1888 to 1891.

statement showing the value of Exports the produce of Canada, and the principal countrics to which exported, during the years 1888 to 1891, inclusive.

With the exception of the United Kingdom, India, and the Straits Settlement, the aggretrade of Canada is larger than that of any other British colony, though, with the exception he Straits Settlement and the Falkland Isles, in proportion to population the external trade he Australasian colonies is far in advance of that of any other British possession. This large portion per head would, however be much reduced if federation of the colonies should take e, as in that case the intercolonial trade, which at present forms nearly 50 per cent, of their 1 external trade, would no longer be reckoned. The value of diamonds exported through post office is now included in the exports of the Cape of Good Hope.
The total trade of the United Kingdom is the largest in the world, Germany and France ing second and third places ; and the following is the order in which the principal countries, gg the largest trade, stand, with the amount of that trade in each case, according to the st available figures, principally for 1890 :-
ted Kingdom................. $\$ 3,644,731,669$

" flour.
When wheat or grain grown in Canada is taken to the United States to be ground, and the produce thereof in flour and meal returned to Canada such produce may be returned free of Customs duty, provided the owner thereof resides near the frontier and more than five miles from any Canadıan grist mill at which such wheat or grai: could be ground, and that he observes and complies with the following rules :-
1st. He shall report to the nearest Customs officer the exact quantity of wheat or grain which he is taking out, and such officer shall enter in a book to be kept for that purpose the name of the owner, the date of the transaction, the quantity in bushels and fractions of bushels so to be taken out, and the name and location of the mill and the proprietor thereof where the grinding is to be performed.
2nd. He shall reportinwards in like manner the exact quantity of flour or meal and other product of said wheat or grain when he returns the same to Canada, and make a solemn declaration to the effect that such flour or meal and other product is the actual produce of the wbeat or grain taken from Canada, and no other.
3 rd. The officer receiving such reports shall verify the truth thereof to the best of his ability and enter the particulars in the aforesaid book, and shall require the owner to append his signature to such entries in attestation of the correctuess of the same.

If be found that quantity of produc turned more than quantity of wheat properly produce, certained that any c made therein by the whole or in part of $\mathbf{f}$ grain or the product Canadian wheat or ed to have been tak ground, or if any ot act has been don thereto, then tho alleged product so be seized and forfe lbarrows

## financial.

0 fiseal year of the Dominion, adopted at the time of Confederation, commences on the July and ends on the 30th June the following year. The receipts from soures of the lary revenue are paid into what is called the Consolidated Funt, and payments shereare made 10 cover the ordinary expenses. These receipts and payments, therefore, conte what may be considered as the regulur income ant expendisure of the country; the pts from an d expenditure out of loans and all other special transactions being excluded. nary revenue is obtained in a variety of ways, and gen rally dirided into two classes, "Taxation" and "Other Sources." The amounts raised from the form r consist solely ustoms and Excise dutics, and from the latter, of money derived from postal service, ray*, canals, public works, etc. The charges to be provided against these are for debt and provincial subsidies, collection of ievente and the current experses of (jovern.The following table gives the receipts and payments on account of the Consolidated $\dot{d}$, and the surplus or deficiency in each year from 1868 to 1891 :-

|  | Consolidated Fund. |  | Revenue in Excess of Expen | Expenditure <br> in Excess |
| :---: | :---: | :---: | :---: | :---: |
| sar ended 30th June. | Revenue. | Expenditure, | diture. | of Revenue. |
|  | \$13,687,928 | \$13,486,092 | $\$ 201,836$ 341,90 |  |

The Territories

The amount of revente per heal was exceeded only in the two preceding years anf 1883, and was within 13 cents of being double the revenue per head in 1868 ; both in 189 1890, the amount having been more than double.

The gross public debt of the Dominion to 30th June, 1891, amounted to $\$ 289,899,230$, for the same date in 1890 it was $\$ 286,112,295$, an increase during the year in the amount of the country's liabilities of $\$ 3,786,935$. The net public debt for the same periode in 1891, $\$ 237,809,030$, and, in $1890, \$ 237,533,212$, being an actual increase in the net liabili of $\$ 275,818$.

Since Confederation there has been a decrease in the gross debt thrice, in the yearsse 1883 and $1 \times 90$, and of the net debt twice, viz. : in the years 1871 and 1882. The increaveint gross debt since Confederation has been $\$ 196,853,179$, and in the net debt $\$ 162,081,389$, being average annual increase of the latter of $\$ 6,753,349$. The increase of the debt has been mid owing to the followiug objects : The assumption by the Dominion of the debts of the valic Provinces, the construction of the Intercolonial and Canadian Pacific Railways, enlargeme and improvement of canals, harbors, and rivers, expenses of buying and management of Northwest Territories and other numerous public works. The Provincial debts assumed Confederation were as follows :

| anada, Ontario and Quebec | \$62,500,000 |
| :---: | :---: |
| Nova Scotia | 8,000,000 |

On the Canadian Pacific Railway was spent $\$ 61,977,948$, for the Intercolonial and brande $\$ 43,911,351$, and for canals $\$ 35,149,022$, making a total of $\$ 141,038,321$. The whole debt is ti easily accounted for, and it will be observed that on railways and canals there has beenspec the sum of $\$ 12,659,439 \mathrm{~m}$ re than the total increase of the debt since Confederation. Theft lowing table shows the amounts spent by the Government in each year since Confederation building railways, canals, public buildings, and other works :

| Year ended June 30. | Railways. | Canals. | Public Buildings. | Other Public Works. | Total, |

* Or 53 years, calculated for 25 years only.

Th rate of intereet pait is very much lower than formerly, for while the amount of the net per hoad has increased about 118 per cent, the amount of net interest paid has only uced 36 per cent. In 18 f8 the interest-bearing assets amounted to the sum of $\$ 15,853$, or about 91 per cent. of the whole amount; in 1891 they were $\$ 32,755,196$, or 63 per cent. of whole. There h 4 s been a decrease on the average rat paid on the net interest of the debt from $\$ 4.51$ p. c. in 1868 to $\$ 2.93$ p. c. in $1 \$ 91$, a decrease of $\$ 1.58$ on each one dollar. fixed charges, viz, : Sinking Fund and Subsidies to provinces amounted in 1868 to 58 c. of the revenue, but in 1891 had been reduced to $40 \mathrm{p}, \mathrm{c}$. The standing of the dit of the Dominion can be judged from the following tables, which show the several rates of erest paid and the amounts on which the same are payable :-
n 1868 , interest was payable at the rate of
7 per cent on ................ \$ 873,200
${ }_{4}^{5}$ per cent on $\ldots \ldots \ldots \ldots . . \quad 32,015,207$
Since then
Payable in London-

Interest,therefore, is payable on $\$ 229,890,230$, as follows :-
6 per cent on............. $\$ 2,170,399 \quad 3 \frac{1}{2}$ per cent on............. $63,785,859$

Trust Accounts-

## Shipping.

It is no small hoast for a country with the emparatively scanty popnlation of stand the tifth marine power in the world, yet, such is the proud position the Dum cupies to-tay. 'The totul number of vesselson the registry bookn of the looninion is $7,10 \mathrm{lu}$ ing 1, ns0,481 tons register. 'I his intludrs old ant new vessels, sailing vesse's, sieal barges. The number of nteameris $n$ the registry books is $1,3 \mathrm{tk}$, with a gross toante, tons. Assuming the average value to be $\$ 30$ per ton, the value of the registeredte Canada is $\$ 31,213,430$. A statement showing the tonnage of some of the principal countries of the world is as tollows :-
 expected, stands first. The following is a summary :-

| Province. | Total Vessels. | Steam. | Tonnage Steam. |
| :---: | :---: | :---: | :---: |
| New Brunswick. | 1,013 | 91 | 0,355 |
| Nova Scotia. | 2,835 | 91 | 9,009 |
| Quebec. | 1,455 | 804 | 71,428 |
| Ontario Prince Edward Island | 1,353 | $6 ¢ 9$ | 85,029 |
| Prince Edward 1sland British Columbia...... | 224 | 18 | 3,678 |
| British Columbia. Manitoba....... | 176 | 106 | 18,8:9 |
| Manitoba. | 77 | 49 | 5,25! |
| Total. | 7,153 | 1,318 | 205,631 |

It may be said, however, that these figures are the lowest of any for twenty year During the fiscal ywar ending June 30 tn, $1 \times 91$, there entered inw ords from sea in the D of Canad 4 , in freight and in haliast, 15,548 vessens of nll nationalities. These vessels $5,273,935$ to 8 register ; they br uaght here $1,02 \times, 736$ tons weight and 181,865 tous measuren freight, and carried crews of $219,965 \mathrm{men}$. Out of the total number of vessels arrivill were $\times, 999$ in bailast. Canadian craft dil a goo I share of this trade, 6,671 Canudian vess tering during the year, carrying 227,662 weish; and 18,053 to $\mathbf{8}$ me isurement of freig British vessels 1,759 entered, an 1 of forein craf' 7,11 en ered luring the year. During in there entere 1 outwards for sea 11 the Do ninion of Canada 15,773 vessels of $5,421,261$ tons ter, carrying $2,100,987$ tons weight and $2,303,3 \cdot 7$ tons measur↔ment of freight, an ( 11 an 224,394 reamen. There entered outwards in ballast $3.23 \alpha$ ves se's. The natio alities vessels entering outw srds wer'd vided as follows: British 1,724, flanatian 6,994, Fore'g Canadian vessels carrie 145,454 to is weight, aul 798,070 tons measure nent of the total carried. Thus dana lian registered vesself handled last year alt vether $6 R 3,116$ tons weig 816,123 tons meaxurement of all the freight carried, a total of $1,499,239$ tons. The descrip the vessels that arrived is :--

The description of the vessels outwards is :

|  | Steam |  | Sail. |  |
| :---: | :---: | :---: | :---: | :---: |
| British | $\begin{gathered} \text { No, } \\ 1,721 \end{gathered}$ | $\begin{gathered} \text { Tons, } \\ 1,750,569 \end{gathered}$ | $\underset{6,997}{\text { No. }}$ | $\begin{gathered} \text { Tons, } \\ 902,799 \end{gathered}$ |
| Foreign | 2,541 | 1,783,423 | $\begin{aligned} & 6,597 \\ & 4,514 \end{aligned}$ | 977,500 |
| Total. | 4,2j2 | 8,539,062 | 11,511 | 88C,209 |

The number of versels entered inwards and outwards on inland waters between or Quebec and the United States, last year, was 38 ous, of $8,17,452$ tons reuister, carrying 2 tons weight and $>65,609$ tons measurement, and with crews of 359,14 men. The grand to a shipping (exclusive of coasting vessels) entered inwards and outwards last year was 69,399 of $18,800,648$ tons, with $5,529,069$ tons weight and $3,358,831$ tons neasurement of freight, and mu by 802,373 seamen, Of this enormous quantity of freight Canadian vessels carried $2,245,02 \mathrm{i}$

weight and $1,448,805$ tons measurement, $3,694,729$ tons in all. Canada's trade on inland waters is a verylarge and a very important one, as the figures will show. Here Canada has one competitor, the TVited States, but she manag ss to get the lion's share of the trade. 't he number of vessels entering during the year were 19,000 of $4,098,431$ tons register, carrying $1,683,485$ tons weig at and 148,169 tons measure'nent.
of these Canadian entries were 11097 , of $2,948,870$ tons register, carrying $1,033,906$ tons weight and 146,388 tons m-asurement, with crews of $125,378 \mathrm{men}$. The majority of these entries were made by steamers, although sailing vessels carried the most of the freight. The number of the vessels outward for the lake ports was 19,001 , of $4,009,018$ tons register, carrying $71^{\pi}, 861$ tons weight and 717,440 tons measurement, and with crews of 180,189 men. Uf this number 10,905 were Canadian vessels, of $2,775,469$ tons register, carrying 528,902 tons weight and 486,294 tons meavurement of freight, and with crews of 120,363 men. The total quantity of freight carried on the rivers and lakes between Canada and the United States wis 2,399,346 tons weight and 865,609 tons measurement. It took 38,00 s vessels, with crews of 358,014 men to transport this amount. Canadian vessels got more than half the business, carrying $1,6 \times 3,485$ tons weight and 148,169 tons measurement of this freight. Of the vessels employed in the coasting trade of Canada, entries of inward craft last year were 64,178, with a tonnage of 22,835,774 and carrying 622,022 men. Outward entries of coasting vessels were 61,386, of $12,150,356$ ons, and with crews of 621,964 men.
Shipbuilding is evidently very far from dead in Canada. There were built last year at all ports 812 vessels of all classes, with a total tonnage of 55,477 . Of these 72 were steam, with a total onnage of 5,902 , mostly vessels of a very small class. There were 2 ships, 12 barques, 24 barquen. mes, whigantines, 17 schooners, 29 sloops and 15 barges built last year, 6 paddle steamers, 6 tern wheelers, and 60 screw steamers. The vessels registered in Canada last year numbered 31, of 52,506 tons. The number of vessels sold to other countries last year was 35 , of 15,143 ons, and valued at $\$ 280,474$, One ship sold for $\$ 31,600,16$ barques for $\$ 198,067,14$ schooners for
45,50 , and 4 sloc ps for $\$ 5,257$.

The organization of the Militia of Canada as at present constituted dates back to Confod eration. A militia force was organized soon after the Conquest, and did good service in to wars of 1776 and 1812 ; in fact the Canadian Militia bore the brunt of the various serer campaigns in Canada during the war of 1812.

After the declaration of peace the militia force was practically disbanded, and when the rebellion of 1837-38 broke out, there were only one or two small corps of organized voluntees in existence. As soon as the rebellion declared itself, however, numerous corps of voluntee militia were hastily organized, and, with the slender force of British regular troops then intil colony, promptly suppressed the uprising. As soon as the rebellion was well over these conf with a few exceptions, were disbanded, and Canada was again virtually without a militia foro until the excitement produced by the threatened American invasion at the time of ti "Trent" affair in 1862. Most of the present militia corps date their organization from the period, being taken over by thenew Dominion Government on the Confederation of the Proving in 1867. The first militia act was passed in 1868, and the Canadian Militia became a permanem institution, and the Dominion's irst line of defence. After Confederation all of the militar posts held by the Imperial troops in Canada were turned over to the Dominion Governmeat with the exception of the defences at Halifax, $N$. $\mathrm{S}_{\text {, , which }}$ is the only military post in Cann now maintained by the Imperial authorities. The British naval authorities, howere maintain a naval establishment at Esquimault, British Columbia.

Although theoretically consisting of only two branches-the Active Militia and the Reser -the system is more easily understood if the foree is considered as consisting of three division the permanently embodied troops or "regulars ", the organized corps of volunteer militia, and the unorganized reserve.

The Militia Act ( 49 Victoria, Chap, 41) provides that Her Majesty may, for the purposec providing for the care and protection of forts, magazines, warlike stores and such like servic and for the purpose of securing the establishment of schools for military instruction, raise 83 maintain in addition to the ordinary Active Militia force, one troop of Cavalry, three battefif ot Artillery, and not more than five companies of Infantry, the whole strength of whid several corps shall not exceed one thousand men, the officers being appointed during pleasuri and the men enlisted for periods of three years' continuous service.

The permanently embodied force at present consists of the Canadian Dragoons, two troop the Regiment of Canadian Artillery, three batteries, and the Canadian Regiment of Infanty four companies. The strength of this permanent force is 966 men exclusive of commissiond officers. These corps, in addition to performing garrison and other duties, serve as practio schools of military instruction by affording officers, non-commissioned officers and men of th ordinary Militia opportunities of joining for courses of study and training. No person can appointed an officer in the Active Militia, except provisionally, until he has obtained a certif cate of fitness from one of these military schools, or a board of officers of the Active Militisi special cases, or unless he is a graduate of the Royal Military College, Kingston, a retiry officer in the Imperial Army, or unless he has obtained a certificate from one of the schoolsa military instruction heretofore established in the late Province of Canada.

The regularly organized corps of Militia are all raised by voluntary enlistment, the perin of service for non-commissioned officers and men being, as in the permanent corps, thery years. The present strength of the force is 38,000 men, organized as follows:-Dragoons, if regiments and two independent troops; Hussars, five regiments and two independent tropth

ows:-Dragoons, fre independent troopt

Ittillery, 19 field batteries, 38 garrison batteries, and one half battery of mountain artillery; ingineers, three companies ; infantry, seventy-three battalions and one independent comfngiweersfes, twenty-two battalions and two independent companies.
The uniforms of the Militia are exactly like those worn by the Imperial Army. All the pragoon regiments wear blue uniforms with white facings, with the exception of the Third Prince of Wales Canadian Dragoon Guards, of Cobourg, whose tunics are scarlet with yellow scings. The Hussars wear blue uniforms with buff facings, and the Artillery blue with scarlet acings. The Engineers wear the scarlet tunics with blue facings of the Royal Engineers. The ffaniry wear the scarlet tunics with blue facings with the exception of the Sixth Fusiliers, who wear white facings. The Rifles wear dark green uniforms with scarlet facings.
The Reserve Militia consists of the whole of the men of Canada who are not serving in the setive Militia for the time being. The male population liable to serve in the Militia is divided nto four classes :-
The first class comprises those of the age of eighteen years and upwards, but under thirty aars, who are unmarried or widowers without children;
The second class comprises those of the age of thirty, years and upwards, but under fortyre years, who are unmarried or widowers without children;
The third class comprises those of the age of eighteen years and upwards, but under fortyyeyars, who are married or widowers without children ;
The fourth class comprises those of the age of forty-five years and upwards but under sixty pears.
The above is the order in which the male population can be called upon to serve. The following porsons only, between the ages of eighteen and.sixty years are exempt from enrolment nd from actual service at any time :- The judges of all the courts of justice ; the clergy and ninisters of all denominations; the protessors in every college and university and all teachers nreligious orders; officers and persons regularly employed in the collection or management of the revenue or in accounting for the same; the wardens, ofticers and servants of peniten-
tiaries, gaols and lunatic asylums ; persons disabled by bodily infirmity; the only son of a widow being her only support.
The following persons, through enrolled, are exempt from actual service at any time except in pase of war, invasion or insurrection :-Half-pay and retired officers of Her Majesty's Army or Nary ; seafaring men and sailors actually employed in their calling ; pilots and apprentice tilotsduring the season of navigation, and masters of public and common schools actually fagaged in teaching.

Quakers, Mennonites or Trunkers, and every inhabitant of Canada of any religious denomination, otherwise subject to military duty, who, from the doctrine of his religion, is adverse to bearing arms and refuses personal military service, is exempt from such service when balloted in time of peace or war, upon such conditions and under such regulations as the Governor in Council may from time to time prescribe.
The command in chief of the Militia is vested in the Queen, and is exercised and administered by Her Majesty personally or by the Governor General as her representative. The actual command of the Militia, under the Queen's order, devolves upon an officer holding the rank of Colonel, or rank superior thereto in Her Majesty's regular army, and who, whille he holds such appointment, has the rank of Major General in the Militia, and is paid at the rate of four thousand dollars per annum in full of all pay and allowances.

The Dominion is divided into twelve military districts, each of which is under the immediate command of a Deputy Adjutant General, holding the rank of Lieutenant Colonel, and drawing pay at the rate of $\$ 1,200$ per annum.

The administration of Milltia affairs is in the hands of the Minister of Militia and Defence, who has the initiative in all militia affairs in volving the expenditure of money.
The expenditure in connection with the maintenance of Militia for the past fiscal year was $81,287,530,67$.

The rates of daily pay in the Militia are as follows :- Lieutenant Colonel, \$4.87 ; Major, 83.90 ; Paymaster, $\$ 3.05$; Adjutant with rank of Lieutenant, $\$ 2.44$; Adjutant with rank of second Lieutenant, $\$ 2.13$; Surgeon, $\$ 3.65$; Assistant Surgeon, $\$ 2.43$; Quartermaster, $\$ 1.94$; Captain, $\$ 2.82$; Lieutenant, $\$ 1.58$; Second Lieutenant, $\$ 1.28$; Sergeant Major, $\$ 1.00$; Quartermaster Sergeant, Paymaster's Clerk, Orderly Room Clerk. Hospital Sergeant, 90 cts each ; Pay Sergeant, 80 cts ; Sergeant, 75 cts ; Corporal, 60 cts ; Bugler, 50 cts ; Private, 50 cts.

The officers and men of the several corps of the Active Militia or any portion thereof may be ordered out to drill for a period not exceeding sixteen days or less than eight days in each year, receiving pay for the days ordered out. The present practice is to allow the city corps to drill at their respective headquarters every year, and they are allowed ten days' pay for every officer, non commissioned officer and man who has put in ten drills. As a matter of fact the city militia men generally attend twice the requisite number of parades every year. The country corps are, as a general thing, ordered out every alternate year for ten days' drill in brigade camps of exercise.

The Militia may be called out for active service either within or without Canada at any time when it appears advisable so to do by reason of war, invasion or insurrection, or danger ofany of them. The Active Militia is also liable to be called out for active service in aid of the civil power, and to act as guards of honor and escorts.

The Active Militia are subject to the "Queen's Regulations and Orders for the Army," the Army Act passed by the Parliament of the United Kingdom, and all other laws applicable to Her Majesty's troops in Canada, and not inconsistent with the Militia Act ; except that no man shall be subject to any corporal punishment but death or imprisonment for any contrarention of such laws.

Active Militia called out in Defence of the Country or in Aid of the Civil Power singe
1st July, 1867.

Portion of permanent Artillery remaining till September, 1886.

The total capital paid up for all the railways in the Dominion amounted in 1890 to 8886,417,812, and in 1891 to $\$ 816,647,758$.

The Canadian Pacific system has the greatest number of miles in operation, but the traffic on tho Grand Trunk system is considerably the largest, running as it does through the most populous and best settled portions of the Dominion. In proportion to the number of miles in peration, the freight traffic on the Canada Southern exceeded that of any other line, being at lie rate of 10,357 tons per mile, an increase of 2,693 tons per mile as compared with 1890 , that on the Grand Trunk system having been 2,461 tons, an increase of 72 tons per mile, aud on the Canadian l'acific 653 tons, an increase of 73 tons per mile. On the same lines the passengers arried per mile were : on the Grand Trunk 1,880, on the Canada Southern 1,653, and on the Canadian Pacific 536. The number of miles run by trains on the same lines in proportion to ach "ile in operation was: on the Canada Southern 8,586 miles, on the Grand Trunk 5,244 hiles, and on the Canadian Pacific 2,484 miles.
The total average cost per completed mile of the railways in Canada has been $\$ 55,809$. As egards safe travelling, the following table shows the percentage killed per million carried from 1875-1891, the average for the whole period being 1.42:
were required by Edward Island Government with ovince of Prince ver, encourag.d 781 as bonuses at bt. In aidition, vincial Governunicipalities the aprairie and St. the Northern in t, 2,258 miles ; in since Confedera75 were more or

Almost all the companies use a gauge of 4 feet $8 \frac{1}{2}$ inches. The only exceptions are the Ca -ilon and Grenville gauge 5 feet 6 inches ; Prince Edward Island gange 3 feet 6 inches; and lake Temiscamingue railway gauge 3 feet. The following table shows the financial position of the Government railways in Canada for 1890-91 :

The proportion that each amount bears to the total capital paid up of all the railways ise follows :-

| 1889. Per cent. | 1890. Per cent. | 1891. Per cent, |
| :---: | :---: | :---: |
| $31^{\text {- }}$ | $30^{*}$ | 29.2 |
| 33. | $34 \cdot$ | $35 \cdot 8$ |
| $18^{*}$ | $18^{*}$ | 17.5 |
| 12. | 12 . | $12 \cdot 3$ |
| 3. | 3. | $3 \%$ |
| $2 \cdot$ | 2. | 17 |
| $0 \cdot 4$ | 0.4 | $0 \cdot 3$ |

Ordinary share capital Bonded debt..

As will be seen, nearly 23 per cent, of the total capital has been contributed by municipal and State aid.

## Canalg.

The Canal system and Inland navigation of the Dominion is admitted to be the largestand most important in the world. The St. Lawrence system alone, in conjunction with the greal lakes, extends for 2,260 miles from Lake Superior to the Straits of Belle Isle. Of this grean distance nearly 75 miles are by means of canals and the remainder open navigation. The canal on the St. Lawrence system are as follows :-

The Welland, from Port Colborne, on Lake Erie, to Port Dalhousie, on Lake Ontario, 28 miles in length by the enlarged or new line, with 26 locks, and a total rise of 3263 feet; and along the St Lawrence, the Galops, 7 f miles in length, with three locks and a rise of 15 f feet; the Rapide Plat, 4 miles in length, with two locks and a rise of $11 \frac{1}{2}$ feet ; Farran's Point, ${ }^{2}$ ofs mile long, with one lock and a rise of 4 feet ; the Cornwall, $11 \frac{1}{2}$ miles in length, with 6 hock and a rise of 48 feet; the Beaubarnois, $11 /$ miles in length, with 9 locks and a rise of 82 f feet and the Lachine Canal, $8 \frac{1}{2}$ miles in length, with 5 locks and a rise of 45 feet.

The difference between tide water and Lake Superior is about 600 feet. The total number of locks on the whole system is 53 , and the greatest navigable depth 14 feet in the Wellaudonfy since 1888. The depth in the other canals is 12 feet, but a uniform depth of 14 feet is to becus ried out in the course of a few years. The other canal systems of the country are as follows:-

The Ottawa, which connects Montreal and the city of Ottawa; and the Rideau, which, in conjunction with the Ottawa system, affords communication between Montreal and Kingston a total distance of 246 miles. The lockage on this system (not innluding that of the Laching Canal) is 609 feet, 345 rise and 164 fall, and the number of locks is 55. The Rideau Canal wy originally built by the Imperial Government for military purposes. It was begun in 1826 , tip ished in 1834, at a cost of $\$ 3,911,701$, and t 'ansferred to Canadian authorities in January, 1887?

Then there are the Richelieu and Lake Champlain, or Chambly Canal, a distance of 81 mime from the St, Lawrence to the Lake. There are 10 locks and a rise of 79 feet. The Burlington Bay Canal, $\frac{1}{2}$ mile, connecting the Bay with Lake Ontario.

St. Peter's Canal, C. B., Nova Scotia, which gives acress to the Atlantic, to the Bras d'or Lakes, has one lock, and is 2,400 feet long. The rise and fall of tide 4 feet.

The Trent River system is only efficient for light draft vessels and for local use coinnecting Lakes Huron and Ontario, and is 235 miles, of which 155 miles are available. The Mur ray Canal connecting Lake Untario and Bay of Quinté is $5 \frac{1}{2}$ miles in length and has no locks. The total amount spent on canals by the Imperial Government previous to Confederation wis $\$ 4,173,921$, and by the Provincial Governments $\$ 16,518,323$. At the time of Confederation all the systems became the property of the Dominion Government, who have expended the further sum of $\$ 36,522,048$, making a total amount spent for construction and enlargement alone of $\$ 57,214,292$, the amount expended for repairs not being included in these figures.

The construction of the Sault Ste. Marie Canal, now in progress. will make the Canadime system complete from the Ocean to Lake Superior. This canal will be two-thirds of a mileif length, 150 feet wide, and 18 feet deep at low water. There will be 1 lock 900 feet long, 60 feed wide, and 21 feet deep on the water sills. The work is to be finished in 1893 at a cost of about $\$ 3,000,000$. The following is a table of distances between Lake Superior and Liverpool:-

The total quantity of freight carried on all the canals for the year 1891 was 2,902,046 tons, equantity of grain exported from Chicago to Canada by Lake during season of 1891 was put $4,74,708 \mathrm{~b}$ shels, and the total value of freight exported from Chicago to Canada by Lake orsame period, $\$ 3,916,452$, of which amount Canadian vessels carried $\$ 2,030,385$. The total renue, exclusive of hydranlic rents, for the past two years is as follows :-1890, 8348,$059 ; 1891$, 350,351 , an increase in the gross revenue of $\$ 2,292$.

## Celegraphy.

The principal telegraph lines in the Dominion are in the hands of private companies, and the orernment only own and operate those in the interest of the public service where earnings ould hardly compensate private enterprise. These stations are chiefly established by the arine Department along the shores of the Gulf of St. Lawrence, the Maritime Provinces, orth West Territories and British Columbia. The extent of these lines, land and cable, roughout the Dominion owned by the Government foots up 2,492 miles land lines and 207 cable nes, total 2,699 miles. In addition to these the Government subsidize 208 miles from Canso to alifax operated by the Western Union Tel. Co., 206 miles from Grand Metis to Gaspé Basin opered by Great North-Western Tel. Co., and the Bath-A mherst line, 8 miles, operated by the North merican Tel. Co., making a grand total of 3,121 miles built and subsidized. The revenue I 1891 was $\$ 13,177$ and the expenditure $\$ 51,727$, making a total excess of expenditure of $\$ 38,550$. te bulk of the telegraph business is in the hands of the Great North-Western Telegraph 0 and the Canadian Pacific Railway Co., and in the Maritime Provinces of the Western Union degraph Co. The following is the statement for 1891 of the several Companies :-

| Company. | Miles of Line. | Miles of Wire. | Number of Messages. | Number of Offices. |
| :---: | :---: | :---: | :---: | :---: |
| reat North-Western Telegraph Co..... | 17,966 | 33.505 | 2,846,030 | 1,523 |
| anadian Pacific Railway Co................. | 6,700 | $22,265$ | 1,003,000 | 750 |
| festern Union |  | $8,034$ | 368,530 |  |
| Total ........................ | 27.866 | 63.804 | 4,217,560 | 2,482 |

Press messages are not included in the number sent by the Canadian Pacific Railway Commy.

## DOMINION OF CANADA.

Under the " Brithish North America Act" the Governor General has the appointment of the odges of the Superior, District and County Courts in each Province. The Judges of the aperior Courts hold office during good behavior, but are removable by the Governor General faddress of the Senate and House of Commons. The salaries of the Judges are fixed and covided for by the Parliament of Canada. The provincial jurisdiction extends to the admintration of justice in the Province, including the constitution, maintenance and organization tProvincial Courts, both of civil and of criminal jurisdiction; and including procedure in vil matters, Brietfy speaking, the Provinces constitute the Courts, the Dominion appoints eJudges. The Dominion has also jurisdiction over criminal law and procedure in criminal asters, while the Provinces have jurisdiction over civil matters. The Dominion has power constitute a general Court of Appeal for Canada and for the establishment of any addional Courts for the better administration of the laws of Canada, that is, of the Dominion. he Provinces have the right of constituting the necessary Criminal Courts. Under the athority of the above provisions Courts have been constituted as follows :-

1. Supreme Court of Canada.

This Court has appellate, civil and criminal jurisdiction throughout the Dominion; the udges must reside at Ottawa.
2. The Exchequer Court of Canada.

This Court has jurisdiction over all claims or actions against the Crown; revenue cases and fuits against Crown officers are also tried in this Court. An appeal lies from the Supreme Court fthe Dominion to the Appellate Tribunal called the Judicial Committee of the Privy Council, hich, is composed of members of the Imperial Privy Council qualified by certain Acts of Parliahent, and of the members usually attending are the Lord Chancellor and ex-Lord Chancellors, be Lords Appeal in ordinary and Peers who hold or have held high Judicial office, viz :
Lord Herschell, Lord Halsbury, the Earl of Selborne, Lord Watson, Lord Maonaghten, Lord Morris, Lord Hannen, Lord Hobhouse, Lord Shand, Lord Esher, Lord Coleridge. hord Penzance.
Registrar,-G. Denison Faber, Esq.

## THE SUPREME COURT.

## COURTS AND THEIR JURISDICTION IN THE PROVINCE OF ONTARIO.

The Superior Provincial Court for the Province of Ontario is the Supreme Court of Judicature for Ontario. This Court is divided into two branches-the Court of Appeal and the High Court of Justice. The latter is again subdivided into three divisions-Queen's Bench, Chancery and Common Pleas. Besides the Supreme Court of Judicature for Ontario there are also the Superior Courts, viz.: County Courts and Division Courts, which deal with civil causes. It is best to commence with the lowest first, and to consider, therefore, the Division Courts.

These Courts have a jurisdiction to the amount of $\$ 100 \mathrm{in}$ actions of debt and contract where the amount is not ascertained by the defendant's signature. When the amount is ascertained by the defendant's signature they can try cases up to \$200. In no case can the account to be gone into exceed 8400 . Injuries or torts to personal chattels and personal actions may also be tried in these Courts up to the limit of $\$ 60$. Actions for gambling debts, liquors drunk in a tavern, ejectment, title to land, questions involving any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, crim con, seduction, or breach of promise of marriage, cannot be tried in this Court, no matter how small the amount claimed. Actions against a Justice of the Peace for anything done by him in the execution of his office cannot be tried here if he objects.

The next Courts in order of jurisdiction are the County Courts. Their jurisdiction covers actions to the amount of $\$ 200$ for debt or damages; if the amount is ascertained by the defendant's signature they have jurisdiction to the amount of $\$ 400$. They cannot try any cases involring the title to lands, of the validity of wills, or any actions for libel, slander, crim con, or seduction. Although the Court next in order to the County Courts is the Supreme Court of Judicature, an appeal from the County Courts is not taken to that Court but to the Court of Appeal. Special provision is made for keeping down the expense of these appeals.

The next Court is the Supreme Court of Judicature, subdivided as above stated into the Court of Appeal and the High Court of Justice. The three subdivisions of the High Court of Justice are intended for convenience only ; the jurisdiction of all three branches is the same. The Judges comprising the three divisions may sit in any division, and, as far as possible, the Conrt is intended to be one Court only. The jurisdiction of this Court covers everything outside of what has been confined to the County Court and the Division Court. A suit brought by mistake in a higher Court involves the penalty of having to pay all extra costs occasioned by the mistake. The general jurisdiction of the Court may be said to cover all claims in civil matters between subject and subject, or Crown and subject. The Chancery Division has certain special subjects relegated to it in practice, such as trusts, lunatics, infants, accounts, but all the divisions are supposed to be competent to deal with all subjects.

Next to the High Court of Justice comes the Court of Appeal. To this Court there is an appeal from the High Court of Justice, from the County Courts, and also in some cases from the Division Courts. In any question respecting property or civil rights no appeal lies from the High Court to the Court of Appeal, unless the title to real estate or validity of a patent is affected; or (2) unless the matter'in controversy exceeds 8200 ; or (3) unless the matter relates to an annual rent, duty or fee or some demand of a general or public nature affecting future rights. If there has been no difference of opinion in the High Court, then there is no appeal to the Court of Appeal,'unless the matter in controversy exceeds the sum of $\$ 500$ as well as the other cases just mentioned.

From the Court of Appeal an appeal lies either to the Supreme Court of the Dominion or to the Imperial Privy Council. No appeal can be had to the Supreme Court of Canada without special leave, unless the title to real estate or the validity of a patent is affected ; or (2) unless the matter in controversy exceeds $\$ 1,000$; or (3) unless it relates to the taking of an annual rent, customary or other duty or fee, or like demand of a general or public nature affecting future rights.

Before cases can be heard by the Court of Appeal, security for the costs of the appeal must be furnished to the amount of $\$ 400$; the same amount is required as security before an appeal can be heard by the Supreme Court of Canada. Before an appeal can be taken to the luperial Privy Council, $\$ 2,000$ of security must be furnished.

No appeal can be had to the Privy Council except in cases where the matter in controversy exceeds the sum of $\$ 4,000$, or where the matter relates to an annual rent or other like demand of a general and public nature affecting future rights.

Besides the above Courts which deal with civil matters, County Judges hold County Court sittings for the trial of cases of felony and misdemeanor ; treason and capital felonies being taken out of their jurisdiction. Prisoners with their own consent may be tried on a criminal charge by a County Court Judge without a jury. The Judges of the Supreme Court of Judicature act as Judges in criminal matters as well as civil matters,
Controverted elections, whether for the House of Commons of Canada or for the local Legislature of Ontario are also tried by the Judges of the Supreme Court of Judicature. Claims for Crown patents to lands in Ontario are disposed of by the heir and devisee commission constituted from the Judges of the Supreme Court of Judicature. A special Court to deal with the Maritime affairs has been constituted by the Dominion ; it is called "The Maritime Court of Ontario," and is composed of one Judge for the whole Province, with other Jadges for certain localities as required. This Court has jurisdiction over all matters conpected with navigation, shipping, trade or commerce on any river, lake or inland water,

## The Star Almanac.

Questions relating to wills and administration are dealt with by the Surrogate Court The Judges of the County Courts are also Judges of the Surrogate Courts.

## THE LAW SOCIETY OF UPPER CANADA.

This Society was established in 1797 by the Legislature of Upper Canada. The Act 37 Geo. III., e. 13, enabled the members of the profession to form themselves into a Society and nake rules for its government. In 1822 the Society was formally incorporated. It is composed of all members of the legal profession, and is governed by Benchers, some of whom are inoficio, others of whom are elective. The ex-officio members are, generally speaking, Attorhey Generals, present or retired, and retired Judges of the Superior Court. The elective Benchers hold office for five years; they must be barristers, and are elected by members of the Bar. The Society has power to make rules for the admission of candidates, for the instruction andexamination of students, and for their final admission to practice as solicitors and barristers, It has also control over both barristers and solicitors after their admission to practice, and can expel or suspend from practice any member of the Bar, or any solicitor found guilty of unprofessional conduct. The Judges of the Supreme Court of Judicature for Ontario are risitors of the Society. In pursuance of their power to provide for the education of students, the Law Society has established a Law School In this School lectures are delivered and eraminations held; on passing which students are admitted or called.

A solicitor is not entitled to appear before the Courts for the purpose of addressing them ; a barrister has this right. This difference in Ontario is more theoretical than practical, for almost every member of the profession has the right to act in both capacities. The talent or inclination of the best known members of the profession brings theminto notice as advocates before the Courts. Those who prefer the quieter and less known routine work of the solicitor fod themselves perhaps in a more obscure position, but very often in a better financial one, Some few counsel make large incomes as such. The general run of the profession in Ontario combine to some extent both branches.

Visitors.-The several Judges of the Supreme Court of Judicature for Ontario.
Treasurer,-Hon, Edward Blake, M, A., LL, D., Q.C.

## COURTS AND THEIR JURISDICTION IN THE PROVINCE OF NOVA BCOTLA.

The Supreme Court.-It is enacted by the Nova Scotia Judicature Act, passed in 1884, that the Supreme Court of Nova Scotia shall continue to be a Court of record, and shall con-
tinue to have and exercise the jurisdiction which before the adoption of the Judicature Aet 1884. was vested in, and capable of being exercised by, the Supreme Court and the Court of the Equity Judge. By the same Act it is declared that the Supreme Court shall have within the Province of Nova Scotia the same powers as were formerly exercised by the Court of Queen's Bench, Common Pleas, Chancery and Exchequer in England, and also such and the same powers as ware on the 19th day of April, 1884, exercised in England by the Supreme Court of Judicature ; same in respect of Probate and Surrogate Courts. The Judges of the Supreme Court preside as trial Judges in the several counties of the Province, and they sit in banco at Halifax to hear appeals from the decisions of the trial Judges, Judges in Chambers, County Court Judges, and such other matters as may properly come before them. The fupreme Court has no jurisdiction in matters of debt under $\$ 80$, except by way of appeal from the lower Courts. The Judicature Act, und ${ }^{\circ}$ r the provisions of which the Supreme Court is constituted, is Chapter 104 of the Revised Statutes of Nova Scotia.

The Equity Court.-The Judicature Act fused the jurisdiction of the Equity Judge and the Supreme Court, and the powers formerly vested in and exercised by the Equity Judge are now vested in and exercisable by the Supreme Court and the Judges thereof. The title of Judge in Equity is merely nominal, and the Judge in Equity is nothing more than any of the Puisné Judges of the Supreme Court.

County Court,-The County Courts in Nova Scotia shall not have cognizance of any action:
(1.) Where the title to land is brought in question ;
(2.) In which the validity of any devise, bequest or limitation is disputed, except as hereinafter provided;
(3.) For criminal conversation or seduction :
(4.) For breach of promise of marriage.

Subject to the ahove exceptions the County Court has original jurisdiction in all personal actions, actions of replevin, causes and actions where the debt, damage or relief sought does not exceed four hundred dollars, and in case of debt not less than twenty dollars, and in all actions on bail bonds to the sheriff in any cases in the County Courts, whatever may be the penalty or amount sought to be recovered, and in all actions against a sheriff or any officer of the County Court for any non-feasance or malfeasance in connection with any matter transacted in the County Courts; but the above jurisdiction is concurrent with that of the Supreme Court, except as to actions of debt or assumpsit in which the cause of action is less than eighty dollars Criminal jurisdiction has been conferred on the County Court by the Speedy Trials Act, 52 Vict, c. 47 ( Dom .)

Exchequer Court (Nova Scotia Division),-By a Statute of the Imperial Parliament, "The Colonial Courts of Admiralty Act, 1890," the Vice-Admiralty Courts in Canada were abolished, and power was given to the Parliament of Canada to establish Colonial Courts of Admiralty in their stead, which was done by 54-55 Vic, c. 29 (1891). The Admiralty jurisdie tion was conferred on the Exchequer Court of Canada, Admiralty Districts were constituted of which the Province of Nova Scotia is one, and local judges in Admiralty appointed. The local judges in Admiralty exercise the jurisdiction formerly exercised by the Vice-Admiralty Judges.

The Probate Court.-Judges of Probate are appointed for each County in the Prorince They have power to grant letters testamentary and letters of administration, to grant orders for the sale or disposal of, and generally to deal with the estates of deceased persons.

Divorce Court.-The Judge in Equity for the time being is the Judge Ordinary of the Court for Divorce and Matrimonial Causes. This Court has jurisdiction over all matters relating to prohibited marriages and divorce, and may declare any marriage null and void fot impotency, adultery, cruelty, or kindred within the degrees prohibited inan Act passed in the 32nd year of King Henry VIII, entitled: "An Act concerning Pre-contracts, and touching Degrees of Consanguinity: " provided no marriage shall be deemed to be null and void by reason pre-contract. Whenever a sentence of divorce shall be given, the Court maypronounce such determination as it shall think fit on the rights of the parties, or either of them, to courtesy or dower.

Magistrates' Courts.-In actions for debt where the whole dealing or cause of action does not exceed $\$ 20$, one justice; and where the whole dealing or cause of action exceeds $\$ 20$ but does not exceed $\$ 80$, two justices of the peace for the County wherein the defendant resides, or where the debt' or cause of action arose, shall have jurisdiction. By the Toums Incorporation Act, 1888, and other Statutes of the Province, Stipendary Magistrates may bo appointed who can exercise the jurisdiction of two Justices of the Peace with'n the territory for which they are appointed. Preliminary investigations under the Criminal Procedure Ad are had before Justices of the Peace.

## COURTS AND THEIR JURISDICTION IN THE PROVINCE OF NEW

## BRUNSWICK.

The Supreme Court of New Brunswick is the Superior Court of the Province, and is a Court of Record. It has within the Province a'l the powers of the High Court of Justice of England, except as regards Probate and Admiralty matters, It has jurisdiction in all matters of debt of $\$ 400$ and upwards, and in matters of tort of $\$ 200$ and upwards. It has the same friminal jurisdiction as the other Superior Courts of the Dominion.
Supreme Court in Equity.-This Court deals with matters of an equitable nature, its urisdiction being defined by $17 \dot{\text { Vict. Cap. 1. It possesses powers similar to the powers of the }}$ bourt of Chancery of England before the passing of the Judicature Act.
Cotrt of Divorce and M itrimonial Causes.-This Court has taken the place of the Court of the Governor in Council. This Court has jurisdiction in respect to suits, controersies and questions concerning marriages and contracts of marriages and divorce, as well fom the bond of matrimony as divorce and separation from bed and board. An appeal lies fom this Court to the Supreme Court of the Province.
The County Courts have jurisdiction in matters of debt up to $\$ 400$, and in actions of ort up to $\$ 200$, and in actions in bonds given to the Sheriff in any case in the County Court, 0 matter what the penalty may be. These Courts shall not have coguizance of any action :
(1) Where the title to land is in question. (2) In which the validity of any devise, equest or limitation is disputed. (3) For breach of promise of marriage. (4) Of any action gainst a Justice of the Peace for anything done by him in the execution of his office.
The County Court can try criminal matters under the "Speedy Trials Act" where the risoner elects to be so tried.
Probate Court has power to probate wills and to grant administration of the estates of leceased persons, and minor matters incident thereto.

Tar Exchequer Court of Canada (New Brunswiek Division).-This Court now exerises the jurisdiction formerly exercised by the Vice-Admiralty Court, now abolished.
Local Courts.--Stipendiary or Police Magistrates and Parish Commissioners have juris-
ietion in civil matters for the districts for which they are appointed as follows :
(1) Wherever a Justice of the Peace has civil jurisdiction.
(2) Actions of debt up to $\$ 80$ and tort up to $\$ 32$.

Justices of the Peace have jurisdiction in actions of debt up to $\$ 20.00$, and of tort up 8880,00.

## COURTS OF CIVIL JURISDICTIONIN PRINCE EDWARD ISLAND,

The Law Courts in Prince Edward Island having original civil jurisdiction, beginnin at the lowest, are : The City Court, County Court, and Supreme Court. There are, besides, $t$ Court of Chancery, Administering Equity, and the Probate and Surrogate Courts, dealing mit wills and the estates of deceased intestates.

The City Court. - This Court has jurisdiction only in suits between persons residing doing business in the City of Charlottetown, and when the amount in dispute does not exce $\$ 80.00$. It derives its powers from Provincial Statutes. In 1888 (51 Vic., Cap. 12) the Provindi Legislature passed an Act entitled, "An Act to consolidate and amend the several Acts inow porating the City of Charlottetown." This Statute fully defines the powers, jurisiliction an procedure of the said Court. It is enacted that, so far as the same may be applicable, the Cif Court shall have the same powers, authorities and jurisdiction as the County Courts. I Stipendary Magistrate for the City of Charlottetown presides, and tries all questions of is and fact.

There is a similar Court established by Statute in 1878 in the Town of Summerside, knor as the "Small Debt Court of the Town of Summerside," having similar jurisdiction witn th City Court.

The County Courts.-In each County a Court of Record has been established by vith of the Provincial Statute, 36 Victoria, to be known as the County Court of Queen's Coumt the County Court of King's County, and the County Court of Prince County, respectively. IT County Court of Queen's County is subdivided into six circuits, those of the other tri Counties into five circuits each. The powers and jurisdiction of the County Courts are d fined and limited by the Act of the Provincial Legislature passed in 1878. The County Couf of each County is presided over by one Judge, appointed by the Governor General in Counc who tries all questions of law and fact without a jury. The Court is held in each circl four times a year. The County Court has jurisdiction in all actions ex contractu and delicto, up to $\$ 150,00$, except in the following cases :-
(a) Detinue, replevin or ejectment, or where the title of land is brought in question,
(b) Where the validity of any devise, bequest or limitation is disputed.
(c) Criminal conversation or seduction.
(d) Breach of promise of marriage.
(e) Actions against executors or administrators.
(f) Actions against Justice of the Peace for anything done by him in the exercise of office.
(g) Actions on judgments in the Supreme Court.

In all the above cases the Supreme Court only has jurisdiction.
The procedure in the County Court is simple. The action is begun by writ of summon without any other pleadings. The defendant appears in person, and the case is tried in op Court. In case of default of appearance, the plaintiff must prove his claim. Executi against goods and chattels may issue on judgment, but no judgment of the County Court any way affects real estate. In case a debtor is about to leave the Province to evade payme of his debts, or if he has disposed of all his property, a capias may issue. Garnisheep ceedings may be taken in both the County Courts and City Courts where these Courts hit

y writ of summon case is tried in ope 3 claim. Executiol the County Court ce to evade paym sue. Garnishee P e these Courts his
furisdiction in manner similar to those under the English C, P. L. Act 1854. In all cases where judgment is for $\$ 5,00$ or upwards, an appeal lies to the Supreme Court on certain conditions, fully laid down in Statute. Attorneys' costs are not allowed in County Court proceedings.

THE Supreme Court.-This Court has jurisdiction in all cases of debt where the amount claimed is $\$ 32.00$ or upwards. It has jurisdiction in all cases of torts, and all causes of action beyond the jurisdiction of the County Court must be brought in this Court. In short, the Supreme Court has original common law jurisdiction in all cases of civil action, except where the amount is below $\$ 32.00$, if an action of debt, and where some one or the other Dominion Courts has exclusive jurisdiction.

Judgments of the Supreme Court are fiual unless appealed to the Supreme Court of Canada. The Supreme Court, too, has final jurisdiction in all criminal matters. This Court is presided over by the Chief Justice and two Assistant Judges. In 1891, trial by a Judge without a jury in civil cases was made the rule. Either party by giving notice of his intention, and paying thesum of $\$ 3.00$ to cover expenses, may elect to have a jury of seven men. Arguments on points of law for a naw trial, etc., are heard before the full Court. The procedure of the Supreme Court is regu'ated by an Act of the Provincial Legislature enacted in 1873, and known as "The Common Law Procedure Act, 1873." This Act in the main is a re-enactment of the English C. L. P. Acts of 1852-4-60, so far as these latter were spplicable to P. E. Island. The powers conferred on the Supreme Court, when Prince Edward Island first became a colony, are somewhat doubtful. Governor Patterson received a commission authorizing him to erect all necessary Courts of Judicature. The powers of the Court were prohably defined in the Commission of the first Chief Justice. In 1773 the Legis'ature passed an Act making valid all proceedings in the Supreme Court up to that time. At all events the Court seems to have always exercised all the powers usually exercised by Common Law Courts in the other Provinces of Canada, and its right to do so does not appear at any time to have been called into question.

The Court of Chancery--This Court is divided into the Vice-Chancellor's Court and the Rolls Court, which have in all respects equal power, authority and jurisdiction. 'The two assistant Judges of the Supreme Court hold the respective positions of Vice-Chancellor and Master of the Rolls. A suitor is at liberty to elect in which Court he will bring his suit. These Courts have the like powers and authorities that the Rolls Court in England had in 1848, except as these powers may be modified by Provincial Statute. They have original exclusive jurisdiction in all matters now relegated in England to the Chancery Division of the High Court under the Judicature Acts. The procedure is for the most part that of the English Court of Chancery in 1848. The suitor files a bill setting forth his ground of complaint addressed to the Vice-Chancellor or the Master of Rolls, according to which Court he elects, and prays relief. The bill is filed with the Registrar, and a subpoena issues to the defendant, Upon the appearance of the defendant in person, or by solicitor, a copy of the bill is served upon him or his solicitor. He puts in his answer, pleas, or demurrer, as the case may be ; a day is then set for the hearing. The parties and their witnesses are examined viva voce in open Court, and the Judge makes his decree. If either party is dissatisfied he may appeal to the Court of Appeal in Chancery, consisting of the three Judges of the Supreme Court. The Chief Justice has no jurisdiction in Equity, except when sitting as one of the Judges of this Court of Appeal. In $1884^{\text {the }}$ Provincial Legislature passed an Act simplifying the proceedings in Chancery. This Act in noway affected the jurisdiction of the Court. It merely simplified in some degree the technicality of the proceedings, and did away with much unnecessary verbiage.

The Probate and Surbogate Courts have jurisdiction in cases of wills, and the property of deceased persons. The powers and duties of the Surrogate are laid down very fully by Statute.

## SUPREME COURT.

Judges.-Hons, W. W. Sullivan, Chief Justice, \$4,000 ; Joseph Hensley, Assistant Judge, $\$ 3,200$; Edward J, Hodgson, Assistant Judge, 83,200 .

Court of Chancery.-Joseph Hensley, Vice-Chancellor; Edward J. Hodgson, Master of the Rolls.

Prothonotary Superior Court.-John A. Longworth.
Deputy Prothonotaries.-Wm. A, Weeks, Queens Co, ; (ieorge A. Aitken, Kings Co.; Wm. T. Hunt, Prince Co.

County Court Judges,-Geo, Alley, Queens Co. ; Dennis O. M. Reddin, Kings Co. ; Thomas Kelly, Prince Co. $\$ 2,400$ each.

Chief Clerks.-Henry Smith, Queens Co. ; G.A. Aitken, Kings Co. ; Wm. T. Hunt, Prince Co.
Strictly speaking there is now no Chief Clerk in the County Court, that office having been abolished, The above are the Clerks for the towns, and have much the same powers as the Chief Clerks had.

The following comprise the Queen's Councel and Police Magistrates in this Province, viz. :-
Queens Counsel,-C. Palmer, Thomas Heath Haviland, Malcolm McLeod, Louis H. Davies, R, R. FitzGerald, Charlottetown,

Police Magistrates.-R. R. FitzGerald, Q.C , Charlottetown ; Neil McQuarrie, Summerside. There has been no Provincial Taxation in Prince Edward Island since 1881.

## PROFINCE OF MANTTOBA.

County Courts have jurisdiction in all personal actions of tort where damages claimable do not exceed $\$ 250.00$, and actions of replevin, where the value of the goods to be replevined does not exceed $\$ 250.00$. In personal actions for claims and demands of debt, account or breach of contract where the amount or balance does not exceed $\$ 350,00$.

The costs of a County Court action are tritling.

## The Star Almanac.

(1.) County Courts have not juristiction for any gambling debt.
(2.) Spirituous liquors, drunk in a tavern hotel, saloon or alehouse.
(8.) In actions of ejectment.
(4.) Malicious prosecution, libel, slander, criminal conversation, seduction or breach of promise.
(5.) Actions against a Justice of the Peace or other peace officer for anything done by him in the execution of his oftice.

A married woman has no dower in this country.
No will made by any person under the age of 21 years shall be valid.
A holograph will wholly written and signed by the testator himself shall be subject to no particular form, nor shall it require an att-sting witness or witnesses.

A devise to a witness does not affect validity of will, but such devise (legacy, estate, interest, gift, ete.) shall be utterly null and void.

A will (other than holograph) must be witnessed by two witnesses present at the same time and in the presence of the testator.

Every will is revoked by the marriage of the testator.
No obliteration, interlineation, or alteration made in any will after the execution thereof shall be valid or have any effect unless such alteration be executed in a like manner as required for execution of will.

Intestacy.--If any intestate shall die, leaving a widow and child or children, one third of his real and personal estate shall go to his widow and the remaining two-thirds to his child or children in equal shares.

It mo issue, his whole real and personal estate shall go to his widow, and if no widow or issue the whole shall go to his father ; if no father, to mother.

Exemptions.-A debtor is entitled to hold exempt from seizure the following: 160 acres of land, necessary food for 60 days, necessary and ordinary clothing, books of a professional man, axe, gun, saw traps, 2 cows, 3 oxen or 3 horses or mules, 4 sheep, 12 fowls, and food for same for 60 days.

The tools, agricultural implements and necessaries used by the debtor in the practice of his trade, profession or occupation to the value of $\$ 500.00$.

Residence of any person other than a farmer, provided same does not exceed the value of $\$ 1,500.00$.

A partnership firm cannot claim several exemptions for each partner, but only one exemption for the firm out of the partnership property.

COURT OF QUEEN'S BENCH.
Chief Justice.-Hon, T. W. Taylor, $\$ 5,000$.
PuisnéJudges.-Hon. J. Dubuc, $\$ 4.000$; Hon, A, C. Killam, $\$ 4,000$; Hon, J. F. Bain, $\$ 4,000$. Attorney General.-Hon. Clifford Sifton.

## ST. JOHN, N. B.

The prices or rates of fare to be taken and recovered by and paid to the owner, driver, or other person having charge of any licensed hackney carriage shall be as follows : that is to say : For conveying one passenger from any public stand to any other part of the City, or from any one part of the City to any other part thereof, the sum of thirty cents, and for every additional passenger of the same household the sum of twenty cents; other passengers, not of the same household, each thirty cents. When detained at any place by any passenger there shall be an additional fare of fifty cents for every half hour detention. When agreement for hire is made by the hour the faro shall be the sum of $\$ 1$ for each hour, and in that proportion for each division by the quarter of the hour. In case any driver shall be required to cross the ferry of the harbor to
or from Carleton, he shall, in addition to the above fare, receive twenty cents additional rate for one passenger, or more than one of the same household ; but if not of the same household, then twenty cents such additional fare for each passenger ; and also in addition to the fare he shall receive the ferriage charge for himself, his carriage and horses, buth going and returning. Every owner, driver or persolı having charge of any hackney carriage, shall, when requested so to do, carry with each passenger one trunk and also an additional valise, carpet bag, portmanteau, bundle, basket, or other article used in travelling, withont charge or compensations therefor ; and for every additional trunk or other article more than is hereinbefore provided he shall be entitled to demand and receive the sum of flve cents.

## OTTAWA, O.

That the following rates are hereby established as the proper and legal rat. 8 and charges for the conveyance of passengers in Cabs and Omnibuses within the City of Ottawa, between the hours of seven o'elcek in the forenoon and eleven o'clock in the afternoon, and at all other hours double rates shall be proper and legal, and may be exacted where no agreement for a less sum has been entered into between the parties,

## fintgi to Fintenaing 玉etticts.

To the intending emigrant from Great Britain or the United States the inevitable and ommb present question is : "Where shall we go"? This settled, the next enquiry is : "How are we get there?
In the Eastern Provinces of Canada there are yet great quantities of land open to settlement, cleared land, timbered land and farms that their occupants desire to part with; but it the tide of immigration is nown Northwest and the rich Province of British Columbia that themselves for cultivation, where land is actually "dirt cheap." and where, with a moderate expenditure of energy and capital, great results may be achleved. "Westward Ho !" is the or to-day, as it has been since the days of Queen Elizabeth, and the questions naturally arise, "If What part of this vast country shali we settle ; how shall we go, and what capital is required to
star' with when we get there? The Cunen we get there?"
chewan. These districts stretch acrois Manitoba, Assiniboia, Alberta, Athabaska, and Saekatof about 2,:00 miles 1 rom stretch across the Prairies to the foot of the Rocky Mountains, a distano

ssengers, however, must provide their own bedding, but if they do not bring it with tham te Railway Company will supply an entire outfit of mattress, pillow, blanket and curtain: for 250-ten shillings. The trains stop at intervals at stations where refreshments may be proc ire i. Winnipeg the train is met by railway and government officials, who will give the colonists The assistance and advice they require in regard to their new home. In cases where $t$ tev vealready tixed upon some locality, they are sent right through ; otherwise every information in be obtained at the Land Office in Wimnipeg. While the immigrant is making his choice, his mily and baggage "ay remain at the immigrant house in comfort and 8 ofety. The hote 8 large from $\$ 1$ (4s) to $\$ 3$ (12s) per day, according to circumstances. If the immigrant arives at Finuipeg and has not money to go further, the Dominion Government has a! agency in Finipeg whose business it is to be informed where labor is needed. The arrival of a party of minigrants is always anno inced in advance, so that those in need of laborers are on the lookout pscecre thom, Fdim 3 rs are always wanting $h$ inds, an I are willing to pay about $\$_{0}^{\prime} 0$ er month and board for them, while the girls of a fanily, if they so desire, have no diffisul nostaining domestic situations.
Western Canada, or the Provinces of Manitoba, Assiniboia, Alberta, Athabaska and Sas atchewan, contains about $28,000,000$ acres. A portion of this land is owned by the Dominis. orernment, another part by the Canadian Pacific Railway, and still another portion is tht roperty of the Hudson Bay Company. The Railway Company obtains from $\$ 3$ to $\$ 6$ per ere for its holdings. Out of the lands so far surveyed by the Government it is estimated hat at last $20,000,001$ acres are open for settlement. Honesteads, or 16 ) acres, may be Dtained from the Dominion Government upon payment of an office fee of $\$ 10$. To obtain is free land, however, the homesteader must begin actual residence, cultivate his land for least six months of the year, and within three years of his homestead he must have at ast 25 acres cropped, and have erected a habitable residence. There are other conditions tached relative to the increase of acreage under cultivation each year. of course, there is great demand for the free lands. Alternate blocks, one mile square, of the land on either of the Canadian Pacific Railway are the property of the Company.
The question, "How much money is nocessary?" is rather a difficult one to answer. It epends upon circuinstances. Very many men have gone into the Northwest without any spital, and have prospered; a little capital, however, makes the start easier, and saves Auable time. The sum of $\$ 510$ ( $£ 10(5)$ will set a man down upon some western quarter etion, either a free homestead or one chosen among the cheaper lands belonging to the ailway Company, and enable him to build a house and stay there until his farm becomes roductive and self-supporting. With this capital, however, the purchase of land is not sually advisable if a suitable free grant can be obtained, A single man canstart on an, utlay of $838{ }^{\circ}$, made up as follows :-One yoke of oxen and harness, $\$ 115$; plough, harrow, etc. 4 ; bedding, etc., $\$ 20$; lumber, doors, windows, etc., for $\log$ house, $\$^{0} 0 ;$ stove and kitchen unishings, $\$ 40$; provisions, $\$ 90$; seed, $\$ 30$. A farmer with a family of five would have to 7 out 8240 more, bringing his outlay up to $\$ 625$.
A farmer can come in about the middle of March, select his land, and build his shanty ; dean commence to plough about the middle of April ; he can break ten acres and put it der crop on the sod; he can continue breaking for two months after he puts the ten res under crop, and can break thirty acres, and back set (or cross plough) forty acres in the 11 ready for crop in the spring. He can raise enough on the ten acres to give him a start; can cut hay enough for his oxen and a cow in July, and it will cost him about $\$ 60$ addional to seed the forty acres in the spring.
It must not be forgotten, however, that hundreds have arrived in Winnipeg without any oney, and, by first working for wages, have prospered and become substantial farmers.
The cimate of a country which an immigrant may chose as his future home is a matter of nch concern. The seasons in the Northwest are well marked, The summer months have right, clear, and often very warm weather ; but the nights are cool. The days are very long on ccount of the high latitude, and grain has some hours more each day for ripening than in putherly latitudes, thus making up for the comparatively shorter season, Harvesting begins Dout the middle of August, and ends early in September, all the grain coming pretty well ogether. The autumn months are considered the finest of the year. The atmosphere is serene, md free from moisture, frequently for periods of several weeks. The winter is cold, but the thoosphere is buoyant; the sun shines almost every day, and when it is very cold there is seldom ny wind ; the air is extremely bracing and health-giving. This dryness of the air is the secret it the degree of comfort experienced even when the mercury is very low, for that sensation of penetrating chill which makes tha cold weather of coast re rions so severe is rarely felt. Snow tever falls to a great depth, and the railway trains across the plains have never been seriously mpeded by it. As this snow is perfectly dry, a person never has wet feet or soaked clothing y it. Men travel with teams everywhere, taking their grain to market, and doing all their fork, Along the base of the Rockies, where warm, dry chinook winds from the west absorb thesnow rapidly, herds of horses and cattle have hitherto been left out all winter to shift for thenselves, Calves and lambs are born on the open prairie in January and February, and not moly live but thrive. Ploughing can be commenced about the end of March, but generally What befo April 5. Sowing is done during almost the whole of April, and is finished early in Tlay.
Raxching.-If ranching is what the intending settler proposes to go into, an extent of roind equal to the rancher's requirements can be obtained under lease from the Dominion forernment on the following terms :
Sattlers can obtain leases of public lands not exceeding four sections (2,650 acres) in the vicinity of the settler's residence. The lease shall be for a period not exceeding twenty-one yars. The lessee shall pay an annual rental of two cents an acre. The lessee shall within
three years place one head of cattle for every twenty acres of land covered by his lease least one-third of the number of cattle stipulated for shall be placed on the range withine of the three years from the date of the order-in-council granting the lease. Whether he he lessee or not, no person shall be allowed to place sheep upon lands in Manitoba and the Nort west without permission from the Minister of the Interior. Leases of grazing lands to oth than settlers, or in larger quantities than that specified above, are granted only after pubir competition. Full particulars can be obtained on application to the Minister of the Interior Ottawa.

Maps showing the lands now under lease can be seen at the Land Commissioner's 0ffice Winnipeg.

Maps can be secured there free of cost showing the lands open for sale in the ranching d tricts, and their prices

For the benefit of intending settlers an account of the cost of starting a ranch is herewi given :-Take as example a person bringing in a band of 500 head of good grade two-year heifers, at say $\$ 25$ (£5), also 20 bulls at $\$ 50$ (£10). In the first place, he must locate a suitah site for buildings, etc., in the vicinity of good water; a running stream is of course preferab) Then comes the erection of his buildings-a log house which will cost about $\$ 150(£ 30)$; horse stable to accommodate eight horses, $\$ 50$ ( $£ 10$ ) ; a shed $100 \times 20$ feet for weak cows an calves during winter, say $\$ 75$ (£15), and a pole corral for branding calves, etc., about $\$ 15$ ( $£$ These buildings will be sufficient for the first year, and can be added to as his band increase Next comes the purchasing of say fifteen saddle horses at about $\$ 60$ ( $£ 12$ ) per head; ; one ten of work horses at $\$ 250$ ( $£ 50$ ) ; mower and rake $\$ 125$ ( $£ 25$ ), and a wagon and harness $\$ 125$ ( $£ 2$ This will be the principal outlay ; in addition there are the smaller tools, furniture, provision etc.

A practical man gives the following figures in regard to the cost of raising stock, and average profits,
"I would estimate the cost of raising a steer to marketable age of say four years old, as lows, viz:-Take one hundred cows with an increase of at least seventy-filve per cent, estimating the cost of keep for each cow for

|  |  |  |  | \$300 00 |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | 37500 |
| " | " | 3rd " | 3................. ............. ... | 22500 |
| " | " | 4th " | 3 | 22500 22500 |

Or $\$ 18$ per head which will readily sell at $\$ 40$ per head, leaving a profit of $\$ 22$ each. I consid the above a fair estimate of the cost. As I am now feeding my stock at less than three centy head per day, on feed
one dollar per load."

Schools.-There are most liberal provisions made by the Government for schools, sections, making 1,280 acres in each township, are set apart by the Dominion Government, proceeds of which, when sold, are applied to the support of schools.

There is a superintendent in each district, and teachers are required to pass a rigid examin tion. The result is that public schools throughout the West are highly creditable and effectir Academies and colleges are found in Winnipeg and several of the larger towns, some of the under the control of religious bodies, others in the form of private enterprise. Thus a thoroog practical education is placed within the reach of all.

Social Surroundingas. - No matter from what part of the world the colonist may come he will have no difficulty in finding and locating among fellow-countrymen. Every nationalif of Europe is represented among the citizens of the larger centres, but the population
principally composed of English-speaking people.

The toils of these people are not so severe as to compel them to forego all or any of $t$ isttle social pleasantries which add so greatly to the enjoyment of life. Game of many variffif is so plenttful that a holiday with the gun will furnish pleasure and a most acceptable additio to the farmer's larder. The ease with which really good sport may be obtained is frequeutly powerful inducement to young Englishmen to make their homes in this country.

British Columbia.-A province which is attracting a great deal of attention from settle and which has not yet been mentioned, is British Columbia. It is the most westerly provin of Canada, and contains a superficial area of about 300,000 square miles, The harbors of th province are unrivalled, and farming, fruit growing and mining flourish. Its timber unequalled in quality, quantity and variety, while there is splendid fishing on the coast. Ge is found in abundance in some parts of British Columbia, some very profitable mines beif
worked.

## DOMINION LAND REGULATIONS.

The following is a summary of the regulations applicable to the free grants or homestan sale, settlement, etc., of the lands of the Dominion Government; aiso of the leading raily and land companies:

Under the Dominion Lands Regulations all surveyed even-numbered sections, excepting and 26 (Hudson Bay lands), in Manitoba and Northwest Territories, which have not be home-steaded, reserved to provide wood lots for settlers, or otherwise disposed of or reserra are to be held exclusively for homestead. Odd-numbered sections (with the exception of and 29 , which are school lands) for 24 miles on each side of the Canadian Pacific Railm may be generally stated to be railway lands, purchasable from the company, and not opent

of the land agents. Homesteaders are entitled to free permits to cut a specifled quantity It must be thir own use only, upon payment of an offlice fee of 25 cents.
ir must be distinctly understood that the land regulations are subject to variations from
to time. Settlers should take care to obtain from the land agents when making their entry
an explanation of the actual regulations in force at that time，and the clause of the Act unde which the entry is made endorsed upon the receipt，so that no question or difficulty may the or thereafter arise．

## Dominton Land and Immigration Agents in Manitoba and Northwest Territorien

 Agent．District．
Address of Agent．

The settler may sometimes find it convenient to buy lands partly improved，with buildine and fences upon them，of private proprietors．It very frequently happens that half－breed other lands may be obtained on moderate terms．

The Government make no advances of money to settlers，and，for the better encourse ment of bond fide settlement，reserve to themselves the right to declare null and void erer assignment or transfer of homestead or pre－emption right made before the issue of the paten except in cases where any person or company is desirous of assisting intending settlers，wh the sanction of the Minister of the Interior to the advance having been obtained，the settlerh power to create a charge upon his homestead for a sum not exceeding six hundred dollars，an interest not exceeding 8 per cent，per annum，provided that particulars of how such an adram has been expended for his benefit be first furnished to the settler and verified by the local agen or if the charge be made previous to the advance，then such charge shall only operate toti extent certified to by the local agent as having been actually advanced to or expended for benefit of the settler．One－half of the advance may be devoted to paying the cost of the pa age of the settler，paying for the homestead entry，providing for the subsistence of the settl and his family，and to erecting and insuring buildings on the homestead，and the remaindet breaking land and providing horses，cattle，furniture，farm implements，seed grain，etc．

For the further protection of the settler it is provided that the time for payment of thefir instalment of inter st or any such advance shall not be earlier than the first November in an year，and shall not be within less than two years from the establishment of the settler up the homestead，and also that the settler shall not be bound to pay the capital of such adras within a less period than four years from the date of his establishment on the homestead，

The Canadian Pacific Railway Company offers for sale agricultural lands in Manitoba a the Northwest of finest quality．T＂e lands within the railway belt，extending 44 miles foy each side of the main line，will be disposed of at prices ranging from $\$ 2$（ 88, stering）per idid upwards

If paid for in full at time of purchase，a deed of conveyance of the land will be given； the purchaser may pay one－tenth in cash and the balance in payments spread over nine year with interest at six per cent．per annum，pavable at the end or the year with each instalment．

Liberal rates for settlers and their effects will be granted by the company over its railm
For further particulars apply to L．A．Hamilton，Land Commissioner，Canadian Padil Railway Co．，Winnipeg ；or to Archer Baker， 17 James street，Liverpool．

For those desirous of purchasing，the Land Grant of the Manitoba So tion Railway Company，only now placed Land Grant of the Manitoba South Western Colonis of Rer $1,000,000$ acres of the now placed on the market，offers special attractions，It consis of over $1,000,000$ acres of the choicest land in America，well adapted for grain－growing an mixed farming，in a belt 21 miles wide，immediately north of the International boundary， from Range 13 westward．That portion of this grant lying between Range 13 and the wetter limit of Manitoba is well settled，the homesteads having been long taken up．Purchase will at once have all the advantages of this ea－ly settlement，such as schools，churches 4 municipal organizations．The fertility of the soil has been amply demonstrated by the splene⿻丷木丨⿱中⿰㇀丶冂土 lakes and streams，the principal year to year in that district．The country is well watered lakes and streams，the principal of which are Rock Lake，Pelican Lake，Whitewater Lake， 1 the Souris River and its tributaries，while never－failing spring creeks take their rise in t Turtle Mruntain．Wood is plentiful，and lumber suitable for building purposes is manufy tured at Desford，Deloraine and Wakapa，and may be purchas $\cdot \mathrm{d}$ at reasonable prices．At til Wwo latter points grist mills are also in nperation，The terms of purchase of the Manitobasom Western Colonization Railway Company are the same as those of the Canadian Pacific Railuy
Section No． 8 and three－quarters of Sec ion No．26，in the greater number of townships， Hudson Bay Company＇s lands，and all settlers must be careful not to enter upon them wils they have acquired them from the company．The prices vary according to locality．Mr，dis Lawson is the land agent of the company．His official residence is at Winnipeg，and applify tions may be made to him．

## PROVINCIAL LAND REGULATIONS.

Province of Quebec.-Tenant farmers from the old country may find frequent opport nities to purchase improved farins in the Province of Quebec at very reasonable prices-from sterling to $£ 6$ sterling per acre, including dwelling-houses, outbuildings and fencing. Fans of this description, particularly suited to emigrants from the United Kingdom, may be fom in the Eastern Townships.

About $6,000,000$ acres of land have been surveyed by the Government for sale.
Lands purchased from the Government are to be paid for in the following oranner:--One-ifi of the purchase money is required to be paid the day of the sale, sud the remainder in for equal yearly instalments, bearing interest at 6 per cent. But the price at which the lands a sold is so low-from 20 c . to 60 c . per acre ( 15 d. to $2 \mathrm{~s} .5 \frac{1}{2} \mathrm{~d}$. stg.) - that these conditions are not ve burdensome ; in Lact, they are equivalent to giving lands free in the wilderness form, as ti price at which they are sold is barely sufficient to cover the cost of making the survey andm ing roads.

The purchaser is required to take possession of the land sold within six months of thed of the sale, and to occupy it within two years. He must clear, in the course of ten years, acres for every hundred held by him, and erect a habitable house of the dimensions of at le 16 ft by 20 ft . The letters patent are issued free of charge.

The parts of the Province of Quebec sow inviting colonization are the Lake St. John distri the valleys of the Saguenay, St. Maurice, and the Ottawa Rivers; the Eastern Townships; Lower St. Lawrence ; Lake Temiscamingue, and Gaspé.

Province of Ontario.-The price of farming land varies much according to locality, the neighborhoood of the cities and large towns in the old-settled districts it is sometimes high as $\$ 100$, or $£ 20$ sterling, per acre, and from that figure it runs all the way down to $£ 2$, $\$ 10$, per acre, for partially cleared farms in newly-settled districts in the north-eastern part the province. In speaking of the price of a farm in Ontario, it is usually rated at so much acre, including buildings, fencing, and all fixed improvements ; hence, many of the so-calf highly-priced farms may carry a charge of $\$ 20$ or more per acre, on account of the value of dwelling-house, stables, barns and other outbuildings, which are sometimes very commodio substantial structures of brick or stone, costing from $\$ 3,000$ to $\$ 5,000$ or more.

The average price for good farms in the best agricultural districts in the old settlement from $\$ 50$ to $\$ 75$ ( $\$ 10$ to $£ 15$ ) per acre, and at this flgure usually a large amount of the purch money may remain unpaid for a term of years, secured by mortgage at a rate of interest note ceeding 6 per cent. In the newer counties, where the land is but partially cleared, wher half or the three-fourths of the farm is still in its primitive wooded condition, or "in busi" as the local phrase has it, prices range from $\$ 20$ to $\$ 50$ (say f4 to $£ 10$ ) per acre for really g farms, in good situations, to still lower figures where the situation and soil are not sofaro ble.

Any head of a family, whether male or female, having children under 18 years of age, obtain a grant of 200 acres; and a single man over 18 years of age, or a married man having children under 18 residing with him, can obtain a grant of 100 acres. This land is mos covered with forest, and is situate in the northern and north-western parts of the province.

Such a person may also purchase an additional 100 acres at 50 cents per acre, cash. The tlement duties are-to have 15 acres on each grant cleared and under crop at the end of theff five years, of which at least 2 acres are to be cleared annually ; to build a habitable house least 16 feet by 20 feet in size; and to reside on the land at least six months in each year.

In the Rainy River districts to the west of Lake Suporior, consisting of well-watered, cleared land, free grants are made of 160 acres to a head of a family having children under years of age residing with him (or her); and 120 acres to a single man over 18 , or to a mart man not having children under 18 residing with him; each person obtaining a free grant have the privilege of parchasing 40 acres additional, at the rate of one dollar per acre, pa in four annual instalments. The soil of this district is a deep rich loam, and an area of 1 a million acres is perhaps unsurpassed for fertility by any portion of the Province. River itself is a fine navigable stream 150 to 200 yards wide and more than 80 miles long.

Province of Nova Scotia, -There are now in Nova Scotia about two millions of acre ungranted lands, a considerable quantity of which is barren and almost totally unfit for ch vation ; but there is some land in blocks of 200 to 500 acres of really valuable land, and some it the best in the province, and quite accessible, being very near present settlements, price of Crown lands is $\$ 40$ ( $£ 8 \mathrm{stg}$.) per 100 acres.

Province of New Brunswick.-Crown lands may be acquired as follows :-
(1) Free grants of 100 acres, by settlers over 18 years of age, on condition of improving land to the extent of $£ 4$ within three months; building a house 16 by 20 feet, and cultivat 2 acres within one year; and continuous residence and cultivation of 10 acres within tis years.
(2) One hundred acres are given to any settler over 18 years of age who pays $£ 4$ in cash does work on the public roads, etc., equal to $£ 2$ per annum for three years. Within two $\sqrt{g}$ a house 16 feet by 20 feet must be built and 2 acres of land cleared. Continuons resi
for three years from date of entry, and 10 acres enltivatal in that time, are required.
(3) Single applic ditions of settlemer Putchase money to Province of P Question" was a f beautiful island wit exists. ## Laws relating to Copyright-Extracts.

The Minister of Agriculture shall cause to be kept, at the Department of Agriculture, poks to be called the "Registers of Copyrights," In which proprietors of literary, scientifle nd artistic works or compositions may have the same registered in accordance with the prowions of this Act. $38 \mathrm{~V} .$, c. $88,8,1$.
Any person domiciled in Canada or in any part of the British possessions, or any citizen of yy country which has an International copyright with the United Kingdom, who is the author fany book, map, chart or musical composition, or of any original painting, drawing, statue, zulpture or photograph, or who invents, designs, etches, engraves or causes to be engraved, thed or made from his own design, any print or engraving, and the legal representatives of nch person or citizen, shall have the sole and exclusive right and liberty of printing, reprintmg.publishing, reproducing and vending such literary, scientific or artistic works or composions, in whole or in part, and of allowing translations to be printed or reprinted and sold, of ch iterary works from one language into other languages, for the term of twenty-eight years, ou the time of recording the copyright thereof in the manner hereinafter directed.
The condition for obtaining such copyright shall be that the said literary, scientific or ristic works shall be printed and published, or reprinted and republished in Canada, or in the $1 s e$ of works of art that thry shall be produced or reproduced in Canada, whether they are so ablished or reproduced for the first time, or contemporaneously with or subsequently to pubpation or production elsewhere ; but in no case shall the said sole and exclusive right and berty in Canada continue to exist after it has expired elsewhere.
No immoral, licentious, irreligious, or treasonable or seditious literary, scientific or artistic ork shall be the legitimate subject of 'such registration or copyright.
Every work of which the copyright has been granted and is subsisting in the United Kingom, and copyright of which is not secured or subsisting in Canada, under any Act of the prliament of Canada, or of the Legislature of the late Province of Canada, or of the Legislature fany of the Provinces forming part of Canada, shall, when printed, and published, or reFinted and republished in Canada, be entitled to copyright under this Act ; but nothing in this let shall be held to prohibit the importation from the United Kingdom of copies of any such vork lawfully printed there.

## FEES,

The following fees shall be paid to the Minister before an application for any of the purwoes herein mentioned is received, that is to say :
On registering a copyright
On registering an interim copyright

050
On registering a temporary copyright.................................... 0 . 50
On registering an assignment............ ......................... 100
For a certifled copy of registration.................................. 0 . 50
On registering any decision of a court of justice, for every folio

## 050

For office copies of documents not above mentioned, the following charges shall be made : For every single or first folio, certified copy. .$\$ 050$
For every subsequent hundred words (fractions under or not exceeding fifty, not being counted, and over fifty being counted for one hundred).

025
Every person who, afterthe interim registration of the title of any book according to this let, and within the termherein limited, or after thecopyright is secured, and during the term tterms of its duration,prints, publishes, or reprints or republishes, or imports, or causes to eso printed, publishedorimported, any copy or any translation of such book without the conent of the person awfully entitled to the copyright thereof, first had and obtained by assignment, or who, knowing the same to be so printed or imported, publishes, sells or exposes for Me, or causes to be published, sold or exposed for sale, any copy of such book without such ponsent, shall forfeit every copy of such book to the person then lawfully entitled to the copyfight thereof; and shall forfeit and pay for every such copy which is found in his possession. fither being printed or printed, published, imported or exposed for sale, contrary to the prohisions of this Act, such sum, not exceeding one dollar and not less than ten cents, as the court betermines,-which forfeiture shall be enforceable or recoverable in any court of competent urisdiction; and moiety of such sum shall belong to Her Majesty for the public uses of hanada, and the other moiety shall belong to the lawful owner of such copyright.

## Lave relating to Trade Marks-Extracts.

Vvery proprietor of a trade mark who applies for its registration shall state in his applicathin whether the said trade mark is intended to be used as a general trade mark or as a specific tade mark, 42 V., c, 22, s, 11 .
Before any action is taken in relation to an application for registering a trade mark, the Following fees shall be paid to the Minister of Agriculture, that is to say :-
Onevery application to register a general trade mark, including certificate................ $\$ 3000$
Mevery application to register a general trade mark, including certificate.
Onerery application for the renewal of the registration of a specific trade mark, includ-
ing certificate..

For the recording of an assignment
For office copies of documents, not above mentioned, for every hundred words or a frac tion thereof
For each copy of any drawing or emblematic trade mark, the reasonable expenses of preparing the same.
If the Minister of Agricuiture refuses to register the trade mark for which application is made, the fee shall be returned to the applicant or his agent,-less the sum of five dollars, which shall be retained as compensation for office expenses.

A general trade mark once registered and destined to be the sign in trade of the proprietor thereof shall endure without limitation.

Every person, other than the person who has registered the trade mark, who marks any goods or any article of any description whatsoever, with any trade mark registered under the provisions of this Act, or with any part of such trade mark, whether by applying such trade mark or any part thereof to the article itself, or to any package or thing containing such article, or by using any package or thing so marked which has beeu used by the proprietor of such trade mark, or who knowingly sells or offers for sale any article marked with such trade mark, or with any part thereof, with intent to deceive and to induce any person to believe that such article was manufactured, produced, compounded, packed or sold by the proprietor of such trade mark, is guilty of a misdemeanor, and liable, for each offence, to a fine not exceeding one hundred dollars and not less than twenty dollars,-which fine shall be paid to the proprietor of such trade mark, together with the costs incurred in enforcing and recovering the same.

## Law relating to Inlustrial Designs-Extracts.

Before any action is taken in relation to an application for registering an industrial desigo, the following fees shall be paid to the Minister of Agriculture, that is to say :-
On every application to register a design, including certificate
On every application for an extension of time, including certificate, for each year of such extension
For a copy of each certificate of registration, separate from the return of the duplicate. For the recording of an assignment
For office copies of documents, not above mentioned, for every hundred words or for a fraction thereof
For each copy of any drawn copy of an industrial design, the reasonable expense of preparing the same.
During the existence of the exclusive right (whether it is of the entire or partial use of such design), no person shall, without the license, in writing, of the registered proprietor, or of lis assignee, as the case may be, apply such design, or a fraudulent imitation thereof, to the orna menting of any article of manufacture, or other article to which an industrial design may be applied or attached, for the purposes of sale, or shall publish, sell or expose for sale or use any such article as atoresaid, to which such design or fraudulent imitation thereof has been applied and every one who violates the provisions of this section shall forfeit a sum not exceeding one hundred and twenty dollars, and not less than twenty dollars, to the proprietor of the design which shall be recoverable, with costs, on summary conviction, by the registered proprietor of
his assignee.

## Law relating to Timber Marks-Extracts.

Every person engaged in the business of lumbering or getting out timber, and floating of rafting the same on the inland waters of Canada, within the Provinces of Ontario and Quebee shall, within one month after he engages therein, select a mark or marks, and having cased such mark or marks to be registered in the manner hereinafter provided, shall put the same in a conspicuous place on each log or piece of timber so floated or rafted.

Every one who violates the provisions of this section shall incur a penalty of fifty dol. lars, 33 V., c. 36, s. 1.

The person who registers such timber mark shall thereafter have the exclusive right to use the same, to designate the timber got out by him and floated or rafted as aforesaid.

The following fees shall be payable, that is to say :-
On every application to register a timber mark, including certificate
For each certificate of registration not already provided for.
For each copy of any drawing,-the reasonable expenses of preparing the same.

Land Tax and House Duty have been con. siderably reduced in recent years, and the yield is a small item.
Property and Income Tax is levied upon all persons receiving an income of £i50 per annum, but unless the income is over £400 per annum a deduction of \(£ 120\) is allowed, so that an income of \(£ 150\) only pays the tax on \(£ 3\) and one of \(£ 300\) on \(£ 180\), The tax has yaried much during the century, it was fixed at it lowest point in the year 1874, viz., twopence in the \(£\). Since 1838 the levy has been at the rate of sixpence in the \(£\).
Post Office and Telegraph Service receipts need no explanation, merely representing the estimated gross receipts of those departments.
Crown Lands represent the income derived from those properties transferred to the nation when the Royal Civil List was fixed, (see Civil List,)
Interest on Purchase Money of Suez Canvl. The eircumstances under which this item appears in the Revenue account are more fully described under the heading Suez Canal, The 176,602 shares were purchased in 18i0 for about \(£ 4,000,000\) by the British Govern-
ment, when the late Earl of Beaconsfleld wes ment, when the late Earl of Beaconsfield wa Prime Minister.
Miscellaneous represent savings on esthmates and sundry items too numerous to spe cify in this place.
The expenditure for the financial year ending 31st March, 1893, is estimated at \(£ 001\);
109,000 , as follows :

\section*{Expenditure.}

Permanent Charge of Debt. . ..... \(£ 25,000,000\)
Interest, etc., on Exchequer Bonds. Naval Defence Fund Other Consolidated \(\quad \cdots \cdots\). . . . \(£ 1,429,000\) Supply Serviated Fund Services. \(£ 1,688,000\) £61,597,000
\[
£ 90,109,000
\]

The first item is represented by the charges upon account of the National Debt, including interest, terminable annuities, management and sinking fund items.
The Naval Defence fund expenditure is incurred under the Act of Parliament of 1889, alluded to under the heading Royal Navy.
Other Consolidated Fund Services include the Queen's Civil List, Annuities and Pensions, Courts of Justice, Salaries and sundry
items.

Supply Services include Army and Narr, more fully described under their respectivo headings ; the expenses of collection of Customs, Stamps, Post Office, Telegraph Service etc., and the Civil Service expenditure of all other kinds which comprise Public Works and Buildings, the administration of Law and Jur tice, Education, Science and Art, Foreign and Colonial Service and the Civil departments.
During the ten years, \(18 i 1\) to 1880 , oret \(£ 16,000,000\) of taxes were either repealed or reduced; the Sugar duties were entirely abolished. Since then the annual budgets hare taken the form of re adjustment of taxation rather than any considerable increase or diminution in amount.

\section*{THE NATIONAL DEBT,}
at the date of the Treaty of Paris, 1815, was £861,039,049. The National Debt on the Queen's accession, in 1837, was \(£ 761,422,570\), and it has been diminished by over eighty
million pounds sterling during her relgn notwithstanding the Crimean War, etc. In 1015 tue debt represented 245 per head of the pog ulation, now it is equal to about £17 per hem.

Under the con Chancellor of the 1899, the rate of in 3 per cent, to 21 p

Statute 12 and 13 ncess Sophia of
Act in 1215,but, he division into In his reign, of arls and Barons 10ns House as a Elizabeth, when increased fndees of the Parliahe final revolu-- House.

Parliamentary ach Parliament ted to Scottish
ive Trish peeps Commons were

The House of Commons then numbered 658 members, and it remained as so constituted unt cey. This Act reconstrus which, after protracted struggles, was passed by the Ministry rere disfranchised altogether, and in 31 representation; 56 nomination or "pocket" boronghs half and the seats thus gained were allotted to new or the representation was reduced by oneHouse, however, still consisted of 658 members. The franeasing centres of population by onewhopaid a rental of \(£ 10\) per annum in towns, and. The franchise was given to all householders copyholders, leaseholders, tenants at will, and tenants pition to the ire holders of \&2 per annum rote in the Counties.
Further measures of Reform were introduced in 1852 and 1854 by Lord John Russell ; in passed through, and the question of ; and in 1860 again by Lord John Russell, but no act was intil after the death of Lord Palmerston. Thentary representation remained in abeyance fou and the spread of education caused an agitation for inerens increase in the urban populalogieal distribution of seats, and this eventually resulted inceased representation with a more the Derby-Disraeli Cabinet, which conferred Household suffrage on rorm Bill of 1867, passed by vats to the great centres in the country, disfranchising many small boroughs in towns, and a kats to the great centres of population, the total number of membll boroughs and giving the not Wales, 60 for Scotland and 105 for Ireland. This settlement remaineing 493 for England lN4, when, after a fierce party struggle, a compromise Billement remained undisturbed until Government, extending Household suffrage to the Counties and giving by Mr, Gladstone's second pid fl0 per annum : this is the existing law, the voting qualificaing a vote to any lodger who dahouse of any rental for twelve consecutive monthg qualification being either the tenancy ments of the annual rental of \(£ 10\) for the same period. This Bill added 3000 of unfurned apartfoil. It was supplemented in 1885 by a redistribution of seats Bill, whiche \(3,000,00\) electors to the fioned representation to population, except in the case of Ireland, and increased the propormembers of the House of Commons to 670, made up as follows: and increased the number of England, population 1891 census \(27,499,984 \quad 466\) ment

Admirals of the Fleet.-Hon. Sir Henry Keppel, g.c.B. ; Sir Thos, Matthew Charles onds, G.C.B.; Sir Alex. Milne, Bart., G.C.B. ; Hon. Sir Chas. Gilbert John Brydone Eliot, Sir Geoffrey Thomas Phipps Hornby, g.c.B. (first and principal Navy Aide-de-Campt Queen) ; Rt. Hon. Lord John Hay, G.c.B.; Sir John Edmund Commerell, G.c.B., v.c.; SirW Loring, K.c. B. ; Algernon Frederick Rous de Horsey ; Right Hon, Richard James, Earlof william, K.c.B., K.c.m.G. (Commander-in-Chief, Portsmouth); His Serene Highness Leopold Victor'Charles Auguste Joseph Emich, Prince of Leiningen, g.c.b. ; His Royal ness Alfred Ernest Albert, Duke of Edinburgh, K.G., K.T., G.C. B., K.P., G.c.s.I., G.C.M.G., (Personal Aide de-Camp to the Queen), (Commander-in-Chief, Davenport); Sir kichard Hamilton, к.c.B. (President of the Royal Naval College); Charles Ludovic Darley Wadd Sir Algernon McLennan Lyons, K.c.B. ; Sir Anthony Hiley Hoskins, K.c.B. (a Lord Cl sioner of the Admiralty) ; Sir Nowell Salmon, K.c.B.,v.c.; Sir John Kennedy Erskine к.c.в. ; Hon, Wm. John Ward.

As our first line of defence, the Navy has always received a large share of the conside of our Statesmen, and the attention of Englishmen throughout the world.

In 1889, a Committee of the Cabinet decided that in order to retain the supremacy number of the Navy which was necessary, assuming a combination of two European p say, France and Russia, against us, a considerable sum beyond the ordinary Naval esti was needed, and on March 7th, 1889, Lord George Hamilton, then First Lord of the Adm on behalf of the Government, said in the House of Commons:: "The number of ships wh "consider should be added to Her Majesty's Navy in our new shipbuilding programme \(\because\) and their estimated cost, including armament, is \(£ 21,500,000\)." This sum was provided the Naval Defence Act, 1889, being distributed over a term of years : and in Sept., 1892, of these additional vessels had been built. It is estimated that the total value of the Fleet on A pril 1st, 1891, will be £×0,00\%,000.

The ordinary annual Navy estimates during the past 10 years have averaged over \(£\) 000 , and the amount provided for year 1891-2 was \(£ 14,215,100\).

The government of the Navy is vested in a Board composed of seven members, knoml Board of Admiralty, of which the First Lord is always a Cabinet Minister.

The number of seamen and marines provided for the Naval service during 1892 was:
For the Fleet,-Officers and Seamen 44,734
Boys. 7,149
Marines

WestG fellow, c.b. ; Sir Henry Smythe (Commander at Malta); Sir Redvers Buller, k.c.b., v.c., A tant General.

It is only since the time of Cromwell that the people of England have acquiesced in maintenance of a standing army ; in former days, every freeman was bound to bear anms the defence of his country, not as a service to king or lord, but to the Commonwealth. The of Foot Soldiers at the time of Edward III and Crecy was about 2d per day ; Mounted Arel 6d ; Esquires, Captains and leaders,1s.; Knights, 2s. ; Barons and bannerets, 4s. ; and Earis,6e per day. Cromwell commenced the regular standing army. The fact that service in the lish Army is voluntary, and the pay consequently on a very different scale to that in comnt where conscription prevails, accounts for the enormous expense of keeping up the Bhg Army in comparison to that incurred by foreign powers whose forces so greatly outnumber

During the last ten years, the average amount set apart for the Army and Ordma expenses in the estimates has been nearly \(£ 20,000,000\) per annum. The sum set apart for 180 was \(£ 17,545,300\), of which \(£ 3,092,000\) went for non-effectives in the form of Retired Pay 1 sions and rewards for distinguished services.

The following is the official return of the number and distribution of the effectives of British Army for the last year :

There are besides four classes of reserve or auxiliary forces, viz., the Militia, the Yeoms Cavalry, the Volunteer Corps, and the Army Reserve force, and the following is a copy of official return of the number of men in the various grades for 1891-1892:
Regular forces at home and in Colonies ..... 143,849

\section*{Frante.}

Prance has now been under a Republican form of government for more than twenty-two veutive years, and, notwithstanding the remarkable fact that there have been twenty-seven nges of Ministry during that period, the nation as a whole seems to have ratified its action be thi September, 1870.
The machinery of government consists of (1) a Chamber of 584 Deputies, elected by unimalsuffrage every four years, the only voting qualifications being six months' residence in one town or commune, and to be 21 years old. The mode of election has been varied, the Niade liste and scrutin d'arrondissement having been used, and these methods are more Idescribed in another part of this almanac. (2) A Senate of 300 members, elected for evears ; one-third retiring every three years. Senators must be at least 40 years of age,
trelection is made by a somewhat complicated machinery, part being elected for life by the
ted Chambers and part by delegates chosen by the District and Municipal Councillors,
Deputies receive \(\$ 1,800\), and Senators \(\$ 3,000\) per annum, (3) A President, who is
thed for seven years by a majority of votes in the Senate and Chamber of Deputies in
ilonal Assembly.
The President selects his Cabinet and is the excentive power, but each act of his must be ntersigned by a Minister. He receives \(\$ 120,000\) per annum salary, and an additional sum of
( 000 per annum for expenses. President, Marie François Sadi Carnot, elected December 3,

Fincation is under the control of the Government, and is obligatory.
Judges are appointed by the President.
There are penal settlements in New Caledonia and Cayenne
The estimated revenue from all sources for year ending 1891 was \(\$ 649,481,765\), and the estited expenditure \(\$ 649,433,993\), of which \(\$ 141,694,169\) was for outlays in connection with the Crmy, and \(\$ 43,753,540\) for the Navy.
The National Debt of France amoun's to nearly \(\$ 7,200,000,000\), equal to about 8190 per d of the population, by far the largest pnblic debt of any country.
The total imports for the year 1890 were valued at \(\$ 884,651,0 c 0\), and the exports at \(4,(224,000\).
The principal productions and exports are as follows :-Woollen, silk and cotton textiles,
t, brandy, etc, raw silk, yarn, leather and leather goods, cheese, eggs and butter ; and
heprincipal imports are raw wool and cotton, cereals, coal and coke, cattie, cotfee, timber, flax, nachinery, etc.

The trade of France is principally with Great Britain, Belgium, Spain and the United sates,

Her shipping trade is extensive, and in 1890 over 14,000 sailing vessels and more than 1,000
ramships were flying the tricolor. The great majority of these vessels are engaged in the nasting trade and of small tonnage, but the Messageries Maritime Company and the Transatantic Company own some fine steamships, principally built and engined at Havre, Marseilles, rTToulon.

The Bank of France was founded in 1806 , and its capital is estimated at \(\$ 36,500,0,0\).
N. B.-For the purpose of calculation 5 francs is taken to equal \$1.

Since the disastrous war of 1870 , enormous pains and millions of dollars have been bestowed improve the organization and efficiency of the Army. Every man on attaining his twentieth fear is now liable to serve with the colors for either one or three years. After this actual fervice he passes into the Active Reserve for at least seven years, eventually being included in hat is called the Territorial Army and Reserve.
The estimated numbers for 1891 were rather over 500,000 officers and men in the Active Army, about 600,000 in the First Reserve or Territorial Army. Should all the reserves be called out, tis calculated France could place nearly two and a half million men in the field.
The Field Artillery includes 2,000 guns, and there are over 100 siege batteries.
The Navy has also received a large share of public money and attention. In \(189 t\) special upbulling grants were made, and a number of armored battle ships, cruisers and torpedo

In addition there are about 12 first class armored or protected battle ships and cruisers of less modern build, also 20 coast defence armored ships, a flotilla of about 100 torpedo boats and torpedo cruiserg, and 50 1st, 2nd and 3rd class unprotected cruisers, gunboats, ete., besides other vessels of various types.
The Navy is principally manned by voluntary enlistment. In 1891 it contained 45 Admirals,
00 Captains 700 Lieutenants and a personnel of about 40,000 of all grades. Also marines and marine artillery to the number of over 15,000 .

The total value of the fleet is estimated at \(\$ 120,000,000\), The Marquess of Dufferin and Ava, Paris.

The representative of the Dominion of Canada is Mons. Hector Fabre, 10 Rue de Rome, Paris.

\section*{2Retufoundand}

Is the most ancient of Britain's colonial possessions, and was discovered nearly 400 years ago, It lies off the eastern coast of North America, across the Gulf of St, Lawrence, The nearest point to the Dominion is only some 50 miles . Very little appears to be known of this old colony, which is by no means insignificant, either in size or cond its area about 42,000 greatest length of the Island is 317 miles and greatest bread (for so it seems to be from the square miles. The shores of this apparenty des of cliffs are from 200 to 300 feet high. There deck of an ocean steamer) are rocky, and the line of cliffs are irom presenting scenes of great are numerous bays, some of which run 90 miles inland, frequently presenting seeng ing in som, of
these bays the depth of water is so great that a large ocean steamer can be run close up, and can unload by placing a plank from the boat to shore. Until quite recently little or nothing was known of the interior of the island, and it was generally thought that it was only an abode for wild animals; but geological reports show there are in the valley of the western coast 13,200 square miles perfectly capable of being reclaimed and converted into fairly productive grazing and arable land. Here in this valley and other parts of the interior absund vast herds of reindeer and caribou, wolf, black bear, fox (black, silver grey and red), hare, rabbit, and other game. There are about 300 varieties of birds on the island. The finest game bird is conceded to be the ptarmigan or willow grouse. No better field for sport and enjoyment and a thorough outing can be found for the lover of rod and gun. Venomous reptiles, frogs and toads are unknown. The valley through which the Exploits (its largest, 20 miles in length) river flows contains a large area of fertile land, capable of yielding crops of all kinds, and in many places is covered with large timber. There are numerous ponds and lakes abounding with fish, principally trout and salmon ; and it is well known that there is no finer salmon than that caught in Newfoundland waters. The largest lake is Grand Lake, 56 miles in length, which contains an island 22 miles in length and 5 miles in breadth. There are nearly 30,000 able-bodied fishermen who devote themselves to the staple industry of the country, cod fishing, and there are in all about 50,000 persons engaged in catching and curing fish. The entire revenue from this source is about \(\$ 7,000,000\) per annum. This industry has been prosecuted for 390 years, and to all appearances the cod are as numerous and abundant as ever. The seal fishing comes next, and was of little importance until the commencement of this century. When you note that 100 years ago the whole season's catch was only 5,000 seals, and this year between 450,000 and 500,000 seals, it will give some idea of the wonderful inceease and magnitude of this industry. Copper mines have been opened and worked with great success on the coast of Notre Dame Bay, the most famous of which are Tilt Cove, Bett's Cove and Little Bay. The Capital, St. John's, at the opning and closing of the fishing season is a very busy city. The fishermen, who are a fine hardy race of men, come in about twice a year-to get supplies in the spring and dispose of their fish in the fall. A number of factories have been opened up. St. John's was twice destroyed by fire, in 1846 and in 1892.

Newfoundland has a Representative Government, and a constitution was granted in 1832, and responsible government in 1855. Two Legislative Chambers were appointed, the House of Assembly to be elected, and the Legislative Council to be nominated by the Governor in Council. The Governorship is an appointment of the British Crown, but the salary is paid by the Colony ; the Governor is Sir Terence O'Brien.

Anticosti and the Magdalen Islands, in the Gulf of St. Lawrence, are under the Government of the Province of Quebec, and are principally used as lighthouse and refuge and fishing stations. Anticosti is rough and barren, but has an area of 2,500 square miles.

\section*{Borld Columbian derpogition。}

The City of Chicago, chosen for the World's Fair of 1893, is most centrally situated for so vast an undertaking. It is the largest city on the great chain of North American lakes, being built on the west shore of Lace Michigan, about 911 miles from the Atlantic and 2,400 miles from the Pacific. It is a great railway centre for the whole continent, all the principal lines running into the city. The population by the last census returns was \(1,208,669\), and it is estimated that fully 175,000 people arrive and depart each day. There are at present 750 hotels, large and small, accommodating 150,000 guests ; and in addition to these is an enormous number of boarding and private lodging houses. There are 600 restaurants and cafés able to provide meals for 100,000 persons daily

The site of the World's Fair of 1893 is a portion of the city called Jackson Park, with a frontage on Lake Michigan of one and one-half miles, containing 553 acres, and Midway Plaisance, one mile long, with an area of 80 acres. Most of the principal buildings of the Exposition have a frontage on the Lake, and the style of architecture will be characteristic of their respective countries. The total amount to be expended by foreign nations on buildings is close upon \(\$ 6,000,000\),the Dominion of Canada's share being \(\$ 100,000\). The City of Chicago, itself, has provided \(\$ 10,000,000\) alone, beaides another \(\$ 5,000,00 n\) in expropriations from the several' States of the Union. As the Exposition has, since its inception, assumed broader proportions, extra expense has become necessary, and Congress is to be asked for another grant of \(\$ 5,040,000\). The total cost of all the buildings is estimated at over \(\$ 8,000,000\), the largest building being that of the "Mannfactures and Liberal Arts," with an area of 30 acres. The Exposition will open for visitors ist May, and close 30th October, 1893.

Four to eight p.m. is divided into two "dog watches," called " first dog watch" and "last dog watch," so as to change the watches daily; otherwise starboard or port watch would be on deck between the same hours day after day.

The "Rule of the Road" at Ser.-The "rule of the road" at sea is somewhat intricate, especially for sailing ships. It may be summed up for them, however, by saying that the ship in the most favored position with regard to the wind has to keep out of the way of the other. If two steamships are meeting end on, or nearly end on, so as to involve the risk of collision, each shal alter their course to starboard-that is, shall keep to the right. Steamships have always to keep out of the way of sailing ships. The starboard side is the right hand side, and the port the left hand side of a vessel when looking towards the bows. The weather sideis the windy side, and the lea side the sheltered side. All vessels have to carry at night a green light on the starboard and a red light on the port side of the ship, steamers being disting uished by a white light, hung about 20 feet high, in front of the foremast. The following lines by the late Mr. Thomas Gray, of the English Board of Trade, which are committed to memory by most seamen, show clearly what steamers have to do under different circumstances :-

TWO STEAMSHIPS MEETING.
\({ }^{6}\) Meeting steamships do not dread When you see three lights ahead, Port your helm and \({ }^{\text {show }}\) your red.

TWO STEAMSHIPS PASSING. Green to green, or red to red, Perfect safety, go ahead. TWO STEAMSHIPS CROSSING. If to starboard red appear, 'Tis your duty to keep clear.

To act as judgment says is properTo port, or starboard, back or stop her But when upon your port is seen A steamer's starboard light of green, There's not so much for you to do, For green to port keeps clear of you. general caution.
Both in safety and in doubt Always keep a good look out In danger, with no room to turn, Ease her ! Stop her!! Go astern!!!

The Formation of Frost upon Glass.-The formation of frost upon glass may be prevented by applying a very thin coat of glycerine to both sides of the glass. This will prevent any moisture forming thereon, and will stay until it collects so much dust that one cannot see through it ; for this reason it should be put on very thinly. Surveyors can use it on their instruments in foggy weather, and there is no film to obstruct the sight. In fact, it can be employed anywhere to prevent moisture from forming on anything. Doctors and dentists ase it on small looking-glasses with which they examine the teeth and throat, and engine drivers have employed it to prevent their look-out holes being made useless by frost or mist.

Thie Most Murderou Battle on Record,-It is said that at the battle of Tours, which took Ace A,D, 732, between the Franks and Saracens, from 350,000 to 375,000 men were killed. In a aitle which was fought between Attila and the Romans and their allies, the Visigoths, in A.D. 31,itis stated that over 250,000 men were left dead upon the field. The most murderous battle of whern times was that of Borodino, a Russian village, where Napoleon fought the Ruasians on yptember 7th, 1812. This battle was one of the most obstinately disputed in history, and maited in nearly 80,000 men being placed hors-de-combat.

\section*{Tanguage of frowerg and (bemg.}

The language of Flowers.-A cluster of flowers can be made to express any sentiment, if care is taken in the selection.

If a flower is offered reversed, its original signification is contradicted, and the opposite implied.

A rosebud divested of its thorns, but retaining its leaves, conveys the sentiment, "I fear no longer ; I hope." Stripped of leaves and thorns, it signifies, "There is nothing to hope or fear."

A full-blown rose, placed over two buds, signifies "Secrecy."
"Yes " is implied by touching the flower given to the lips ; "No," by pinching off a petal and casting it away.
"I am" is expressed by a laurel leaf twined around the bouquet; "I have," by an ivy leaf folded together; "I offer you," by a leaf of Virginia creeper.

\section*{combinations.}

Moss Rosebud,
Myrtle,
Mignonette,
Colored Daisy,
Lily of the Valley, Ferns,
Yellow Rose,
Broken Straw, Ivy,
Scarlet Geranium, Passion Flower,
Purple Hyacinth, Arbor Vita,
\(\{\) A confession of love,
Your qualities surpass \{ your charms of beauty. (Your unconscious sweetness has fascinated me. (Your jealousy has broken (our friendship. I trust you will find consolation, through faith, in your sorrow; be assured of my unchanging friendship.

Arbor Vitæ.-Unchanging friendship.
Camelia, White.-Loveliness.
Candy-Tuft.-Indifierence.
Carnation, White.-Disdain.
China Aster.-Variety.
Clover, Four-Leaf,-Be mine.
Clover, White.-Think of me.
Clover, Red.-Industry.
Columbine,-Folly.
Daisy.-Innocence,
Daisy, Colored.-Beauty.
Dead Leaves.-Sadness.
Deadly Nightshade.-Falsehood,
Fern.-Fascination,
Forget-me-not.
Fuchsia, Scarlet.-Taste.
Geranium, Horseshoe.-Stupidity,
Geranium, Scarlet.-Consolation.
Geranium, Rose,--Preference.
Golden-Rod.-Be cautious.
Heliotrope.-Devotion,
Hyacinth, White,-Loveliness.
Hyacinth, Purple.-Sorrow.
Ivy.-Friendship.
Lily, Day.-Coquetry.
Lily, White.-Sweetness.

Columbine,
Day Lily,
Broken Straw,

ancients as having ulet or charm, 08

Diamond.-Pride. Awarded supernatural qualities from the most remote period down to the Middle Ages. Has the power of making men courageous and magnanimous. Protects from evil spirits. Influences the gods to take pity upon mortals. Maintains concord between husband and wife, and for this reason was held as the most appropriate stone for the espousal ring.
Emerald,-Success in love. Mentioned in the Bible as worn in the breast-plate of the High
Priest as an emblem of chastity.
Ruby.--A cheerful mind. An amulet against poison, sadness, evil thoughts, A preservative of health. Admonishes the wearer of impending danger by changing color.
Sapphire.-Chastity. Frces from enchantment.
Topaz,-Fidelity.
Turquoise.-Success and happiness. Preserves from contagion,
Garnet.-Fidelity in every engagement. Onyx.--Reciprocal love. Opal,-Pure thoughts. Pearl.--Purity and innocence.

\section*{Color Symbols.}

White was the emblem of light, religious purity, innocence, faith, joy and life. In the judge, findicates integrity ; in the sick, humility; in the woman, chastity
Red, the ruby, signifies fire, divine love, heat of the creative power, and royalty. White and red roses express love and wisdom. The red color of tho blood has its origin in the action of the leart, which corresponds to, or symbolizes love. In a bad sense red corresponds to the infernal lore of evil, hatred, etc.
Blue, or the sapphire, expresses heaven, the firmament, truth from a celestial origin, contancy and fldelity.

Yellow, or gold, is the symbol of the sun, of the goodness of God, of marriage and faithfulness. In a bad sense yellow signifies inconstancy, jealousy and deceit.
Green, the emerald, is the color of the spring, of hope, particularly of the hope of immortality and of victory, as the color of the laurel and palm.

Violet, the amethyst, signifies love and truth, or passion and suffering. Purple and parlet signify things good and true from a celestial origin,
Black corresponds to despair, darkness, earthliness, mourning, negation, wickedness and death.

\section*{Contagioux and deruptiue migicagiegi.}

It will often relieve a mother's anxiety to know how long after a child has been exposed to 1 contagious disease that there is danger the disease has buen contracted. The following table gives the period of incubation - or anxious period - and other information concerning
the more important diseasea.
\begin{tabular}{|c|c|c|c|}
\hline Disease. & Symptoms usually appear. & Anxious period ranges from & Patient is infectious, \\
\hline Chick 3 n -Pox. & On 14th day & 10-18 days. & Until all s \\
\hline Diphtheria & " 2nd day & <-5 days. & 14 days after disappearance of membrane. \\
\hline Yeasles. & " 14th day & 10-14 days. & *Until scaling and cough have ceased, \\
\hline Yumps & ". 19th day & \(16-24\) days. & 14 days from commencement. \\
\hline Scarlet F & "6 4th day & 1-7 days. & Until all scaling has ceased. \\
\hline Imal-Pox Feve & " \({ }^{\text {" }}\) 21st day day & 1-14 days. & Until all scabs have fallen off.
Until diarrhea ceases \\
\hline Thiooping-Cough..... & " 14th day & 7-14 days. & isix weeks from beginning to whoop. \\
\hline
\end{tabular}
\({ }^{\text {' }}\) In measles the patient is infectious three days before the eruption appears.
In whooplng-cough the patient is infectious during the primary cough, which may be tiree weeks before the whooping begins.

\section*{Signs of the Presence of Springs of Water.}

For ages many absurd fables were believed with respect to the best method of discovering springs, and even now the divining rad has not lost its partisans. There are, however, fidications which may lead to the discovery of springs in cases where nothing would appear to those unaccustomed to observations of natural phenomena to induce a belief in their existence. The following are some of the more simple. In the early part of the year, if the grass assumes a brighter color in one particular part of a field than in the remainder, or, when the latter is ploughed, if a part be darker than the rest, it may be suspected that water lies beneath it, In summer the gnats hover in a column, and remain always at a certain height above the ground over the spots where springs are concealed. In all seasons of the year denser vapors arise from those portions of the ground which, owing to the existence of subterranean springs, are more damp, especially in the morning or the evening. The springs to which thes \({ }^{\circ}\) rules apply are such as are near the surface ; when the source is lower the only safe guide is a bore, but to work this with success a certain knowledge of elementary geology is absolutely necessary.

\section*{The Pulss.}

The natural rate of the pulse varies at different ages as follows :

 Three years . . . ............... . \(95-105\)
Four to seven years.................. 85-95 old age

\section*{Quantity of Seed Requsired to Plttit an Acre}

\section*{How Grain Will Shrink.}

Farmers rarely gain by keeping their grain after it is fltfor market, when the shrinkage is taken into account, Wheat, from the time it is threshed, will shrink two quarts to the bushel or six per cent, in six months, in the most favorable circumstances. Hence, it follows that ninety-four cents a bushel for wheat when first threshed in August is as good, taking into account the shrinkage alone, as one dollar in the following February.

Corn shrinks much more from the time it is first husked. One hundred bushels of ears, as they come from the field in September, will be reduced to not far from eighty. So that forty cents a bushel for corn in the ear as it comes from the field is as good as fifty in March, shrinkage only being taken into account.

In the case of potatoes-taking those that rot and are otherwise lost-together with the shrinkage, there is but little doubt that between October and June the loss to the owner who holds them is not less than thirty-three per cent.

This estimate is taken on the basis of interest at 7 per cent., and takes no account of loss by vermin.

\section*{How Deep in the Ground to Plant Corn.}

The following is the result of an experiment with Indian Corn. That which was planted at the depth of
7-8 inch, sprout appeared in............................................................. 8 days
1 inch, sprout appeared in...
\(8 \frac{1}{2}\) days
1f rich, sprout appeared in.
2 inches, sprout appeared in. .10 days
\(\frac{21}{2}\) inches, srrout appeared in....................................................................... . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . .
3 inches, sprout appeared in... ................................................................... 12 days
3 inches, sprout appeared in. . . . . . . . . . ..... .............. .......................... . . . . 13 days
4 inches, sprout appeared in. ................................................................... \(13 \frac{1}{2}\) days
The more shallow the seed was covered with earth, the more rapidly the sprout made its appearance, and the stronger afterwards was the stalk, The deeper the seed lay, the longerit remained before it came to the surface. Four inches was too deep for the maize and also too deep for smaller kernels,

\section*{How to Measure Corn in Crib, Hay itb a Mow, etc.}

This rule will apply to a crib of any kind. Two cubic feet of sound, dry corn in the ear will make a bushel shelled. To get the quantity of shelled corn in a crib of corn in the ear, measure the length, breadth and height of the crib, inside of the rail ; multiply the length by the breadth and the product by the heigh': hen divide the product by two, and you have the number of bushels in the crib.

To find the number of bushels of apples, potatoes, etc., in bin, multiply the length, breadth and thickness together, and this product by 8 , and point off one figure in the product for decimals.

To find the amount of hay in a mow, allow 512 cubio feet for a ton, and it will come out very nearly correct.

\section*{Barbed Wire Required for Fences.}

\section*{Itridenty or emergentig.}

If an artery be cut, red blood spurts. Compress it above the wound. If a vein is cut, dark blood flows. Compress it below and above.

If choked, go upon all fours and cough.
For slight burns, dip the part in cold water ; if the skin is destroyed, cover with varnish or linseed oil.

For apoplexy, raise the head and body ; for fainting, lay the person flat,
Send for a physician when a serious accident of any kind occurs, but treat as directed until arrives.
SCALDS AND BURNs. - The following facts cannot be too firmly impressed on the mind of the reader, that in either of these accidents the first, best, and often the only remedies required, are sheets of wadding, fine wool, or carded cotton, and, in the default of these, violet powder, flour, magnesia, or chalk. The object for which these several articles are employed is the same in each instance, namely, to exclude the air from the injured part ; for, if the air can be effectually shut out from the raw surface, and care is taken not to expose the tender part till the new cuticle is formed, the cure may be safely left to nature. The moment a person is called to a case of scald or burn, he should cover the part with a sheet, or a portion of a sheet, of wadding, taking care not to break any blister that may have formed, or stay to remove any burnt clothes that may adhere to the surface, but as quickly as possible envelop every part of the injury from all access of the air, laying one or two more pieces of wadding on the first, so as effectually to guard the burn or scald from the irritation of the atmosphere; and, if the article used is wool or cotton, the same precaution of adding more material where the surface is thinly covered must be adopted, a light vandage finally securing all in their places. Any of the popular remedies recommended below may be employed when neither wool, cotton nor wadding are to be procured, it being always remembered that that article which will best exclude the air from a burn or scald is the best, quickest, and least painful mode of treatment. And in this respect nothing has surpassed cotton loose or attached to paper as in wadding.

If \(t\) eskin is much injured in burns, spread some linen pretty thickly with chalk ointment, and lay over the part, and give the patient some brandy and water if much exhausted; then send for a medical man. If not much injured, and very painful, use the same ointment, or apply carded cotton dipped in lime water and linseed oil. If you please, you may lay cloths dipped in ether over the parts or cold lotions. Treat scalds in same manner, or cover with scraped raw potato ; but the chalk ointment is the best. In the absence of all these, cover the injured part
with treacle, and dust over it plenty of flour,

Body in Flames.-Lay the person down on the floor of the room, and throw the tablecloth, rug, or other large cloth over him, and roll him on the floor.

DIRT IN THE EYE.- Place your forefinger upon the cheek-bone, having the patient before you; then slightly bend the finger; this will draw down the lower lid of the eye, and you will probably be able to remove the dirt; but if this will not enabie you to get at it, repeat this operation while you have a net ting-needle or bodkin placed over the ey elid; this will turn it inside out, and enable you to remove the sand, or eyelash, ecc., with the corner of a fine silk handkerchief. As soon as the substance is removed, bathe the eye with cold water, and exclude the light for a day. If the inflammation is severe, let the patie \(t\) use a refrigerant lotion.

Lime in the Eye.-Syringe it well with warm vinegar and water in the proportion of one ounce of vinegar to eight ounces of water; exclude light.

IRON OR STEELSPICULE IN THE EYE-These occur while turning iron or steel in a lathe and are best remedied by doubling back the upper or lower eyelid, according to the situation, of the substance, and with the flat edge of a silver probe, taking up the metallic particle, using a lotion made by dissolving six grains of sugar of lead and the same of white vitriol, in six ounces of water, and bathing the eye three times a day till the inflammation subsides. Another plan is-Drop a solution of sulphate of copper (from one to three grains of the salt to one ounce of water) into the eye, or keep the eye open in a wineglassful of the solution. Bathe with cold lotion, and exclude light to keep down inflammation.

Dislocated Thumb-This is frequently produced by a fall. Make a clove hitch, by pass\(\mathrm{in}_{\mathrm{g}} \mathrm{two}\) loops of cord over the thumb, placing a piece of rag under the cord to prevent it cutting the thumb; then pull in the same line as the thumb. Afterwards apply a cold lotion.

CuTs AND Wounds -Clean cut wounds, w ether deep or superficial, and likely to heal by the first intention, should always be washed or cleaned, and at once evenly and smoothly closed by bringing both edges close together, and securing them in that position by adhesive plaster. Cut thin strips of sticking plaster, and bring the parts together ; or if large and deep, cut two broad pleces, so as to look like the teeth of a comb, and place one on each side of the wound,
which must be c one another ; th the other side wi are brought toge

teel in a lathe the situation, oarticle, using vitriol, in six des. Another t to one ounce athe with cold
iitch, by passvent it cutting otion. ely to heal by 10othly closed esive plaster. deep, cut two of the wound,

Thich must be cleaned previously. These pieces must be arranged so that they shall interlace one another ; then, by laying hold of the pieces on the right side with one hand, and those on the other side with the otherhand, and pulling them from one another, the edges of the wound are brought together without any difticulty.

Ordinary Cuts are dressed by thin strips, applied by pressing down the plaster on one side of the wound, and keeping it there and pulling in the opposite directions; then suddenly depressing the hand when the edges of the wound are brought together.

Contusions are best healed by laying a piece of folded lint, well wetted with extract of lead, or boracic acid, on the part, and, if there is much pain, placing a hot bran poultice over thedressing, repeating both, if necessary, every two hours. When the injuries are very gevere, lay a cloth over the part, and suspend a basin over it filled with cold lotion. Put a piece of cotton into the basin, so that it shall allow the lotion to drop on the cloth, and thus keep it always wet.

HEMORRHAGE, when caused by an artery being divided or torn, may be known by the blood issuing out of the wound in leaps or jerks, and being of a bright scarlet color. If a vein is injured, the blood is darker and flows continuously. To arrest the latter, apply pressure by means of a compress and bandage. To arrest arterial bleeding, get a piece of wood (part of a broom handle will do), and tie a piece of tape to one end of it ; then tie a piece of tape loosely over the arm, and pass the other end of the wood under it; twist the stick round and round until the tape compresses the arm sufficiently to arrest the bleeding, and then confine the other end bytying thestring around the arm. A compress made by enfolding a penny piece in several folds of lint or linen should, however, be first placed under the tape and over the artery. If the bleeding is very obstinate, and it occurs in the arm, place a cork underneath the string, on the inside of the fleshy part, where the artery may be felt beating by any one; if in the leg, place a cork in the direction of a line drawn from the inner part of the knee towards the outer part of the groin. Itis an excellent thing to accustom yourself to find out the position of these arteries, or, indeed, any that aresuperficial, and to explain to every person in your house where they are, and how o stop bleeding. If a stick cannot be got, take a handkerchief, make a cord bandage of it, and tie a knot in the middle; the knot acts as a compress, and should be placed over the artery, while the two ends are to be tied around the thumb. Observe always to place the ligature between the wound and the heart. Putting your fingerinto a bleeding wound, and making pressure until a surgeon arrives, will generally stop violent bleeding.

BLEEDING FROM THE NOSE, from whatever cause, may generally be stopped by putting a plug of lint into the nostrils ; if this does not do, apply a cold lotion to the forehead, raise the head, and place over it both arms, so that it will rest on tha hands; dip the lint plug, slightly moistened into some powdered gum arabic, and plug the nostrils again ; or dip the plug into equal parts of powdered gum arabic and alum, and plug the nose. Or the plug may be dipped in Friar's balsam, or tincture of kino. Heatshould be applied to the feet; and, in obstinate cases, the sudden shock of a cold key, or cold water poured down the spine, will often instantly stop the bleeding. If the bowels are confined take a purgative. Injections of alum solution from a small syringe into the nose will often stop hemorrhage.

VIOLENT SHOCKs will sometimes stun a person, and he will remain unconscions, Untie strings, collars, etc.; loosen anything that is tight and interferes with the breathing; raise the head; see if there is bleeding from any part; apply smelling-salts to the nose, and hot bottles to the feet.

In Concussron, the surface of the body is cold and pale, and the pulse weak and small, the breathing slow and gentle, and the pupil of the eye generally contracted or small. You can get an answer by speaking loud, so as to arouse the patient. Give a little brandy and water ; keep the place quiet, apply warmth, and do not raise the head too high. If you tickle the feet the patient feels it.

IN COMPRESSION OF THE BRATN from any cause, such as apoplexy, or a piece of fractured bonepressing on it, there is loss of sensation. If you tickle the feet of the injured person he does not feel it. Yuu cannot arouse him so as to get an answer. The pulse is slow and labored; the breathing deep, labored, and snorting; the pupil eularged, Raise the head, loosen strings or tight things, and send for a surgeon, If one cannot be got at once, apply mustard poultices to the feet and thighs, leeches to the temples, and hot water to the feet.

CHOKING-When a person has a fish bone in the throat, insert the forefinger, press upon the root of the tongue, so as to induce vomiting; if this does not do, let him swallow a large piece of potato or soft bread; and if these fail, give a mustard emetic.

Fainting, Hysterics, etc.-Loosen the garments, bathe the temples with water or ean-deCologne; open the window, admit plenty of fresh air, dash cold water on the face, apply hot bricks to the feet, and avoid bustling and excessive sympathy.

Irow NING-Attend to the following essential rules :-1, Lose no time, 2. Handle the body gently. 3. Carry the body face downwards, with the head gently raised, and never hold it up by the feet. 4. Send for medical assistance immediately, and in the meantime act as follows : 5. Strip the body ; rub itdry, then wrapit in hot blankets, and place it in a warm bed in a warm room. 6, Cleanse away the froth and mucus from tho nose and mouth. A pply warm bricks bottles, bagsof sand, etc., to the armpits, between the thighs, and to the soles of the feet. 8. Rub the surface of the body with the hands inclosed in warm, dry, worsted socks. 9. If possible, put the body into a warm bath. 10. To restore breathing, put the pipe of a common bellows into one nostril, carefully closing the other, and the mouth; at the same time drawing downwards, and pushing gently backwards, the upper part of the windpipe, to allow a more free admission of air ; blow the bellows gently, in order to inflate the lungs, till the breast be raised a little ; then set the mouth and nostrils free, and press gently on the chest ; repeat this until signs of life appear. The body should be corered the moment it is placed on the table, except the face, and all the rubbing carried on under the sheet or hlanket. When they can be obtained, a number of tiles or bricks should be made tolerably hot in the fire, laid in a row on the table,
covered with a blanket, and the body placed in such a manner on them that their heat may enter the spine. When the patient revives, apply smelling-salts to the nose, give warm wine or brandy and water. C'autions.-1. Never rub the body with salt or spirits. 2. Never roll the body on casks. 3. Continue the remedies for twelve hours without ceasing.

HaNGING-Loosen the cord, or whatever it may be by which the person has been suspended Open the temporal artery or jugular vein, or bleed from the arm ; employ electricity, if at hand and proceed as for drowning, taking the additional precaution to apply eight or ten leeches to he temples.
apparent Death from Drunkenness-Raise the head; loosen the clothes, maintain warmth of surface, and give a mustard emetic as soon as the person can swallow.

Apoplexy and Fits gener ally-Raise the head; loosen all tight clothes, strings, etc.; apply cold lotions to the head, which should be shaved; apply leeches to the temples, bleed, and send for a surgeon.

Suffocation from Noxious Gases, etc.--Remove to the fresh air; dash cold vinegar and water in the face, neck, and breast ; keep up the warmth of the body; if necessary, apply mustard poultices to the soles of the feet and to the spine, and try artificial respirations as in drowning, with electricity.

Lighting and Sunstroke-Treat the same as apoplexy,

\section*{Focisong and their Slatiooteg.}

Always send immediately for a medical man. Save all fluids vomited, and articles of food, cups, glasses, etc., used by the patient before taken ill, and lock them up, As a rule give emetics after polsons that cause sleepiness and raving ;-chalk, milk, eggs, butter, and warm water, or oil, after poisons that cause vomiting and pain in the stomach and bowels, with purging ; and when there is no inflammation about the throat tickle it with a feather to excite vomiting. Vomiting may be caused by giving warm water, with a teaspoonful of mustard to the tumblerful, well stirred up. Sulphate of gine (white vitriol) may be used in place of the mustard, or powdered alum. Powder of ipecacuanha, a teaspoonful rubbed up with molasses, may be employed for children. Tartar emetic should never be given, as it is excessively depressing, and uncontrollable in its effects. The stomach pump can only be used by skillful hands, and even then with caution.

Opium and other Narcotics.-After vomiting has occurred, cold water should be dashed over the face and head, The patient must be kept awake, walked about between two strong persons, made to grasp the handles of a galvanic battery, dosed with strong coffee, and vigorously slapped. Belladonna is an antidote for opium and for morphia, etc., its active principles ; and, on the other hand, the latter counteract the effects of belladonna. But a knowledge of medicine is necessary for dealing with these articles.

Strychnine-After emetics have been freely and successfully given, tho patient should be allowed to breathe the vapor of sulphuric ether, poured on a handkerchief and held to the face, in such quantities as to keep down the tendency to convu'sions. Bromide of potassium, twenty grains at a dose, dissolved in syrup, may be given every hour.

Alcoholic poisoning should be combated by emetics, of which the sulphate of zine, given as above directed, is the best. After that, strong coffee internally, and stimulation by heat externally, should be used.

Acids are sometimes swallowed by mistake. Alkalies, lime water, magnesia, or common chalk mixed with water, may be freely given, and afterward mucilaginous drinks, such as thick gum water or flaxseed tea.

Alkalies are less frequently taken in injurious strength or quantity, but sometimes child ren swallow lye by mistake. Common vinegar may be given freety, and then castor or sweet oil in full dos+s-a tablespoonful at a time, repeated every half hour or two.

Nitrate of silver when swallowed is neutralized by common table salt freely given in so ution in water.

The salts of mercury or arsenic (often kept as bedbug poison), which are powerful irritants are apt to be very quickily fatal. Milk or the white of eggs may be freely given, and afterward a very thin paste of flour and water. In these cases an emetic is to be given after the poison is neutralized.

Phosphorous paste, kept for roach poison or in parlor matches, is sometimes eaten by children, and has been wiffuliy taken for the purpose of suicide. It is a powerful irritant. The first thing to be done is to give freely of magnesia and water ; then to give mucilaginous drinks, as flaxseed tea, gum water or sassafras pith and water; and lastly to administer finely-powdered bone charcoal, either in pill or in mixture with water.

Bad Fish or other Food.-Emetics ; then a large dose of castor-oil with some warm spice, Mustard plaster to pit of stomach if necessary.

Carbolic Acid.-Castor or olive-oil.
Chloroform.-Same as Opium.
Chloride of Tin,-Milk in large quantities with magnesia, chalk or whiting in it ; raw egg beaten up with water or milk.

Chloride of zinc.- Milk with white of eggs in it. Large doses.
Copper,-Milk and whites of eggs; large quantities ; then strong tea, Don't give vinegar. Copperas.-Emetics, Mucilaginous drinks.
Corrosive Sublimate. - White of eggs in a little water. Repeat dose at intervals of two of three minutes until patient vomits. Use milk or flour and water if you can't get eggs.

In no case of poisoning should there be any avoidable delay in obtaining the advice of a physician, and, meanwhile, the friends or bystanders should endeavor to find out exactly what has been taken, so that the treatment adopted may be as prompt and effective as possible.

\section*{}

The civil lists and allowances of the principal foreign rulers are :-
Austria-Hungary, Emperor of, \(\$ 3,875,000\),
Bavaria, King of,' \(\$ 1,412,000\), which includes allowances to family.
Belgium, King of, \(\$ 560,000\).
Denmark, King of, \(\$ 277,775\); and Crown Prince, \(\$ 33,000\).
Germany, Emperor of (see Prussia, King of). No separate civil list.
Greece, King of, \(\$ 260,000\), including \(\$ 20,000\) a year each from Great Britain, France and Russia.
Holland, King of, \(\$ 250,000\), also a large revenue from domains, and \(\$ 60,000\) for Royal Family, courts and palaces. The reigning house possesses a very large private fortune.
Italy, King of, \(\$ 2,858,000\), of which \(\$ 180,000\) is for Royal Family.
Japan, Emperor of, \(\$ 2,000,000\).
Norway and Sweden, King of, \(\$ 575,525\).
Persia, Shah of, said to have a private fortune of \(\$ 25,000,000\) to \(\$ 30,000,000\).
Portugal, King of, \(\$ 634,440\), including all payments to family.
Prussia, King of, \(\$ 3,852,770\); also a vast amount of private property castles, forests and landed estates, out of which the court expenditure and Royal Family is paid,
Roumania, King of, \(\$ 237\), (:00.
Russia, Czar of, has a private estate of more than \(1,000,000\) square miles of cultivated land and forests, besides gold and other mines in Siberia. The income has been estimated at \(\$ 12,500,000\).
Saxony, King of, \(\$ 735,000\), and \(\$ 80,100\) additional for the Royal Family.
Servia, King of, \(\$ 240,000\).
Spain, King of, \(\$ 1,400,000\), besides \(\$ 600,000\) for Royal Family.
Turkey, Sultan of, is reported to have an income of from \(\$ 5,000,000\) to \(\$ 10,000\), , 00 per annum.
United States, President of, \(\$ 50,000\), and allowance for expenses.
Wurtemburg, King of, \(\$ 449,050\), and extra \(\$ 73,490\) for the Royal Family,

\section*{The \(\mathfrak{s u t c} \mathfrak{C a n a l}\).}

This waterway is 92 miles long, 26 feet deep was 13 years in construction, and cost £17,036,000 , which was made up thus :-
Preliminary expenses . ....£3,800,000
Machinery ...... .......... 2,200,000
Excavation ............ . • \(7,700,000\)
Docks and harbors.. ..... \(1,400,000\)
Transport, buildings, etc. 1,936,000
Total
£17,036,000
In November, 1875, the British Government agreed to purchase the Khedive's shares in the canal. Parliament approved, and voted the money in 1876. The holding of the British Government in the canal is 176,602 shares, of the nominal value of £20 each. The Khedive pays 5 per cent. interest until July 1st, 1894, when dividends will beesme payable. The actual cost of the shares was :-
Purchase-money of 176,602
\[
\text { shares .... ................£3,976,582 } 26
\]

Commission of \(2 \frac{1}{2}\) per cent. paid
to M-ssrs, Rothschild.

Total.... ............... \(£ 4,076,62285\)
The canal shortens the voyage between England and the East by a third:-
London to By canal. By Cape. Sav'g mil+s. Rombay .... 6,330 ...... 10,595 ...... 4,265 Madras .... 7,330 ...... 10,830 ...... 3,500 Calcutta ... 7,950 ...... 11,450 ...... 3.500 Singapore .. 8,345 .... . 11,670 ...... 3,325
The number of steamers that passed through the canal, their tonnage, and the receipts in the four years ending 1890 :-

Year. Vessels, Net tonnage. Rec'ts. Francs, \(1890 \ldots . .3,389 \ldots . .6,890,094 \ldots . .66,9844\), f190) \(1889 \ldots . .3,425 \ldots .6,783,187 \ldots . .66,167,579\) \(1888 \ldots . ., 3,440 \ldots . .6,640,834 \ldots . .64,832,273\) 1887....3,137 .... 5,903,044 ..... \(57,862,371\)

The percentage of vessels and tonnage of the countries which take the lead in the navigation of the canal stand thus:-
\begin{tabular}{|c|c|c|c|}
\hline Flag. & Vessels. & Gross onnage. & Net \\
\hline & p. ct. & p.et. & \\
\hline Great Britai & & 77.85 & 78.91 \\
\hline France & 4.91 & 5.70 & \(5 \cdot 33\) \\
\hline Germany & \(5 \cdot 66\) & \(4 \cdot 82\) & \(4 \cdot 27\) \\
\hline Holland & 4*26 & \(3 \cdot 75\) & 3.87 \\
\hline Italy & . \(3 \cdot 01\) & \(2 \cdot 91\) & 76 \\
\hline Austria-Hu & y. 1.58 & 176 & 1.72 \\
\hline Spain & . \(0 \cdot 96\) & 1.06 & 1.06 \\
\hline Norway & 140 & \(0 \cdot 94\) & \(0 \cdot 98\) \\
\hline Russia & \(0 \cdot 67\) & \(0 \cdot 60\) & \(0 \cdot 50\) \\
\hline Turkey & \(0 \cdot 64\) & \(0 \cdot 38\) & 033 \\
\hline Egypt & 0.23 & 0.07 & \(0 \cdot\) \\
\hline
\end{tabular}

The number of French, Dutch, and Italian vessels is largely made up of mail steamers and ships in Government service. In 1888, 1608 vessels made the transit by night and day making use of electrical light, and 1,832 by day only ; in 1889, the former category rose to 2,457 , and the latter fell to 968. In this manner the mean duration of the passage through the canal, which was 48 hours in \(18-3\) and 30 hours in \(18 \times 8\), was further reduced to 26 hours in 1890. In that year 2522 Finglish vessels of 7,438,682 total tonnage, 275 German vessels of 731,888 total tonrage and 169 French vesselionf 555,041 total tonnage passed through the Cana!,

In the East fully \(15,000,000\) of Hindus, Mohammedans, Buddhists, and others, read and speak English. With the exception of Chinese it is the most universally used language.

Do Salmon invariably return to the Rivers in which they were Npatweil?-It is a generally received opinion that a wonderful and unerring instinct leads the salmon, after its descent to the sea, to return to the river in which it was bred. This habit of the salmon was proved by an experiment made by De Lalande, who, purchasing twelve salmon of the fishermen of Chateaulin (a small town of Lower Brittany, where some thousands are caught in a season), fastened a copper ring round the tail of each, and set them at liberty again. The fishermen afterwards informed him that the first year they took five of the fish thus marked, three the second year, and the same number the third. Mr. Buckland considered that the organs of smell, which are very strongly developed in the salmon, have something to do with this habit. Mr. Yarrell, another naturalist of repute, although not giving a very positive opinion to the contrary, thought that the salmon did not always return to the river in which they had been bred in order to spawn; his opinion was that they rove for miles along the shore, and that it is not improbable that when they have wandered far from their native stream, they might at breeding time ascend another river, provided its temperature and conditions wert congenial. A. Parliamentary committee in 1824, after hearing evidence of those best entitled to form an opinion, concluded that, in the absence of deranging circumstances, the salmon bred in a river generully returned to it.

Is it Best to Open or Close Windows during a Thunderstorm? -It is best to close them, for the following among other reasons: Lightning pursues in its course the path of least resistance, and is continually rushing or breaking off towards the best conductor connected with the earth. In a room there are likely to be several good conductors, as the met il gas-pipe, Which often fulfills the important condition of leading to the earth. The glass of the windows is, on the other hand, one of the worst possible conductors of lightning, and, therefore, if the windows are closed, the lightning will be almost sure to find a better and easier means of reaching the earth than by entrance into the room. If, on the other hand, the windows are open, the danger of its entrance, especially where gas is the means of illumination, will be greatly increased. The closing of the windows also keeps the air of the room dry during the rain which is almost sure to accompany the lightning, and dry air is a much worse conductor of electricity than moist.

\section*{The Canadian Uacrogie Championship.}

The following table shows the annual winners of the Canadian Senior Lacrosse Cl pionship, meaning thereby the club that won the most matches during the season :

* Draw between Shamrocks and Toronto.
\(\dagger\) The Cornwalls won, but were rulel out on account of playing a professional,
§ Two leagues. Montreal came out best in one, Cornwall in the other. These two Cl played off afterwards, Cornwall winning.

\section*{foot \(\mathfrak{W a l l}\) Championghipg.}

Province of Quebec.-Compiled by Mr. A. G. B. Claxton, Hon. Secy. M. F. B.C It is only since 1886 that regular championship series have been held in the Province Quebec. Up till that year the Challenge Cup presented for competition in 1879 by the Montr Foot Ball Club was considered to be the emblem of superiority. It now stands with a ho-t other trophies in the glass case in the M. A. A, A, Gymnasium. It bears about thuty shiel shewing how of tenit has had to be defended. They are as follows :

1873 Quebec vs. Montreal, Montreal
1874 Queben vs, Montreal, Montreal.
1881 Sept. 21, Quebec vs. Montreal. Forfeited to Quebec by default.
" Sept. 28, Quebec vs. Montreal, Montreal.
" Oct. 1, McGill vs. Montreal, Montreal.
" Ost, 8, Britannia v8, Montreal, Montreal.
" Oct, 15, R, M. Cadets vs, Montreal, Montreal.
" Oct. 29, Ottawa vs, Montreal, Montreal.
" Nov. s, Britannia vs. Montreal, Britannia.

Yale won the championship in 1881, 1882, 1883, 1887, 1888, 1890 and 1891.
Princeton won the championship in 1877, 1878, 1879, 1880, 1885 and 1889.
November 22, 1890, Harvard defeated Yale for the first time since 1875 at Hampden Park, Springfield, Mass., by a score of 12 to 6. Princeton's subsequent defeat by Yale virtually made Harvard the charepion in 1890.

In the Intercollegiate series of 1891 Yale won 3 matches, lost 0 , scored 143 points to opponents' 0; Princeton won 2 matches, scored 97 points to opponents' 19 ; University of Pennsylvania won 1 match, witl: 18 points to opponents' 82 ; Wesleyan won 0 , scored 10 points to opponents' 167 .

On November 21, 1891, Yale defeated Harvard at Hampden Park by a score of 10 to 0 . This completed Yale's record of victories for 1891.
* 1892 competition not complute Nov. 1st, 1892.
\(\dagger\) November 19,1889, Harvard resigned from the Intercollegiate Football Association on account of a controversy with Princeton, which was charged with playing professionals on the football team. Harvard failed to form a dual league with Yale,

\section*{ゆaschafl.}

\section*{Championship of America.}

From 1884 up to 1890 the winners of the respective pennants of the National League and American Association have played a post-season series for the championship of America. In 1091 there were no games played. 1892 saw the American Association out of existence, and a new order of things. Twelve out of the sixteen clubs, whicis comprised the two leagues, formed one league and divided the season into two halves. Boston won the first series and Cleveland the second. In the final, Boston won hand down. The following table shows the results :-
1884 .. Providence \(\boldsymbol{v g}\). Metropolitans .....Providence ..... 3 Metropolitans.... 0 Drawn... 0 1885 ...C'icago vs. St. Louis ................Chicago .......... 3 St. Louis ........ 3 Drawn.... 1 1886 ....Chicago vs, St. Louis ................ Chicago ........... 2 2 St. Louis ......... 4 Drawn,... 0 1887 ... Detroit vs. St, Louis,....... .........Detroit ......... 11 St, Louis, ........ 4 Drawn.... 0 1888 ...New-York vs. St. Louis....... ......New-York....... 6 st, Louis,......... 4 Drawn.... 0 1889 ...New-York vs. Brooklyn ............. New-York ...... 6 Brooklyn........... 3 Drawn.... 0 |190* ... Brooklyn vs, Louisville ............ Brooklyn........ 3 L ruisville.......... 3 Drawn.... 1 1022 Boston vs, Cleveland......... , ...Boston .......... 5 Cleveland......... 0 Drawn.... 1
*Cold weather put a stop to the series, and it was agreed to resume the games in the spring of 1891. The fact that the Boston team of the Players League was not allowed to compete nobbed the series of its significance.

THE AMERICAN ASSOCTATION.
The American Association began its career in 18̊2, and after a hard fight attained it \({ }^{8}\) prominent position in the world of professional baseball. Its record follows :-
\begin{tabular}{|c|c|c|c|c|c|c|c|}
\hline Year. & Champion Club & Won, & L & Average. & Champion Batter. & Club. & verage \\
\hline 1882 & Cincinn & 54 & 26 & . 673 & & Lousvile. & \\
\hline 183 & Athletic & 66 & 32 & . 673 & Mansell & St. Louis. .. & 357 \\
\hline 184 & Metropolit & 75 & 32 & . 701 & Esterbro & Metropolitan & . 405 \\
\hline 1205 & St. Louis & 79 & 33 & . 705 & Brownil & L uisville..... & . 367 \\
\hline 188 & St, Louis & 93 & 46 & . 669 & Orr & Metropolitan.. & 346 \\
\hline 1588 & St. Lou & 9 & 43 & . 681 & O'Neil & St. Louts & 392 \\
\hline 189 & Brookly & 93 & 44 & . 679 & Tucker & Baltimore & . 375 \\
\hline No & Lo & 87 & 44 & . 664 & G & Louisville... & . 422 \\
\hline 201 & Bo & 93 & 42 & . 689 & Suteliff & Washington & . 365 \\
\hline
\end{tabular}

\footnotetext{
*Bases on balls were credited as base hits in the records of 1887.
}

In 1884, the Association experimented with a twelve-club circuit, but it was found to be too cumbersome, and has never been tried since.

Since its organization the following elubs have held membership in the American Association: St, Lonis, Cincinnati, Louisville, Athletic, Alleghany (Pittsburgh), Baltimore, Metropolitan, Columbus, Toledo, Brooklyn, Indianapolis, Washington, Virginia '(Richmond), Cleveland, Kansas City, Syracuse and Rochester.

\section*{THE NATIONAL LEAGUE}

The record of the pennant winner of the National League, together with the name of the leading batter each year, since its organization, is as follows :-
\begin{tabular}{|c|c|c|c|c|c|c|c|}
\hline Year. & Champion Club. & Won. & Lost. & Average. & Champ'n Bat & Club. & Average. \\
\hline 1876 & Chicago & 52 & 14 & . 788 & Barnes. & Chicago. & 03 \\

\section*{Harvard and Fale Previous Races.}

Previous races in which Harvard and Yale have rowed are summarized as follows
1852, August 3. Lake Winipiseogee, Centre Harbor, N. H. two miles straight to windward, in eight-oared barges, class of 1853, Oneida, of Harvard, beat Halcyon, of Yale, two lengths.
1855, July 21. Connecticut River, at Springtield, thre miles with a turn, in barges Iris (eight-oared) and Y. Y. (four oared), of Harvard, beat Nereid and Nautilus (both sixes), of Yale, Allowances, eleven seconds per oar. Time : Iris, 22 11. Y. Y., 22.03 ; Nereid, 23.38, and Nautilus, 24.38 ,

1858, No race. George E. Dunham, stroke of the Yale crew, was drowned at Springfield, six days before the race, in a collision while at practice.

1859 , July 26, Lake Quinsigamond, Worcester, Mass., three miles with a turn, Harvard shell, 19,18 ; Yale shell, 20, 18 . Harvard lapstreak, Avon, 21.13; Brown lapstreak, Atalanta, 24.40.
same course, July 27 , in Citizen's regatta, Yale shel1 Same course, July 27, in Citizen's regatta, Yale shell, 19.14; Harvard, 19.16.

There were no furth r races until 1864 , when they were renewed by university six-oared
There were no three miles with a turn, and with the following results :
crews, at three miles with a turn, and Winner. Time. Loser. Time.

In 1871 was begun what were then known as the Inter-University Races, in which Harvard and Yale were contestants,

1871, July 21. At Springfield, three miles straight, Massachusetts Agricultural, 16.462 ; Harvard, \(17.23 \frac{1}{2}\); Brown, \(17.47 \frac{1}{2}\).
1872. July 24 . At springtield, same course. Amherst, 16.33; Harvard, 16.57; Amherst Agricultural, 17.10 ; Bowdoin, 17. 1 ; Williams, 17.59 : Yale, 18.13.

1873, July 17. At Springtield, same course, Yale, 16.59; Wesleyan, 17.09; Harvard, 17.362 ; Amherst, 17.40; Dartmouth, 18.07; Columbia, 18.16 ; Massachusetts Agricultural, 18.261 ; CorLe... 18.32; Bowdoin, 18.491.; Trinity, 19.32; and Williams, 19.45.

1874, July 18. At Saratoga, N. Y., three miles straight, Columbia, 16.42 ; Weslevan, 16.50 ;
Haryard, 16.54 . Williams, 17.08 ; Cornell, 17.31 ; Dartmouth, 18.00 ; Trinity, 18.23; Princeton, 18,38; Yale fouled and withdrawn.

1875, July 14. At Saratoga, N. Y. Cornell, 16.532 ; Columbia, 17.042 ; Harvard, 17.05; Dart-
month, 17.102 ; Wesleyan, 17.131 ; Yale, 17.142 ; Amherst, \(17.29 \frac{1}{2}\); Brown, \(17.33_{2}\); Williams, 17.432 ; Bowdoin, \(17.50 \frac{1}{2}\); Hamilton and Union not timed ; Princeton withdrawn.
 Union, \(17.27 \frac{1}{2}\); Wesleyan, \(17.58 \frac{1}{2} ;\) Princeton, 18.10. Yale refused to enter, but rowed Harvard an cight-oared race as above.

\section*{RECORD OF THE AMERICA'S CUP,}

On August 22,1851, the American yacht America won the priza known as the America's cup in a race round the Isle of Wight, England, starting from Cowes without time allowance. The cutter Aurora, 47 tons, finished second. None of the other starters finishe - Gypsy Queen ers: Beatrice, 161 tons; Wyvern, 205 tons; 1one, 160 tons, and Brilliant ( 3 masts), 392 tons. Cutters: Volante, 48 Eclipse, 50 tons. The America 193 tons' ; Mona, 82 tons; Bacchante, 80 tons ; Freak, 60 tons, and Eclipse, 50 tons. The America was rated at 170 tons.
1857.-The America's cup was presented to the New-York Yacht Club by its owners, Messrs. J.C. Stevens, Edwin A.Stevens, Hamilton Wilkes, J. Beekman Finley, and George L. Schuyler, as a perpetual challenge cup. 1870.-August 8. Mr. J. Ashbury's schoonesentiug the New-York Yacht Club over a course Clubs, started against a fleet of schooners represe the New-York Lightship, a distance of about from off Stapleton, Staten sisiling, the course in 3 hours, 59 minutes and 26 seconds. The origin40 miles. The Magic won, sailing the courses and 51 seconds, and the Cambria tenth in 4 hours, al America was fourth in 4 tours, 23 minutes 1871.-The conditions having been changed so that the. New-York Mach Ashury having chal-1871.-The conditionst the challenging yacht, best of seven races, Mr. Ashibury lenged for the cup with his schooner Livonia, the results were as forlows Livonia by 27 minutes

Uctober 16. New-York Yacht Club course, schooner Columbia beal
and 4 seconds.

Octeber 18. Outside course, 20 miles from Lightship and return, dead to windward, Columbia won by 10 minutes and 33 seconds.

October 19. New-York Yacht Club course, Livonia beat Columbia (d'sabled) by 15 minutes and 10 seconds.

October 21
October 23. seconds.

Outside course, schooner Sappho beat Livonia by 31 minutes and 21 seconds, New-York Yacht Club course, Sappho beat Livonia by 25 minutes and 27
1876.-August 11. New-York Yacht Club course, schooner Madeleine, representing the New-York Yacht Club, beat the Canadian schooner Countess of Dufferin by 10 minutes and 59 seennds.

August 12. Outside course, 20 miles to windward from Sandy Hook and return, Madeleine beat Countess of Dufferin by 27 minutes and 14 seconds. The America sailed over the course on this race, and finished 19 minutes and 9 seconds in front of Countess of Dufferin.
1881.- November 9. New-York Yacht Club course, sloop Mischief, representing New-York Yacht Club, beat the Canadian sloop Atalanta by 28 minutes and 30\(\}\) seconds.

November 10. Outside course, 16 miles to leeward from buoy No. 5 and return to windward, Mischief beat Atalanta by 38 minutes and 54 seconds.
1882. - In the winter of 1881-82 the America's cup was returned by the New-York Yacht Club to the only surviving original owner, Mr, George L. Schuyler, who again presented the cup to the club with amended conditions that required the challenging yacht to represent an organized yacht clublhaving its annual \(r\) gatta over an ocean water course, the yachtselected to be not less than 30 nor more than 300 tons, measured by the Custom House rule of the country of the challenging party, which must proceed under sail, on their own bottoms, to the part where the contest is to take place.
1885.-September 14. New-York Yacht Club course, sloop Puritan, representing the Eastern Yacht Club, beat cutter Genesta, representing the Royal Yacht Squadron, 16 minutes and 19 seconds.

September 16. Outside course, 20 miles to leeward and return. The return was not strictly to windward, owing to the wind shifting. Puritan beat Genesta, 1 minute and 38 seconds.

Note.-Four other attempts were made to sail these races, all of which were failures.
1586.-September 7. New-York Yacht Club course, sloop Mayflower, representing the Eastern Yacht Club, beat cutter Galatea, representing the Royal Northern Yacht Club, 12 minutes and 2 seconds,

September 11. Outside course, 20 miles to leeward and return, Mayflower beat Galatea, 29 minutes and 9 seconds.

Note.--Two other attempts were made to sail these races-both were failures-in one of which the course was sailed, the Mayflower winning, but not within the fixed time of 7 hours.
1887.-Septomber 27. New-York Yacht Club course, sloop Volunteer, representing the Eastern and New-York Yacht Clubs, beat cutter Thistle, representing Royal'Clyde Yacht Club, 19 minutes, \(23{ }^{3}\) seconds.

September 29 , Outside course, 20 miles to windward and return, Volunteer beat Thistle, 11 minutes, 47 seconds.
[After the rac s the deed of gift was again amended-the more important changes being : to limit the challengers to sloops or cutters of not less than 65 nor more than 90 feet and schooners to not less than 80 nor more than 115 feet on load water-line; that the races shall be sailed without time allowances; that the challenging club shall give ten months' notice, and that all races shall be on ocean courses, free from headlands, as follows : first race, 20 natical miles to windward and return ; the second race an equilateral triangular race of 30 nautical miles, the first side of which shall be a beat to windward; the third race, if necessary, 20 nautical niles to windward and return.]
1888. -The changes in the "deed of gift" as above described were deemed so unsatisfactory both at home and abroad that the following resolution was adopted at a general meeting of the
"Resolved, That the terms under which the races between the Genesta and Puritan,Galatea and Mayflower, and Thistle and Volunteer were sailed are considered satisfactory to this club, and a challenge under these terms would be accopted, but with the positive understanding that if the cup is won by the club challenging it shall be held under and subject to the full terms of the new deed, dated October \(28,1.87\), inasmuch as this club believes it to be in the interest of all parties, and the terms of which are distinct, fair and sportsmanlike."

The Secretary was directed to forward copies of the resolution to British yacht clubs.
1889.-In May the Royal Yacht Squadron of England, on behalf of Lord Dunraven, challenged the New York Yacht Club for the America's Cup, naming the cutter Valkyrie. There was consider ble correspondence, but, owing to some misunderstanding as to the terms of the deed of gift by the challengers, the whole matter went over, Iord Dunraven writing to the New York Yacht Club nnder date of August 16, "I regret the postponement, but trust the matter may yet come off."
1890. The season opened with a renewal of hostilities between Lord Dunraven and the New York Yacht Club. The former wrote to ask if his challenge of the previous season had not been considered as merely postponed, and wanted to know if he were still regarded as a challenger. The Club to \(k\) a dignifled stand, and replied that it would be pleased to waive the ten months' limit again, but that he must issue a new challenge in the name of a recognized yacht club, with a supplemental statement to the effect that "The Club neither conld nor would depart from the position taken by it last year." Lord Dunraven's reply was that the Royal Yacht Squadron, in the event of becoming a winner, could not pledge itself to sail all future contests under the terms of the objectionable deed of qirt. This ended the negotiation. The death of Mr. George L. Schuyler, the last donor of the Cup, makes the new deged of gift irrevocable, though Mr. James Ashbury has written The World that he intends to carry the matter befor; the United States
arts and contest the 1 siven into the custc Lfbeing built by Cold ther in Australia, to In October, 1892, Lo fand the terms upon The terms under wh , if they are agreed Fhallenge. He asks It, the Custom-house conditions be made "Any excess over tl qulating time allowa re than 2 per cent.

tsand contest the legality of a change made in the original instrument by which the Cup given into the custody of the New York Yacht Club. There were rumors in the fall of a ft being built by Colonel North in England, one by a syndicate of yachtsmen in France, and ther in Australia, to challenge for the Cup, but none had materialized when the year closed. In October, 1892, Lord Dunraven wrote the American Yacht Club respecting the deed of and the terms upon which he would sail for the Cup.
The terms under which Lord Dunraven desires to sail for the cup are exceedingly simple, if they are agreed to, there can be no misunderstanding, as was the case when he sent his thallenge. He asks that he be allowed to challenge, only giving the water-line length of his at, the Custom-house register to follow as soon as practicable. He also asks that the followconditions be made in addition to those in the deed of gift :-
"Any excess over the estimated length of the load-water line of my vessel to count double in leulating time allowance ; but my vessel not, in any case, to exceed such estimated length by rethan 2 per cent. The yacht that sails against me not to exceed the estimated length on load-water line of my vessel by more than 2 per cent; ; and any excess in length beyond the finated length of my vessel on the load-water line to count double in calculating time allow-
"It is to be understood and agreed that, should I win the cup, the club obtaining the custody itshall hold it open to a challenge on the same conditions as those under which I challenged," The Club agreed to all of this except the stipulation that the boat to meet I ord Dunraven's whit be not more than 2 per cent. longer on the load-water line than his own, and the parapph in regard to future challenges, and the Committee was appointed with full power to minge the match.

\section*{Spece of nailway dramsi.}

Speed is hard to average. An average of \(483-10\) miles per hour is the fastest regular time the United States. This is made on the Pennsylvania "limited" in its run from Jersey Ity to Philadelphia, 90 miles, in 112 minutes. Sometimes a straight and even grade for a disance of 20 miles will permit a train to run at the rate of more than a mile a minute. One train no the Canada Atlantic road, from Coteau to Ottawa, averages 50 miles an hour for a distance d 78 miles. An average of 45 miles an hour is considered reasonable in England.

The ordinary train from Montreal to Vancouver oceupies \(5 \frac{1}{2}\) days in the transit of the Contithe distance being \(2,006 \mathrm{mileg}\), which was accomplished by a special train in 3 days, 16 hrs .
The largest and fastest passenger engine ever built is said to have been turned out of the dode Jsland Locomotive Works, at Providence, for the New York, Providence \& Boston Railmad Company. She was designed to make the run from Providence to Groton, Conn., a distance \({ }^{2} 622\) miles, including a dead stop at Mystic draw-bridge, as required by the statutes of Conneclient, in just \(62 \frac{1}{2}\) minutes, pulling at the same time eight cars, four of them Pulmans,

The fastest time made by an A verican train was on the Philadelphia \&c Reading Rallroad, agust \(27,1891,12\) miles, Jenkintown to the Delaware River, in 8 minutes, \(42 \frac{1}{2}\) seconds, being at theaverage rate of 82.7 miles an hour. The tenth mile was made the rate of 90.5 miles an bour, and the ninth mile at the rate of 90 miles. The average for the sixth to tenth miles was 8 miles, The train was composed of an engine, tender and three cars, all weighing 169 thes.
The fastest long-distance run was on the New York Central Railroad, September 14, 1891, fom New York City to East Buffalo, \(436 \frac{\mathrm{t}}{}\) miles, in 425 minutes, 14 seconds, actnal time, or \(439 \frac{1}{2}\) binutes, including three stops. Average speed, including stops, 61.56 miles an hour.

The fastest regular trains in the United States are believed to be those between Washin and Baltimore, on the Baltimore \& Ohio Railroad, 40 miles in 45 minutes, a speed of miles an hour. The run from Washington to New York, 225.3 miles, is made in 5 ho Deducting 12 minules for the Jersey City Ferry and 10 minutes for the Canton Ferry the of speed is 48.6 miles per hour. The "Congressional Limited." on the Pennsylvania Railr also makes the run in 5 hours, 5 minntes, but the distance is 227 miles .

The shortest run between New York and Washington was made on the Pennsylvania \(R\) road, November 28, 1891, by a special train, in 4 hours, 11 minutes, making the runuing ti exclusive of stops, 563 miles an liour. This beat the time of the "Aunt Jack" train, made the Madison Square Theatre Company, March 10, 1890, which was 4 hours, 18 minutes cach w going and return.

813 miles -23 h . (actual running time, 19 h .30 m .) special train conveying Washington ne paper correspondents from convention, Chicago, I11, to Washington, D. C., June 7, 8, 1.84t.

400 miles-7h. 25m. Flying Scotchman, London to Edinburgh, Scotland, Aug. 6. 1888.
Great Northern Railway, daily train Grantham to Retford, distance 33 miles, time minutes, speed \(55 \neq\) miles per hour.

Great Northern Railway,-daily train between London and Grantham 105 miles, time 1 57 minutes, speed 54 miles per hour.

Flying Dutchman, London to Swindon, G. W. R., \(77 \frac{1}{4}\) miles, 1 hour, 27 minutes, speed miles per hour.

Daily trains London to Brighton, 50 miles, 1 hour.

\section*{Weather Misiom.}

Attempts are frequently made to connect the state of the weather with the aspects of planets, the changes of the Moon, or some other astronomical occurrences. The idea that weather is dependent on the Moon's phases still finds favor, although any definite comnect has been repeatedly disproved.

As many persons still hoid to the belief that the Moon's changes have something to do w the weather, it has been thought well to give a Weather Table, in order that any one who ea to do so may compare the predictions therein with his own experience, and prove for hims how much truth there is in the theory.

mong other instances it is observed that sea birds，as stormy weather comes on，fly inland in wril of food；wild fowl leave the marshy grounds for higher localities；swallows and rooks lly Fbefore and during bad weather；frogs are unusually noisy before rain ；sheep huddle toge－ criear bushes．
Predictions founded solely on the indications of the barometer and thermometer may be We with more certainty if combined with careful observation of the appearance of the sky， Iithe atmospheric effects peculiar to the particular locality．
suses Colors，－A gray，lowering sunset，or one where the sky is green or yellowish men，indicates rain．A red sumrise，with clouds lowering later in the morning，also indicates
HALO（SUN DOGS）．－By halo we mean the large circles，or parts of circles，about the sun or wou．A halo occurring after fine weather indicates a storm．
Corosis．－By this term we mean the small colored circles frequently seen around the sun moon．A corona growing smaller indicates rain ；growing larger，fair weather．
Ransoows．－A morning rainbow is regarded as a sign of rain；an evening rainbow of fair pather．
Sather．COLOR．－A deep blue color of the sky，even when seen through clouds，indicates fair ather ；a growing whiteness，an approaching storm．
Focs．－Fogs indicate settled weather．A morning fog usually breaks away before noon．
Visibility，－Unusual clearness of the atmosphere，unusual brightness or twinkling of the ors，indicate rain．
CLouvs，－In observing elouds，we observe their kinds，motions and outlines．The clouds maneutly called＂mare＇s tails＂we term Cirri．They are marked by their light texture， Frous and sundered as in the＂mare＇s tail，＂or interlacing as in the far－spreading white Would which produces the halo．Small，regularly formed groups of these clouds are frequently en in fair and settled weather．The Cirri are also the clouds on the forepart of the storm． minthis case they are usually more abundant，their ontline is very ragged，and they generally fend into a white，far－reaching cloud－bank，The clouds well known as＇＂cotton bales，＂or munder heads，＂we term cumuli．When they appear during the heat of the day and pass away the evening，continued fair weather may be expected．When they increase with rapidity， Wik into the lower part of the atmosphere，and remain as the evening approaches，rain is at fini．If loose patches appear thrown out from their surfaces，showers may be expected．The Donis usually seen after nightfall，lying in one horizontal plane，and not of great extent，are mitendant ou fine weather．Small，black，inky clouds and dark scud indicate rain．

\section*{DRAWY UP AT THE SECOND AMERICAN WHIST CONGRESS.}

Scoring,-A game consists of seven points, each trick above six counting one. The value of the game is determined by deducting the loser's score from seven.

Forming of the table,- - 2 . Those first in the room have the preference. If, by reason two or more arriving at the same time, more than four assemble, the preterence amony the last comers is determined by cutting, a lower cut giving the preference over all cutting h. her. complete table consists of six ; the four having the preference play.
3. If two players cut intermediate cards of equal value, they cut again, and the lower of the new cut plays with the original lowest.
4. If three players cut cards of equal value, they cut again. If the fourth has cut the highe card, the lowest two of the new cut are partners, and the lowest deals. If the fourth has cut the lowest card, he deals, and the highest two of the new cut are partners.
5. At the end of the game, if there are more than four belonging to the table, a sufficient number of the players retire to admit those awaiting their turn to play. In determining which players remain in, those who have played a less number of consecutive games have the prefer ence over all who have played a greater number ; between two or more who have played an equal number, the preference is determined by cutting, a lower cut giving the preference over all cutting higher.
6. To entitle one to enter a table, he must declare his intention to do so before anyone o the players has cut for the purpose of commencing a new game or of cutting out.

CuTting.-7. In cutting, the ace is the lowest card, all must cut from the sam player exposes more than one card, he must cut again. Drawing cards from the if pack may be resorted to in place of cutting.

ShuFfling.-8. Before every deal the cards must be shuffled. When two packs are used the dealer's partner must collect and shuffle the cards for the ensuing deal, and place them his right hand. In all cases the dealer may shuffle last.
9. The pack must not be shuffled during the play of a hand, nor so as to expose the face any card.

Cutting to the Dealer,-10. The dealer must present the pack to his right-hand adver sary to be cut; the adversary must take a portion from the top of the pack and place it toward the centre of the table; at least four cards must be left in each packet; the dealer must reunit the packets by placing the one not removed in cutting upon the other,
11. If, in cutting or in reuniting the separate packets, a card is exposed, the pack must b reshuffled and cut; if there is any confusion of the cards or doubt as to the place where the pack was separated, there must be a new cut.
12. If the dealer reshuffles the cards after they have been properly cut, he loses his deal,

DEALing.-13. When the pack has been properly cut and reunited, the dealer must distri bute the cards, one at a time, to each player in regular rotation, beginning at his left. The last which is the trump card, must be turned up before the dealer. At the end of the hand, o when the deal is lost, the deal passes to the player next to the dealer on his left, and so on to each in turn.
14. There must be a new deal by the same dealer :-
1. If any card except the last is faced in the pack;
II. If, during the deal or during the play of the hand, the pack is proved incorrect or imper fect; but any prior score made with that pack shall stand.
15. If, during the deal, a card is exposed, the side not in fault may demand a new deal, provided neither of that side has touched a card, If a new deal does not take place, the exposed card cannot be called.
16. Anyone dealing out of turn or with his adversaries' cards may be stopped before the trump card is turned, after which the deal is valid, and the cards, if changed, so remain.

Misdealivg,-17. It is a misdeal :-
1. If the dealer omits to have the pack cut, and his adversaries discover the error before the trump card is turned, and before looking at any of their cards ;
II. If he deals a card incorrectly, a d fails to correct the error before dealing another ;
III. If he counts the cards on the table or in the remainder of the pack.
IV. If, having a perfect pack, he does not deal to each player the proper number of cards, and the error is discovered before all have played to the first trick.
\(V\). If he looks at the trump card before the deal is completed.
VI. If he places the trump card face downwards upon his own or any other player's cards.

A misdeal loses the deal, unless, during the deal either of the adversaries touches the cards, or in any other manner interrupts the dealer.

The Trump Card, -18. The dealer must leave the trump card face upward on the table until it is his turn to play to the first trick. If left on the table until after the second trick has been turned and quitted, it becomes an exposed card. After it has been lawfully taken up it must not be named, and any player naming it is liable to have his highest or his lowest trump called by either adver ary. A player may, however, ask what the trump suit is.

irregularities in the Hands.-19. If, at any time after all have played to the first trick, the pack being perfect, a player is found to have either more or less than his correct number of cards, and his adversaries have their right number, the latter, upon the discovery of such surplus or deficiency, may consult, and shall have the choice :-
1. To have a new deal ; or
II. To have the hand played out ; in which case the surplus or missing card or cards are not taken into account.

If either of the adversaries also has more or less than his correct number, there must be a new deal.

If any player has a surplus card, by reason of an omission to play to a trick, his adversaries can exercise the foregoing privilege only after he has played to the trick following the one in which such omission occurred.

Exposed Cards.-20. The following are exposed cards :-
I. Every card faced upon the table otherwise than in the regular course of the play, but not including a card led out of turn;
II. Every card thrown with the one led or played to the current trick. The player must indicate the one led or played;
III. Every card so held by a player that his partner admits he has seen any portion of its face;
IV. All the cards in a hand so lowered or held by a player that his partner admits he has seen the hand;
V. Every card named by the player holding it.
21. All exposed cards are liable to be called by either adversary, must be left face upwards on the table, and must not be taken into the player's hand again. A player must lead or play them when they are called, provided he can do so without revoking. The call may be repeated until the card is played. A player cannot be prevented from leading or playing a card liable to be called ; if he can get rid of it in the course of play, no penalty remains.

22 . If a player leads a card better than any his adversaries hold of the suit, and then leads one or more other cards without waiting for his partner to play, the latter may be called upon by either adversary to take the first trick, and the other cards thus improperly played are exposed cards ; it makes no difference whether he plays them one after the other or throws them all on the table together ; after the first card is played, the others are exposed.
23. A player having an exposed card must not play until the adversary having the right to call it has stated whether or not he wishes to do so. If he plays another card without so waiting, cuch card also is an exposed card.

Leading out of TURN.-24. If any player leads out of turn, or before the preceding trick has been turned and quitted, a suit may be called from him or his partner when it is next the turn of pither of them to lead. The penalty can be enforced only by the adversary on the right of the player from whom a suit can lawfully be called.

If a player, so called on to lead a suit, has none of it, or if all have played to the false lead, no penalty can be enforced. If all have not played to the trick, the cards erroneously played to such false lead cannot be called, and must be taken back.

Playisg out of turn.-25. If the third hand plays before the second, the fourth hand may also play before the second.
26. If the third haud has not played, and the fourth hand plays before the second, the latter may be called upon'by the third hand to play his bighest or lowest card of the suit led, or if he has none, to trump or not to trump the trick,

Revoking,-27, A revoke is a renounce in error, not corrected in time. A player renounces in error, when, holding one or more cards of the suit led, he plays a card of a different suit.
28. A renounce in error may be corrected by the player making it, before the trick in which it occurs has been turned and quitted, unless either he or his partner, whether in his right turn or otherwise, has led or played to the following trick, or unless his partner has asked whether or not he has any of the suit renounced.
29. If a player corrects his mistake in time to save a revoke, the card improperly played by him becomes an exposed card; any player or players, who have played after him, may withdraw their cards and substitute others ; the cards so withdrawn are not liable to be called
30. The penalty for revoking is the transfer of two tricks from the revoking side to their adversaries; it can be claimed for as many revokes as occur during the hand, 'Ihe revoking side cannot win the game in that hand; if both sides revoke, neither can win the game in that hand.
31. The revoking player and his partner may require the hand, in which the revoke has been made, to be played out; if the revoke loses them the game, they nevertheless score all points made by them up to the score of six.
32. At the end of a hand, the claimants of a revoke may search all the tricks. If the cards have bepn mixed, the claim may be urged and proved if possible ; but no proof is necessary, and the revoke is established, if, after it has been claimed, the accused player or his partner mixes the cards before they have been examined to the satisfaction of the adversaries.
33. The revoke can be claimed at any time before the cards have been presented and cutfor the following deal, but not there after.

Miscellaneous,-34. If a player is lawfully called upon to play the highest or lowest of a suit, or to trump or not to trump a trick, or to lead a suit, and unnecessarily tails to comply, he is liable to the same penaily as if he had revoked.
35. Any one, during the play of a trick, and before the cards have been touched for the purpose of gathering them together, may demand that the players draw their cards.
36. If any one, prior to his partner playing, calls attention in any manner to the trick or to the score, the adversary last to play to the trick may require the offender's partner to play his bighest or lowest of the suit led, or, if he has none, to trump or not to trump the trick.
37. In all cases where a penalty has been incurred, the offender must await the decision of the player entitled to exact it. If the wrong player demands a penalty, or a wrong penalty is demanded, none can be enforced.
38. When a trick has been turned and quitted, it must not again be scep until afier the hand has been played. A violation of this law subjects the offender's side to the sanc. pcualty as in case of a lead out of turn.
39. If any player says, " I can win the rest," "The rest are ours," "Wc, heve the game," or words to that effect, his partner's hand must be laid on the table, and creatsal as expused cards. 40. League clubs may adopt any rule requiring or permitting métocis of scealng oree forming the table, different from those above prescribed.

\section*{Cemmidgied on 'Change.}

Accommodation Paper.-Notes or bills not representing an actual sale or trade transac tion, but merely drawn to be discounted for the benefit of drawer, acsepco: or indorserd, or al combined.

Balance of Trade,-Difference in value between total imports and exports of a country.
Ballooning.-To work up a stock far beyond its intrinsic v/ortin by favorable st,ries of fictitious sales.

BEAR.-One who strives to depress the price of stocks, etc., and for this reason " goes short,"

Buying Long.-Buying in expectation of a rise.
Breadsturfs, - Any kind of grain, corn or meal.
Broker,-An agent or factor; a middleman paid by commjstion.
Brokerage,-A percentage for the purchase or sale of monay and stocks.
Bull,-A broker or dealer who believes that the value of stocks or breadstuffs wili xise, and speculates for a rise.

CALL.-Demand for payment of installments due on stock 3 .
Call.-A privilege given to another to "call" for delivery at a time and price fixed.
Clique,-A combination of operators controlling large capital in order to unduly expand or break down the market.

Collaterals.-Any kind of values given in pawn when money is borrowed.
Corners. - The buying up of a large quantity of stocks or grain to raise the price. When the market is oversold, the shorts, if compelled to deliver, find themselves in a "corner."

Curbstone Brokers.-Brokers or agents who are not members of any regular organization, and do business mainly on the sidewalk.

Delivery.-When stock or grain is brought to the buyer in exact accordance with the rules of the Exchange, it is called a good delivery. When there are irregularities, the delivery is pronounced bad, and the buyer can appeal to the Exchange.

Difference.-The price at which a stock is bargained for and the rate or day of delivery are not usually the same, the variation being termed the difference,

Factor.-An agent appointed to sell goods on commission.
Factorage,-Commissions allowed factors.
Flat.-Inactive ; depressed ; dull. The flat value of bonds and stocks is the value without interest.

Flyer, - A small side operation, not employing one's whole capital.
Forcing Quotations is where brokers wish to keep up the price of a stock and to prevent its falling out of sight. This is generally accomplished by a small sale,

Gunning a stock is to use every art to produce a break when it is known that a certain house is heavily supplied and would be unable to resist an attack.

Kite-Flying.--Expanding one's credit beyond wholesome limits.
Lame Duck.-Stock broker's slang for one unable to meet his liabilities.
LONG.- One is long when he carries stock or grain for a rise.
Pointer.-A theory or fact regarding the market on which one bases a speculation,
PooL.-The stock or money contributed by a clique to carry through a corner.
Price Current.-The prevailing price of merchandise, stock or securities.
SELLing SHort.-To " sell short" is to sell for future delivery what one has not got, in hopes that prices will fall.

Watering a stock is the art of doubling the quantity of stock without improving its quality.

\section*{The Game of Golf.}

Notwithstanding that the word "golf" is of Dutch origin, being derived from kolf, there can be no doubt that the national game of Scotland had its origin in Scotland. It is supposed to have been known there at a very early period indeed; however, the earliest important mention is in 1457, and this in itself is an argument in favor of the antiquity of the game (in Scotland), for it is in a decree or Act of the Scottish Parliament, which ordains that "golf be utteriy cryit down and nocht usit," and that archery was to be practised instead. This does not appear to have had the desired effect, and in 1471 another similar Act was passed. Neither was any attention paid to the latter edict, and this led, in 1491, to a final and evidently angry fulmination on the general subject, with pains and penalties annexed. This Act forbids the practice of "fute-ball, golfe, and uther sik unprofitabill games," and orders that arehery be pursued instead, " under the paine of fourtie shillinges." About a century, later the game appears on the surface of history again, and alw, ,s as a favorite one. Golf bas from old times been known in Scotland as " the royal and ancient game of golf," There was ample reason for this title, if merely on account of the number of royal golters or followers of the game, James IV , V., and VI, of Scotland (the latter afterwards James I. of England) played it. Charles I, and Prince Henry, his brother, also played. So did James, Duke of York; and in modern times the Prince of Wales and Prince Leopold have, at various periods, been captains of the Golf Club.

\section*{Urade Didcounti.}

Wholesale houses usually invoice their goods to retailers at " list" prices. List prices were nee upon a time supposed to be retail prices, but of late a system of "long" list prices has come into vogue in many lines of trade--that is, the list price is made exorbitantly high, so that wholesalers can give enormous discounts. These discounts, whether large or small, are called trade discounts, and are usually deducted at a certain rate per cent. from the face of invoice.
The amount of discount generally depends upon size of bill or terms of settlement, or both sometimes two or more diseounts are allowed. Thas 30 p.c and 5 p. c, is expressed 30 and \(\bar{\zeta}\), neaning first a discount of 30 p . c. and then 5 p . c. from the remainder.
30 and 5 is not 35 p . c., but \(33 \frac{1}{2} \mathrm{p}\). c. 10,5 and 3 off means three successive discounts.
A wholesale house allowing 10,5 and 3 off gets more for its goods than it would at 18 off.

\section*{Short Interest Rules.}

To find the interest on a given sum for any number of days, at any rate of interest, multiply te principal by the number of days and divide as follows :-
it3 per cent., by............................ 120 At 9 per cent., by.......... ....... ......... 40

It 4 per cent., by. ................................ 90
At 5 per cent., by . . . . . . . . . . . . . . . . . . . . . . . . . 72
at 6 per cent., by ......... . ............. ..... 60
at 7 per cent., by ................... ........... 52
at 8 per cent., by 45

At 10 per cent., by ............................... 36
At 12 per cent., by............................... 30
At 15 per cent., by............................... 24
At 20 per cent., by................................ 18

\section*{Sin 2lmuging Table.}

There is a good deal of amusement in the following magical table of figures, It will onable you to tell how old the young ladies are. Just hand this table to a young lady, and request her to tell you in which column or columns her age is contained, and add together the figures at the top of the columns in which her age is found, and you have the great secret. Thus, suppose her age is 17, you will find that number in the first and fifth columns; add the first figures of these two columns.

Here is the magic table:
\begin{tabular}{lrrrrr}
\(\mathbf{1}\) & 2 & 4 & 8 & 16 & 32 \\
3 & 3 & 5 & 9 & 17 & 33 \\
\(\mathbf{5}\) & 6 & 6 & 10 & 18 & 34 \\
7 & 7 & 7 & 11 & 19 & 35 \\
9 & 10 & 12 & 12 & 20 & 36 \\
11 & 11 & 13 & 13 & 21 & 37 \\
13 & 14 & 14 & 14 & 22 & 38 \\
15 & 15 & 15 & 15 & 23 & 39 \\
17 & 18 & 20 & 24 & 24 & 40 \\
19 & 19 & 21 & 25 & 25 & 41 \\
21 & 22 & 22 & 26 & 26 & 42 \\
23 & 23 & 23 & 27 & 27 & 43 \\
25 & 26 & 28 & 28 & 28 & 44 \\
27 & 27 & 29 & 29 & 29 & 45 \\
29 & 30 & 30 & 30 & 30 & 46 \\
31 & 31 & 31 & 31 & 31 & 47 \\
33 & 34 & 36 & 40 & 48 & 48 \\
35 & 35 & 37 & 41 & 49 & 49 \\
37 & 38 & 38 & 42 & 50 & 50 \\
39 & 39 & 39 & 43 & 51 & 51 \\
41 & 42 & 44 & 44 & 52 & 52 \\
43 & 43 & 45 & 45 & 53 & 53 \\
45 & 46 & 46 & 46 & 54 & 54 \\
47 & 47 & 47 & 47 & 55 & 55 \\
49 & 50 & 52 & 56 & 56 & 56 \\
51 & 51 & 53 & 57 & 57 & 57 \\
53 & 54 & 54 & 58 & 58 & 58 \\
55 & 55 & 55 & 59 & 59 & 59 \\
57 & 58 & 60 & 60 & 60 & 60 \\
59 & 59 & 61 & 61 & 61 & 61 \\
61 & 62 & 62 & 62 & 62 & 62 \\
63 & 63 & 63 & 63 & 63 & 63
\end{tabular}

ANOTHER METHOD,-Young ladies of a marriageable age do not like to tell how old they are, but you can find out by following the subjoined instructions, the young lady doing the figuring. Tell her to put down the number of the month in which she was born; then to dguring. Tell her to put down the number of the montitiply it by 50 ; then to add her age ; then to subtract 365 ; then to add 115 ; then ask her to tell you the amount she has left. The two figures to the right will denote her age, and the remainder the month of her birth. For example the amount is 822 , she is twenty-two years old, and was born in the eighth month (August).

\section*{Fate of the Apostles.}

St. Matthew is supposed to have suffered martyrdom or was s'ain with the sword at the city of Ethiopia

St. Mark was dragged through the streets of Alexandria, in Egypt, till he expired.
St. Luke was hanged upon an olive tree in Greece
st. John was put into a caldron of boiling oil at Rome and escaped death. He afterward died a natural death at Ephesus in Asia.

St. James the Great was beheaded at Jerusalem.
St. James the Less was thrown from a pinnacle or wing of the temple and then buaten to death with a fuler's club

St. Philip was hanged up against a pillar at Hieropolis, a city of Phrygia.
St. Bartholomew was flayed alive by the command of a barbarous king.
St. Andrew was bound to a cross, whence he preached unto the people till he expired.
St. Thomas was run through the body with a lance at Caromandel, in the East Indies,
St. Jude was shot to death with arrows.
St. Simon Zealot was crueifled in Persia.
St, Matthias was first stoned and then beheaded.
St. Barnabas was stoned to death by Jews at Salania.
St. Paul was beheaded at Rome by the tyrant Nero.

\section*{Urests.}

Edward III, originated the custom of conferring crests as military honors in 1333. The custom, however, of adopting the figure of some animal as a cognizance is of great antiquity. Herodotus ( \(\mathbf{I} \mathbf{1 7 1}\) ) attributes to the Darians the invention of crests for helmets, devices for shiplds, ant handles for bucklers, Alexander III, (The Great) is said to have assumed a ram's head as his device, and Julius Cæsar a star. Richard I. of England is believed to have been the first to revive the practice, as his image on a seal of the period is represented in a helmet adorned with a sprig of the plantagenista, or broom, from which the name of his family was derived. The use of crests must have been widely spread during the crusades, in order to render it possible to distinguish between the multitude of knights who fought in them, Edmund Crouchback, Earl of Lancaster, is represented with a crest before 1286 ; and Baron de Spencer, in 1296, adorned his horse with the same embellishment. These earlier crests were mostly plumes of feathers.

\section*{The Cap of Liberty.}

The right of covering the head was in early times a mark of liberty ; slaves only going bareheaded. When a slave was given his freedom it was customary for his late master to place on his head a small red cloth cap calted pileus. When this had been done, he was termed libertinus (a freedman), and his name was registered in the city tribes. When Saturninus took possession of the Capitol, in 263 B. O., he hoisted a cap on the top of his spear, to indicate that all slaves who joined his standard should be free. When Marius incited the slaves to take up arms against Sylla, he employed the same symbol ; and when Casar was murdered the conspirators marched forth in a body, with a cap elevated on a spear in token of liherty. The Goddess of Liberty in the Aventine Mount was represented as holding in her hand a cap, the symbol of freedom. In France, the Jacobins wore a red cap; in England a blue cap with a white border, and the inseription " liberty" in letters of gold is used as a symbol of the constitutional liberty of the nation, and Britannia is sometimes represented as holding such a cap on the point of her spear.

\section*{THE CANADIAN BALLOT SY8TEM.}

What is termed the Ballot System, the professed purposes of which are to secure the secrecy of the ballot and prevent the intimidation or corrupting of the voter, in its substantial requirements provides as follows: Ballots are to be provided at public expense; none but these ballots are to be used; on them are to be printed the names of all candidates who are nominated a short period prior to the election; the ballots are to be distributed only by sworn ballot clerks, at the polls to voters, and for actual and immediate use in voting; tho voter is allowed five minutes in which to retire into a booth conveniently arranged, where he secretly marks his choice of candidates upon the face of the ballot. Having done this he proceeds directly to the ballot-box, and without exposing the face of the ballot, or communicating with any one, deposits the ballot as his vote. For the beneflt of the blind and illiterate, such a voter is permitted to select one of the two ballot elerks, who, under oath of fidelity and secrecy, assists him to mark his ballot.

\section*{SCRUTLV D'ARRONDISSEMENZ.}

This is the mode of voting now used in France. The arrondissement is equivalent to one constituency here. Any number of persons may be voted for provided they have made a formal declaration of their willingness to act if elected, though only one member is returned. To be successful the elected member must poll more votes than those of all other candidates added together. This rarely happens, and a second ballot takes place, when the candidate who polls the highest number is returned.

\section*{SCRUTIN DE LISTE,}

The idea of this mode of voting originated with the Iate M. Gambetta, A district was formed comprising a certain number of arrondissements, the district returning a number of members equivalent to that which the arrondissement collectively would return: e.g., assume a district contained twenty arrondissements, it would return twenty members, and each voter could vote for twenty candidates.

The polltical idea of the Scrutin do ifste is to destroy the loeal influence which prevails in a local area of arrondissement, and to give predominating power to a list of names nominated by a popular man such as Gambetta, or (for a time) Boulanger. The political power gained by the latter in the only election in which "Scrutin de liste" was used, caused the mode of "Scrutin d'arrondissement " to be reverted to.

\section*{Wanlt of exngland.}

The formation of the Bank took place in 1694 , in the reign of William III. Its principal profector was Mr. William Paterson, an able Scotch'tinancier, who was afterwards engaged in the il fated Darion enterprise. The scheme was brought about through the necessities of the King and government, who found the credit of the nation destroyed by the profligate Charles II., who had seized upon the gold lodged with the Government for safe keeping. King William finding it impossible to borrow money to carry on his wars, found it necessary to evtablish a national bank, and the formation of the Bank of England was brought forward and carried. The bank, by its charter, made advances to the Government, and in return became sole keeper of the Government balances, and the only joint stock bank permitted to issue notes in or near London. The formation of other joint stock banks in England dates from 1826, when the financial disasters of the preceding year, attributed to the bad management of the private county banks, enabled the ministry to force the Bank of England to give up some of the privileges of its charter. It was agreed that joint stock banks should be formed beyond a radius of 65 miles from London. The Bank's Charter gave the Bank of Engand the exclusive privilege of issuing notes payable on demand, but it did not give it the exclusive privilege of receiving deposits. The note circulation of the Bank is about 25 millions. The management and government of the Bank is in the hands of a Governor and twenty-four directors, who are elected between the 25 th March and the 25th April in each year. They must be natural-born British subjects, and have in their own hames, for their own use severally, viz: \(£ 4,000\) for Governor, \(£ 3,000\) Deputy Governor, and each director 82,000 of the capital stock of the Corporation. And each elector must be possessed of tr00 in his own name to have a vote. In 1797 there was a crisis, and the bullion in the Bank's raults in February had fallon to \(£ 1,272,019\). A run was expected on Monday, and the Government stepped in and issued an Order-in-Council prohibiting the directors from paying their notes in cash until the sense of Parliament should be taken on the subject. And Parliament continued the restriction till six months after the signing of a definite treaty of peace, In 1817 the paper of the Bank of England had nearly come to a par with gold. In 1825 the Bank had to free more troubles through spreading circulation and lost eight millions. Since 1844 the convertibility of the Bank of England notes has been perfectly maintained, In 1833, when the charter was renewed, the Bank of England notes were made legal tender everywhere in England except at the Bank. The Bank transacts the whole business of the Goverument, "She acts not only," says Adam Smith, " as an ordinary bank, but as a great eugine of state."

\section*{Soldler's Fitnerat.}

Why three volleys are fired over the grave of a soldier? Three volleys are fired over the grave of a soldier in honor to the Holy Trinity, just as in baptism people are baptised in the name of the Father, Son, and Holy Ghost. The volleys are fired after the solemn words, "Earth to earth, ashes to ashes, dust to dust."

\section*{The Regal Purple.}

Purple became the Imperial color because of its enormous cost and rarity. The only purple known to the ancients was the Tyrian purple, which was obtained in minute quantities only from a Mediterranean species of shellfish called the murex. In the time of Cicero wool, double-dyed with this color, was so excessively dear that a single pound weight cost a thousand denarii, or about \(\$ 275\). A. single murex only yielded a líttle drop of the secretion, consequently very large numbers had to be taken in order to obtain enough to dye even a small amount of wool. Amongst more than one of the nations of antiquity it was death for any one but the sovereign or supreme judges to wear garments dyed with Tyrian purple. Upon the accession of Julius Cæsar a law was passed forbidding any private person to wear it.

\section*{The Finest Harbor in the World.}

This distinction has been claimed for the harbors of New York, Rio Janeiro, Halifax, San Francisco, and Sydney. Though not the largest, the last-named may be, perhaps, considered the finest of these when their various advantages are compared. The two great requisites of a harbor (adequate depth both of entrance and interior being assumed) are accessibility and shelter from the violence of waves. Port Jackson, as the Sydney harbor is properly termed, possesses both these requirements to perfection, the promontories and small bays with which its interior is broken up affording complete protection to shipping in all weathers, The entrance from the Pacific Ocean is more than one mile in breadth, and vessels drawing as much as 27 ft . can enter at low water to this magnificent harbor, which has a total water frontage of at least 110 miles. In many parts vessels of the largest size lie close in shore, a material advantage which has been greatly utilized by the erection of wharves and warehouses. About a mile and a quarter from the entrance to the harbor is the Mousquarrie Lighthouse, erected on cliffs 268 ft above the level of the sea, from which an electric light flashes its rays for thirty miles across the ocean.

\section*{The "Greenroom" of a Theatre.}

The green-room of a theatre is the waiting or retiring room for the actors engaged in a piece while off the stage, painted greph, in order to relieve the eye from the glare of the stage lights,
"For the first time in my life, I found myself in the 'green-room' of a theatre. It was literally a greenroom, into which light was admitted by a thing like a cucumber frame at one end of it. It was matted, and round the walls ran a bench covered with faded green stuff, whereupon the dramatis personce deposited themselves until called to go on the stage."-" Gilbert Gurney."

\section*{Iegal lyintg.}

The forms of law which govern civil contracts and business intercourse are distinguished as statute and common. Statute law is the written law of the land, as enacted by Parliament and Provincial Legislature. The common law is grounded on the general customs of England, and includes the law of God, the law of nature, the principles and maxims of the law and the dedisions of the superior courts. It overrides both the canon and the civil law where they go beyond or are inconsistent with it.

To the man involved in litigation the best advice is to go to the best lawver he can find. But anounce of prevention is worth a pound of cure, and the purpose of the following pages is to furnish the ounce of prevention. Knowledge is power in nothing so much as in business law, especially since the law presumes that no man is ignorant of the law.

\section*{BUSINESS LAW IN BRIEF.}

Ignorance of the law excuses no one.
An agreement without consideration is void,
Signatures made with a lead pencil are good in law.
The act of one partner binds all the others in matters connected with the partnership business.

A contract made with a minor cannot be enforced against him. A note made by a minor is roidable.

A contract made with a lunatic is void.
Principals are liable for the acts of their agents done within the scope of their authority.
Each individual in a partnership is liable for the whole amount of the debts of the firm.
A note which does not state on its face that it bears interest, will bear interest, only after due.

A lease of land for a longer term than one year is void unless in writing.
Anindorser of a note is exempt from liability if notice of its dishonor is not mailed or served within twenty-four hours of its non-payment.

In case of the death of the principal maker of a note the holder is not required to notify a
surety that the note is not paid, before the settlement of the maker's estate.
If no time of payment is specified in a note it is payable on demand.
An indorser can avoid liability by writing " without recourse" beneath his signature.
A cheque indorsed by the payee is evidence of payment in the drawer's hands.
An outlawed debt is revived should the debtor make a partial payment.
Want of consideration - a common defense interposed to the payment of negotiable paper -is a good defense between the original parties to the paper ; but after it has been transferred before maturity to an innocent holder for value it is not a defense.

Negotiable paper, payable to bearer or indorsed in blank, which has been stolen or lost, cannot be collected by the thief or finder, but a holder who receives it in good faith before maturity, for value, can hold it against the owner's claims at the time it was lost.

Sometimes the holder of paper has the right to demand payment before maturity ; for instance, when a draft has been protested for non-acceptance, and the proper notices served, the holder may at once proceed against the drawer and indorsers.

If a note or draft is to be paid in the country where it is made, the contract will be governed by the laws of that country. Marriage contracts, if valid where they are made, are valid everywhere. Contracts relating to personal property are governed by the laws of the place where made ; those relating to real estate are governed by the laws of the place where the land is situated.

If negotiable paper, pledged to a bank as security for the payment of a loan or debt,falls due, and the bank fails to demand payment and have it protestet when dishonored, the bank is liable to the owner for the full amount of the paper.

\section*{AGREEMENTS AND CONTRACTS.}

A contract or agreement is where a promise is made on one side and assented to on the other, or where two or more persons enter into engagement with each other by a promise on either side. In a written contract assent is proved by the signature or mark. In verbal agreements it may be given by a word or a nod, by shaking of hands, or by a sign. The old saw, "Silence gives consent," is often upheld in law.

Persons under age are incompetent to make contracts, except under certain limitations. Generally such persons are incapable of making binding contracts,

Don't make a contract with a person of unsound mind or under the influence of liquor, or otherwise under restraint of liberty, mind or body. Use caution in making contracts with an illiterate, blind or deaf and dumb person, and see to it that witnesses are present.

Don't put a forced construction on a contract.
Don't suppose that you can withdraw a proposition made in writing and sent by mail after the party to whom it was made has mailed an unconditional acceptance.

Don't suppose that a conditional acceptance of a proposition is binding on the party mak. ing the proposition.

Don't forget that the courts will construe a contract according to the law prevailing where it was made.

Don't draw your own agreement. Get a lawyer to do it.
Don't sign an agreement unless you have carefully weighed its provisions, which should all be fixed and certain,

\section*{NOTES AND NEGOTIABLE PAPER.}

The superstructure of business as it exists to-day rests on the broad foundation of confl-dence-the result of what may be called the evolution of commerce, and the principal stages in tbis evolution are an interesting study. First, there was only barter in kind, as still practised among savages-for example, the exchange of a bushel of corn for a handful of arrow-heads, Theu came the introduction of money as a medium of exchange; and to-day we have the sub-
'itution of negotiable paper as documentary evidence of indebtedness, including promissory aotes, due bills, drafts, cheques, certificates of deposit, bills of exchange, bank bills, and all other evidences of debt, the ownership of which may be transferred from one person to another.

The mere acknowledgment of debt is not sufficient to make negotiable paper ; the promise of payment or an order on some one to pay is indispensable. This promise must be for money only. The amount must be exactly specified. The title must be transferable. This feature must be visible on the face of the paper by the use of such words as "bearer" or "order."

A written agreement, signed by one person, to pay another, at a fixed time, a stated sum of money, is a promissory note. It becomes negotiable by being made payable to an order onsome one or to bearer. As it is a contract, a consideration is one of its essential elements, Yet, although it be void a s between the two first parties, being negotiable and coming into the hands of another persou who gives value for it, not knowing of its defect, it has full force and may be collected.

The date is of great consequence. In computing time, the day of date is not counted, but it is the fixed point beginning the time at the end ot which payment must be made. Omission of the date does not destroy a note, but the holder must prove the time of its making. The promise to pay must be precise as to time which the note is to run. It must be at a fixed period, or couditional upon the occurrence of something certain to happen, as "at sight," "five days after sight," "on demanu," "t three months after date," "ten days after the death of Johu Doe." The time not being specified, the note is considered "'payable on demand."

The maker, the person who promises and whose signature the note bears, must be competent, Insane people and idiots are naturally, and minors may be legally, incompetent. The maker is responsible, and binds himself to pay the amount stated on the note at its maturity. He ueed not pay it before it becomes due ; but should he do so and neglect to cancel the note, he would be again responsible, if any other person, without knowledge of such payment, acquired it for value before maturity. Even a receipt for payment from the first payee would not stand good against the subsequent holder.

The payee is the person in whose favor the note is drawn-the legal holder, the person to whom the money must be paid. When a note is made payable simply to bearer, without naming the payee, any one holding the note honestly may collect.

A subsequent party, one who comes into possession of the note after the original holder, has a better claim than the first one, for the reason that between the maker and the first payee there may have been in the contract some understanding or conuition militating against the payment when it would become due but the third person, knowing nothing of this, gives his value and receives the note. The law will always sustain the subsequent party.

The indorser is held responsible if the maker fails to pay when the note arrives at maturity, A note payable to order must be indorsed by a holder upon passing it to another, and, as value has been given each time, the last holder will look to his next preceding one and to all the others.

A note, being on deposit as collateral security, becoming due, the temporary holder is the payee and \(m\) : st collect.

An indorsement is a writing across the back of the note, which makes the writer responsible for the amount of the note. There are various forms of indorsement,
1. In blank, the indorser simply writing his name on the back of the note.
2. General, or in full, the indorser writing above his signature "Pay \(\qquad\) " or "Pay or order."
3. Qualified, the words " without recourse" being used after the name of the pavee in the indorsement

4, "onditional, a condition being stated, as: "Pay ————, unless payment forbidden before maturity."
5. Restrictive, as : "Pay \(\qquad\) only."
The blank indorsement, the full indorsement and the general indorsement are practically the same ; each entitles the holder of the note to the money, and to look to the indorser for payment if the maker of the note defaults, It has even been held that in a general indorsement the holder had the right to fill in the words "or order" if he saw fit. The qualified indorsement releases the indorser from any liability in case the maker of the note defaults. The conditional and restrictive indorsements are used only in special cases. Each indorser is severally and collectively liable for the whole amount of the note indorsed if it is dishonored, provided it is duly protested and notice given to each. The indorser looks to the man who indorsed it before him, and so back to the original maker of the note. As soon as a note is protested, it is vitally necessary that notice should be sent to each person interested at once.

To bs on the safe side, it is well to see to it that any note offered for negotiation-
Is dated correctly;
Specifies the amount of money to be paid;
Names the person to whom it is to be paid ;
Includes the words "or order" after the name of the payee, if it is desired to make the note negotiable ;

Appoints a place where the payment is to be made ;
And is signed by the maker or his duly authorized representative \({ }_{5}\)

Professional ag pasiness for a comp brokers. 3. Factor

The general rula is that every person of sound mind, and not otherwise restrained by law, nay enter into a contract ot partnership.
There are several kinds of partners :
1. Ostensible partners, or those whose names are made public as partners, and who in realty are such, and who take all the benefits and risks.
2. Nominal partners, or those who appear before the public as partners, but who have no real interest in the business.
3. Dormant, or silent partners, are those whose names are not known or do not appear as partners, but, who, nevertheless, have an interest in the butiness.
4, Special, or limited partners, or those who are interested in the business only to the mount of the capital they have invested in it.
\({ }_{5}\). General partners, who manage the business, while the capital, either in whole or in part, 4supplied by a special partner or partners. They are liable for all the debts and contracts of the firm.
A nominal partner renders himself liable for all the debts and contracts of the firm.
A dormant partner, if it becomes known that he has an interest, whether creditors trusted te firm on his account or not, becomes liable equally with the other partners.
A person who lends his name as a partner, or who suffers his name to continue in the firm ther he has actually ceased to be a partner thereof, is still responsible to third persons as a artner.
A partner may buy and sell partnership effects ; make contracts in reference to the business at the firm ; pay and receive money; draw, and indorse, and accept bills and notes; and all kets of such a nature, even though they be upon his own private account, will bind the other partners, if conuected with matters apparently having reference to the business of the firm, and transacted with other parties ignorant of the fact that such dealings are for the particular partner's private accoust. The representation or misrepresentation of any fact made in any partnership transaction by one partner, or the commission of any fraud in such transaction, will bind the entire tirm, even though the other partners may have no connection with or mowledge of the same.
If negotiable paper of a firm be given by one partner on his private account, and in the wurse of its circulation pass into the hands of a bona fide holder for value, without notice or knowledge of the fact attending its creation, the partnership is bound thereby.
If no time be fixed in articles of co-partnership for the commencement thereof, it is presumed commence from the date and execution of the articles. If no precise period is mentioned for continuance, a partner may withdraw at any time, and dissolve such partnership at his pleasure.
The death of a partner dissolves the partnership, unless there be an express stipulation hat, in such an event, the representatives of the deceased partner may coutinue the business ir: ponection with the survivors, for the benefit of the widow and children.
A partnership is dissolved by operation of law ; by a voluntary and tona fide assignment by ny partner of his interest therein; by the bankruptey or death of any of the partners, or by a rar between the countries of which the partners are subjects,
Immediately after a dissolution, notice of the same should be published in the papers, and ispecial notice sent to every person who has had dealings with the firm. If these precautions yenot taken, each partner will still continue liable for the acts of the others to all persons who bave had no notice of such dissolution.
Don't enter into a partnership without carefully drawn articles.
Don't forget that a partner may be called upon to make good partnership losses with his adividual property, and that each partner may be held for the acts of the other partners as rell as for his own.
Don't enter a firm already established unless you are willing to become responsible for its lebts.
Don't do anything out of the usual run of busines without the consent of your artners.
Don't mix private matters with pertnership affairs, and don't continue in a partnership here trust and confidence are lacking.
On't dissolve a partnership without due public notice or without designating a member to ettle all matters outstanding.

\section*{AGENCY AND ATTORNEY.}

By agency is meant the substitution of one person by and for another, the former to transact usiness for the latter. An agency may be established by implication-an express agreement rith \(\boldsymbol{P}\). person that he is to become the agent of another not being necessary-or verbally, or by riting, A verbal creation of agency suffices to authorize the agent to make a contract even in ases where such contract must be in writing.
Agency is of three kinds : \&pecial, general and professional. A special agency is an authority sercised for a special purpose. If a special agent exceed the limits of his authority, his prinspal is not bound by his acts.
A general agency authorizes the transaction of all business of a particular kind, or rowing out of a particular employment. The principal will be bound by the acts of a general gent, though the latter act contrary to private instructions, provided he keep, at the same ume, within the general limits of his authority
Professional agents are those licensed by the proper authority to transact certain kinds of asiness for a compensation. The following are among this class of agents: 1. Attorneys. 2. srokers. 3. Factors. 4. Auctioneers. 5. Masters of Ships,

In regard to the subject of an agency, the general rule is, that whatever a man may do nis own right he may also transact through another. Things of a personal nature, imply personal conidence on the part of the person possersing them, cannot be delegated.

Infants, lunatics, idiots, aliens, belligerents, and persons incapable of making legal contrac cannot act as principals in the appointment of agents. Infants may, however, become prin pals in certain cases chiefly by subsequent ratification or for necessaries.

Agency may be terminated in two ways: (1) by the act of the principal or agent ; (2) operation of law. In the latter case, the termination of the agency is effected by lapse of tim by completion of the subject-matter of the agency, by the extinction of the subject-matter, by the insanity, bankruptcy or death of either party.

Don't do through another what would be illegal for you to do yourself.
Don't lose any time in repudiating illegal acts of your agent.
Don't make an illegal act of your agent's your own by accepting the bene thereof.

Don't transact business through an agent unless he can show that he stands in his pr cipal's stead in the matter in hand.

Don't, as agent, appoint sub-agents without the consent of your principal.
Don't go beyond your authority in an ageney unless you are willing to become personal responsible.

Don't accept an agency, or act as an attorney in fact, in complicated matters unless yo powers are clearly defined in writing.

\section*{LANDLORD AND TENANT.}

If there is no agreement as to time, the tenant as a rule holds from year to year,
A tenant is not responsible for taxes, unless it is so stated in the lease.
The tenant may underlet as much of the property as he desires, unless it is expressly fo bidden in the lease.

A husband cannot make a lease which will bind his wife's property.
A lease given by a guardian will not extend beyond the majority of the ward,
A new lease renders void a former lease.
In case there are no writings, the tenancy begins from the day possession is taken; whe there are writings and the time of commencement is not stated, the tenancy will be held commence from the date of said writings,

Where a tenant assigns his lease, even with the landlord's consent, he will remain liablef the rent unless his lease is surrendered or cancelled.

There are many special features of the law of landlord and tenant in relation to agrict tural tenancy, Generally an outgoing tenant cannot selı or take away the manure. A tenant who estate has terminated by an uncertain event which he could neither foresee nor control entitled to the annual crop which he sowed while his estate continued, by the law of emblemen He may also, in certain cases, take the emblements or annual profits of the land after tenancy has ended, and unless restricted by some stipulation to the contrary, may remove su fixtures as he has erected during his occupation for convenience, profit or comfort ; for, general, what a tenant has added he may remove, if he can do so without injury to the p mises, unless he has actually built it in so as to make it an integral part of what was the originally.

The following are immovable fixtures : Agricultural erections, fold-yard walls, cart hous barns fixed in the ground, beast house, carpenter shop, fuel house, pigeon house, pineries su stantially fixed, wagon house, box borders not belonging to a gardener by trade, flowers, tre hedges, ale-hou e bar, dressers, partitions, locks and keys, benches affixed to the house, stat erected as an ornament to grounds, sun dial, chimney piece not ornamental, closets affixed the house, conduits, conservatory substantially affixed, doors, fruit trees if a tenant be not nurseryman by trade, glass windows, hparths, millstones, looms substantially affixed to the flo of a factory, threshing machines fixed by bolts and screws to posts let into the ground.

Don't depend on promises of a landlord unless they are embodied in the lease.
The landlord's right against a subtenant is limited to the amount of rent due to the tena by the subtenant.

Don't make such improvements in premises occupied by you as the law would regard immovable fixtures, unless you are willing to turn them over to the landlord when Jour lea expires. A building erected on foundations sunk into the ground would become part of \(t\) realty and thus belong to the landlord.

Don't think, however, that you have no right to remove trade fixtures erected by you,
Don't accept less than thirty days' notice when you rent by the month.
Don't forget that where premises are let for illegal use the law will not aid you in collecti arrears for rent.

\section*{LAW RELATING TO FARMS, FIC.}

In a deed to agricultural property the boundaries should be clearly determined. The que tion, What does the farmer get? is answered by these boundaries, and the deed to a farm alwa includes the dwelling houses, barns and other improvements thereon belonging to the granto even though these are not mentioned. It also conveys all the fences standing on the farm, bu all might not think it also included the fencing-stuff, posts, rails, etc., which had once been us in the fence, but had been taken down and piled up for future use again in the same place. B new fencing material, just bought, and never attached to the soil, would not pass. So piles hop poles, stored away, if once used on the land, and intended to be again so used, have be considered a part of it, but loose boards or scaffold poles, merely laid across the beams of a ba and never fastened to it, would not be, and the seller of the farm might take them away. Stan gated.

trees, of course, also pass, as part of the land ; so do trees blown down or cut down, and still tin the woods where they fell, but not if cut and corded up for sale; the wood has then be-
opersonal property. te use, the buyer ordinarily, in the absence of any contrary agreement, takes that also as befing to the farm, though it might not be so if the owner had previously sold it to some other fiy, and had collected it together in a heap by itself, for such an act might be a technical rrance from the soil, and so convert real into personal estate; and even a lessee of a farm fold take away the manure made on the place while he was in occupation. Growing crops also sby the deed of a farm unless they are expressly reserved, and when it is not intended to sey those it should be so stated in the deed itself; a mere oral agreement to that effect pild not be valid in law. Another mode is to stipulate that possession is not to be given until me future day, in which case the crops or manures may be removed before that time.
An adjoining road is, to its middle, owned by the farmer whose land is bounded by it, unless are are reservations to the contrary in the deeds through which he derives title. But his pership is subject to the right of the public to the use of the road.
If a tree grows so as to come over the land of a neighbor, the latter may cut away the parts tich so come over, for he owns his land and all that is above or below it. If it be a fruit tree may cut every branch or twig which comes over his land, but he cannot touch the fruit which 3 to the land. The owner of the tree may enter peaceably upon the land of the neighbor and te up the branches and frui

\section*{THE LAW OF FINDING.}

The general rule is that the finder has a clear title against everyone but the owner. The prietor of a hotel or a shop has no right to demand property of others found on his premises. ch proprietor may make regulations in regard to lost property which will bind their employees they cannot bind the public. The finder has been held to stand in the place of the owner, so athe was permitted to prevail in an action against a person who ound an article which the intiff had originally found, bu'subsequently lost, py statute. Receivers of articles foungard articles lost, unless those rights are conferred by statute. Receivers or articlesto to keep ststees for the owner or finder. They have no power in the absence of special statute to keep article against the finder, any more than the finder has to retain an article against the ner.

\section*{DIVORCE.}

In Canada divorce can only be granted by the Dominion Parliament. It is granted for the me causes as recognized by English law. Adultery and impotence are two of the chief causes which divorce is granted. A foreign divorce between British subjeots for causes recognized English law will be recognized in Canada as binding and legal. A foreign divorce for causes recognized by English law between British subjects will not be recognized.

\section*{General Hints.}

A lease is not terminated by the death of either party.
A man is bound to support his mother-in-law, except in the following cases :-
(1.) When she contracts a second marriage.
(2.) When his wife, through whom the affinity existed, is dead,

The obligation is reciprocal as between mother-in-law and son-in-law, under like restrictions the above.

A minor can apprentice himself to a trade, but if the engagement proves to his detriment, he have it cancelled.
A life-insurance poliey, made by a husband in favor of his wife or children, is absolutely nssignable except for the purpose of raising money to pay a limited number of premiums to sent the forfeiture of the policy, and cannot be seized for the husband's debts, neither can be transferred by him.
Goods pledged to a pawnbroker are forfeited unless redeemed within one year from the date
A wil lcan beproved any time after death, though it takes effect at the moment of the testa'rs decease.
A bequest is invalidated should the legatee be a formal witness to the will,
A verbal death-bed bequest is not valid except as regards trifling gifts delivered at the
In Ontario and the Maritime Provinces, the executors or administrators of a will may be al-
wed, in addition to out-of-pocket expenses, a commission handled by them not exceeding five r cent.
In Quebec and Manitoba they receive no remuneration.
A tradesman is not legally compelled to sell goods at the price displayed upon them in his fadow.
1. O. U.'s are admissible as prima facie evidence of debt, Amises.
A guarantee for payment of debt must be in writing.
An quebloyer is not compelled to furnish an employee with a reason for his dismissal where an employer is not legal notice.
A person knowingly giving e false character to an applicant for a situation is liable to an ttion.
Waste land by the side of co road does not belong to the adjoining free holder, but is vested
the Crown.

Copper money is only a legal tender to the extent of twenty dive cents, and silver to value of ten dollars.

A person may be arrested for 'ebt and held to bail, (1) When he is about to abscond from limits of Ontario and Quebec, with intent to defraud his creditors. (2) When ho is guilty secretion of his property with like intent.

A real estate purchase or saie is always subject to any registered liens against it which \(n\) exist at the time of transfer. Therefore the records should be searched by an intend purchaser.

No party to a contract should draw his own agreement; a lawyer should do it,

\section*{CRIMINAL LAW,}

You cannot lawfully condone an offense by receiving back stolen property.
The exemption of females from arrest applies only in civil, not in criminal matters.
Every man is bound to obey the call of a constable for assistance in making an arrest.
Embezzlement can be charged only against a clerk or servant, or the officer or agent 0 corporation.

Drunkenness is not a legal excuse for crime.
In the case of assault it is only neccssary to prove an "offer or attempt at assault," tery presumes physical violence.

A police officer is not authorized to make an arrest without a warrant anless he is ane witness of the offense for which the arrest is made.

An accident is not a crime, unless criminal carelessness can be proven. A man shooting a burglar and killing a member of his family is not a murderer. But a man who, while engag in committing a crime, accidentally kills any person, is held guilty of murder.

Burglary can be committed only in the night time.
False swearing is perjury in law only when wilfully done. It is a felony to bring sto, money into Canada, knowing it is stolen.

Under the Extradition treaty between Canada and the United States, extraditable offen are: Murder, piracy, arson, robbery, forgery, the utterance of forged paper, manslaught when voluntary ; counterfeiting, embezzlement, larceny, receiving stolen property, knowing to be stolen ; fraud by a bailee, banker, agent, trustee, or director or member or officer of acc pany, made criminal by the laws of both countries ; perjury, or subornation of perjur rape,abduction, child-stealing, kidnapping, burglary, housebreaking or shopbreaking, revc and certain other offenses aboard ship, slavery.

\section*{HINTS TO TESTATORS, EXECUTORS, \&c.}

\section*{(The following 8 paragraphs relate to the law in the Province of Quebec only.) \\ Who can make a Will.}

Every person of sound intellect can make a will, and may revoke it or alter it at any tin By no agreement can he divest himself of this right except by contract of marriage. The may be of the whole property or only part of it, so that a person may die partly testate partly intestate. A married woman can always make a will without the authority or intery tion of her husband.

Minors and persons Interdicted for imbecility, insanity or madness cannot bequeath will even with assistance of their tutors and curators.

\section*{Different Kinds of Wills.}

A will may be made in notarial form, and is then kept on record by the Notary, It in also be made in writing, either by testator or anybody else, but must be signed by testatos presence of two witnesses, who also sign as such. Females may be witnesses, but not ming If the testator cannot sign, he may make his mark, or another person may make it in his pr ence and under his express direction, and the two witnesses attest and sign the will immediate Deaf mutes are capable of understanding the meaning of a will and the manner of making of and all other persons, whether literate or not, whose infirmity has not rendered them incap ble of so understanding and expressing their intentions, may make a will in this form, p vided their intention and the acknowledgment of their signature or mark are manifested presence of witnesses, Legacies made to any of the witnesses, or to the husband or wife of 2 of the witnesses, or any of their relations in the first degree, are void, but do not annul other provisions of the will. A person may also make a holograph will, which is a will whol written and signed by the attestator, and requires neither notaries nor witnesses. De mutes, who know how to write, may make a will in this manner.

\section*{Who Pays the Testator's Debis?}

When a testator gives the whole of his property to one or more persons, without defini the share of each, they are universal legatees. When he bequeaths an aliquot part of his estat that constitutes a legacy by gene al title. All other legacies are by particular title, T universal legatees are liable for the debts of the estate, and so are the legatees by genet title, each acc rding to hisshare. A legatee by particular title is not liable unless there not enough in the rest of the estate to pay the debts, because the creditors of the tostator mu be paid in preference to the legatees. If there be no will, the heirs at law who accept the estateas re-ponsible for the debts. If there be doubts as to the solvency of an estate, the univer legatees or legatees by general title, or the heirs who ara called to it by law, must be careful accept under benefit of inventory, as otherwise they will have to make good the deficit out their own pockets.

\title{
BELL TELEPHONE CO' \\ OF CANNADA.
}

\section*{- HEAD OFFICE \\ 30 St. John St., = MONTRERI.}

This Company will sell its instruments at prices ranging from \(\$ 7\) to \$25 per set. Its " STANDARD BELL TELEPHONE SET" (protected by registered Trade Mark), designed especially for maintaining a perfect service and used by the Company in connection with its Exchanges, is superior in design and workmanship to any telephone set yet offered for sale.

Subscribers to this Company's Montreal Exchange and the public may now obtain telephonic communication over its

\section*{Long Distance Metallic Circuit Lines to Quebec, Ottawa or Sherbrooke,} and intermediate points, the rates for the present being as follows :-

\section*{Executors.}

A testator may name one or more executors, and may give them what powers he chooses. Varried women cannot be executors wishout the consent of ther husbands, and no one can be mompelled to accept the office, but once he accepts he cannot renounce without the authority of is pdge. The executorship lasts for a year and a day unless the testator has otherwise provided.

\section*{Tying up Property.}

The testator cannot tie up his property beyond two degrees from the institute or the person to whom he has bequeathed it. Each generation forms a degree. The third degree has the thoolute disposal of the property.

\section*{Who are Lawful Heirs?}

When there is no will, children or their descendants succeed to their ascendants, without dstinction of sex or primogeniture, and whether they are the issue of the same or different marriages. If there are no descendants, then the parents get half the estate, and the remainder goes to the brothers and sisters and nephews and nieces in the first degree. If there be 10 brothers and sisters or nephews and nieces in the first degree, then the parents divide the state equally between them to the exclusion of all other ascendants; and of there be likethe paternal line and the nearest ascendant of the maternal lie. If th parents have prefiously died, the brothers and sisters and nephows anc nieces in , the first degree exclude the other ascendants and collaterals. The division is made eque'ly am them if they be tll born of the same marriage, but if not, an equal division is made betw, n tho ond those of leceased, paternal and maternal, those of the whule blood sharingth rs and si-ters, nephews the half blood sharing each in his wnes on one side only, they ex lude all the relations of the oth line. Te the deceased have left no issue, nor father nor mother, nor brothers nor sisters. nor phewi nor nieces, in the first degree, and only ascendants in, ne line, the nearest ascendan tokes ne-half of the sucession, and the nearest collateral relation on the other sile get: the other half. If there be no ascendant, the nearest collateral relation of the paternal line gets one-half and the other goes to the nearest of the maternal line. Relations beyond the twelfth degree do not mherit; and in that case the succession belongs to the survivinc corsort. In default of a surviving consort, it falls to the Crown.
The advantage of a holograph will is that it keeps secret th intentions of the testator, but it will not be effectual to dispose of real estate in the oth \(u\) Provinces of Canada, \(\sim r\) in the U.S., or in England, Ireland, or Scotland, where wills in this form are only valid as regards personalty.

Effects of Marriagn on Propesty.
Parties marrying may depart from the general laws of tha Province governing their proprty, as regards rights created by marriage, by ntering into a marriage contract, but they annot do this after the knot is tied. In this contract they make the law for themselves and nay bind themselves by all kinds of agreements not er itrary to public order org id merals, and the contract cannot afterwards be iterc ol rovoked. They cannot in any wa aftul marriage, when there is such contract, depar, , rom the contract even hisb: nd may insure his life for he benefit of other. There is one exception to this rul. The husbr nd may insure assigned to anybody. ie. his wife or children, and such insurance into, th law of the country, which, at the ime, was

If no marriage contract was entered Domicile is where a person has his principal stablishthe domicile of the parties, governs, in England, and at the time had no intention of leaving ment. For instance, if a man married under marriag would be governed by the laws in force there at that time, even if he afterwards came to this country. But if when marrying his intention was to settle in this country and make his domicile here, the law of this Province would govern. In the Province of Quebec, when there is no marriage contract to the contrary, the parties are subjected to legal community of property and legal dower.

\section*{What is Community of Property?}

It consists of all the moveable property which both consorts had when marrying, or which comes to them during marriage by auy title; all the fruits and revenue: received during the marriage ; and all the immoveables they acqure auring that do not fall' into the community are or equivalent title. In general terms the only things that ang and those either of them acquires the immoveables that belonged to the consortsitle. A gift or a legacy of an immoveable to one of the consorts by an ascendaut would be considered as a title equivalent to succession, but not such gift or legacy made by others than ascendants. The property which does not fall into the community is of course the private property of one or other of the debts contracted by the assets must be set the liabilities of the cone wife with his consent, and generally all debts except husband during the community, or by the wife wity of either consort. The entire administration such as are connected with the pris of the husband, so that the only remedy of the wife, in the of the community is in the hement, is to sue for separation of property. event of his gross mismanagement, is death, by separation of property or of bed and board, and

The community is dissolved by out any news of him being obtainable. After its dissoluby disappearance of husband wiorts agreed upon or named by the Court, on the basis of an equal partition is made by experts agres of either consort cannot receive more than his author's share in the partition,

Legal Dower, which also results from the mere act of marriage, when there is no contracf to the contrary, consists of the usufruct for the wife and the ownersmof the marriage and one-half of the immoveables which belonged to the husband at the time of the marriage and

\section*{The Star Almanac.}
of one-half of those which accrued to him during marriage from his father or mother or ot ascendants. This right only can be opened by the death of the husband unle:s the or ont of property being granted.

\section*{WILLS AND BEQUESTS IN ONTARIO.}

The law relating to wills and the distribution of intestate estates differs widely in Province or Quebec and in the Province of Ontario, In the latter Province, and in most of \(t\) ) will be found serviceable,

\section*{The anited 5 tateg of 3 Imerita,}

The United States is a confederation of forty-four Sovereign States, united by a federal and for national objects, the local administration being reserved to each State. The Constitution of September 17, 1787, and subsequent amendments provides for three parate authorities, the Executive, the Legislative and the Judicial.
The Executive is represented by a President elected on the first Tuesday after the first londay in November of each fourth year, who comes into actual oftice on the 4th day of March The succeeding year. He is commander of the national forces, and can veto any law passed fCongress, though his veto may be nullified by a two-thirds majority in each House。 The dministration consists of 8 Ministers chosen by him and holding office at his pleasure, but his soice of a Minister must be ratified by the Senate. A Vice-President is elected at the same me and in the same manner as the President, and is ex-officio President of the Senate, and The for the remainder of the four years term in the event of his death or resignation.
The Legislative power is represented by a Senate of 88 members, who must be 30 years of age lleast and citizens for nine years, two from each State and chosen by the State Legislature for isyears, and by a House of Representatives of 356 members, according to the 1890 census, elected rery second year by the vote of all male citizens over the age of 21 , of the several States of the Cnion duly qualified in accordance with the laws of each State, the franchise not being absolitely universal. The number of members to which each State is entitled is determined by the
monsus taken every 10 years. On the basis of the 1890 census there is one representative to masus taken every 10 years. On the basis of the 1890 census there is one representative to urery 173,900 inhabitants. Such representatives must be at least 25 years of age, and have been aitizens of the United States for 7 years, and reside in the State which elects them.

In Wyoming and Utalh women exercise the franchise.
The Judicial power is confided to a Supreme Court, the members of which are nominated ty the President for life, and consist of a Chief Justice and eight Associates. The appoint-

Each separate State has its own judicial system, usually appointed for a term of years, and
ted by popular vote. dected by popular vote.
The District of Columbia, the Seat of the United States Government, embraces an area of about 70 square miles, and includes the cities of Washington and Georgetown. The district has Mo Municipal Legislative body, and its inhabitants have no right to vote either in National or the President.

\section*{THE MONTREAL BUSINESS COLLEGE} (Established 1864) Corner Victoria Square and Craig Street, Is one of the largest, best equipped and patronized Commercial Educational Institutions in America.
The Commercial Course is thorough in every particular, and has been tested by thousands of Students who are now prominent business men.

The Typewriting and Shorthand Course (in English and French) is popular with all who have availed themselves of its benefits: Many of the former students are now doing the highest class of Stenographic work.

The staff consists of eight permanent teachers, and the Ladies' Department is under the superintendence of experienced Lady Teachers.

Montreal affords superior facilities for observation and openings in business, and these advantages should be kept in view by all who are seeking a commercial education and desire to put it to immediate use. Illustrated Prospectus containing full information sent free. Address

DAVIS \& BUIE, Business College, Montreal, Canada.

The Senate.-Continued.

(a) Win be succeeded by a Republican,
(b) By a Democrat. (d) Re-elected as a Silverite, but will probably act with a Democrat. (c) By a Fusionist,

\section*{THE HOUSW OF REPRESENTATIVES.} Corrected to Nov. 21, 1892.
The House of Representatives of the 53rd Congress will consist of 356 members, probably divided as follows :-Democrats 221, Republicans 121, People's Party 14. At the time this list was compiled no candidate had received a majority for Congress in Rhode Island as the laws of that State require, and second elections will be necessary.

In the following list the names of Democrats are in Italics, those of Republicans in Roman Poople's Party in small cafitals.

Rear Admiral,
" 4
The rates of \(p\) Admiral, \(\$ 9,000\); ders, \(\$ 3,500\).

Congress has constitutional powers to raise and support an army. The President is Comman-er-in-Chief of the Army, Navy, and Militia. The Administration is carried on by a Departpent of War. The number of the standing army in time of peace is limited to 25,000 enlisted ffective non-commissioned officers and men, For military purposes the territory of the United tates is divided into eight districts and three divisions.

In addition to the Tegular army each State has power to raise its own militia from all citiens between 18 and 45 years of age. The total organized militia force numbers over 100,000 hen. In time of war it is calculated the militia force could speedily be raised to seven millions f men.

The pay of a Major-General is \(\$ 7,500\) per annum ; of a Brigadier General, \(\$ 5,500\); of a bolone!, \(\$ 3,500\); of a Lieutenant-Colonel, \(\$ 3,000\); Major, \(\$ 2,500\).

\section*{United States Pensioners.}

The pension list of the United States has grown to enormous proportions, averaging up to late about \(\$ 12,000,000\) per month. The number of pensioners on the list up to the 30 th June, 291, was 673,514 living in the United States, and \(t\) ose in foreign countries on the American Fils, 2,646 , making a grand total of 676,160 . The average annual value of each pension on the rols up to June 30 a h, 1891 , was \(\$ 131.99\). The pension list is made up of discharged and invalid fficers and soldiers of the wars of 1812, Mexico, and the Civil war of 1860, widows and orphans of officers and soldiers of these campaigns killed in action, and 23 widows and daughters of Revolutionary soldiers. Of the grand total of 676,160 , not less than 140,000 are put down as ridows. The State of Ohio has the greatest number on the list, some 75,498 , and the smallest number reside in the newly acquired territory of Alaska, counting up 14. In foreign countries Canada leads with 1,315 , Great Britain and Germany coming next with 495 and 403 respectively. The list is still on the increase, through the manipulations of interested lawyers and politicians, and the drain on the revenue is causing considerable anxiety to the Conservative members of the Administration

\section*{Patent Offlee Procedure.}

Applications for United States patents must be addressed to the Commissioner of Patents, Washington, D.C., and signed and sworn to by the inventor. The invension must not have been in public use or on sale for more than two years prior to the application. The applicant must fufly describe his invention, and distinctly claim those parts which he believes to be new. The application must be illustrated with drawings, when possible. When filed, a first fee of \(\$ 15\) is payable, and a second fee of \(\$ 20\) is exacted if the application is allowed, before the patent will be issued. The patent runs 17 years from date of issue. Extensions can be obtained only by special act of Congress. A pamphlet of rules and forms is distribnted free by the Commissioner of Patents. Suits to enjoin infringement of letters patent are brought by bill in equity in U. S. District or Circuit Courts. The profits realized by an infringer can also be recovered.

RAILWATS.
In the following statement are given the mileage, gross and net earnings of all the railroads in the United States (including Elevated railroads in New York and Brooklyn) for the eight years 1884-1891, inclusive, and deductions therefrom :

\title{
FURNITURE.
}

WHILE returning thanks to our friends and the public in general for the very liberal patronage extended to us for nearly half a century, we would announce that we have Removed into our new Warerooms, Nos. 1849, 1851 and 1853 NOTRE DAME STREET, the front of which is entirely of British Plate Glass, the two large show windows containing two of the largest plates of glass in the world, according to an article which appeared in the Montreal "Star" taken from the Detroit "Free Press."

The interior fittings and arrangement in design throughout are well adapted for the carrying on of the Furniture Business, and being the Oldest House in our Line, and perhaps the only one that has continued for so long a time without interruption, increasing and adding to our stock both in quality and quantity, we are acknowledged by al! to be the Largest and Cheapest House in the Dominion, quality considered.

Our Large Show Windows now contain some of the finest goods we have ever exhibited, and will be changed every week to show the extent, style and quality of our stock, which, to fully describe, would take more space than the small profits at which we are now selling our goods would afford.

A call at our Warerooms will convince all in want of such goods that to purchase from the old-established and so favorably known house of OWEN McGARVEY \& SON will ensure the best goods for the very least money to be found in the city.

Our New Passenger Elevator will be found not only a great convenience, but a positive luxury, in carrying purchasers to any of our six flats of Show Rooms.

\section*{OWEN McGARVEY \& SON, \\ (ESTABLISHED 1843.)}

\section*{The Great Art of biving}

Depends to a certain extent upon quite a number of Subsidiary Arts. Amongst these -to the Ladies at least-the art of shopping is one of the most important.

In their case, it is an inherited aptitude perfected by long experience. Its fullest field of operations in these days is

\section*{The DRY GOODS Store.}

The above "cut " represents an Establishment that has reached the highest stage of development in this branch of business. Regulated by the vital principle of "SUPPLY AND DEMAND," its stock embraces the whole range of DRY GOODS.

Its Departments consist of Gloves, Gents' Furnishings, Hosiery, Underwear, Fancy Wares, Dress Goods, Linens, Shawls, Mantles, Boys' and Children's Clothing, and each section is perennially up to date with the latest novelty. It also manufactures Mantles and Ladies' Cotton Underwear, and executes the finest Tailor-made Dressmaking in the Dominion.

Its cash prices are invariably the lowest in the Market. This firm is pleased to send Samples whenever possible, or to furnish any information by post. Never hesitate to write to the undernoted address :-

\section*{Some 解opular §upersititions.}

Thirteen at Table. - A popular leader of society inviting thirteen guests would be likely to select those whose age exceeded thirty-five. The mathematical chances in favcr of death are that one in thirteen will die within the year.

Walking under a ladder,-It is popularly supposed that ill-luck attends the person passing under a ladder.

Spilling the Salt.-This superstition arises from the idea amongst the ancients, and still true, that the salting of things prevented them from being corrupted. In olden days it was a rare commodity, and therefore the spilling of it was thought to betoken carelessness and extravagance

Marriage in May unlucky. - This superstition arises from the fact that the unfortunate Mary Queen of Scots married the divorced Earl of Bothwell in that month. The following June she was a prisoner in the Castle of the Douglas. Apart from this, there is a Roman superstition, of which we find a record in Ovid, that in those days the comnon people profess it is unlucky to marry in the month of May, It appears that in that month certain ceremonies were observed in connection with the feast of the dead.

Throwing a Slipper,-This superstition dates from B. C., when a defeated chief would take off his shoes and hand them to the victor to show that he yielded up all authority; therefore, when the bride's family throw slippers afier her, the custom denotes their renunciation of authority over her.

St. Swithin was Chaplain to Egbert, King of England. He had charge of the education of King Alfred. In 852 he was Bishop of Winchester. On 2nd July, 862 , he died, and a century after was canonized, and the tradition associated with his name arose from the circumstances said to hove attended the exhumation and removal of his body from the churchyard of Winchester, where he had expressed a desire to be interred, to the Cathedral, which was considered by the Monks a more worthy resting place for the newly canonized one.

The body was to have been transferred on the 15th July, but the proceeding was delayed for 40 days owing to an uninterrupted down-pour of rain throughout that period; hence the common superstition that if rain falls on 15th July it will continue to do so for 40 days.

Meteorologists say that if wet weather sets in about the period of the Summer Solstice it is likely \(t\). continue for a considerable period.

Stumbling presages misfortune.
A hare crossing the path is ur.lucky.
To see a wolf is a good omen.
To meet an old woman is unlucky.
For weddings, May among months, and Friday among days, are shunned.
Sneezing is ominous. The person is considered as possessed for the time, and a form of exorcism is used. A nurse would say, w'ten a child sneezes: "Bless the child,"

Breaking a looking glass foretells a death.
Stumbling when going upstairssignifies that the person will not be married in the year in which the accident occurs.

\section*{Curiosities of Wedlock.}

Wycherly, in his old age, married his servant girl to spite his relations.
Giving a ring is supposed to indicate the eternity of the union, seeing that a circle is endless.

A man got married because he had bought a piece of cheap silk at a sale, and wanted a wife to give it to.

The Russians have a story of a widow who was so inconsolable for the loss of her husband, that she took another to keep her from fretting to death,

Kissing the bride the moment the marriage ceremony ended, though not now prescribed by the Rubric of the Western churches, was formerly an imperative act on the part of the bridegroom.

The early marriage ceremony among the Anglo-Saxons consisted merely of hand fastening, or taking each other by the hand, and pledging each other love and affection in the presence of friends and relatives.

An old adage thus lays down the days for wedlock :-
Monday for wealth, Tuesday for health,
Wednesday the best day of all ;
Thursday for crosses, Friday for losses,
Saturday no luck at all.

\section*{The Opal Superstition.}

There are numerous superstitions attaching to this gem. By the ancients it was supposed to bestow every possible good. In the Middle Ages the same belief was held, and in the early part of the 17 th century the opal was much more valued than in the present day. But by a strange freak of fashion the opal has lost its former glory, and is now accused of bringing illluck. Sir Walter Scott is in a great measure answerable for this. In his "Anne of Geierstein," he mentions that the Mexican opal loses its beauty when exposed to water, and ascribes this to supernatural agency. Hence a notion arose that to wear an opal is unlucky, and that as a love token it shows a continuance or derline of the giver's affections in proportion as the colors are bright or cloudy. Again, whenever it suddenly changed its colors, it was believed that a misfortune was at hand. Some, however, think that the superstition is of Russian origin. If a Russian of either sex or of aly rank should happen to see an opal among goods submitted for purchase, he or she will buy nothing that day, for the opal is, in the judgment of the subjects of purchase, he or she wiment of the "evil eye." A prosaic but a practical explanation of the

opal's evil repute is that it is so often lost when the hand becomes hot, without the owner being aware of his misfortune. The stone grows slightly bigger under the influence of heat, and forces open its gold setting. When it becomes cold again, the gem shrinks to its original size. These processes continue until the setting becomes so enlarged that the stone drops out. It is also said that opals are disliked because they are easily broken, and are therefore not a remunerative investment.

Quebec is \(46 \mathrm{deg} .48 \mathrm{~min}, 30 \mathrm{sec}\). North Latitude ; and \(71 \mathrm{deg} .12 \mathrm{~min}, 15 \mathrm{sec}\), Longitude West of Greenwich, its equivalent in time being 4 hours 44 minutes 49 seconds slower than Greenwich time, to which the 15 minutes and 11 seconds were added to conform to the 5 hour time adopted for our 75th Meridian or time space.

The Time Ball at the Citadel 's dropped every week day at 1 P. M. Standard time. It is then 6 P. M. Greenwich mean time.

Standard time was adopted in 1883. The Continent, from east to west, Atlantic to Pacific, being divided into five spaces, each 15 degrees apart, viz:-60th, 75th, 90th, 10bth and 120th degree, 4, 5, 6, 7,8 hours each slower than Greenwich time. Quebee Standard Time is that of the 5 hour, and is 15 minutes 11 seconds slower than the true local or Mean, and is the Standard time from Quebec to Detroit, it is the time for the States on the Atlantic Coast and Provinces of Quebec and Ontario. The Maritime Provinces and Intercolonial Railway is the 4 hour or that of the 60th Meridan, which is one bour faster than Quebec,

\section*{forcign flabitg.}

The Navy of the United Kingdom and also that of France and of the United States are more fully described in this Almanac under their respective headings of those countries. The undermentioned table will give an accura'e idea of the war vessels possessed by other countries,

GERMANY possesess 12 armor-clad vessels of various types, used as cruisers ; 16 iron-clads adapted solely for coast defense ; 19 cruisers, of which 8 are partially protected; beside 30 gun boats and despatch boats and 132 torpedo vessels. The present Emperor of Germany has taken an expecial interest in the Navy, and other vessels of the most improved types are in course of construction. The personnel of the Cerman Navy numbers nearly 20,000 , and its reserve force is considerable.

Austria.--Since the formation of the Triple Alliance, Austria has devoted its resources to the development of the Aimy rather than of the Navy, and no new warships have been built during the current year. The "Kron Prinz Rudolph," the "Custozza," the "Tegethoff," the "Hapsburg," the "Kaiser Franz," the "Kaiserin Elizabeth," are armor-clads of the first claws, The total number of officers and men employed in the Navy on a peace footing is \(8, i+0\). The total vessels on the official list in 1892 was 129, divided as follows: 16 armored battleships of the first class and 16 cruisers of various types and 65 torpedo boats, the other vessels \(b\)-ing of an obsolete type. In time of war the personnel of the Nav \(\downarrow\) exceeds 15,000 men of all grades.

Italy. - The Italian Navy is not numerically large, but hasobtained considerable notice on account of the exceptional size of its recently built ships and the power of their armament. The first class battleships Italia, Lepanto, Duilio, Dandolo, Lauria, Morosini, Doria, King Umberto, Sicilia and Sardinia, are each over 11,000 tons displacement, and Italy also owns 6 cruisers of the first class, and 6 others are now building, viz., the Etruria, Liguria, Umbria, Piedmont, Marco Polo, and Lombardia.

The total of all ranks in the Navy is about 40,000 , with \(20,000 \mathrm{in}\) reserve,
RUSSIA, -The Navy is divided into a Baltic and a Black Sea Fleet: The following is a list of battleships of the first class:

Peter the Great,
Tonnage.
Alexander II,
9,340
Nicholas I,
8,440
Catherine II,
8,440
Tchesman,

& Tonnage. \\
Sinope. & 10,180 \\
St. George, & 8,800 \\
Navarin, & 8,000 \\
Twelve Apostles.
\end{tabular}

And 4 others building, one of 12,400 tons. Russia also possesses 10 Baltic cruisers of the first class. The Rurik, launched in October, 1892, is the largest vessel of the cruiser class afloat-nearly 10,940 tons, or about 3,000 tons larger than our first class cruiser "Blake."

The total number of iron-clads built or building is 46.
The personnel of the Navy comprises some 28,000 men of all grades. The men are levied for 10 years.

TURKEY.- The peculiar position which Turkey occupies as the de jure guardian of the Dardanelles has prevented the naval force of the country from being neglected, though during the current year, financial embarrassments have prevented new additions being made to the fleet. Her seagoing force at present numbers 15 armor-clads of various ty pes, 1 monitor for coast defense, 60 gun and torpedo buats and 30 despatch vessels. The nominal personnel of the Navy is 40,000 , officers and men.

Spain, -The Spanish Navy consists of 6 armor-clads and turret vessels, 3 protected cruisers, 17 unarmored cruisers and frigates, and about 30 torpedo boats. The personnel is 17,000 , officers and men.

Portugal.-The Portuguese Navy consists of 2 iron-clads, 6 corvettes, 15 gunboats, and about 20 vessels, unarmored, of various types. The largest warship she possesses afloat is the "Vasco de Gama," built in England. The personnel of non-commissioned officers and men numbers about 4,000.

Argentine Republic.-The Navy consists of 1 armor-clad, 2 coast defense, 2 protected cruisers and 10 torpedo and gun boats. Three vessels are being built,

Brazil.- The recent revolution in Brazil has not altered thi policy of the new rulers as to the necessity of possessing a considerable naval force. In the orrrent year, Brazil possessed 4 seagoing armor-clads and 6 suited for coast defense, besides some 20 torpedo and gun boats and 35 unarmored vessels of various types. Personnel, 9,000 .

CHiLI is now the principal South American naval power on the west coast, owning 5 ironclads, of which the "Huascar" was captured from Peru during the late war. In that contest the "Almirante Cochrane" was sunk by a turpedo. Chili also possesses 3 protected cruisers of the type of the "Esmeralda" and 15 torpedo vessels, corvettes and gun boats, 1 iron clad, 3 cruisers and 3 gun boats are being built in England for this country.

China possesses 5 armor-clads, 10 protected cruisers, 10 floating batteries and armored vessels suited for local defense, besides a fleet of some 50 torpedo and despatch boats, others being in cours : of construction.

ECUADOR has 1 cruiser and 2 gunboats.
Holland (Netherlands).-At the present time, Holland only possesses 5 armored turret ships and 7 monitors constructed for coast defense. She has also 10 cruisers and about the same number of torpedo and gun boa's of the unarmored class.

JAPAN has 4 armored cruisers and 13 frigates and corvettes of modern construction. She also possesses over 50 torpedo, gun and despatch boats, and is adding to her fleet.

NorWAY AND SWEDEN.-The combined maritime force of Sweden and Norway comprids 12 turret vessels and monitors, 4 unarmored cruisers, 5 corvettes and nearly 70 torpedo ane gun boats. Her naval force consists of 23,000 officers and men, and she has a large reserve owing to her position as a maritime pation,

PERU,--Since the contest with Chili which ended so unfortunately for Peru, her naval power has been reduced to the possession of one amored cruiser and 2 unprotected vessels.

ROUMANIA, recognizing the importance of her position as regards the Danube, has built 4 armored vessels suitable for river protection, besides torpedo boats and other vessels building in England.

URUGUAY possesses 3 gunboats and 7 small steamships.
Venezuela possesses 1 armor-clad and several gunboats.
Greece has 3 armor-clad vessels and a fleet of some 50 torpedo and gun boats. Nearly 4,000 form the naval torce.

\section*{The "Tonnage" of a Vessel.}

Tonnage means the cubical contents or burden of a ship in tons, or the amount of weight she may carry. Properly speaking the torimage of a ship is an expression for the interi weight she ealculated by the number of tons of rea water it would contain; hence if the interior capacity were found in cubic feet, and this divided by thirty-five (the number of cubic feet of sea water
equivalent in weight to a ton), the quotient would be the tonnage. Registered tonnage, however, and actual capacity differ considerably, owing partly to the peculiar build of certain vessels, and partly to the difference in cubical area of a ton weight of different substances. In England the tonnage of a vessel is calculated under the Merchant Shipping Act of 1854. The basis adopted is a roomage or space ton of 100 cubic feet, and the tonnage is the roomage or internal cubic capacity of the ship below her uppermost deck, and of permanent closed in space on her uppermost deck available for cargo, stores, passengers, or crew, ascertained by the fromula known as "Sterling's Rule." The aggregate cubic space in the ship thus ascertained (designated in units of 100 cubic feet) constitutes her gross tonnage. The registered or net tonnage is tbe remaining tonnage after deducting fro \(n\) the gross tonnage the tonnage of spaces exclusively appropriated to the accommodation and use of the crew. For a steam vessel, the gross tonnage is further reduced by an allowance for space occupied by, and necessary for, propelling power. The Act of \(185 t\) was, as to steamers, amended by an Act passed in 1867.

\section*{}

The development of modern travelling facilities makes the following statement interesting :
For \(\$ 610\) (£125) a ticket can be purchased which will take the traveller from Montreal to Vancouver in 5 , days; embarking him upon one of the new steamships of the C.P.R. Co, for Hong Kong, calling at Yokohama and Shanghai, an average passage being 22 days. At Hong Kong, transhipment is made to a steamer of the Peninsular \& Oriental Co., which proceeds to London, England, calling at Singapore, Penang, Colombo, Aden, Port Said, Malta and Gibral-tar;-an average passage occupying 38 days. From Liverpool to Montreal, an average passage by the Allan, Beaver or Dominion Lines will occupy 8 to 9 days.

\section*{74 approximste. 21,840}

During the time on sea the travellar is living as well as in the best hotel ashore ; and allowing \(\$ 5\) per day for meals during the land transit and incidental expenses for the entire period of 74 days, it will be seen that the trip can be made for less than \(\$ 1,000\),

For an extra payment of \$556, the trip can be shortened to 64 days by trave'ling to Brindisi and across the continent via Paris and Calais to Dover, or an extra payment would procure land transit across Indıa via Calcutta and Bombay.

How to Destroy Insects.-The Bureau of Entomology, Department of Agriculture, Washington, sends out the following, for use as insecticides on or about plants, ecc.: London purpleTo twenty pounds flour, from one quarter to one-half pound is added and well mixed. This is applied with a sifter or'blower. With forty gallons of water one-quarter to one-half pound is mixed for spraying. Paris G een-With twenty pounds of flour from three-quarters to one pound is mixed and applied bv sifting or by a blower. The same amount of the insecticide to forty gallons of water is used as a spray. Bisulphate of Carbon-For use in the ground a quantity is poured or injected among the roots that are being infected. Against insects damaging stored grain of museum material a small quantity is used in an air-tight vessel. Carbolic AcidA solution of one part in 100 of water is used against parasites on domestic animals and their barns and sheds; also on the surface of plants and among the roots in the ground. HeleboreThe powder is sifted on alone or mixed one part to twenty of flour. With one gallon of water one-quarter pound is mixed for spraying. Kerosene-Milk Emulsion-To one part milk add two parts kerosene, and churn by force pump or other agitator. The butter-like emulsion is diluted ad libitum with water. An easier method is to simply mix one part kerosene with eight of milk, Soap Emulsion-In one gallon hot water one-half pound whale oil soap is dissolved. This, instead of milk, is mixed to an emulsion with kerosene in the same manner and proportion as above. Pyrethrum, Persian Insect Powder-Is blown or sifted on dry, also applied in water one gallon to a tablespoonful of the powder, well stirred and then sprayed, Tobacco Decoction-This is made as strong as possible as a wash or spray to kill insect pests on animals and plants.

\section*{A Simple Filter.}

There are several simple modes of making a filter. A very cheap, simple, and effective filter can be made by means of a common flower-pot. All that is requisite is to fill the hole with a piece of sponge, and then place in the pot alternate layers of sand, charcoal, and small pebbles. The flower-pot, thus fitted up, may be placed in a jar or other convenient vessel, into which the water as it filters through can be received. The effectiveness of this filter can be very much increased by having two or three flower-pots placed under each other in a stand, the water dripping from one to the other into a receiver below. A good filter may be made by placing in a tank of impure water a vessel, so arranged that a sponge which it contains shall lap over the edge and dip into the water of the tank. The sponge gradually sucks up and purifles the water in the reservoir, and allows it to drop into the smaller vessel or receiver, from which it may be drawn off by a tube. By placing a few lumps of charcoal at the bottom of the receiver, filtration of the most perfect kind is effected,

\section*{THE FIRST ARMOR-PLATED VESSELS.}

The French were the first to apply in a practical shape the idea of placing armor on the sides of the ships. They constructed five floating batteries, clad with 43 inches of iron on the launched ag 8 inches thick. Of these, the first was the Tornanti, mounting 16 guns. She was in the bombardment of Kinburn, ind was quickly followed by others. Three of them took part Admiralty hastily imitated this exa the Black Sea, on the 17th October following. The British teries, two of which, the Erebus example, producing eight very slow and unmanageable batthe French sent to sea La Gloire, the first large iron plated shon the 24th October. In 1859 built ship of war, altered from a 90 -gun tirst large iron plated ship afloat. She was a timberplates, and had a burden of 3,000 tons. the alert, and they set about the creation of proceeding at once set the British Government or plated vessel, was launched on the Thames, December 29th, The Warrior, our first armonvalue was in the American civil war.

\section*{A NOTABLE STEAMSHIE}

The largest vessel, save the Great Eastern, that has ever been built was launched in September 1892, at Govan, on the Clyde, from the yard of the Fairfield Company. She is one of two new liners expected that she will be the Cunard Company, and she is to be called the Campania. It is immediately prior to the completed in t me to make her first trip to New York in April, 1893, by 83 ft , broad. The Campania will be Cuicago Exhibition. The Great Eastern was 692 ft , long loaded with cargo, passengers, and stores 92 ft . shorter and 8 ft . narrower, and will, when fully tons. This is a displacement by at least 3,000 tons vessel, or man-of-war now in existence. It is a displacement of something over 14,000 tons, she will land miles per hour ; and she will, not improbably exceedin a speed of 23 knots, or nearly \(26 \frac{1}{2}\) to make a continuous speed from port to port of 21 knots, or \(24 \cdot 1\) this. Upon her voyage she is tolerably certain to be improved upon after she has mats, or \(24 \cdot 1\) land miles ; and this speed is of twin phosphor-bronze screws driven by two pairs of a few trips. The machinery consists of indicating up to 15,00 horse power. Each engine triple-expansion engines, each capable high-pressure cylinders will exhaust into an intermediate two cranks and five cylinders. Two low-pressure cylinders ; and the pistons of these lestiate cylinder, which will exhaust into two high-pressure cylinders. There will be 12 double-ended on the same rods as the pistons of the there will be six stockholds. The funnels, two in number, will be the largest ever made. Her coal consumption will approach 400 tons per 24 hours.

\section*{Atlantic Ocean: Why so named.}

The \(A\) antic Ocean is supposed by some to have been so called from the fabulous Island of Atlantis, which, according to ancient tradition, was situated in that ocean, This island is description, Atlantis ato, who represents an Egyptian priest as describing it to Solon, In this and lying off the Pillars of Hed as an island larger than Libya and Asia Minior taken together, the Canary Islands were thercules in the Atlantic Ocean. Some early writers supposed that Phoenician merohant ships had been driven old Atlantis; while others havesupposed that the supposed vast island may have been the New World. on the coast of America, and that the was given to this ocean by the ancients, because it washed the feet of that the name Atlantic in Africa.

\section*{Handshaking.}

The custom of shaking or giving hands can be traced to the days of the ancient Israelites, and was intended to signify peace, to swear friendship, promise alliance, or give security, Jehu said to Jehonadab, "Is thine heart right as my heart is with thy heart? If it be, give me

\section*{GUNTER'S CHAIN, LAND MEASUREMEVT, etc.}
7.92 inches constitute 1 link ; 100 links 1 chain, 4 rods or poles, or 66 feet, and 80 chains mile. A square chain is 16 square poles, and 10 square chains are 1 acre. Four roods are an acre, each containing 1,210 square rods, or \(34,78 j\) yards, or 94 yards 28 inches each side,

Forty poles of 30.25 square yards each is a rood, and a pole is \(1 \frac{1}{2}\) yards each way.
An acre is 4,840 square yards, or 69 yards 1 foot \(8 \frac{1}{2}\) inches each way; and 2 acres, or 9,680 square yards are \(98 \mathrm{yds}, 1 \mathrm{ft}, 2 \mathrm{ins}\). each way; and 3 acres are 120 f yards each way. A square mile, or a U.S, section of land, is 610 acres, being 1,060 yards each way; half a mile, or 880 yards each way, is 160 aeres ; a quarter of a mile, or 440 yards each way, is a park or farm of 40 acres;

Any length or breadth in yards which multi 12.10 is a rood, and 30.25 is a pole.

An English acre is a square of nearly 70 yards each way ; a Scotch of \(77 t\) yerds, and an Inish of \(88 \frac{1}{2}\) yards.

What Smoking Costs,-The expense of smoking three five-cent cigars a day, principal and interest, for ten years, is 8745.74 ; for twenty-five years, \(83,110.74\). The expense of three tencent cigars, at the end of ten years, is \(\$ 1,471,55\); for twenty-five years, \(\$ 6,382,47\), At the end of
fifty years, it is \(\$ 54,162,14\),

\section*{The Blue Pe'er.}

The Blue Peter is a flag with a blue ground and white square in the centre. Pefer is a corruption of the French partir (leave or notice of departure), the flag being hoisted to give notice that any person having a money claim may make it before the ship starts, and that all about to sail may come at once on board.

An indenture is a deed or instrument in writing. Originally such writings were made in duplicate upon a sheet of paper which was afterwards indented or cut apart in a waved or notched line. One piece was given to each of the parties to the contract, and when the two were put together they would, of course, fit into each other exactly. This mode of indenture has passed out of use, but the term survives.

\section*{ORIGIN OF THE TERM "CABINET COUNCIL."}
"Cabinet" is exclusively a French word, but in England it has a much more limited meaning than in France. There an apartment in which men of business meet to transact their private affairs, and barristers to receive their clients, is called a "cabinet." Hence the application of the word to the council chosen by kings to advise with them on the course of public affairs, and to direct the higher branches of the adminirtration. Such State Councils are in England referred to Alfr d the Great, but the term "Cabint Council" is of much more modern date, and, according to Earl Clarendon, originated thrs: "The affairs of State in the reign of Charles I. were principally managed by the Archbishop of Canterbury, the Earl of Strafford, and the Lord Cottington. To these were added the Earl of Northumberland for ornament, the Bishop of London for his place, being Lord Tr asurer ; the two secretarips-Vane and Winde-bank-for service and intelligence. Only the Marquis of Hamilton, by his skill and interest, meddled just so far, and no farther, than he had a mind. These persons made up the committee of State, reproachfully after called' the Junto,' and enviously then in the Court the Cabinet Council."

}

\section*{Tovell'ø Cazetier and ziotory of tye gotand of etontreal.}

To be published in 1893, provided sufficient subscribers are obtained to cover cost of publication.
For many years I tried diligently to obtain a list of subscribers to enable me to undertake the publicafon of Lovell's Gazetterr and History of Canada. The effort being a mortifying failure; pr the present, I am compelled to allow my cherished project to remain in abeyance, consequently will now try to obtain support sufficient to justify me in publishing Loyell's Gazetteer and Hisfory of the ISLaND of Montreal. In it I will give prominence to the City op Montreal (in which I have been a resident since 1820). I will give its history from the landing of the first white man to time of publication,
the work will contain :
Descriptions of Counties, Districts, Parishes, Townships, Capes, Islands, Lakes, Rivers, Bays, Inlets, Waterpowers, Water falls, Canals, Bridges, etc. Where situated and how to reach them.

Description and locality of Copper, Gold, Iron, Lead, Silver, and other Mines; of Marble, Slate, Stone, and other Quarries, How to reach them-products, how and where disposed of.
Different kinds of Timber -where to be found-what use is made of them-the market value-how and where taken to market. Capacity

\section*{LOVELL'S GAZETTEER \\ AND HISTORY \\ OF THE \\ ISLAND \\ OF MONTREAL}
and extent of Water-powerwhere to be found.
Names and localities of Tanks-amount of Capital at Head Uffices-names of their Managers or Cashiers-when establisthed on the 1sland.
The Press, with titles of Newspapers, Periodicals, etc. -annual subscription-where published - how often - by whom.
Railways on the Island,names of the Presidents and General Munagers.
Fishing Places-what kind of Fish: Hunting Groundsthe kind of Animals and of Game - how to reach the localities,
WITH A MAP OF THE ISLAND OF MONTREAL.
The KEY to and TAELE of ROUTES will be invaluable. To find any place turn to the ROUTES, which cives the KEY to Railway or other conveyance.

The result of my present effort depends on the rumber of subscribers obtained at \(\$ 3\) each, payable on delivery.

Citizens interested in places outside of the Island of Montreal, but in the Province of Quebec, can have their places inserted, in the Appendix, in Alphabetical order, by an arrangement with the publisher.

Unwearied research will be used to put on record all that is of interest regarding the Island.
Contributions solicited of Purtraits of Eminent Canadians and of former Notable residents.
Photos.-To secare good Picturcs CONTRIBUTORS are expected to supply First Class Photoso
The History of Lachine and of Outremont has been prepared as a sample of how Histories of other places on the Island will be written.

If desired, a FRENCH elition will be issued. Price \(\$ 3\), payable on delivery.
Une traduction FRANÇaISE sera publicé a \(\$_{3}\) le volume (la Carte de l'Ile et des Routes toutefois sera en anglais), pourvu que l'on puisse obtenir un nombre suffisant de souscripteurspour convrir les frais de la publication.
Respect fully and cordially I look to my fellow citizens throughout the Island to become Subscribers, and put me in a position to commence work on Luvell's Gazetteer and History of the ISLAND of Montreal, at an early day.
\({ }_{23} \mathrm{St}\). Nicholas Street,
JOHN LOVELL, Compiler of tine Census of Montreal.
