THE
FARMERS & MARINER'S
ALMANACK,
AND
ASTRONOMICAL EPHEMERIS,
FOR THE YEAR OF OUR LORD,

1826;

BEING THE SECOND YEAR AFTER BISSEXTILE, OR
LEAP YEAR,

AND

THE SEVENTH OF THE REIGN OF HIS MOST EXCELLENT
MAJESTY GEORGE IV.

Calculated expressly for the Town of Halifax, Nova-
Scotia, in Latitude $44^{\circ} 44'$ North, Longitude 63°
 $36'$ West from the Royal Observatory of Green-
wich, in the vicinity of London; but will very
well answer for any part of his Majesty's
Dominions in North America, contiguous
to the said Province of Nova Scotia.

By P. Gassendi, junr.

HALIFAX, N. S.

Printed, Published, and for Sale, at the
WEEKLY CHRONICLE OFFICE,
Barrington Street, Opposite the South-East Corner of the
DALHOUSIE COLLEGE.

EXPLANATION OF THE CALENDAR PAGES.

The first column shows the days of the week and the corresponding days of the month.

The second shows the Time of the Rising and Setting of the Sun.

The third shows the quantity, by which the Sun is too fast or too slow of Mean Time, or that time which ought to be given by a well regulated clock; which, whenever the Mean time is required, must be added to all the calculations in this Almanack, when the Sun is too slow and subtracted when too fast.

The fourth column shows the Rising or the Setting of the Moon; her Setting being given between the change and full, and the Rising between the full and change.

The fifth column shows the time of high water next after the southing of the Moon; for the tide preceding her southing, half the difference between the times of high water on the day preceding and the day following will be a correction sufficiently accurate; for example, let it be required to find the time of high water on the Morning of January 2d; by the Almanack it appears that it will be high water January 1st, at 11. 4m. afternoon; and January 2d, at 11. 56m. afternoon; the difference being 24m. 52m. the half of which (12m. 26m.) being added to the former time or subtracted from the latter, gives 11. 33m. A. M. for the time required. Indeed all calculations of the time of high water are approximations only; as the direction and strength of the wind have great effect upon the depth of the tide and in accelerating or retarding the time of high water.

The sixth column shows the time of the Moon's Southing, or passing the Meridian.

The seventh column contains the remarkable days observed by the Church, and astronomical phenomena.

At the top of the page, the longitudes of the Sun and Moon for every second day, at Noon, is given in Signs and Degrees.

It will be remembered, that in conformity to the long established custom, which has now become nearly inveterate, all the calculations in this Almanack, (excepting the Catalogue of Solar Eclipses) are expressed in Apparent Solar Time, or that mode of computation which supposes the Sun always to be on the meridian, or to South at 12 o'clock. On account of the Sun being more distant from the earth in summer than in winter, and of the inclination of the Ecliptic to the Equator, which cause the Sun to have a greater motion at one part of the year, than at another, the natural days (that is, the interval between two successive Southings of the Sun) are not equal, some being more, some less than 24 hours. But as clocks and watches cannot without great difficulty and expense, be made to measure time *unequally*, it is customary to suppose the day to be divided into 24 *equal* hours; this is called, Mean Solar Time; the difference between the Apparent and Mean Solar Time (usually denominated Sun Slow or Fast) being called the Equation of Time. To convert the calculations in this Almanack into Mean Time, the quantity, by which the Sun is slow or fast must be applied according to the directions above given.

THE PLANETS AND THEIR RELATIONS.

☉ The Sun	♂ Mars
☾ The Moon	♃ Jupiter
☿ Mercury	♄ Saturn
♀ Venus	♊ Georgian
♁ Conjunction: ☐ Quadrature: ♀ Opposition.	

SIGNS OF THE ZODIAC.

First ♈ Aries	Seventh ♎ Libra
Second ♉ Taurus	Eighth ♏ Scorpio
Third ♊ Gemini	Ninth ♐ Sagittarius
Fourth ♋ Cancer	Tenth ♑ Capricornus
Fifth ♌ Leo	Eleventh ♒ Aquarius
Sixth ♍ Virgo	Twelfth ♓ Pisces.

SOLAR AND LUNAR ECLIPSES IN THE YEAR 1826.

- May 21. The Moon totally eclipsed, wholly invisible at Halifax, ♀ at 11h. 2m. morning.
- June 5. The Sun eclipsed, invisible at Halifax; ♀ at 1h. 40m. evening, in long. 2s 14° 27' ♀'s lat. 1° 5' South.
- October 30. The Sun eclipsed, invisible at Halifax, ♀ at 9h. 7m. evening, in long. 7s 7° 6' ♀'s lat. 1° 30' South.
- Nov. 14. The Moon totally eclipsed, wholly invisible at Halifax, ♀ at 11h. 55m. morning.
- Nov. 29. The Sun eclipsed, invisible at Halifax, ♀ at 7h. 23m. morning, in long. 8s 6° 46' ♀'s lat. 1° 12' North. This eclipse will be very large throughout the North of Europe. In London the Sun will be 6° 38' eclipsed, in Paris 6° 12' on his northern limb.

The Occultations of the Planets and the large stars by the Moon, during the Year 1826, are not numerous.

The Star "2 Alpha Cancri" will be occulted, on the evening of February 20th. The Immersion will take place about 5h. 30m. p.m. the Emersion about 6h. 20m. p.m.

The Planet Saturn will be occulted on the evening of March 15th.
Immersion about 10h P. M. Emerision about 10h 30m P. M.

The Star "1 Alpha Cancri" will be occulted on the evening of May 13th. Immersion about 8h 15m P. M. Emerision about 9h 15m P. M.

The same Star will be occulted on the morning of November 21st.
Immersion about 0h 30m A. M. Emerision about 1h 30m A. M.

The reader will scarcely require an apology for the insertion of the following catalogue of all the visible eclipses of the Sun, between the years 1825 and 1901, computed for Cambridge, (a town 3 miles distant from Boston, Massachusetts) in lat $42^{\circ} 23' 28''$ North and long. $71^{\circ} 7' 25''$ West. Although, in many instances, the difference between the aspects of the eclipse at Halifax and Boston, may be considerable, yet it will rarely happen, that the sun is eclipsed at one of these places, without also being eclipsed at the other. Indeed this is the only catalogue of eclipses for this continent, now extant; and having been calculated with the greatest care and with prodigious labor, some confidence may be placed in its general accuracy.

A Catalogue of all the Eclipses of the Sun visible in Cambridge, between the years 1825 and 1901, the phases of which are expressed in Mean Solar Time.

1825, DECEMBER 9TH.

Time of Ecliptic con- junction.	D. H. M. S.
Latitude of the Moon then $31^{\circ} 45'$ North	9 3 42 40 pm
Beginning of the Eclipse Sun Sets Eclipsed	3 52 50 "
Digits Eclipsed at Sun set $4^{\circ} 51'$	4 22 20 "

1831, FEBRUARY 12TH.

Time of Ecliptic con- junction.	D. H. M. S.
Latitude of the Moon then $42^{\circ} 8'$ North	12 0 28 38 pm
Beginning of the eclipse	11 49 9 am
Visible Conjunction	1 0 31 pm
Greatest obscuration	1 20 57 "
End of the Eclipse	2 46 17 "
Digits Eclipsed $11^{\circ} 27'$ on Sun's South Limb.	

In this remarkable eclipse, the obscuration of the Sun will be more than 11 Digits throughout the United States. In the island of Nantucket, the eclipse will be annular; Vis. Con. at 1m 27m 6s; Duration of the annular 1m 40s; Digits Eclipsed $11^{\circ} 46'$. This Eclipse will likewise be annular at Halifax, when the visible conjunction will take place at 2m 3m 1s

P. M. Duration of the annular 1m 30s
Digits Eclipsed $11^{\circ} 44'$ On many accounts, this will be one of the most remarkable Eclipses of the 19th century.

1832, JULY 27TH.

Time of Ecliptic con- junction.	D. H. M. S.
Latitude of the Moon then $5^{\circ} 38'$ North	7 9 19 18 am
Beginning of the Eclipse	7 18 53 "
Visible Conjunction	8 1 20 "
Greatest Obscuration	8 9 10 "
End of the Eclipse	9 2 15 "
Digits Eclipsed $4^{\circ} 48'$ on Sun's South Limb.	

1834, NOVEMBER 30TH.

Time of Ecliptic con- junction.	D. H. M. S.
Latitude of the Moon then $51^{\circ} 31'$ North	30 2 2 56 pm
Beginning of the Eclipse	1 21 45 "
Greatest Obscuration	2 40 57 "
Visible Conjunction	3 41 46 "
End of the Eclipse	3 53 58 "
Digits Eclipsed $10^{\circ} 28'$ on Sun's South Limb.	

This Eclipse will be total at Charleston, South Carolina.

 The Sun will be totally Eclipsed a little south of Norfolk, in the State of Virginia.

The Planet Venus will be Morning Star until the 10th of March, thence Evening Star to December 23d, thence Morning Star.

The Planet Jupiter will be Morning Star until the 28th of February, thence Evening Star until the 18th of September; thence Morning Star to the end of the Year.

SIGNALS AT FORT GEORGE (CITADEL HILL) FOR VESSELS IN THE OFFING.

One ball close—Square Rigged Vessel,	A Pendant under a ball—6 do
One ball half hoisted—2 do	A do over a do half hoisted—7 do
Two balls close—3 do	A do under 2 do close—8 do
Two balls separated—4 do	A do between 2 do separated—9 do
A Pendant of any colour—5 do	A flag of any colour—10 or more do
[Hoisted at East or West Yard Arm, according to the quarter the vessel first appears in; with the addition of a ball at the centre, until the vessel can be seen, when one or more of the following descriptive colours will be hoisted at the mast head.]	
An Union—Flag-Ship, with or without a Squadron.	White and Blue Pendant—Neutral Man of War
Do with a Red Pendant over—a Two Decker	Blue Flag—Neutral Merchant Ship;
Do with a Blue Pendant over—a Frigate.	A Red White and Blue Flag—an Enemy's Fleet
Do with a White Pendant over—a Small Armed Vessel.	A Red Flag—Enemy's Merchantman.
A Red Flag Pierced White—a Packet.	Union Jack over Neutral or Enemy's Signals—Vessel is detained or a Prize.
A Blue Pendant—a Merchant Ship	A White Flag over any Signal—Flag of Truce
A Red Pendant—a Merchant Brig	A Ball at Mast Head—Vessel on shore, or in distress; should immediate aid be necessary guns to be fired.
A White Pendant—Topsail schr.-or Sloop	
A Blue and White Flag horizontally divided—Neutral Fleet.	

EXPLANATION OF SIGNALS.

Made on the Ensign Staff at Fort George to denote the Country which Vessels entering the Harbour of Halifax have arrived from.

A Red Flag—from Great Britain	A Red and White Flag horizontally divided—Quebec or Gulf of St. Lawrence
A Red and White do—Mediterranean	A Blue and White Flag horizontally divided—New Brunswick, or Bay of Fundy

William Lawson—White flag with red border, centre blue square

THE Parrsborough Packet sails regularly between Windsor and Parrsborough every week, from the 1st April to Christmas, viz. it leaves Parrsborough on Monday, wind and weather permitting; so

as to be at Windsor on Tuesday; and will sail from thence the first high water that happens at or after eight o'clock in the morning of that day: the Packet frequently goes twice or three times a week when business requires it.

TIME OF GOING THROUGH THE FALLS.

THE Falls are level (or still water) at about three hours and an half on the flood, and about two hours and an half on the ebb, which makes it passable four times in 24 hours, about 10 or 15 minutes each time. No other rule can be given; as much depends on the floods in the river St. John, and the time of high water or full sea, which is often hastened by winds, and in proportion to the height of them.

KING'S COLLEGE, WINDSOR.

PATRON—His Grace the Lord Governor:—His Excellency the Lieut. Governor; The Right Rev. the Lord Bishop of Nova-Scotia; The Hon. the Chief Justice; The Judge of the Court of Vice Admiralty; The Speaker of the House of Assembly; The Hon. the Attorney General; The Solicitor General; The Secretary of the Province; The Reverend the President; The Vice President; The Ecclesiastical Commissary. 30th do St. Andrew.
25th December, Christmas Holidays.
Good Friday, Easter Monday, Easter Tuesday, Whit Monday, Whit Tuesday.

A L M A N A C K.

Although the terms *Calendar* and *Almanac* are in general regarded as synonymous, there is, nevertheless, a material distinction between them.

The calendar, strictly speaking, refers to time in general—the almanac to only that portion of time which is comprehended in the annual revolution of the earth round the sun, and marking by previous computation, numerous particulars of general interest and utility; religious feasts; public holidays; the days of the week, corresponding with those of the month; the increasing and decreasing length of the day; the variations between true and solar time; tables of the tides: the sun's passage through the zodiac; eclipses; conjunctions and other motions of the planets; &c. &c.; all calculated for that portion of duration comprehended within the YEAR.

We may with propriety use the words *Calendar* or *Almanac* for any particular year; but, as allusive to Time in general, *Calendar* can alone be properly applied.

*Governors Days for transacting Business at
Government House, viz. Tuesdays, Thursdays and
Saturdays Military, from 10 to 12 O'clock Civil from

THE SEASONS.

SPRING.

It is not that sweet herbs and flowers alone,
Start up, like spirits that have lain asleep,
In their great Mother's iced bosom deep,
For months, or that the birds, more joyous grown,
Catch once again their silver summer tone,
And they, who late from bough to bough did creep,
Now trim their plumes upon some sunny steep,
And seem to sing of Winter overthrown.
No—with an equal march the immortal mind,
As tho' it never could be left behind,
Keeps pace with every movement of the year ;
And (for high truths are born in happiness)
As the warm heart expands, the eye grows clear,
And sees beyond the slave's or bigot's guess.

SUMMER.

Now have green April and the blue-eyed May
Vanish'd awhile ; and lo ! the glorious June
(While Nature ripens in his burning noon)
Comes like a young inheritor, and gay,
Altho' his parent months have pass'd away :
But his green crown shall wither, and the tune
That usher'd in his birth be silent soon,
And in the strength of youth shall he decay.
What matters this—so long as in the past
And in the days to come, we live, and feel
The present nothing worth, until it steal
Away, and like a disappointment die ?
For Joy, dim child of Hope and Memory,
Flies ever on before, or follows fast.

AUTUMN.

There is a fearful spirit busy now :
Already have the elements unfurl'd
Their banners : the great sea-wave is upcurl'd :
The cloud comes : the fierce winds begin to blow
About, and blindly on their errands go ;
And quickly will the pale red leaves be hurl'd
From their dry boughs, and all the forest world
Stripp'd of its pride, be like a desert show.
I love that moaning music which I hear
In the bleak gusts of Autumn, for the soul
Seems gathering tidings from another sphere ;
And, in sublime mysterious sympathy,
Man's bounding spirit ebbs and swells more high,
Accordant to the billow's loftier roll.

WINTER.

This is the eldest of the seasons : he
 Moves not like Spring with gradual step, nor grows
 From bud to beauty, but with all his snows
 Comes down at once in hoar antiquity.
 No rains nor loud proclaiming tempests flee
 Before him, nor unto his time belong
 The suns of Summer, nor the charms of song
 That with May's gentle smiles so well agree—
 But he, made perfect in his birth-day cloud,
 Starts into sudden life with scarce a sound,
 And with a gentle footstep treads the ground,
 As tho' to cheat man's ear ; yet while he stays,
 He seems as 'twere to prompt our merriest days
 And bid the dance and joke belong and loud.

An English wit, disgusted with the *namby-pamby* style of the French Calendar, has given the following ludicrous translation of their months :

Autumn—WHEEZY, SNEEZY, FREEZY.

Winter—SLIPPIY, DRIPPIY, NIPPIY.

Spring—SHOWERY, FLOWERY, BOWERY.

Summer—HOFFY, CROPPY, POPPY.—*Repub. Cal.*

SOVEREIGN, AND ROYAL FAMILY, OF THE
 UNITED KINGDOM.

GEORGE IV, King of the United Kingdom of Great Britain and Ireland, and King of Hanover, born August 12. 1762. Succeeded his father, George III, January 29, 1820. Crowned 19 July, 1821. Married, April 8, 1795, to Caroline-Amelia Elizabeth, Princess of Brunswick, born May 17, 1768 ; died Aug 7, 1831 ; by whom he had issue Princess Charlotte Augusta, born Jan. 7, 1796. Married May 2, 1816, to Leopold George Frederick, Prince of Saxe-Coburg-Saalfeld, born Dec. 16, 1790. Died Nov. 6, 1817.

Brothers and Sisters of the King.

1. Frederick Duke of York, born Aug. 16, 1763, Married, Sept. 29, 1791, to Frederique Charlotte Ulrique Catharine, daughter of Frederick Wm. II, King of Prussia, who died August 6, 1820.

2. William Henry, Duke of Clarence, born Aug. 21, 1765, Married, July 11, 1818, to Adelaide Amelia, sister of the reigning duke of Saxe-Meiningen, born Aug. 13, 1792.

3. Princess Royal, Charlotte Augusta Matilda, born Sept. 29, 1766, Lady of the Imperial Russian Order of St. Catharine, Married, May 18, 1797, to Frederick Charles William, Duke, afterwards King, of Wirtemberg, who died Oct. 30, 1816.

4. Augusta Sophia, born Nov. 8, 1768.

5. Elizabeth, born May 22, 1770, Married April 7, 1818, to Frederick Joseph Lewis, Landgrave of Hesse Hombourg, born July 30, 1769.

6. Ernest Augustus, Duke of Cumberland, born June 5, 1771, Married May 29, 1815, to Frederica Sophia Carolina, daughter of the late Duke of Mecklenburgh Strelitz, and widow of Frederick William, Prince of Soms Braunfe's, born March 20, 1778. Issue : George Frederick Alexander Chas. Ernest Augustus, May 27, 1819.
