No 29] SAINT ANDREWS, N. B., WEDNESDAY, JULY 20, 1853. [Vol. 20

## LAW RESPECTING NEWSPAPER

Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscriptions.  
If subscribers order the discontinuance of their papers, the publisher may continue to send them till arrears are paid.  
If subscribers neglect or refuse to take their papers from the office to which they are directed they are held responsible till they have settled their Bill, and ordered their papers to be discontinued.  
If subscribers remove to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible.

## TIMBER BERTHS.

CROWN LAND OFFICE, June 14, 1853.

The right of Licence to cut Timber and Lumber until the first day of May, 1854, on Crown Lands in the following situations, which were last season under Licence to the undermentioned persons, will be offered for sale by Auction, at this Office, at eleven o'clock in the forenoon of the 14th day of July next.

A further notification will be made of the upset rate of mileage, as also of the terms upon which the Licences will be renewed.

(Not to interfere with any Lots of Land applied for within one year previous to this date.)

ROBT. D. WILMOT, Sur. Gen.

ATHENS, June 18.—King Otho is arming a squadron for the protection of his Greek subjects in case of an Oriental war.

SMYRNA, June 15.—The city of Shiraz, in Persia, was totally destroyed by an earthquake on the night of the 1st of May.

PARIS, Monday, June 27.—A private letter from Jassy, Moldavia, of 17th, says that

an extraordinary courier from St. Petersburg passed through there on the day previous, on his way to Constantinople with another ultimatum, with notice that if not occupied in eight days, the Russian army would immediately cross the frontier and commence hostilities. A division of the Russian army, 40,000 strong, is already within two leagues of Jassy.

## THE POISON-EATERS.

A very interesting trial for murder took place lately in Austria. The prisoner, Anna Alexander, was acquitted by the jury who, in the various questions put to the witnesses, in order to discover whether the murdered man, Lieutenant Mathew Wuzel, was a poison eater or not, produced some very curious evidence relating to this class of persons.

As it is not generally known that eating poison is actually practised in more countries than one, the following account of the custom, given by a physician, Dr. T. von Tschudi, will not be without interest.

In some districts of Lower Austria and in Syria, especially in those mountainous parts bordering on Hungary, there prevails the strange habit of eating arsenic. The peasant in particular are given to it. They obtain it under the name of herdi from the travelling hawksters and gatherers of herbs, who on their side, get it from the glass blowers, or purchase it from the cow doctors, quacks, or mountebanks.

The poison eaters have a twofold aim in their dangerous enjoyment: one of which is to obtain a fresh, healthy appearance, and acquire a certain degree of *embonpoint*. On this account, therefore, gay village lads and lasses employ the dangerous agent, that they may become more attractive to each other, and it is really astonishing with what favourable results their endeavours are attended, for it is just the youthful poison eaters that are, generally speaking, distinguished by a blooming complexion, and an appearance of exuberant health. Out of many examples I select the following:—

A farm servant who worked in the Cow house belonging to— was thin and pale, but nevertheless well and healthy. This girl had a lover whom she wished to enchain still more firmly; and in order to obtain a more pleasing exterior she had recourse to the well-known means, and swallowed every week several doses of arsenic. The desired result was obtained, and in a few months she was much fuller in the figure, rosy cheeked, and in short, quite according to her lover's taste. In order to increase the effect, she was as rash as to increase the dose of arsenic, and fell a victim to her vanity: she was poisoned, and died an agonising death.

The number of deaths in consequence of the immoderate enjoyment of arsenic is not inconsiderable, especially among the young. Every priest who has the cure of souls in these districts where the abuse prevails could tell of such tragedies; and the inquiries I have myself made on the subject have opened out very singular details. Whether it arise from fear of the law, which forbids the unauthorized possession of arsenic, or whether it be that an inner voice proclaims to him his sin, the arsenic eater always conceals as much as possible, the employment of these dangerous means. Generally speaking it is only the confidential or the deshabited that raises the veil from the terrible secret.

The second object the poison eaters have in view is to make them, as they express it, "respiration winded"—that is, to make their respiration easier when ascending the mountains. Whenever they have far to go and to mount a considerable height, they take a minute morsel of arsenic and allow it gradually to dissolve. The effect is surprising; and they ascend with ease heights which otherwise they could climb only with distress to the chest.

The dose of arsenic which the poison eaters begin, consists, according to the confession of some of them, of a piece the size of a lentil, which in weight would be rather less than half a grain. To this quantity, which they take fasting several mornings in the week, they confine themselves for a considerable time; and then gradually and very carefully, they increase the dose according to the effect produced. The peasant R—, living in the parish of A—, a strong, hale man of upwards of sixty, takes at present at every dose a piece of about the weight of four grains. For more than forty years he has practised this habit, which he inherited from his father, and which he will in his turn bequeath to his children.

It is well to observe, that neither in these nor in any other poison eaters is there the least trace of an arsenic cachexy discernible; that the symptoms of a chronic arsenical poisoning never show themselves in individuals who adapt the dose to their constitution, even although that dose should be considerable. It is not less worthy of remark, however, that when, either from inability to obtain the acid, or from any other cause, the poisonous indulgence is stopped, symptoms of illness are sure to appear, which have the closest resemblance to those produced by poisoning from arsenic. These symptoms consist principally in a feeling of general discomfort, attended by a perfect indifference to all surrounding persons and things, great personal anxiety, and various distressing sensations arising from the digestive organs, want of appetite, a constant feeling of the stomach being overloaded, early morning, an unusual degree of saliva,

tion, a burning from the pharynx, pains in the stomach, and especially difficulty of breathing. For all these symptoms there is but one remedy—a return to the enjoyment of arsenic.

According to inquiries made on the subject it would seem that the habit of eating poison among the inhabitants of Lower Austria has not grown into a passion, as in the case with the opium eaters in the East, the chewers of the betel nut in India and Polynesia, and of the cocoa tree among the natives of Peru. When once commenced, however, it becomes a necessity.

## THE EFFECTS OF RELIGION.

When the pulse beats high, and we are flushed with youth, and health, and vigour; when all goes on prosperously, and success seems almost to anticipate our wishes, then we feel not the want of the consolations of religion; but when fortune frowns, or friends forsake us; when sorrow, sickness, or old age comes upon us, then it is that the superiority of the pleasures of religion is established over those of dissipation and vanity, which are over apt to fly from us when we are most in want of their aid. There is scarcely a more melancholy sight to a considerate mind than that of an old man who is a stranger to these only true sources of satisfaction. How affecting and at the same time how disgusting, is it to see such a one awkwardly attempting to relieve them, while they mock his endeavours, and clutch his grasp! To such a one, gloomily indeed does the evening of life set in. All is snar and cheerless. He can neither look backward with complacency, nor forward with hope; while the aged Christian, relying on the assured mercy of the Redeemer, can calmly reflect that his dismissal is at hand, that his redemption draweth nigh. While his strength declines, and his faculties decay, he can quietly repose himself on the fidelity of God; and at the very entrance of the valley of the shadow of death, he can lift up an eye, dim with age, and feeble, yet occasionally sparkling with hope, and confidently looking forward to the next possession of his heavenly inheritance; to those joys which eye hath not seen, nor ear heard, neither hath it entered into the heart of man to conceive.

## THE HUMAN MACHINE.

In the course of an address to the Mechanics Institute of Washington, delivered by Prof. Henry, its President, in speaking on the subject of motive power, he said:—The human body is itself an admirable contrived complex machine, furnished with levers, pulleys, cords, valves, and other appliances for the application and modification of the power derived from the food. It is, in fact, a locomotive engine, impelled by the same power which under another form, gives activity and energy to the iron horse of the railway. In both, the power is derived from combustion of the carbon and hydrogen of the organic matter employed for wood or fuel. In both, the direction of power is under the influence of an immaterial, thinking willing principle, called the soul. But this must not be confounded, as it frequently is, with the motive power. The soul of a man no more moves his body than the soul of an engineer moves the locomotive and its attendant train of cars. In both cases the soul is the directing, controlling principle, not the impelling power. Let, for example, a locomotive engine be placed on the track, with water in the boiler, and fire in the grate, in short with all the potentials of motion, and it will still remain quiescent. In this state, let the engineer enter the tender and touch the valve; the machine instantly becomes instinct with life and volition; it has now a soul to govern its power and direct its operations; and, indeed, as a whole, it may be considered as an enormous animal, of which the wheels and other parts are additions to the body of the engineer.

## ANTIQUARIAN RESEARCHES AND THE BIBLE.

The New York Commercial Advertiser, speaking of Layard's new work entitled, "Discovery among the Ruins of Nineveh and Babylon," just published by Putnam, says:—

"Mr. Layard's volume abounds with corroborations of the historical portions of the Old Testament. Mound after mound, palace after palace, and even tombs and hidden vaults testify to the minutest truth of that inspired volume. Hosts of witnesses are distended from the hazy and almost forgotten past, and, by the grandeur and majesty of their testimony, expose the shallowness and ignorance of scoffers of the present. It would be an interesting task to gather into one volume all those corroborations."

TRUCE.—Mrs. Swisshelm asserts in the Pittsburgh Saturday Visitor, that it is extraordinary and imprudent, and nothing else, which keeps the laboring classes in the power of capital. The way to become independent, continues Mrs. Swisshelm, is "for every

man to live on half his wages, or less, if possible, until he buys and pays for an acre of ground, fences it, builds on it a house large and close enough to shelter himself, and family from winter storms. This is his fort. Then let him take all the time he now spends in taverns and other lounging places to lay in stores of ammunition and provisions, in the shape of useful knowledge gleaned from books and papers; grape vines, trees, potatoes and cabbages growing in the enclosure. If he plants every foot of it with something pleasant to the eye and good for food, no tyrannical employer can starve him into any degraded submission.

These sentiments are indeed, "not far from true." We agree with the editor of the New York Mirror, that Mrs. Swisshelm's article on this subject ought to be posted up on the walls of every workshop in the country.

The Connecticut Senate have passed the bill abolishing capital punishment. It provides that the convict shall be confined in a cell having an outer and an inner apartment—the outer cell to be the place of labor and rest, and into which no one shall enter until the prisoner shall have passed into the inner cell and be secured therein by bolt, except in case of sickness. It also provides that he shall in no case be pardoned unless new evidence of his innocence shall have transpired.

## DECLIVITY OF RIVERS.

A very slight declivity suffices to give the running motion to water. Three inches per mile, in a smooth, straight channel, gives a velocity of about thirty miles an hour. The Ganges, which gathers the waters of the Himalaya Mountains, the loftiest in the world, is, at 1800 miles from its mouth, only about 800 feet above the level of the sea—about twice the height of St. Paul's in London, or the height of Arthur's Seat in Edinburgh—and to fall those 800 feet in its long course, the water requires more than a month. The great river Magdalena, in South America, running for 1000 miles between two ridges of the Andes, falls only 500 feet in all that distance; about the commencement of the 1000 miles, it is seen descending in rapids and cataracts from the mountains. The gigantic Rio de la Plata has so gentle a descent to the ocean, that large ships are sent which have sailed against the force of the current all the way by the force of the wind alone—that is to say, which on the beautifully inclined plane of the stream, have been gradually lifted by the soft wind, and even against the current to an elevation greater than that of our loftiest spires. [Arnott's Physics.]

## RAILWAY PROGRESS.

We learn from our correspondent, that during the last week, the whole of the line of Railway from the Bend to Shediac, has been cut through and partially cleared to the full width, affording at several points very fine vistas through the green forest. We are informed that Mr. McMahon Cregan, who has been for some time encamped with Mr. Giles, to the southward of Shediac, on the road to the Barrachois, has just completed a most excellent map of the country between the Shediac river and Cape Brule, showing the coast, harbour, and bay of Shediac. It exhibits at one view, the soundings, deep water channels, anchorage ground, and all other information requisite for the formation of piers, &c., in connection with the Railway terminus at that Cape.

We also understand that Mr. Cregan, under the directions of Mr. Giles, has laid out two lines—one to Point Du Chene, and the other to Cape Brule, where it is proposed to establish the deep water Harbor for sea-going steamers, and the grand depot for heavy traffic. The gentlemen mentioned have been displaying great energy and ability, and we have no doubt that in such hands, our Railway system will be developed in the most able and scientific manner.

Letters have been received from Mr. Jackson by the last mail which intimate his intention of leaving England with Mr. Robert Stephenson, C. E., on Saturday last, in the steamer for Halifax. From thence Mr. Jackson will come directly to this Province, accompanied by Stephenson; and Mr. Jackson states it to be the full intention of himself and partners, to push on the Railways in New Brunswick as fast as possible; and to complete all of them much sooner than is specified in the contract.—New Brunswick.

LATEST FROM LONDON.—Dates from Paris of Friday state funds opened with a rise, but in consequence of rumours of Russian invasion of the Danubian Provinces, received a sudden check, and closed at a decline.

VIENNA, June 24.—Russia insists no longer on a special treaty with Turkey, but her demands are now confined to a guarantee in the form of a note.

European Intelligence.

FOUR DAYS LATER FROM EUROPE.

New York, July 10. The Collins steamship Atlantic, from Liverpool Wednesday 29th ult., at about 1 1/2 P. M., arrived here early this morning with 145 passengers.

The City of Manchester arrived out on Monday evening 27th ult.

ENGLAND.—The news is unimportant. Income tax bill has become a law. There have been long debates in Parliament, on the East Indian Government.

Very little is said relative to Turkish affairs; there being a general belief in the maintenance of peace. Insurance to the Danube, however, continues to advance.

The Prince of Wales has been suffering from an attack of the measles.

The young Prince was christened Leopold George Duncan Albert.

Hon. Henry Berkley has been spoken of as Governor of Jamaica.

The Australian Steamship Company, via Panama, have received a charter.

The strike at Stockport and Blackburn operates partially; but Manchester employers and workmen have not come to an open rupture.

Iron coin, electrolyzed, is in circulation; its spuriousness can scarcely be detected.

Mr. Van Buren was at Birmingham.

Mrs. Stowe was visiting Wales.

The crops in Ireland are luxuriant.

The weather in Britain is generally favorable to the growing crops.

In the north of Scotland rain is wanted.

OVERSEA MAIL.—Telegraphic despatches from Trieste announce the mail from Calcutta, May 15th, Hong Hong, 6th. Nothing from Rangoon.

At Calcutta trade was languid.

No Shanghai mail received, and nothing later in respect to the Chinese insurrection.

Australia advices still continue favorable.

MELBOURNE, April 6.—The total Australian exports, from Jan. 1 to April 5, amount to half a million ounces. Gold is worth £2 18s. 6d. per ounce.

FRANCE.—The proposed action of France in the Turkish question, is not known officially. It was reported that the Emperor had prepared a formal note to Russia, demanding whether her proceedings meant peace or war—France being ready for either. Reports add that Napoleon consents to withhold his note, on the earnest entreaty of M. Kistoleff, the Russian Minister. This may or may not be correct. M. Lemoine is charged with a private mission to La Plata.

The Bank of France has declared a dividend on the half year, of 70 francs.

Agricultural accounts from the Southern departments are bad, several districts being inundated.

SEAIN.—M. Calderon de la Barca is appointed Spanish Minister for Foreign Affairs.

Two shocks of an earthquake were experienced in the Canaries on the 27th and 28th of May. No damage was experienced.

The Crops in Spain are indifferent in their appearance.

It is reported that the Spanish ports will be opened for the free importation of wheat.

GERMANY.—S. Lohmann & Co., and Peltz, Eisfeldt & Co., of Hamburg, have failed.

SWITZERLAND.—The prospects for a settlement of Swiss matters are brighter. The blockade of the Piedmontese frontier is soon to be raised.

The Bernese are celebrating their fifth centenary of accession to the Union.

ITALY.—The report of an attempted outbreak in Lombardy was unfounded. The appointment of Count Berger to supersede Strasoldo, excites hopes of milder dealings towards Italy.

The eighth anniversary of the Pope's accession was celebrated at Rome.

TURKEY.—No hostilities have commenced yet, and general belief gains ground that there will be none. The Russians continue to collect troops along the frontier, and the Turks do not cease their warlike preparations.

HARON BRUCK, the Austrian Envoy, arrived at Constantinople on the 14th, and is understood to be charged with conciliatory proposals, though it is not known what they are. In short, Turkish affairs since last advices remain in statu quo, but with an improved feeling for peace.

HURRICANE AND LOSS OF LIFE. New York, July 10.—A tremendous hurricane, accompanied by lightning and rain, passed over the city and vicinity last evening, about six o'clock, doing great damage; many trees and buildings were injured.

At Brooklyn, a very large building, in tended for a store and dwelling, in the course of erection at the corner of Hicks and Montague streets, was completely demolished. The workmen had left but a few moments before, and it is believed no one was killed.

Tarrytown was the scene of a terrible catastrophe. A large building occupied by several poor families, and containing at the time over fifty persons, many of whom had taken shelter in it from the storm, was blown down, and the inmates buried in its ruins. It was known at last accounts that no more than six persons had escaped. Seven dead bodies had been taken out, and the citizens were busy in clearing away the ruins.

According to a statement in a Liverpool paper, the Cugard steamship Arabia made the run between New York and Liverpool in 9 days 17 hours 26 minutes—fifteen minutes quicker than any American steamship.

COMMUNICATIONS.

[For the Standard.]

Ma. Editor.—I wish to inquire through your columns, why the work on the St. Andrews and St. Stephen's road, lying between Capt. Mowat's and Carlow's line, has been stopped. There is not a piece of the road that repairs more than that very place. During the winter it is almost impassable from the snow drifts, and I have been obliged to drive over the very place which is at present staked out; but I trust that the Supervisor will have this part properly repaired at once: my neighbors to a man are desirous to have it done; and as we pay our taxes regularly, we have a decided interest in the road, and trust that our respected Supervisor will proceed with the repairs without further delay.

July 16, 1855.

To the Editor of the Standard.

Ma. Editor.—You are a married man, I am not a married woman, yet on account of your social position, I do not hesitate to correspond with you on a subject that has aroused my attention, and I am free to confess, my indignation.

In your paper of last week you published what I think you ought not to have done, a column of rhetorical stuff, the effusion of some uneducated pretensor, and from his assumed signature it may be inferred that he belongs to that portion of the British realm notorious for warm temper and cool impudence. In the last verse, and I would seriously recommend him to let it be his last, he alludes to the peaceful inhabitants of this picturesque and luxuriant village as "the Natives." There is something exceedingly mean in this expression, and is suggestive of the idea of our being a tribe of savages, or our "local habitation" as representing some oyster bed. Yet I do not feel so much annoyed at this, as his allusion to what he is pleased to call "a vile dirty habit," and a "distinguishing trait," viz:—

"The males chew tobacco, the females chew gum." With the males and their tobacco; I dare not venture to interfere, but I cannot refrain from giving expression to my feelings, on behalf of the sex to which I belong, and therefore I answer Hibernus that the chewing of gum, a practice I have for some time relinquished, contrasted with the chewing or smoking of tobacco, cannot be reasonably termed a "vile dirty habit," nor would any person possessed with proper feelings of respect, apply such a term to any pursuit of the most refined and beneficent portion of creation.

It is well known that this gum, and the manner in which it is used, is an excellent dentifrice, and also sweetens the breath; nor does it dissolve in the mouth, and thereby render its medicinal properties questionable. I have heard it asserted, and by a very mean fellow, that ladies in general are obliged to resort to this habit because they cannot keep their tongues still for one moment. Such a remark, and that of Hibernus, are in my opinion alike contemptible, and I shall feel greatly obliged to you if you will grant me the opportunity of publicly telling him so.

St. Andrews, July 15, 1855.

THE PROVINCE OF CANADA.—In the Report on the State of the Province, a comparison is drawn between the increase of population in this Province, and the United States: The total population of the latter in 1810 was 14,582,102; in 1850 it was 20,089,809—being an increase of 37.77 per cent.—In 1841, the total population of Canada was 1,156,139; in 1851 it was 1,842,269—being an increase of 59.34 per cent. But limiting the comparison to Upper Canada, the comparison is still more favorable to this country. In 1841, Western Canada contained a population of 465,357; in 1851, it had increased to 952,004; being an increase of 104.57 per cent. In 1831, the Wheat crop of Upper Canada was 13,692,852 bushels, or 13.33 bushels to each inhabitant; that of the United States, in 1850, was 100,479,150, or 4.33 bushels to each inhabitant. In proportion to population, it also appears, that Canada imports double the value of British goods imported by the United States.

The rumours which have been current lately of an early dissolution of the House of Assembly, are not likely, we understand, to be confirmed. The present House will be allowed to live out its time, and we trust that the several constituencies of the Province will be prepared, next summer, to make some considerable improvement in the Provincial Representation.—[Courier.]

The last of the original fathers of Frederickton died to-day, and a more upright man, or one more universally respected never "gathered up his feet" in death. Major Mathew Brannen has been known for many a long year to the whole public of the Province as the Chief Clerk in the office of the Provincial Secretary, and in this City, while he has been esteemed in every relation of social and domestic life, he has been especially regarded as a valued land-mark of the olden time. Major Brannen was a fine and favorable exemplar of the devoted and enthusiastic loyalty which the refugees brought with them to this Province—like his class he never loved the new opinions of these times, but with an integrity and consistency which never swerved, he adhered to his old standards, and died as he lived, a firm and fond believer in the good old ways. It is our full conviction that no single human being could be found who owed Major Brannen any other feeling than that of kindness and of good will.—[Head Quarters, July 13]

THE STANDARD.

WEDNESDAY, JULY 20, 1855.

EUROPEAN NEWS.—In another column we have given a synopsis of the news by the last steamer from England. As yet there is nothing definite in regard to Turkey and Russia. It is reported that the Russian government have sent a final offer to the Sultan, which he firmly and decidedly refused. Both parties were preparing for war. Notwithstanding the belligerent attitude of these powers, many of the English journals insist that there will be no war, as Russia, they assert, will retreat at the last moment, without fighting Turkey, backed as she is by England and France. In the mean time the Emperor of France, it is reported, is prepared to demand of Russia what her purpose is in respect of Turkey—peace or war; with an offer of friendly offices if peaceful, and an intimation of being prepared for war if that is the will of the Czar.

One of the chief cities of Persia, Shiraz, was destroyed by an earthquake, and twelve thousand of its inhabitants buried in the ruins.

The accounts from China are not very full. Nankin was taken by the rebels, who had crowned a new Emperor.

R. M. Steamship Arabia, on her last trip from New York to Liverpool, made the shortest passage on record, 9 days, 15 h. 11 m., thus beating the American steamship Arctic 15 minutes.

The New York Crystal Palace, or as it is pompously termed by the City papers, the "World's Exhibition," was opened on the 14th inst. The President of the United States was present on the occasion, thereby giving his sanction and influence to the undertaking (or speculation), although the N. York papers distinctly assert that it is not a National, State, or Municipal Exhibition of the World's Industry—but a Wall-street Speculation. Lord Ellesmere and suite were present at the opening of the exhibition.

THE TWELFTH OF JULY IN ST. JOHN did not pass off as quietly as was anticipated. From the Courier and other papers we learn that a young man named M'Evoy, was severely injured near the Suspension Bridge.

It appears that he and another young man were accompanied by some females from Eastport, and passed over the bridge, and when on the other side, a disturbance took place with parties in a wagon, which ended in M'Evoy being severely wounded. The New Brunswick concludes a notice of this melancholy affair thus:—"As many contradictory stories have been circulated regarding this affair, some of them highly colored and willfully false, we shall not hazard any opinion until a full examination has been had. We learn that the proper authorities are taking the necessary steps to secure a searching investigation into this matter."

CUBA.—Recent accounts from Cuba indicate that the government of the Island are about adopting stringent measures for suppressing the Slave trade; and yet there were upwards of 1,000 fresh Coolies from China.

The St. John Observer, commenced its 26th volume, last Tuesday week. We have long considered the Observer one of the best family papers in the Province. We wish its respected proprietor abundant success, and that he may be spared to see another quarter of a century.

FIRST CHRISTIAN PRINCE IN INDIA.—Maharajah Dhuleep Singh, a Prince of the reigning family of Lahore, a youth of 16, who was carefully educated by a Christian Minister, was formally admitted into the Church by baptism on the 8th of last March, after a careful examination. A number of the civil and military authorities, and missionaries, were present at the interesting ceremony.

NEW POTATOES.—The first new potatoes were brought into town on Saturday last, and were raised by Mr. Henry J. Carlow, of this Parish, who realized the handsome sum of 15s. per bushel. They were large, sound and dry, as we can say from experience, having been presented with a sample, for which we tender our thanks.

MORE LABORERS FOR THE RAILWAY.—Messrs. Jas. Sykes & Co., with that commendable zeal which has stamped their proceedings since they commenced work on the Line, have sent out a further supply of laborers for the St. Andrews & Quebec Rail-

road. The men, with their families arrived here on Tuesday, from England, via Boston. They are a robust looking set of men, and we trust may become permanent settlers.—We have pleasure in stating, that at an early day the locomotive will run over the 26 miles. Wood goods, may then be expected at somewhat lower rates than have ruled for the last few months.

QUICK TRAVELLING.—A friend who resides in this place, left Montreal on Monday morning last, and arrived in St. Andrews on the afternoon of the following day. The distance from Montreal to Portland, 292 miles, was performed in 12 hours, including stoppages. He came by the first train, which ran the whole distance on the Atlantic and St. Lawrence Railroad.

ROBBERY AT SAINT STEPHEN.—At Mrs. Mark's St. Stephen Hotel, a most consummate Robbery came off, on Sunday afternoon 31 inst. The actors were two young lads—Libbey and Foster, Libbey, the older, not over 16 years of age! The particulars, in substance are as follow: Libbey, after dinner, requested Mr. Luches, a boarder at the Hotel, to change him a ten dollar note—the gentleman, willing to oblige, went up stairs to his room to get the money, when Libbey followed, and went into an opposite room, which he had occupied having lately come on from Boston, with his associate. From this room, Libbey watched Mr. Luches' movements, and had an eye to what gentleman's trunk he was satisfied himself in that particular, he went down stairs before Mr. Luches, and received the change of his bill.—Sometime after, all the boarders except one and the boys, left the Hotel to attend worship—when those young "blacklegs" found the way into Mr. Luches' trunk, extracting therefrom 425 Dollars! The lads went immediately to Calais, hired a horse from a Mr. Sharp and heedless of the bells which summoned man to prayer, proceeded towards Eastport. On Monday evening the money was missed, and the young rogues suspected; accordingly Mr. Sharp followed in chase of his horse, and Mr. Luches in search of his cash. After a variety of dodging, marching, and counter marching, riding, and running, on the part of Libbey & Foster; and pursuing, enquiring and telegraphing by Luches & Sharp, the fugitives were finally overtaken at Cherryfield, and some of the money obtained. Libbey's father lives in Boston; he was telegraphed for, and in due time appeared, paid up all demands—principal and incidental costs—and ten dollars for the landlady. Mrs. Marks, to pay the boys' board bill—the promising youths were then restored to liberty—and old Mr. Libbey, and young Mr. Libbey, and Mr. Foster Jr.,—all wended their way to Boston—"three jolly good fellows together yet."—St. Stephen Patriot.

STABLE EXPORTS.—We learn from a return posted to the News Room this morning, that during the three months ending the 5th instant, 26,226 tons of Pine Timber, 2372 tons of Birch Timber, 51,308,000 feet of Deals and Battens, and 1,161 feet of Boards and Scantling, were exported from this port to the United Kingdom.—[Courier.]

The crops generally throughout the country continue very promising. Potatoes and grain will, without doubt, yield abundantly; but we believe that upland grass, owing to the extremely dry weather which has prevailed for some weeks back, will be rather light. Timber, Deals, and Logs continue to command very high prices, and, as a large quantity has been got out of the streams, the market is well supplied.—[lb.]

TRADE TO THE UNITED STATES.—On Wednesday last the Eastern City took about 300 passengers to Boston and a considerable freight, one of the chief items of which was the enormous quantity of 32,000 lbs. of salmon, for the American markets. On Saturday she brought to St. John over 300 passengers and an immense freight. The increase of business and travel is really astonishing.

THE NEWFOUNDLAND TELEGRAPH.—We learn from the Halifax Recorder, that active exertions are being made for the laying of the line of Telegraph from the shores P. Edward island to Newfoundland, and we trust to hear of its complete success in the course of a few months. Mr. Gisborne, the enterprising projector, is now engaged in placing the overland wire from Cape Ray to St. John's, the extreme points of Newfoundland, and has upwards of 200 men employed in the work. This project is now warmly supported by capitalists in Great Britain, and when we consider the great saving of time it will effect in the transmission of intelligence from the Old to the New World, it must be considered as one of the most important movements of this wonder-working age.—[New Brunswick, &c.]

LATER FROM CALIFORNIA.—The steamer Illinois, from Aspinwall, arrived at New York on the 11th, with California dates to the 16th June. She brought \$1,896,000 in gold, and 500 passengers.

The leading bankers of San Francisco have advanced the rate of exchange to 4 per cent, in consequence of an advance of half per cent on freight of treasure.

The prospects of an abundant harvest were still good, especially wheat; and the intelligence from the mines continued cheering.—The thermometer stood at 95 to 107 in the shade. The Sonora expedition was again reported as about to depart from San Francisco.

Major Harby and Mr. Young had been found murdered near the San Joaquin river.

The Clipper ship Carrier Pigeon, from Boston for San Francisco, was lost on Point New Year, about 30 miles south of San Francisco, on the 9th July.

The following items of news from the Isthmus embrace all that are of interest:

The contractors commenced work upon the Panama and the railroad on the 20th of June. The foundation for the new bridge at Barbacoas was completed, and the bridge would be laid as soon as it was received from New York. This was expected to be done, and the road finished to Mauchin, seven miles farther, within three months. This will make 30 1/2 of the whole 40 miles of the road.

The Lunatic Asylum at Columbus, Ohio, is now full, containing upwards of five hundred patients. In fourteen years there have been admitted 2,116 patients, of which 1,938 were discharged recovered. Of the number admitted, 595 were farmers, being more than twelve times the number of those of any other occupation, except laborers, of which class there were 160. The next highest on the list is teachers, being 40. There were 24 clerks, 22 preachers, 21 tailors, 9 lawyers, 6 printers, 3 sea captains, 2 musicians, 2 medical students, &c.—Among the causes, spirit rappings is now the most frequent.—[Boston Weekly Traveller.]

IMPORTANT.—News has just reached town, that the Fishermen of Newburyport and some adjacent American harbours have combined and are arming to the teeth, determined to defend themselves against the British forces hovering in protection of the Fisheries.—It is said they vow vengeance upon the Canadian cruisers in particular. We believe this news will be found to be authentic.—[Recorder.]

THREE DUELS.—The most exciting items of intelligence from San Francisco, relate to the recent attempts of six "honorables" men to murder each other in duels. Two of these fights were with rifles, at twenty and thirty paces distance, the parties wheeling and firing at the word. One of these fights was between Senator Gwin and the Hon. J. W. McKelvey, in consequence of some offensive remarks made by the latter while on the race course. They fired at each other three times at thirty paces distance, without effect, and then discovered that they had been acting under a "mistaken apprehension of facts" which being fortunately explained, caused the further attempts of the parties to shoot each other unnecessary.

Another duel took place between one Alderman Hayes and John Nugent, editor of the San Francisco Herald, in consequence of the severity of remark indulged in by the editor. This was fought at 20 paces, with rifles; and at the second shot Nugent fell, his arm being badly shattered and the muscles of the back being wounded. His fall raised a savage yell from the spectators, a large number of whom were present to enjoy the sport.

A third duel was between a Mr. Tojy, clerk of the Board of Aldermen, and a Dr. Crane of Mississippi. This was with duelling pistols, at ten paces. At the second shot Dr. Crane fell mortally wounded, and expired the next day.

As a barometer to these prominent figures in the moral picture of California, the papers abound in accounts of personal rencounters and various acts of violence in different parts of the State, resulting, many of them, in loss of life.

MARRIAGES.—At St. John on the 11th, at the residence of Mr. John Anderson by the Rev. A. McLeod Staveland, Mr. John M. Anderson, of that City, to Sarah Jane, eldest daughter of Mr. George McCulloch, of this place.

NOTICE.—WE hereby forbid all persons purchasing, or in anywise interfering with the two lots of land advertised at Sheriff's sale, lying on the Wessely side of LEANING river, Nos. 6 and 7, formerly granted to Francis Hatt, deceased, and now belonging to his heirs James Hatt, right was seized and sold on mortgage by W. P. Chandler in 1850, to satisfy a debt of E. & J. Wilson's. James Hatt has no right or claim to the property.

SAMUEL HATT, JAMES LEAMONS, May 2<sup>d</sup> 1855.

Dentistry. DR. R. B. PATTERSON has visited St. Andrews, and taken rooms at Bradford's Hotel, where he will remain for two days only. He will be happy to wait on all who may require his services. All operations warranted to give satisfaction.

R. B. PATTERSON, Surgeon Dentist, St. Andrews, June 22, 1855.

CROWN LAND OFFICE, June 29, 1855. THE upset rate of Millage this year will be Twenty Shillings, and the purchasers are to have the option of taking the grounds for one year only, at the rate at which they are bid in, or for two or three years, (including the first,) at the rate of Fifty Shillings per square mile for each year; unless the ground is bid off at a rate exceeding Fifty Shillings, in which case such higher rate will also be the rate on each renewal. The millage on all renewals to be paid in advance before the 1st day of June in each year, and unless so paid the privilege to renew will be forfeited.

ROBT. D. WILMOT, Sur. Gen.

CAUTION.—All persons are forbidden trespassing on BIG HARDWOOD ISLAND, as any one found so doing, will be prosecuted according to law. St. Andrews, June 29, 1855.

the firm of CHRISTIE & ARMSTRONG,  
as Merchants Tailors, is this day dissolved by  
mutual consent.  
JAMES CHRISTIE,  
THOMAS ARMSTRONG,  
St. Stephens, 2d Feb. 1853.

**APPRENTICES.**  
Wanted, two Boys from 14 to 16 years of  
age to learn the Printing business.  
Apply at the  
STANDARD OFFICE.

**NOTICE TO PERSONS WHO HAVE AP-  
PLIED FOR CHILDREN FROM EN-  
GLAND.**  
GOVERNMENT EMIGRATION OFFICE,  
St. John, 21st April 1853.  
The copy of a despatch to His Excellency the  
Lieutenant Governor, from His Grace the Duke  
of Newcastle, Her Majesty's Principal Secretary  
of State for the Colonies, has this day been re-  
ceived, and in consequence of the proposed emigra-  
tion of children from England to this Province will  
not take place. The following is the substance of  
the despatch, which is dated Downing  
Street, 29th March, 1853:—"Considering therefore  
the difficulties and dangers of executing the plan,  
and seeing that after all, there is no prospect that  
it could be carried to any such extent as to be of  
importance to the interests of the Province, I do  
not think that it ought to be prosecuted further."  
(Signed) NEWCASTLE.  
Persons in all parts of the Province who have  
made application for children from England, will  
please take notice that such cannot now be fur-  
nished.  
M. H. PERLEY,  
H. M. Emigration Officer.

lic generally, with—  
FLOUR, MEAL, CORN,  
All the articles usually found in a Gro-  
cery Store,  
On as good terms as any other establishment,  
March 14, 1853.

**Duke of Wellington;**  
By Lieut. Col. Williams; (a Companion in  
Arms of His Grace.)  
Comprising the Campaigns and Battles—  
Fields of Wellington and his Courages,  
the Political Life of the Duke and his  
Contemporaries, and a detailed account  
of England's Battles by Sea and Land,  
from the commencement of the Great  
French Revolution to the present time,  
interspersed with Anecdotes, Personal  
Incidents, and Adventures, etc.  
ADDRESS.  
The earthly career of Arthur Duke  
Wellington has closed; one of the greatest  
men of the nineteenth century, the fore-  
most military commander of any age, has  
paid the debt of nature. The time has now  
arrived for giving to the world a History  
of the Great Captain—the Events of his  
Life and Time—a life marked by patriotism,  
probity and honour, and events the greatest  
which have ever agitated the civilized  
world, and whose influence will be felt  
upon society till the end of time. Such a  
work must appeal to the best and "proudest"  
feelings in the heart of every Briton—the  
glory of his country, the honour of its name  
and position among the nations—may be  
own existence as a freeman, are recorded  
and engraven in the annals of the world  
fought fields, and the deadly imminent  
breaches, the immortal battles and the glori-  
ous places in which Wellington and his  
Companions in arms gathered infusing laurels,  
and rearing on the highest pinnacle of fame and  
glory, and tore the victor's wreath from the  
brows of heroes decorated with the trophies  
of Egypt, Egypt, and Germany.  
To supply such a desideratum in Eng-  
lish literature, the publishers of The Life  
and Times of the Duke of Wellington have  
determined to produce a book which shall  
present to the reader, not only the dry  
details which a mere biographical sketch  
would afford, but a comprehensive work,  
embracing the contemporary history of  
the period; exhibiting the circumstances  
which brought about the great events in  
which the Duke and his contemporaries  
were engaged, and giving to the reader a  
connected narrative of the lives and actions  
of the Warriors and Statesmen of the nine-  
teenth century; and this from the pen of  
one who was a companion in arms of the  
great hero, and participated with him in  
many a well fought out view, the Pub-  
lishers have determined that the work shall  
be profusely illustrated by Portraits of the  
Warriors and Statesmen of the last half  
century who have shed a lustre upon the  
history of their country; also representations  
of the most important engagements by  
sea and land from the period of 1780 till  
1852; so that the work, when finished, shall  
form an illustrated Gallery of the Naval and  
Military Exploits of England.  
It has been well said, "Character is the  
true strength of nations; true glory their  
best inheritance. When the time shall  
come that the British heart no longer thrills  
at the names of Cressy, Poitiers, Agin-  
court, Blenheim, Ramillies, Oudenarde,  
Malpique; of Talavera, Salamanca, Tou-  
louse, Waterloo,—the last hour of the  
British Empire will be struck." The pro-  
motion and elevation of national spirit and  
feeling is therefore the duty and interest  
of every true and loyal son of England.  
May Heaven inspire the hearts of every  
one of us with that spirit and feeling.  
Condition of Publication.—The work  
will be issued on the 1st and 15th of every  
month, in Parts at 1s. 3d., and Divisions  
handseamly bound at 9s. 4d., printed on Im-  
perial 8vo double columns, each part will  
be embellished by two highly finished steel  
Engravings, and will contain 32 pages of  
letter press. A beautiful steel Engraving,  
13 by 19 inches, the storming of Sering-pa-  
tam, the first victory in which the late Duke  
of Wellington was engaged in India, to  
every subscriber to the work.  
GEO. GAY,  
Agent.

**JUDSON'S  
CHEMICAL EXTRACT OF**

**CHERRY AND LUNGWORT,**  
FOR THE CURE OF  
Coughs, Colds, Hoarseness, Spitting  
of Blood, Night Sweats, Asthma,  
Liver Complaints, and  
CONSUMPTION.

DO NOT NEGLECT IT.  
CONSUMPTION  
Can be and has been cured in thousands of cases by this only certain remedy.

**JUDSON'S CHEMICAL EXTRACT OF  
CHERRY AND LUNGWORT,**  
and no remedy has ever before been discovered that will certainly

**CURE CONSUMPTION.**

The most strongly marked and developed cases of Pulmonary Consumption, where the lungs have become diseased and ulcerated and the case so utterly hopeless, as to have been pronounced by Physicians and friends, to be past all possibility of recovery, and at times thought to be dying, has been cured by this wonderful remedy, and are now as well and hearty as ever. It is a compound of medications which are peculiarly adapted to and essentially necessary for the cure of

**COUGHS AND CONSUMPTION.**

Its operation is mild, yet efficacious; it loosens the phlegm which creates so much difficulty, relieves the cough and assists nature to expel from the system all diseased matter, by exhalation, producing a most delightful change in the breathing and chest, and this, after the prescriptions of the very best medical men and the inventions of kind-sorrowing friends and Nurses, have failed to give the smallest relief to the Consumptive sufferer.

THOUSANDS OF CONSUMPTIVE persons have been deceived in buying medicines which were said to be infallible cures, but which have proved only palliatives, but this medicine is not only a palliative but a cure for ulcerated lungs. It contains no deleterious Drugs and one trial will prove its astonishing efficacy better than any assertions or certificates in curing coughs and all diseases of the Lungs, such as Spitting of Blood, Coughs, pains in the side and chest, night sweats, &c. &c. About 1000 certificates of almost miraculous cures, performed by this medicine, from some of the first Doctors, Clergymen and Merchants, have been sent us for this medicine, but the publication of the looks too much like Quackery, [will show them to any person calling at our office.] This medicine will speak for itself and enough in its own favour wherever it is tried.

Caution.—This medicine is put up in a large bottle and you must find the name of Comstock & Brother, Proprietors, New-York, on the splendid Wrapper around the bottle. All orders must be addressed to Comstock & Brother, No. 9, John St. New York.

**CARLTON'S FOUNDER OINTMENT.**

For the cure of Founder, Split Hoof, Hoof bound Horses, and contracted and Feverish Feet, Wounds, Bruises in the flesh Galled Backs, Cracked Heels, Scratches Cuts, Kicks, &c., on horses.

**CARLTON'S RING-BONE CURE.**

For the cure of Ring Bone, Blood Spavin, Bone Spavin, Windgalls, and Splint—a certain remedy.

**CARLTON'S CONDITION POWDER,  
FOR HORSES AND CATTLE.**

The changes of weather and season, with the change of use and feed, have a very great effect upon the blood and sinuous fluids of horses. It is at those changes they require an assistant nature to throw off any disorder of the fluids of the body that may have been imbibed, and which, if not attended to, will result in the Yellow Water, Heaves, Worms, Bots, &c. All of which will be prevented by giving one of these powders, and will at any time cure it when any symptoms of disease appears if used in time. They purify the blood, remove all inflammation and fever, loosen the skin, cleanse the water, and invigorate the whole body, enabling them to do more work with the same feed. The action of these powders is direct upon all the secretory glands, and therefore have the same effect upon the Horse, the Ox, the Ass, and all Herbivorous animals—all diseases arising from or producing a bad state of the blood are speedily cured by them.

**GENUINE LINIMENT.**

This Liniment is an invaluable preparation for rheumatism, sprains, wounds, strains, and other injuries, such as bruises, cuts, stiff joints, lumbago, scalds, lame Backs, &c.

Directions.—Shake it directly using and apply it once or twice per day, to the part affected, and rub it in.

N. B. It has also been found one of the best applications for horses and oxen that can be produced for all sprains, wounds, cuts and galls, &c.

Prepared in St. Stephen, N. B. by  
JACOB HALEY

**RHEUMATIC DROPS.**

The best Medicine for Rheumatic Pains or pain in the Stomach or Chest, ever offered to the Public.

Take one Teaspoonful three times a day, morning, noon and night. Externally used, apply it to the part affected and rub it in thoroughly, and it will not fail to give almost immediate relief in the very worst cases. Also, a certain cure for Cholera or Bowel Complaint.

Prepared by  
St. Stephen, N. B. JACOB HALEY.

**OINTMENT!**

A sure and efficacious cure for the Itch, scald-head, and other diseases of the skin, and sores, burns, &c.

Apply a small portion once or twice per day to the diseased part.

Prepared by JACOB HALEY,  
St. Stephen, N. B.  
The above Medicines are for sale at the store of Messrs. Donald Clarke, and Miles S. Hannah

**NOTICE TO THE PUBLIC**  
AND  
Instructions to Postmasters and Way Office Keepers.

HER Majesty's Government have concluded a new Contract with the Peninsular and Oriental Steam Navigation Company, for the conveyance of Mails, by packet via Southampton, to Gibraltar, Malta, Egypt, Ceylon, India and China, twice in every Month, instead of once, as heretofore, and Mails for these places, will, in future, be dispatched from Southampton, on the 4th and 20th of each month; and from London, via BRISTOL, on the 8th and 24th of each Month.

The Company have also undertaken to provide a Packet to convey Mails, once in two Months (in connection with the India Mails) of the 4th of the Month, via Southampton, and of the 8th, via BRISTOL, between Singapore and Sydney, New South Wales, calling at Batavia, King George's Sound, Adelaide, and Port Phillip; thus forming alternately with the direct Packets, via the Cape of Good Hope, a regular monthly communication between the United Kingdom and the Australian Colonies.

The Rates of Postage on correspondence for Ceylon, India, China, and Australia, when forwarded via Southampton, will be 2s. sterling, or 2s. 6d. currency, per single letter, not exceeding half an ounce in weight, which must be paid in advance; but all letters for the above places, specially addressed to be forwarded via BRISTOL, will be liable to a rate of 2s. 10d. sterling, or 2s. 6d. currency, per single letter, weighing under a quarter of an ounce, which must also be paid in advance.

Newspapers will be transmitted free.

J. HOWE,  
Postmaster General.

General Post Office,  
St. John, N. B., March 5, 1853.

Life of our Lord and Saviour Jesus Christ, by the Rev. J. Fleetwood.

The Complete Works of Flavius Josephus.

Fox's Book of Martyrs, edited by the Rev. J. Kennedy.

Buayan's Pilgrim's Progress, the Holy War, and other select Works of the author, with his Life written by himself.

The People's Scripture Gallery of Engravings.

GEO. GAY, Agent.

The above Works are now publishing in semi-monthly parts, at 1s. 3d. each. Subscribers names received at this Office.

St. Andrews, Sept. 25, 1852.

**PACKET SPRAY.**

THE well known Packet Schooner SPRAY, will resume her trips about the 1st of February, sailing from St. Stephens and St. Andrews for St. John; this Packet needs no puffing with respect either to the qualification of the Master or the Vessel.

The subscriber begs to return his sincere thanks for the very liberal patronage he has received for the last four years, more especially the past one; in consequence of which he has been enabled to reduce the price of freight materially for the time to come, and respectfully solicits a continuance of patronage.

Particular attention will be given as usual to all business entrusted to him, which will be executed with punctuality and despatch.

Good accommodations for Passengers—Fare 2s. 6d., until the steamers commence running again.

JOHN BALSON,  
Master.  
St. Andrews, Jan. 19, 1853.

**Flour, Butter, Fruit.**

THE subscriber has just received, per sch Enterprise, via New York, 300 Barrels No. 1 Canada S. F. FLOUR.

30 Packages Raisins, &c.

DONALD CLARK,  
St. Andrews, Dec. 8, 1852.

**Valuable Properties for SALE OR TO LET.**

THE Dwelling House, Stores and Wharf, in the town of St. Andrews, formerly known as the Jones' property.

The Dwelling House, Out Houses and Wharf, in said town, formerly known as the O'Neil property.

100 Acres of Land in St. James, about one hour's drive from Milltown, St. Stephen.

100 Acres of Land in St. Patrick, through which the St. Andrews & Quebec Railroad is projected, and in which, or in its immediate vicinity, will be established a Depot, which will very materially enhance its value.

15 Acres of Land, within five minutes' walk of the town of St. Andrews, a delightful situation for a Country Seat. If not shortly disposed of, it will be laid off in suitable lots for building purposes, and let on leases of improvement.

The subscriber begs to announce to the Public, that he has had his Lands, which are within ten minutes' walk of Chamcook, laid off, and will sell or lease Building Lots on advantageous terms. It is evident, that, owing to the Railroad passing through it, possessing a safe and commodious harbor accessible at all seasons to vessels of the largest tonnage, with an unlimited and unrivalled water power, on which there are already some manufactories, with others of a most extensive scale proposed and on the eve of springing into immediate operation, that Chamcook is one of the most desirable situations within the British North American Colonies, for the Capitalist, the Mechanic, and operator. In view of which the said Building Lots are offered to the Public. Terms reasonable.

B. R. FITZGERALD,  
Saint Andrews, June 30, 1852.

St. Andrews, Oct. 12, 1852.

**NOTICE.**

WHEREAS Licence to sell all the Real Estate of Nevin Thompson, late of Saint George in the County of Charlotte, yeoman, deceased, was, on the 25th day of September last past, duly granted by the Court of Probate for the said County, to me, the undersigned Administrator of all and singular the goods, chattels and credits of the said Nevin Thompson, for the purpose of paying his debts:

And Whereas, the real estate of which the said Nevin Thompson died seized, consists of the undivided moiety or half part of lot number Two, in the grant to Alexander M'Vicar and others, in Mezzanine, in the said Parish of Saint George, and which descended to him the said Nevin Thompson is here at law of his father, the late Ebenezer Thompson, and which said lot is bounded as follows: On the West by land granted to Nevin M'Vicar; on the East by land owned by John M'Vicar; Northerly by land owned by John M'Nichol; and Southerly by the Campbell grant, (so called), and as the same lot heretofore conveyed to the said Ebenezer Thompson, by Alexander M'Vicar.

NOTICE therefore is hereby Given, that I the undersigned, as Administrator as aforesaid, shall proceed to sell the above described Real Estate, under and by virtue of the said licence by Public Auction, on Tuesday the 7th day of December next, at 12 o'clock, noon, at the Home-stead, on the Premises.

Dated St. George, 25th October, 1852.  
JOHN NICHOL,  
Administrator
