Germany Opposes Reduction of European Force

At Tien-Tsin and Restoration of Chinese Control.

Auspicious Opening of the Colonial Exhibition at Dimsdale-Victoria's Grandchild May Rule Holland.

London, March 11 .- A Pekin dispatch says: The policies of Germany and Great Britain in China, which Great Britain hoped had been consolidated by the signing of the Yang-Tse agreement a year ago, have developed an antagonism equal to that of Russia and Japan over Manchuria, and seriously evolving the interests of other nations. Germany is

refusing to agree to the reduction of the large garrisons the European governments are maintaining at Tien-Tsin and the restoration of the control of the native city of Tien-Tsin to the Chinese. The British diplomatists are trying to help the Chinese to regain the government of Tien-Tsin and the reason for the British action in blocking the payment of the February installment of the Chinese indemnity was to bring Germany to terms. The British diplomats regard the argument that the municipal government of Tien-Tsin by Europeans is a military necessity as a subterfuge, and in her role of protector of the Chinese against foreign aggression involved in Anglo-Japanese alliance, and hoping to increase her prestige among the Chinese. Great Britain is helping them to regain Tien-Tsin. American influence is being used to the same pur-

A prominent Manchu censor has memorialized the throne for the removal of Wu Ting Fang, the Chinese minister to the United States. The censor asserts that Wu Ting Fang surreptiously abtained, ostensibly for repairs to the Chinese legation in Washington, \$80,-000 of the Tien Tsin silver refunded by the American Government. According to a dispatch from Washington, dated Jan. 23, Secretary Hay that day handed to Minister Wu Ting Fang a draft on the United States treasury for \$376,-000, the value of silver bullion captured by American marines at Tien Tsin. The Washington dispatch continued that as Minister Wu is charged with the

### THE ELECTION IN VICTORIA

Col. Prior Defeats Mr. Bodwell by Thirty-Two Votes.

Bitter Fight in Which the Fate of the Dunsmuir Cabinet Was Involved.

Victoria, B. C., March 10 .- Col. Prior again asserted his prestige in Victoria tonight, when Mr. E. V. Bodwell, the opposition candidate, went down to defeat before him. The fight was the bitterest in the history of the city, and and awakened the greatest interest throughout the province. Throughout the campaign Mr. Bodwell had the advantage on the platform, and was believed to have the superior organizamendous leverage of the alleged con-

tract made by the government with the Canadian Northern, to make their Pacific terminus, in Victoria, to help him. The opposition held that this contract was an attempt to gold-brick the city, and this was in a measure borne out by the many impossible terms of it. At the last moment, Premier Dunsmuir announced that he had sold the E. and N. Railway also to Mackenzie & Mann, thus insuring a terminus in Victoria, and this doubtless had an effect in assisting Col. Prior. Many prominent Conservatives supported Mr. Bodwell, while Col. Prior had the assistance of the Martinite Liberals.

The oppoition claim that maney was used freely, and that the final result was attained by its liberal use. In the committee rooms, after the election concluded, Mr. Bodwell made a ringing speech, in which he alleged wholesale corruption, and in which the announcement was made that the election would be protested. This will doubtless be

The result, however, gives Premier Dunsmuir twenty of a following in the house, with the support of the five Martinites, while the straight opposition number sixteen. Mr. Martin, to save the government, will have to indorse the enormous land grant to the Canadian Northern, against which system he was pledged in the Van-

couver convention. Had Col. Prior been defeated the government would in all probability have resigned. The figures were: Bodwell, 1,501; Prior, 1,533, making the majority for Prior 32.

> London, March 11 .- It is feared that Lord Kitchener's incomplete accounts have not told the worst about the latest British disaster, but among the tendency to accept Mr. Broderick's ad- were cries of "Shame! Shame

Distinguishing features of the editorials in this morning's papers on this matter are, first, the outburst of sympathy for Gen. Methuen, which is quite extraordinary, when it is remembered how he was assailed with hostile and angry criticism during the early stages of the war, and, second, the fierce denunciation of the Irish members of parliament, who indulged in hilarity at the reading by Mr. Brodrick in the House of Commons of the dispatch announcing Lord Methuen's capture.

In this connection it is worth noting that neither John Redmond nor T. P. O'Connor were present, while T. M. Healy disclaimed any sympathy with the demonstration.

At the same time the papers fully admit the extreme gravity and even the humiliation of British prestige abroad, involved in such a reverse inflicted by a body of Boers of equal vas 81,405 ounes.

numerical strength. It is recognized that although the damage is more moral than material, it may have the effect of prolonging Boer resistance for many months.

IN PARLIAMENT. London March 10 -Lord Kitchener's dispatches announcing the disaster to Gen. Methuen's forces were read in both the House of Lords and House of Commons today by Lord Roberts, the commander-in-chief, and Mr. Brod-They both paid tributes to Gen. Advices from Aux Cayes, a town on Methuen, the former expressing his he south coast of Hayti, announce appreciation of Methuen's success throughout the war, declaring that his task of forcing the Boer position at Magersfontein was an almost impos-

sible one. LORD ROBERTS' PLEA. Lord Roberts, the comamnder-inchief, who announced the British disaster in the House of Lords, said Gen. Methuen for over two years had carried on his work with zeal, intelligence and great perseverance, and adding that the general was beloved of his men, and that no work was dangerous or difficult for them or Gen. Methuen. The commander-in-chief was sure the house was deeply grieved at what had occurred. He would ask their lordships to concur with him in his sympathy for the gallant officer in his present unfortunate position and defer adverse criticism till they had definite information as to who was

directly responsible. From Delarey's conduct throughout the war they could all be assured that Gen. Methuen would be taken great

LIBERAL SYMPATHY. Lord Spencer (Liberal), the former

president of the council, said he thoroughly believed in Gen. Methuen's zeal. He did not want to offer, a hint of criticism at the present time.

THE PREMIER'S WORDS. The premier, Lord Salisbury, also expressed sympathy with Gen Methuen under the present unfortunate circumstances. He said it was not the time to discuss his action. He had always acted with the greatest gallantry, and the premier, therefore, thought they should defer criticism or examination of the very sad intelligence until the details arrived. His lordship was convinced Gen. Methuen had done his best in connection with this most

melancholy affair. IN THE LOBBIES. The feeling of depression in the obbies of the House of Commons over the news of the disaster in South Africa was very marked. The service members of the house expressed the tion, but Col. Prior came into the field opinion that it will necessitate sending two weeks ago, backed by all the forces | fresh troops to the front, while the beof the government, and with the tre- lief was widely expressed that the Boers will not fail to take advantage of as a hostage for the safety of Commandant Kritzinger and other Boer leaders now in the hands of the British.

BOERS WORE KHAKI. Advices received say that the force under Gen. Delarey was almost entirely dressed in British uniforms. This made it impossible for the infantry to distinguish between their own men and the enemy when the mounted troops were driven in on them. The enemy numbered about 1,500 men. They had one 15-pounder and a pom-pom. Delarey, Calliers, Kemp, Tromp and other com-

mandants, were present. In a private telegram just received here Lord Kitchener adds: "I find Methuen has a fractured thigh, but he is reported to be doing well."

THE NEWS IN LONDON. The news that Gen. Lord Methuen and four guns had been captured by the Boers commanded by Gen. Delarey came like a thunderbolt don. The extra editions of the evening papers giving an account of the disaster were eagerly bought up and bitter remarks were passed on the subject of the government's declaration that the war in South Africa was

over. The news came too late to affect business on the stock exchange, but excited curb dealings quickly lowed the close, in which South Afri-cans slumped heavily. The news caused excitement in the mine market. Shares were offered freely at

first, but by 6 o'clock the excitement had abated, and the curb tone hardened. The news was received in the House of Commons amid great excitement. The reading of Lord Kitchener's telegram by the war secretary. Mr. Brodrick, was listened to in deep silence, which was broken by newspapers and the public there is a loud Irish cheers. Instantly there the government benches. Then the vice to suspend judgment pending the Irish members seemed to think better of their outbreak and suddenly subsided. The subsequent eulogistic references to Gen. Methuen were received

with cheers. ONE OF WAR'S WORST REVERSES. Delarey has inflicted what is generally admitted to be one of the worst

reverses the British have suffered throughout the whole war. It is supposed that Lord Methuen was marching with the intention to avenge the capture of the Von Donop convoy. The newspaper correspondents in South Africa have not yet been allowed to describe the affair. The only additional details available are contained in a further dispatch from Lord Kitchener which Mr. Brodrick, secretary of war, read just as parliament was

adjourning.

HOW IT HAPPENED. This dispatch shows that the first confusion was caused by native boys with horses, who galloped through the mule convoy as the latter were endeavoring, by Lord Methuen's directions, to close on the ox convoy. The disorder among the mules confined itself to the mounted troops, and the Boers, dressed in khaki and riding alongside the wagons, frustrated all the attempts of the British officers to rally their forces. Great confusion ensued among this portion of the mounted troops, they and the mule wagons galloping three miles beyond the ox wagons, where they were cut off.

FOUGHT BRAVELY. Sections of the 4th and 38th Batter. ies of Artillery fought with great gal-lantry, and 300 men, composed of the Northumberland Fusiliers and Lancashires, showed conspicuous courage in protecting the wagons and re-

fusing to surrender until resistance was useless. Gen. Methuen was seen by an agent of the intelligence department.

was being well cared for in his own A LETTER FROM LORD METHUEN In connection with the capture of Lord Methuen, the following item from

English papers just received is of interest: "The Central News says a letter has been received from Lord Methuen, who has been in South Africa since the commencement of the campaign, in which he expressed the opinion that the war will be over in a few months. His lordship does not base this opinion so much upon the British successes in the field, as upon the readiness now shown among various sections of the Boer ombatants to surrender, and upon a change in the attitude of the Boer Until recently, says Lord Methuen, these women were remorseless in their hatred of the rooineks, and unsparing in their words of contempt for the prowess of the British soldier. Latest Census Shows Only 661 Divorced

Persons in the Dominion. Ottawa, March 11 .- According to the latest census bulletin there are 661 di-vorced persons in Canada. Of these 229 reside in Ontario, 58 in Quebec, 91 in Nova Scotia, 89 in British Columbia. 80 in New Brunswick, 36 in the Yukon, 35 in Manitoba, 19 in the Northwest Territory, 14 in Prince Edward Island and 10 in the unorganized territories. There have been granted in Canada, by parliament, and by the courts, 281 divorces since confederation. This would account for 562 persons divored in 32 years, and indicates that a very considerable proportion of the divorces are obtained in the United States. This conclusion is borne out by the Gen. Methuen's prominence to hold him figures for the Yukon, where threefourths of the population are Americans. Thirty-six out of a total population of 27,219 is nearly ten times the proportion for the Dominion as a whole. In Canada divorces are granted by parliament for Ontario, Quebec, the Territories and Manitoba. In Nova Scotia, New Brunswick, British Columbia and Prince Edward Island there are divorce courts. There is no record of a divorce having been granted to Prince Edward Island parties either by parliament or court. Yet the census shows fourteen divorced persons living in that province.

DIED ON A TRAIN. Aylmer, March 11 .- Henry J. Matthews died Saturday afternoon on the G. T. R. train while en route from Thomas to this town. He had been suffering from consumption for the past two years. His wife was with him on the train, and his brother, J. Matthews, of Malahide, was waiting for him at the depot here to take them to his home. Matthews was well known throughout East Elgin and Oxford, having conducted a livery business in Aylmer and Tilsonburg. At one time he was in the hotel business in Orwell. Besides his widow he leaves two children, a son and daughter. The de-

J., March 10. -The fast freight, east-bound, due here at 2 o'clock this morning, had a rather unpleasant experience between Trenton and this city. The run from Philadel-phia was uneventful until, as the train approached Princeton Junction, it hit and killed a man. The train stopped and the body was cared for and left at the junction to be sent to Trenton.

When near Monmouth Junction the train was stopped again at a signal from the head brakeman, who said it had hit another man, and he had seen

the body hurled into a ditch. A search of the tracks for a mile back failed to

locate the supposed victim.

The train was again started east, and as it neared Millstone the glare of the headlight revealed the body of another man lying by the rails. The engineer stopped, the body was picked up and brought to this place, and it proved to be that of Howard R. Breese, of New Brunswick. He is supposed to have been struck by another train while walking home from Franklin Park.

Embezzled Funds Gone, He Tried to Suicide-Failing, He Surrendered to Police.

The following dispatch from Denver, Col., bearing the date of Sunday, March 9, tells how John W. Russell, wanted in this city for embezzlement, tried to commit suicide rather than face the consequences of his misdeeds. The dispatch reads:

"With his throat cut from ear to ear, bezzler, has been cooped up in the city only the most desperate criminals are confined, and nothing is being done to relieve his pain. Russell cut his throat Wednesday night in an attempt to commit suicide, and it was only due to his highly nervous state that he did not succeed.

"About a week ago Russell came to Denver from London, Ont. He had about \$500 with him, and most of this money he embezzled from the John Garvey wholesale grocery establishment at London, for which firm he worked during the last three years. Russell registered at the Albany Hotel. Monday and Tuesday nights he spent scene. Absley had no relatives in this in the gambling houses and Wednesday morning he was "broke." During Wednesday Russell had several drinks and little to eat, and about 7 o'clock in the evening he retired to his room. When these signals of danger are unheeded, and proper precaution is not taken to prevent more serious results, the very worst form of kidney trouble will develop, namely, Bright's Disease, which is almost incurable.

To obtain quick relief and a sure cure you must at once commence to take Ferrozone. It is a treatment for kidney and bladder troubles of undoubted merit, and is prescribed now by all doctors and physicians who are abreast of their profession. Hospit-als, sanitariums, and all public health institutions rely on Ferrozone in all dangerments of the kidneys, and claim that it effects more cures of chronic

cases than any other remedy. The action of Ferrozone is very mild and efficient, and can be depended upon to give satisfactory results in every case. It brings about a healthy condition of all the organs of the body, causes the kidneys to eliminate all poisonous products and wastes of the body. It purifies and enriches the blood reconstructs wasted tissues, excites healthy appetite and promotes good digestion. By the regular use of Ferrozone nutrition is improved, and strength to ward off disease is estab-

lished and maintained. No remedy for the alleviation and cure of kidney disease can possibly equal or surpass Ferrozone. This fact is conceded by all those who have used it, and a trial will convince you of its merits. Don't be misled into accepting a cheap, unworthy substitute, but insist on having the genuine Ferrozone. It is the very best that money, brains, skill and scientific research can produce, and that is the sort of remedy you want. Price 50 cents per box, or three boxes for \$1 25, at druggists, or N. C. Mr. McLaughlin writes: "For twenty years I suffered from itching piles, and only persons who have been troubled with that annoying disease can imagine what I endured during that time. #### GRAIN IN HANDS OF AMERICAN FARMERS

Official Report of the United States Department of Agriculture.

Washington, D. C., March 10.-The agricultural department this afternoon issued the following crop report: Until the publication of the census figures of acreage, based on a farm-tofarm canvass, admit of the making of necessary adjustments in the reage figures of this department, no quantitative estimate of the amount of grain remaining in the hands of farmers on March 1 will be made by the statistician. Reports received from the department's correspondents, however, indicate that about 23 per cent of last year's wheat crop is still in farmers' hands, as compared with 24.5 per cent, 128,100,000 bushels, of the crop of 1900 on hand, March 1, 1901, and 29 per cent. 158,700,000 bushels, of the crop of 1899 on hand, March 1, 1900. corn in farmers' hands is estimated at about 29 per cent of last year's crop, against 36.9 per cent, 776,200,000 bushels, of the crop of 1900 on hand March 1, 1901, and 37.2 per cent, 773,700,000 bushels, of the crop of

1899 on hand, March 1, 1900. Of oats, there is reported to be about 30 per cent of last year's crop still in farmers' hands, as compared with 36.2 per cent, 292,800,000 bushels, of the crop of 1900 on hand March 1, 1901, and 36.5 per cent, 290,900,000 bushels, of the crop of 1899 on hand March 1, 1900. While, as stated above, and fully explained in connection with other official reports, no definite quantitative estimates of grain production in reports received by the department of that year was one of the largest ever grown; that the corn crop was the smallest, with one exception, in 20 years, and that the oat crop was also

much below the average. This conspicuous departure from the ordinary relative production of the three principal grains appears to have been followed by a use of wheat as feed for animals more extensively, geographically, if not in actual volume than has ever before occurred.

#### TRAMP BOY REVISITS HER AS A PREACHER

The Woman Who Was the Means of His Conversion Years Ago Entertains Him.

Kokomo, Ind., March 11 .- The scripentertain strangers, for thereby some have entertained angels unawares" has been verfied in the case of Rev. Rachael Middleton, of this city, and a poor ragged tramp. Fifteen years ago a lad sixteen years

of age knocked at her door and asked for food and shelter. She gave him both. She became deeply interested in the boy, who told her he had run away from a good Presbyterian home at Zanesville, Ohio, He gave his name as George Miller. He remained at the home of Mrs. Middleton for some weeks, attended a revival meeting at the Then he told Mrs. Middleton that he had told her a falsehood regarding his name—that his true name was Aulder Larzelene. He soon left the home of the kind-hearted Quakeress, and for fifteen years he had not been heard of. A well-dressed man in the garb of a clergyman called at the home of Mrs. Middleton this week and introduced himself as Rev. Aulder Larzelene, Canada. It proved to be the return of the tramp of fifteen years ago. The meeting was a joyful one. After his conversion the young man went to Canada, worked his way through a theological school, and became a lead-1901 will be made public at present, the ing minister in the Friends' Society. Saturday and Sunday were quarterly make it manifest that the wheat crop | meetings in the old church at Russia ville, and Rev. Mr. Larzelene preached two profound sermons, which created a great sensation in the neighborhood to which he came as a ragged tramp fifteen years ago.

He will be the guest for several days of the good woman who turned the course of his life.

#### ICED MAMMOTH

Has Been Preserved for 2,000 Years-Had 19 Inches of Tongue.

St. Petersburg, March 11.-Cable dispatches from this city have already told of Dr. Herz's discovery of a mammoth preserved in the ice in Eastern Dr. Herz now says he discovered it on Sept. 22 near the River Ebrosowka, at the foot of a declivity just over a hundred feet above the water. It was lying down with its feet curiously bent under its body. Dr. Herz concludes that it had fallen down from high ground, and had been instantly killed, as its neck was broken. There was grass in its mouth and food in its stomach. The fall must

have happened 2,000 years ago. When Dr. Herz's party began the work of excavation the cold was such that a shed had to be erected. A fortnight was occupied in thawing out the Meanwhile the stench was such that the stomach had to be cut out and refrozen elsewhere. Eventu-ally the huge animal was found complete, save a small piece of the back and half the trunk, which had been eaten by wolves. The mammoth was covered by a coat of rather thick red-

Montreal, March 11.-The industrial stock boom here has become a game, and everyone is rushing as in the real tural injunction "Be not forgetful to estate and mining booms of unhappy memory. The transactions on the stock exchange today numbered 319, a record, the highest number formerly being 262. Some of the orders were for very large blocks of stock, one of 1,000

shares of Dominion Coal being put through, involving \$106,000. The dan-ger is not from the big purchasers, however, but from the people, who know nothing of trading-messenger boys, girls, stenographers, small store-keepers and clerks. The brokers are beginning to take the alarm, and high margins are demanded from the new comers.

Will Remove Your Burden of Disease and Suffering and Make Life Worth Living.

of banishing diseases common at this

season.

Those whose intelligence directs them to make use of Paine's Celery Compound, know just what to expect in rsults when the great medicine is used. They are aware of the fact that their relatives, friends and neighbors have used Paine's Celery Compound in the past, and that it has, in every case, proved the ideal invigorator for the run-down, weak and suffering; it has cleansed the blood and caused the life stream to course with vigor and health to every part of the body; it has braced the nerves; it has banished the agonies of rheumatism, neuralgia and dyspepsia, and has triumphed over deadly kidney disease

and liver troubles. In the past, Paine's Celery Compound, as a spring medicine, has saved thousands of precious lives; today, its work is greater, more widespread and more commanding than ever before, because people know it better and use it more freely. Headaches, sideaches, backaches, heart troubles, sleeplessness, cold chills, night sweats and fevers are quickly banished when Paine's Celery Compound is faithfully used. No other spring medicine keeps tles used at this time will work wonders for all who are weak, run-down, have been appointed to report in two The return journey, 3,000 miles to nervous and out-of-sorts.

Bride Afflicted and Four More in Hospital.

Pest House Inmates Give a Cotillion-The Disease in Ontario Is Not Gaining Ground.

New York, March 10 .- The World says: Five persons who participated a month ago in wedding festivities in Roseville, N. J., including the bride, have since been stricken with smallpox and taken to the Newark Isolation Hospital. The bride, Miss Elfrida M. Lawson,

at the time of her marriage to John C. Chapman, was developing the disease, and a few days later was taken to the hospital. Mrs. Elizabeth Walsh, a sister of

the bride, was the next stricken. Clara Ritchie, a four-year-old niece of the bridegroom, followed, and yesterday Mrs. Joseph Kehoe, an aunt of the bridegroom, and Alice Kehoe, her daughter-in-law, were received at the Isolation Hospital.

The health authorities believe all the five cases are the result of the unsuspected case of the bride.

DANCE IN THE PEST-HOUSE. The inmates of the Isolation Hospital in Bloomfield, N. J., gave the first of a series of dances Thursday night. Invitations were sent to other patients who occupy the old town house near by, but were not accepted. The cotillon was led by Romeo Love,

and Miss Eliza Lewis, who is ill with smallpox. Jacob Werts, who is an inmate, led the orchestra. A second dance will be given in the near future, to which the members of the town council and board of health will receive invitations. A cake-walk will be a feature, and all the inmates

have signified their intention of entering the contest. Health Officer Seymour P. Gilbert will be asked to act as referee. MOTHER GOES WITH CHILDREN. When Robert Metcalf, forty-eight years old, of Kearny, N. J., who was a smallpox patient at the Hudson County Isolation Hospital, was discharged from that institute yesterday, he found that his children-Jennie, seven; Grace, four, and Sarah, two-had contracted the disease. The children were re-

epidemic is not gaining ground very rapidly, if the statistics being sent in to the provincial board of health are all criterion. Comparatively few new cases were reported today. Bathurst township has two additional patients; West Meath one, and Carister, in Haldimand, three. The authorities believe there are a number of suspects near Paisley, and will make an investigaand liquors.

A staff of some twenty doctors began this afternoon to vaccinate all the students at the university as a precaution against the spread of smallpox through the movements of Ernest Simpson, who is now at the Swiss hospital. All the students of the affiliated colleges come under the smallpox or-They are to be vaccinated either by their own doctors or those appointed by the university. Tubes are being used. In the case of the ladies an order has gone forth that those who do not want the little tell-tale marks on their arms may have them elsewhere. Dr. Sheard is not yet sure that the student is suffering from smallpox. He is being kept in one of the isolation wards, and is allowed his books. It has been judged necessary to quarantine the boarding house where he had been living.

THE SHANTY MEN.

Ottawa, March 10 .- Dr. Bryce, secretary of the provincial board of health, has written to Dr. Law, city medical officer, stating that the provincial authorities of Quebec will co-operate with those of Ontario in dealing with shanty men leaving the infected lumber camps in the spring. C. P. R. ENTERPRISE. Montreal, March 10 .- The C. P. R. has given orders for a large addition to its rolling stock during the present year. The order includes 177 locomotives, 70 passenger cars of different varieties, 1,350 box cars, 719 flat cars, 300 coal cars, 58 standard vans, 207 stock cars and 50 refrigerators. Some of the freight cars will be built at the various C. P. R. shops-Farnham, Perth and other points. The remainder of the new rolling stock, with the exception of 40 box cars, for which an order has been given to the Rhodes-Currie Company, of Amherst, N. S., will be constructed at the company's own shops in this city.

#### MARRIAGE FAILURES

2,396 Divorces Were Granted in Michigan During 1901.

Lansing, Mich., March 11.-Secretary of State Warner has compiled divorce statistics for the last calendar year, which are complete with the exception of Eaton county. There were 2,396 divorces granted in 1901; 45 applications refused, and 250 withdrawn. At the beginning of the year, there were 3,857 bills for divorce pending, bills filed numbered 3,796, and bills pending at the close of the year, 4,931. During the previous year, 2,435 divorces were granted, last year showing a slight decrease.

A True Nerve Tonic acts not so much upon the nerves them selves as upon the digestive functions, and the abundant formation of rich, red blood. The nerves cannot be fed on medicine. They can be fed and strengthened by digested and assimilated food. Ferrozone's marvelous action arises from its power over the digestive and assimilative functions of the body. You take it, the blood grows richer, redder. You feel strength and vigor, digestion ceases to be noticed, for it has become good. Work is easier, for you have the strength to do it. In a short time you have health. Use Ferrozone. Sold by W. T. Strong & Co. acts not so much upon the nerves them-

#### Temporary Reverse in South Africa.

There is no need to be too much liscouraged over the war news from Bouth Africa. No doubt it is depressing to have a British general captured by the Boers, and to have even a small lection of the imperial forces defeated and scattered. No doubt it is temporarily encouraging to the pro-Boer population of South Africa, and may cause some who have been halting between two opinions to throw in their lot with Gen. Delarey. But if it temporarily encourages the pro-Boers, it will not discourage the British. It will only cause them to set their teeth a roses, travelers say, are found in full little more firmly. This reverse may, in reality, bring the war to an end more quickly than would otherwise have been through this new territory have been the case. The war will end, in every direction agree that the counand the end may not even be far off, notwithstanding this unexpected and not particularly pleasant reverse. These Boers, after all, are composed of good stuff; they will yet make good British subjects, and their children and children's children better still. #### A Third Great Transcontinental Railway for Canada.

The new bridge over the St. Lawcence, at the city of Quebec, will be one of the greatest engineering wonders of the world, for it has a single span 90 feet longer than the celebrated bridge over the Firth of Forth. The historic old town had so many sights for the tourists that it did not require this one, except for its commercial to be before this beautiful Canadian seaport Already eight lines of railway now converge at it, on opposite est obstacle hitherto has been com- territories yet without railway connecunication between them, and now by the construction of this big bridge this objection is being removed, and we have not the slightest doubt that Quebec city will renew her youth with distant day. The construction of this the eagles, as it were, and become of the great emporiums of trade on

the Atlantic seaboard. The belief in some quarters is that the capitalists who have got hold of the Pacific in its early days, before Cana-Canada Atlantic Railway-that timesaving system which has been showing splendid results in carrying traffic from Parry Sound to Montreal-mean to get control or closely co-operate with the Great Northern Railway, a line which runs from a point on the Canada Atlantic to Quebec, and to run them jointly as a great grain and through traffic route, which cannot fail to be of there should be a clear idea what is wast importance in the commerce of involved, especially as the British army

But Quebec city has another source of comparatively undeveloped power, which is destined soon to add to her with three through lines of railwaythe C. P. R., the G. T. R., and the Canada Atlantic and Great Northern. And in the near future, there seems little doubt, she will be the Atlantic terminus of what is known as the Trans-Canada Railway-a line which will run from Quebec on the St. Lawrence to Port Simpson on the Atlantic trans-Canada line of rallway. The distance from the United States bortwo great arteries that bring it everincreasing traffic. It is paving handsomely now, though the western provinces and the Pacific country have scarcely begun to be developed. Then we have the Canadian Northern Railway, running from Port Arthur on the east, through Winnipeg, and along the district to the northwest of Winnipeg, which was surveyed for the original Canadian Pacific Railway, as projected by the Government of Hon. Alexander Mackenzie. This line is now being carried through the great fertile belt to the west and north of Swan River. by way of Prince Albert, Edmonton and the Red Deer River region to the Rockies, through to the Pacific Ocean, C. This trunk line is from 200 to 300 Railway, and almost along its entire protection. Those who are to blame route, on either side, there are vast stretches of agricultural land, with as

Quebec, beyond the height of land, and south and west of James Bay, stretches a vast country recently acquired from the Dominion Government by the

Provinces of Quebec and Ontario. Into this country, the Ontario railway systems are bound to go in search of local trade, which promises to be great, and mayhap to find a new route to Europe by way of Hudson Bay. Some have supposed that because on its northern border this territory skirts Hudson Bay, it must be cold, inhospitable, and unfit for settlement. But investigation has proved that this is a very mistaken idea, and that the immense territory is well fitted to sustain millions of settlers such as we have in other parts of Canada. At Moose factory, on James Bay, there is an observatory, and the result of five years' observation proves that the average summer temperature there is three degrees warmer than at Rimouski, on the St. Lawrence, somewhat warmer than the Lake St. John district-where there is a prosperous community of farmers -and that the snowfall is half that of Montreal. From a climatic point of view, therefore, anything that can be grown at Lake St. John, Quebec, the Ottawa Valley, or Winnipeg, can be grown in the James Bay district. Wild bloom at James Bay as early as at Quebec. Engineers and surveyors who try is generally level and well timbered, especially in spruce, so valuable now for pulp and paper, abounding in splendid water powers, with good soil, and indications of minerals very promising. There is there a splendid field for agriculture, for mining, and for the manufacture of pulp and paper. To reach this territory by the sea-to-sea line, advantage is being taken of the railway already built from Quebec to Lake St. John. Then a natural route

to James Bay is found up the Valley of the Ashaumouchouan River, which flows into Lake St. John and down the valley of the large Nottoway River, which flows into James Bay. From James Bay, a little over 400 miles from Quebec, the intention is to carry the railway through Manitoba, north of Lake Winnipeg, and the Northwest Territories along the center of the famous fertile Peace River Valley, and the pass of that name, to Port Simpson, on the Pacific coast, and so direct that it will be 300 miles shorter from ocean to ocean than the Canadian Pacific, prosperity, to which it promises to and 720 miles shorter to Japan greatly add. A splendid future seems and China than by that line. Yet it is so far north that it will take nothing from the prosperity of either of the two great lines now existing, but will develop a special traffic of its own, and sides of the St. Lawrence. Botha to this effect; If the latter would spare the farms of neutral or surrendered burghers, he on his side would leave undisturbed the farms and families of burghers who were fighting against us. Botha refused to enter into this agreement, and repeated his determination to confiscate or destroy the property of surrendered burghers, and to leave their families without food and shelter on the veldt It was then that the British commander-in-chief felt that he had no alternative but to carry out the policy "of sweeping the inhabitants of certain areas within the British lines." #### Marconi and Letter Writing

"Marconi is satisfied that the future use of wireless messages is assured.'

Here, indeed, is glad news for a suffering people. Throw up your caps with Marconi and hope that his experiments will never grow less. Now that wireless messages are to be used generally, the art of letter writing surely sees its finish. Let it soon take its place with the driving of stage coaches. the use of candle lights, the collecting of tintypes and the wearing of crino-Then, if the world does not think that it has bumped into the millennium, it never will. As things are now the writing of letters sours more sweet dispositions, causes more bad language and wrecks more happy homes than either mothers-in-law, whisky, or the handling of the cash.

It would not be so bad if letters were always written by the other fellow, althey are sometimes bad One is apt to speak so freely in a letter. There is usually more nerve displayed in an ordinary package of letters than would do for two photo enlargers and the winner of the silver-plate cuff buttons in a tea-selling competition. But this is not the reason for disliking the letter habit. It is not because the writing is like the bottom of a puddle when the man-hole is opened. It is not even that the writer makes a lot of idiotic references to things in your last letter, which you've entirely forgotten altogether, and does not say what particular passage he is talking about. It is not that, although the letter would be just about as easy to understand if a page was left out when the envelope was sealed. One could stand all these things; one could even put up with being called names and told that you are a poor correspondent. That is usually true, and you feel that the names fit pretty well. But the root of the whole trouble is that a letter demands an answer. This is the part that cannot be borne, the straw that breaks the camel's back. If letters could always come to you, and never have to go from you, letterwriting would be an occupation to be admired, and if anything would compensate for Marconi's failure to let us it will only be the invention of a system by which everybody may receive let-

ters and nobody write any.

It has yet to be explained why it is that the letters you are anxiously waiting for are always delayed. It must runs into a snowdrift and stick there this question. until the passengers think of eating judges were too few in number to make their dress-suit cases. If it isn't a the matter important. clear proof of the low-down meanness of its disposition that a letter always finds a screw loose somewhere, so as not to be on hand when it is wanted. If more proof were needed, it would be found in the fact—and here is where their malign cunning is shown-that when you do not want a letter, it invariably comes right through, all mails on time. There are no snowdrifts drifting then, no washouts, no landslides; or if there are, that sneak of a letter goes round another way. It was during the seige of Mafeking that | that employers would "dock" the men a runner got safely past the foe and into the beleaguered town with discussion on this feature of the war, and patches and a letter. Tremblingly, the excited recipient tore open the envelope and found inside-what? A bill from his tailor. Doesn't that prove the meanness of letters? Would that runner have got through the lines if the letter said that a rich uncle had died, leaving his estate to the soldier? Not much, he wouldn't. He wouldn't have got within a thousand miles of Mafeking and the soldier would have stayed out in Africa eating dog meat.

It is not only that letters are mean themselves, but they take mean advantages. They have a bad effect upon those who have anything to do with them. They make cowards of the bravest men. I have known a man who would not hesitate to rush into a blazing building to save a life, pale at the thought of writing a reply to a friend, and wouldn't have done it at all, if his wife had not said that if he didn't, she would. The very fact that such a horrible threat was necessary shows to what a lamentable depth this letter had brought him. Their pernicious influence is felt in other ways. Letters are notorious in their effect upon a man's trustworthiness. They have gone from their home in the morning and have only needed a letter in their pockets to make them lose their memory entirely, and then tell their wives that the letter which had been entrusted to them was safely posted, when they knew that it was still in their pocket. and had not been thought of since morning.

There are other reasons for wishing that letter-writing would go out of fashion. But why enumerate? Is it not sufficient that the evil exists and that any women or children who wished to Marconi's efforts will soon result in its

#### THE ONTARIO LEGISLATURE

Considers the Prohibition Bill in Committee.

The Measure Reported, a Few Clauses Being Left for Further Consideration.

- [Special to The Advertiser.] THE NIGHT SESSIONS.

Toronto, March 10 .- Premier Ross expressed the opinion in the legislature this afternoon that the house should get through with the session's work by the close of the present week. The question came up in connection with his motion that on and after Wednesday next the house should hold morning sittings, in order to expedite business. Mr. Carscallen protested strongly against the present hours of meeting, and called attention to the fact that he had placed a notice on the order paper to have the sittings from 1 o'clock till 7 in the evening, without any evening meeting. He thought the American system the best, and they never had meetings at night. Under the present rule the members had not time to look over the business of the house, and came often quite unprepared, and, moreover, when there were night meetings they were often so tired as to be unable to properly transact business. He did think that the rules ought sometimes to be suspended, but when that occurred the house should

consent to it by a two-thirds majority. The premier said that he would not be averse to consider Mr. Carscallen's proposal at the proper time, but he wished to point out that his motion had reference only to the present session and was meant to hurry business through. With regard to the afternoon session as a permanent thing. however, he declared that our system differed from that of the United States in that the cabinet there governed from without, while here it governed from within, and if they met from 1 till 7 it would give them little time to de-

#### MR. YOUNG'S EXPLANATION.

Regular Audit of Books.

London Property Which Sold at \$22 .- L. E. and D. R. R. Can Enter St. Col. Dent Talks to the Advertiser-Thomas With But Very Little Cost, Says the Local Agent.

> In conversation with an Advertiser reporter, Mr. C. C. Young, the local

to prevent City Auditor Jewell or any auditor properly appointed by the city from making a complete and correct audit of the company's books, as provided for in the present lease. As a proof of this Mr. Young cited the fact that in leaving Walkerville Mr. Jewell had thanked the company's general auditor Mr. Leslie, for his assistance. Mr. Jewell had further said to Mr. Leslie that a complete audit would take at least three or four weeks. Referring to the mayor's opinion that it would cost the L. E. and D. R. R. at least \$100,000 to enter St. Thomas over their own tracks, Mr. Young pointed out that bridging would not be necessary, as the Lake Erie road owns 21 acres in the city which the street cars reach, via the Wilson avenue bridge. All that would have to be done would be to erect freight sheds and a station on this property, without any further expense. The mayor's estimate of the cost of bridges was, he thought, also very high, as both bridges on the London and Port Stanley road did not cost more than \$60,000, and the L. E. and D. R. R. bridge at St. Thomas,

which is very much higher, did not cost more than \$80,000. Mr. Young met the charge that the freight rates had been increased and a poorer freight service given since the line was extended from Ridgetown to St. Thomas, by the statement that rates on first-class goods have been lowered to all non-competitive points west of Wheatley, on the main line, two cents per one hundred pounds, and to all points on the Erie and Huron division four cents per hundred pounds. The service, he said further, is better, as goods received at the freight sheds one day are delivered to all points on the L. E. and D. R. R., and all Wabash points the next day.

#### THE PATRICK TRIAL

Beginning of the Eighth Week-Doctors Called to Testify for Defense-Prisoner Confident of Acquittal.

New York, March 10.—Today's session of court marked the beginning of the eighth week of the trial of Albert T. Patrick, accused of the murder of Wm. M. Rice, a Texas millionaire, in this city, on Sept. 23, 1900. Robert H. Anrich, who has charge of the autopsy department of the city morgue, was the first witness today. He assisted at the autopsy on Rice's body. He was not permitted to answer a question as to whether Dr. Donlin said at the end of the post-mortem, "The old man's time had come. mortem, "The old man's time had come.

He died of old age, and that's all there
is to it." The defense then asked permission to recall Dr. Donlin to ask the
question of him, and Prosecuting Attorney Osborne asked time to consider
whether he should object to the request. whether he should object to the request. Dr. E. A. Lee, a surgeon, who said he had administered chloroform about 5,000 times, was then called. The odor of chloroform, he said, was a lasting one, and should be noticeable for more than an hour after its use. The tendency of the drug was to excite the person to whom it was given. In the circumstances described by Charles F. Jones on the stand, the witness would expect the stand, the witness would expect the patient to struggle and knock off the bedclothes. Jones said Rice did not

A Montreal dispatch says that Wm. D. Gillean, assistant general manager of the Canadian Paper Company, and son of Mr. James Gillean, of this city, has resigned his position. Mr. Gillean is one of the oldest employes of the when it was formed, some 29 years ago. For the past twelve years he has occupied the position of assistant general manager, having charge of the selling department. He was formerly station ed in Toronto.

#### MANY CARPENTERS WILL JOIN UNION

Meeting To Be Held in the Edge Block Tomorrow Night.

The majority of the city carpenters will meet tomorrow night in the Edge block for the purpose of discussing various questions which have arisen in connection with their trade in this city. They contend that they are the most poorly paid body of men in the building trade, and will ask for a minimum wage rate of 25 cents an hour,

with an eight-hour day.

The Carpenters' Union is not large in numbers, but many workers-in fact, nearly all-have agreed to join the union at the meeting tomorrow night The carpenters seem eager to join the ranks and the meeting will no doubt be largely attended.

ceived and Filed.

Mr. Leonard Expresses Regret at Unfortunate Termination of Negotiations.

The attendance at the shareholders' meeting of the London and Port Stanley Railway held at the city hall at noon today was just twice as large as at the previous two meetings, there being four present. They were the mayor, and Messrs. Thomas Partridge,

Andrew McCormick and F. E. Leonard. Stanley Railway: "Walkerville, March 7, 1902. "Dear Sir,-Owing to the delay which

necessity on our part of making certain improvements to facilitate the traffic on our own line, which we contemplated making at Port Stanley, but which we must how make elsewhere, we beg to inform you that we withdraw from these negotiations, and do not desire to accept the new lease on the terms discussed. Yours truly,
"F. H. WALKER, president."

On motion the letter was ordered to be acknowledged, inserted in the minutes and filed.

Mr. Leonard asked whether the audit not, and it remained for the Port Stanley board to consider what should be done. The company should have forwarded a statement of receipts in Janhall is being broken to his duties and uary, and been ready for the auditing of the books in February, but they had done neither. They had not yet sent the city a check for the percentage of earnings, as was the case in the two

preceding years.
Mr. Leonard expressed his surprise at The plan of reserved seats for St. the company's action, and said he had Patrick's concert open's at the New always found the Walkers straightfor-Grand Opera House box office at 9 a.m. | ward in all their dealings. Mr. Leonard also said that after the trouble taken to get the lease in shape, and after the board of trade and so large a proportion of the citizens had declared in favor of it, it was regrettable that the whole thing should fall through.

The mayor said he wished to protest were not warranted in giving that as a reason for breaking off negotiations.
The lease had been signed by the city in December, and the shareholders could do nothing until the Walkers had signed the lease.

The meeting adjourned, having been in session less than 15 minutes.

And he would no doubt have said something very much to the purpose when thing very much to the purpose when "Miss Marchmont" was called, and she had to leave the drama in which she was acting so well for that in which,

according to the Trumpet, she was acting so indifferently.

Her lover was, of course, in ecstasies.
He had never doubted her for a moment; but his triumph was none the less to hear from herself that she was willing hear from herself that she was willing to share his fortune, whatever it might be. How he was to support her he did not know; but his exultation was too great to be disturbed by a thought which the life that he had hitherto led entirely prevented his being able to bring home to himself. A man who has never known what it is to want for anything, has great faith in the bounty of Fortune. To couple his own name with that of want Hortons' goal was in danger but their couple his own name with that of want is as practically impossibly as to seriously and really couple it with that of death. However it may be in metaphysics, no one can, in the actual world of fact, imagine what he has never known. Now the life known what the last reverse in the life known what the last reverse in the life known what the last reverse in the life known what the last reverse is the life was the last reverse in the life was the last reverse in the last reverse reverse in the last reverse in the last reverse in the last reverse in the last reverse reverse in the last reverse rev I will then be everything to you; my life shall be spent in trying to give you no cause for regret."

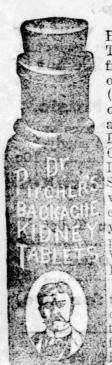

"Dearest!" Had she not checked him, he, forgetting, as he did, where they were, would have taken her in his arms at once.

"The trying impose a condition."

"The trying to you; my life imagine what he has never known. Now Hugh had never in his life known what it was to want a hundred pounds without being able to get lt; so that, a fortiori, to realize the probable want of a dinner or two, was entirely out of the question. Rich in love and strength, utignorant of what poverty means. "Mater condition?"
"After all, I feel that I am acting selshly. Whatever you may say, I cannot ut know that I am indulging my own eart to my loss. For my own sake let appointments that accompany it with no less certainty. And surely so it seemed to him, the strength and energy that had sufficed to make him the best man of his inches in all —shire, and in Cambridge to boot, would suffice to clear a path through the world that should be just broad enough for himself and for one other. There was time enough yet one other. There was time enough yet to determine the precise manner in to determine the precise manner in which he should exert it, and, at least for the present evening, sufficient unto the day was the evil thereof the day was the evil thereof. Of course, Angelique had no need to indulge in gloomy anticipations. She would indeed be a bungler if Miss Clare did not die in ignorance not only of the engagement. but of the marriage also. She knew her own power over her lover; and as he was honest and unsuspicious, she was not afraid of losing it. Besides, is it not the duty of a good wife to guard her husband's interests when he is inclined to destroy them? This part of her duty,

at all events, she was resolved to fulfill

# The New Remedy Kidney Troubles.

Backache Kidney Tablets are prepared from the prescription of Dr. Zina Pitcher (formerly Professor of Materia Medica and Genito-Urinary Diseases, Michigan College of Medicine. Detroit, Mich., U. S.A.) which he used with wonderful succes for over twelve typears in private

practice and in the Western Hospital, Detroit. These Tablets are therefore a thoroughly tried and tested remedy of a famous kidney specialist, who has devoted his life to the study of diseases of

the Midneys, bladder and urinary organs. They contain specific ingredients not found in any other kidney remedy, and it is not surprising, therefore, that they make cures in very many cases where other remedies had proved altogether ineffectual.

Dr. Pitcher does not claim that his Backache Kidney Tablets will cure everything. They are designed for diseases and disorders of the kidneys, bladder and urinary organs, and symptoms traceable to derangement of these organs,

Backache, Lame or Weak Back, Pain in the Back or between the complaints.

Dr. Pitcher's | Shoulders, Swelling of the Feet and Legs, Bloating, Puffiness under the Eyes, Puffy and Pasty Appearance of the Face, Dropsy, Bright's Disease and Diabetes (except in the last stages), Gravel, Stone in the Bladder, Brick Dust Deposits in the Urine, Scalding or Irritation of the Urine, Frequent Calls during the Day or Night, Inflammation of the Bladder or Cystitis, Catarrh of the Bladder, Wilky Color of the Urine, High Colored or Foul Smelling Urine, Sudden Stoppage of the Flow of Urine, Scanty Flow of Urine, Dribbling, Rheumatism, Neuralgia, Pains in the Joints or Hips. Uric Acid in the Blood, Heavy Feeling or Pain in the Head, Impure Blood, Drowsiness, Rapid Loss of Flesh, Great Thirst, Excessive Quantity of Urine, Specks floating before the Eyes, Bad Taste in the Mouth (especially in the mornings), Constipation, Torpid Liver, Dragging Pain in the Loins, Sense of Weight or Pressure in the Region of the Bladder, Kidney Troubles of Old People, Bedwetting of Children, Kidney Troubles of Women, and all symptomatic indications of Kidney Derangement.

In these days of much advertised 'cure-alls," it is well that the public should use care and caution in the purchase of remedies. It stands to reason that a remedy that confines itself to a particular range of diseases is more potent for those special diseases than a medicine that claims to cure everything. When your back bothers you or your kidneys are out of order take Dr. Pitcher's Backache Kidney Tablets, a specific remedy for these

Marchmont the following paragraph appeared in the Trumpet:

Marchmont the following paragraph appeared in the Trumpet:

"Mr. H. Lester, M. P. for Denethorp, has accepted the stewardship of the Chiltern Hundreds. Mr. M. Warden, of Denethorp, has issued an address, in which he professes himself a supporter of the government, and will, in case of a contest, be influentially supported. It is not improbable that Mr. Prescot, who unsuccessfully contested the borough at the last general election, will appear once more in the field."

Poor Angelique! She seemed to have turned out but a female Alnaschar, after all. The future Mrs. Lester, of Earl's Dene, Countess of Denethorp, and heaven knows what besides, woke up to find herself Mrs. Lester of nowhere, the wife of a disinherited man, who had not even a profession to fall back upon. Added to this, she had the mortification of seeing that she had been duped most cruelly. Had it not been for Warden's advice, for Warden's suggestions, she would still have been safe; and who but he could have betrayed her secret to Miss Clare? The question, "Sui bono?" was only too applicable in its proper sense. It was certainly not her husband, for the letter which he had written to his auntupon his marriage she had taken care should not leave London; so that, as it should not leave London; so that, as it upon his marriage she had taken care should not leave London; so that, as it turned out, she had herself made matters worse by causing Miss Clare to think that her nephew had endeavored to deceive her

Hugh was infinitely distressed, not by ne loss of Earl's Dene, but by this final coof that she who had been a mother him all his life had withdrawn herself from him for ever; for if she had loved him as a mother, he felt towards her as a son, and his distress was embittered by her complete silence. It needed all his happiness in the possession of Angelique, and all his consciousness of naving done what was right and honorable, to reconcile him to this great loss. As to Warden, now that the field was clear, he was now more than ever haunt-ed by the thought, "If it were not for

ST. JOHN'S GETS TROPHY. St. John's Athletic Club have landed the Jubilee trophy cup. The deciding matches were played in the Jubilee Rink last night before the largest crowd that has attended the City League games this season. The first teams to line-up on the ice were the St. John's and Orients, and the second the Hortons and Aberdeens. In the first game the Orients were shut out by a score of 4 to 0, while the Hortons defeated the Aberdeens

The St. John's have lost one game and won four, and the Aberdeens had but one defeat against them until last night's game. Had the Aberdeens secured a victory a final game would have been necessary between them and St. John's. The first game, although keenly con-

tested, was too one-sided to be interest-ing; but in the last one the excitement

Cox; goal judges, Messrs. S. Ford and Carrothers. The cup which the St. John's Athletic Club have succeeded in winning was presented by Mr. C. W. Smith, of the Jubilee Rink, five years ago, and if held for three consecutive years by any one team, becomes their permanent property. It was won the first two years by the Collegiate Institute, and the third by the Jubilee Hockey Club. The fourth year it was claimed by both the L. C. I. and Victoria teams, but was awarded to the Collegiate, and this year is in the hands of the St. John's Athletic Club. Mr. C. Smith, the donator of the cup, has me much to further the interest of ockey, and in fact, all amateur sports in this city, and the popularity of Can-ada's national winter sport in London is largely due to his efforts to encourage it. Mr. Smith last night was the recipient of many congratulations on his recovery from the effects of the severe injuries h received at Berlin a few weeks ago. It was practically his first appearance since the accident.

PETERBORO WON. Galt, Ont., March 11.-The final match for the intermediate championship of the O. H. A., played here last night between Peterboro and Galt, resulted in a tie—3 goals each. This makes Peterboro the winners of the intermediate championship series. The score at Peterboro on Friday night last in the home-and-home matches being, Peterboro 4, Galt 3, the tie score here tonight gives Peterboro except ere tonight gives Peterboro one goal head. The attendance at the rink to-ght was the largest in its history, hunreds being unable to get inside the uilding at all. Several car loads from speler and Preston came down on the reet cars to see the match. The en-nusiasm of the crowd was intense, oth teams played for all they werd

Celebrate Their 39th Wedding Anniversary.

Her Majesty Is Nearly 61, But They Say She Doesn't Look a Single Day Over the 45 Mark.

London, March 10.-Queen Alexandra today celebrated the 39th anniversary of her wedding to Edward King of

She is 60 years old, and nearly 61, yet she does not look a day over 45, and in certain lights would pass or 38. Her daughter, Louise, who is under 40, looks older than she. Her unmarried daughter, Victoria, who is 34, looks no younger. Her 'baby," Princess Carl of Denmark, aged 32, is about the same age in looks.

When Alexandra, the daughter of the "sea king," as old King Christian was called, was born, she came into the world the first daughter of a family that was destined to have many daughters and sons.

Christian, then an insignificant prince, reared a large family, and his wife, Louise, looked after their virtues and education. They grew up beautiful, every one of them.

ing diseases are being cured. Emaciated people with obstinate coughs, bleeding lungs, night-sweats and weakness, have been perfectly cured by the use of Dr. Pierce's Golden Medical Discovery.

The several steps of the cure were recorded in ounces and pounds of increasing weight. When there is gain in flesh the wasting disease is being surely cured. Mr. Will H. Whitmire,

Mr. Will H. Whitmire, of Arkton, Rocking-ham Co., Va., writes: "Our son contracted a deep cold about the first of July, 1899, and had a terrible cough. We called a doctor and he pronounced it irritation of the bronchial tubes, with asthmatic trouble, and he informed me that my son was liable to die at any time. He told me that if we could keep the bronchial tubes open, he might cure him; but after treating him several weeks and my son growing worse all the time, I concluded to try Dr. Pierce's Golden Medical Discovery and 'Pleasant Pellets.' I had seen several almost miraculous cures brought about by the use of these medicines, and of course I had wonderful faith in them. He used three bottles of 'Golden Medical Discovery' at home and one vial of the 'Pelleta,' and was then well enough to go to West Virginia, taking a supply with him. I am just in receipt of a letter from him from which I quote: 'I am well and hardy and getting very fiesthy.'

# MEN, NEW LIFE.

IS YOUR BACK WEAK? ARE YOU EASILY TIRED? HAVE YOU DRAGGING PAINS? HAVE YOU VARICOCELE?

Have you lost the fire and strength of youth? Have you 'come-and-go" pains in your back and shoulders? Are you growing old too soon? If you have those symptoms or any other sign of breaking down of your nerves and vitality you will find new life in elec-

you sleep. DR McLAUGHLIN'S BELTS are made for you-it is the best way to use Electricity. It pours a gentle stream of life into the weakened parts continually for hours every night. It refreshes the nerves, expands the vital powers, enriches the circulation and makes you feel bright, active and vigorous in one night's use. You get stronger each day and in a few weeks you are a new man, stronger and younger in the fire of youth. It is grand, this method of mine, and every man who has ever used it is praising it.

I don't ask any man to buy my appliances on a speculation. I know it will cure these troubles, and I want my pay when the cure is complete. I don't ask you to try it one month nor two months, but long enough to cure you, and when I have cured you you can pay me. If I fail in my task it is my loss, not yours. All you lose is your time, and if my Belt fails to cure you you will have the satisfaction of knowing that the best and strongest and finest Electric body appliance in the world-one with 50,000 cures to its credit-has failed, and that there is no cure for you in Electricity,

A London correspondent, writing in the Presbyterian Review, says: "One of the great obstacles in the way of real spiritual advance today is found in the abundant provision made for enjoyment. In this small city, with theaters, skating rinks, national and benevolent societies, Y. M. C. A. entertainments, Y. W. C. A. entertainments, church and Sabbath school gatherings, in spring, summer, autumn and winter, besides all the private gatherings that are held, one begins to wonder where there is any time left for study, meditation and sober thought. The passion for pleasure seems to be an ever-increasing tide, and although, with the advent of Lent, there is some slackening, even through that season it runs too high. There would seem to be room for a society that would pledge its members to stay at home some two or three nights in the week. Certainly, if there is not a reaction the young people who are growing up cannot possibly have the sweet associations that their parents have had in connection with the home

of childhood." SPECIAL COUNCIL MEETING.

#### VALUE OF TESTIMONY

Greater Than Assertion.

There is none of us so hardened but that when we have been able to aid our fellow-creatures by conferring a benefit or bringing a little comfort in-to their lives we like to have appre-ciation shown. This generally affords more pleasure than the performance of the act itself, and in this connection the following letter from a Paris, Texas, lady is of more than usual in-"Dear Friends: I address you as such, for you have been such to me. I suffered for three years off and on with piles. I was treated at the hospital, and the new and elegant hospital, of Memphis; they only gave me temporary relief. I came west, think-ing the change of air and water would benefit me; five months ago the bleed-ing piles came back on me, and bled so much that I thought I would die. I have had four of the finest doctors in this section of Texas; all they did was to finally nearly let me go to my grave; all they wanted was a big sum of money from me and to operate on me. I said no; no surgeon's knife would enter me; if it was my time to die, God knew it, and when I died I would die ALL TOGETHER. I began hearing about your medicine. I had no faith in you; but I sent and got a box of Pyramid Pile Cure; in two days the blood flow had slackened to onehalf the amount, and in one week I felt so much better I walked four blocks and did a little housework. I was not bleeding then; in three weeks I was well. God bless you for putting such a wonderful medicine within the reach of suffering men and women. I shall never cease to recommend your medicine or be without it; also I used your Pyramid Pills, Sallie A. Hearndon." Testimony like this should be more convincing than all claims and assertions, and should leave no doubt in the mind of the reader as to the merit of the remedy. Pyramid Pile Cure is sold by druggists for 50 cents a Church last evening, there being a good | package, or will be mailed by the makers to any address upon receipt of price. Nothing to Indicate That Death Was Caused by Other Than Natural Causes.

The inquest on the death of Henry St. Clair, or J. H. Hamilton, was resumed last night at the police court before Coroner MacLaren. Besides the witnesses and jury, no spectators were present. The examination of the witnesses will not be likely to terminate for some time

It was nearly midnight when the inquest adjourned, though only three witnesses had been examined. The inquest was adjourned till Friday night

next. at 8 o'clock. Mr. J. J. Cox, proprietor of the Dominion House, who was the first witness, said St. Clair came to his house on Jan. 30 last. St. Clair told him that he took ale to make him sleep. Witness had known him to take five or six glasses before retiring. St. Clair had been troubled with indigestion. Mr. Cox did not know the dead man's occupation till he searched his room. St. Clair always paid his board promptly, but never appeared to have any large amount of money. Witness did not know that St. Clair was going under an assumed name till the night he died. He had boarded once before, a year and a half ago, with his wife at the

hotel and was there during the Duke of York's visit for two or three days To Mr. Magee's question witness said he had never heard of St. Clair's using any drug except pepsin, which he used at every meal. St. Clair was around the hotel all morning on the day he died, and in the afternoon left the hotel with Mr. Hunter, a guest at the hotel. The next time Mr. Cox saw him damages are paid him. The damages was when he was sitting in a buggy are claimed because a sidewalk front- in Carmichael's livery stable. He was ing Mr. Boles' property was built too sitting back in the buggy with his head bent forward. St. Clair had been driven home with Mr. Fred Evans, who said to Mr. Cox that St. Clair had got sick and that he had telephoned for a asked an altogether too large amount. rig to bring him home. Witness thought St. Clair was sleeping and did not touch an arbitrator on motion. Mr. Edmund him. He went out fifteen minutes af-Meredith was then chosen. Ald. Cooper ter and found St. Clair in the same condition and did not wake him. The next witness saw of him was after 7 o'clock, in his own room. He was lying on his back, and Mr. Cox felt him and clusion that St. Clair was dead. He day, and thousands and thousands just belongings, and had found things which led him to believe that St. Clair's proper name was James H. Hamilton. Mr. Fred Evans, bartender for Mr.

Cox, took the stand next. He saw St. Clair first on the 30th of January last. He was out with the dead man on the afternoon of his death in order to have their portraits taken, at St. Clair's request. He and Wm. Collins had left with St. Clair, when he was apparently sober, about 3:30 o'clock, and had gone to MacCallum's studio. They did not have anything to drink on the way to the photographer's, where they remained till 4 o'clock, when they went to the Oriental Hotel on Clarence street. Here they had one drink and left, then walked to the Hotel Normandy, Richmond street, and had two drinks. They left there at 5 o'clock and went down Richmond street to Dundas, then to Talbot, where St. Clair showed signs of being sick. Witness said he was shaky, and staggered slightly. He had become dull after leaving the Oriental Hotel. When they got to the Boswell House St. Clair could not walk, and Mr. Evans telephoned for a rig. He had not heard St. Clair speak after entering the Boswell House, and had not seen him get into the buggy. Witness stayed at the hotel, as he simply believed that St. Clair was intoxicated, and that he would be all right under the liveryman's care. Witness went to the Dominion House shortly afterwards and was told that St. Clair was asleep and covered with robes in the barn. Witness changed his clothes, and went to see deceased, who was in the buggy. He did not touch him. After supper he again went out and shook St. Clair and told him to wake up, but received no answer. With the assistance of Mr. Carmichael's hostler, witness car-

ried St. Clair to his room upstairs and laid him on the bed. Witness touched St. Clair and found he was cold. He did not notice any sign of life. He undressed St. Clair, and on feeling his heart found that the beating had stopped. Mr. Wm. Collins, bartender, West London, who was with Evans and St. Clair, corroborated Evans' statement,

in almost every detail regarding the matter. Sir William C. Van Horne, the C. P. R. magnate, arrived in New York to-day (Tuesday) from Havana on the

steamer Morro Castle. The Democratic sheriff of Hamilton county, N. Y., defies the supreme court's order, has barricaded his jail, and threatens to shoot any one of the Republican sheriff's party who attempts to dispossess him.

#### "Parnell's Bread" MUSIC AND DRAMA.

"A GAMBLER'S DAUGHTER." The scenery used in the production of the sensational melodrama, "A Gambler's Daughter," which is to be at the New Grand this evening, presents some wonderfully realistic stage pictures. In the second act a vivid reproduction of the Chicago Board of Trade is given. It is a day of panic on 'change, and fortunes are quickly being made and lost. In the center of the frenzied, excited throng of brokers around the wheat pit, stands the gambler referred to in the title of the play. He has in hand a tremendous wheat deal, which is being smashed and foil-ed by some unknown operator who is dealing through another broker. The place is a veritable bedlam in its turmoil, and is one of the strongest scenes ever put on in a melodramatic produc-

THE BOSTON LYRIC OPERA COM-

PANY. The work of the Boston Lyric Opera Company was warmly praised by every critic in Toronto on the occasion of the company's recent visit there. The Ottawa Free Press of March 6 says regarding it: "The Boston Lyric Opera Company opened their engagement at the Russell Theater last night to a good-sized audience, but not near as large an audience as the company deserved, for the house should have been crowded to its utmost capacity, and undoubtedly will be from now on to the end of their engagement. The Boston Opera Company came without any great amount of preliminary booming and blare of trumpets, but they surely made a very marked impression on music-loving people by the excel-lent rendition of Verdi's popular opera, 'Il Trovatore,' last evening, for curtain calls and encores were numerous throughout the entire entertainment. The company numbers about 50 ple, and each and every one of them worked with a will and determination that was a positive treat to the audi

This excellent organization comes to the New Grand on Friday evening in "Il Trovatore," and will sing "The Boemian Girl" and "Faust" on Saturday, matinee and evening, respectively

Winkelman. This gentleman had been suffering for a long period with Acute Kidney Disease. He endured much pain and distress, and although he had tried many remedies he found no abatement whatever in his portion of suffering. At last, influenced no doubt by their wonderful reputation as a cure for Rheumatism and all Kidney and Bladder Troubles, he began a treatment of Dodd's Kidney Pills. He tells

everybody: "I can hardly express in words the good Dodd's Kidney Pills have done me. For the benefit of suffering humanity, as well as to show my thankfulness I want this statement published as widely as possible." This is only one of the many cases which could be reported from the neighborhood. Many cases of Chronic Rheumatism have been cured as well as some of Bright's Disease, Diabetes and Dropsy.
