The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

The Time for going through the Falls.

THE FALLS are level, (or still water) about 3½ Hours on the Flood and about 2½ Hours on the Ebb, which makes it passable four times in 24 Hours, about 10 or 15 minutes each time. No other rule can be given, as much depends on the Floods in the River St. John, and the time of High Water or Full Sea, which is often hastened by winds, and in the proportion to the height of them.

1822. JANUARY HATH 31 DAYS.

EXPERIMENTS ON MILK.

Morning's Milk commonly yields some hundredths more Cream than the evening's at the same temperature. That milked at noon furnishes the least; it would therefore be of advantage, in making Butter and Cheese, to employ the morning's Milk, and to keep the evening's for domestic use.— in milking Cows this singular phenomenon is observed, that the Milk obtained from one and the same milking differs considerably in quality; that, contrary to what might be expected, the Milk first extracted is not the best, but that which is obtained last contains invariably the largest portion of Cream. A meal's Milk of one Cow, milked into five vessels of the same size, and then separately examined, gave results as follows:—

No. 1. gave of Cream 5 per cent; 2, 8; 3, 11, 5; 4, 13, 5; 5, 17, 5.

MATERIAL INCREASE OF FOOD BY THE USE OF RICE.

Take 1lb. of Rice, and boil it gently, till it appears a thick paste; when mixed with the usual quantity of paste it will be sufficient to make 5lbs. of wheat or barley meal into a dough, and when well risen bake it the usual time.

An account of the proportion and produce of the flour of a bushel of wheat, mixed with rice, in the proportion of 5lbs. of flour to 1lb. of rice, and baked in the customary way, and of the same sum laid out into barley, and baked into bread.

	£.	s.	d.
Suppose 150lbs. of Flour to cost	-	-	2 4 0
And 30lbs. of Rice at 30s. per cwt.	-	-	0 9 8

180lbs. 2 13 8

Then, as 6lbs. of this mixture makes 14lbs. of bread, 180lbs. will make 420lbs. which costs £2 13s. 8d. And as 26s. will buy 120lbs. of barley meal, 53s. 8d. will buy 247lbs. Then, if 6lbs. of barley alone produce 3lbs.
