Continued From Page 1.

Mr. Borden proceeded to point to the great prosperity of New Ontario and its great possibilities. "Much," he said, "has been done by the present government to place before intending immigrants the advantages of this northern country, but with this greater Ontario with almost absolute neglect and disregard. The Liberal-Conservative party if returned to power will see that New Ontario receives its just and full share of attention...

PUBLIC AMUSEMENTS

At the Princess

"Doctor de Luxe." Full of apocryphal mirth, the most ingenious of stage devices and novel contrivances, charming music and delightful dancing, with a few little touches of sentiment and feeling like flecks of cloud on a summer-blue sky, "Dr. de Luxe" will be the rage of the season. The "Three Lyons Twins" and "Madame Sherry" were before it. The company could scarcely be improved and ranks among the best that have visited Toronto in recent years. The capacity audience that crammed the Princess last night enjoyed every little moment of the musical play, as it is called, but they were especially in the second act where it described as a tragical comedy opera, and that term was not playful enough, nor musical enough, and the doctor's term extant to express how funny "Dr. de Luxe" really is. The fun consists in the doctor's going to a confounding hospital, with real doctors, and the wives and the doctor and other people get mixed up, too. Ralph Herz, a gentleman deep down, is an original stage humorist, and his business is a highly eccentric and laughingly moving order. Some of his jokes are very quaint. One which particularly struck the audience, was "Every body has his day. If you step on his tail he has a weak end." The songs and dances were repeatedly enjoyed. The girls are remarkably pretty and lively, and the staging is thoroughly original. There is a mob of naughty girls, and in the real glass windows with real stoves is almost enough to sustain the moral of the play. There are lots of other jokes on the department as well. It's a great show.

At the Grand.

Vaughan Glaser in "The Only Way." Vaughan Glaser and his excellent company opened the second and closing week of their engagement at the Grand Opera House, in a splendid production of "The Only Way" and the duction of "The Only Way" was greeted by a large and appreciative audience. The play is a dramatization of the story of Charles Dickens' "A Tale of Two Cities," and the production is one that all lovers of Dickens will find interesting. When the play opens in the Grand, it is a splendid impersonation of the brilliant Sydney Carton, who is a man of great power and a man of great love. He is a man who is willing to die for his loved one, and he is a man who is willing to die for his country. The play is a masterpiece of dramatic art, and it is a play that will be remembered for many years to come.

At the Royal Alexandra.

Howe's Travel Festival. Nothing could better show the extraordinary interest evoked by the moving picture show that the reception accorded to the second annual Howe's Travel Festival. A crowd of audience at the Royal Alexandra again hailed every number with enthusiastic appreciation, and the many changes more than sufficed to sustain the interest. Very strange and wonderful were the views of the cocoanut industry in the Philippines, a line of a revelation, and it is safe to say, corrected some very inaccurate, but very large and solid.

At the Star.

Pat White's show is at the Star Theatre. It has been here before, so the patrons of that theatre know the kind of show it is. But it is not as it used to be, for it has been renovated and better. It is a composite of comic opera, vaudeville and extravaganza. The girls are a charming crowd and the boys are just as funny as ever. His new line of jokes and songs are well worth listening to. The show opens up with a nautical musical sketch entitled "Carey's Celebration." Pat and his maidens make it an interesting skit. The girls are well gowned and the musical numbers are of the best. The other half of the bill is called "At the Hoffman Club House." It is also a laughable and charming turns. Laughs are scattered all through the show.

At the Gayety.

"Dreamland Burlesques." Dave Morton of cabby fame is back at the Gayety with his company again. The show is called "The Burlesques," and it is well worth visiting. Dave is renowned as a comedian and has been on the burlesque boards with a new line of chatter and jokes every year for a long time. Again he has leaped into the limelight as fresh and as joky as ever. The extravaganza that Dave is presenting this time is called "Stageland." Many things happen in Stageland which are decidedly interesting and funny, and Dave has corralled a number of them. His company is large and well selected, every actor and actress has a chance to show his or her individual merit, and the result is that the company works a little better than the average company. The girls of the company are especially worthy of note, for there is a chorus of 30 comely beauties. The scenic effects are also excellent.

At the Grand.

Vaughan Glaser in "The Only Way." Vaughan Glaser and his excellent company opened the second and closing week of their engagement at the Grand Opera House, in a splendid production of "The Only Way" and the duction of "The Only Way" was greeted by a large and appreciative audience. The play is a dramatization of the story of Charles Dickens' "A Tale of Two Cities," and the production is one that all lovers of Dickens will find interesting. When the play opens in the Grand, it is a splendid impersonation of the brilliant Sydney Carton, who is a man of great power and a man of great love. He is a man who is willing to die for his loved one, and he is a man who is willing to die for his country. The play is a masterpiece of dramatic art, and it is a play that will be remembered for many years to come.

HYDRO-ELECTRIC WINS OUT IN NORTH TORONTO

Council Are Almost Unanimous in the Matter—An Interesting Session—Suburbs.

NORTH TORONTO, Aug. 28.—(Special.)—With only one dissenting vote and that of Councilor Lawrence, the North Toronto town council tonight decided in favor of the Toronto Hydro-Electric as against the Interurban and the Toronto Electric.

As on every former occasion every inch of the way was keenly contested by the rival companies, each watching the other's movements fearfully.

Through it must be said the council have been fair and impartial and any other conclusion would have been attended by a strong protest from the townpeople.

The report of Engineer James, a short, concrete one, gave the figures as follows: Toronto Electric, his per horsepower per month; Interurban, \$1.97 per horsepower per month; and Hydro-Electric, \$1.47 per horsepower per month.

Discussing the matter, Councilor Lawrence said "The Interurban have always treated us most courteously and I cannot see how we can do otherwise than award them the contract."

And then, in addition, there is always the danger that that old Western franchise may be a source of trouble to us. We went to the Whitney government some years ago to try to get them out of the line.

Winnipeg, Aug. 28.—Renewed anxiety was expressed this morning over the safety of standing crops in consequence of frosts, which occurred Saturday and Sunday night.

Many Unskilled Navigators. The ferry men insist that many lives would be saved each season if the sailors of these small pleasure craft were compelled to pass a satisfactory examination.

Aylesworth's Complaint. Captain Laurier, stop the boat. I want to get off and walk. For if you don't, I am afraid I'll never see North York.

ALD. MAGUIRE CHOICE OF CENTRE TORONTO LIBS.

Convention at Broadway Hall Was Marked by Real Flood of Golden Prophecy.

Ald. Alf Maguire was nominated to contest Centre Toronto against Edmund Bristol at a well-attended Liberal convention held in Broadway Hall last night.

The candidate declared that he was going to fight fairly and squarely and would ask no favors of his opponents. Senator Jaffray entered the hall late in the evening.

Louis F. Hoyd, K.C., declared that he was seeking for a fight in South York. The bigger the fight the better he would be satisfied.

A Real Optimist. "I would be willing if I was a betting man to put my horse on Mr. Ward," said the speaker.

Ald. Maguire said he thought Mr. Maclean would have the fight of his life in South York and the audience cheered the prophet.

GORDON WALDRON TO BE E. B. OSLER'S OPPONENT

Capt. Hunter, Adjures West Toronto Liberals to Shake Off Apathy and Vote.

Gordon Waldron will present himself as the votive offering of the Liberal party in West Toronto, where the normal Conservative majority is a few thousand. It was so decided at a gathering of the faithful in Brockton Hall last night, after Capt. A. T. Hunter, who once dared the avalanche in the ridings, had magnanimously retired.

"You are suffering from physical and mental inertia," (Listless cheers) "You must get out and cast a vote this election, even if it be an ignorant and stupid or Conservative one. Last election only 50 per cent of the Liberals of West Toronto voted. You must stop the bad habit of waking up in the morning and finding there was an election the day before."

Upon Mr. Waldron's uprising, loud cheering arose that almost shattered the smoke-laden atmosphere of his- toric old Brockton Hall. Mr. Waldron, whose candidature was prearranged, proceeded to thank everyone for the reception and the honor, etc., as is usual. Then he began a lengthy dissertation upon the policies and the movements since the birth of the Nationalist.

Mr. Waldron, having Quebec to a bitter fate, turned his attention then to Ontario, which he wants to save at all hazards from all harm. "The Conservatives," he said, "do not give reasons, nor arguments, they merely utter cries."

G. G. Miles, a maker of doors, deposed that the mechanics of Brockton could turn out just as good doors as the Yankees any day. "Shame," he cried, "on the Canadian who says he's afraid of the Yankees." He wants reciprocity on doors.

Dr. Spence, who once tried to win West Toronto, urged each Liberal to carry a banner in a Pullman sleeper on a Grand Trunk train. The smooth roadbed, laid with 100-pound steel rails, together with the only double-track line, makes this the desirable route. Four Grand Trunk trains leave Toronto daily, the 9 a.m. and 10.30 p.m. being particularly attractive, the latter carrying a dining car and parlor-library car to Montreal, also Pullman sleeper through to Boston, while the former has five or more Pullman sleepers to Montreal daily (which may be continued at 9 p.m.). Remember, the Grand Trunk is the only double-track route. Tickets, berth reservations and full information at Grand Trunk City Ticket Office, northwest corner King and Yonge streets. Phone Main 4209.

DALE FUND NOW \$3861. At a committee meeting last night of the athletes' campaign to raise \$50,000 for Dale Church, it was announced that \$3861.10 had been received to date. The proposition was brought forward that if ten Toronto athletes would each donate \$1000 each it would give the campaign a good boost. The campaign closes to-morrow and the committee would like to receive all the lists as soon as completed. Athletes that have not yet returned, with \$1000 each, and the amount required, viz., \$30,000.

of 1882. The waters have caused wash-outs on the approaches to the Union Station, preventing the operation of trains.

Alonso Coburn, an engineer on the Charleston division of the Southern Railway, was instantly killed by flying timbers. A Mr. Smith of Columbia, and Motorman Cutler of the local street railway system, were killed, two men seriously injured when a trestle collapsed, and two unidentified women were drowned when their home was flooded. Several negroes are also reported among the storm victims.

Great damage is feared for the rice and sea-island cotton industries by the rise of the tide. Not since the cyclone of 1885 has the water from here suffered so severely.

Anxiety for the people marooned on Sullivan Island was relieved this afternoon, when a steamer came in with a load of excursionists and residents from the island. The island was completely flooded, houses were inundated and the people had harrowing experiences. Two schooners and a small steamer were either sunk or damaged and had it not been for splendid rescue work by soldiers at Fort Moultrie the death list would have been appalling.

"Why didn't some one think of this Spring Steel Plate before?"

### Walpole RUBBER HEEL FOR HORSES

With Patent Spring Steel Plate

When you examine the Walpole you will immediately see its superiority and advantage over all so-called hoof pads or bar shoes.

Made of high rubber—reinforced with tempered spring steel plate—the most resilient heel or hoof protection possible.

Possesses every feature of a bar shoe—yet much lighter. The spring steel plate takes the place of the old-fashioned bar—furnishes a larger bearing surface for the frog. Then it protects the heel—the one great advantage.

Does not prevent the hoof from growing. It keeps the hoof to settle into the pad and bear on the corn or tender spots, thus causing lameness.

This spring steel plate coming next to the hoof with an even, firm pressure, overcomes this fault and positively relieves all corns, tenderness, bruises or corns.

The Walpole affords the horseowner an opportunity to regulate not only the frog, but also will pressure to suit every individual foot. The rubber is unequalled for its holding qualities on ice or wet surfaces—wood, stone or asphalt pavements.

Do not let another day pass without giving the horse the benefit of the Walpole Rubber Heel.

Nothing ever near enough to them to take their place.

### NEVER HED HOPE OF SOUTH YORK LIBERALS

J. W. Curry, K.C., John Galbraith and J. W. Bengough Withdrew Two-Edged Arguments.

If the South York Liberals were short on attendance they were long on talk at the adjourned annual meeting and convention held in the Labor Temple yesterday afternoon. When Louis F. Heyd, K.C., was nominated to contest the riding in the Liberal interest at the coming election, about forty persons were present. Wm. A. Parsons opened the meeting, and shortly after way to W. J. Lawrence, who was elected president.

Four names were submitted for nomination: J. Walter Curry, K.C.; John Galbraith; W. Bengough; Louis F. Heyd. The first three withdrew, and Mr. Heyd was elected.

**Stirring Times.**

"If there is anything I like, I like a devil of a soap," was Mr. Heyd's campaign slogan. He realized that any man going to contest the riding was up against the real thing, and "I propose to start from this very minute until the last minute of the election campaign to get the candidates the utmost with personal work. That pledge being given, Mr. Heyd proceeded to elaborate upon the issues of the day. He appealed to the farmers to support reciprocity, using arguments that would lead the artisan to believe he would be able to benefit from a reduced cost of living. He inveighed against monopolies and trusts, and thought the man who would vote against reciprocity was a traitor to his own best interests. He admitted that the United States wanted to get Canada's rich natural resources for her own benefit.

"What is more natural," said he, "than that we should trade the products of Canada off for the manufactured products of England?" And contrasting the national policy, he exclaimed: "I don't think the farmers of Canada have done for the manufacturers, and look what reciprocity will do for the farmers."

**At Bengough Sees It.**

J. W. Bengough, in declining the nomination, was constrained to speak at some length upon the issues of the day. "I don't think the farmers and the artisans of South York can be represented by an opponent of reciprocity," an opponent of a policy which is manifestly in the interest of the farmers and in the interest of the consumer."

Differentiating between reciprocity and annexation Mr. Bengough pointed out that reciprocity was a question pertaining to trade; annexation is a question pertaining to politics.

**Brilliant Epigram.**

John Galbraith, who has recently declined to allow his name to go to the convention, he said reciprocity was a political question which brought out the election of general disarray and the consumers. Mr. Borden's platform showed an effort to "make asses out of the masses for the sake of the sheep."

"I honestly believe that any farmer who will vote against reciprocity ought to be examined as to his sanity," said J. W. Curry, K.C., was militant in his hopes of a Liberal victory in South York. He resented the attacks on years' feeling and Patterson and advised that the farmers should have their desired reciprocity for forty years. He asked permission to withdraw his name.

The schedule of officers resulted as follows: President, J. W. Lawrence, first vice-president, Alex. Haines; second vice-president, John Abbott; secretary, James McQueen; treasurer, T. C. Willard.

### ARMIES OF THE WORLD AND WHAT THEY COST

The 18 countries of South and Central America and Mexico, with a population of 53,924,880 people, have regular armies amounting to 188,954 men, or one soldier to every 286 inhabitants. The United States of America has in the year 1900 a population of 82,926,000, and a regular army of 60,476, or one soldier to every 136 people. Turkey, Bulgaria and Egypt have a population of 33,478,383, with regular army of 44,934, or one soldier to every 86 people. Europe has a population of 402,571,540, with regular armies aggregating 3,328,252 men, or one soldier to every 119 inhabitants. Of European countries, little Switzerland, which appears to have the largest armed force proportionately. She has one soldier to every 23 people. France has one soldier to every 51 people. Germany and Sweden have each one soldier to every 90 people. The other countries range between 110 people in Russia to 400 people in Great Britain to each soldier.

A reduction of the regular armies of Europe to the proportion of the regular army of the United States would save a direct saving of \$500,000,000 annually to the nations, and would restore to productive industries 2,733,000 men, whose earnings, conservatively estimated, would amount to \$500,000,000 more. Europe has \$1,000,000,000 per annum to gain by the adoption of a policy of peace, footling while she keeps her armies. President Taft's policy of arbitration. One thousand millions per annum is the cost of maintaining armies upon a peace footing, while a policy of war is not capable of being estimated.

### DANGER TO THE CHILDREN.

Mr. Rutledge Rutherford, a food expert, makes the startling declaration that 350,000 children were killed last year from eating chemically treated matter.

Coal tar, invaluable for coloring clothes, sulphuric acid for washing straw, arsenic for giving gloss to candy, wood alcohol for fuel, saccharin in for use in diabetes, should be controlled, he insists, to these legitimate uses, and not be introduced into the stomach, because they are its deadly enemies. He says: "The child consumes saccharin in a too great quantity causes muscular weakness, in the place of the energy-food, which child craves. He gets an imitation many times sweeter than sugar, but with no food value and serving to destroy food values of other things he has eaten. If candies and other sweets were made from pure sugar and fruits these would furnish ideal food for the growing child, but when he cries for these bodily needs what do we give him? Saccharin, arsenic, glue and varnish."—Superior (Wis.) Telegram.

### FEWER GERMAN EMIGRANTS.

The number of emigrants leaving the German North Sea ports this year is much less than in 1910. For the first seven months of the year Hamburg reported a reduction of 24,000 in a total of 457,783. The causes assigned for the lighter output this year are in part the unfavorable business situation in the United States and the more rigid application of the American immigration laws. Another cause, however, is evidently the prosperous condition of the chief countries that now supply the bulk of the immigrants into the United States. This year Germany itself is feeling very keenly the shortage in the supply of Russian farm laborers, due to the fact that Russia is now enjoying unusual prosperity. Wages have been raised, and the people are consequently staying at home. The shortage of Russian laborers has amounted to the proportions of a calamity for the farmers in the eastern German provinces. Fewer Germans and Hungarian laborers, too, are coming into Germany this year, owing to more prosperous times in those countries; the same thing is true in regard to Italy.

### MONKEY ADOPTS A KITTEN.

The Riverview Park Zoo is much amused in the interest. Duke, the patriarch of the monkey colony, has taken in a 6-month-old kitten, and in the fatherly way he watches over the little stray animal.

Dude found the kitten in his rambles about the walks in the neighborhood of the monkey cage, he being a privileged property of the zoo, and immediately "adopted" it. The kitten has become quite a pet among the other monkeys in the cage, too, and tried to take the kitten away from Dude, but this threatened disruption of the new family ties caused a protest from the monkey.

The kitten seemingly has become attached to its new parent and follows Duke around faithfully. They are very chummy at mealtime, and share food equitably.—Pittsburg Dispatch to New York Herald.

### NOT A GOOD CONDUCTOR.

A conductor on the York Road line, Walter Andrews, took fifty dollars from the office of his employers for change and before returning the same to the York Road office, he was awakened from a drunken stupor the cash was missing. He pleaded guilty to the charge yesterday, and will spend the next 60 days over the Don if sobered up.

**CHEAP HORSES SOLD AT MAHER'S HORSE EXCHANGE.**

There was a fair attendance at yesterday's sale at the exchange, despite the bad weather. The consignments were fairly large, amongst them being a large number of drivers and wagon horses. The bidding was slight upon the good horses, although a very large number of cheap horses were sold. The following are some of the sales:

Maher's Livery purchased a couple of teams of white horses from Mr. J. Charles for \$100. Mr. Hoy's, York Mills, got a bay mare for \$75. Mr. Lowther, city, a pair of city workers, Mrs. McPherson, a good, strong horse for \$85. Messrs. Keith & Fitzsimons, city, purchased a good delivery horse for \$85. A. A. Leach, Hamilton, purchased three horses for \$225. Mr. J. Welsh, city, secured a couple of good teaming horses, both looked worth the money, \$250. Mr. A. Boyd bought a couple of workers for \$120. CHEAP PATRIOTISM.

A tremendous stress is being laid by Liberal leaders on the argument that the west wants reciprocity. We believe, from an all-Canadian standpoint, that nothing is too good for the west, except Canada itself, and we do not believe in giving up Canada, even for the west. At the same time it is not fair to work the western argument unduly, nor to forget the other considerations it entails. Nor is the whole west by any means agreed about reciprocity. British Columbia is against it. Manitoba is against it. Out of 5,000,000 the possible 200,000 of the two prairie provinces may vote for reciprocity, but by no means unanimously. Even where they are unanimous, the united representation is 17 members, tho it will increase with the growth of population. The tendency of the reciprocity policy will be to alienate the interests of these 17 from eastern Canada; to form a barrier between British Columbia and Ontario, and still further to cultivate the annexation sentiment which already and undoubtedly exists. United States Consul-General Jones, speaking on the 15th inst., to the Ohio editors, then making a tour of western Canada, stated that there were "250,000 Americans in western Canada"; that "western Canada is looking for American goods and wants our goods"; that "Canada is at the backdoor of American manufacturers, and all they will have to do is to go in and possess the market." At the same estimate one out of five of the population west of the great lakes is an American. These Americans naturally look to the American manufacturer to supply their wants. The various American manufacturers' names are household words with them, and they know with whom they are dealing. Certainly, says The Globe, let us encourage them to ignore the Canadian manufacturer. It would be obstruction to trade, says The Globe, to ask them to deal with the Canadian manufacturer. They should be allowed to build up a trade with the American manufacturer, says The Globe. What is the sense of buying from the east and shipping grain in return over the National Transcontinental, says The Globe, when the railway only cost us \$200,000,000 and has served its purpose already in providing the party jobs, and when the American settlers can deal with their friends across the border thru the American railway lines? The true feeling, says The Globe, is the greatest good of the greatest number. There are 30,000,000 people in the United States and only 5,000,000 Canadians. Give the Americans what they want! Taft and reciprocity. Thus The Globe. "He is the true cosmopolitan who loves his native country best," said Tennyson. Canadians will prefer to build up Canada on eastern and western lines, and we feel sure that American immigrants will see the reasonableness of this position. They certainly will not respect those who would betray their country for the sake of 47 votes, nor can they admire the patriotism of those who ask "Who would throw away \$10 for the sake of the empire?"

SUNSHINE AFTER RAIN.

Exhibition generally starts with some rain. Just to lay the dust and cool off. Thought to take a shine out of the new Gooderham fountain, too. The new moon was a wet one of those that pour out. But there is no mud this year in the big asphalt driveways, and the grounds never were more beautiful, and the splendid new buildings, block after block, are handsome beyond expression, and the hydro-electric lights lend the last touch of enchantment to the night scene in Toronto's wonderland. And the rain is about over.

RECIPROCIITY AND THE MOST FAVORED NATION CLAUSE.

Among the requests received at this office, in connection with the trade bargain with the United States, is one asking The World to show definitely that Canada is and will remain bound by the most favored nation clause in British treaties whether the reciprocity measure be passed or not. From the imperial foreign office return of such treaties now in force (C.A. 2385, 1907) it appears that the following apply to Canada: Abyssinia, entered into 1897; Argentina, 1821; Austria-Hungary, 1874; Bolivia, 1840; China, 1902; Colombia, 1886; Korea, 1843; Costa Rica, 1849; Denmark, 1860-61 and 1870; France, 1852; Greece, 1830; Guatemala, 1852; Italy, 1860; Japan, 1904; Liberia, 1848; Mexico, 1851; Persia, 1857

BEER, NOT HOGS.

Those earnest temperance reformers with their testal and prohibition supporters, The Globe and The Star, and their readers, are almost frantically calling on the farmer to abandon the raising of hogs and to raise barley. And to what purpose? To export to the United States to make beer! And this is admittedly the best argument for reciprocity that the Liberals have been able to produce. It takes more time and more labor to raise barley

TRUSTS AFTER PRODUCERS AND CONSUMERS.

Australasian governments are not in the habit of waiting until trusts and combines have thoroughly entrenched themselves and then commencing their remedial action. Speaking a little over a month ago in Sydney the Hon. Mr. Trefle, a member of the cabinet of New South Wales, assisting in the department of agriculture, referred to the United States Meat Trust as having shipments already on the water for England, and stated he knew it was at work in Australia. It was the intention of the government, he said, to let that trust know they were wide-awake and would take such steps as would enable Australians to snap their fingers at any trust. The government had much information in its possession which could not be disclosed without prejudicing the interest of men the government wished to protect, but steps were being taken to prevent any combine from preying upon the producers. A royal commission, he added, would deal with the operations of the trust. Contrast this clean, instant and definite proclamation that the producers of New South Wales would be protected from exploitation with the indefinite and spineless policy of the federal government of Canada. Not content with permitting trusts and combines of all kinds to flourish unchecked it now proposes to give the immensely more powerful and authoritative United States "systems" untrammelled opportunity to capture and raid Canadian markets and producers. Reciprocity organs are telling Canadian growers that United States buyers are coming in and overbidding the Canadian combine and are leaving Canadian growers to infer that this will continue under reciprocity. At the same time they assure Canadian consumers that products will be cheaper. It is much nearer the mark to say that once the United States combines are fairly in producers will get less and the public will pay more. That at least has been the experience of the United States producers and public, and it will be Canada's in due time if Sir Wilfrid Laurier has his way.

START TO WHITTLE AND ALL GOES.

Is it not absurd for Mackenzie King to say that the government have no intention of further altering the tariff, that they will stop by taking off the protection the farmer enjoys and put him against the protection that the manufacturer has? As we pointed out yesterday, it is a most unfair and discriminatory arrangement. But let us take still another view of it and that is this, namely, that if we link up with the United States in the matter of the reduction, as they are already committed to do, then we will have to follow suit. We all know now that both the Republican and the Democratic parties are committed to tariff reduction in the States, and only the other day sweeping changes were made in what is called the farmers' list and the wooden schedule, and these were only defeated by the veto of the president. Both the senate and the house of representatives passed them. Even the protectionist president, Mr. Taft, said that his veto was only temporary until after the tariff commission has had a chance to report on the proposed reductions.

THE ENGLISH MARKET FOR OUR HORSES.

Editor World: I have read the discussion carried on by Mr. Yeager of Simcoe and Burns & Simcoe, as the effect of reciprocity on the horse trade of Canada. I have been in the principal cities of the United States, also in Liverpool, and for the benefit of the septuagenary who may be interested in the subject, I'll give figures and facts. Let us take the heavy harness horse, for this class the English market is the best in the world. Think of getting 143 high, selling for \$2000, and \$750 to \$800 is a common price for good harness horse in England. In fact at the present time you cannot buy a full registered "hickory pony" span in our depleted Canadian market, I should think he would rally round the flag, for as soon as we pass reciprocity the Yankee from Buffalo will only be too glad of the chance to dump into Canada any amount of those so-called show horses, which cost but a day in a saucer. My advice as a breeder, importer and exporter is: Stick to our parents who protected us when we were young and older. Let us import the good horses from England and breed the best bit of pure-bred, without the aid of us, we shall find the English market open to us. J. Gordon McPherson.

IS THE KEYSTONE LOST?

Editor World: Owing to absence from home, I did not know until to-day that you had been good enough to publish my letter in your issue of the 17th inst. I have to thank you very much for the space afforded me. Unfortunately, whatever force there may have been in what I wrote has been much impaired and the sense obscured by the accidental omission of several sentences towards the conclusion of the letter. It should read: I say it is not suggested by the most rabid denouncer of the order from which our governor-generals are drawn that if, after the house of lords had thrown out a home rule bill, it had been approved by the electorate, its passage would be hastened by the second chamber. Why then did

GOVERNMENT SCHOONER DISABLED.

While the meeting of the executive committee of the missionary society of Canadian Church was in progress yesterday afternoon, a telegram was received from E. J. Peck, at Battle Harbor, stating that the government schooner Burleigh had been disabled and was unable to proceed further. The schooner carried the supplies of the M.S.C.C., which were in Rev. Mr. Peck's charge. The location of the schooner, what caused the trouble and to what extent the damage amounts to could not be learned last night by the committee. In addition to other business transacted at the meeting, was the passing on the minutes of the last triennial meeting of the synod.

Porcupine Stocks Quiet--Good News From Homestead Mine

Mining Market Still in Grip Of Apathetic Trading Movement

Few Changes of Consequence in the Porcupine Issues--Trading Continues Lethargic--Nipissing Drops Back a Little.

World Office, Monday Evening, Aug. 28.

The opening of the new week did not usher in any appreciable change on the local mining markets, the trend to prices being practically on a par with that of Friday last, and trading in the main being of too slack a nature to permit of price changes of any consequence.

Brokers are looking to the close of the month to bring in a better tendency, and the idea is expressed that with the passing of August will come the inception of a big speculative wave which will continue on into the autumn, and which will put the gold mining issues back into a position more in line with that which they occupied prior to the great fire which so nearly wiped out the whole camp.

In point of interest the market today opened as practically nil. Prices at the opening showed no appreciable change from those at the close on Friday last, and the little progress which was made in certain instances was too small to be indicative of any specific trend to values.

Some extension was as usual the active feature. These shares moved erratically all day, selling as high as 67 3/4 at one period, and later getting down over two points to 65 1/2, only to recover most of the loss later on in the session. Excellent buying was noted on the reaction, and as little progress seemed to be forthcoming, the late rally was brought about in short order.

The action of the rest of the list was irregular. Real lost eight points at 3.08 and Swastika showed a similar action among the cheaper issues, dropping back a point to 42 1/2. Vipond, on the other hand, was stronger, moving up to 45 and closing firm. The other stocks were unchanged, with the exception of West Dome, which turned weak, selling as low as 1.50.

In the Cobalts there was a slight indication of weakness with lower prices in Beaver and Nipissing. The latter issue lost ten points at 7.70 and was weak throughout.

BOSTON, Aug. 28.—The Calumet and Hecla Mining Co. declared a quarterly dividend of \$6 per share, payable Sept. 22, to stock of record of Aug. 2. The dividend declared three months ago was \$6, and at this time a year ago \$7.

Hotels Observing Law.

Most of the Muskoka hotels are observing the law regarding the disposal of garbage. Dr. R. W. Bell, inspector for the provincial board of health, says he has just returned from an inspection trip, on which he visited 45 hotels. The water of the lake is being kept pretty pure, he found in a very few cases the law was not being regarded and Dr. Bell gave them final warnings.

To Cure Dyspepsia and Indigestion.

Drink a glassful of the genuine St. Leon Water—"Mirac" after each meal and before retiring. This wonderful spring water invigorates and revitalizes the stomach as no other water seems to do. It contains rare mineral matter, which is found in no other water, and which is marvelously effective in its action upon the digestive organs. All progressive doctors recommend "Mirac," and it may be obtained either from them or direct from St. Leon Waters, Limited, Toronto.

HOMESTEAD MINES LOOK GOOD TO THE PRESIDENT

Engineer Ambrose Gives a Careful Review of a Close Examination of Whole Mineral Area.

Frank L. Culver, president of the Homestead Mines of Swastika, has just returned from the north, impressed more than ever with the possibilities of his mine and the neighboring mineral area.

Mr. Culver's examination, made at the invitation of the Swastika district, and has embodied his conclusions in a memorandum to Mr. Culver. In this memo, he says:

"Recent visits to the Swastika gold camp have left me with the conviction that the camp fully deserves the recent favorable comment which it has received. So that I could form a correct idea of the extent and character of the gold bearing veins, I visited several properties covering a large radius. The greater part of the formation in the Swastika camp consists of quartz schists containing varying percentages of quartz, a condition quite similar to that in Porcupine. Conglomerate is also abundant. The history of the camp to date has been that the best values are to be found in the quartz veins running thru the schist.

"What impressed me more than anything with the results of the camp was the largest number and strength of the veins and the extent of territory over which gold has been found. Every property I visited had uncovered showings of free gold. This is quite remarkable when one considers the limited amount of territory which has entered the camp. It is made possible by the light overburden and numerous small veins which render it easy to strip and trench the veins.

"Thru the courtesy of Capt. Jeffery of the Homestead Mines of Swastika, I had an opportunity to examine a property quite thoroly. Here I found the work progressing in a most thorough and systematic manner. Captain Jeffery first of all picked out an ideal point at which to commence the work of prospecting for deposits of quartz, iron and copper, and molybdenite. These minerals are good indications of gold values. Most of the gold is so located that it is readily discernible when panning are made. A noteworthy feature of the mine system is the large number of quartz feeders running into it at nearly right angles. Over 150 feet of stripping was not necessary to reach the showings. From fifteen to twenty feet wide, to lie in the familiar schist and to run parallel with the quartz veins, the "Jeffery vein" at the surface showed a width of from two to three feet. Not content with the surface showings, Captain Jeffery opened this vein by trenching and open cut on the side hill for about one hundred feet to test the work and to determine the depth. At this point an adit was started to prove the vein "below the grass roots." This, of course, enters deeper ground as the vein is not so deep. This shows the vein to have widened to from four to eight feet. I was pleased to note that the work advanced in the open cut was being done in a most systematic and complete manner. The work was being done in a most systematic and complete manner. The work was being done in a most systematic and complete manner.

"I noticed no extravagance of any kind on the Homestead. A small office building, a few huts, and a simple structure to facilitate the handling of supplies and ample accommodations for the men up to the present all work has been done by hand drilling. Now that gold has been found in several places, I believe it would be well to put in an initial mine equipment.

"It is proposed to drive the adit on the Jeffery vein until a depth of fifty feet is reached. A raise will then be driven to the surface to be utilized as a shaft and cross-cutting operations will be commenced. The shaft can then be used for hoisting ore and the adit for handling waste rock. This shaft and cross-cutting being taken to lay out the original mine workings so they can be used when the mine has become more fully developed.

"I was much impressed with the surface indications on the Homestead, and with its location and geological formation in the Niagara district, passed away at his home, near Grimsby, at the age of 72 years. Mr. Smith was a son of the late John P. Smith and was born and raised on the farm about two miles west of the village. For the past 25 years he has been devoted his time to peach-growing, but previous to that he was prominent as a breeder of high-class Jersey cattle and Welsh blood ponies. He is survived by a son, J. W. Smith, and two daughters, Mrs. W. F. Geddes of Grimsby and Mrs. John H. Bertram of Vineland.

SEVEN FOOT VEIN OUT IN THE DRIFT

Imperial Property in Deloro in Luck--A Big Deal for Brown Claims.

Special despatches were received last night from Porcupine by Charles A. Stoneham & Co. reporting a good find on the Imperial property in Deloro Township, just across the Tisdale line.

Particulars were given as follows: On the 100 foot level of Imperial mine a station has been cut and drifts run north and south. Shaft is between two veins. Drift to south has cut vein 7 feet wide and showing free gold all thru. North drift not reached vein yet. On northwest corner property a surface vein has been opened about four feet. This is good clear quartz and carries with gold in places gold splashes the size of ten-cent pieces may be seen. One of the Dome engineers, who just examined the property, says he regards it as about the fourth best property in Tisdale.

Another despatch reported that Homestead mines, owned by Hearst estate, have bid nearly a million dollars for Brown claims in Bristol Township, which the company has had several like the inside of the mine has been found.

HOW CITY LOSES \$11,000

Not Ready to Utilize Pipe After Giving Bonus on Contract.

Because the city council exhibited haste in ordering the six-foot steel pipe for the second intake, the ratepayers are out \$11,000. Last May when the question of the new intake came up in the city council, two tenders for the pipe were submitted, both from the Canada Foundry Co. One calling for delivery in 160 days at \$54,000; the other 90 days at a price of \$65,000. Although the necessary excavation and piling could not possibly be done in 90 days to receive the pipe at the end of 90 days, the council, led on by Controllers Spence and Ward, and Ald. Rowland, decided on the short term delivery.

The contractors, Roger Miller & Co., who are to lay the pipe, are proceeding as fast as possible in the work of preparing the trench, but it will be months before any of the pipe can be utilized. The Canada Foundry Co. did their part, the pipe was ready within the 90 days. Now it lies in various places on the waterfront, rusting, and the people of Toronto have had several thousands of their good money wasted on account of a little thoughtless hurry.

ALONG THE WATER FRONT.

All the incoming boats yesterday were crowded with exhibition visitors and many Americans disembarked from Niagara boats. Prominent among the Hamilton boats bringing in a contingent of over 200.

From Montreal and bound for Port Williams, the two big freight steamers, Corona and the Canadian Lake Lines, and the Bickerdike of the Merchants' Mutual Line, left the waterfront last night. This shows that the cargo is being taken for Montreal. All carry cargoes of general merchandise.

ENGINEER'S LITTLE REVENGE.

Without any notice the engineer of the steamer Olcott threw up his job and being unable to find another at short notice, the officials had to cancel their morning trip from Olcott to Toronto. It appears that the engineer was about to be discharged, and, having been informed of the fact, he quit before his successor was available.

Great Art Harbord Cadets.

Harbord cadets made a clean sweep this year in the Canadian Rifle League competitions, both indoor and at long range, gaining first place in each of the following: Gallery practice (25 yards), miniature (25 yards), target (grand possible score of 1750), senior cadets and junior cadets June competition (200 and 300 yards). They win two handsome challenge cups to be held for two years, besides shields to be retained by the school and individual prizes for the competitions. The school also retains the "Loyal Canadian" trophy as capt. R. H. Hughes captured the Canadian Lord Roberts team at Ottawa.

Declared Court a Farce.

MONTREAL, Aug. 28.—Stoppings in the midst of a record day's work, Recorder Weir this morning declared before a crowded court that the administration of justice, under such conditions as he was obliged to mete out, was nothing more than a farce. With over 120 cases on the local court's list, crowds of people jammed the corridor of the city hall this morning during the recorder's court session.

Cars in Collision.

Four people were thrown to the floor of a Lansdowne-avenue car when it struck an open switch at the Lansdowne-avenue car barns on Sunday evening and crashed into another car which was standing just inside the barn. Considerable glass was broken in the car and the passengers were shaken from their seats.

THE TIME TO BUY AND WHAT TO BUY

By almost every mail and by wire we are receiving requests from far and near asking us to give an opinion on the condition of the market from time to time, and the merits and demerits of different stocks, both Porcupine and Cobalt.

We are not buyers or sellers of stocks of any kind on a commission basis; never have been; therefore we are not looking for a profit, and don't expect it, but for the benefit of enquirers we have no hesitation in saying, in our opinion, now is the time to buy. Don't lose the opportunity. Mining stocks seem to be at a very low ebb, and must move very much higher, and that are long. Some of the cheaper stocks appear to us and the following, if purchased now, in our judgment, will make you a handsome profit in the near future. If you write us we will tell you who, and will be pleased to fill your orders through our own brokers or any responsible house you request.

IN PORCUPINE we especially recommend the purchase of: PORCUPINE, GOLD REEF, AMERICAN GOLDFIELDS, APEX.

IN COBALT: COBALT LAKE, PETERSON LAKE, GOLD CONSOLIDATED.

## If We Were Selling You Half an Overcoat

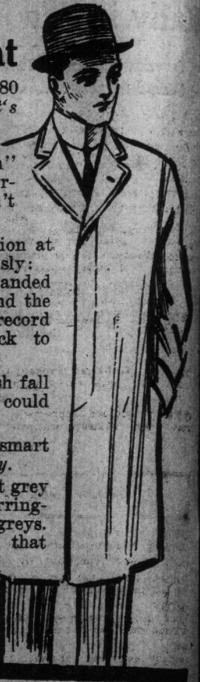

This Wednesday price of \$8.80 would not be out-of-the-way. It's a happy coincidence that we're able to show Fair visitors just how bargains "happen" in this Store. Here's a Fall Overcoat opportunity that you won't match anywhere.

How can we sell at a reduction at the opening of the season? Thusly: A lot of fine English tweed stranded in Toronto. We heard of it, and the manufacturers let it go at a low-record figure, rather than ship it back to England.

We had it made up into stylish fall overcoats, during July, when it could be done at least cost.

Result, we're able to sell these smart coats to-morrow for **Eight-eighty**.

Just one hundred of them, neat grey and black English tweeds, in herringbone and Scotch tweeds in greys. Semi-fitting Chesterfield style, that buttons through; a few plain black chevots, with silk facings, will be included; sizes 34 to 44. Regularly these coats would not be sold for less than fifteen dollars. Wednesday **\$8.80**

## Underwear, etc., for Present Wear

500 Garments of Natural Wool Underwear, just the weight to wear now. Shirts and drawers in light and dark shades. At this price, too, there are several dozen pure wool drawers of the famous Britannia brand, in all sizes. Regular \$1.00 and \$1.50. Wednesday **.75**

350 Men's White Cotton Twill Night Robes, with collars. Some are trimmed with fancy galoon, others plain. This is a large and roomy robe that always sells at \$1. Wednesday **.59**

500 Men's Sweater Coats, made waistcoat style. Closely woven worsted yarns, double cuffs, two strong pockets. These coats fit perfectly, and are beautifully finished, in plain grey, grey trimmed navy and navy trimmed cardinal. Small, medium and large sizes in stock. Regular \$2.50, Wednesday **1.99**

## This Men's Sock Item Should Draw a Crowd
