From the London Saturday Courier. A Black Eye.

had more leisure to look about for another place. Mr. Watson after enquiring into the one of his business in the village, at once of her eyes. She tried every remedy to stop it, but without effect; she sat down acceded to his request, by granting him the use of a small spare room in his own house. Having got himself once established, Wil. heart-rending wailings.

thing, yet she had her own fearful foreboding that every thing was not as her husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk, taken from the foreboding husband had raised his hand against in solution in its mother's milk against his had been foreboding his had been had a report of the Gnernesey Agricul ural Society and the proper had been foreboding his had been had

duamtance. Combined with a natural sweetiness of disposition, she added that of a cheerfulness and buoyancy of spirits in executing the commands of her parents, that could not fail of excuting their warmest approbation.

Jean, being an only daughter, and her mother being of rather a delicate constitution, was never sent to service of any kind, her was peersh and quarrely, when he earns to the came home, he was inclined to be good natured and journal as a housewife, within their own do measile circles. When about eighteen Jean presented the very beau ideal of a village beauty; her pure and delicate white skin looked like shibaster; her features regular, while her howing jet black hair, which houng in ringlets from her temples, gave her altogether and appearance of the mother of his pounds of good wheat. Charcoal will about this period, a circumstance happened, which materially affected her condither an appearance of the most interesting description.

About this period, a circumstance happened, which materially affected her condition throughout the after part of her life. A young man, named William Hatherton, a mill-wright by trade, and foreman in a large establishment in Aberdeen, had been sent to superintend the erection of a threshing mill, in the immediate neighbourhood of the village where she resided; and arriving late in the evening, he experienced considerable difficulty in procuring ledgings: but, at length trusting the dignity which he supposed attached to his situation, and to his own respectable appearance, he ventured into the shop of Mr. Watson, and inquired if he could accommodate him for a short time, until he had more leisure to look about for another place. Mr. Watson after enquiring into the place. Mr. Watson after enquiring into the condition this will are the shop of his husiness in the sillage at one of her eyes. She tried every remedy

acceled to his request, by granting time to stopp it, that witnout effects a place of a small spare room in his own house. Note that the distribution of the serving after that all the self respect and shown of which on the serving after the county in the serving after the county of the serving after the ser About two years after her marriage, she mand of herself: nay she often expressed

'Tis time to say your evening hymn, My youngest infant dove! Came press thy velvet check to mine And lean the lay of love ; My shelterings arms can clasp you all, My poor deserted throng! Cling as you used to ching to her Who sings the angel's song.

Begin, sweet birds; the accustomed strain Come, warble loud and clear; Alas! alas! you're weeping all,
You're sobbing in my ear!
Good night, Go say the prayers she taught Beside your little bed, The lips that used to ble Are silent with the dead !

A father's hand your course may guide, Amid the thorns of life;

to make, with the other necessary elements, 60 pounds of good wheat. Charcoal will absorb this liquid, and reuder it quite inof tensive to the offactories of the nose.

After wheat, corn or grass has taken up Magazine, all this nourishment, the coal (unlike lime, which has parted with its carbonic acid in Cucumnt all this nourishment, the coal (unlike lime, which has parted with its carbonic acid in the same way) is insoluble in water, and remains, as in a filtering cistern, to absorb and hold, for the benefit of the growing plant, more vegetable food from every rain that falls to the earth. For be it remembered, that dew, rain and snow—the poor man's manure, bring back to the earth eli the gaseous elements given off by all the fires, respiration and other decomposition of solid and liquid matter. and liquid matter.

The analysis of soils abounding in frag-ments of limestone rocks, shows a marked deficiency of this important element in their composition. The reason of this perhaps unexpected deficiency I will now explain:

Disintegrated limestone is decomposed by the vital action of p | 11 and its carbonic acid in the carbonic acid in t acid is taken up by their roots. It will then recently occupied by J. B. BROWN, at the combine with more of this gas which a bounds in the air and soil, and will again give it out to growing vegetables. It is this way that plaster, (sulphate of lime,) after it has parted with its oil of viriol, often produced sort words descriptions,
