To be old-fashioned has been for some time the fashion where many things were concerned. Names partook of the general tendency. The fanciful "made-up" cognomens of a generation ago gave way to "Dorothy." "Marjorie," "Esther," and other revivals of a yet farther removed vogue. Just now fresh emphasis is laid on this phase of the fashion by the return of the old-time names for flowers. It is more fashionable today, for in-stance, to speak of "daffadowndillies" rather than of jonquils, and of 'ragged-robins' rether than of bluets.
Pansies are once more called "johnnyjump-ups." Upon the same prinbouquets are not half so often Where Specialists Failed Dr. Chase

James Spence, Clachan, Ont., writes: "I had been a sufferer from Catarrh for fifteen years. It became chronic, and I had given up hopes of ever being cured when advised by a friend to try Dr. Chase's Catarrh Cure. I at once started, and am pleased to state three oxes effected a complete cure, and I heartily recommend it to anyone suffering from Catarrh." In London alone there are nearly 350

The main fort lies within the city limits, and is still to be reduced. The American officers say it can be taken in fifteen minutes when desired. The Marblehead, Dolphin, Vixen and two colliers had been off the entrance of the harbor for several days, and on Saturday morning they sailed into the channel. A mile further up they opened fire, sending 50 shots at the fortifications on the left. The hills on the right of the entrance were deserted. There were no war defenses on the right side of the harbor.

injured

No attempt was made to land until the Oregon steamed in early in the morning. Capt. Clark immediately sent 40 marines ashore, and 20 from the Marblehead followed. They found evidence of a very hasty departure by the Spaniards. Watches, hammocks and ammunition were scattered about the earthworks, and a Spanish flag was found in one of the rifle pits. The little detachment of marines held the place until the Panther arrived, when they were recalled and the work of disembarkation began. The first boatload had scarcely landed when the village burst into flames.

Company B, under Lieut. Hall, was the first ashore, and without the loss of a moment, the column started up the steep, rocky hillside to the earthworks, eventually taking up a position at the top of the hill. As soon as the American flag was swung out to the breeze from the flagstaff of the captured Spanish fort, the Oregon steamed away to join the fleet off Santiago. The marines will hold the position until the arrival of the expected troops, in the meantime scouting in the vicinity, with the Marblehead, Vixen and Dolphin lying by to protect them. Rear-Admiral Sampson now has a harbor and a base of supplies on the south side of the island, and troops

can be landed at will. The troopship Panther reached the fleet off Santiago early Saturday. On her way over the Yosemite fired a dozen shells into the port of Baiquiri, but received no response. Guantanamo is but 40 miles from Santiago de Cuba. and is a splendid location for a base of supplies for the blockading fleet. The landing was effected in an hour without accident. It was known that 3,000 Spaniards were assembled within five miles of Crest Heights, the site selected for the United States camping ground, and the work of fortify-

After the Warships Had Si-lenced the Guns That Deit. By this stroke the American forces have gained a most desirable base. They now will be able to seize the railroad which runs from Guantanamo to Caimanera, and they can take without trouble several ships loaded with coal now lying in the harbor whenever the coal is needed for the American fleet.

It is understood that the Island of Cuba is entirely cut off from cable communication with the outside world. Report here has it that the cable ship Adria cut the cable at Santiago on Monday, and that the same day the St. Louis cut the cable running from Guantanamo to the Mole St. Nicholas, Hayti. She was interrupted in the work by shells from the shore, but the Marblehead sent several shells at the

soldiers and scattered them. CONFIRMED AT WASHINGTON. Washington, June 13.-The navy department was in communication on Saturday with Admiral Sampson off Santiago by cable and by mail, with the result that it is now known officially that the American flag boats over Cuba at the mouth of Guantanamo Bay and that it has been maintained there since last Tuesday. Spanish cavalry interfered with the work and the Vixen's shells did great execultion among them. The Yankee, which arrived at Port Antonio at nine o'clock last night, reports that all is quiet at Santiago de Cuba, and that there has been no resumption of the bombardment by Ad-

miral Sampson. The Spaniards are afraid to fire for fear of further punishment. Officers of the Yankee positively deng a statement that the Spaniards have tampered with the wreck of the sunken collier Merrimac. Her funnel and

masts were still plainly visible yesterday morning. The fleet is anxiously awaiting the arrival of troops. Six hundred refugees have arrived at Montego Bay from Manzanillo.

Washington, June 13.-The navy department on Saturday posed a bulletin giving a detailed official report from Admiral Sampson upon the heroism of Lieut. Hobson and his men in sinking that at an opportune moment she the Merrimac in the Santiago channel. Admiral Sampson's report concludes with these words:

"Referring to the inspiring letter which you addressed to the officers at the beginning of the war, I am sure you will offer a suitable professional reward to Mr. Hobson and his companions. "There were hundreds of volunteers who were anxious to participate; there were 150 from the Iowa, nearly as many from this ship (the New York), and large numbers from all the other ships, officers and men alike.

Reports are again rife that the queen regent wishes to shift the regency to the Infanta Isabella and to let her accept the American conditions. It is expected that Russia will protest against the open alliance of Admiral Dewey as a belligerent with Aguinaldo, the insurgent chief, London, June 13.—The Madrid correspondent of the Standard, telegraphing Sunday, says: General Blanco having again telegraphed that in case the blockade becomes stricter, it will be urgent to send war stores, as his supplies are running short, the government has taken steps to dispatch abundant supplies by fast vessels from Spanish and foreign port. The more important supplies from Spain will be strongly convoyed and will be sent immediately. Gen. Blanco has also telegraphed that the authorities at Santiago de Cuba claim to have repelled the American attempt to land in the lower and outer bays of Guantanamo, the Spanish forces being entrenched in positions commanding the best landing places between Santiago and Guantanamo.

Spain Sure to Lose. THE FATE OF SANTIAGO SEALED.

London, June 13.-Rear Admiral Sampson's acquisition of a base for coaling and supplies at Guantanamo is universally recognized as practically sealing the fate of Santiago de Cuba, although it is believed that the Spanish troops will show a good fight before the city is captured. BIG LOAD OF COAL CAPTURED. New York, June 13.-A dispatch from Mole St. Nicholas, Hayti, says: merchantman captured by the auxiliary cruiser St. Louis, just off Morant Point, Jamaica, last Friday night, was the British steamer Twickenham. On board the Twickenham are 3,200 tons of coal for the Spanish fleet. She has been sent as a prize to Key West. In the fireroom a man in overalls was found, who spoke only Spanish. After a vigorous cross-examination by Capt. Goderich, of the St. Louis, this man admitted that he was a Spanish officer in charge of the cargo. On the approach of the St. Louis he had thrown his papers and commission overboard. He appeared to be badly scared at the way things had turned out. He was sent as a prisoner of to Key West on board the captured steamer.

Has Manila Fallen? UNCONFIRMED RUMORS SAY IT HAS.

Washington, June 13.-Word has been received here that Manila has surrendered, but the officials are still without information as to whether it has surrendered to Admiral Dewey or to the insurgent forces. Mr. Tarte, in answer to Mr. Wallace, said that there could be no excuse for the treatment that laboring men received on the Crow's Nest Road. He continued: "I am very sorry that Mr. Charleson has been in any way mixed up with the hiring of men in Ottawa. Mr. Charleson and Mr. Haney were old friends, and if I am correctly informed Mr. Haney asked Mr. Charleson to find men for him. Mr. Charleson never asked any authorization, and I gave no authorization. The newspapers published items to the effect that Mr Charleson was hiring men. I asked him in what capacity he was hiring them, and he said a few friends had asked him out of pure friendship to help place men with Mr. Haney, and was doing it without receiving remuneration. He said he was doing it after office hours. As a point of fact, he was doing just what one of us might do at that time." The minister said that Mr. Charleson was away, but when he returned he would be called upon to account for what he had done, and if he was not in a position to give a satisfactory explanation he would have to take the consequences. In such cases we find most commonly a degeneration of lowering of type; a subnormal func-tional activity, so to speak, is predominant. It is almost impossible that this should not be emphasized upon some particular system, such as the nervous, the digestive, or the circulatory; and in many cases we have to recognize that this is simply an exaggeration of the underlying condition. Thus we find that many of the conditions of childhood which are popularly-and sometimes professionally-classed under some such high-sounding title as "atrophy" or "marasmus," are really the resultant of an alcoholic condition which has been transmitted. SHAKE-UP IN THE LONDONS. The Londons returned Saturday at 8:30 from their unhappy visit to Port Huron. This week they start out with a new manager. His name is "Pop" Smith. Mr. A. D. Holman has resigned that position, to which he was appointed last year. The unexpected slump of the Londons in the past two weeks has naturally disappointed and discouraged Mr. Holman, who had every reason to believe at the beginning of the season that he had gathered a winning team. It certainly looked that way, but baseball is an uncertain thing, and the management could not foresee the unfortunate turn affairs were to take. Mr. Holman is exceedingly well-liked by the boys, who have always received courteous treatment at his hands, but he does not pretend to be a baseball leased. ANSON, OF NEW YORK.

A WOMAN PITCHER Philadelphia has the young woman pitcher of the season. Her name is Miss Lizzie Arlington, and she can throw a ball to beat three o fa kind. She has all the tricks of the average professional male twirler, and with a good team behind her has won games from several strong semi-professional clubs. The fun of it is, the young woman is not in the business for her health, and city and amateur leagues generally are in line to procure her services because of the added attraction and the consequent swelling of receipts

FOUNDER AND John Cameron.

London, Monday, June 13, 1898. A Striking Record.

Parliament was finally adjourned for the year this afternoon.

Much valuable work, apart from the careful administration of the departments, has been done by the Liberal Government since it came into power less than two years ago. It may not be unprofitable once more to briefly glance at a few of the achievements of Sir Wilfrid Laurier and his colleagues during the short period in which they have been charged with the management of public affairs.

The tariff bas been revised in the interest of the whole people.

Duties or commodities required by

the masses have been decreased. The free list has been extended to such articles as binder twine and barbed wire, largely used by farmers. Preferential trade has been establish-

ed with Great Britain. The French and Belgian treaties

which prevented Anglo - Canadian preferential trade, were got rid of as soon as it was possible for our Government to make the necessary representations to the Imperial authorities. Free trading colonies are, with the

per cent over outside countries. The Manitoba school question has

in accordance with the promise of Sir

The fast Atlantic steamship service has been arranged for.

A special steamship service is established between Canadian ports and great canal.

Improvements have been made in the Immigration Department, and this year neared Embrum. After crossing the the number of new comers entering bridge he noticed that the switch was the number of new comers entering Canada is larger than in any similar period for many years past.

The Franchise Act has been repealed, and the municipally compiled lists take the place of the discredited statute.

The Yukon gold fields have been train reached the switch, the engineer opened up, and the welfare of those entering the territory has been well looked after, while the public interests have been respected in the legislation gravel car were burned in the wreck.

Legislation has been passed requiring that all dairy packages leaving Canada must be stamped "Canadian." or "Made

Cold storage of farm and dairy products has been provided for on Canadian railways and steamboats running from our ports.

The rate of interest on money borrowed in Great Britain for Government purposes has been reduced from 3 to 21% per cent.

The United States alien labor law was met by a similar Canadian law. Mutual repeal of these statutes is now

expected at an early date. The opening up of a vast mining territory in British Columbia to the trade of the east, and the bringing within easy reach of a growing consuming public of the large deposits of coal in the Crow's Nest Pass has been ac-

Railway monopoly rates on the western division of the Canadian Pacific Railway have been broken, and arrangements to have freights very considerably reduced were made.

The system of superannuating members of the civil service, largely at public expense, has been abolished.

The bill for legalizing the taking of a plebiscite on the prohibition question has been passed.

The Government Intercolonial Railway has had its western headquarters placed in Montreal, thus being put in a position to effectively compete for a fair share of the traffic to and from the seaboard which the great Canadian port commands.

A joint international commission has been appointed to meet and devise a settlement of all disputed questions that now exists between Canada and the United States.

The total exports of Canada have been increased to \$145,000,000, or \$36,000,000 more than in the best year that the Conservatives held sway.

New grain routes have been opened up, and Canada is now carrying a greater portion of the cereals of the continent from her seaports than she

ever did in her history. Not a bad record for a Government that will only have been sworn in two years on July 13 next. During the ensuing three years of this Parliament proportionate progress will doubtless be made.

More Than One Klondike.

Whenever intelligent outsiders examine our resources, they are enthusiastic over the future of the Dominion. Mr. E. A. Bremner, of London, England, for example, has been telling Torontonians that Canada is entering on a era of unprecedented prosperity, which will raise it to succeed South Africa in the commercial eve. As yet, he says, the Klondike is viewed with a slight suspicion. Great Britter what comes of the gold region, it is evident that in our prairie lands we strength. whole people, Tomorrow will be the birthday of the United States flag, for on June 14, 1777, Congress established the national emblem. At that time, as might be expected, there was much resentment against the flag of the motherland. Today, owing to the re-established friendly feeling between the two branches of the Anglo-Saxon race, the British flag is received with greater respect over the border than has ever been the case in the intervening 120

Such lans, iv., 11-12. He held that the two persons may profit by reflecting on the important achievements of the Government in face of great obstacles, and how different the position of the Dominion would have been had their opponents remained in office.

THE CONGRECATIONALISTS.

Amalgamation With the U.S. Church Savored-The Union Convention Closed.

Toronto, Ont., June 13 .- The Congregational Union closed the week discussing the question of a closer union with the church in the United States. Rev. Dr. Fitch, of Buffalo, advocated the amalgamation of the leading offices of the unions on both sides of the line, To say nothing else, much time and expense would be saved thereby.

Ex-Chairman McIntosh, of Ottawa, said that the leaders of Congregationalism on both sides of the line were ripe for the step. It would infuse new life into the whole body, and he urged that a strong deputation be sent to the States to convince the American people of their eagerness for union. Mr. Chas. Cushing, of Montreal, said that in England the union was regarded as desirable.

The committee who had charge of the question last year had no report to offer, and as the Americans have made no official move they were appointed for another year.

Rev. Henry Varley Defended by Rev. Thomas S. Johnson.

Opening of the York Street Mission Under First Methodist Auspices-The Christian Workers in Their New Place of Worship.

Rev. Thomas S. Johnson, in closing his discourse yesterday morning at Adelaide Street Baptist Church, spoke strongly in defense of Henry Varley, the noted evangelist, who recently visited London, and who, in Mr. Johnson's opinion, has been not only unwisely but unfairly criticised. Mr. New Testament orders of apostles and prophets had served their purpose for the time and had passed away. Pas-

Moody himself had stated that Varley was the prince dorse all that Mr. Varley had said, he was not prepared to say that he might do so had he studied and thought out these subjects on which carried. they differed as fully as Mr. Varley had doubtless done. This, however, he could say, that he never heard Mr Varley without having his faith in God and skepticism when there is so little faith in the world, and when the man who sticks to the old orthodox doctrines is deemed an "old fogey," it ill became ministers of the Gospel to range themselves on the side of the captious critics. If Henry Varley did no more than bring people back to the plain truths of the Bible, he had accomplished a great work. The Bible would stand after so-called higher

criticism had long been swept away. The York Street Mission was formalby opened under the auspices of the First Methodist Church yesterday. The services were largely attended, and many expressions of goodwill were heard from adherents, stating that they were glad to get back to the mission again. At the conclusion of the respective services, hearty handshaking took place, and everyone seemed enthusiastic over the good work they agreed upon would follow from the mission's efforts. Mr. James H. Irwin conducted service in the morning, and Mr. Thomas McCormick, assisted by Mr. T. R. Parker, in the evening. There was a large turnout of children at Sunday school in the afternoon. Super-

intendent McBroom was in charge. The Christian Workers. Opening services were conducted by the Christian Workers Sunday in their new premises, formerly known as the Kling Street Methodist Church. Messrs. Garrett and Roffe, of Toronto. and the pastor, Mr. McKenzie, were in charge, and the congregations were large. There was service in the morning at 11 o'clock, in the afternoon at 3 o'clock, prayer meeting at 6:30 p.m., followed by the regular evening service. Mr. and Mrs. Roffe rendered solos in the morning very acceptably. An intensely earnest sermon was delivered by Mr. Roffe in the evening, in the course of which he referred to the professed Christians who never got beyond "sacred memory." They are Aways talking about their conversion ten or 20 years when they should be thinking of their temporal blessings. And yet, he continued, there is something better than that. People should not be taken up with the the blessings, and so lose sight of the Blesser. A prevalent evil among the churches was that the world was rushing in. This meant temporal welfare, but it prevented the church from getting a fuller portion of the Holy Spirit than otherwise. The meeting was protracted to considerable purpose of carrying on an aggressive

His first mistake was building the tabernacles or the wrong tenants. He wanted to build them for a glorified Christ and Moses. In the evening "Peter's Second Mistake" was the subject. Peter wanted to build on a mountain where all the people had become Christians. This was the way with some preachers at the present day-they wanted to build on a mountain, or live in an atmosphere too high for their congregations. Preachers often were not understood by their flock. The matter of religion should be simply and plainly expounded. The collections were large at both services.

Hill Street Mission. Anniversary services were held in the Hill Street Methodist Mission yesterday. The edifice was filled with large congregations, both morning and evening. The scholars of the Sunday school sang a number of appropriate selec-tions in good voice, thanks to the careful training of Mr. H. Lewis. The services were of a very interesting character. Rev. George Gimour, of Pottersburg, conducted service in the morning, and Rev. Mr. Boone, of the Maitland Street Baptist Church, in the evening. Open school was held in the afternoon, Rev. Mr. Sawver and Rev. W. J. Ford giving short and instructive addresses to the scholars. The orchestra was also present under the leadership of Mr. J. W. Cottam.

Dear Sirs—I have been keeping in the house rour Radway's Ready Relief for the last six years. I have used it in every way, and found years. I have used it in every way, and found it to be the best on earth. Six years ago I was sick. I tried all kinds of medicine, but they did me no good. My father saw the advertisement in the paper; he told me to try a bottle. I did so, and by using it three days I was able to be out. I have kept it on hand ever since, and have told my neighbors about it. My wife has been troubled with toothache. I gave a trial of the medicine and it cured her pain instantly. I was gathering even and got my trial of the medicine and it cured her pain instantly. I was gathering corn and got my hand caught between the wagon bed and standard and mashed it bally. I ran to the house and poured on a lot of Radway's Ready Relief and had no more pain. I tied my hand up with a piece of flannel poured on more Radway's Ready Relief, and in an hour I was ready to take hold of my work again. I cannot be thankful enough. I could write a great deal more, but this paper would not hold half of what I ceuld write. Yours truly. of what I could write. Yours truly, JACOB K. KAPPLER.

Hood's Sarsaparilla is a modern medicine, containing just these vegetable ingridients which were seemingly intended by Nature herself for the alleviation of human ills. It purifies and enriches the blood, tones the stomach and digestive organs and creates an appetite; it absolutely cures all scrofula eruptions, boils, pimples, sores, salt rheum, and every form of skin disease; cures liver complaint, kidney troubles, strengthens and builds up the nervous system. It en-tirely overcomes that tired feeling, giving strength and energy in place of weakness and languor. It wards off malaria, ty-phoid fever, and by purifying the blood it seeps the whole system healthy.

steady. A slight improvement in the weather, however, weak foreign mar-kets and a growing sense of the significance of the immense acreage sown to wheat this season, together with its generally excellent condition, produced a feeling of weakness. Longs quickly lost heart, and began to let

go. The fright became so general that the liquidation rush finally became more of a matter of finding buyers than of prices. Short selling, led by Cudahy, was also general. July, which closed yesterday at 88½c, sold down to 85½c, and September fell off from 75%c to 7½c. Care for Butter and Eggs, But None for the Big Fruit Trade.

As we are at last to have some real improvement of our market facilities, it is to be presumed that the city fathers gathered some ideas during their visit to Ingersoll, Woodstock, Galt, etc., wanted hogs, but provisions were still which they are now putting to prac-lower, and prices for hogs took a tical use, and while, perhaps, it is to tumble of 10c to 15c; fair to choice, \$4 be regretted that the council of a city to \$415; packers. \$380 to \$3971/2; like London has to get its ideas from towns the size of the foregoing, yet their promptness in so soon farting offerings of sheep sold at the recent ad- them on the way, when once they acvance; native sheep, \$3 to \$4 121/2; ex- quired them, shows a commendable deporters, \$4 40 to \$5 121/2; Texans, \$3 50 sire to do all they possibly can to imto \$4 50; yearling lambs, \$4 to \$6; spring | prove our market to the best of their knowledge and ability.

The inclosing of our market bazar has been suggested on more than one occasion by the writer, but with a different view. As I understand it, the bazar, when inclosed, is to be used as a butter and egg market, and it is more than doubtful if the vendors of these articles will appreciate the kindness of in Hamilton. The untreated sewage the council. Now, Mr. Editor, would it not be better to look closely and carefully into this matter before too much money is expended in what might prove to be another useless experiment. Early last year, at the instance of a few interested parties, the fruit tables and stalls were torn down, per cwt | which undoubtedly benefited some two or three real estate owners, at a cost to the taxpayers of upwards of \$1,500 per year. But what improvement this is to the market or citizens would be hard to find. One thing is certain, the public does not appreciate it, and I venture to say that had the council owned the bazar they would not have

been, so hasty.

The next "improvement" attempted proved even a more complete failure, viz., the erection of tables and benches in the bazar for the sale of butter and eggs. at a cost of nearly \$200. The only one this benefited was the contractor, and though it is now nearly ten months since these tables and benches were erected, not one basket of butter or eggs has been offered on them for treated per day. There is no data of sale. To do the council justice, they bles, and a suggestion was made some two months after their erection that other. The united cost of the two they be taken down, but it was considered too early to exhibit their in-capacity for market improvement. \$30,600 per year—over 87 cents per head of contributory population. The only result to the taxpayer will be to be out of These people have time and time again distinctly stated that they do not wish to leave the west side of the market. If they had wished to occupy the bazar, why did they not do so some years ago, when the bazar, together with the stalls, etc., was offered increased one-half again. This he conther with the stalls, etc., was offered to them free, and when the conveniences on the west side of the market were nothing like what the are now. find that five years ago it was of little importance, and that last season, in three months, upwards of 100,000 packages of native fruits, valued at \$40,000, were shipped into this city, and the trade is only in its infancy. When it is considered that this amount of business was done in the face of every inconvenience, and that during a season when not one basket of fruit was received from the west, and that according to the deputy minister of agriculture the fruit crop in the west was only a fair one, what might be expected in the future if this trade was only given a portion of the encouragement now so lavishly given to the egg and butter women? They have some conveniences, and apparently all they want but the fruit men none. Montreal and Toronto have a fruit market, and I believe Hamilton has one, also; and why not London? Ingersoll, Woodstock, etc., do not need one, but London is not Woodstock, and I doubt if even Ingersoll practices the smallminded policy of our city council, who year after year auction off market space that should be free to the fruit is not because the fruit receivers object so much to paying even this high figure, as it is because of the total unfitness of an open market in which to sell fruit, on which the dust stirred up by passing vehicles settles, and the sun and rain does not improve. What the Hamilton People Have to Pay for Their Sewage System

Which London Alderman Purpose Visiting-The Cost Heavy and Results

ed to clarify the sewage of about 35,000

Not Yet Satisfactory In the Canadian Engineer for June, Mr. W. M. Watson, an engineering expert, writes an interesting report on the Hamilton precipitation sewage system. which London aldermen purpose adopting. There are two sewage works intend-

people, out of the population of 50,000 falls into the bay, and into a spot known as Coote's Paradise. The cost of constructing the smaller works on Wentworth street was \$38,000. The av- er, Mr. James Darling, was informed erage cost of operating it with one set of men for ten hours daily is \$20 32, or \$7,415 84 per annum. Add 4 per cent interest on the outlay, \$1,520, and allow 10 fright was the trouble, not evil spirits, per cent for wear and depreciation of value, \$3,800, and the annual cost reaches \$12,736 80 for treating the sewage of about 12,000 people. This is over \$1 per head. If run day and night expenses would be doubled. The clarified sewage goes into the water unpurified, jeopardizing the health of those in the vicinity. The other works at the foot of Ferguson avenue are over twice the size of the Wentworth street works. They cost \$42,000, and are said to have a capacity of 3,000,000 gallons daily. If, then, 3,000,000 gallons arrive at the works daily, the average per hour will be 125,000 gallons, and for the ten hours the works are in operation 1,250,000 gallons of sewage treated, and 1,750,000 gallons sent forward to the Bay unthe cost of management, but experience shows the expense of these works will be at least 40 per cent more than the works, serving 35,000 people, is therefore of contributory population. If worked | well. day and night, the cost would be dou-

Mr. Watson describes and rather unfavorably criticises the mode of chemical treatment. He says he is inform ed that improvements will shortly be made, and probably filters added to purify the sewage after clarification. But, he says, these additions will nearly double the cost to the ratepayers. and should all the sewage be handled siders a stiff bill.

FRED HILLIER'S BODY FOUND.

After a Lapse of Nearly Seven Months-In the Water During That Period-Brought Here for Burial.

The body of the late Frederick Hillier, who was drowned in Old Man's River, Fort McLeold, N. W. T., was found on Tuesday last after a lapse of nearly seven months, during which period the body remained in the water. The accident occurred on Nov. 20, last, on the Crow's Nest Pass. Mr. Hillier was in the employ of the road as a conductor, and was making his usual trip, when the bridge over the above river gave way and precipitated the train down an embankment into the water. He had only been in the employ of the road for a month, having worked with the Burlington Railway for some twelve years. Everything possible was done at the time to recover the body. The river was dynamited, and the mounted police tried every device without success until Tuesday last. Mr Hiller was born in this city, and here about 16 years ago. He was 42 years of age, and leaves a wife and one child, residing on York street. His parents live in Woodstock. The funeral will take place tomorrow morning at 10:30 at Woodland cemetery. It will be under the auspices of the Order of Railroad Conductors So-The body will arrive in the city tonight at eleven o'clock. Deceased's brother, of Fort McLeod, N. W. T., will accompany the remains to this city.

The Second Philippine Expedition Ordered To Be Ready for Wednesday.

THEY'RE OFFI Washington, June 13 .- The first division of United States troops to begin the invasion of Cuba sailed from Key

West at daylight this morning. The expedition comprises 773 officers and 14,567 enlisted men, all under the command of Major-Gen. Shafter. A large force of transports conveyed the troops, under the convoy of a strong squadron of warships, ranking from the immense battleship to the small gunboat and armed fast-sailing yacht.

WAITING FOR THEM. Mole St. Nicholas, Hayti, June 12-6 p.m.—The expedition from Tampa, under Gen. Shafter, convoyed by American warships, is anxiously awaited by the fleet off Santiago de Cuba. Operations will begin immediately after the arrival of the transports, which are

Cuba WHOLESALE DENIALS BY THE

SPANIARDS. Madrid, June 13-2 p.m.-A semiofficial note issued today emphatically contradicts all the American reports of that American forces have effected a landing in Guantanamo Bay or elsewhere. The note concludes: "The Euthe end of her resources. On the con- imperial order. trary, Spain is full of hope, and deter-

mined to continue the war.' WHAT BLANCO SAYS. London, June 13 .- The Madrid correformation from the Spanish side about Cuba is a short dispatch from Gen. Blanco to the minister of war, as fol-"Respecting Santiago, Gen. Linares reports that today fifteen merchant ships, with some tugs, forming apparently a total of 24 vessels, appeared before the fort at noon. Only fifteen remained, the others having left for Guantanamo with the Massachusetts and Dolphin, which cannonaded the heights of Baitiquirir. No casualties are reported. We do not know whether these merchantmen carry a portion of

the contingent for the expedition." THE AID OF GOMEZ. The Times, commenting editorially upon the "arrival of a new stage in the development of the war," says: American commander is not likely to put unlimited faith in the assistance of Gomez. Judging from past experience of the work of the Spanish army against the insurgents, the reduction of Santiago will not prove a formidable task. In any case we shall soon know whether the Spanish army can better vindicate the ancient fighting reputation of the Spanish race than Admiral Cervera's squadron has done."

MORE TALK OF INTERVENTION. London, June 13 .- The Daily Telegraph says editorially this morning: We learn from an exceptionally wellinformed source that communications of a character which lend themselves easily to official reputation are passing between Vienna, Paris, Berlin and St. Petersburg on the question of intervention between Spain and the United States. It is said that Emperor Francis Joseph has taken the initiative. Spain, however, must face the situation squarely. Cuba and Porto Rico will obtain independence, and in all probability the United States will retain the Philippines as security for the indemnity, which is not likely to be paid for

many years.", BAD OUTLOOK FOR SPAIN. London, June 13 .- The Madrid correspondent of the Daily Mail says: An extremely bad impression is current here as to the outcome of events. Business men are inclined to the belief that the war will be short, probably only lasting another month. Military men hold the opposite view, considering that Spain can put much reliance on the elements. At the cabinet council today, the foreign minister made a report as to his conferences with the ambassadors of the powers. It is understood that nothing definite has been arrived at. While the American landing in Cuba is officially denied, the authorities assert that if it were true it would be unimportant, as the Spanish army would give a good account of itself. It is believed that the question of food supplies, so far as the peninsula is concerned, is settled at least until October.

THAT \$200,000,000 LOAN. New York, June 13 .- In view of the probable early issuance of a circular by the secretary of the treasury, asking for subscriptions to the loan authorized by the war revenue bill, to the amount of \$200,000,000, the National City Bank of New York, the Central Trust Company of New York and Vermiliyea & Co., have informed the secretary of the treasury that they will subscribe for the entire loan of \$200,000,000, such part as may not be subscribed for by the public, in order to insure the immediate success of the loan.

SITUATION AT MANILA.

the surrender of that place. He received a cable message from Manila yesterday via Hong Kong, reporting that the road was working, and no surrendered. Mr. Briggs believes the Spaniards would surrender to Rear Ad-

miral Dewey in preference to being conquered by the insurgents. The secretary is informed that a full understanding existed between Admiral Dewey and the insurgents, and it is generally believed at Hong Kong and Manila that before Aguinaldo, the insurgent leader, consented to return to Manila, he secured pledges that the United States would not leave him in the lurch by returning the Philippine Islands to the Spaniards. Referring to the Spanish tales of alleged insurgent atrocities. Mr. Briggs says they are utter nonsense, He adds that the natives of the Philippines are the mildest people in the world, and asserts that all the Europeans there were surprised that they

A ROYAL EVANGELIST.

Prince Oscar Bernadotte, second son of the King of Sweden, is conducting a series of evangelistic services in the city of Copenhagen. It is said that these meetings are moving the city as it has seldom if ever been moved be-fore. It will be remembered that the startled his country and surprised the world a few years ago by marrying a maid of honor at the He first met her in a hospital ward where she was visiting the sick. His father, the king, made no objection to the marriage, but stipulated that, in accordance with the law, the nutriment. They are just the mediprince should first sign letters renouncing all right of succession to the tion. trone and resigning his title of royal highness. Since 1888 he and wis wife have been recognized as among the noblest Christian workers in the country, and during the last two years he has devoted himself quite largely evangelistic work. It is said that he has a marvelous acquaintance with the Scriptures, and that he reads them with extraordinary dramatic power. Efforts are being made to induce him and his wife to continue their work in other countries. Whether they will do so remains to be seen, but, with perfect modesty and intense and unquestioned earnestness, they seem to be reaching mulitudes in their own country who before have been un-touched by the gospel message.

WOMAN WANTED HER LUSBAND PART NED.

Gov. Taylor, of Tenn. se, is noted for his ability to tell a set story as well as for a softness of heart that compels him to make more frequent use of the pardoning power than does any other governor. An illustration of both of these traits came under my observation a short time ago during a visit to Tennessee, says Leslie's Popular Monthly. I was sitting in the parlor of the Marshall House, in Nashville, with a little party of friends, which included Gov. "Bob," when the latter was asked if he were not over-run with applications for pardons. The mention of the word "pardons" always starts the genial governor on a string of stories, and this instance was no exception. He told four or five before the little party broke up. One of them, at least, is worthy of a larger audience. The governor had fled to his summer home to escape the crowds of pardonseekers, when a woman who had sought him in vain at the capitol was ushered into his presence. "Well, madame, what can I do for

"I want to see the gov'ner, sir." "Well, I'm the governor; what is it?" "Ah, sir, my man he's been put in prison, sir, and I want to ask if you

won't let him out.' The governor's face hardened. He had not, after all, escaped the pardonseekers. But he did not turn her away. "What was he sent up for?" he

"You see, sir, we was hungry, and he just stole a ham to keep us from starv-"Well, I'm sorry; but I can't do anything for you. Your man must serve his sentence. There's too much steal-

ing going on." "Oh, Gov'ner, please, please let him out," pleaded the woman, the tears flowing down her cheeks. The tears had their effect. The Governor softened. Stealing a ham was not such a very terrible crime, and this poor woman no doubt needed her

a little. "But why," he asked, "should I give your man his freedom?" "Because, sir, we are hungry again, and we ain't got no more ham.

GIVEN AS A MEDICINE. A rebuke emphasized by kindness is apt to be remembered. One day an officer walked into the office of one of the well-known business men of the West.

"What do you want here?" he said to the officer.
"I've come to attach the wages of one of your men for a debt.'

"Who is the man?" "The officer named him, and he was at once summoned to his employer's "How long have you been in debt?"

"This will pay all your bills. If I

hear, of you running in debt again you'll have to go."

It was what the doctors call "heroic treatment." and it not only astonished the man, but "revolutionized" him. He settled with his creditors, with carefulness, kept out of debt. Better than a genius for making money is the habit of paying as you go. They are warm and hearty in their friendship for the United States. No English leader ored young man, who used to wear the could afford to take any line of action | highest collars in the house, save Gladpointing in any other direction. The Liberals seemed disposed to cavil over the ministerial contention that Lord Salisbury was entitled to the primary credit for the improvement of relations between England and America. Each bench desires the prestige of being foremost in promoting good feeling with America. The object of the debate seemed to be to harass Mr. Chamberlain: but while 128 members voted against the government, it was a misleading and futile demonstration.

OPPOSED TO ISOLATION. Mr. Chamberlain disclaimed the notion that he favored any particular continental alliance, or that he had been touting for assistance from any quarter, but again protested against the policy of isolation, and closed with an eloquent reference to an American The Irish passage in his speech kindled a fiame in the Nationalist benches, and possibly was indiscreet, but the speech as a whole was brilliant and useful. Mr. Chamber-lain was in advance of English opinion in his speech at Birmingham, but he and knows it.

UNANIMITY.

On the same subject another correspondent says: The animated debate foreign office vote is the most emphatic evidence yet produced for the complete unity of the English Radicals and Tories on the question of "those who sup with the devil must have a long spoon" speech. Then passing to the bait which Mr. Chamberlain held out to Germany, Mr. As-

Indeed, was the only point in Mr. Chamberlain's speech to awaken Liberal cheers. This unanimity was all the more striking because of the wide differences springing up between the Russophobists and the Russophiles, and between the advocates of European military alliances and England's continued isolation. At the same time ere is a widespread feeling that Mr. Chamberlain is too impulsive even in the matter of Anglo-American co-

They welcome American co-operation on the proad grounds of mutual interest and racial sentiment, but they will not admit that England is any the less prepared to work out her world-wide destiny alone. Here, as always, Mr. Chamberlain is pushing the bagman in his hurry to finish off his deal and pocket the commission. RELATIONS WITH RUSSIA.

As regards the relations with Russia, there is no doubt that Mr. Chamberlain has now got his way in the cabinet notwithstanding Lord Salisbury's pro-Russian proclivities. The idea that Mr. Chamberlain was by his remarkable anti-Russian speech in Birmingham trying to force the hand of the cabinet, and especially the Salisbury-Balfour section, is quite disposed of by the statements in the House of Commons on Thursday of that other minister of the Salisbury group, Mr. George N. Curzon, who went out of his way to declare that British ships will continue to use treaty rights access to all ports in China; and further that the sending of Russian troops into the Yang Tse Kiang Valley, by railway or otherwise, unless with the assent of China, would be an act of war, in which event the British Government would take the requisite steps to protect British interests. A responsible minister could not well use uglier words.

NEGOTIATING WITH FRANCE. While the Anglo-Russian outlook is thus stormy, the Anglo-French outlook is clearer. A statement comes from sources which cannot well be misinformed, that the Paris negotiations respecting West Africa are approaching a conclusion, foreshadowed months ago in these dispatches. France is to evacuate Boussa. The navigable Niger, south of the rapids, remains British. In consideration of France's civilizing efforts in Dahomey, the town of Nikki is left to her, giving her, therefore, some share in the Lagos hinterland. In the Gold Coast hinterland. England is

there used to be contests between the Charles Dilke, Sir William Harcourt, worthy of the name since. But the Mr. Asquith, Mr. Chamberlain and Liberals now have some hope of wining. To give the struggle personal zest, another of Lord Salisbury's nephews is the Tory candidate, who, if elected, would raise the immediate family group of Cecils in the commons brother and heir of Earl Spencer, will make the Liberal fight, and he is by far the strongest Liberal candidate conceivable. He is an exquisitely-tailstone, and won parliamentary immortality years ago by beginning a speech on some allotments measure with "Mr. Speaker, I am an agricultural laborer." > LORD WOLSELEY'S RETIREMENT. Lord Wolseley's early retirement from the position of commander-inchief of the British army is certain. The post demands a younger man. It is mooted in official quarters that he is acceptable to Canada as governorgeneral. Whether Lord Wolseley would accept is another question. Lord Roberts will probably succeed Lord Wolseley as commander-in-chief, and it is suggested that the Duke of Connaught may succeed Lord Roberts in command of the forces in Ireland, thus solving the question of the royal residence in Dublin.

GERMANY UNCHANGED. There is no material change in the feeling in Germany in regard to the war between Spain and the United States. The government scrupulously avoids expressing its views on the subject, and a few of the German news papers persist in their attitude of little short of open hostility towards the United States. Throughout the week they have vehemently maintained that the occurrences at Santiago de Cuba amounted to "another defeat of the Yankees," and have gleefully printed the lying Madrid dispatches supporting this contention. These newspapers also continue to charge the Americans with cowardice for not attacking the Spaniards "whom until recently the Americans regarded as foes unworthy of their steel." A member of the general staff in Berlin, in an interview with the correspondent of the Associated

Press, said: "It is hard for a trained soldier of the European mold to suppress a sentiment akin to contempt when reading the accounts of what has thus far been done, or, rather, left undone. With no Spanish fleet to worry them, money and transportation in abundance, all the men needed at their command. they have been unable thus far to even effect a landing of troops. This fact speaks for itself. And, after the enormous boasting of the American press and people, who systematically belittled the Spaniards for months before the outbreak of hostilities, this inglorious failure is doubly conspicuous, and if striking proof of the great superiority of the European system of standing armies was needed, the Americans have furnished it.' The above sentiments are apparently shared by all the German military men.

The attempts of Spain to secure European intervention continues, in spite of the little encouragement held out by the cabinets approached.

The feasibility and probability of an Anglo-American alliance or understanding is attracting widespread attention in the German press, though

the idea is universally scoffed at as im-

practicable.

A DANGEROUS GANG. Complaint continues to be made of the gang of young rowdies, some of them sons of well-to-do citizens, who congregate on Sunday evenings, and sometimes on other evenings, on the southeastern corner of Victoria Park. leering at and insulting ladies, and corrupting each other. A few policemen to keep all such gangs from congregating, would save passers-by from annoyance, would preserve the intention of the park, and probably save more than one young man from future ruin and imprisonment.

A CLEVER STUDENT. The Toronto World says of W. E. A. Slaght, B.A., who captured the gold medal of Victoria College, being first in honor, philosophy, and also the gov-ernor-general's gold medal for general proficiency: "Mr. Slaght was born in Woodstock in 1874, and four years later his family moved to London, where after going through the public school, he entered the London Collegiate Institute, when 16. He attended this institution three years, missing the greater part of one year, and, graduating, came to Toronto and entered the Vic toria University in class '94. Mr. Slaght is possessed of perhaps the ideal mind for the storing and application of knowledge, for, although not exceptionally brilliant, the young man is possessed of a clear, cool head, a faculty for the assimilation and retention of knowledge and a splendid memory. He started out with the intention of winning the college good medal, and his talent may be surmised when its is stated that his heart was set on this, and the winning of the medal for general proficiency came to him as an afterthought. He got to work and tackled his bete noir-English-with the known result. He has taken first-class honors in each year in all his subjects. and last year won the Chown scholarship in philosophy. Mr. Slaght is president of his class, and popular with his fellow-students and professors. About the only department in which was with reluctance that I consented he has not taken an active part is that of sport, and this is due to his rather weak constitution, one of the trials against which this brilliant young student has had to struggle. A glance at the picture of Mr. Slaght reveals a quiet, clever face, perhaps one inclined to idealize, grave and studious. This young man's ulterior aim was to graduate in law, but it appears, despite the temporary goal reached, the gods have willed otherwise, for the sudden death of Mr. Slaght, sen., and the not-to-be-avoided death of the

DAMP WEATHER ON THE HEIGHTS

Rain Prevents Shooting on Saturday and Keeps Visitors at Home Sunday.

Impressive Sermon by Rev. Canon Dann on the Prodigal Son-Notes of Interest.

There were much more pleasant places on Saturday than the camp and the rifle ranges. The downpour of rain caused the men to seek shelter under the canvas, through much of which the water trickled merrily, to the great vexation of the men. On Saturday morning at 7:30 the Middlesex Light Infantry proceeded to the butts for rifle practice. There were periodical showers of about twenty minutes' Bank of Commerce, Toronto. Miss duration, which dampened the ardor of Fraser, Ottawa, was chief bridesmaid, -Mr. J. B. Sodden, clerk in Ander- the marksmen, and at other times the and D. J. Macdonald, Toronto, groomsson & Nelles' drug store, underwent an wind blew in fitful blasts that rendered man. operation for appendicities at the city spood aim impossible. The shooting at hospital last week, and is now doing the 200, 300 and 400 yards ranges had been completed when the heavens opened and a deluging rain poured down upon the men. All were soaked boundary of the First Methodist McEwan decided to strike for home. The march home was a glorious one. Everybody sang, or made a noise of some kind, and when at last the bar-

racks were reached the battalion broke

In the evening the Twenty-sixth borrewed boots and clothing from every available place and person. At 8 o'clock a few of the officers of the Twentysixth gathered in the marquee to talk over the events of the day and have the usual glass of "lemonade" before retiring. One by one the group grew larger, and each glass of the cooling beverage became sourer. Nobody present wanted anything but choice music and good speeches and songs, all of which were sometimes rendered together. Mr. Keating delivered an oration on the "Magnetic Force of the Moon"; Major Hugh Niven sang "Nothing More"; Mr. Pavey gave a Dutch "reel," and Major Stewart gave an address on "How to Cultivate a Capacity." Capt. Garnet occupied a seat at the head of the table, and closed the impromptu with a short essay on the "Yanko-Spanko War." Archie Becher, acting captain, sang the National Anthem.

SUNDAY IN CAMP. There was nothing like the number of people at the camp yesterday that usually takes in the sight. The rain and the wet grass kept the thousands tents. At 8:45 the volunteers of the Protestant persuasion were formed up and marched into the large green sward to the southeast of the bar-racks, as the Twenty-seventh band played sweetly "Come Ye Disconsolate." It was a pretty sight, and those who failed to witness it missed a picture seldom seen. Rev. Canon Dann, chaplain of the Twenty-sixth, conducted the service, assisted by Rev. Mr. Ridley, of Galt, chaplain of the Twenty-ninth, both of whom took up their position near the flag staff, where seats had been placed for the visitors and bands. The lesson read was the 15th chapter of St. Luke, and the parable of the man and the two sons was the subject upon which the volunteers were addressed. "This parable," said the preacher, "is known to everyone. You have heard it a dozen times. A certain father had two sons, and sometimes we forget the second son. Although the one son broke away from his father and went into a foreign country, he was his father's son just the same. We may be bad chilbut were the children of God our Father, who is above us. There are many religions on earth, but the Christian religion is to teach us that God is our Father." He then described the young man who stayed at home and said: "You will find that the Scribes and Pharisees

are very much like that man and like our Christian people. There is "more joy" in heaven among the angels over one sinner that repenteth than over ninety-and-nine just persons who need no repentance. This parable is given to teach the sins of the temper and disposition as well as the flesh."

The preacher then pictured the sins of the flesh which men commit and which everybody sees, and compared them with the sins of other sanctimonous and punctilious persons who were in reality not half so good as the man who sinned openly. The secret sinner was the man who stayed at home in the parable. The man who went away left his father and went into a foreign country. There was discon-

tent at home and a morbid ambition to see the world. The way was sweet and pleasant, and he went. The other son lacked energy and ambition, which was his excuse for not going too. The stranger in a foreign country began to perish from want, he resolved to go to his father and he went. This was to teach the man who sins that he journeys from God his Father into a foreign country, the land of Satan. He makes the first half of the road smooth and fragrant, but, said the preacher, when he gets you away, the further you journey the rougher he will make it. Oh, the devil will pounce upon, jump upon and grind the life out of you! It is to teach you that once away from God you have a jour-ney to get back. "I don't believe that a man one minute can be a devil and the next a sanctified saint. No, no, you have journeyed away, and you must journey back. Don't think cause you are soldiers that you can't be Christians. It is your duty to be a Christian. Everything you learn is what every Christian had first to learn

At the close the National Anthem was sung, and the men marched away while the band played "God be with you till we meet again."

DODD'S KIDNEY PILLS AGAIN.

Conductor Hogg Tells the Story of His Rescue From Diabetes.

Toronto, June 13-(Special).-Mr. H. Hogg, the well-known and popular street railway conductor (No. 107), who has been cured of a very severe case of Diabetes, by Dodd's Kidney Pills, has written as follows to the Dodd's Medicine Co., Limited: "My sufferings extended over a

period of three years, and grew worse every day. I could get nothing to cure the Diabetes nor to purify my blood. Finally, the dizziness so overpowered me, and I grew so emaciated and weak, that I had to quit work. "A friend advised me to try Dodd's Kidney Pills. I laughed at him, for I had tried so many remedies, only to be disappointed, that I had lost hope. However, I did try Dodd's Kidney

Pills, thank God. Six boxes cured me

entirely.'

WHY IT IS "MORRO" CASTLE A Type of Fortification, Not a Proper Name.

Many people who noted with surprise that Rear Admiral Sampson had en- from the chapter on Pilate's wife, countered a second "Morro" Castle at | whose truth is patent to all who con-San Juan de Porto Rico have wondered sider, and whose beauty is over-at the repetition of the name on an matched by its pathos: island so near to Cuba and the famous Morro of Havana. But the apparent | most is not the lone!y heart which has strangeness of this circumstance disappears when it is understood that Morro is not a proper name at all, but merely a word to denote a certain type of fortification. The Spanish definition of the word expresses its meaning quaintly, but fully, as follows: "Cualquier cosa redonda, cuya figura sea semejante a la de la cabeza." (Anything which is round, the form of which resembles that of the head.) From his starting point "morro" came to mean any hill or small round promontory.

In a compilation of "the laws of the

Indies,"the following direction is given: ** * * The alcaldes (military governors) shall place sentinels, who shall stand guard in the ordinary manner, upon the highest part of each fortified place-upon the morro, if there be one, or upon the tower of the fortress-and in all other places whence both the sea and land may best be observed. In the development of the word's

meaning it came also to Midicate any scarped hill or cliff which should serve as a guide to navigators on the coast. 'A morro which came into public notice a few years ago is that of Arica, Chili. It is a promontory situated at the southery extremity of the harbor of Arica. The towering mass of rock rises almost perpendicularly to a Meight of about 800 feet above the sea. Its summit forms a beautiful plateau upon which stands a strong battery of heavy caliber guns. Upon this morro on June 7, 1880, the Peruvian army, or garrison, under Col. Bolognesi, made a desperate attempt to resist the Chilian forces un-der Col. Don Pedro Lagos. But the latter troops were victorious, and succeeded in taking by main force not only the fortifications of the morro, but also the city of Arica. The attack was so well conducted that it required only 45 minutes to gain possession of the

The term morro is also applied to a part of the district of Arica near the promontory. Among other localities which bear the name morro are a canal and village on the coast of Ecuador, a municipality in Venezuela, the Morro Ingles, a point on the Bay of Guaymas. Mexico, and the Morro Velho, one of the richest gold mines in Brazil. — New York Tribune.

THE WOMAN TO BE PITIED. There are many beautiful passages in Dr. John Watson's little book, which has just been published, "Companions of the Sorrowful Way." Here is one

> "The woman whose lot one pities missed the prize of life, nor the trustful one who has been betrayed, nor the victim whose sufferings are known to all, nor the drudge whose life is beaten down by toil. They have their burden, but it is in each case lighter than hers whose soul is proud, and whose husband maintains her in material comfort and serves with fair words, who may even, after a fashion, respect and love her, but who is atterly selfish and unprincipled. Other women of lower rank and coarser nature may ventilate their grievances and find relief. Unto this woman it is not allowed to complain or expose her sorrow; her traditions and wide compel her to silence and concealment. Perhaps the bravest sufferer in the world is a pure and delicate woman who is gay and smiles with a shamed and tortured heart."
