

B. C. FRUIT GROWERS IN ANNUAL SESSION

Delegates From All Parts of Province Hear Reports and Discuss Affairs

(From Saturday's Daily)

There was a fair attendance of delegates at the annual meeting of the British Columbia Fruit Growers' Association which met yesterday afternoon and last evening in the Board of Trade rooms, when the reading of the annual report, the election of officers, reports on fruit growing, and the discussion of other matters, was accomplished.

The following delegates were present: Deputy Minister of Agriculture, W. J. Smith; James Johnston, Nelson; J. F. Smith, Kamloops; H. Kipp, Chilliwack; Thomas Cunningham, Vancouver; Thomas Wilson, Vancouver; W. J. Brandt, Lander; Capt. Elliott, Victoria; Thomas Brown, in the Board of Trade rooms; J. Cleaves, Hagan, P.O.; Mrs. White Birch, North Saanich; J. Metcalf, B. Lantz, W. Shaw, Gabriola Island; W. Forest, Cowichan; George Heatherbell, Colwood; W. H. Palmer, J. Drummond, and several others.

Mayor Hall in receiving the delegates and welcoming them to the city expressed his regret that Hon. Mr. Taylor could not be present. The British Columbia Fruit Growers' Association has done a great work in advancing the interests of the fruit grower here in the province. It has created the British Columbia fruit when placed in competition with the other provinces and the fact that England was something to be proud of and bore eloquent testimony to the merit of the fruit here.

Growth of Industry.

Some years ago British Columbia imported its fruit. Today the product of this province is being sold in every market of the world. The industry of fruit raising is still in its infancy in this province. The vast lands of the province are vast in extent and the future progress of the industry will be great. Many of the delegates can now realize.

Mayor Hall referred to his early life on the farm and his opinion that the government should materially assist the fruit growing industry, which is the greatest asset and becomes one of the province's greatest assets, will advertise this province as the garden of the Dominion. The Mayor hoped that the deliberations of the delegates would be productive of great good to the association and the industry in British Columbia.

John F. Smith, Kamloops, in thanking Mayor Hall for his remarks, pointed out that it was but a few years since fruit growing was a secondary consideration in this province. Lately through the work of the association, the growers of the Interior portions of the province had realized the possibilities and had undertaken their work with most profitable results. He felt the attendance at this meeting should have been larger and he believed that the people of the province are aware of the future before the fruit growing industry.

Financial Status.

The financial statement submitted by the secretary-treasurer, W. J. Brandt, showed that for the year of \$4,029.90 and expenditures of \$3,852.06, leaving a balance in the treasury of \$177.84. The association are: cash on hand, \$210.84; stock on hand, spraying material, \$1,100.00; furniture, \$118. Total \$778.13. Liabilities to accounts owing, \$40.00; to the Dominion government, \$10.00. Total \$50.00. Excess of assets over liabilities, \$728.13.

The report prepared by the executive committee outlined the steps taken during the year to supply spraying material to the growers and to members, these articles to a value of \$2,000 were purchased and supplied. The report also outlined the work made a tour of the province and delivered lectures at many points giving practical demonstrations of spraying, planting, pruning and orchard cleaning, besides setting forth the advantages of cooperation in spraying as mutual fire insurance, packing and other topics of interest to the fruit growers. The report stated that the financial statement was well covered. The report states that the lectures be continued at some central point, to be composed of delegates from the local associations and members in organized sections, to discuss the important questions affecting the industry, particularly those relating to distribution and marketing. The report also recommended that the secretary be instructed to make arrangements to procure pure spraying material and fruit paper inasmuch as many of the members are in unorganized districts and local associations are not in a position to do this work for them.

Work of Past Year.

The report of the secretary was as follows: "I have the honor to submit for your consideration my report for the year 1929. During the year I have had the pleasure of addressing 42 meetings in different sections, from Alberni in the west, to Golden in the east. I have traveled 10,856 miles in the interests of the fruit growers and have written 1,422 letters. The fruit crop in every line ruled low especially for small fruits. This can be partially accounted for by the fact of the immense crop in Washington and Oregon and the slaughtering of prices in our own markets by the dealers in those states and by the fact that the money stringency is still being felt in the Prairie section. The fruit crop in every line ruled low especially for small fruits. This can be partially accounted for by the fact of the immense crop in Washington and Oregon and the slaughtering of prices in our own markets by the dealers in those states and by the fact that the money stringency is still being felt in the Prairie section.

On the matter being put to a vote it was decided that the secretary's salary should be taken up later in the meeting when the other matters will be considered. President-elect Puckle thanked the members for electing him president, and he asked them to give him their hearty cooperation. Votes of thanks to the retiring officers and to Deputy Minister of Agriculture, W. J. Smith, were given. The latter urged the members to get away from local questions and make the interests of the province as a whole their consideration. The meeting then adjourned to reassemble in the evening, after passing the following resolution: "Resolved, that the fruit growers of British Columbia take this opportunity of expressing their respect and interest in the fruit growing industry of the Dominion, and through the Dominion entomologist, the

SCALE OF SALARIES FOR LOCAL TEACHERS

New School Board Last Night—Some Estimates

The adoption of the report of a special committee appointed to fix a scale of salaries for local teachers was the principal business of the meeting of the Board of School Trustees, held last night at the Hotel Vancouver. The committee's report was presented by Mr. J. C. McNeill, chairman of the committee, and was adopted by a vote of 12 to 1.

The committee's report was presented by Mr. J. C. McNeill, chairman of the committee, and was adopted by a vote of 12 to 1. The report recommended that the salaries of teachers be fixed on a scale of \$1,200 for the first year, increasing by \$100 each year up to \$2,000 for the sixth year. The committee also recommended that the salaries of principals be fixed on a scale of \$2,500 for the first year, increasing by \$200 each year up to \$3,500 for the sixth year.

System Retro-Active.

"Do I understand you to say that the new order of things in regard to salary is going to be retro-active?" "Yes," answered Trustee McNeill. "That is what is intended. It cost the school board \$100,000 to retro-act the salary scale to the beginning of the year."

The board of school trustees may determine from time to time the salaries of principals, school trustees and other school officials. The board also recommended that the salaries of principals be fixed on a scale of \$2,500 for the first year, increasing by \$200 each year up to \$3,500 for the sixth year.

Men Assistants.

Men assistants, other than first and second assistants, and other than those on probation, in graded schools, may receive an initial salary of \$340 a year, with an increase of \$30 a year up to a maximum of \$1,080. The board also recommended that the salaries of men assistants be fixed on a scale of \$340 for the first year, increasing by \$30 each year up to \$1,080 for the sixth year.

Women Assistants.

Women assistants other than first and second assistants, and other than those on probation, in graded schools, may receive an initial salary of \$300 a year, with an increase of \$30 a year up to a maximum of \$1,080. The board also recommended that the salaries of women assistants be fixed on a scale of \$300 for the first year, increasing by \$30 each year up to \$1,080 for the sixth year.

Principals of small schools.

Principals of small schools having no senior grades shall receive salaries in the amount of \$1,200 for the first year, increasing by \$100 each year up to \$2,000 for the sixth year. Principals of small schools having senior or intermediate grades shall receive salaries on the scale recommended for principals of graded schools.

Receiving teachers.

Receiving teachers shall be paid \$600 a year in addition to the salary which they would receive if employed in the district to which they are being transferred. The board also recommended that the salaries of receiving teachers be fixed on a scale of \$600 for the first year, increasing by \$100 each year up to \$1,000 for the sixth year.

Trustee Staneland's Complaint.

Trustee Staneland wanted to know whether it would not be possible to make provision for the repair and thorough equipment of the gymnasium in the estimates. He declared that it was a work that was badly needed and should be undertaken without delay. It would cost approximately \$9,000; \$15,000 will be required for alterations and improvements to school buildings. Trustee McNeill objected to the proposed appropriation of \$4,000 for the gymnasium, but the board agreed to set aside a special meeting to be held next Tuesday evening when the scale would be adopted, it being decided that a special meeting should be held next Tuesday evening when the scale would be adopted, it being decided that a special meeting should be held next Tuesday evening when the scale would be adopted.

Estimates Considered.

On going into committee to deal with the estimates for the year the first matter taken up was the amount needed for alterations and improvements to school buildings. Trustee McNeill objected to the proposed appropriation of \$4,000 for the gymnasium, but the board agreed to set aside a special meeting to be held next Tuesday evening when the scale would be adopted, it being decided that a special meeting should be held next Tuesday evening when the scale would be adopted.

GIVE THE CHILDREN PLENTY OF FRUIT

It Helps to Keep Them Well

In a growing, active child the cells of which the body is composed are being worn out—and replaced—very rapidly. This dead tissue must be gotten rid of somehow, and the danger is that the eliminating organs—the bowels, kidneys and skin—may not do their work well enough. Then the blood becomes poisoned and the child does not thrive.

Nothing has such an invigorating effect on these organs as ripe fruit juices. Apple juice increases the activity of the kidneys; other fruit juices stimulate the liver to secrete more bile, and this produces easy and regular movements of the bowels; others stir up the glands of the skin to throw off more waste matter.

The difficulty is that to get these effects a great deal of fruit must be eaten, and the excess of sugar and woody matter may upset the digestion. The better way is to give the children "Fruit-a-lives," which are tablets made of concentrated fruit juices with valuable tones added.

"Fruit-a-lives" have the combined effect of the different fruit juices, helping all the eliminating organs to work properly, curing constipation, toning up the system, keeping the children plump and rosy. 25c for a trial box, 50c for regular size—boxes for \$2.50. Fruit-a-lives Limited, Ottawa.

President Baylis declared yesterday that never in the history of the association had a meeting been so efficient. Mr. Denny had gone every class most carefully and had made some suggestions which were very low, that were thought to be up to the model, the fact that he had identified the reasons for the result of the present meeting would be beneficial. The breeders now have some suggestions according to Mr. Denny, it was asserted by the president that the association to outline the 1930 standards to fanciers throughout the St. and Canada.

Poor Attendance.

The poor patronage of the show received at the hands of the people was commented on by the president. He said that, if the importance of the show was properly appreciated, there would be a much larger attendance. In Seattle the gate received had amounted to about \$1,600, which was a record for the city. There was no one from the north and it was a pity that the people of the north were not better to that on the other side of the water. The president said that the show was a success in many ways, including provincial and civic groups would reach approximately \$1,000 when it was over. The president said that the show was a success in many ways, including provincial and civic groups would reach approximately \$1,000 when it was over.

Bill Miner's Escape.

Former Deputy Warden Bourke Penitentiary Threatens to Make Revelations. New Westminster, Jan. 28.—Because a recent dispatch from here indicated that discipline in B. C. penitentiary was on the verge of being virtually warden, has we in the press to give the truth about the escape of Bill Miner and his convict companions, who eluded the B. C. penitentiary in August 1927. Mr. Bourke stated the disclosures he may make would be sensational and far-reaching. In a subsequent interview at home in New Westminster, Mr. Bourke stated that he had not decided to say anything or to escape of Shorty Dunn was met blind and part of the plot.

Intending Emigrants Warned.

London, Jan. 28.—The secret of the British Welcome League, the organization which has been warning intending emigrants unless they have work in sight to remain in preference to the swelling of the unemployed and starry Canada.

Engineers' Suggestion.

Toronto, Jan. 28.—At the meeting yesterday of the Canadian Civil Engineers' Association, a resolution was made that the Dominion Government should be urged to establish a department of engineering inspection. Pending establishment of such a department, the association has made for the use of unlicensed engineers and equipment for the purpose of inspecting buildings.

(From Saturday's Daily)
The poultry show, which has been in progress since Tuesday at the Market building, closed last night. There was not a large attendance, most of the comparatively small assemblage grouped about W. C. Denny, the New York judge, as he went from pen to pen completing the work of distributing prizes, explaining the standard questions and delivering a short lecture. That Victoria's exhibition was better, generally speaking, than those that have taken place throughout the northwest this year is the opinion of Judge Denny. While he hands out this flattering bouquet, he makes some important qualifications. In many of the varieties he affirms that the fanciers do not know the standard which they should strive to attain. This is especially so in respect to the "reds." For that reason the scoring has been low in many instances. Judging Efficient. President Baylis declared yesterday that never in the history of the local association had the judge been more efficient. Mr. Denny had gone over every class most carefully and, although he placed many birds low that were thought to be well up to the model, the fanciers would not be dissatisfied because, in doing so, he had detailed his reasons. As a result the president expressed the belief that the outcome would be beneficial. Mr. Denny was assessed by President Baylis, was one of the nine of the highest qualified judges on the continent, and was selected by the few selected by the American Association to outline the 1910 standards to fanciers throughout the States and Canada.

Popr Attendances.
The poor patronage the show had received at the hands of the public was commented on by the president. He said that if the importance of the show was properly appreciated, it would attract a larger and more intelligent audience. In Seattle the gate receipts had amounted to about \$15,000, while here it was doubtful whether the show would total \$200. There was no reason for this and it was a view of the fact that the local exhibition always was held in a somewhat better to that on the other side of the line. The association's income, including provincial and civic grants, would reach approximately \$500 and when it was remembered that out of this amount had to be paid the salaries of the judge, of attendants as well as prizes, it could easily be appreciated that the cramping economy was essential.

Room for Development.
The industry on which the poultry show was based, apart to which the latter was an authoritative index, President Baylis contended was one of the most important in British Columbia. He claimed that there was room for tremendous development. Some years ago two or every three cases of eggs sold in the west were imported. Since then that had been reversed. Now two cases came from local ranches to every one that was from outside. Still \$600,000 worth of eggs were imported. And the president contended that the time of local production has been raised. Room for another \$400,000 worth per annum in the north. Thus it was possible for British Columbia to find a market for 1,000,000 eggs greater than at present. To encourage the movement was one of the aims of the local poultry association. Therefore, from a commercial standpoint alone, it was in the interests of the citizens to support the show.

BILL MINER'S ESCAPE

Former Deputy Warden Bourke of the Penitentiary Threatens to Make Revelations
New Westminster, Jan. 28.—Fluorid because a recent diet from Ottawa intimates that discipline in the B. C. penitentiary was not perfect during his tenure of office, D. Bourke, ex-deputy warden, and for months virtually warden, has written to the press intimating that unless justice is done him he will open up a new field for moral reformers by telling the world the truth about the escape of Bill Miner and his three convict companions, who elvanted from the B. C. penal institution in August 1907. Mr. Bourke states that the disclosures he may make public would be sensational and far-reaching. In a subsequent interview at his home in New Westminster, former Deputy Warden Bourke said he believed that Bill Miner did not escape from jail, but was handed out. He declined to say whether or not the escape of Shorty Dunn was merely a blind and part of the plot.

Intending Emigrants Warned.

London, Jan. 28.—The secretary of the British Welcome League, through the Manchester Guardian, warns intending emigrants unless they actually have work in sight to remain home in preference to the swelling ranks of the unemployed and starving in Canada.

Engineers' Suggestion.

Toronto, Jan. 29.—At the annual meeting yesterday of the Canadian Society of Civil Engineers, a recommendation was made that the Dominion Government should be requested to establish a department of research, similar to that established by the United States government, to investigate the properties of all materials of engineering interest. For the establishment of such a laboratory, they suggest that an arrangement be made for the use of university staffs and equipment for the purpose.

The good man is he who is incapable of a mean thought or action—Macdonald.

CONSECrated THIS MONTH

Rt. Rev. Bishop McDonald Celebrates His First Pontifical High Mass
Bishop Alexander Macdonald, who has been placed in charge of the diocese of Vancouver Island, will from Rome, to Rev. Father Trebant, the administrator of this diocese, under date of the 8th of this month that he arrived in Rome upon the 26th of October in consecrated Bishop of Victoria in the chapel of the Propaganda college upon January 3rd. He celebrated his first pontifical high mass in the same chapel upon the 8th of January, the day when the festival of the Epiphany is celebrated. Upon the day following, the 9th, he had audience with the Holy Father and intended, a few days subsequent to the date of his letter, to leave Italy for Palestine, returning to Rome about the middle of February and coming out to America on his way to this city towards the latter part of March.

William Pitt was second son frequently referred to as the elder Pitt. The subject of this biography can be believed, the most ever was in the British Parliament perhaps the best reasoner or most eloquent of any statesman of the 18th century. His precocity was astonishing. He used to make speeches to him a looking-glass. He was very de that he was unable to attend school at a University course. He was elected to the House of Commons in 1759. In the following year, he made his first speech in the House of Commons. In the following year, he made his first speech in the House of Commons. In the following year, he made his first speech in the House of Commons...

FAITH THE FOUNDATION

To say that faith is the foundation of religion is to say nothing new. It is not often taken into account that the Apostle Paul, in his Epistle to the Romans, speaks of the Christian faith, in the apostle's Creed, a belief of the Scriptures, and a reliance of Calvary as a sufficient atonement for sin. It is not the faith which we read of in the Bible, but the faith which we read of in the Bible, but the faith which we read of in the Bible...

The substance of this is, the image of his Creator, is capable of certain extent powers, which human faculties are not capable of. We would probably be more correct things in common with the best of them we possess in a greater or in a less degree. But this qua
