

CIHM/ICMH Collection de microfiches.

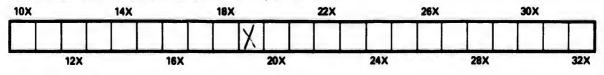

Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below. L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

	Coloured covers/ Couverture de couleur		Coloured pages/ Pages de couleur

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \longrightarrow (meaning "CON-TINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

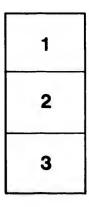

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

fo

ap-

意意意意意意意ITHOUT any Reference to the prime now only obferve the General Truth repre-😤 feated in them, and then apply it to the Special Occasion of the joyous Solemnity of the prefent Day.

For, the General Truth exhibited in the Text is this--- that fome extraordinary Events, without being properly term'd miraculous, have fuch lively Characters of their being the Doings of GOD, as they are evidently fo to unprejudic'd and careful Obfervers, and appear marvellous in their pious Eyes.

By

Λ THANKSGIVING-SERMON

8

By fome extraordinary Events, I mean fome remarkable Ones in the natural and moral World, even in the prefent Ages as well as the former, which greatly affect humane Societies or particularPerfons, effecially the People of GOD; and thefe Events connected with the various Means and Caufes leading to them.

By Events not properly term'd miraculous; I mean, when GOD does not appear to work on his Creatures in a Manner contrary to the ufual Ways of his Working, fingly in themfelves confider'd.

And by their having fuch lively Characters of their being the Doings of GOD, as they are evidently fo to unprejudic'd and careful Obfervers; I mean, these Characters are diffinguishingly bright and legible to fuch qualified Perfons: Or if they are inadvertent, or under a Prejudice; they are not like to fee them to be the Doings of GOD, much less admire them in a pious Manner, or yield him the Glory of them. See Pfal. xcii. 4,----6.

But to clear this Truth, we must confider these three General Heads, as the Time allows---

- 1. In what Manner may the fovereign God be faid to operate ufually among his Creatures.
- 2. When have *bis providential Operations* fuch lively Characters of their being *bis Doings*.
- 3. The pious Admirations they flould raife up in us, and which they happily raife if we are duly difpofed.

I. In what *Manner* may the fovereign GOD be faid to operate ufually among his Creatures.

And here we must needs observe; that as there are three Sorts of Creatures or created Substances, viz. Corporeal, Spiritual, and Compos'd of Both; fo there is a different Sort of Operation of GOD upon and among them,

9

1. In his Operation on meerly corporeal or material Subfances ---He not only by his continual Influence, preferves them in their Being, Nature or effential Properties of Solidity, Extension, Sec. which he has been pleas'd to give them; but to this Influence he also feems to add his further usual Operation in these three different Manners, viz.

(1) In continually cauling all material Subfrances to *incline* towards each other, in regular Proportions to their Quantities and Diftances: Which is commonly called the Law or Power of *Attraction* or Gravity.

(2) When they come to a certain Nearnefs, he by a contrary Operation moves them, in regular Proportions alfo, to fly off: Which is commonly called the Law or Power of Repuljion; without which all material Subfrances on Earth wou'd foon unite in one folid Body.

(3) When they are forced within a certain Nearnefs, he by a different Operation makes them *move* and *join* together in certain Degrees of Power: Which is commonly called the Law or Power of *Cohafion*; without which there would be no fuch Thing as Union or Coharence in material Subfrances.

And thefe are called the *three* prime and general Laws of Nature in the material World; whereby he chiefly appears to govern it. But yet it is most evident, that he confines not himfelf to *thefe*: For he plainly operates in diverse other Manners on the *Planets*, *Comets*, *Rays of Light*; as also in the Cafes of *Elestricity*, *Magnetifm*, *Cold*, *Heat*, Sc. Which are fo many various Ways of his Operation, needful for the Schemes of Providence and the Blefling and Chaffizing of the World.

And in the different Prepartiens of all the various Powers and Actions abovementioned, there is no doubt amazing M ijdom; which I leave the Learned, of Leifure, to confider.

To which we must likewife add, that for the perfect Government of all Things here below, in a due Accommodation between the *material* and the *moral* World, for the *latter* of which the *former* is made, preferv'd and govern'd ;---It is B doubtlefs

narkable prefent ane So-D; and Caufes

, when Manner mfelves

*ing the d care*hingly hey are to fee m in a *P fal*.

A THANKSGIVING SERMON

10

doubtlefs needful, that the abfolutely fovereign, wife and omniprefent LORD, Proprietor, and Ruler of all, fhould referve to himfelf the juft Liberty, either *mediately* by brutal Animals, Men or Angels; or where their Powers are infufficient to anfwer his wifeDefigns, by his *immediate* Influence (which the' unfeen by Men may be feen by Angels) to move and order all material Subfrances this way or the other, as He fees beft.

And it feems abfurd to suppose, that the infinite Gon, who is abfolute and all-original Life and Power, fhould conflantly afford to Angels and Men, yea to the most minute Animalcula, the Power of moving material Subflances even contrary to the abovementioned Laws of Nature every Moment; yea that he fould be continually making Millions of Animals with fuch a Power as this; and yet confine himfelf from doing as much as they, by his *immediate* Power. Thus for Inftance, he now affords me by a fingle Breath the Power of moving Millions of Atoms upwards against the Laws of Gravity: And can we imagine that this great and univerfal AGENT has confin'd himfelf from doing as much upon all Occasions, by his immediate tho' fecret Influence? Or even infinitely more than this : As in raifing, turning, allaying Winds and Seas, and numberlefs other Operations, where other Powers inferiour to his are infufficient to compass his Defigns.

So, in Scripture, the vaft Varieties of Winds and Seas, of Clouds and Vapours, Snow, Fire and Rain, Cold and Heat, and other material Subffances, are reprefented as continually directed by him, to fulfill his Plcafure. See Job xxxvi, xxxvii, xxxviii. *Pfalm* lxv, cxlvii, cxlviii, &c.

Nor may this be accounted properly miraculous---For 'twould be ftrange indeed that the huge Leviathan fhould by a Power derived from Him, throw up a Cloud of Water into the Air; or even the moft minute Animalculum, by the Pad of a Fin, in a Moment raife up Millions of watery Particles againft the Laws of Gravity, without a Miracle : And yet for the great GOD to raife up a fingle Atom by his immediate Power, fhould be effecemed a Miracle. And as long as thefe are the ufual, tho' the immediate Operations of GOD; they

they are no more miraculous, than his *immediate* Impression of Gravity on material Substances, or on any primary Substance whereby the Impression may be made on others.

2. In his Operation on Subfances *purely fpiritual*---He not only by his continual Influence preferves them in their diffinguifhing Existence, Nature or effential Properties of *Life*, and Powers of *Perceiving*, *Thinking*, *voluntary Motion*, &c. He has been pleas'd to give them; but to thisInfluenceHe alfo feems to add his further *ufual* Operations in these three Ways.

(1) By producing and continuing fecret, inward Bents or Difpositions in them; as the holy Bents of holy Angels, and holy Souls departed, \mathcal{E}^{c} .

(2) By raifing and continuing *Idwas* in their Imaginations, Memories and Understandings; as also impressing them with variousPerceptions of *Delight* or *Trouble*: Whereby he chiefly feems to rule the *moral* World. So he continually gives the Millions of holy Angels his Directions: And they are conftantly attending to him, and in every Part of the Universe accomplishing his Orders. And so he makes the holy Angels happy with Perceptions of pure Delight; and the finful Angels wretched with Perceptions of Anxiety.

(3) By awakening, fharpening, ftrengthening, guiding their intellectual Powers, to conceive and penetrate; compare, diffinguifh and judge of Things, and contrive and form their Schemes; and by exciting their Purfuits: Where by he fecretly and wonderfully governs in the midft of numberlefs Contingencies among the Creatures.

And then,

3. With Respect to Creatures Composed of Subfances both Corporeal and Spiritual, as brutal Animals and Meu; his Operations on them may be of all the various Kinds together, according to their feveral Natures and Capacities, we have in brief deferibed; befides uniting them, keeping them united, and fome peculiar Impressions of Pleasure, Pain, &c. fuitable to their mysterious Union.

A THANKSGIVING SERMON

And it feems highly reafonable to think, that where the Powers of *inferiour* Creatures fuffice not to accomplish his Defigns, He employs the *bigher*, or *both* together : And where they are all infufficient, He puts forth *bis* Power above them; makes them inftrumental as far as may be, and then acts by *bis own fuperiour* Influence.

As to brutal Animals--- they no doubt receive their various Inflinets from him: And he may by Angels often give them Ideas and rule them.

And as to Men---He no doubt infpires their various Genufes: As alfo frequently, if not continually, ufes Angels, the Evil by Permiffion, the Holy by Command, to fuggest Idwas to them; and then ufes them to fuggest Idwas to one another: Which are inftrumental Caufes under his permiffive, controlling and directive Influence, of numberlefs Passions, Appetites, Confultations, Projects, Resolutions, Actions and Events. He awakens, tharpens, ftrengthens, guides the intellectual Powers of Men: And where the Powers of Angels are infufficient to give compleatIdwas to perform hisSchemes; He may fecretly by his immediateOperation, utterly unknown to Men, fuggest innumerable Idwas in them; and therewith infufe his exciting Influence of Zeal, Activity, Courage and Refolution to fulfill his Councils.

Nor may the unknown Suggestions of good Augels be accounted proper Inspirations; any more than the Suggestions of Satan when he raifes up in our Minds Ideas of Scriptures, as he did in the humane Mind of CHRIST: Or when one Man by Signs fuggests Ideas to others, and excites their Courage. Nor are the Ideas and Excitations received from GOD, either mediately by Men or Angels, or immediately by Himfelf, proper Inspirations: Any more than his infusing Millions of Spirits every Moment into new Seeds or Embrios of Animals, making them alive and active; or infusing into them various Instincts or Geniuses; or impressing them with Pleasures, Pains, \mathfrak{Ec} .

For, by Infpiration I mean the certain Revolution he has been pleas'd to give of Himfelf & of his Will, & of Things paft and to come, by CHRIST and his Prophets and Apollics of old, put

put into the BIBLE and confirm'd by Miracles, as a definitive Rule of Faith, Worfhip, moral and religious Conduct. Every Kind of Idea and Excitation or Propension in us, whether arifing meerly from our ownMinds, or from evil or goodMen andMinifters, or from evil or goodAngels, or even immediately from GOD himfelf, are therefore all to be brought to this only infpired Rule, and tried thereby; for which End it was infpired and confirmed. And the true Origin of our Idæas and Excitations is kept concealed from us, (without any internal Criterion to judge from whence they come, as the Prophets had of Old) that by this known divine Rule we might forever try them. In which Trial, we are carefully to use our intellectual Powers : And being aware that in the midft of all we need the Help of GOD, both in understanding the Rule and in the Application of it; to Him we must humbly and ever repair in CHRIST and feek for Guidance.

For Illustration---I might eafily bring a Multitude of Scriptures; but the Time would fail me. I fhall only cite to Dcut. xxxii. 1 Sam. ii. 2 Sam. xxii. 1 Cbron. xxix. Job v. xii. xxxii---xxxv. Pfal. xxxiv. xlvii. ciii. civ. cvii. and cxiii. 1fai. xxviii and xliv. Dan. ii and iv. Joel i. and ii. Mat. x. 29, 30. Als xvii. 24,---28.

In fhort, all Nature, both inanimate and animate, both humane and angelical, is full of GOD; full of his perpetual moving, guiding and over-rulingInfluence; and as the Apoffle perfectly expresses it, Eph. i. 11. *Who worketh all Things ac*cording to the Council of his own *Will*.

But then I may not omit to obferve, that agreeable to Scripture-Revelation, THE ETERNAL WORD OF SON of GOD, who with the eternal FATHER and SPIRIT created all Things; in a perfect Union with those divine Perfons, He also upholds and rules the World from the Time be made it: But from the Fall, He rules it also in the special Form of a MEDIATOR: And upon the Exaltation of his humane Nature to Heaven, it is advanced to a wondrous Participation with his DIVINE PERSON, in his supreme Dignity, tranfeendent Glory, and universal Empire. See John i. Epb. i. Col. i. Heb. 1, & c.

And thus have we shewn in what *Manner* may the fove reign GOD be faid to operate usually among his Creatures.

We now come more briefly to confider,

II. When have his providential Operations fuch lively Characters of their being his Doings, as they are evidently fo to unprejudic'd and careful Obfervers.

Even the common Operations in the meerly insterial World, the more we fearch them, the more they appear to be the Doings of God. But there is fuch a natural Atheifm, Blindnefs, and Prejudice in us, as we are averfe to fee it, and prone to aferibe them to Nature only, or any thing elfe than his ever acting Influence. A terrible Storm of Thunder and Lightning, or a more fearful Earthquake, or fome extraordinary Danger or other, feems needful to bring us to fee his Operations in Nature.

And fo it is likewife in his mixt Operations of Providence. When there is only a Circle of common Occurrences, we are apt to imagine there is only a Courfe of Nature, blended with the common Powers, Arts, Contrivances and Actions of Men; and the Doings of GOD appear not in them. We have therefore need of fome extraordinary Work of GOD in Providence, to awaken our Minds and more evidently fhow his Doings. And this he gracioufly condefcends to give us in the following Cafes.

I. When in Affairs of vaft Importance, there is a wonderful continued Train and timely Coincidence of immemerable Varieties of Means, both in the material and moral World together, without our Power and beyond our Profpect, all confpiring to fome great Event, exceeding kappy in its prefent Influence and future Tendency.

For tho' in fuch extraordinary Works of GOD as thefe, the *feveral Parts* confider'd *fingly*, are his *nfual* Operations and don't affect with Wonder, or ftrike our Minds with fo clear and ftrong an Evidence of their being his Doings: Yet to fee them all fo perfectly adjusted, as to make up One, great, vi/e, curious and confiftent Scheme, to accomplish an Event of val!

vaft Importance ;--- This yields fufficient Evidence of wife Defign and fuperiour Management in HIM, who has all the Powers of Nature, Men and Angels in his Hands, and overreles them all to fulfill his Purpofes.

2. This yet appears with a ftronger Evidence, and even ftill more wonderous; when among a great Number of furprizing and important *Incidents*, there are many fo momentous and critical, that if any one had not fallen precifely in its fpecial Place and Juncture, there wou'd have been exceeding great Imbarrafsments and Hindrances; and many others fo *effential*, that if all and every one had not come in exactly as they did; the great Event had fail'd, and the main Scheme with all its vaft and curious Apparatus totally mifcarried.

3. When in exceeding difficult, perplex'd and dangerous Cafes which look almost desperate, and much more which seem in a Manner loss, there opens at once a great Deliverance, beyond our Power and Thought: And much more still, when the Deliverance opens with Success, and the very Means of our Diffress and Danger are made subservient to our Prosperity and Safety.

4, and laftly, When in this Conjuncture, the fovereign GOD is more than utually acknowledged; looked to and trufted in; an extraordinary Spirit of Prayer is raifed up in many; and all these furprizing Incidents and Means, with all our wonderful Salvations, Success and Happiness, come on in punctual Answers to many forvent and fiducial Address to Him.

I might mention Other Cafes and illustrate $2\hbar e_j \hat{e}$; but the Hour would fail me. And to make the larger Room for the Application, we must be also flort on our

III General Head; which is to reprefent the plan demaration which thefe extraordinary Appearances and Works of GoD flowld raife up in us, and which they happily raife if we are duly differed.

Admiration is one of the fublimeft Actions of a created Spirit. It is the rifing up of the Mind in a refpectful View of Something it fees and owns to be fuperiour to it. And when it rifes to the reverent View of GoD, it rifes to the higheft and most worthy Object, and pays him fome of the Honour in the higheft Measure eternally due to his transcendent Excellencies and Operations.

And as this allwife CREATOR has made us capable of this noble *Action*, and in our very *Make* infufed a *Difposition* to it on extraordinary Appearances; he therefore frequently does extraordinary Things in Providence, to awake our Attention and excite our Wonder; to give us more open Difplays of his fupream Wifdom, Power and Government, and raife our due and reverent Admirations of him.

In the *heavenly World*; from the inexhauftible Source of his infinite Perfections, no doubt there now are and will be eternally furprizing Difplays of his Glories, to the perpetual and entertaining Wonder of the happy Inhabitants. But as in thefe lower Regions we frequently need them, he frequently gives them: And if we were as obfervant as Eliphaz, we fhould find abundant Caufe to cry out in Admiration of GOD as He, Job v. 9. *Who does great Things and unfearchable*, marvellous Things without Number.

But when the fovercign GOD is pleas'd, in diffinguishing Favour to us, to go out of his common Courfe, and show a vaft Contrivance, and over-rule a Multitude of all Kinds of Caufes, making them confpire to fome great and happy Event, or do fomething extraordinary for our Salvation and vaft Advantage ;--- Then he more highly obliges us, and more loudly calls us to confider his wondrous Works; to fee HIM, i. c. his superiour Hand and Excellencies in them, and pay our due and diffinguishing Admirations to him.

Then we fhould carefully lay afide every *Prejudice*: And our obliged Souls fhould open to every Beam of Light and Evidence of the Operation and Care of GOD in all the Parts of the Providence, and forming them all into an admirable Syftem. We fhould enlarge our Views to fee the valt Impartance of his wondrous Work, both to Ourfelves and Others, in

in all its Branches : And attentively mind the various Springs and Incidents in the Run of the Whole, and how they all furprizingly confpire to a proferous Iffue. Nor yet---content with the bire viewing of thefe; but our grateful Minds fhould fee the Wifdom, Power, Juffice, Holinefs, Truth and Goodnefs of GOD illuftrious in them; and then confider how He thould thus be working for Us, while we were unworthy of the leaft of his Mercies. Laftly in our admiring Views of the whole Work of GOD, our Souls flould rife into the higheft reverent Admiration of Him; and then brake out in moft thankful Praife, as the pious Pfalmift--- It is the LORD's Deing ! It is marvellous in our Eyes !

And as all this is clearly most due to GOD on fuch Appearances, it is the lively *Bent* and *Prastice* of unfeigned *Piety*.

But we must haften on to APPLY these Things, in Purfuance of our first Design, to the great and extraordinaryOccafion of this happy Solemnity.

For, the fovereign GOD, who ruleth by his Power for ever, and does what he pleafes among the Sons of Men, has by a furprizing Courfe of Providence led us into a moft adventurous Enterprize against the French Settlements at Cape-Breton, and their exceeding flrong City of Louisbourg, for warlike Power the Pride and Terror of thefe northern Seas; and by a wonderous Series and happy Coincidence of various Means, deliver'd them into our Hands. And this, in a most fignalManner, is The LORD's Doing in the prefent Day; and is truly marvellous in every picus, yea, I may fay, in every unprejudic'd and confiderate Eve.

And here, I fhall endeavour thefe two Things, as the Seafon allows

- I. In brief lay open to view the vaft Importance of the Place: that we may more clearly fee the Greatnefs of the Mercy in giving it to us : And then
- 2. Look into the *wonderous Scenes* of *Providence*, and *lec* fome of the various and furprizing *Steps* that led to the happy *Acquifition*.

I. In brief lay open to view the vall Importance of the Place; that we may more clearly fee the Greatness of the Mercy in giving it to us.

The Ifland belong'd originally to the British Empire: Was at first compriz'd in the general Name and grand Patent of New-England in 1620; but in the following Year fet off and included in Nova Scotia by a separate Patent; and since, in Nova Scotia comprehended in the Royal Charter of the Massachusetts Frovince in 1691.

It abounds in the belt of Pit Coal known in America: And to near the Surface of the Earth and Coaft of the Sea, as to be very eafily dug and put in Veffels. Yea, from 1703, Labortan had told us of the French Ships loading with and carrying the fame to Gaudalupe and Martineco, for the refining of Sugars, to their great Advantage. And its commodious Harbours; with its happy Situation in the Centre of our Fifthery, at the Entrance of the Bay and River of Canada, and in the Wake of all the Trade from Europe to the British Colonies on the Main Land of America, and both from them: and our West India Islands to Europe; rendered the Place of fuch vaftImportance---that I remember while in England, when we came to know the Tory Ministry had by the Treaty of Utreeht in 1713, refign'd it to the French; all true-hearted Britons who knew the Circumstance of the Island, most grieyoufly lamented the Refignation, as full of teeming Mifchief to the British Trade, Wealth and Power, and as one of the moft fatal Acts of that unhappy Ministry.

And the *mifchievous Confequence* has fince every Year been a growing Confirmation of their judicious Profpects. For the *French* well knowing the vaft Advantage of their Acquifition, have built a *walled City* on the moft convenient Port both for Trade and Fortification ;---- for thefe *Thirty Years* been adding to its natural and artificial Strength; and by immenfe Sums and the utmoft Art and Diligence, made it one of the ftrongeft *Fortreffes* in *América* if not in *Europe* : Such as was not like to be taken without a very powerful, fkillful and refolute Army both by Sea and Land, or being ftarved to a Surrender. In fhort, it was the *Dunkirk* of *North America*, and in fome Refpects of greater Importance,

For,

For, by Means of this Ifland and Fortification, the French have every Year enlarged their Fifhery; and thereby their Trade, Wealth and Shipping: And by Fifhing cheaper than we, they have more and more commanded the Trade of Spain, Portugal and Italy; drawn away their Gold and Silver; and greatly diminish'd our Trade and Fifhery, a principal Source both of the British Wealth and naval Power.

So pernicious a Settlement was this---that for above thefe Twenty Years, it has feem'd to me, 'twere worth the while to engage in a *Mar* with *France*, if 'twere for nothing elfe but to recover this most important *Island* to the *British Empire*. Tho' a War was dreadful, the Neceffity and Hazard feem'd every Year to encrease : The longer 'twas deferr'd, the more powerful and dangerous they grew, and the lefs our Hope of their being ever reduced.

Yea, from the Confideration of fuch a firing Defence, the Advantage of Wood, Sea-Coal, Fifhery, and Free-Gift Land in this and the neighbouring Iflands, the Settlement of T boufands of People on them already, and the innumerable Poor in the Sea-Coaft Towns of France, ever fwarming and coming over to them ;---it feems highly probable, that if the Peace continued much longer, there would be in a few Years Time fuch a Multitude of French Inbabitants, as with the growing Numbers in the bordering Continent of Nova Scotia and Canada, with the addition of the Indian Nations, would exceedingly vex and wafte, yea, endanger the Conqueft of our Englifs Colonies.

At length, without ourSeeking, & in the most critical Time, the LORD was pleas'd to leave them to pracipitate a War upon us. An unexpected Season opens to make the dangerous Trial, if the ALMIGHTY would please to prosper us. And now all the northern Colonies and Ours especially began to feel their destructive Power and Influence : In a few Months Time, infesting our Coasts, taking our Shipping, ruining our Fishery and Trade, destroying Canso, invading Annapelis, reducing us to Straits, and carrying our People Captive into a Place almost impregnable.

A THANKSGIVING SERMON

And as it was a Source of Privateers and Men of War difirefling to Us; it was also a fase Refort, both of their 1 est and East India Fleets, to their great Advantage in returning Homeward.

Of fuch vast Importance was this strong Port of our Enemics; and this possible by one of the most enterprizing, powerful and active of Nations.

But in the Wildom of God, the ftronger it grew, the better in the Iffue for us : The French having built a regular City, and laid out immenfely more to render it both firong and commodious, than we fhould, if the Place had been in our Power. Yea, it feems most likely, that if they had not poffefs'd it, there would neither have been a Battery, nor even a Houfe in the Port to this Day; no more than in many fine Harbours of Nova Scotia; which the' fo near the Fifhery, have been neglected by us for fo many Years, from the Peace of Utrecht. But now in a few Weeks Time, the fovereign GOD has pleafed to give us the Fruits of these Thirty Years prodigious Art, Labour and Expence of our Enemics : And this by Means of fo fmall a Number, lefs than Four thou fand Land-Men, unus'd to War, undifciplin'd, and that had never feen a Siege in their Lives. It is the LORD's Doing ! It is marvellous in our Eyes !

II. Let us therefore look into the wonderous Scenes of Providence, and fee fome of the various and furprizing Steps which led to the happy Acquisition.

And thefe we may review under thefe Two Heads---

1. The remarkable Steps which led to the dangerous Enterprize : And

2. The *furprizing* Steps *fucceeding* us therein.

1] The remarkable Steps of Providence which led us to the adventurous Enterprize,

I have

I have already hinted at thefe Two Particulars ---

1. Our Enemies being left of Gon, in Oppofition to all the Rules of Policy, but in too carly Confidence of their fufficient Growth of Power, while engag'd with the Queen of Hungary, to hurry into a War with us; while their trading Ships were mostly abroad, their Navy not fo well prepar'd, and ours by the previous War with Spain, equipt and ready to employ its Power for our Defence and their Annoyance: It feems in as happy a Juncture as we could wifh for : Without which we fhould not have had the Advantage or Opportunity which they have opened to us.

2. The People of Cape-B eton early and fuddenly feizing Canfo, invading Annapilis, and M. De Vivier going to France for additional Forces by Sea and Land, to renew the Affault in the Spring of the Year; ---were improvide by God as a Means of rouzing us up with the Senfe of Danger, and of exciting our Governour to implore the KING for fome naval Help: Without which it feems that Commodore Warren with his Three Ships of War had not been ordered from our West India Islands to New England; Tho' then, 1 fappofe, without any fpecial View to this important Enterprize.

3. By the *Cope-Bretoners* taking and carrying fo many of our People into their *Harbsur* and *Gity*, they were obliged to return them to us: Whereby we came to be more acquainted with their Scituation and the proper Places of landing and attacking: And at the fame 'Tune it is in the liftue happy, they were not fully aware of the prodigious Strength of the *Fortifications*, or of the great Number of *Men* within and near them; or we never had prefum'd on fuch anEnterprize: Yea, 'tis happy that fome few, who better knowing thePlace, gave the more exact Accounts and fpake difcouraging; yet we were fo fet on fending, they were not regarded.

4. GOD was pleafed to give last Summer a great Plenty of Provision to our northern Gelenies; whereby we were this Spring prepared to supply to great an Armament: And at the fame Time cut short the Crops in Ganada and the Irench of India Islands; whereby 'twas apprehended that Unofe at Cape Breton were considerably straitened, and that both the Conadafreed

die/t ng

ne-

the ilar ong i in not iven fine ery, cars And fand ever It is

Pro-

En-

to the

have

French and Indians were hindered the laft Year from troubling our inland Borders:.

5. By our Accounts of the Uncafinefs of the Switzers There, for want of Pay and Provision; and the Call and Wants of their *East* and *West India Fleet* in the *Fall* of the Year, and their Supplies with Men and Victuals, if not Ammunition; 'twas reprefented, the remaining French were further *weakened*; and we were the more encouraged. And 'twas further remarkable, that their *Store Ships* from *France* in the *Fall* came fo late on their Coast, and the Winter There for in fo early and fierce, as to keep them out of their Harbour and drive them off to *Martineco*.

6. From the fanguine Reprefentations made by our returned Captives, of the Eafine's of our taking the Place by an earlySurprizal before any Help could come, either from France or Canada; GOD was pleafed to lead our Governour, vigilant and active for our Safety and Welfare, into the Preject: And early forming the Scheme; in the most timely Scafon, in the midft of Winter, when our Intercourfe abroad was fealed up, to move and prefs it on the General Affembly; and after, in convenient Time, on our neighbouring Governments; and with wonderous Refolution, Circumfpection and Affiduity to purfue the fame.

7. Tho' when the Affair was first propos'd to the General Court, the Difficulties feem'd fo great and the Expence fo finking to this poor People, that they faw no Light to venture without a powerful, previous Help from England; yet upon further Representations, that the Season would likely be loft for ever, $\mathcal{E}c$ the Affair was unexpectedly reconfider'd: And the fovereign GOD fo over-rul'd the Absence of diverse worthy Representatives, who judged it too vast an Undertaking for us; that 'tis faid the final Refolution for it on Jan. 25, was just carried but by one Majority: And even that and other Votes had been lost, if the superior Greatness of the Expence had been then imagined; it foon abundantly exceeding their Expectations.

8. When the General Court had agreed on this great Enterprize, it is furprizing to think, with how profound a Secrefy,

crefy, fo many Members in the Centre of fo populous, obferving and inquifitive a Town as this, for fo many Days, kept their Confultations; 'till the various Parts of the Plan were fettled, Committees chofen, and all Things ripe for enlifting Soldiers, hiring Veffels, buying Materials and Provifions: And as furprizing to fee with what a general *Silence* all thefe Things were done in this City and Land; and the Army and Fleet equipt and ready to fail, while the Reft of the World had fearce any Intelligence of our Preparations.

q. As foon as ever the Defign was known among us, it was a marvellous Thing, that when this Province had lately loft to many Hundred Men Voluntiers in the fad Expedition to Carthagena, not One in Ten being alive to return, their Wives left Widows and their Children Orphans ;---yet to fee fo many likely Men, and I conclude the most of them Owners of Lands and Houfes, or Heirs of the fame, and many Religious, in all our Towns, readily lifting even as private Soldiers; with the fmall Wages of Twenty-five Shillings a Month, to leave their gainful Farms and Trades, as well as Parents, Wives and Children; all as free Voluntiers, to ferve their GOD, their King and Country, in this hazardous Enterprize : Yea, more to lift than the Court defired : And that fo many Men of diffinguish'd *Figure* should cheerfully offer themselves---even Four of his MAJESTY's Council for this Province, among them the Hon. William Pepperrell, Efg; the first of the Council; as also the Hon. Deputy Governour of Connecticut Colony; and diverfe Others of publick Effcem and Character,

10. It was wonderful alfo to fee that during those Two ufually flormy Months of Fibruary and March, the only Seafon for our Preparation, GOD was pleafed to give us fuch a conflant Series of mederate and fair Heather, as in that Time of the Year has fearce ever been known among us: So that there was hardly any Impediment to our Officers going about and enlifting, or our Soldiers in marching, or our Veffels in fitting, or our Coafters in bringing us Provisions, or our Committee of War in their various Preparations, 'till all were ready to fail.

24

11. The extraordinary Tho't, Contrivance, Order, Management and quick Difpatch, not only of Hts EXCELLENCY, but alfo of our *Cauncil of War*, froms wonderful---that Gentlemen unus'd to fuch Affairs, fhould in *Two Months* Time, think of and get ready every Thing foltable for fo great and various an Armament by Sea and Land : So that nothing proper feems to have been omitted. And I have heard forme express themfelves with Wonder to fee how Things would happen :---Juft as they wanted fome Kinds of *Materials* or *Frovifions*, an unexpected *Veffel* wou'd come in and bring them.

12. It was also wonderful---that tho' the Small Pox, which has been to fatal and dreadful to us, came into this Teten and Harbour, as our Troops were coming in both by Land and Water, and continued all the Time they were quartering and anchoring here, very few of the Officers or Soldiers having had it, and we were full of arxious Apprehentions; yet it neither hindred them, nor did the dangerous Infection fpread among them; which in that critical Juncture would, after all, have wholly overthrown the Enterprize.

And now our Army of Three Thousand Land Soldiers, with all Kinds of Stores being ready to fail on the 23d of March, in about a Hundred Vellels, befides Five Hundred Soldiers more fent from Connecticut, and Three Hundred and Fifty from New Hampfhire---we had almost every gloomy Prospect to make us tremble.

For our inland Berders were now left bare of a great Part of their Strength, by the lifting of 15 many of their able Men Folantiers in the Expedition. And if the Enterprize fucceeded, the beavy Debt would almost fink us. But al, for our Offences, God were carrying forth a great Part of the Flaver of our Country to be deftroy'd; a most difmal Scene of Ruin feem'd to follow ! They were to fail Five Hundred Miles to the Enemies Ifland, in a rate and flormy Time of the Year. And if the fear'd Infection had taken Place and flould brake out among them, clacking after their Landing; what a general Terror would feize them from the Hund of God which there was no relifting, and in what a uniferable Cafe would they be ! A naval Power with Stores and

and difciplin'd Troops were also early expected There from *France*, to conquer *Nova Scotia*: And after all the Labours of our unwearied *Governour*, to obtain fome *Men of War* from our neighbouring Colonies and West India Islands, to come and protect and help us; our hopeful Prospects feem'd to dwindle away---and we could fee no other but that, if Two Sixty Gun Ships of our Enemies, which were early expected, fhould arrive before we took the Place, they would foon make our Fleet and Army Captives :---And then what would become of this Country !

So they muft run the moft defperate Hazards. TheHearts of many of the wifeft afhore now feem'd to fail. Some repented they had voted for it, and others that they had ever promoted it. Some judged it beft after all for every Man to to goHome; and the Thoughtful among us were in greatPerplexity.---But yet a Wonder it was to fee, that thofe who were venturing into the Danger, feem'd to be fulleft of Truft in GoD andCourage. Many fill'd their Veffels with Prayers; and afking Ours, they threw themfelves into the divine Protection, in the Name of GoD they fet up their Banners, and away they fail'd. Pray for US, and we'll Fight for YOU--was the valiant and endearing Language wherewith they left us.

Thus have we traced fome of the *remarkable Steps* which led to this dangerous Enterprize. We now come

2] To view fome of the more furprizing Steps of Providence fucceeding therein to the happy Accomplifiment.

And as thefe are more in Number than can be reckon'd, I may here but mention a few---

1. As it was very encouraging to think how many picus and prayerful Perfons were embarqu'd in the Caufe, which we accounted the Caufe of GOD and his People ; it gave furtherGround of Hope, to fee fuch a Spirit of Supplication given to many in this Town and Land on this Occation. For betides the folemnDays of publick and generalPrayer appointed by thefe three Governments; there were particular Days obferved in feveral Congregations. There were alfo in diverse Towns D

ge-Y, ne, ing ing ome ould ; or

ring

S.

which and and ering s haons; ction rould,

ldiers, 23d of lundred red and gloomy

at Part ir able Enteri. But eat Part difmal fail Five d flormy d taken ther their from the what a th Stores and religious Societies, fome of Women as well as others of Men, who met every Week, more privately to pray for the Prefervation and Succefs of their dear Countrymen : And I have been well informed of their extraordinary Fervency, Faith and Wreftlings, as fo many Jacebs, in this important Seafon. *Pfal.* evili. 10---13. was ufually among our Petitions : As alfo, 'That GOD would preferve, direct and fpirit our 'Friends; and furprize and terrify our Enemies; and make 'them yield without much Blood-fhed, and in fuch a Man-'ner as the Hork and Glary might appear to be bis alone'.

2. GOD then began in a remarkable Manner to hear our Prayers: In that when fo many Veffels fail'd from Hence and from New Hampfhire and Connesticut, in fuch a turbulent Time of the Year, thro' a Courfe of Five Hundred Miles on the Ocean; they every one arriv'd at Canfo, the Place of Concourfe, about fixty Miles on this Side Cape Breton, without the Lofs of more than One Soldier and Three Seamen, and but Fifteen fick; and Time enough to meet together and refresh themfelves, and get into Order for their Defecent at Louifbourg.

3. It was remarkable alfo, that GOD was pleas'd to keep our Enemies Shore and Harboar inviron'd with Ice longer than ufual: So that none of their Veffels could enter nor go forth for Intelligence, 'till our Tiventy Gun Cruizers (which our Governour fent above a Forenight before the Reft of the Fleet) came Thither: And that fome of their Veffels coming early to them, both before and after the Harbour was open, were happily intercepted and taken by Ours; whereby our Enemies within fail'd of their Supplies, and the were recruited by those toithout.

4. That by a most gracious, seasonable and wonderful Direction of GoD, three our Gevenneyer's Sollicitations the Fall befire, the brave and active Commodore Warren, a great Friend to these Plantations, is ordered by the Government in Fugland, to come immediately with Three Men of War from Antego to Boston: That on his Voyage hither near Gape Sables, he, on April 12th, met with a Fisherman, who inform'd h m of our Army's being gone to Canso the Week before: That on board the Fisherman there was One of the beft of Pilots, who had got out of the Way of our Committee of War,

War, to avoid being prefs'd for the Service: That tho' the Commodore wanted trefh Provision and Cloaths for his Men in fo cold a Climate and Seafon; he wifely confider'd the neceffitous Cafe of our Army, took the Pilot, generoufly tack'd about, went after them, overtook them at Can/o, to their great Joy; and inflead of flopping, pafs'd on to watch the Harbour of Louifbourg, that no Supply from Canada, Adartinees or France might flip into it: Without all cobieb a 64 Gun Ship with near 600 Men and full of Stores, had enter'd, and this great Affair had been foon defeated.

5. That the Commodore, by the Fiftherman, fant his Order for the King's Ships that thould be found in thele Parts, forthwith to follow him : That the F fherman timely arriving, our Governour immediately fant the Order to a 40 Gun Ship at Pifcataqua ready to convoy the Maft Fleet for England : And tho' fhe was got to Sea, yet by a Boat the Order reach'd her; and fending her Fleet into Harbour, fhe bore after the Commodore and quickly join'd him. So that our Arnu before they fail'd from Canlo, had the Comfort of 4 Men of War, under God to protect and help them.

6. That the' our *Fleet* and *Army* flaid near three *Weeks* at *Canfo*, within 20 *Leagues* of *Louilbourg*, and within Sight of their *Ifland*; yet the Veeple *There* knew nothing of it, 'till early in the Morning April 30, when they were fo furpriz'd to fee us, that they had no Vine to get in the fiefh Provifion and Force of the *migibeurs* of *Cantory* to help them. It feems very wonderful, that none of the *French* or *Indians* near to *Canfo*, fhould happen to fee us, and give our Enemies Intelligence of us: And when our *Even* and *Army* were complete and ready, the Le went off at once; and the Winds and Weather confpir'd to tayour our Defeent on the Ifland.

7. It is also remarkable, that the French had made up Fortification at the Place of our Londing, they had made up Forfign'd it, and were preparing for it: And they they had Six Hundred regular Troops, and about Francew Hundred other Men in the City, that yet they flow I make for finall an Oppofition at our going affore : That Good for encouraged and help'd the few who landed first and enouged them, as to beat them away with the Loss of Electr of them Men strends to de-D 2 ed,

Men, pation been and eafon. : As t our make Man-?

ear our nee and rbulent liles on lace of , withnen, and refresh ui/bourg.

to keep ger than go forth nich our ne Fleet) tearly to n, were *Enemies* by those

erful Dithe Fal? a great nment in far from pe Sables, inform'd k before : f the beft mittee of War, ed, and Ten taken captive, without the Lofs of One of Ours: That thereby he ftruck a Terror into our Enemies: And tho' our People were fo eager of Landing, they were ready to quarrel to get into the Boats, and the Surf ran high; yet all our Army landed fafely, without overfetting a Boat or loofing a Man.

8. That He mov'd them to improve the Time and forthwith march up Five Miles, thro' a rocky & boggy Country, and enclose the City. That in the following Night he led fome of our Soldiers, thro' firange Places to the Storehoufes near the Grand Battery, which was firongly fortified with Walls and Ditches, and at each End a very thick Bomb-proof Tower: That the Storehoufes full of combuffible Matter, being fet on Fire, burnt & flash'd in a horrible Manner, and in the Night encreas'd the Enemies Terror: That the Wind alfo bearing a prodigious blackSmoke upon them, in which expecting our Army to enter, they were everySoul frighted out of it into the City: And that in the Morning, but 13 of our Men observing there was neither Flag flying, nor Chimney fmoaking, nor Perfon appearing, but the Gates open, $\mathcal{E}c$. ventur'd in and took Poffeffion.

9. That yet the Enemy aware of their fatal Error, foon after came with Forces in many Shallowaes to recover it : But 8 of the 13 going out of the Battery and meeting with about 8 more of our Friends, run to the Water Side, and fo plied the Boats with Small Arms, as damp'd and hinder'd them, 'till feeing more of our Forces coming, the Boats turn'd back to the Town again : And if they had come but one Hour fooner, they had regain'd the Battery before we found it deferted. And thus this ftrong Fortrefs of 32 great Cannon, 30 of them 42 Pounders, which might alone have maintain'd itfelf against all our Army, the LORD deliver'd into our Hands, without the Lofs of a Man, or Shot of a Gun, and before we demanded it : Whereby he at once fav'd us both Time, Toil and Blood, and furprizingly gave us a great Power over the Harbour, as well as formany of the largest of the Enemies Cannon, with a great Number of their own Balls and Bombs to improve against them.

10. That our Army was preferv'd from the dangerous Infestion: And the being open to the Air, Fogs and Dews, upon the Melting of the Ice, in a raw Climate and Seafon of the Year, the Camp-Dyfentry feized many; yet fome of our Phyficians in their Letters fignified, that it look'd almost miraculous, they should fo foon and generally, without Means, recover.

11. That they fhould be infpir'd with wondrous Courage, Eagernefs, Activity and unfainting Strength : Be fupported under their extraordinary and conflant Toils, Fatigues and Labours, in carrying Stores, drawing Cannon over Hills and Valleys, among Rocks and thro' Morafles, up to the Middle in Mire; and in digging Trenches, raifing Batteries, firing Shot and Bombs almost inceflantly both Day and Night against the City : And that Gop fo speedily taught their Hands to war, and their Fingers to fight, as prefently to throw them with great Exactness, and do continual Execution among our Enemies; dismounting their Cannon, beating down their Houses, Gates, Walls, Flankers; and greatly distressing them.

12. That when a new 64 Gun Ship from France with near 600 Men, and great Quantities of Arms and Stores, came fo near the Mouth of their Harbowr and before a fair Wind, that two Hours more would have given her Entrance; the was happily difcover'd by fome of our fmaller Ships, who led her along to the larger and foon made her Strike : And tho' by the Fog in the Night they loft her, yet in the Morning they happilv recover'd her; to the growing Difcouragement of the Belieged, and our encreasingStrength and Benefit.

That tho' to fhow our Dependance on GOD continually, He was pleas'd to fuffer the barbarous Indians, twice to furprize and murther fome of our People; yet in feveral Land-Encounters both with French and Indians, in divers Parts of the Ifland, He was pleas'd to give us the Victory.

That by Means of the extraordinary quick Difpatch of a *Meffenger*, our *Governour* in *February* fent to the KING for naval Help; GOD was pleas'd to fend fo many *Men of II'ar* fucceffively, as by the 12th of *June*, with the 64 Gun Prize, and those who were there before, to amount to *Eleven*; to the

urs: tho' to t all ofing

with

e of the and wer: *fet on* t enpro-Army City: there erfon took

foon But about plied hem, back loonerted. them gainft hout e del and Har-Canbs to

That

A Thanksgiving Sermon

the finking Fear of the Enemy, and the rifing Joy of our Fleet and Army; as also to preferve a happy Harmony between our various Officers.

That the' GOD was pleas'd to humble us in defeating our Attack in the Night on their firong Island Fort; yet He happilv guided and with furprizing Strength, Agility and Quicknefs helped us to holft up fome of the heavieft Cannon and Mortars on the Light House Cliff, which overlook'd that Fort in which they truffed in caffing our entering into their Harbour: And then allisted in caffing our Bombs fo exactly, as after the two or three first, to throw in every One of the reft, and do fuch Execution as quickly beat them out of this ftrong Hold they tho't impreguable, and frighten the City to a quiet Surrender.

That GOD fhou'd move 'em to it in *that critical Moment*, when the *Navy* and *Army* had juft agreed on a general, defperate and fierce *Affault* both by *Land* and *Water*; which was like to be exceeding bloody and of doubtful Confequence: For upon the Capitulation, when our Forces enter'd the City and came to view the inward State of its Fortifications; they were amnzed to fee their extraordinary Strength and Device, and how we had like to have loft the Limbs and Lives of a *Multitude*, if not have been all deftroy'd.

That in all our clofe and conftant Affaults and Skirmifnes, fome of our Batteries being within *Piftel Shet* of the City, and receiving fuch a vaft Number of *Balls* and *Bombs* almost continually by Day and by Night, we fhould not have above a *Hundred flain*; in fo raw a Climate and Seafon, and under fuch Fatigues, not loofe above a *Hundred* more by *Sicknefs*; and of fo many *Veffels* transporting and cruizing, in fo many Storms in *March* and *April*, loofe but One; tho' this a *Cruizer* of a *Hundred Men*, fuppofed to be overfet, is a grievous Lofs.

That in the Time of the Siege, there were many other furprizing Events in our Favour---Such as timely Supplies to our Army, either by Transports or Prizes, as we were near to want them---That the very Balls from our Enemies Cannon were of no finall Service, being as talk almost as they fell, catch'd up and put into Ours, and return'd with Advantage ---That

--- That digging a Trench to protect our Men, and meeting a Rock in the Way we could not remove; just as we leit it, a Bomb from the Enemy came down in the most fuirable Spot, and without any Harm remov'd it for us, Sc.

That from the Army's leaving Canfo, April 20, to their landing April 30, and during all the Siege, there thould be fuch a continual Series of fair Weather, as was never known in the Place before at that Time of the Year, 'till their outering into the City, 'June 17; and then the Clouds to gather Blacknefs and pour down Rains for Ten Days together : Which would have tpoil'd our Batteries, fill'd our Trenches, and greatly hinder'd and difabled us !---It feem'd to clofe the Scenes of Wonder !---As if the fovereign GoD would fulfpend the burtful Operations of Nature, 'till he had quite accomplifn'd his great Defign, deliver'd the Fortrefs into our Hands, and led us into a Place of Shelter.

In the mean while, it is also remarkable, that the North American Coafts have been unmolefted b both the French and Spanifh Weft India Privateers, 'till this great Affair way ended. And that by Means of Du Vivier's Project of taking Annapelis in the Spring or Summer, both our French and Indian Emeries have been all this Time diverted from our exposed inland Borders; they being drawn to Menis, and to make a track nt Show at Annapelis: So he was guided into his michaevous but fruitlefs Project, and to go even to France, to promote our Safety, and give us an unmolefted Seafon for the taking of Leuifbourg.

t

Laftly, That the' our GOVERNOUR, our GENERAL COURT, the Council of War, the General, the Commediate, the Officers and Soldiers, both by Land and Sea. have difplay'd a wonderous Wifdom, Zeal, Courage, Refelution, Filigance, and unwearied Application; yet they have the eminean Henour in receiving thefe from GOD, and in his employing them to atchieve and bring about fuch a glorious and happy Allition to the Britiff Crown and Empire: Nor w thout this monberlefs other Directions wou'd all their Skill, Care, Toil and Diligence, have availed any thing: And to HIM be therefore all the Glory. For the infinitely infectour Brightnefs fpackling in them, is wholly deriv'd from HIM, both by his original and continual

A THANKSGIVING SERMON

continual Influence; like the Glitters of *Diamonds* from the Morning *Sun*, and when He wholly hides his Light, they vanish. And yet the brillant Diamonds are more to be valued than unfhining Pebbles.

And thus have we feen this Paffage of Scripture, in a remarkable Manner exemplified in the prefent Day.

And now who can in common Reafon deny a particular Providence in this great Affair? Who can in Reafon imagine that fuch a Multitude of various and contrary running *Wheels*, both of material Caufes and fpontaneous Agents, fhou'd all be made to work together, and in the midft of Thoufands of Difficulties and Contingencies, in the happieft Seafons coincide, to accomplifh this GREAT EVENT; without a SU-RREAM Contriver, Mover and Director? We may a thoufund Times more confiftently apprehend the most curious Engine in the World to be made without Defign, and to work without a moving Power.

Yea, Thofe who own not *Thefe* to be the *Operations* of God, as a wife, fovereign, free and actual Ruler among Men and Elements; muft not only deny the *Scriptures*, but even the very *Foundations* of all Religion, or Adoration of this fupream Governour. For they muft deny there is any Need, or Duty, or Wifdom, of fearing Him, or praying to Him, or hoping on Him in any Emergencies; or of acknowledging, admiring, praifing, loving, or thanking Him, for the greateft and most marvellous Salvations.

But as for Us----In the Name of GOD, our GOD in CHRIST, vea in the Name of the SON of GOD, as fupream Lord and Ruler of Heaven and Earth, of Men, Angels, and Elements, we lifted up our Banners : To Him we looked and prayed : In Him we put our Truft and fought : And now, He has heard and profper'd, to Him we will aferibe the Praife.

Whatever Inftruments or Means He us'd, we will blefs Him for them; we fee them form'd, endow'd, excited by Him; we fee them in his mighty and all-active Hands, deriving Strength and Guidance from Him, and employ'd continually to fulfill his Pleafure. We will own, the Work is his in the higheft

33

higheftSenfe: It was all comprehended in his fovereign View, Defign and Providence; begun, carried on, accomplifh'd by his all-governing Wifdom, Power and Efficacy; and the whole together is marvellous in every ferious Eye.

When the Tydings came of furradring the City, we • were like Them that dream : Our mouth was fill'd with · Laughter, and our Tongue with finging : Even the Hea-" then faid, The LORD hath done great Things for them; and " We --- The LORD hath done great Things for us, whereof we " are glad. Not unto us, O LORD, not unto us, but unto ' thy Name give Glory : Our GOD hath done whatfoever · he pleafed : The LORD hath been mindful of us : And we • will blefs the LORD, from this Time forth & for ever. Thine " O LORD is the Greatness, & the Power, & the Glory, & the Victory, and the Majefty : For all that is in the Heaven and ' in the Earth is thine; thine is the Kingdom O LORD, . and thou art exalted as Head above all : Both Riches and · Honour come of Thee, and Thou reigneft over all, and in • thine Hand is Power and Might; and in thine Hand it is • to make Great, and to give Strength to all : Now there · fore OUR GOD, we thank Thee and praife thy glorious · Name. Give Thanks to the LORD, call on his Name, make known his Deeds among thePeople : Sing unto Him, • fing Pfalms unto him, talk ye of all his wondrous Works: · Declare his Glory among the Heathen, his marvellout Works among all Nations.

O that when we have *fang his Praife*, we may not ungratefully forget his Works, or return to Sin; which is to rob Him of his deferved Glory and fly in the Face of our great Preferver and Benefactor : It is the vileft Degree of Ingratitude and provoking Bafenefs : It is to fight against HIM, who has been marvelloufly fighting for us, and given us a wonderous Series of great Salvations. Yea, this will be the dangerous Way to move HIM to turn our Enemy; to change the Courfe of his flighted Difpenfations, and give the Place into our Adverfaries Hands again, with a more dreadful and mifchievous Increase of Power than ever, to punish us. And the Sins of Drunkennefs, Profanation of the Name and Day of GoD, Uncleanness, Injustice, Oppression, Contempt of CURIST, & Opposition to the Purity, Power and Practice of his boly Religion: are fome of of the higheft and most dangerous Provocations and Preparatives to ruinous Judgments.

Yea, diffinguishing Appearances of GOD to fave and profper us, are diffinguishing Obligations, not only to diffinguishing Degrees of Joy and Praise, but also to diffinguishing Degrees of Piety: i. e. of active Gratitude and Love to GOD, of perpetual Contrivances and Labours to promote his Glory and holy Kingdom in Ourfelves and Others, and to a conflant Life of Service to His Cause and People. And as the Failure of this, will not be a rendering to Him according to his fignal Benefits, but a most ungrateful Treatment of Him; his Eyes are always on us, to observe us now, and to judge and Recompence us Here or Hereafter.

But let us rejoice, not only in our ownSalvation, theSalvation of all our Colonies, and fome of the most important Branches of the British Trade ;---But let our Joy rife higher, that hereby a great Support of Antichristian Power is taken away, and the visible Kingdom of CHRIST enlarged. Methinks, when the fouthern Gates of Louisbourg were opened, and our Army with their Banners were marching in ; the Gates were lifted up--- the Gates were lifted up--- and the KING of GLORY went in with them. Even the SON of GOD, the LORD of Hofts, the LORD ftrong and mighty in Battle---having gain'd the Conquest, he rode in in Triumph and took Possession. He fet up his Standard, proclaim'd his Gofpel of Peace, the Glad Tydings of Salvation, open'd the Prifons, redecm'd his Captives, and began to receive his grateful Incenfe of pure Adorations. O that There, in Purity of Worfhip, Doctrine and Conversation, in the Power of his Grace and in the Glory of his Holinefs, He may reign and fhine to all the Iflands round about, as long as the Sun and Moon endure.

And as 'twas one of the chief Difgraces of Queen ANNE'S Reign, to refign this Island to the French; it is happily one of the Glories of KingGEORGE the Second's, to recover it to the BritishEmpire. O that it may remain united thereto for ever, and fo perpetuate the Glory. O that under the Influence of British Liberties, in a happy Constitution of Civil Government, and the DIVINE Care & Bleffing, even Louisbourg itfelf, with Cape-Breton, and all Nova Scotia, may revive and flourish. May they have religious, wife and generou Gevernours, that may be as nurfing Fathers to them; encourage them in Piety, Virtue and good Order, promise their Trade, and protect them in their Properties and Liberties.

Laftly, may this happy Conquest be the dawning <u>b</u> nefl of or DIVINE REDEEMER's carrying on his Triumple thro' the Northern Regions; 'till He extends his Empire from the Eastern to the Western Sea, and from the River of Canada to the Ends of America.---THEN from the uttermost Parts of the Earth shall be heard Songs, even Glory to the righteous GOD: They shall lift up their Voice, they shall fing for the Majesty of the LORD, they shall cry aloud from the Sea; they shall glorify the LORD in the Woods and Valleys, on the Lakes and Rivers, in the Mountains, in the Islands: And the Heavens and the Earth shall be filled with his Glory, and eccho with his Praise.
