The financial statement of this report showed that \$1,200.27 had been collected by those divisions leaving a cash balance on hand of \$2,322.27.

Three new divisions were organized. The following are the recommendations which were adopted and made the policy of the grand division:

- (1) Consider the great need of supervised public playgrounds. They should be in every organized community.
- (2) The establishment of Juvenile Courts and an industrial university for the protection and salvation of young offenders and the prevention of crime.
- (3) The proper classification and segregation of offenders.
- (4) The establishment of a farm where drunkards may be sent to redeem themselves. This has been tried in various provinces, and in many of the states to the south of us, with good effect and is now past the experimental stage.
- (5) The more rigid enforcement of our laws governing the sale of cigarettes to minors. In many communities officials make no attempt to enforce this law. In St. John it is openly violated.
- (6) While prohibition is the goal, let us make the most of the present liquor license act and have it properly enforced and seek with the aid of the Moral and Social Reform Council, Temperance Federation and other kindred societies, amendments as will make it easier for a man to do right and harder to do wrong.

(a) Thus all liquor should be thoroughly inspected.

(b) Treating should be prohibited by law.

(c) Saloons should close at 12 a. m. Saturday and 7 p. m. every other day.

(d) That all liquor should be consumed in the barroom of the licensed premises.

(e) The penalty should be increased for minors and interdicts should be increased.

(f) All saloons should be open to public inspection.

(g) Those who suffer through the traffic should be able to collect damages from the saloon keeper for injury and loss sustained. This would safeguard the rights of the suffering mother, wife and innocent children.

The report also recommended the placing of an agent in a district division and the right for prohibition and moral and social reform.

Rev. C. Fleming, Rev. H. H. Stafford, Rev. W. B. Robinson, Mr. W. H. Kirby, and J. R. Woodburn were appointed a committee to carry out this policy in New Brunswick.

In concluding his report the grand scribe suggested that a message of loyalty and greeting be sent to His Gracious Majesty King George V. This was also adopted, and Rev. W. B. Robinson himself was appointed to draft a suitable message of congratulation.

The grand treasurer's report showed a balance of \$396 on hand.

Rev. Geo. Lawson, of Moncton, N. B., of North America, was officially received and an address was given.

A sum of money was voted for juvenile work under the superintendency of Miss J. M. Kent, of Albert.

Reports were received from the Kent and Northumberland district divisions. St. John district division, showing the work of the Grand Division at this session just closed were: Rev. H. H. Stafford and H. M. Ferguson, of Rexton (N. B.); M. J. Steeves, Rev. Geo. Lawson and B. C. H. Perry, of St. John; J. Pettit, of St. John; J. R. Woodburn, W. H. Patterson, E. Everett, E. S. Henniger, Rev. W. Lawson, Rev. W. B. Robinson, John Lester and J. M. Campbell, of St. John.

NEWCASTLE MAN ACCQUITTED OF SERIOUS CHARGES

Newcastle, N. B., May 25.—(Special)—The supreme court reopened today, Judge Landry presiding. The jury in the case against Patrick Carroll, charged with criminal assault, brought in a verdict of acquittal. The jury were: Mr. Buckley, Henry Carter, Matthew Carroll, Robert Chaplain, John Morrissey, Jr., George Hubbard, Allan Russell, Fred Gought, John Fitzpatrick, James Lynch, Thomas Powers, James Blackie.

The witnesses examined were Mrs. Harvey Phinney, victim of the assault, who testified that she was first assaulted by her husband; Dr. Pedolin, who testified to the nature of the assault; Mrs. Henry Maclean who was chased by a man the same night; Miss Jean Allan, who first heard the screams of the victim; Miss Ethel Allison, and Miss Mary Gifford, who assisted Mrs. Phinney after the assault and was talking to Carroll shortly afterwards. Police-man Hill, Timothy Crocker, Harvey Young, Willie Keating, John Jardine, Olo To Fedler, the prisoner's parents, James Hubbard and the prisoner himself.

Miss Gifford and Mrs. Fallon corroborated the prisoner's story of having met them and inquired of the assault that had been committed shortly before. The prisoner strongly protested his innocence and his parents' testimony was strongly in his favor.

TOO STRONG.

(New York Press).

In a sparsely settled region of West Virginia an automobilist was once held before a local magistrate upon the complaint of a constable. The magistrate, a good-natured man, was not, however, absolutely certain that the Washingtonian's car had been driven too fast, and the constable insisted that he had been proceeding at the rate of only six miles an hour.

"Why, your honor," he said, "my engine was out of control, and I was going slowly because I was afraid it would break down completely. I give you my word, sir, you could have walked as fast as I was running."

"Well," said the magistrate, after due reflection, "you don't appear to have been exceeding the speed limit, but at the same time you say you were going so slowly that you wouldn't be here. I fine you \$10 for loitering."

Act II, Scene LXXXXXXX.

TELLS HOW THE STEEL TRUST CAME

Formed to Eliminate Carnegie from Business, Says John W. Gates

"ANDY" DIDN'T PLAY FAIR

Noted Speculator, Also, Tells Congressional Committee That the Iron Master Sold Out for \$320,000,000, or \$160,000,000 More Than He Asked a Year Before.

Washington, May 28.—The Stanley committee of the house yesterday began an investigation of the United States Steel Corporation, with John W. Gates as chief witness. The New York speculator was on the stand for four hours and seemed to enjoy the experience.

One statement that the committee drew from him was that the United States Steel Corporation had its inception in the fear on the part of J. P. Morgan and others that Carnegie would attempt to break into the railroad situation in the United States and to undertake the extension of his steel manufacturing interests along new lines.

Mr. Gates relieved himself of several frank expressions in regard to the Laird of Skibo, to whom he irreverently referred to as plain "Andy." He declared in effect that Carnegie had made threats to enter new fields in the steel manufacturing business, he had something to sell and as a result he sold it for \$320,000,000, about \$100,000,000 in excess of what he offered to take a year previously. Gates also told how "Andy," ignoring agreements, asked to put prices when the other fellows were holding.

As to John W. Gates' own interest in the organization of the United States Steel Corporation, it was very simple. "I wished to convey," said he, "a lot of doubtful assets into cash." And he succeeded, according to his own statement, in doing the same.

After Roosevelt.

The chief purpose of the Stanley committee in summoning Mr. Gates was to get in version of the sale of the majority stock of the Tennessee Coal & Iron Company to the Steel Corporation. The Democratic committee aims to discredit, if possible, the statements made by ex-President Roosevelt at the time of the transaction, that the sale was put through as a means of averting a panic and not because the United States Steel Corporation had any desire to acquire this property. The committee did not accomplish very much along this line. In fact the entire day's proceedings left the impression that the steel investigation is a Democratic "shining exercise."

Mr. Gates appeared before the committee looking very merry and very self-confident. Dressed in a black and white checked suit and a bright bow tie, the New York speculator seated himself in the witness chair, a cane in one hand and a cigar in the other.

He testified that he held about 18,000 shares of Tennessee Coal & Iron stock as a member of the syndicate of which Grant P. Soley and Charles F. Guthrie were the managers. The managers were authorized to sell this stock in their discretion at a profit. Mr. Gates knew nothing of the negotiations for the sale of the majority holdings of the United States Steel Corporation until he sailed into New York from Europe in November, 1907, and found the country in the throes of a panic. Mr. Gates hustled around immediately after landing to find out something about the proposed deal between the Steel Corporation and the Tennessee company. He learned that J. P. Morgan, Henry C. Rick and Judge Gary were waiting at Mr. Morgan's home to hear if his offer of an exchange of 5 per cent second mortgage bonds of the United States Steel Corporation for the Tennessee Coal & Iron stock, on the basis of one bond for ten shares of stock, was acceptable.

Mr. Gates said that he immediately registered an objection, and after several hours of negotiation over the telephone the deal was finally closed on the basis of 1 1/2 per cent of second mortgage bonds for the stock. When the Tennessee Coal & Iron directors resigned the next day, but before the deal was consummated, Gates insisted, so he said, that the minority stockholders be cared for on the same basis as the majority. Judge Gary declined to do this at first, but finally agreed.

No Money Changed Hands.

The committee turned then to the conditions which led up to the sale.

Chairman Stanley read statements made by President Roosevelt, without mentioning the names of the parties.

(Continued on page 8, third column.)

GERMANY WILLING FOR ARBITRATION, TOO

Washington, May 29.—Germany today expressed her willingness to enter into negotiations with the United States for a general arbitration treaty along the lines in the tentative draft of the proposal now in the hands of Great Britain and France. The German ambassador, Count Von Bernstorff, conveyed this information to the secretary of state and asked for a copy of the basic proposition.

AWARD COURTENAY BAY CONTRACT IN AUGUST

Whole of Great Work There Included

Dry Dock and Ship Repair Plant Linked With Other Development

Work Will Be Greatly Facilitated by Carrying It All Along Together—Most Responsible English Construction Companies Interested—Minister Discusses G. T. P., the Branch Lines and the Valley Railway.

Hon. William Pugs

In company with Mr. Dibble, will go to Skiff Lake for a few days.

Later in the season, Mrs. Carr and daughter, Miss Constance Carr, of New York, will come to St. John.

Mr. and Mrs. Delancy Robinson and Mrs. and Mrs. Delancy Robinson and Mr. and Mrs. Dibble, will spend several weeks at Duck Cove.

Among the many visitors planning to come out at the Coronation ball will be Miss Constance Carr, of New York.

The Misses Besse and Clara Bridges, who were at the coronation ball, are leaving on Tuesday for a trip to New York.

Mr. and Mrs. P. M. Macdonald are leaving on Tuesday for a trip to New York.

Among the many visitors this year at Duck Cove coming from Fredericton, besides Mr. and Mrs. Delancy Robinson and Mr. and Mrs. Dibble, will be Mr. and Mrs. Robert Fitz-Randolph and children and Mr. Charles Fitz-Randolph and children.

Mr. and Mrs. Logan is Hamilton (Ont.) taking a course at the Westinghouse School of Electricity.

Dr. and Mrs. Dudley Bridges were among a party of pleasure seekers spending the week-end at Bear Island.

Mr. and Mrs. Alphonso Kitching spent the holiday in Woodstock making the trip in Mr. Kitching's motor car.

Miss Sherman, Miss Palmer and Miss Kitching, accompanied by Mrs. Deedes, spent the holiday at Harvey on a fishing trip.

Mrs. H. E. Bond, of Toronto, is here in the guest of her niece, Mrs. Harold Babitt.

Miss Carleton, of St. John, came up for the engineers' dance and is a guest at Mrs. Colwell's.

Fredericton, May 26—There are four candidates for the M. A. degree at the University this year and the names of the successful candidates will be announced along with the names of the medal winners and other successful students after a meeting of the faculty on the day previous to graduation.

Those who are M. A. candidates are: Rev. H. R. McGill, B. A.; Miss E. A. R. Davis, B. A.; Miss Edith H. E. B. A., and Locksley McMillan, B. A.

John Kilburn, who has been superintending his steam driving operations on the Upper St. John, returned home last evening. His trip was very heavy rains will be needed to bring out the drives stranded near Seven Islands.

Chonnamy and Gertie spent the day in safe water by making a running drive. The heavy forest fires on the Riverview were extinguished by the rains of Wednesday night.

The census enumerators of the county are here today receiving instructions from Commissioner Palmer.

E. S. Washington, restaurant keeper, was convicted in the police court this morning on a charge of selling ice cream on Sunday. Sentence will be imposed to-morrow.

ST. ANDREWS
St. Andrews, May 25—An auto party from St. Stephen, Mr. and Mrs. Frank Murchie, Mrs. Charles Clark, Mrs. Frank E. Robinson and Mrs. Charles Eaton, were guests of Mr. and Mrs. W. J. McColl at Kennedy's Hotel on Thursday last.

On Saturday the motor boat Hazel Grimmer took a party to Esport (Me.), where the following ladies and gentlemen spent a very pleasant day. Among them were Miss Bessie Grimmer, Miss Florence Hibbard, Miss Hazel Grimmer, Mrs. George Smith, Mrs. Hawthorn, Mrs. G. M. Stickey, Mrs. Will McVay, Miss G. H. Elford, Miss Alice Grimmer, Rev. G. W. Elford, Mr. G. W. Elford, Miss Jean Hewitt, nurse in training at Newport (N. I.), at her mother's, Mrs. Elford, and for a vacation, of two weeks.

Mr. and Mrs. Henry Smith, of New York, came on Saturday and are guests of their daughter, Mrs. Frank P. McColl.

Mr. E. A. Smith, of St. John, was in town on Sunday.

Mr. Frank Mulloy, of the Bank of Nova Scotia, Montreal, is spending a very pleasant vacation with his parents, Mr. and Mrs. William E. Mallory.

Mr. and Mrs. Randolph Winston Churchill came to St. John on Wednesday and are visiting Mr. and Mrs. R. E. Armstrong.

Mrs. Neil Johnson, of Apohaqui, visited Mr. and Mrs. W. E. Mallory this week.

Mrs. Will McVay very pleasantly entertained a number of friends from upriver who were over Sunday guests.

Mrs. George Smith gave an evening bridge on Tuesday for the pleasure of Mrs. Will McVay. The following ladies entertained the favored guests: Mrs. E. A. Wren, Mrs. Frank P. Barrard, Mrs. Frank P. McColl, Mrs. E. A. Cockburn, Mrs. John Simpson, Miss Hazel Grimmer, Miss Alice Grimmer, Miss Gertie Grimmer, Mrs. Mary Ross, Mrs. W. J. Burton, Mrs. May, Mrs. N. M. Clarke, Miss Hazel Grimmer were the prize.

Mr. and Mrs. George H. Hibbard passed a few days with friends in St. George this week.

Mrs. and Mrs. Philo Hanson, recently of St. George (N. B.), have been guests of Mr. Hanson's parents, Mr. and Mrs. Daniel Hanson, before leaving for the west.

Westfield Beach, N. B., May 25—Mrs. A. S. Bowman, St. John, spent the week-end at Westfield.

Mr. Wm. Robertson is boarding in Westfield for the summer months.

Mr. and Mrs. G. S. Gault, of West St. John, were the holiday guests of friends here at Westfield.

Mr. and Mrs. Westfield on Wednesday.

Mr. and Mrs. G. S. Gault, of West St. John, were the holiday guests of friends here at Westfield.

Mr. and Mrs. G. S. Gault, of West St. John, were the holiday guests of friends here at Westfield.

Mr. and Mrs. G. S. Gault, of West St. John, were the holiday guests of friends here at Westfield.

Mr. and Mrs. G. S. Gault, of West St. John, were the holiday guests of friends here at Westfield.

Mr. and Mrs. G. S. G

The Semi-Weekly Telegraph is issued every Wednesday and Saturday by The Telegraph Publishing Company, St. John, a company incorporated by Act of the Legislature of New Brunswick.

Parliament of Empire The Colonial Conference now being held in London may well develop into a Parliament of Empire.

The Words of a Banker At a time when Conservative politicians, afraid of the merits of the proposed trade agreement, are seeking to make it appear that a larger market for our natural products will imperil our loyalty, it is a pleasure to direct attention to the concluding paragraphs of an address made recently in London by Mr. F. Williams Taylor.

The Revolution in Mexico Heine says that to be successful revolutions require fine weather. "It will not take place tonight, for it is raining," said Pethica, as he opened a window and calmly shut it again, whilst his friends, the Girondists, were in momentary expectation of an outbreak of the populace, incited by the party of the Mountain.

The Standard and Courtenay Bay The Standard is clearly unhappy because of the news from Ottawa that tenders are soon to be called for in connection with the development of Courtenay Bay, involving an expenditure of from \$4,000,000 to \$5,000,000.

Note and Comment The news about Courtenay Bay will fill Dr. Daniel's cup to overflowing.

The Daily Telegraph, The Semi-Weekly Telegraph, The Evening Times. New Brunswick's independent newspapers. These newspapers advocate: British connection, honesty in public life, measures for the material progress and moral advancement of our great Dominion.

Semi-Weekly Telegraph and The News ST. JOHN, N. B., MAY 31, 1911.

COURTENAY BAY Ottawa despatches announce that in a few days the Public Works Department will call for tenders for extensive harbor works at Courtenay Bay, the whole plan involving an expenditure of from \$4,000,000 to \$5,000,000.

Power Rates In comparing the prices charged for electric power in various cities it is very necessary to know whether the figures refer to ten-hour service, twelve-hour service, or service during the whole twenty-four hours.

Prisoners and Discipline The coroner and jury called upon to investigate the death of a man who was a member of the St. John chain gang were confronted with a duty of some difficulty.

The Question Before the Country For the next few weeks the air will be shaken with explosions and outcries, the relevance of which may be difficult to make out.

The Standard threatens to go on whittling, even though it suspects there are some who do not like the tune. Probably those who like the tune least are those who have to pay for it.

The Toronto News recently asserted that "Great Britain always has been and still is the market that takes the bulk of Canadian produce."

The Premier in London Sir Wilfrid's speech at the Pilgrims' dinner was vigorous, striking, and imperial in the best sense of that word.

These figures, and others secured by the aldermen from several Ontario and Quebec cities, afford a fair idea of what power costs in other places where, presumably, the average cost of development is much the same as it would be in St. John.

FAMOUS GEMS OF PROSE HEROES OF THE SEVEN YEARS' WAR By Edward Everett

But in the war of 1756 the military efforts of the colonies were still more surprising. If it is said that they were upheld by the resources of the mother country, let it not be forgotten in making the comparison of their exertions in this war, with those in the revolution, that in the latter they have the powerful support of France.

HORTICULTURE LANDSCAPE GARDENING

The Fourth of a Series of Nine Articles on Home Adornment.

There are many species and varieties of trees and shrubs that may be used on the home grounds and in parks. Generally speaking, the best kinds are those that are native to the locality. A few others are introduced for novelty. The selection depends upon individual preference and local conditions, chief of which is the size of the area to be planted.

SOME EVERGREENS.

In color and in size, the evergreens are of considerable variety. They have an important place in providing landscape effects and in planting for protection from winter winds. They can be planted for winter effect with striking results.

The pine have beauty and picturesque quality of trunk and foliage. Their young growth is charming. The Austrian and Scotch pines make handsome specimens and our native white pine, when young, is their superior. A small pine for planting in special positions is the dwarf mugo pine, which possesses dark foliage.

Among the spruces, we have the native white one and the Norway spruce, both of which are excellent for effect and for winter planting. The latter is the more vigorous of the two. For a beautiful but novel specimen, the Colorado blue spruce may be chosen.

Much beauty and variety in form are to be found in the arbutus, junipers and retinosporas. Among the best of these are the pyramidal and globose arbutus, the Irish juniper and the plumose retinospora. In cold localities the latter probably would require some protection for a few years.

THE SPRUCE GALL-LOUSE.

In many parts of Canada, spruce trees are being injured by an insect called the spruce gall-louse, which, as its name implies, forms galls on the twigs. In some districts it is causing much trouble and anxiety. Good results in treating it have been obtained by spraying the infested trees at the time that the young galls are exposed. This should be done in June so that the treatment may be made before the galls are enclosed in the galls. The spraying should be repeated, if necessary, at intervals of two weeks. The point is to spray when the pests are seen to be moving about. They are so active that a magnifying glass will be required to see them. For a complete job the spraying should be repeated two or three times at short intervals, as the insects do not all come out at the same time.

Ordinary kerosene emulsion is made by the use of the following ingredients: Soft water, one gallon; hard soap, one-half pound; kerosene, two gallons. The soap should first be dissolved in the boiling water, after which the kerosene is added and the two stirred for five or ten minutes. The mixture should be diluted with ten times its measure of warm water before using. There are two essential conditions of success in making this emulsion. The liquids should be warm, and the water as soft as possible.

PLANTING TREES AND SHRUBS.

When buying trees and shrubs for planting on the lawn, the nurseryman should supply specimens of good quality, of medium size for the variety. When they are received, they should be planted in the ground, if they cannot be done, heel them in so that the roots will not be exposed to the air, and leave them until they are convenient for planting. The practice is particularly necessary in the case of young evergreens. By heeling-in means the temporary covering of the roots of plants in order to preserve and protect them till in permanent quarters. Plant in spring. Very large trees should be moved in the autumn. Small trees may be planted in the spring or in the autumn. When planting dig the hole large enough to take in the roots without cramping. Have the hole as large, if not larger, at the bottom than at the top. Do not plant too deeply. Set at about the same depth as the tree stood in the nursery. This may be determined by the markings on the trunk of the tree backwards as to the fresh earth around the roots and forward to fill all the spaces, then tramp and pack the soil firmly layer by layer. Air space causes decay and eventually death. Plant in the evenings or on damp days. If the trees when set are exposed to strong winds or to injury by animals, it would be well to tie them to stakes and to protect them by means of tree guards.

THE NEXT ARTICLE OF THIS SERIES WILL GIVE A LIST OF THE MOST DESIRABLE ORNAMENTAL SHRUBS AND ROSES WITH SUGGESTIONS ON CARE, PRUNING AND MANAGEMENT.—A. B. CUTTING.

GROWING SPINACH.

An early green garden crop and one that is always acceptable early in the season, is spinach. It is highly esteemed for use as greens. Several crops can be grown in a season, as it is ready for use from five to seven weeks from planting. The earliest crop is had by sowing the seed late in fall and carrying through the winter by protecting with straw.

In spring, sow the seed as soon as the weather and soil will permit. Sow about one inch deep in rows fifteen inches apart. Spinach may be grown as a companion crop between other vegetables. For example, plant two rows one foot apart as soon as you can get the ground ready, and later later two rows of beans. The beans may be planted when it is warm enough, without disturbing the spinach, and the spinach will be ready to harvest before the beans are large enough to be injured by its presence. The spinach may be planted before a later crop, or in the fall, after an early crop of some kind has been grown and harvested.—A. B. C.

SPRAYING NOTES.

The first application of Bordeaux mixture upon apple and plum trees should be made just as the buds begin to open. This will prevent scabby apples, leaf blotch and other brown rot on plums.

On plum trees it is desirable to make a second application just after the trees are in full bloom or about the time the petals are falling. With sprays the application should be made immediately after petals have fallen. A combined fungicide and insecticide is made by adding Paris green or arsenic of lead to the mixture. Subsequent applications. Make four or five sprayings during the season. Paris green may be added at the rate of one pound to 40 gallons of mixture, and arsenic of lead at the strength of three pounds to 40 gallons of spray mixture.

The oyster shell bark louse may be controlled by spraying between what is known as the "green" and "red" stages of the louse with a kerosene emulsion or lime-sulphur wash. This spraying should be done thoroughly before the leaves start.

FACTORS IN THEIR CONTROL—How to Prevent and Treat Stings.

If the bee had not such a formidable weapon both of offence and defence, many people who are now afraid of them might be better friends with bees. As the present system of management takes the crudest possible liberties with this insect, it is important to show how necessary operations may be performed without serious risk. It is possible to handle bees in a limited way without tools or protection. Most successful apiarists find that three things are indispensable: "First, a good smoker, one that will hold over in readiness a volume of smoke, not to be used cruelly, but to control the bees of a colony under all circumstances. The majority of smokers now in use should have been in the hands of a good beekeeper, and a good one will hold down from the face by the rim of a hat, and drawn close around the shoulders and chest, so no bee can get near the face. The material must be black, light in weight, without dots or figures to interfere with the sight. Third, a hive tool. Commercial hive tools are good, or a screw-driver and wall-scraper used by paper hangers will answer.

To handle bees successfully, without honey, never volunteers an attack, but acts solely on the defensive. When swarming, bees issue from their hives in the most peaceful mood imaginable, and, unless provoked, are not at all to be handled with the greatest familiarity. The reason for this is that they always fill themselves with honey from their combs before starting out to swarm. Bees, when frightened, usually begin to fill themselves with honey from their combs. Bees can be handled with honey from their combs. Bees can be handled with honey from their combs.

GENERAL.

PROTECTING FROM LIGHTNING.

Metallic Roofs, Properly "Grounded," Are Practically Lightning Proof.

Protection from lightning is a subject that recurs with the coming of each springtime. In the violence of an atmospheric electric disturbance, accompanied by the awe-inspiring flashes of lightning so common with the thunderstorms of the north-west, there are few who have not desired the protection of a lightning-proof shelter.

The probability of an individual building being struck by lightning is really very slight, but there is always a possibility of such an occurrence and also that the stroke might be averted by the use of a lightning rod. More than that the building might take fire.

That lightning rods are a real protection to buildings from lightning has been proved so many times that their value is no longer questioned, but the possibility of obtaining experimental data is so limited that definite conclusions may be made only by the rods and conductors have never been formulated. For many years lightning rods were looked upon with suspicion in this country, because their sale for a considerable period was used as a means to defraud the unwary.

THE FORMATION OF LIGHTNING IS VERY IMPROPERLY UNDERSTOOD, BUT EXPERIENCE WITH THE VARIETIES AND KINDS OF THE LAWS OF HIGH-TENSION ELECTRIC CURRENTS HAS ESTABLISHED A FAIRLY GOOD UNDERSTANDING OF THE METHODS OF CONSTRUCTING LIGHTNING CONDUCTORS OF SUFFICIENT SIZE TO TRANSMIT THE AMOUNT OF ELECTRIC ENERGY OF THE FLASH CONTAINING IN WHICH CASE IT PASSES AWAY WITHOUT DOING DAMAGE AT ALL.

As a starting device, the electrically charged clouds pass over the earth, and when the electrical intensity becomes great enough to break down the resistance of the intervening air, the resulting discharge will pass into the earth by the most convenient path. This is commonly some high object, such as a tall building, a tall chimney, a tree or any other object that extends up from the earth. If the object is a conductor of electricity and connected to the ground, the lightning will pass into the ground without the least damage being done, but if it is not a good conductor, the lightning will be brought in an instant sometimes appalling.

Buildings with metallic roofs that are properly connected with the earth are far better protectors from lightning than can be given by rods. Buildings that are completely covered with sheet metal and well connected with the earth are practically lightning proof. Covered in this manner, buildings have been known to be repeatedly struck by lightning without the least damage. The reason for this is that the lightning, when striking, is attracted to the most elevated part of the building, and the lightning rod, which is connected to the earth, is the most elevated part of the building. The lightning rod, which is connected to the earth, is the most elevated part of the building.

It is not necessary to have a lightning rod on every building. A lightning rod is only necessary on buildings that are not completely covered with sheet metal and well connected with the earth. A lightning rod is only necessary on buildings that are not completely covered with sheet metal and well connected with the earth.

THE CONQUEST OF MENINGITIS.

Now that the pitiful story of meningitis is ended—for the curative efficiency of the Flexner serum is scientifically established, and it has taken its place alongside vaccines and diphtheria anti-toxin—it is pleasant to recall the story of its conquest in the century. The first epidemic that we know of broke out in Switzerland in 1805, and exactly 100 years later Dr. Simon Flexner was officially investigating an epidemic in New York city, and laying out a campaign for its curative and scientific conquest of "spotted fever."

There are no disheartening pages in the closing chapter of the story of meningitis. In September, 1907, Dr. Flexner was able to announce that 436 cases of meningitis had been treated with the serum in various parts of the world. Of this number 430 cases were proved to be meningitis, and 66 per cent. recovered. The remaining 383 cases (in all of which bacteriological examination of fluid drawn from the spinal canal had demonstrated the presence of the diplococcus) 295 had recovered and 88 had died. The percentage of recoveries was, therefore, 75 and the mortality was 25 per cent.

Perhaps the most striking result was shown in the case of babies. Epidemic meningitis has been uniformly fatal to infants under the age of one year. The author of a famous text-book on the diseases of children (Dr. Holt) reports that, of the twenty cases under one year treated in his hospital ward, not one recovered. But, in the series of 283 cases treated with the Flexner serum, twenty-two were infants under one year of age, and half of them recovered.

The investigations cost a very large amount of money, and the loss of some animal life—about twenty-five monkeys and 100 guinea pigs. The eventual saving of human life is incalculable. Incidentally, the serum has been found to be a check upon the unwholesome legislation growing out of the unintelligent sentimentalities of those who would prevent animal experimentation of all kinds. There are still legislators who see the wisdom of preliminary experiments being made upon guinea pigs and monkeys instead of on human beings—Edward Allen Forbes, in Harper's Weekly.

TWEEDLE-DUM AND TWEEDLE-DEE. (Auckland Post.)

A clergyman in Otago, New Zealand, recently met one of his parishioners, who was accompanied by her little daughter. Asking her, "Has the child ever been baptized?" the mother replied, "No, sir." "Then it's time that was," he said. "Very good," the mother replied, "will you do it?" The clergyman consented, named a day, and the rite was duly performed with some solemnity. He had devoutly followed the service, said, "Thank you, sir, but that's just what the other minister did when he christened her!"

POWER FROM POTATOES. (Kansas Industrialist.)

Cultured potatoes will be furnishing the power for the gang plow and the engine on the farm before many more years go by. A bushel of cultured potatoes is worth 30 cents. Turned into denatured alcohol they will be worth 72 cents. The process of extracting the alcohol is not one that every farmer can carry on, but the alcohol is there all right.

Alcohol is produced by the fermentation of sugar. Potatoes contain starch that may be converted into sugar by the addition of malt and then fermented. The potatoes are steamed until the starch is cooked thoroughly. Then the malt is added. When yeast mash is added and the sugar is fermented. What is left from the potato mash can be fed to the stock. Experiments have proved that the mash has a high feeding value.

Denatured alcohol is used for heating and lighting in the home, and for use in explosives and as a fuel for engines. For some years the tax laws were such that alcohol was too expensive as fuel for engines. For this reason, machinery has not been adapted for using denatured alcohol. But it is coming into use.

The United States Department of Agriculture has issued a bulletin recently on this subject. Denatured alcohol is being extracted from potatoes in other countries with success.

A distillery for a sort of co-operative society or as a private enterprise. A plant with a daily capacity of 8,000 pounds of potatoes would cost approximately \$12,000. This is larger considerably than would be practicable for a co-operative enterprise. The plant would have to be in a potato-growing country with good railroad facilities.

JERUSALEM'S PUBLIC OVENS. (London Chronicle.)

There are public bakeries in Jerusalem. The dough is kneaded at home and carried in great lumps to the public ovens. These are to be found in almost every street. They are gable vaults, running down below the street level. At the back of each vault is the oven, with a sort of well before its open door. In the well stands the baker, with long snails in his hands, upon which he puts in and takes out the loaves.

The oven floor is marked out in blocks, so that the baking of each family is put on a separate block. The loaves, which are about an inch thick, are of the size of a tea plate and have a hole in the centre. The baker makes them from the dough, bakes them, and returns them hot from the oven to the customer. He receives two cents for each loaf, but does not take any more until he has done one loaf for each dozen. Before starting the baking he greases the floor of the oven with olive oil. The fire used in bakeries being the great cost of fuel.

Ward Everett. address at Worcester in 1833. military efforts of the colonies were it is said that they were upheld by her country, let it not be forgotten of their exertions in this war, with the latter they have the powerful years' war was carried on in America south against the Cherokee in the western part of Virginia, on the whole frontier line from and Quebec, in the extreme north here Nova Scotia and Cape Breton lies and on the Spanish main. England and New York in this war George at Quebec, in Nova Scotia, at Havana. From the year 1754 to the single province of Massachusetts, successively, 7,000 men each year numbers of the seafaring inhabitants to the British Navy; and in addition the regular British army who a thousand. Napoleon at the summit an equal number of the French red with the population of Massachusetts in the time of Napoleon. If all the distinguished pupils in this have to run over the list of a large revolutionary army. Among them, Gridley, Pomroy, Gates, Montgomery, Washington. If I were to under-ventures, the incredible hardships, that were endured in the frontier with the savage foe—on the rear— I should unfold a tale of human to which it would make the heart

THE EFFECT OF SPRAYING. From all quarters comes the complaint that the apple trees are covered with worms which are eating leaves and buds and are asking what they will do to save their trees. These worms are the ordinary tent caterpillar which is more or less plentiful every year and this seems to be one of the "moss" years. This pest never appears in a well cared for orchard and the demonstration work done by Provincial Horticulturist Turney in several orchards is bringing this very forcibly to the attention of fruit growers near these orchards.

HER LIMITATION. (Cosmopolitan.) Senator La Follette, criticizing a trust, said: "The dignity under abuse and attack is, somehow, funny. It reminds me of a little girl who said to her mother, 'One morning she hung about the'

Walt Philosopher. He's shade, and fills himself with pink as he glances o'er the thrilling facts of his life. He has no grief and he has no tears back in his rooking chair, and with a cheerful smile, for his larder's his pie. The plan he followed you like a bald-faced horse; he swung the he knuckled down at the blacksmith's the field or town, a part of his roubles of spendthrift men, and took to the need their money as though with fire; and now he sits in his figure's in a wooden spade, and people smile as they pass, and full of vim. And where he and blew it in, in that bygone age of chairs, serene and happy and free and stuff to eat? Oh, ask the

STRIKE AT LAST

Men Will All Be Given Jobs Again Strikers Accept Terms That They Refused Previously

It is Thought Miners Will All Have Their Old Places in a Month or Two—Parrsboro People Greatly Pleased the Trouble is Over.

Halifax, N. S., May 27.—The strike in the coal mines at Parrsboro was settled on Saturday afternoon when the report was made that the majority of the men can be provided with work within forty-five days, and every reasonable effort will be made on the part of the company to accomplish this sooner.

1. All the men will be taken back to work at Parrsboro as soon as places can be found for them. It is considered by the committee that the majority of the men can be provided with work within forty-five days, and every reasonable effort will be made on the part of the company to accomplish this sooner.

2. That the award of the Longley board in regard to the working system, as adopted by the committee, has been negotiated for a settlement, was adopted by a mass meeting of the men. The committee recommended a settlement on the following terms:

3. There will be no reduction in the wages of the day hands and around the mines in the rate paid prior to August 10, 1910, and any advances in the schedule, dated January 26, 1911, shall remain in force.

4. That the reduction of 15 per cent announced by J. R. Covans and authorized on January 26, 1911, by the Dominion Coal Company in the rate paid coal producers immediately prior to the 10th of August, 1910, be reduced to 10 per cent, and in any part of the mine where, owing to conditions of the working place, a cutter is unable to earn his average wages, fair consideration will be allowed, and every consideration may be altered from time to time to meet conditions as they arise.

5. Coal cutters shall not be required to carry timber, or other material necessary to work with at the working face, such material to be supplied at the most convenient place near the working face of the bores or pillars by the company, except in special cases or cases of emergency.

6. Every man will be accorded his right to remove to any other mine in the immediate superior with a right of appeal ultimately to the president, and at any stage for the purpose he may be assigned to any other mine, or fellow workmen from the section in which the alleged grievance exists.

Gratification at Parrsboro. Parrsboro, N. S., May 27.—(Special)—There was universal pleasure in Parrsboro Saturday evening when news of the Spring Hill strike having been received. There were only twelve U. M. W. men working for the company at Parrsboro, when the strike was declared, but the falling off in coal shipments had a depressing effect. It is expected there will be an immediate increase in shipments now that work is resumed, and that the trade will expand to a large extent, and prove of great benefit to Parrsboro.

On Thursday, June 1, the census enumerators will visit a house to house visitation to obtain information for the Dominion census bureau. City census commissioner, G. K. Berton, will have twenty-five men working in the city, and will be subdivided to make the work easier. The Dominion census is taken every ten years, and the census for 1911 is due on June 1, 1911. The decisive hour of reckoning is made at 12 o'clock, midnight, on the night of June 31, and ends on May 31, 1911. That hour and everyone dying after will be counted in the population. The amount of the salaries of all employees will be noted, also the amount of insurance carried, occupation, age, etc., religion, and racial origin. No one need have any objections in answering all questions of the enumerators as they will be treated confidentially.

A section of the Census and Statistics Act, chap. 68, Revised Statutes of Canada, reads: "Every person who without lawful excuse refuses or neglects to answer, or who willfully answers falsely any questions put to him by the enumerator, shall be liable to a fine not exceeding \$100 nor less than \$10."

WOLFVILLE WOOD-WORKING PLANT BURNED

Wolfville, May 26.—(Special)—At noon today the planing and saw factory of D. A. Munroe, on Main street, burst into a mass of flames. The fire spread with rapidity. The boiler, engine, planer and other machinery were destroyed. The building and contents were valued at over \$60,000. The cause of the fire is not known. The building was owned by W. M. Black and others, and was insured for \$100,000. The fire was extinguished at 10:30 p. m. The loss is estimated at \$100,000.

FOUND BURGLAR

Choked to Death

Ghostly Discovery of New York Woman Who Visited Her Town House

Robber Caught by Neck as He Was Sliding Through Opening by Means of a Pole—Victim Was an Old Offender.

New York, May 29.—When Mrs. Esther Surut entered her home yesterday afternoon at 138 West 121 street, she found a burglar who had been choked to death. He had been hanging from the ceiling of the fourth floor of the house. Mrs. Surut was alone when she made the discovery, but she got a policeman to find out how the man entered the room.

The burglar had been suffocated. As he was about to slide down a rope which he had made fast to the chimney and fell through a skylight the prop gave way and the heavy roof caught him in the throat. He died before he could be rescued.

Last night the man was identified as George J. Tanser, alias George J. Tanser, of 218 East 118th street. He had a criminal record.

On May 5 Mr. Surut and his family closed up their house in 121st street and went down to Arverne for the summer. The burglar had been hanging from the ceiling of the fourth floor of the house. Mrs. Surut was alone when she made the discovery, but she got a policeman to find out how the man entered the room.

BANDMASTER

JONES DEAD

Passed Away Early Saturday Morning After Long Illness

WAS 73 YEARS OLD

Buried With Military Honors in Fernhill Cemetery Sunday Afternoon—His Gallant Work on Burning Troopship—58 Years in Military Life.

Monday, May 29. F. H. Jones, bandmaster of the 62nd Regiment, died on Saturday morning after an illness lasting some months. For several weeks before his death he suffered greatly but he endured it patiently and uncomplainingly and it was matter of wonder to those around him how he lived as long as he did, as his illness was of a very weakening nature. He was 73 years of age.

The military funeral of Bandmaster Jones yesterday afternoon was a very impressive spectacle and was witnessed by the thousands who lined the streets on both sides from the late home of deceased

SOMETHING SHOULD BE DONE FOR THE ADVANCED CASES, SAYS DR. McAVENEY

River Glade Commissioners Gather Valuable Information on Tour of Massachusetts Sanitariums for Tuberculosis-Municipalities Should Take Matter Up Without Delay, is Opinion-Mrs. Jordan to Visit Europe.

Monday, May 29. After spending five days in the State of Massachusetts in which they visited several of the leading sanitariums for tuberculosis patients, and also had conferences with some of the highest authorities in that state on the white plague, Messrs. Dr. A. F. McAvenny, Hon. C. W. Robinson, and Dr. D. V. Landry, three of the commissioners of the Jordan Sanitarium at River Glade, arrived in the city Saturday.

They all speak highly of the treatment accorded them by the Massachusetts authorities, and said that nothing was left undone to make their visit both enjoyable and profitable.

Among the institutions visited were the Sharon Sanitarium in Sharon (Mass.), and the Reading and Mattapan institutions also in Massachusetts. Several hospitals and dispensaries in Massachusetts were also visited.

They all speak highly of the treatment accorded them by the Massachusetts authorities, and said that nothing was left undone to make their visit both enjoyable and profitable.

LOCAL NEWS

Correspondents who send letters to The Semi-Weekly Telegraph and who wish to have them returned if they are not printed, must send stamps for return postage.

Registrar John B. Jones reports fourteen births for the week, nine boys and five girls. There was one marriage.

Harry L. Wall has been appointed to be a vendor of probate and law stamps in St. Stephen, in place of James Vroom, resigned.

Among the delegates in Truro for the annual meeting of the Association of Brotherhood of St. Andrew were Rev. R. A. Armstrong and Rev. R. P. McKim of this city.

The board of health reports nine deaths for the week as follows: Phthisis, 2; scurvy, 1; mania, 1; hemiplegia, acute gastritis, 1; premature birth, chronic bronchitis, broncho pneumonia one each.

Henry Shillington has been appointed a member of the board of liquor license for St. John county to succeed Edwin Lewin, whose term expires June 1. Mr. Golding has been reappointed a commissioner.

The Sussex Record says: "A party consisting of A. S. Moore, David B. Pidgeon, and F. C. Cowgill, St. John, were on Crawford Lake this week and secured one of the best fares of fish seen here for a long time."

Walter S. Davidson, of Moncton, the theatrical manager, has assigned and a meeting of his creditors has been called for June 3, for the appointment of inspectors, and transacting other matters in connection with his affairs.

The following have been appointed justices of the peace—John R. Kennedy, Carleton county; Arthur E. Ferguson, T. J. Poirner, Wm. G. White, and Michael J. Hachey, Gloucester county; Noble J. Wooten, Victoria county, and Charles Love, York county.

The Royal Gazette contains the announcement that the resignation of Joseph L. Allan as police magistrate of Miramichi has been accepted, and that Claude Clayton has been appointed. The neglect to gazette this change before allowed a prisoner in the county jail to obtain his freedom a short time ago.

Friends of Capt. Z. Anderson, of Anderson's Lake, will be interested to hear that he intends to rebuild on the site of his cottage destroyed by fire last week. Capt. Anderson lost his house, barn, boat, and five boats in the fire, and as he had no insurance his losses are heavy.

By using night and day crews, the C. P. R. is making remarkably rapid progress with the work of building tracks and filling in at the site of their new freight shed in Main street. Men were working all through the recent holiday and at night this week, and the work of grading the new spur to Main street is now well advanced.

WEDDINGS

Steeves-Halley. Dawson Settlement, Albert county, May 24—An interesting event took place this afternoon at 3 o'clock when Miss Gladys W. Halley was united in marriage to Mr. Talmage Steeves by the Rev. Mr. Colpitts.

Northrup-Muir. Belleisle Creek, May 25—A quiet home wedding took place at the residence of Mr. and Mrs. David Henderson, of Belleisle, on the afternoon of May 24th, when their granddaughter, Miss Ethel May Northrup, a very charming young lady, was united in marriage to Mr. W. H. Muir, son of David Muir, of Pearsonville. The ceremony was performed by Rev. H. S. Young, B. A., of Belleisle Creek, in the presence of many relatives and guests.

Darrah-Branscombe. On Wednesday afternoon, May 3, at Vernon (B. C.), Elmer L. Darrah, of Queens county, was married to Miss Rose B. Branscombe, of the same place. The ceremony was celebrated in the home of Mr. and Mrs. J. W. Darrah, by Rev. George Pringle. The groom is a prominent business man of Merritt (B. C.). The bride was dressed in a costume of old rose silk with ecru and gold trimmings. Her gown was a dress of khaki serge with sabretache and button trimmings, and a white and blue ribbon sash.

GOOD FOR ST. ANDREWS. Good words for St. Andrews were spoken by General Superintendent William Downie, of the C. P. R., who returned here Friday night. He announced that the company were to construct a new wharf and warehouse there and that preparations had been made for the opening of the Hotel Algonquin and the smaller one. The Inn, both C. P. R. hotels, were to be connected with the C. P. R. service on June 15, and the latter on June 3. Everything was found to be satisfactory.

Superintendent Downie said that he had been very much impressed with the progress of the work on the C. P. R. during the last few years. Through the enterprise of the people they were to have a new sewer system, and it is expected that a water service will soon be installed to connect with the C. P. R. service from Chamcook Lake to the Algonquin. The probability is that arrangements will then be made with the C. P. R. for water from here Chamcook Lake service, as they have ample for their own use and that of the town.

Mr. Downie says that he considers St. Andrews one of the most beautiful summer resorts on the Atlantic seaboard. Field mice comb their hair with their hind legs, and the fur seal in a similar manner spends as much time as a woman in making herself look smart.

TELLS HOW THE STEEL TRUST CAME (Continued from page 1.) ing his name, to the effect that applications had been made to the Steel Corporation to purchase this stock as the means of saving a financial institution in New York and averting a panic.
