Dear Mr. Editor,

In your paper of the 29th alt. appears a cunningly devised epistle signed W. A. Henry and J. to give publicly any necessary explana-tion in reply, this in the present instance we cannot do." I have no doubt but the public will

consider, and denounce the excuse given by their Representatives, for not giving satisfactory solution to my queries, as but a sample of the meanest tergiversation, evidently desirious to evade any public enquiry into their unprincipled and unprecedented mismanagement of the

yearly road grants. If the composition of my letter was disorderly, unconnected and unreasonable, these gentlemen, (I will call them so, as I shall not demean myself by following their unmannerly example in using low personal invectives), might with proprity decline to notice the communication, under the base excuse given. But if the composition of my letter was orderbore the stamp of a "sound mind," touching upon a subject of great importance to the inhabitants of this County, they were in duty bound to give a satisfactory explanation of the appropriations of the yearly road grants, as well as a candid answer to my queries, to their constituents, through the

The Nov. number of Blackwood's Magazine is received, and we find "old Ebony" still continuing, as danntlessly as ever, to fling his war projectiles against F.et trade and Free Church, and all conventicleship of whatsoever description. Its contents are, as usual, highly entertaining and instructive, awong which the "administrator of India" and "Iron-clad ship of war" hold a prominent place. Its great cir-culation in Britain (40,000) shows in what estimation it is held by the public,

and it generally contains, besides political and miscel'aneous articles, a serial novel of first class ability by such writers as Bulwer, Warren, and many others. This Magazine, along with the four Reviews: the North British, the London

PARENTAL AFFECTION OF THE BEAR. A she beare, with her two cubs, were

pursued on the ice by some of the men and were so closely approached as to alarm the mother for the safety of her offspring. Finding that could not ad. vance with the desired speed, she use various artifices to urge them forward, but without success. Determined to save them, if possible, she ran to one of the cubs, placed her nose under it. and threw it forward as far as possible ; then going to the other, she performed the same action and repeated it frequently, until she had thus conveyed them to a considerable distance The young bears seemed perfectly conscious of their mother's intention, for as soon as they recovered their feet, after being thrown forward, they immediately ran when on in the proper direction, and he mother came up to renew the effort, the little rogues uniformly placed themselves across her path, that they might. receive the full radvantage of the force exerted for their safety .--Scoresby.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated. weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scroftlous taint is variously caused by mercurial disease, low living, dis-orde ed or unhealthy food, impure air, filth and lithy habits, the depressing vices, and, above all, by the venereal infection. What-ever by its origin, it is hereditary in the con-stitution, descending u from parents to children stitution, descending "from parents to children unto the third and fourth generation;" indeed, it seem to be the rod of Him whe says, "I will visit the iniquities of the fathers upon their ch ldren."

Its eff cts commence by deposition from the Its eff cts commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul cor-ruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to with-stand the attacks of other diseases; conse-quently, vast numbers perish by disorders stand the attacks of other diseases; conse-quently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which de-cimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulors; their persons are invaded by this lurking in-fection, and their health is undermined by it. To cleanse it from the system we must ren the blood by an alterative medicine, and in-vigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparina,

the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is com-bined from the most active remedials that have been discovered for the expurgation of this four disorder from the blood, and the rescue of the System from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scroula, but also those other affeo-tions which arise from it, such as Ruprive and SKIN DISEASES, ST. ANTHON'S FIRS, " Rose, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTERS and SALT RHEUM, SCALD HEAD, RINGWORM, RINSUMATISM, SYPHILITIO and MERCURIAL DIS-REASTS, DESCRIPTION OF MERCENER, DES-BASES, DROFSY, DYSPEPSIA, DEFLITY, and, indeed, ALL COMPLAINTS ALISING FROM VITA-TED OR LAFURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the bloed. The particular purpose and virtue of this Sursapa-rilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.
