# REGISTRATION TOPS 1200

## PRESIDENT WELCOMES RETURNING UPPERCLASSMEN

In his annual address on September 27, 1956, in The Lady Beaverbrook Rink, the president welcomed faculty and upperclassmen back to U.N.B. With great satisfaction news of the growth of and improvements on the campus were received. Said the president:

"In 1953-54 our student body numbered 767—this year we expect that it will be over the 1,200 figure mark since we have now registered more than 450 new students. You might be interested in knowing the percentage breakdown of new students in the different faculties. Roughly it is as follows: engineers made up 45% of the new students; arts and business administration—22%; science—20%; foresters—12%; graduates and law roughly 1%."

"The chemistry building is on schedule and should be completed by next May. Work on the Engineering building is slow and we do not expect to move into the new wing until August of next year."

"The addition to the ladies residence is nearly complete. We are determined that something be done to increase the present residence accommodation for men and we shall begin to work on plans for a new residence for men with the intention that construction might begin in 1957."

### Freshmen Initiations

The Freshman initiations for this year finished last Friday, were notable for one fact: they were without doubt the quietest during recent years. Excellent organization and sensible behavior at the Sophomore Court assured no repetition of the riot of last year. The Freshman Class celebrated their initiation with the usual downtown parade, but no damage was done. At the end of the week everyone concerned seemed to be quite happy.

The week began with traditional inspections and pep rally. The Freshmen did not seem to like the inspections very much and only a few turned up; they seemed to like the pep rally even less and none of them turned up. It seemed to be a combination of the foul weather and the fact that every Freshman class seems to have the idea that the upper classman wishes to hurt them in some way. The pep rally is a valuable and enjoyable part of the week and it was a shame that they did not wait to sample it.

The new class seemed to feel the same on Wednesday afternoon, this was the first time that they were called upon to do some constructive work—we hope that this frame of mind will not remain dominant throughout the year. The dance on Wednesday night was sponsored by the Junior Class, it was a success, but the Junior Class was, unfortunately, absent from most of the organization.

On Thursday the Sophomore Court was in session, the court was well conducted by the judge—The Right Honourable Mr. Hooper and the two highly esteemed lawyers Jim MacDonald and Jim Brooks. Then came the Downtown Parade. This was followed by a Corn-cob hop in the Rink.

The Freshmen were regarded as officially initiated after the Banquet, at which the Honorary Chancellor of the University, Lord Beaverbrook spoke. And so ended one of the quietest, but one of the best organized initiations of the past decade.

In referring to the financial status of the University the following was heard:

"This year the University of New Brunswick will receive an increase of 10% in the provincial government grant. It will enable us to operate on a balanced budget of \$1,125,000 and with an arrangement for payments that has enabled us to remove from the books the accumulated deficits of former years."

The academic scope of the University shall be improved in this way:

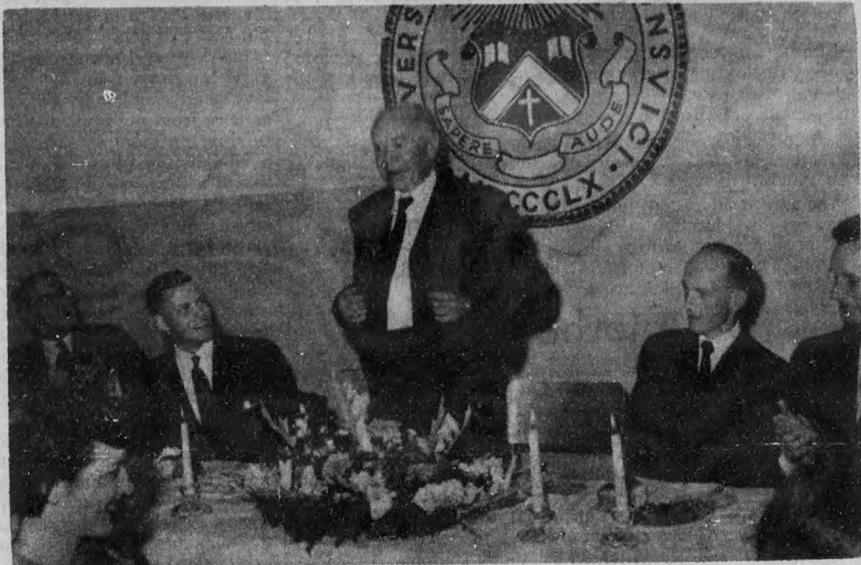

"This year we begin work at the Master's level in Mechanical Engineering, we have certain new research projects under study and we expect to give serious consideration (and I would hope approval) to the institution of a school of nursing, a degree course in physical education and an extension of work in the area of Chemical Engineering or industrial chemistry. Further, we shall continue to strengthen the work now being done at the graduate level."

"The recent report of the National Employment Service emphasizes that 'never before have business and industry placed such a premium on a college degree. Two years ago, the demand for university graduates of all courses was more or less in balance with the universities' output—today, there are more jobs than graduates in many fields of work.'"

"When the need for university graduates is so urgent and when the opportunities after graduation are so great, it is most disturbing to see the large percentage of failures in the first and second years."

### LETTERS

The "Brunswickan" welcomes letters to the Editor, to be printed in columns on this page. If there is any student who feels a comment is necessary, send it to the "Brunswickan". A letter can be signed with a pen name or initials, as long as the editor knows who wrote it. No anonymous letters will be published.

Beaverbrook '97 speaks at the Freshman Banquet. From left to right: Dr. F. J. Toole, Phil Hooper, Lord Beaverbrook, Gordon MacAllister, Dr. C. B. MacKay.

## BEAVER BECOMES SOPH!

The annual Freshman Banquet signifying the close of Frosh Week activities took place Friday evening in the Boxing Room of the Lady Beaverbrook Gymnasium. Special guest at the function was the Rt. Hon. Lord Beaverbrook, Chancellor of the University. Mr. Gordon MacAllister, Vice-President of the Students Council was dinner chairman. Other guests at the head table, included the president, Dr. Colin B. Mackay, Deans of the Faculties, Administration staff, President of the Students Council, Alumni Secretary and Editor of the *Brunswickan*.

After the dinner, Lord Beaverbrook was presented with a U.N.B. jacket. In his remarks during the presentation, Mr. Phil Hooper, President of the Sophomore Class, explained that at last year's Freshman Banquet Lord Beaverbrook was presented with a Beanie and thus made an "Honorary Freshman". "Since then", continued Mr. Hooper, "his record has been such that we now have the honor of making His Lordship an 'Honorary Sophomore'." The jacket had the numerals 97-22 emblazoned on the sleeve and an L.B. on the front. The numerals signify when His Lordship registered in Law at U.N.B. and when he received his Honorary Degree.

Lord Beaverbrook then expressed his gratitude at the presentation. He went on to say that although he was now a sophomore, his interests were still with the Freshmen. He applauded those students who enter the university determined to make a name in the annals of Canada. At one point he admonished those

(Continued on page 2)

### Notice To Sophomores

The deadline for applications for the Dr. C. C. Jones Memorial Scholarship is Friday, October 5.

This scholarship, which is offered annually by the Associated Alumni, has a value of \$250. Sophomores of both sexes who have made a first division on freshman mathematics and who do not already hold a major scholarship are eligible.

Application forms may be obtained at the Alumni Office in the Memorial Student Centre.

## Shaw Suspends Residence Initiations

Initiation at the Lady Beaverbrook Residence was suspended last Wednesday night. Prof. A. Shaw, Dean, in making this announcement, stressed that it was not a temporary suspension but a permanent one.

The direct cause of the action was in the interests of health. Prof. Shaw reported that several of the frosh became ill during the initiation period. Although this illness consisted in the most part of colds, it was felt that precautions should be taken.

In addition Prof. Shaw expressed his dislike of what he called "too much humiliation." "Too much emphasis is placed on humiliations of the student, and not enough on showing the new students the value of university life," Prof. Shaw stated. "Also," he continued, "students in residence seem to get initiated twice, while those living in town emerge relatively unscathed."

## Modern French-Canadian Artists to be Featured

The National Gallery of Canada's exhibition "Some French Canadian Painters" opened its tour of the Maritimes on Sunday in the Art Centre, where it will be on view for two weeks.

This important collection is best described by the French term "avant garde." It is characterized by high craftsmanship, technical competence, and mannerism.

"Here's the man who's been causing all the trouble", Jim Brooks seems to be saying at the Sophomore Court, held in the Gym last Thursday. The looks of admiration come from Jim MacDonald, while the judge, Phil Hooper is totally unconcerned.

VOL. 89 FREDERICTON, N.B. OCTOBER 2, 1956

A Little More Co-operation

On Thursday evening following the Sophomore court about 150 freshman embarked on the traditional march down town. This year's parade was marked by no exhibitions of vandalism or destruction as has been the case in some previous years.

This was, then, the order of things on Thursday evening. This good spirit and student jubilation is a good thing and should not be discouraged if it is carried out in the fashion it was this fall.

The parade was marred by one thing—the actions of the City Police. It would not be too harsh to assert that their activities were little short of stupidity; that their incompetence in handling affairs of this calibre was painfully obvious.

In addition, this sort of "control" could disrupt recent work to make student activities more orderly, and might result in a great deal of trouble in the future.

... Growing Up

It is not without some concern that one views the phenomenal increase of students this year that threatens to advance enrolment at U.N.B. to twice the figure of a few years ago.

There is sufficient inconvenience now to warrant caution in the future. It is with great satisfaction that we note the reference made in the president's address to a men's residence to be started next

summer. Either we are to embark on a tremendous construction scheme, or more practical perhaps, limit enrolment through higher standards and attempt to furnish current students with adequate facilities.

STOP and THINK!

It is with regret that we note a letter in a recent issue of the Gleaner concerning what is rightly regarded by intelligent people as a disgusting phenomenon—racial prejudice.

Canada's name is synonymous with the concept of Freedom throughout the world today. We enjoy a measure of freedom and constitutional tolerance unparalleled anywhere.

If a person will stop and think, he will realize—that those very people, who, because of their skin are regarded by some as belonging to a lower species, constitute over half the population of the world;

The cure is education; international education. We have the facilities for this education in the United Nations. They should be utilized in such a way as to reach all levels of the community and thus promote good will and tolerance in a divided world.

For Another Year

Freshman week is over for another year. Judging by the record number of freshmen this year, it was the sophomores who were relieved and not necessarily the freshman class ever initiated.

The one criticism of the frosh activities this year stems from the freshman. Some students feel that they had not enough spirit.

The traditional sophomore court was held Thursday night in the Boxing Room. Apart from a few roars from the frosh everything was carried out smoothly and professionally.

Now that these days are over, the frosh can settle down to a normal life at university. By this time you should all know your classmates (which is one of the purposes of the week).

DEBATING

Many times in the course of history, great questions have been contested in the arena of formal debate. The debates of Demosthenes in ancient Athens played a vital and often decisive role in the politics of success.

**ARCHITECTS OF MODERN THOUGHT**

*Editor's Note:* This article inaugurates a series of talks broadcast by the C.B.C. during the '55-'56 season.

**ALBERT EINSTEIN**

By George Volkoff, Professor of Physics,  
University of British Columbia

"The most incomprehensible thing about the world is that it is comprehensible." So wrote Albert Einstein. When asked as to how he arrived at his theory of relativity, he replied that he had discovered it because he was so firmly convinced of the harmony of the universe. He worked all his life with a definite plan in mind: to understand the physical world starting with a minimum number of assumptions consistent with our observational experience. The word Architect is thus a particularly one to use when speaking of Einstein.

But architect though he definitely is, I wish to emphasize his unique role as an architect of modern scientific and philosophic thought, rather than of modern thought at large.

His work did not add new phrases like the "missing link", "the class struggle", or "inferiority complex" to our daily speech. The ideas for which he will be always remembered were not of the kind which "lash men to action". Armies have not clashed, and are not likely to clash in attempts to affirm his ideas or to deny them. Nevertheless, in their proper sphere—that of our intellectual conceptions of the physical world in which we live—his ideas have brought about two major revolutions, and have helped to launch a third one, all of them as far reaching as any that have been recorded in the whole history of human thought.

What I have just finished saying is not meant to suggest that the name and face of Einstein are not familiar to the widest possible circles of the general public. In fact his one major contribution to our everyday speech is his own name. How many of you have not heard some local budding genius described as a "second Einstein"? Quite early in his life, Einstein had become for the common man a symbol of the highest scientific and intellectual achievement, and had remained a legend in his own lifetime until his death on April 18, 1955 at the age of seventy-six. He made a tremendous impact on the minds of multitudes of people who have very little inkling of the meaning of his revolutionary ideas.

If this is so, then to assess Einstein's influence on our world we have to speak of him not only as a philosopher-scientist, but also as a man, and a symbol.

At the age of sixty-seven Einstein wrote in his autobiographical notes: "the essential in being a man of my type lies precisely in what he thinks and how he thinks, not in what he does or suffers."

In keeping with these thoughts I am sure Einstein would have preferred the following remarks to have been restricted to comments on his scientific and philosophic contributions. But I am also sure that Einstein had a deep insight into the reason for the wide acclaim by the general public of men like himself when he said in a different connection: "the moral qualities of great personalities are perhaps more significant for a generation and for the course of history than purely intellectual accomplishments".

As a compromise between these two different attitudes, I shall first merely indicate in a very few sentences the general scope of the three intellectual revolutions connected with Einstein's name: I shall try then to give a picture of the man who caught the public imagination. In conclusion I shall return to a more detailed discussion of Einstein's principal contributions to modern scientific thought.

In the mind of the general public the name Albert Einstein is insolubly linked with one term: "relativity". Actually there are two quite distinct theories bearing that name: his special theory of relativity published in 1905; and his general theory of relativity published in 1916. These are the first two revolutions in scientific thought that I referred to earlier, both of which Einstein carried out singlehanded. The third revolution which Einstein helped other physicists to launch is the quantum theory. Although his connection with the quantum theory is much less well known to the general public, his contributions to this field are every bit as important as the two relativity theories. In fact it is for a contribution made by Einstein to the quantum theory in 1905 that he was awarded the Nobel Prize in 1922.

What was the general scope of these three revolutions? At the risk of tremendous over-simplification we may say that through special relativity theory Einstein revolutionized our concept of time, through general relativity theory he revolutionized our concept of space, and through quantum theory he helped to revolutionize our concepts of matter and of radiation. I shall ask you for the time being to accept on trust as multitudes have done the importance of Einstein's revolutionary ideas in science, and to join me examining a brief portrait of the man.

*Editor's Note:* Continued Friday.

By approval of the Senate and sanction of the Royal College of Heralds, the above insignia has been adopted as the official Coat of Arms of the University of New Brunswick. This marks the first time in the history of the Provincial University that a Coat of Arms has been formally granted. Prior to this, the only insignia was the Great Seal of the University, granted by the Act of the University of New Brunswick in 1859. During the intervening years, little had been accomplished in the way of acquiring a Coat of Arms, until four years ago when a Sub-Committee of the University Senate was set up to consider designs and suggestions for a Coat of Arms.

The design consists of Gold Beavers on a crimson background, a Black Ship on a gold background and the Book of Learning, inscribed with the words "Sapere Aude". In the words of the official proclamation issued by the College of Heralds: "Per chevron Gules and Or in chief an open Book proper inscribed with the words SAPERE AUDE in letters Sable supported by two Beavers sejant respectant Gold and in base a Lymphad sail set pennon and flags flying and Oars in action also Sable." The proclamation is now on display in the reading room of the Bonar Law Bennett Library.

The Beavers, representative of industry are symbolic of Canada. The ship is adapted from the official Coat of Arms of the Province of New Brunswick.

The Royal College of Heralds is now preparing a full color portrait of the Coat of Arms. The university has ordered a flag inscribed with the striking insignia.

**DRAMA**

We might safely assume that people come to college to obtain an education which can be put into effect after graduation for the earning of a living. But it should not only be an academic education that the university contributes to a personality. A complete university education must develop the mind socially as well as academically. Two of the most important contents of a broad social background are self-confidence and poise. These are not going to be obtained by attending lectures alone. They must be developed during extra-curricular activities.

There is a Society on the campus which provides the opportunity to fulfill these two important objectives of a university career. This is the Drama Society.

Although this society is one of the oldest on the campus, it has been producing plays since the end of the last century. It is a young and energetic group which enjoys itself whilst carrying out its work.

**SEARS, HALLETT SCORE**

In the university intramural golf match held Friday at Fredricton Golf Club, John Sears and Charlene Hallett triumphed.

Sears shot a sizzling 75 to come up with his second championship in a row. Miss Hallett, in her first year at UNB, went around in 89. Following Sears and Miss Hallett were Ted and Margot Pond with 80 and 110 respectively.

On Sunday afternoon, the annual faculty-students golf match was held. The faculty ladies trounced coeds 6 1/2-3 1/2 while the male students trimmed the professors 34-32.

Notables among the faculty and members of the administration represented were: the president of UNB, Dr. Colin B. Mackay, the business manager, Beverley F. Macaulay; the dean of engineering, Dr. E. O. Turner; professor of law, Dr. Joseph Sears, and the athletic director, P. C. (Pete) Kelly.

**46 BEGIN SWEATING**

Don Nelson, UNB football coach, expects to field a strong team for the opening game of the season this Saturday in Moncton against the Hubs.

In an interview with the Brunswickan, Coach Nelson said he was very pleased with the turnout of 46 candidates at opening practice sessions. The 46 prospective Red Bombers are trying out for 34 spots.

However, the coach would not commit himself on the squad's chances in the New Brunswick Canadian Rugby Football Union race. He said it was too early to venture an opinion since he will be relying heavily on freshman players, many of the experienced members of last year's NCRFU championship crew having left the university last spring.

When asked about the strength of the Bombers' line this year, Nelson said that it was particularly on the line that he would be depending on freshmen. Only two or three veteran linemen will be in uniform this season.

As for the back field, the coach is very optimistic.

**Intramural Slate Busy**

Any UNB student who wishes to keep fit, learn a new game or increase his skill in his favorite sport has a golden opportunity to do so. In addition to supporting varsity teams, the University also has organized intramural soccer, softball, basketball, hockey, water polo, bowling, hand ball, and squash leagues. Skating, swimming, skiing, tennis, badminton and gymnastics also beckon students seeking recreation.

**NELSON BRINGS FINE MARK TO UNB**

The University of New Brunswick's athletic department has acquired a new full-time coach to look after the varsity football and basketball teams for the current college year. He is 29-year-old Donald Kerr Nelson, a native of Saint John who now considers his home to be Salisbury, N.B.

Nelson replaces Gerard (Moose) Flemming, who coached these teams during the past few college years.

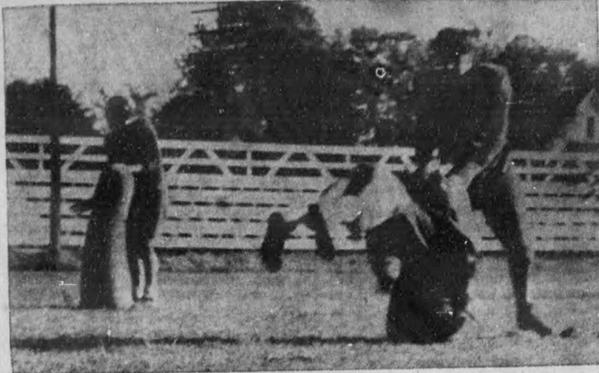

An engaging, broad-shouldered individual with a dark, crew-cut head of hair, Mr. Nelson received his education in Quebec, New Brunswick and Massachusetts. He went to Lachine High School and Montreal West High School, graduating from the latter in 1947. Returning to his home province, he took his senior matriculation at Moncton High School in 1948.

He then enrolled as a freshman at Springfield College, Springfield, Mass., where he majored in physical education, with health and biology as minor subjects. He received his bachelor of science degree there in 1952.

**To Quebec**

Upon graduation, Nelson was appointed director of physical education for Three Rivers High School in Quebec, a position he held until his UNB appointment.

As an athlete, the new coach, who stands six feet one in his stockings, has had an extensive record. He played football and basketball at his high school in Quebec and Moncton. In 1948, he was chosen all-star guard at the provincial high school basketball tournament held in Fredericton. In the same year, he played football with the Moncton Trojans.

The above picture shows some of the candidates for U.N.B. Red Bombers getting ready for the first game of the season this Saturday at Moncton. New Bomber coach is Don Nelson.

ton Trojans.

At Springfield College as well he took an active part in such sports as lacrosse, football, basketball and baseball.

On the football team, he occupied the positions of offensive end and defensive half-back.

**Outstanding Mark**

Nelson's teaching career at Three Rivers was a rewarding and distinguished one. Under his coaching, his high school won the St. Maurice Valley football championship in 1952, 1953, 1954. His charges also won the Quebec provincial basketball championship in 1954 while in 1953, they copped the St. Maurice Valley Track and Field championship.

While teaching in Three Rivers, Nelson also played for the Three Rivers Braves for two seasons in the ORFU.

Of his plans for UNB, Don admits that he hopes to have the Red Bombers playing the split-

style of football. "This is a very popular formation," he says. In the split-T style, he explains, the quarterback operates up and down the line of scrimmage on option plays and the offensive line is split according to the defensive formation.

"This style will give us a good deal more ground action than air action and from the point of view of the players, as least, it will provide a more interesting game," he says.

Why does he want to use this formation at UNB?

"Well, the Edmonton Eskimos use it—and they've won the Grey Cup two years in a row," he grinned.

**AAA NEEDS SIX**

Six assistant managers for UNB sports teams are required immediately. That's the word from Eric McAlary, president of the Amateur Athletic Association.

Any people interested in the positions are asked to see or phone McAlary as soon as possible. The A.A.A. prexy lives in Room 109 of the Lady Beaverbrook Residence for Men on the campus. The phone number there is 9004.

Needed are assistant managers for football, track, men's basketball and ladies' basketball (one each) and hockey (two).

**WINS CORBETT MEDAL**

The Kenneth Corbett gold medal for the best all-round athlete at UNB was won during the last school year by J. R. G. (Tex) Doiron, '57, civil engineering student from Fredericton.

Doiron has been a star football and basketball player and a member of the track and field team.

The announcement of the award was made at the annual athletic banquet in April.

**MANAGER NAMED**

The Amateur Athletic Association has announced that Ellsworth Briggs will be manager of the UNB Red Bomber entry in the New Brunswick Canadian Rugby Football Union this season.

**RITCHIE TO ASSIST COACH**

Coach Don Nelson of the U.N.B. Red Bombers has announced the appointment of Bill Ritchie as assistant coach.

Ritchie is a graduate of MacDonald College near Montreal. While attending college, Bill became acquainted with the grid game both as a player and coach. This season, Assistant Coach Ritchie will be mainly concerned with the back field while Head Coach Nelson will concentrate on the linemen.

Along with Ritchie, Coach Nelson will have two other assistants. They are Joe George and Mike O'Connor. Both have had valuable experience and should prove great assets for the Bombers, Nelson said. George will help with backfield coaching while O'Connor will train the ends.

You are always welcome at the
