H. Y. FARR.

WE NEVER STOP

Going through our stock sorting and sifting out all goods that have not sold as readily as we anticipated. We are verging on what is generally called by the dry goods men, dull days. We are determined to have no dull days if low prices and high class goods will make them lively. To-day we would call special attention to our stock of Dress Goods. The slow sellers must go. Every piece in fact must be sold. We use this space from week to week to tell you of the merits of our stock, but what's the use in telling you if you never take the time to look. Looking leads to buying and it will also convince you that we are doing exactly as we advertise.

LEWIS & PATTERSON.

P. S.—Buy the B. & C. Corset every time.

MUST BE SOLD

We continue marking down additional lines, which must be sold off.

COUNTY NEWS.

INTERESTING LETTERS FROM OUR STAFF OF CORRESPONDENTS.

A Budget of News and Gossip—Personal Intelligence—A Little of Everything—Things well Mixed up.

QUAIN.

MONDAY, July 28.—The rattle of the moving machine is heard on every hand and soon the click and kick of the hot-binder will also be heard. This hot-binder and wind is ripening the small grain prematurely and will shorten the crop materially.

Miss M. Hagerman and Miss Jessie Barrington, of Elbe Mills, paid us a visit last Sunday.

Mr. Logan, of Toronto, is here at present setting up binders for the Massey Mfg. Co.

The corn is beginning to show its tassels.

If Stubb and Timid would use a Webster's unabridged dictionary their news would look better in print.

MALLOYTOWN.

MONDAY, July 28.—Miss Nettie and Maude Judd leave here on Monday next for Winnipeg where they intend spending a year. Miss Maude will stay with her sister, Mrs. Buchanan, while Nettie will go into evangelistic work. They will be greatly missed by the young people, especially in the prayer meeting and in the church.

There will be quarterly meeting here on Sunday morning next, beginning at 10 o'clock.

Mr. and Mrs. Isaac Cole have returned from Oswego, where they spent a week with Mrs. W. Vanastine, a sister of Mr. Cole.

Rev. L. A. Betts preached in the Methodist church here on Sunday morning last.

Mr. O. J. Fetter and family have returned to Malloytown.

Miss Ida Purvis, daughter of Dr. G. Purvis, of Portash, is spending a few weeks here at her uncle's, Mr. E. Purvis.

ELLISVILLE.

SATURDAY, July 26.—The farmers are so busy with their haying now that even the boys cannot get time to play ball, except on rainy days. In evening hours are now the order of the day.

At the late entrance examination held in Ganagoque three candidates from our school were successful in passing. Much credit is due our teacher, Mr. Haddon, for the way our school has advanced during the past year and a half.

The bi-weekly services held in the school house are usually well attended. We are highly pleased to hear the reverend gentlemen with us and trust that they will continue the services as long as possible.

The berry-pickers are on the alert this week and are reaping a plentiful harvest.

Thursday being a wet day the boys got together and had a rarin' game of baseball. Go it, boys.

NEWBORO.

MONDAY, July 28.—A few evenings ago the "Pirate" after filling himself with a composition extracted from plug tobacco and bluestone, amused himself by stoning the citizens who happened to be on our streets after dark. As we are entirely deprived of police protection, each citizen will have to be his own slayer.

Messrs. Field and Gorline have completed their contract of building the road to the station. A job somewhat similar to that would be a great improvement to Carleton St.

Messrs. Luby & Kennedy, of Lombardy, are drilling wells in our midst. They are sinking one for Mr. H. Kilborn at present.

Mr. Wm. Simmons, who has been dangerously ill some time, is able to be around again.

Miss Jennie Elliott and sister, of Hamilton, are visiting at Mr. Robert Bell's. They intend remaining through the holidays.

The steps placed over the sidewalk on Simcoe St. should be looked after and removed at once. That sidewalk is narrow and dangerous enough without encumbering it with such a nuisance.

GREENBUSH.

MONDAY, July 21.—The potato bug has struck town again. It was thought by some this spring that he had run his race, but he has got here all the same.

Spring grain on high land is looking remarkably well. Old meadows are thin, but new ones are good.

The doctor at the Buster house, who professes to heal by means of a power said to have been transmitted to him by his infancy by the injection of a certain worm in his wrist, also said being the seventh son, has two patients being operated upon. One is a young man, Brown by name, from the vicinity of Prospect. The other is a young lady who resides back of Perth. This young lady, who is sorely afflicted, has not stood on her feet for the past four years. She is said to be gaining in strength very fast. We hope it to be so, but have no faith whatever. Such faith is held only by the ignorant.

About a week ago Mud Creek Charley, having come to the conclusion that he had remained in single blessedness too long enough, and as the old man had not yet supplied him with his share of real estate, he proceeded to supply himself with a supply of bug juice. He returned to the old parental abode, and not being received in a manner which was suitable to his demands, he overturned stoves, beds, cupboards and smashed all the furniture, delf, windows, doors, &c. that

were in the old domicile. On the Sabbath following he resumed hostilities and cleaned out the whole rancho. The old sire and the rest of the family took to the woods for refuge. On the following morning scouts were sent out suing for peace. Finally the old man procured the services of a conveyancer and gave to the said Charley, his heirs, executors and assigns forever, 100 acres of his inheritance. Good for Charley.

WARBURTON.

SATURDAY, July 26.—The sharp click of the reaper will soon be heard.

Mr. John Stacey has purchased a pair of the best steel binders.

On Monday, while Mr. J. Griffin, local agent for the Massey Mfg. Co., was setting up a binder on the farm of Mr. Harvey Austin, he was arrested by an officer of the law and taken to Brockville.

Our friend the school teacher is learning the blacksmith trade. On entering the shop the other day we found him standing on his head in a hole in the corner, where he had been precipitately hurled by the breaking of a steel bar. Did you think you had hold of a kid, Robt?

Mr. E. J. Webster drove up to the village the other evening with his fine young frisky team. Look out, girls, Ed's a member.

We are pleased to report that Squire McNamee, of Mt. Pleasant, is convalescent.

A number of surrounding farmers attended Mr. E. M. Fair's moving day on Friday.

One day recently we paid a flying visit to McCrady's tannery, beautifully situated on Wiltsie creek. We were welcomed by Mr. McCrady who proceeded to show us through the building, explaining to us the various steps taken in the tanning process. He has on hand about one thousand hides and expects to handle over five thousand this year. In looking over the factory books we noticed the names of gentlemen from North Augusta, Brockville, Rockspring, Delta, Seely's Bay and Ganagoque; showing Mr. McCrady's popularity as a tanner. A noticeable characteristic of this tannery is the absence of that obnoxious odor prevalent in most tanneries.

We heartily agree with your last week's correspondent from here, Warburton needs a revival, as the Sabbath is but little heeded by some of our young men.

On Sunday last our energetic young innsmith drove thirteen miles to meet a chessmaker to settle a dispute about a valuable piece of wabb on which the chessmaker had—well—got left. The matter having been satisfactorily settled, the innsmith grossly returned, unconsciously singing this unpromised lay:—

I love my darling B. Her farm I now own see; She is so nice and gay, And has so much to say, That I can never believe She has true love for me. For she's a smashing dove, And she'll be my joy, I'm proud to call her mine, I'll never let her go, I'll never let her go.

AUGUST CHEESE.

The dairy bulletin from the experimental farm, Ottawa, just issued, contains some good hints on the making and curing of cheese during the month of August. Attention is called to the necessity for perfect cleanliness both within and without the factory; the bulletin treats the subject under the following heads:—

In the Making-room.—This month seasons the milk and becomes numerous and troublesome. Some afternoon after the cheese are in the hoops, it will be a good plan to close up the making-room windows and doors, and to burn a small quantity of sulphur for the purpose of fumigating the place. If a tablespoonful of alcohol be mixed with the sulphur, it will burn more freely. Care must be taken to prevent the fumes from getting into the curing room. The tin of the milk vats and the insides of the sinks should also be washed afterwards before being used. All vats, presses and utensils should get a thorough quarterly-cleaning-up early this month.

The use of solution of borax on the hoops will help to prevent mouldiness on the sides of the cheese.

Every cheese-maker should persistently fight untidiness and filth in every form, and he ought to have a woman's passion for cleanliness and a similar antagonism for dirt.

In the Curing-room.—There will be difficulty in curing the cheese made during July at a sufficiently low temperature. Ventilation of the room during the early mornings, as well as during the evenings and nights, will be of benefit. Floors should be sprinkled with cold water morning, noon and evening. While the cheese are being turned on the shelves there should be an abundant admission of light. August is the month when the "skippers" are apt to do damage. A plentiful shaking of fly powder in the room before it is shut up for the day will destroy the cheese flies.

Cheese boxes should not be stored in the curing-room. The odor from the elm wood penetrates the cheese and affects their flavor. While the cheese are in the room, the milk is richer and less in quantity, there will be an increased temptation to "even up" by the addition of water, or to "even down" by the removal of cream.

You will be doing the community a moral service, as well as the cheese trade some good, by reminding the patrons that the Dominion Act of adulteration of milk is in force and will be enforced against all discovered to spare just at present will be given credit on signifying that they wish the paper continued. Postage stamps taken on subscriptions.

neglect to supply an abundance of pure cold water. Cold evenings and milk should be most thoroughly aired immediately after it is strained. The making of cheese for exhibitions is usually undertaken during the first two weeks of this month. Send a circular to every patron, making mention of these matters that are referred to in this bulletin, and inviting their co-operation, in order to aid you in the manufacture of cheese fine enough for exhibition and prize-taking. If some patrons pay, no heed, and no improvement results don't get discouraged. Keep right on insisting on a better state of things in their practice.

Making the Cheese.—When the evenings are cool and the milk needs ripening, don't fail to leave it in the vat until it reaches the proper maturity, before the rennet is added. Use enough rennet to coagulate nature enough to permit of cutting in forty minutes when set at 88° Fahr. Dilute the extract to the extent of one part of water for every vatful of milk, and then mix it thoroughly by vigorous, rapid stirring.

When you are troubled with gassy curds, allow a development of acid, such as will be indicated by threads from the hot iron test a quarter of an inch long, before the removal of the whey. It is a good plan to run most of the whey off at an earlier stage, and to leave only enough whey on the curd to permit a free stirring of it.

After the whey is drawn, stir the curd thoroughly and make provision for keeping it warm. When the curd sink is used, if need be to retain the heat put the curd back into the vat, but let the temperature be kept above 94°. Frequent turning and aeration will facilitate the development of acid, providing the temperature is maintained. After the curd curd has been used, the curd should be stirred and aired for fifteen or twenty minutes before the application of salt. From 21 to 22 pounds of salt per thousand pounds of milk should be added to curds that are fairly well dried by the previous stirring. They should be put in the hoops within twenty minutes after the salt has been mixed in. Presses should be applied very gradually. The cheese should be banded neatly when they are turned in the hoops within two hours after they are put in the press. They should again be turned in the hoops sometime in the following morning. Where practicable, cheese should be pressed for at least twenty hours.

Endeavor to get anyone who sends milk to your factory, or who is contemplating the development of salt per thousand pounds of milk should be added to curds that are fairly well dried by the previous stirring. They should be put in the hoops within twenty minutes after the salt has been mixed in. Presses should be applied very gradually. The cheese should be banded neatly when they are turned in the hoops within two hours after they are put in the press. They should again be turned in the hoops sometime in the following morning. Where practicable, cheese should be pressed for at least twenty hours.
