NO. 14

### Fatal Railway Accident

**Maritime Express Runs off Track at Grand Lake, near Halifax.—Engineer and Fireman and Tramp Student Killed.—Bridgetown Citizen Severely Injured.**

The Maritime Express from Montreal and due at Halifax at 1.30 o'clock on Wednesday, 10th inst., ran off the track at Grand Lake, twenty-three miles from Halifax, and the engineer and the fireman of the Express and one unknown man, who was stealing a ride under the mail car, met death in the accident.

The train was in charge of Conductor Berry. While passing Grand Lake the engine jumped the rails, taking with her the mail and baggage cars, plunging over a fifteen feet embankment. The engine toppled over, while the two cars went down on their side. The second-class car went off the track but did not go over the bank. The passengers were shaken up, but not injured. The first-class cars and Pullman did not leave the rails, and only one of the passengers was injured.

Engine No. 406, which was hauling the train, jumped the rails and ploughed along the sleepers for about one hundred feet, then striking a curve, turned over and jumped into Grand Lake with its head turned towards the direction from which the train had come, carrying to their death the engine crew, Driver James Clark and Peter McGill, of Halifax.

#### DIED AT THEIR POSTS.

Besides the men on the engine who died at their posts of duty, a tramp, who was "beating" his way into Halifax, was killed, and Baggage-master Andrew McKim, of Moncton, Express Messenger Johnson, of Chatham, and Archibald Kinney, a commercial traveller, whose home is in Bridgetown, were seriously injured, and the passengers, to the number of about fifty, were more or less shaken up.

#### AFTER THE DISASTER.

The first man to reach the badly injured and to locate the dead was Brakeman J. E. Moore, of Moncton. Speaking with a Herald reporter, Mr. Moore gave a graphic description of the horror, and with the characteristic belittling of the true railroad man of his own part in the assistance, told of the rescue.

Continuing, Mr. Moore said that as soon as the train stopped he rushed to the baggage car, and there found Mrs. Kinney, the injured commercial man, lying across two trunks. His arm was horribly twisted, and he was sure that it was broken.

He took the unfortunate man from his agonizing position, but he bravely thought of the others.

"Don't bother with me," Mr. Kinney said. "I'm feeling pretty good. Go help the other man" (meaning Mr. McKim).

Among the passengers on the wrecked train was Dr. W. M. Rochester, of Toronto, General Secretary of the Dominion Lord's Day Alliance, en route to Halifax, where he is the guest of the Rev.

Archdeacon Armitage. To a Morning Chronicle representative he told the following story of the wreck:—

"I had just finished lunch, and had taken my seat in the rear car when there were two or three violent jerkings of the train as if the emergency brakes were being applied, which created a feeling of excitement and suspense until the train came to a complete standstill, then we realized that something must have happened. Upon going out we discovered that the engine had disappeared. One car, stripped of its trucks, was thrown at right angles to the track, with the front end in the water; this was the baggage car. The express car was thrown at right angles in an opposite direction, and the next car, a passenger coach, was thrown slightly from the track against the bank, crushing in the front vestibule.

#### SCENE OF THE ACCIDENT.

"The train crew was busy at the forward end, and some of the passengers endeavored to make their way to the front. It looked from the outset as if all the passengers were safe, as no passenger car was badly injured. The accident happened at a curve of the lake. At one point of the curve was a boat-house with a number of small boats, and at the other point of the curve lay the engine. A view of the engine was impossible to those in the rear on account of the baggage car, one end of which was on the bank, and the other in the water. The easiest way to reach the front was by boat. One of these, the only one available, was utilized by Rev. C. W. Vernon and another gentleman, who reached the engine and found the body of the engineer. They thought at first that he was alive, but later found it improbable, life being quite extinct. His injuries were so great that death must have been instantaneous. The body of the fireman was not to be seen.

"The tramp making his way on the truck of the postal car met instant death, his body being badly mangled. Then it was discovered that only three men met with anything like serious injury. One was the express agent, who suffered severe bruises about the head, one wrist severely sprained; the other had his body cut and some severe bruises. He was brought to Halifax. Another was a passenger (Mr. Kinney) who had gone to the baggage-car on an errand, and arrived there just as the accident happened. He suffered a broken arm, sprained wrist and some slight contusions. The baggage-master suffered perhaps the most serious injury, having several ribs broken and being badly cut about the head and face. He was rendered unconscious, but recovered, and along with the other one injured in his car, was taken to the boat-house, where he

### Departure of Rev. J. A. Hart from Lawrencetown

The friends of Rev. J. A. Hart, accompanied by the Lawrencetown Band, met at the parsonage on Monday evening to bid good-bye to Mr. and Mrs. Hart. After the usual good-byes had been said Dr. Hall presented Mr. Hart with a purse of crisp banknotes from his friends, Baptists, Episcopalians and Methodists, who united in this testimony of their friendship for Mr. Hart and his good wife. Rev. Mr. Hart has been an excellent and active citizen engaged in every good work for the uplift of the community. The school and local school gardens and exhibition have found in him a friend and constant worker. He has won from his friends here the kindest expression of good will for his future prosperity and usefulness. —COM.

### Annapolis Barrister Weds

Harbor Grace, Nfld., July 9—One of the prettiest weddings ever celebrated in this town, was celebrated yesterday, when Daniel Owen, of Annapolis, the youngest barrister in Canada, eldest son of Judge and Mrs. J. W. Owen, was married to Sarah Gertrude, daughter of Mr. and Mrs. Thomas Gorhorne. Mr. Gorhorne is superintendent of the Direct Cable company. The ceremony took place in St. Paul's church, which was tastefully decorated for the occasion by the girl friends of the bride, and was performed by the Rev. Canon Noel. The church was filled with the youth and the beauty of Harbor Grace and the surrounding districts. The bride, who is one of the most popular and beautiful girls in this part of the island, was unattended. She wore a travelling dress of brown broadcloth with hat to match. Breakfast and reception followed at the home of the bride's parents. The bride was the recipient of many handsome and valuable presents. The newly married couple were accompanied to the train by a great crowd of people. No daughter of Harbor Grace ever left the district with more universal feeling of regret and heartfelt wishes for perfect happiness in her new life and new home from her many friends. Mr. and Mrs. Owen crossed the island to Port au Basque and after spending some time on the Bras d'Or lakes will spend several weeks at Hubbard's, previous to settling down at Annapolis.

rested until the arrival of the Maritime from Halifax.

"There were two purses on board the wrecked train, Miss Pollette, of the General Hospital of this city, whose home is in Cumberland county, and Miss Giles, on her way to Halifax for a visit. Both did splendid service in giving substantial first aid to the three injured men, and when the doctors arrived on the trains from Halifax and Truro, they found their patients very satisfactorily attended to. Two of the men were brought into Halifax, and the baggage-master was taken to Moncton.

"The first train arriving at the wreck was a local from Halifax to Truro, and immediately the passengers were transferred and brought to Halifax.

"The apparent cause of the accident was a broken truck on the engine, or something of that character, as the ties back of the train were heavily marked.

"A storm broke just a few minutes previous to the wreck and the caring of the wounded was performed amid a heavy down-pour of rain, accompanied by vivid thunder and lightning."

### Tennis Tournament.

The Middleton Tennis Club visited Bridgetown on Saturday afternoon last to play a match game with the Bridgetown Tennis Club, after which they were entertained at the home club. The visitors arrived by auto and returned home the same evening. Following is the score:—

**GENTLEMEN'S DOUBLES.**  
LeMoine Ruggles, H. B. Hicks vs. J. R. Harrison, G. F. Fisher Score 6-1, 6-2.  
A. J. MacLean, B. J. Porter vs. A. M. Parsons, H. W. Dodwell Score 6-4, 6-4.

**LADIES' DOUBLES.**  
Miss Louise Ruggles, Mrs. F. R. Fay vs. Mrs. J. R. Harrison, Mrs. A. L. Bishop Score 6-1, 6-4.  
Mrs. H. B. Hicks, Miss Bess Ruggles vs. Miss Young, Miss Balsor. Score 6-1, 6-2.

**MIXED DOUBLES.**  
LeMoine Ruggles, Louise Ruggles vs. J. R. Harrison, Mrs. J. R. Harrison. Score 6-2, 6-0.  
H. B. Hicks, Mrs. F. R. Fay vs. H. W. Dodwell, Miss Gullivan. Score 6-3, 4-6, 6-1.

Ronald Ruggles, Mrs. H. B. Hicks vs. Dr. A. L. Bishop, Mrs. A. L. Bishop Score 3-6, 2-6.  
B. J. Porter, Miss Manners vs. C. F. Fisher, Miss Young Score 6-1, 6-3.

**GENTLEMEN'S SINGLES.**  
LeMoine Ruggles vs. A. L. Bishop Score 6-0, 6-0.  
H. B. Hicks vs. A. M. Parsons Score 2-6, 6-4, 6-3.

Total score Bridgetown 119—Middleton 60.

### HYMENEAL

#### BALCOM—PICKELS

The Methodist Church at Nictaux Falls was the scene of a pretty wedding on Wednesday, July 10, the principals being Miss Annie Althea Drew Pickels, daughter of William A. Pickels, and Alfred Burpee Balcom, instructor in Economics in the University of Minnesota.

The ceremony took place at one o'clock Rev. E. O. Steeves officiating. The bride who was given away by her father, was attired in a tailored suit of blue with hat to match and wore a bouquet of lilies of the valley. The wedding march was played by Miss Strump, a cousin of the bride. A number of friends of the wedding were the girl ushers, Misses Adelaide and Mae Ritcey, also cousins of the bride.

The church looked very lovely, being decorated by the girl friends of the bride with a profusion of yellow and white daisies combined with birches.

Immediately after the ceremony, Mr. and Mrs. Balcom left for their wedding trip. They will spend the summer at the seashore and in the autumn go to Minneapolis where they will reside.

### Lower Granville

Lower Granville, July 16th:—Miss Winnie Shafner of Lynn, is spending her vacation with her parents, Mr. and Mrs. Gilbert Shafner, Junr.

Mr. and Mrs. William Nelson and child of Lawrence, Mass., are spending a couple of weeks with Mr. Nelson's parents.

A. L. Davidson, M. P., accompanied by his wife and child, arrived in this locality in his auto on Wednesday, remaining until Friday, during which time he called upon a number of his leading party men, discussing various matters that are calling for attention at the present time. Geo. E. Corbett, Esq., joined him on Thursday, remaining until Friday morning.

### Cemetery Fund.

Miss Annie Chute wishes to acknowledge the following donations to the Riverside Cemetery Improvement Fund:—  
Mrs. Hector MacLean \$5.00  
Mr. W. E. Reed 2.00  
Mrs. Fraser and Miss Quirk 8.00

### Boston Church to Have Roof Garden.

(Toronto World)

Boston, July 10:—The first church in America to have a roof garden to be used as a playground for children during the day and for open air service in the evening will be right here in Boston.

It will be on the rebuilt Clarendon Street Baptist church corner, of Clarendon and Montgomery streets. This church was badly burned last winter and it has now been decided by the trustees of the church to rebuild on the old site and to have a church up to date in every detail.

The roof of the church will be flat and the steeple will be omitted. The roof will have crevelled borders and steel girders making it a safe place for the children of the south end to have a playground. Services will be held there in the summer time when the weather permits.

Rev. James A. Francis, D.D., pastor of the church, proposes in the restored building to have every means to carry on an aggressive work. Another change he will inaugurate is putting the Sunday school into twenty separate rooms instead of the large room. Apartments will lead off the auditorium room to be used by boys and girls in their club life.

Moving pictures will be brought in to increase the interest in Bible study. Doctor Francis is one of the leaders in biblical study in America and favors any method to make the Bible interesting to the people.

These improvements will cost not far from \$40,000. The work of restoring the church will be begun early in the fall.

### Wilson's Prospects Good.

Bryan predicts a popular plurality of 2,000,000 for Woodrow Wilson, the Democratic nominee. Theodore Roosevelt is the only man who ever had a plurality of that size. When he beat Parker in 1904 his plurality was 2,549,515. Parker, however, turned out to be a peculiarly weak candidate, his total vote being less than that cast for Grover Cleveland sixteen years before. Bryan was beaten four years ago by a plurality of 1,270,000.

Colonel Roosevelt was easily the greatest getter of votes in American history. It is probable that there has been some reaction in the United States against the methods of the Colonel and the violence of his public talk. Wilson is thought to be progressive enough in his policies to command the support of all the Democratic and radical forces in the country, and to enlist also the support of many thousands of Republicans who are displeased by the stand-pat tendencies of the Taft group. It will be thought that a considerable amount of the insurgent Republican vote is likely to be cast for Wilson.—Telegraph.

A. G. Watson, Maritime Provinces' Sales Manager of Regal Flour was in Bridgetown this week and paid the "Monitor" a visit. He called to say that this firm intended to do some advertising in our columns, as he believed there were a great many of our readers who would like to try "Regal" if only once they heard about its splendid qualities as a bread maker. We believe said he, that we have the best hard wheat flour in Canada—in fact so sure are we of this, that we sell our flour with a guarantee of "Money Back if Not Satisfied" that is to say, a house-keeper can buy a barrel of Regal Flour, and after she has baked one, two, three, four or half a dozen bakings, if she is not perfectly satisfied with the results of her baking in every way, the dealer she purchased from, will take back the remnants of the barrel and return her the total amount of her purchase. For fairness and generosity, this offer seems to measure up to a very high standard, and it might be sufficiently impressive to secure a large number of trial purchasers.

Mr. Watson says that Ben McIvor, of Halifax, one of the greatest bread bakers in Canada, now uses "Regal" exclusively, and says that it is the finest quality of hard wheat flour he has ever tried.

### Fatalities from Storm

**Electrical Storm Which Causes Several Fatalities Circles around Bridgetown from West to East, Bolts Falling at Middleton, Wolfville and Kentville.**

A month of excessively dry weather with two weeks of extreme heat was broken at noon on Thursday last by the approach of an electrical storm. It appeared for a time as if Bridgetown were to get one of the sharp, wild storms which had been reported to the westward, but with a few rumbles of thunder and a few dashes of rain the storm circled around Bridgetown and passed on its way.

It was very heavy in Middleton and struck in several places. The stable of Dr. F. S. Messenger was struck, the saddle board torn from the roof, and the shingles and rafters ripped and splintered. A telephone post on Main Street was struck, and Mrs. O. A. Rogers received a slight shock.

Passing on to the vicinity of Kentville the storm became of deadly intensity. Two deaths are reported in the columns of the Kentville Chronicle as follows:—

Mr. Peter Aalders and his son, at Caanan, were driving home a load of hay at the time, and Mr. Aalders was walking at a short distance behind with a fork on his shoulder, when he was instantly struck dead. The fork evidently attracted the current, as Mr. Aalders' shoulder was bruised and singed.

The other case was that of Mr. Bryan Hennigar, a member of the prosperous grocery firm of Hennigar Brothers at Wolfville, who was out with a team, purchasing lambs along Gaspereau mountain. The storm overtook him at White Rock, and he dove into a nearby barn for shelter. An electric bolt struck the barn, instantly killing Mr. Hennigar and one of his horses, and several lambs which were being carried in wagon. Several persons near here received slight shocks and considerable scare from the electric current.

The lightning was very sharp, the storm seeming to break over the town, several buildings were struck, and in one case at least, set on fire, but no serious damage resulted. The bolt struck the Nickel building, knocking down a part of a chimney, tearing several holes in the roof. George E. Calkin's hardware store is in the same building, and Mr. Calkin received a passing kiss on the arm from the unseen visitant. The electricity evidently followed the wires from that place to

the garage, opposite the Aberdeen Hotel, and kindled a fire, which if it had not been for the prompt work of some men who chanced to be near by, might have been serious. A number of telephones all over town were put out of business by the storm. The word reached us soon after the storm that there were only eleven telephones left in working order connected with the Canning exchange. Only a few miles from town, in the districts of Woodville and Lakeville, only a few drops of rain fell, not enough to allay the dust. The storm did not last over twenty minutes, did not appear to be very violent, and was a wholly unusual thing for this section of the province.

At Wolfville it is reported also that the house of B. O. Davison was struck, and Mr. Davison knocked down. Also that R. S. Starr was stunned by a bolt.

Further eastward the violence of the storm had another deadly result, killing Mrs. Henry Lintaman, of Cow Bay. A press report says:—The heavy electric storm broke with some suddenness in some parts of the county. Shortly after three o'clock vivid flashes of lightning, followed by tremendous crashes of thunder and a down-pour of rain, broke over the little village of Cow Bay. Mrs. Lintaman was attending to her household duties at the time, and with the commencement of the rain started to close the windows of the house. Going to a window of one of the upper rooms, she reached there just as a blinding flash came in through the open window. The bolt struck the unfortunate woman in the month and passed through her body.

### Rev. Canon Troop's Wife Died in Montreal

Former Halifax Lady Passed Away After a Brief Illness.

MONTREAL, July 14—The death occurred yesterday after a month's illness, of Mrs. Troop, wife of the Rev. Canon Troop, St. Martin's Church. The late Mrs. Troop was Suzette Leawe Hill, daughter of the late Rev. Dr. George W. Hill, of St. Paul's Church, Halifax, and niece of the late Hon. P. C. Hill, at one time Premier of Nova Scotia. The deceased was born at Halifax in 1854, and was married in 1878 to the Rev. Mr. Troop, who was at that time, curate of St. Paul's Church.

### Potassium Salts Cancer Antidote.

DR. FORBES ROSS AT WORK IN REGARD TO NEW THEORY OF DREAD DISEASE

LONDON, July 10.—Mr. Forbes Ross, who astonished the medical world here by his announcement of the discovery of an anesthetic which abolished pain, even during capital operations, is again to the fore with the statement that if he hasn't found a cure for cancer he has "got very near it."

So many alleged "cures" for this dread disease have been exploited that laymen as well as physicians are inclined to scepticism, but as there are many sufferers from cancer the theories advanced, and the remedy prescribed by Dr. Ross will be of interest. He says: "I have been working since 1903 on cancer, and so far as my investigations have gone, I have come to the conclusion that the cause of cancer has no connection with a meat diet or vegetable diet, neither is it an irritation of the parts or back infection. My theory is that cancer cells are really 'Peter Pans' that won't grow old. If we could make them grow old, we could cure the disease because we should stop the multiplication of the cells and they could be absorbed.

"What I claim to have discovered is that cancer is nothing more nor less than an exhaustion of a natural quality in the body possessed by epithelial cells, consequent upon the diminution in the body of potassium salts. In the recent libel action brought by Dr. Bell, Sir A. Pearce Gould, the great authority on cancer, said that cancer is sometimes cured by the natural forces of the body. I think in potassium salts we have the key to the problem.

"I believe the enormous increase in the death rate from cancer has kept pace with improvements in the preparation of flour. The cortex of the wheat has been removed by the American process of milling and people have been fed regularly with dephosphated bread because the cortex contains a lot of phosphate of potassium and lime. Vegetables are composed largely of potassium salts, but unfortunately the salts are thrown away in the water in which the vegetables are boiled. So, too, with rice. Nations which have adopted the 'civilized' method of cooking rice and throwing away the water have developed cancer. "Experiment has tended to confirm the truth of my theory. A patient whom a physician in Birmingham said a year ago could not live more than three months is now very well, attending to her business, under the potassium treatment, and the latest reports as to her condition are very satisfactory. My method is to use chiefly the citrate bicarbonate of potassium by the mouth and also to apply locally to the cancer—by means of an electric current—a solution of phosphate of potassium. My experience with this treatment is very hopeful."

It will be seen by this that Dr. Ross in a measure supports the theories of Dr. Bell, plaintiff in the recent famous libel suit, particularly his advocacy of a diet of uncooked vegetables, but nevertheless the great majority of surgeons and physicians adhere to the theory of Sir Felix Semon that the knife is the only sure cure for cancer.

For soreness of the muscles, whether induced by violent exercises or injury, there is nothing better than Chamberlain's Liniment. This Liniment also relieves rheumatic pains. For sale by druggists and dealers.

### PLAY FAIR.

(Willis Warren Kent.)  
Whatever the fun, whatever the game,  
One little rule is always the same—  
Play fair!

Racquet or bat, or mitten or ball,  
This is the edict that's guide over all—  
Play fair!

Life is a game of prowess and skill,  
Then play it with honor and play with a will—  
Play fair!

Ponder the rule before you begin;  
Break it, you never, no, never can win—  
Play fair!

—The "Presbyterian."

## THE FARM

### THE "ELECTRIC FARM" AND ITS FUTURE POSSIBILITIES.

Engineers Consider Applications of Electricity to Farm Development.

Boston, July 8.—While most papers at the sessions of the National Institute of Electrical Engineers in connection at the Hotel Somerset, have been of a highly technical nature, one presented this afternoon at the Industrial Power session was of popular interest. This was by Putman A. Bates, and dealt with "Electricity on the Farm." Mr. Bates told of the growing application of electricity to agricultural operations and showed how the development of irrigation in the West has led to the establishment of central power stations from which power is conveyed to farms for various purposes. "The magic of irrigation," he said, "has transformed valleys long vacant into prosperous agricultural communities. A brief summary of work already accomplished shows that construction is under way or has been completed on twenty-nine projects involving an expenditure of \$65,470,000. In the eight years of actual work there has been dug seven thousand miles of canals, mostly in the Pacific States. There has been built 970 miles of roads, 1700 miles of telephones, and there are now in operation 275 miles of transmission lines over which surplus power and light are furnished to several cities and towns. The small farms and villages grouped about these developments give the effect of suburban rather than rural conditions. The cheap power developed from the great dams or from numerous drops in the main canals is now utilized for the operation of trolleys which reach out into the rural districts, bringing the farmer in close touch with the city. It runs numerous industrial plants, for storing, handling and manufacturing the raw products of the farm. The same power is used for lighting and heating in the towns and for cooking in the homes. On several of the projects farmers are applying for electric power and in many farm houses the electric power is utilized for many domestic duties."

Mr. Bates cited the case of an electric plant on the farm of J. F. Forrest of Poyntette, Wis., the total cost of which was \$250, as showing how economically electricity may be applied to farm uses, and said in conclusion: "Should one or more isolated farmers find it impracticable to obtain central station service, there is open the opportunity of establishing a co-operative generating station, utilizing water power, producing gas steam gasoline or fuel oil equipment. In conjunction with such co-operative electric generating stations, there could be operated community laund-

ries, creameries, canneries, grist mills or other industries suggested by local needs. Where neither public service nor co-operative plants are feasible, a farmer may, at a cost of approximately \$250, install a private electric lighting plant, large enough for two dozen lights, and from this as a probable minimum, he may install an isolated plant at additional outlay that will provide current for as many lamps and as much power as he may desire.

With morning and afternoon sessions in two sections the members were kept busy. Electrical measurements and power stations were the subjects considered. In the electrical measurement session Carl Gering of Philadelphia, presented a paper on "Measuring Stray Currents in Underground Pipes," which dealt with some phases of electrolysis. Mr. Hering, who is one of the best-known electrical experts in the country, described several methods which he had devised and applied in a practical case with success some years ago. O. J. Bliss described a unique arrangement of standard instruments for the electrical transmission of electrical measurements. F. V. Magalhães gave a summary of various methods now being used for metering large direct-current installations. P. G. Agnew presented a paper on "A Tabular Electrodynamic Meter for Heavy Currents." M. G. Newman gave a method of measurement of alternating currents of low values, and Evan J. Edwards led a discussion of methods of testing incandescent lamps. Edwin F. Northrup described a system of measurement of an alternating current resistance for comparison with a direct current resistance. Alexander Maxwell read a paper which dealt with instrument transformers. Paul MacGahan closed the session with a technical paper on "Induction Type Indicating Instruments."

The power station and industrial power session was held at the same time. H. M. Hobart and E. Kinsler presented a paper on "The Squirrel Cage Induction Generator." E. M. Olin discussed the power efficiency of rotating electrical machines, and A. B. Field described the operating characteristics of large turbo-generators. Other papers read at the morning session were on "Motor Starting Currents as Affecting Large Transmission Systems," by P. M. Liebold; "Characteristics of a Large Turbine Generator," by B. G. Laume; "Single Phase Induction Motors," by W. J. Branson and "Excitation of Alternating Current Generators," by D. B. Rushmore.

During the summer months mothers of young children should watch for any unnatural looseness of the bowels. When given prompt attention at this time serious trouble may be avoided. Chamberlain's Colic, Cholera and Diarrhoea Remedy can always be depended upon. For sale by druggists and dealers.

### MILKING MACHINES

A EUROPEAN SOCIETY HAS TESTED FIVE DIFFERENT MACHINES, SUCTION AND PRESSURE MACHINES WERE BOTH USED, PRESURE PROVING MOST SATISFACTORY.

Tests of five milking machines were carried out for the Agriculture Society of Meaux, viz., two suction machines—the Wallace and the Max—and three pressure machines—the Alfa Aalen, the Loquist and the Galakton machines.

It was found that the suction machines did not completely empty the udder, though in the case of cows with small teats the amount left was small. In the case of cows with large teats the amount of milk left in the udder was much more appreciable, possibly owing to the fact that the machines were made for Dutch or Danish cows, which usually have small teats. On the whole, the amount of milk left by the two suction machines during a month's experiments varied from 6.4 per cent. to 8.5 per cent. The pressure machines were much more efficacious.

The total amount of milk obtained by mechanical milking finished by hand was found to be equal to that given by simple hand milking, and the apparatus did not in any way affect the quality of the milk. Special precautions as to cleansing the machines were found necessary.

The time required for milking a cow yielding 3 gallons was found to be 8 minutes for a suction machine, and 12 minutes for a pressure machine against 6 minutes by hand milking. One operator and a cowman could, however, work five suction machines at a time, thus accomplishing as much as three men milking by hand. It is estimated, however, that the saving of the cost of the labor of the one man would be more than balanced by the annual cost of upkeep of the machines, even if the initial outlay is not taken into account.

### THE UNKEMPT FARM-YARD

What John Burroughs says about western farm buildings and their surroundings has enough point to make it stick and enough importance to justify wider circulation. When for the first time he recently crossed the prairies of the Mississippi valley he wrote: "As a farmer I rejoiced at the endless vistas of beautiful fertile farms. As a home body and lover of the cosy and picturesque I recoiled from the bald native farmhouse with their unkempt surroundings, their red sheds and black muddy barnyards."

### SUMMER STABLE RULES

1. Load lightly, and drive slowly.
2. Stop in the shade if possible.
3. Water your horse as often as possible. So long as a horse is working, water in moderate quantities will not hurt him. But let him drink only a few swallows if he is going to stand still.
4. When he comes in after work sponge off the harness marks and sweat, his eyes, his nose and mouth, and the hock. Wash feet but not his legs.
5. If the thermometer is 75 degrees or higher, wipe him all over with a wet sponge. Use vinegar water if possible. Do not turn the hose on him.
6. Saturday night, give a bran mash, cold; and add tablespoonful of saltpetre.
7. Do not use a horse-hat, unless it is a canopy-top hat. The ordinary bell-top hat does more harm than good.
8. A sponge on top of the head, or even a cloth, is good if kept wet. If dry it is worse than nothing.
9. If the horse is overcome by heat get him into the shade, remove harness and bridle, wash out his mouth, sponge him all over, shower his legs and give him four ounces of aromatic spirits of ammonia, or two ounces of sweet spirits of nitre, in a pint of water, or give him a pint of coffee warm. Cool his head at once using cold water, or, if necessary, chopped ice, wrapped in a cloth.
10. If the horse is off his feet, try him with two quarts of oats mixed with bran, and a little water; and add a little salt or sugar. Or give him oatmeal gruel or barley water to drink.
11. Watch your horse. If it stops sweating suddenly, or if he breathes short and quick, or if his ears droop, or if he stands with his legs braced sideways, he is in danger of a heat or sun stroke and needs attention at once.
12. If it is so hot that the horse sweats in the stable at night, the horse outside. Unless he cools off during the night, he cannot well stand the next day's heat.—New York Field.

### CLOTHING MADE OF PAPER LATEST IDEA.

Firm of British Paper Manufacturers Now Making Experiments.

Toronto, July 8.—A London cable to the Globe says:—"Though the problem of the high cost of living has not yet become so acute in this country, as, to judge from the American correspondence in London papers, it has become in the United States, it is nevertheless sufficiently serious, and any method of reduced prices that is suggested is eagerly examined. The latest idea is clothing made of paper.

"A representative of a large city firm of paper manufacturers states that they are at the present moment experimenting in the hope of producing a kind of paper really suitable for making of clothes which can be sewn and hold buttons. Paper towels are an excellent idea—these are made in Germany, he said.

"Paper hats have been a fashion for some time. Instead of wearing washable cotton sunbonnets and caps children can have each day a new paper hat costing from two to twelve cents, which takes one cent off the laundry bill.

"Paper shirts are being produced at twelve cents apiece, while the cost of a paper handkerchief is two cents—the price of the washing of a linen one.

"In the household, too, the washing bill can be reduced by using paper instead of linen, for now there are paper blouses, lace edged paper serviettes, paper toilette mats, paper dollies, paper table covers, while paper towelling could be adapted to kitchen use for tea cloths, dusters and similar articles."

### A SMALL CYCLONE STRIKES PART OF SASKATCHEWAN.

Saskatoon, Sask., July 7.—A miniature cyclone passed over the northern end of this city, accompanied by heavy rain, about nine o'clock yesterday morning. A number of garages and smaller buildings were wrecked, but most of the damage was done in the neighborhood of the Western Canada saw mills, a large portion of the lumber in these yards being whirled up in a vortex to a height of between one and two hundred feet before being thrown to the ground and smashed to kindling wood. No personal injuries were recorded.

### ATE A "TORPEDO" AND MET DEATH.

Appleton, Wis., July 5.—Andrew Hoffman, who ate a "torpedo" fire cracker yesterday, mistaking it for candy, died today. He had some caramels, both wrapped in red and white paper in the same packet, and chewed a torpedo, by mistake. His face was literally blown away.

### September Third

Is the day our institutions will re-open in all departments. Last year we had over 500 calls for students, and expect more next year. Now is the time to get our syllabus, rates, etc.

Joker's Corner

WANTED INFORMATION

An Irishman just landed got work on the New York Central as flagman at Tarrytown. His first day on the job he waved the red danger signal before the Empire State Express. The brakes squeaked down, the train stopped and the crew ran up. 'What is the matter?' Why did you stop the train?' the conductor demanded.

'Well - began the flagman. 'Don't you know it's a State prison offence to stop a train without cause?' the conductor exclaimed. 'Why, we're twenty minutes late now.'

'That's just it,' was the answer. 'Where have you been the last twenty minutes?'

WHY SHE CRIED.

He (after popping the question) - 'Why do you cry, my angel? Did I offend you by my proposal?' She (still sobbing) - 'Oh, no, dear, it is not that; I am crying for joy. Mother always said to me, "May, she said, "you are such an idiot that you would not get even a donkey for a lover," and now I have got one after all.'

AGITATED.

Robert did full justice to his dinner, but showed signs of uneasiness when his aunt passed him some gelatin for dessert.

'It's fine, Robert, won't you have some?' said the aunt.

'Maybe it is good,' replied Robert, eyeing the quivering mass, 'but, gee, it looks so nervous!'

Little Mary was telling what she thought was an exciting story about a dream. She stuttered in her effort, gulped and paused hopelessly with out completing the sentence.

'Why, child, what is the matter?' her mother asked.

The little girl smiled ruefully and replied, 'I swallowed a word.'

She (t.arily) - 'Our engagement is at an end, and I wish to return to you everything you have ever given me.' He (cheerily) - 'Thanks, Blanche! You may begin at once with the kisses!' They are married now.

RECENT NOVA SCOTIA FIRE LOSSES.

The present year opened up very badly for the fire insurance companies. A series of very disastrous fires in the opening month spoiled the profits on fire underwriting in this province for a considerable time to come. After a lull, we have had a few more unfortunate fires, which, while in themselves sufficiently serious, become very serious when added to the great burdens already experienced this year. The fire in Canning, N.S., on the 23rd. of June, destroyed nearly \$70,000 worth of property, the insurance loss being estimated at nearly \$84,000. A few days later there was a serious fire at La Have, which did not affect the insurance companies, inasmuch as there was no insurance. The lumber mill of Boeener Bros., at West LaHave, represented \$57,000, which has been lost both to the owners of the mill and to the province, because of the fact that there was no insurance. It is said that the rates were prohibitive, running as high as ten or twelve per cent.

INTELLIGENT HENS.

There is a man in town who claims to have the most intelligent hens that ever roosted.

When the snow was on, they laid in the cutter, so the eggs were ready to be taken to market. When the snow went they started to lay in the buggy for the same reason for a while, but when the price got lower they laid in the ice-house, suggesting to their owner it would be best to keep the eggs in cold storage until the price came up again.—Geo. Rice, Tillsonburg, Ont.

Dysentery is always serious and often a dangerous disease, but it can be cured. Chamberlain's Colic, Cholera and Diarrhoea Remedy has cured it even when malignant and epidemic. For sale by druggists and dealers.

Desolation Not Ever Seen Before in Canada.

This is the Description of Regina Man Given of the Ravages of the Cyclone.

WINNIPEG, July 8.—H. W. Laird, of Regina, has arrived in this city, and the detailed report he gives of the terrible ravages of the cyclone and the wreckage which followed is one of intense interest.

Said Mr. Laird, "I have left behind in Regina a scene of desolation which has probably never been witnessed before, in Canada, at least. We are all so stupefied and dumbfounded that it almost seems like a terrible dream, but anyone who goes to Regina can see it in all its reality, which no words of mine can fittingly describe.

"It had been very sultry for several days prior to the fatal Sunday, but in the afternoon, about four o'clock, there were evidences of a storm brewing. A heavy black cloud arose in the south-east sky and another one in the north-east. These storms gravitated together, and finally met immediately south of the parliament buildings. The result was that a funnel-shaped cloud swooped down upon the city, taking an almost direct course from south to north. Everybody ran for shelter from the rain storm into the houses. A violent wind storm followed, which suddenly grew to great intensity, and before anyone had any idea of what was to happen, the area affected was thrown into a state of chaos.

"It suddenly became dark, the electric lights flashed on and off, there was a hissing sound, and then the deluge. It is impossible for me to describe it. There was a sudden crashing of windows and a regular artillery of flying missiles; parts of houses, verandahs, barns and fences were hurled against other buildings. The rain, which carried minute particles of dirt, swept into the houses, carrying everything before it. Houses were tossed about like corks on the water. Families, panic-stricken, rushed to places of shelter, the more knowing ones to the cellar, the others into the central part of the house.

"In less time than it takes to tell it, the crashing ceased, the wind died out, and everybody, stupefied and dumbfounded, looked upon a mass of ruins, where but five minutes before was the most beautiful part of the residential section of Regina. The details of the damage wrought have been fully described in the 'Telegram,' but there are many accidents which will probably never be known. Canoes from Wascana Lake were carried three-quarters of a mile and deposited in the public parks in a shattered condition; automobiles standing on the streets were turned upside down and carried bodily into lawns and deposited against foundations of ruined houses; pictures from some of the best parlors in Regina were unceremoniously forced into kitchens of lowly homes; a slop pail from dear old knows where was deposited in my kitchen alongside the kitchen stove.

"I saw a chicken which had been driven with such force against a lattice fence that it was jammed flat, and it stuck there. In the devastated area there is nothing to identify where any particular house stood; there is simply a mass of plaster and splinters piled in heaps.

"As soon as the storm was over a gruesome scene was enacted. Two hundred men immediately proceeded to dig out the girl employees of the telephone exchange, and all were rescued in the cellar. There were a hurrying and scurrying of ambulances, doctors and nurses; wagons and automobiles were pressed into the service, but

the streets had to be cleared before they could get through.

"First a light wagon would pass with a body wrapped in a sheet; a few minutes after an automobile passed with a woman supported by two men, her head covered with blood and her hair in an entangled mass. This was followed shortly after by two men supporting a third, with his head bandaged in cloths and blood streaming from it; then an ambulance with a little child moaning in her agony. When I left home there were 32 reported dead, and there are at least five at the bottom of Wascana Lake. There were also many people in the hospitals without the slightest hopes of recovery.

"Miraculous escapes are reported by the dozen. Fred Hindson, a twenty-year-old university student, one of the most popular boys in the city, was talking to his father in his home. He was killed immediately, and his father is in the hospital. Mrs. McElmoyle was with her husband trying to get into the cellar; she was killed instantly, and her husband escaped without a scratch. Joe Bryan, manager of the Tudhope-Anderson company, one of the best known men in Saskatchewan, was in his office with Mr. Ingram, his traveler. The building collapsed, and Mr. Bryan was instantly killed. Ingram was pinned under the timber for four hours, but is now all right.

SLEEPING IN TENTS.

"In my own warehouse there were five men at the time of the collapse. Two of them are in the hospital from broken limbs, the other three escaped injury, and they cannot tell how it happened, it all came so suddenly. A thousand people slept in tents in the parks last night, and the torrents of rain certainly added to their discomfort. The city authorities acted promptly, and the mounted police took control of the devastated area and established a patrol night and day. The troops were brought back from Sewell camp, and are now on guard, and no one is allowed to enter the affected district without a written permit from the police.

"Will this catastrophe cause a set-back to Regina?" "Not much. Regina is too big a city to be seriously affected because a row of lots has been wiped out. As an insurance policy will not cover the most, a great deal of private hardship will result, particularly in the working men's section of the city, where every man had his last dollar invested in his home. But this will right itself in time, and the optimistic spirit of the west will soon assert itself in bringing order out of chaos. Not even a cyclone can set Regina back."

"Was there anything to indicate what class of buildings is most secure against cyclones?" "There seemed to be no distinction between brick and frame buildings; all seemed to go the same way. Even the Cartage Company warehouse, which is the last word in reinforced construction, was badly racked, and some of the brick walls torn off. The Donahue block, which is of steel construction, is in bad shape, and I understand that it will have to be rebuilt."

"Where was the place of greatest danger to human life, inside houses or on the streets?"

"As far as I know the people had all taken refuge in buildings, but Robert Kerr, a farmer of the south, was out in the open and was carried with great violence to the ground. He will probably die. People who were out travelling in automobiles were upset in the ditch. I know of one automobile which went with the storm at its highest speed, and escaped injury.

"The calamity, shocking as it was, had its humorous side. There were over a hundred girls in the Y. W. C. A. building; when the cyclone came they rushed across

IN SUMMERTIME no home should be without a bottle of NA-DRU-CO Extract of Wild Strawberry Compound. the street to the park and clung to trees. It was poor anchorage, however, in such a storm, as the trees were pulled out of the ground as if they were mere bouquets. Girls with trees in their arms were to be seen rolling over the ground, and were playthings in the grip of the storm."

Mr. Laird spoke in a most appreciative manner of the action of the citizens of Moose Jaw in affording prompt assistance. "It was characteristic of the kindly feeling which has been evidenced by the public in this terrible affair," he said.

Digby, N. S.

MINARD'S LINIMENT CO., Limited Gentlemen,—Last August my horse was badly cut in eleven places by a barbed wire fence. Three of the cuts (small ones) healed soon, but the others became foul and rotten, and though I tried many kinds of medicine they had no beneficial result. At last a doctor advised me to use MINARD'S LINIMENT, and in four weeks' time every sore was healed and the hair has grown over each in fine condition. The liniment is certainly wonderful in its working.

JOHN R. HOLDEN. Witness, Perry Baker. FIRE AT WATERVILLE.

Waterville suffered a serious fire on Saturday morning, 6th. inst. It broke out in one of the cooperages of Messrs C. O. Cook & Son, near the railway crossing, and notwithstanding the strenuous efforts of the residents of the neighborhood, the three buildings with the greater part of their contents, and much valuable material, were destroyed. Mr. Cook's loss is valued at \$8,000. The fire swept through the beautiful pine grove near the Presbyterian Church which building as well as the house of Mr. James Murray also caught fire and narrowly escaped destruction.—Berwick Register.

Lost Vitality Caused by Kidney, Stomach and Bowel Disorders.

St. John, N. B., Sept. 18th, 1911.—My brother was a great sufferer from kidney, stomach and bowel troubles and was given up by two doctors. He was advised to try your Fig Pills, which he did, and after taking five boxes was completely restored to health and better to-day than he has been for years. You can't recommend Fig Pills too highly.

J. W. MANVERS. At all dealers, 25 and 50 cents or The Fig Pill Co., St. Thomas, Ont. Sold in Bridgetown by W. A. Warren druggist.

THREE YOUNG SISTERS DROWNED

St. John, July 9—Telegrams to relatives here bring news of drowning of three daughters of Hattie McBeath, formerly of St. John, in a river at their home in Amesbury, Mass. They were boating and the boat upset. The girls were aged ten, twelve and fourteen.

A Marriage Fee.

A Toronto clergyman tells an amusing story concerning a very important event in the life of Rev. J. E. Starr, the newly appointed Commissioner of the Juvenile Court. It seems that when Rev. M. L. Pearson, formerly pastor of Berkeley Street Methodist Church, was married years ago, he asked Mr. Starr to perform the ceremony and presented him with a fee of fifty dollars. Mr. Starr took it gracefully, and when very soon after he was to be married himself, he selected Mr. Pearson to tie the knot, whereupon he handed back to his friend his fifty dollars.

Friend of Children. After seventeen years' service in the Ontario Government's Department of neglected children, Mrs. J. L. Harvie has resigned. The humanitarian work of caring for outcast and neglected children has always been a pleasure as well as a duty for Mrs. Harvie. For her it was a labor of love.

A RACE OF LIONS. Every Baptized Sikh Takes on That Surname.

"Sunder Singh." To the average citizen of Canada the above signature across the register of a hotel the name means nothing. It is simply another peculiarity that is to be met with in dealing with East Indians. However, to the Sikh, more especially to the man who has been transplanted to another land the surname "Singh" means everything. It is the symbol of the great brotherhood of the Sikh religion and without that title a man is nothing in the eyes of the true Sikh. Translated into English the word means "Lion," and as every male over eighteen is eligible for that title upon baptism, the bravery and strength that such a surname conveys is spread through the entire Sikh race.

To a reporter, Dr. Sunder Singh, the prominent Punjab Minister, gave a very interesting story of the rise and fall of the once great Sikh race. Dr. Singh has been in the east in connection with his petition to Ottawa for a change in the immigration laws. He is one of the very highest men among the Sikhs, and is regarded as the real leader of this race in Canada. When the British, which every Sikh must admit to, he is a very striking figure as he passes along through the crowded thoroughfares of Toronto's business district.

"In the year 1600," said Dr. Singh "the same year that was made famous by the rise of Martin Luther, the Sikh race was founded. It was in the 16th century that Nank, the real creator of the Sikh religion, came to the fore, and that date marks the beginning of our era. To begin with, the Sikhs threw off all caste, such as is recognized by the Bramin and Hindu, and of course a great deal of opposition was shown to the new sect. Many were murdered for upholding their belief, and nine of the first teachers of the Sikh faith were crucified. "Gobind Singh, the tenth teacher, was the man to lead his followers to success. There was at that time a price placed upon the heads of those who professed the Sikh belief. It was then that the word Singh was added to those who joined the brotherhood. Singh means disciple, so that the entire race is bound together. The Sikhs do not worship idols, as do the other Indian races, and there is no priestly class, every man being placed upon an equal plane. "It is pollution for the Hindus to cross the ocean; in fact their entire life is controlled by the Bramin or priests. The Sikhs in taking names upon themselves, follow pretty much in the footsteps of the North American Indians. For instance, Dr. Sunder Singh, gets his first name from the English word "beautiful." Other Sikh names are taken from objects, flowers, etc. To these are added the surname Singh, signifying that they are baptized and belong to the brotherhood. "Many have wondered why it is so many colors are shown in the turbans which the Sikhs must wear. According to Dr. Sunder Singh there are seven different grades in religious knowledge. The class that a man occupies is designed by the color of turban he is given. Black is the lowest grade while the pink and yellow turbans that Dr. Singh has worn during the past two years mean that he has reached the highest possible perfection in the Sikh race."

It is his man whom the Sikhs have entrusted with the work of securing an amendment to the immigration laws that will permit their bringing in their wives and children, and Dr. Singh has every confidence that he will be able to back to his people and tell them that he has been successful.

Old Times in Kenora. Kenora men are talking of leaving and joining Manitoba. This recalls a bit of history. Nearly thirty years ago, Kenora—then suffering under the unpleasing name of Rat Portage—was the battleground of a conflict between Ontario and Manitoba. There was a boundary dispute between Ontario and the Dominion. The line claimed by the Dominion would have passed east of Fort Arthur, Oliver Mowat put up a fight for Ontario that fired the Liberal heart and passed into history. Then it was that Sir John A. Macdonald said he did not care a rap for Mowat, his Frasers and his Blasers, his Hardy's and his Pardees, his Lardies and his Dardies. He had passed making the eastern boundary of Manitoba coincide with the western boundary of Ontario.

This was—as Sir John perhaps faintly suspected and did not deeply deplore—the signal for a fight between Ontario and Manitoba, centred in Rat Portage. Rat Portage had two governments, two jails, two court houses, two sets of police. The constables arrested each other, the partisans fired each others' jails and released prisoners. Manitoba was on the verge of sending soldiers to the scene. Finally Oliver Mowat returned from England, and framed up a compromise with Attorney-General Miller of Manitoba. And now Kenora wants to leave us and go and live in Manitoba's house.—Star Weekly.

M. K. PIPE R

PROPRIETOR AND PUBLISHER

WEDNESDAY, JULY 17, 1912.

The Turkish minister of war dis-
sents from the general opinion that
the air-ship is destined to be a feature
of deadly and wholesale slaughter in
time of war. He has been criticized as
having left unutilized some of the weapons
of latter day warfare, as the sub-marine
and the air-ship. In an interview with
the London Daily Telegraph he contra-
dicts the theory of the usefulness of
these modern inventions as weapons of
war and denies the possibility of dropping
a bomb from an aeroplane or dirigible
with any degree of accuracy which
would make them practically useful.

In this interview he is quoted as say-
ing:
The critics who would have me em-
ploy airships of one kind or another
in order to drop bombs upon the
enemy's war-vessels in the Aegean are
laymen who are not conversant with
this subject. I am. I have studied it
specially. The conclusions at which
I arrived warrant my resolve to keep
to the tried and approved methods of
war. What result worth having,
worth paying heavily for, could be
expected from an airship flying at the
rate of from sixty to one hundred
kilometres an hour, and while in full
flight dropping a relatively small ob-
ject upon a target very far below. It
is impossible to take aim from an air-
ship in the ordinary sense of the term.
You cannot possibly do it. And the
theory of probabilities reduces your
chance of hitting the ship, without
aiming at it, to the vanishing point.

This is no mere theory; we have had
the truth brought home to us in the
literal sense of the word. In Africa
our men, camped on the fringe of the
desert, have been the objective of
attacks carefully organized from air-
ships. The conditions were more
favorable for our enemies than they
would be for us. They had a motion-
less target, the camp; it offered a
larger area than a warship. And
bomb after bomb was thrown down,
but they all fell very wide of the
mark, and might have been mere
sandbags for all the damage they
inflicted. Such results are not calcu-
lated to tempt us to imitate our
enemies. I admit that the conditions
under which a dirigible would work
are not quite the same. There, a
relatively stationary position could be
obtained if circumstances happened
to be propitious, whereas the aero-
plane is compelled to move on all the
time. If the dirigible encounters a
head wind of the same force as the
fair wind that had been driving it, it
ceases to move for a moment, it
becomes relatively stationary. But
the concrete use that can be made of
this is not worth mentioning. No,
aerial navigation is music of the
future. We must wait until it can
give results worth striving for. Dur-
ing the present war it will remain
what it is, a negligible quantity.
That is why I have spent no money
on these latter-day weapons of war."

Bear River

Bear River, July 16th.—Misses May
and Hattie Woodworth and Hazel
Purdy made the round trip to St.
John, via S.S. Bear River this week.

Miss Jennie Phinney returned home
on Wednesday.

Barb. Edna Smith sailed to Buenos
Ayres on Thursday, S.S. Bear River
towing her to the Basin.

On Wednesday morning last at his
home, Joseph Spears, aged seventy-
four years, passed away, after a very
short illness. His wife pre-deceased
him only five weeks ago. I. F. Rice
of Digby was the funeral director. In-
terment in Mount Hope cemetery on
Friday last. Elder T. G. Ruggles, of
the Adventist choir, assisted Rev. G.
W. Schurman, conducted the funeral
services.

Mr. E. M. Spears arrived from Boston
on Saturday to attend the fun-
eral of his late wife, Mrs. Spears.

Rev. F. W. W. Bacon and family are
occupying their summer residence.

Mrs. Reginald Graham and son,
Laurie, left for Great Pond, Nfld., on
Monday, to visit her parents, whom
she has not seen for a number of
years.

Mrs. Harry Henshaw and son are
visiting her husband's parents, Mr.
and Mrs. John A. Henshaw.

H. A. Lovitt, K. C., and wife of
Montreal are visiting his brother, Dr.
L. J. Lovitt and wife.

Mr. W. T. Nicholl, Allston, Mass.,
is visiting his mother, Mrs. Geo.
Nicholl.

Mr. A. E. Dunlop, barrister, and
wife, of Lethbridge, Alta., are guests
of Mrs. Dunlop's parents, Mr. and
Mrs. C. W. Phinney.

Mr. and Mrs. N. W. Ryerson and
family are guests for the summer of
his parents, Mr. and Mrs. W. D.
Ryerson.

Mrs. H. F. Nicholl is visiting her
sister, Mrs. Samuel Davis.

Mrs. Streite, who has been a guest
at Mr and Mrs. Chas. Yarrigle's, re-
turned home to Brooklyn, N.Y., on
Saturday last.

Mrs. Henry Flynn, Brooklyn, N.Y.,
is the guest of her mother, Mrs. N.H.
Raymond.

Mr. Clarence Harris, Boston, is vis-
iting his parents, Mr. and Mrs. Chip-
man Harris.

Mrs. Chas. Bries of Boston, is vis-
iting Mr and Mrs. A.W. Daniel.

Mrs. Chas. Brick of Boston is vis-
iting his old home for a few days.

The Ladies of Bridgetown
May Now Have Beautiful
Hair--All First Class Drug-
gists Sell SALVIA and
Guarantee it to Grow Hair
or Refund Your Money.

Your druggist is backed up by the
manufacturers of SALVIA, the Great
Hair Grower. It is guaranteed to
grow hair.

SALVIA destroys dandruff in ten
days.

The roots of the hair are so nour-
ished and fed that a new crop of
hair springs up, to the amazement
and delight of the user. The hair is
made soft and fluffy. Like all Amer-
ican preparations SALVIA is daintily
perfumed. It is hard to find an ac-
tress who does not use SALVIA con-
tantly.

Ladies of society and influence use
no other.

SALVIA is a non-sticky prepara-
tion, and is the ladies' favorite. A
large generous bottle 50c.

BORN

MARSHALL.—At Clarence, July 3rd

A Profitable Year.
From a financial standpoint the year
1911 will go down in Canadian his-
tory as one of the most remarkable
Canada has ever had. This is true not
only from a standpoint of the numer-
ous financial transactions which have
been carried out throughout the year,
but more particularly from the fact
of the big changes which have been
brought about in connection with
public utility and street railway enter-
prises in the chief cities of the coun-
try, like Montreal, Toronto and Win-
nipeg.
The year just closing has certainly
been a bumper year for Canadian
banks. The institutions which closed
their fiscal year at the end of Novem-
ber were about twelve in number, and
increased in their net profits to show in-
creases of over \$1,500,000 for the year. A great many
of the other institutions close their fis-
cal year at the end of December, and
by the time they submit their state-
ments to their shareholders it is ex-
pected that the total increase for the
year will amount to over \$2,500,000,
which is a pretty good indication of
the manner in which money is able
to make money.—Courier.

**LOCAL AND SPECIAL**

Nearly 2,000 tourists were landed in Yarmouth last week by the Boston steamers.

Mrs. Timothy B. Chipman will be "at home" on Friday and Saturday afternoon from three to six.

Margaretville has a centenarian in the person of Patrick Downey, who attained the century mark on July 12th.

The Rev. E. A. Hanley, D.D., President of Franklin College, Indiana, will preach in Port Lorne church on Sunday next at 3 p.m.

Mr and Mrs. Roy Sabean will be "at home" to their friends on Wednesday and Thursday, July 24th and 25th, at West Paradise.

The engagement is announced of Miss Helena B. Purdy to Mr. Robert C. Kelley, of Grand Falls, New Brunswick. The marriage is to take place early in August.

Rev. Wm. Phillips preached his farewell sermon in the Methodist church, Middleton on Sunday, 7th inst. He is succeeded by the Rev. Norman Ritey.

Since the break of the draught on Thursday last we have been visited in this locality by a few soft showers which have greatly refreshed the parched vegetation.

Mrs. J. D. Kedy announces the marriage of her daughter, Miss Kitty May Rice, formerly of Paradise, to Mr. Edward Thornton Clark, of Shirley, Mass., to take place Wednesday evening, July 24th.

An old land-mark of Queen street, known as the Morse building, has been entirely obliterated during the past week. Messrs. J. H. Longmire & Sons will proceed to erect on the site a modern business block for their own use.

Miss Lottie Tillotson of Hawaii, a distinguished traveller and entertainer, will appear at Union Hall at Tupperville, on Monday evening, July 22nd. An evening of wit, humor, social and intellectual enjoyment will be provided.

The "queen of flowers" the rose, is at the height of its profusion this week. The editor has received generous donations from the rose gardens of Mrs. Cunningham, Mrs. Fisher and Mrs. (Dr.) Freeman. Sweet peas and very fine geraniums accompanied the roses from Mrs. Freeman's garden.

Our citizens are asked to prepare for an evening of mirth about the middle of next month, when local amateurs, well known for their histrionic ability, will appear in the amusing comedy "Between the Acts." The benefit of two very deserving objects is in view, namely, the Boy Scouts Association and the Recreation Hall.

Rev. E. Underwood has been invited to join the Cadet Camp being organized by the government for Cadets for School Boys of Cadet age, including Boy Scouts, and to take a party of boys. The Camps will be held at Aldershot, N.S., from August 16th to 21st, and the drills and discipline will be in accordance with "a memo of instructions for Cadet Camps" to be prepared at militia headquarters.

One of the prettiest streets in Bridgetown is marred by one unsightly spot, an open manure heap at the back of a stable, on which it is not an uncommon sight to see a hog or two sprawling. Though not close upon the street it is in plain view. A high board fence would remedy the offense to the sight, if not to other senses. The Monitor believes that the owner has enough public pride to apply the remedy were his attention called to it. Will he kindly take this hint?

Mr and Mrs. J. W. Beckwith arrived home on Friday with Dr. and Mrs. W. H. Beckwith of Halifax, in the latter's private touring car, after a most delightful auto trip. They left Halifax about a fortnight ago and made a tour of Nova Scotia by way of Amherst to New Brunswick, through the St. John Valley to St. John and thence by D.A.R. steamer across to Digby from whence they motored to Bridgetown, Br. and Mrs. Beckwith returned to Halifax on the following day.

The macadamizing of Granville street east has been completed to the point intersecting Queen street. A stretch of road at the South side of the bridge, which has been in bad condition whenever the roads were heavy, and especially when spring freshets caused the river to overflow the road, has been built up on the west side and heavily macadamized and nicely graded. In the bridge, the work being done under the superintendence of Ex-Councillor Anderson. The stone crusher has been in operation during the past week.

**IMPORTANT NOTICE**

It is especially desired that all accounts due the Monitor-Sentinel up to July first be settled without delay. Accounts have in most cases been rendered to customers within the past few weeks. If you have been overlooked, remind us.

M. K. PIPER

**LOCAL AND SPECIAL**

Miss Lottie Tillotson, Hawaiian entertainer, and a distinguished traveller, will give an evening of wit, humor and social and intellectual entertainment at the Baptist church on Saturday evening, 20th inst. at eight o'clock. Admission 15 and 25 cents.

Policeman Connell had occasion to arrest an intoxicated man, an out-of-town resident, on Sunday night, and finding him a difficult subject to manage, he called upon special constable Harry Eggar. Together they succeeded in landing their man in the jail, and when there they beat him into submission. The man appeared before Stipendiary Irvin on Monday morning and was fined \$5.00 and costs. It is stated he showed effects of the blows he had received and has secured as solicitor O.S. Miller to bring an action against the town for assault on the part of the constables.

**PERSONAL**

Mr. Harold Bent is visiting his parents, Mr. and Mrs. George Bent.

Mrs. Bogart, of Fernandina, Florida, is visiting her sister, Mrs. B. D. Nelly.

Mrs. Elderkin of Amherst is the guest of her daughter, Mrs. E. A. Hicks.

Miss Nellie R. Rice is spending a fortnight with relatives in Annapolis Royal.

Miss Grace Hoyt, who has spent several weeks in St. John, returned yesterday.

Mr. and Mrs. A.M. O. Morse and two children of Boston are visiting their relatives here.

Miss Nan Hoyt left yesterday for Baddeck, C. E. to visit her sister, Mrs. J. H. McDaniel.

Miss Lyle McCormick has accepted the position of matron in the Home for Aged Men at Halifax.

Miss Sadie Chesley has returned from a visit to her sister, Mrs. Murray, of Wollaston, Mass.

Miss Ruby Stronach of New York, visiting her parents, Mr. and Mrs. W. N. Stronach, Clarence.

Mrs. Avar L. Anderson and daughter, Annie, have been visiting friends in St. John the past week.

Mrs. Chas. Bent of West Somerville, Mass., is visiting her brother, C. L. Figgott and other relatives.

Miss Edith G. Wilson, of Cambridge, Mass., is visiting her grandmother, Mrs. Simon Wilson.

Mr. Gordon Goldsmith, for a number of years blacksmith of Bridgetown, has moved with his family to Lequille.

President Cutten, of Acadia College with his family, are at Deep Brook for the summer months, occupying the Jeremiah Sullis place.

Mr. Fred Ruggles of Paradise and Arnold Porter of Yarmouth, are spending a few days at one of E. & E. Marshall's cottages, Port Lorne.

Pastor R. M. Ruddle has resigned the charge of the Wilmot Mountain church to accept another call. His resignation takes effect Sept. 15th.

Mrs. W. Whitman of Clarence and grandson, Fred Cogates, of Taunton, Mass., have been spending a few days at Pundyside Cottage, Port Lorne.

Mr. and Mrs. F. G. Cochrane and little daughter, who have been visiting Mr and Mrs. Wm. Spurr, returned to their home in Panama last week.

Mrs. W. D. Lockett, Miss Mildred and Jack left Monday for Charlottetown, P.E.I., where they will visit Mrs. Lockett's parents for some time.

Mr. and Mrs. R. D. Flewellan, of Hampton, New Brunswick, and Miss Florence West of Sydney are guests at the home of Mr. and Mrs. G. H. Dixon.

Mrs. John Bishop and daughter, Miss Henrietta, after spending the past three months visiting Mrs. Tupper at Waban, Mass., returned home last week.

R. S. Miller of Annapolis Royal, who is on a business trip to the Pacific Coast, is reported as having passed through Regina shortly before the cyclone struck the city.

Mrs. F. E. Vido, of South Framingham, Mass., Mr and Mrs. H. D. Marshall, and Miss Ada Bauckman of Malden, Mass., visited their mother, Mrs. A. M. Bauckman last week.

Mr. Archibald Kinney, one of the victims of the railway wreck at Grand Lake, is at the Infirmary, Halifax, with both of his wrists severely injured. His many friends regret to learn of his painful experience and trust he will soon be entirely recovered.

**S. P. C. A. NEEDED.**

An observer of the operation of moving a small building by means of oxen to a point on the Bay Road, on Monday complains to the Monitor that the drivers of the oxen showed no mercy to the beasts and gave it as his opinion that twice as many pairs as were used were needed, with the insufficient and ill-contrived apparatus in use in the moving. Another case has been called to the attention of the Monitor, which the S.P.C.A., if there were a branch in Bridgetown would have to take a hand in. It is the cruel and merciless method used by a trainer of colts in handling his animals, the constant and cruel lashing he practises being not only a torture to the poor brutes, but to all citizens within hearing, having a sense of mercy in their souls.

**SASKATCHEWAN ELECTIONS.**

The reports from Saskatchewan last Saturday morning, give a Liberal majority in that province, the figures standing as follows:—  
Liberals elected 46  
Conservatives elected 8  
Seats to be heard from 2  
Elections to be held 2  
The numbers in the last house were Liberals 27, opposition 14.

Malcolm R. Elliott, A.B. Acadia '08 of Clarence, who recently received the degree of M. D., from Harvard, has entered upon his duties as house-officer at the Newton (Mass.) Hospital.

Mr. and Mrs. Charles Parker and family, Capt. and Mrs. W. L. Phinney and little daughter, of South Framingham, have been spending a few days at Hillside Cottage, Port Lorne.

Mr. Laurie Palfrey and sister, Miss Mary, left on Monday for Oxford to visit their brother, John, who is on the staff of the Royal Bank here. Miss Marguerite is also enjoying a vacation visiting relatives in Digby.

Mrs. M. E. Armstrong and children Maurice and Margaret, went to Yarmouth on Saturday to visit Mrs. Armstrong's daughter, Capt. and Mrs. B. Davis. Little Margaret is making satisfactory recovery from her recent accident.

Among the graduates at Mount Allison University, who received the degree of B. A. was Walter Friedman Ruggles, of Middleton formerly of Bear River, and son of Principal L. Ruggles, well-known to the teaching fraternity.

**J. H. HICKS & SONS**

# THE HOME

## FOR THE SAKE OF THE CHILD.

The public has been aroused all over the land to the danger to the child's health of the common house fly. The war against flies continues to spread. In certain cities in New York state a fly killing campaign will be carried on in an effort to exterminate the house pest. Prizes will be given to the three persons bringing the greatest number of dead flies to the respective city halls on a certain day. No flies born in captivity will be accepted, this prohibition being intended to bar the breeding of flies to win the prizes. It looks, therefore, as though the mortality among flies would climb to a high figure this summer. In many municipalities thousands of "Swat the Fly" circulars have been issued by order of the Children's Relief and General Welfare Society. The circulars advise as follows: "Swat the Fly." Flies carry more germs and sickness than anything else. Flies walk over manure and vile dirt, and then come into your house and walk on your food. Do not let a fly touch anything a baby puts into its mouth. Keep milk bottles covered and wash as soon as empty. Health Officer Hodge, of Worcester, Mass., has issued a manifesto to the children of the city in which he says that the school children of Worcester have it in their power to prevent one hundred unnecessary funerals this summer. The work of exterminating flies should spread all over the country. The London Lancet says that ten cents worth of formaldehyde will rid any house of flies without doing injury to anyone or anything else but the fly. Put two teaspoonsful of formaldehyde in a large saucer of water and set in the room; it will speedily empty the room of any flies that may be there.—Exchange.

## MEATS OFTEN ILL-COOKED.

Sausages are often served insufficiently cooked. They should be washed, put into a covered pan with a cupful of water and allowed to simmer for twenty minutes, reheating the water if necessary. Then take off the cover and brown the sausages, picking each one to let the moisture out.

Stews are very often cooked too quickly and in too much water. The meat should be washed and carefully looked over, then put into a pot with about two cups of hot water; more may be added as this boils down. This should simmer for four hours, the salt and onion being put in at half that time, not at the beginning. A pleasant flavor is gained by adding half a can of tomatoes an hour before this is served. The second cut of brisket makes an excellent stew. It may be stewed cut in slices like steak. The forequarter of lamb is the most delicious part of all if it is well cooked. The shoulder blade should be removed, an onion dressing added, if desired, then placed in a covered pan in a slow oven. It should roast for at least three hours. Veal is often under-cooked. Cutlets should fry for at least half an hour.

## SUMMER SALADS

Potato Salad.—Take one quart of potatoes, two tablespoons of chopped parsley, two tablespoons of grated onion, moisten with French dressing. Slice the potatoes while hot, mix the other vegetables with them, add more French dressing, and set in a cool place for two hours before serving.

Cardinal Salad.—Boil two large beets until tender; slice, cover with two tablespoons of vinegar and allow them to stand for twenty-four hours. Pour off the vinegar and use it in making a mayonnaise. Take one-half cup of white wax beans, one-half cup of peas, a few gherkins and a cupful of cold chopped potatoes, and mix with the red mayonnaise. Serve on lettuce leaves and garnish with red radishes.

Onion and Lettuce Salad.—Take off and set aside the outer leaves of two heads of lettuce, wash the hearts and drop them into cold water to make them crisp. Peel one small onion, and cut it into thin slices. Shake the lettuce in a clean tea-cloth to free it from water. Fill the salad bowl with alternate layers of the lettuce and onion slices, and serve with dressing in a sauce boat.

Spinach Salad.—Place one pint of minced, cold boiled spinach on a dish. Chop separately with a silver knife (steel discolors) the whites and yolks of two hard boiled eggs, and arrange them, mixed in little mounds on the spinach. Serve with dressing.

## TOO MUCH SHADE UNHEALTHFUL.

Avoid overshadowing of the dwelling-house by an excess of trees or vines. There are many houses known to the writer to be unhealthy by reason of too much shade—houses where much sickness and some deaths have resulted with successive tenants. We have no finer tonic than sunshine, and it is the lure of the health seeker who once basks in it and thereby falls under its magic and benignant influence. Vines must not be too freely planted on the house, or at least they must be kept from too much covering it. Trees are fully as baneful in their effect if allowed to thickly overshadow the dwelling.

Aside from death dealing dampness which is easily dispelled by light and heat, unhealthy influences are induced and fostered in houses where proper ventilation is prevented or retarded by too much shade. Heat is by far the strongest factor in ventilation, for without it we can have but little movement of the atmosphere or "change of air." Where the sun's rays are too much intercepted by dense shade this healthful movement of the air is reduced to a minimum and unhealthy influences will soon prevail if one lives under such conditions. Still, we must have trees and vines, and should have all that may be permissible with a proper amount of sunshine on the dwelling. The true mission of the house vine is not to cover or obscure, but to embellish and to soften and harmonize the hard, monotonous lines of severe architecture. Neither is this the mission of trees; they are but to frame the picture, to relieve the monotony of landscape and architecture, also somewhat to protect. All these fine points may be too seriously considered, so much so that each one oversteps the bounds of reason and laws of sanitation.

## PITFALLS TO AVOID

Don't think that to own a few hens at which to throw feed at night and morning identifies you as a business man among hens.

Don't "shew" and saw the air with your arms everytime you enter the chicken yard. The peaceful and contented bird should not waste energy in nervous shocks, but in laying eggs.

Don't cross a scrub with a pure blood. Success if better attained with good stock as a nucleus rather than the non-greg.

Don't buy so-called "cheap" foods—an engine cannot run on shale coal, nor a hen prosper on unwholesome fodder. The low in price is often the most costly in results.

Don't, please don't, scatter mash food over the ground and on boards; feed in sanitary galvanized or wooden feeding troughs. Bits of mash food scattered on the ground soon become tainted, and engender disease.

Don't keep broody hens about the place unless doing business on a clutch of eggs. Hens should be laying eggs or hatching them.

Don't overfeed; fat hens lay less than those in just the right condition. Besides, they are less active and so more liable to physical ills.

Don't change from one breed to another. Select the one that strikes your fancy, learn to know its characteristics and requirements, and you will be successful with it.

Don't put twenty-five birds in an environment only capable of accommodating half that number. Over-crowding is inimical to good health, and conduces to bad habits.

Don't allow ailing birds with the healthy; segregate them out by themselves where they can be safely and properly treated. Many of the ailments of poultry are contagious.

It is good to surround the homes of the people with beautiful, uplifting things, and a country without such environment will not stand. Mere commercial endeavors, without thoughts of civic beauty, flower smothered home surroundings and everything that tends to bring the country into the town are sordid and uninspiring.

We shall be glad to see more small gardens, the gardens of those who must follow this hobby in their spare hours, in the large cities. This feature, which impresses everyone who visits the old homelands, will come in time into this country—the fruit and vegetable plots and flowers with them, the cottages or houses—whichever one is pleased to call them—set, as far as possible amidst natural, and certainly economic, surroundings.—Canadian Courier.

# A MARTYR TO HAY FEVER

## "Fruit-a-tives" Cured After 15 Years' Suffering

CORNWALL CENTRE, ONT., NOVEMBER 27th 1911.  
"It was a matter to Hay Fever for probably fifteen years and I suffered terribly at times. I consulted many physicians and took their treatment, and I tried every remedy I heard of as being good for Hay Fever but nothing helped me.  
Then I heard of "Fruit-a-tives" and decided to try them, and I am thankful to say that this remedy cured me completely.

To every sufferer from Hay Fever, I wish to say—"Try Fruit-a-tives". This medicine cured me when every other treatment failed, and I believe it is a perfect cure for this dreadful disease—Hay Fever."

MRS. HENRY KEMP.  
The real cause of Hay Fever is poisoned blood, due to the faulty action of the bowels, kidneys and skin. "Fruit-a-tives" cleans the blood by regulating bowels, kidneys and skin, and thus relieves the excessive strain on the nervous system. Try "Fruit-a-tives".  
50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

## 'OLD HOME' WEEK AT ST. JOHN.

(St. John Globe)

It would have been impossible to secure better weather for the second day of "Old Home Week" and the crowds already in the city were largely augmented by fresh arrivals. The Artillery Band attended all the boats and trains and played inspiring selections which were greatly enjoyed, not only by the incomers but by many others as well. The first occasion at which their services were given was the arrival of the Eastern Steamship.

Steamer Calvin Austin arrived early on Tuesday. She had between five hundred and six hundred passengers on board, of whom it was estimated more than half remained in the city. Many more strangers came in on the Boston and Montreal trains while the Governor Dingley, which reached the city at 12.30, brought another two hundred and twelve from the Hub.

The decorations of the city are now nearly all in place and the streets present a gay and animated appearance. Men were still busily at work on the Post Office and Customs House buildings this morning. The Street Railway Company are getting ready to illuminate the walls of King Square with pretty colored lights. Many of the posts are already in place and the stringing of the wire and screwing one of the lamps will take only a very short time. In former years this illumination has been a popular feature, and has added much to the attractiveness of the square. While it is unfortunately true that the flowers are not as far ahead this year as could be desired, the lawns are looking their best. The trees also are in magnificent foliage.

WARNED TO MOVE.  
The federal cabinet have under consideration a notification given to the Dominion Government that drastic and speedy action must be taken to avert a tragedy. The government of Alberta has warned the fifteen hundred inhabitants of the pretty little town of Frank, at the foot of Turtle Mountain, in that province, that the whole town is in imminent danger of being wiped out by another great landslide worse than that of April 29th, 1903, when as a result of the coal mining operations a large slice of the mountains slid on to the village, killing seventy of its inhabitants and destroying a vast amount of property, including a mile and a half of the Crow's Nest Railway.

TO GET RID OF MILDEW.  
Cover the stains with a paste of salt and lemon juice and lay in the sun all day, moistening frequently with lemon juice. When the sun has gone wash out all the acid and salt. Repeat this process each day until the stain disappears washing each night.

Kidneys Wrong?  
If they are you are in danger. When through weakness or disease the kidneys fail to filter the impurities from the blood, trouble comes at once. Backache, Rheumatism, Sciatica, Gravel, Diabetes, Gall Stones and the deadly Bright's Disease are some of the results of neglected kidneys. Dr. Morse's Indian Root Pills contain a most effective diuretic which strengthens and stimulates the kidneys so that they do their work thoroughly and well. Try Dr. Morse's Indian Root Pills.

Dr. Morse's Indian Root Pills

## EARLY KINGSTON.

Fort Frontenac Was Forerunner of Present City.

The first permanent settlement made by white men on what is now the site of the city of Kingston, was military in purpose. It was expected by its founders that a post standing on the shores of Lake Ontario, at the mouth of the Cataraqui River, would attract the fur trade of the lake region, but that was a consideration secondary to the service such a post would perform in holding in check the Iroquois, whose cantonments were across the lake in what is now the western part of the State of New York. If they could be held in check, New France would be relieved of the greatest scourge that had plagued her since the flag of the Bourbons had been planted on Cape Diamond at Quebec. It was, therefore, to the military advantages of the place that Kingston owed its beginning, and from that its military character. During the last hundred years of the old regime the French maintained there a garrisoned post, which stood a siege before it hauled down its flag to the British in the Seven Years' War. The British increased its strength, and during their last war on this continent it was a military post and the main base for Lake Ontario. After the close of the war Great Britain spent hundreds of thousands of pounds on the fortifications at Kingston—works which for size and solidity were equalled only by those at Quebec. Today they are obsolete, abandoned, and ruinous, but still Kingston has not wholly lost its military character. It is the seat of our principal institution of military education—the Royal Military College—and the headquarters of part of our permanent militia—the Royal Canadian Horse Artillery. A soldier founded the place for the use of soldiers, and soldiers have been there ever since.

The soldier who founded that first post on part of the site of the present city of Kingston, was Louis de Buade, Count de Frontenac, the grim old war-governor of New France, and one of the strongest characters in the early history of this country. He was put in charge of his government at Quebec, Frontenac, in the spring of 1673, issued an order requiring the inhabitants of Quebec, Montreal, Three Rivers and other settlements to furnish him, as soon as the crops had been put in, with a certain number of armed men, and the requisite number of canoes. He also invited officers settled in the colony to join the expedition. In this way he collected the force with which he set out upon the invasion of the western wilderness, which, at that time, came down to the prairies of Montreal, then little more than a fort and trading post on the edge of the forest, which stretched away to the Great Lakes and the treeless prairies beyond. While the men, the canoes, and the supplies were being collected, Frontenac sent LaSalle, the great explorer, to Onondaga, the capital of the Iroquois confederacy, to invite the tribes to send delegates to a great council. A spot on the shores of the Bay of Quinte was first selected as the meeting place, but this was changed to the mouth of the Cataraqui River, where Kingston now stands.

Accompanied by his guard, Frontenac set out from Quebec on June 3. He stopped at Three Rivers, and a few days later arrived at Montreal, which he then saw for the first time. It consisted of a rude fort, a long row of small dwellings along the banks of the river, and towering over all there were the massive seminary and the spire of the church. The city of that time stood on ground now occupied by commercial metropolises.

Profits in Trees.  
The owner of a suburban or country home with an estate attached should not jump to the conclusion that a bit of "bush" will be unprofitable. In the first place it will help to retain the moisture and thus affect surrounding land which is cultivated. In the second place, it adds much to the beauty of an estate, and may be a joy forever to the inhabitants of said estate.

Writing in The Canadian Farmer, R. H. McMillan, of the Dominion Forestry service describes a small white pine plantation, thirty-five years old, which produced 88 cords of wood per acre. This, he claims, represents an annual return of \$10 per acre for each year of the life of the plantation. He tells that in a certain 34 years old larch plantation there are 710 trees to the acre. The thickest trees average nearly 8 1/2 inches in diameter, breast high, and 55 feet in height. At 34 years this plantation yielded 620 posts and three cords of firewood per acre. The net value of these products, after deducting with interest at three per cent. the cost of establishing the plantation, was \$330.82 per acre. This was at three per cent. an annual profit per acre of \$5.73 during the whole life of the plantation. The cost of establishing this plantation was \$18 per acre. Planting larch will at least be as profitable as growing ordinary farm crops. Larch is adapted to well drained soils, but will fail where drainage is poor. It should be closely spaced, and should never be planted with trees which will grow faster and overtop it. Trees which might profitably be mixed with larch are spruce and sugar maple.

Odd Coincidence, This.  
Sir James Grant, the veteran physician of Ottawa, at the Health Congress recently, congratulated Miss Ellen Babbitt of New York, on a paper she had read on the care of children, and incidentally mentioned a case when, in 1864, he had been on a train on the way to Washington, and had heard a baby coughing, croup, and about a cough. He had a "box" of medicine in his grip, and he hurried the porter to the mother, to tell her of the danger. Dr. Grant administered the medicine and saved the baby.

When he referred to the incident, Miss Babbitt said: "What that must have been my sister. I have often heard mother tell of that terrible night train journey, and how my sister was saved. But she never knew who the physician was." Her sister is still in the land of the living.

# Men's Cool Furnishings

FOR WARM SUMMER DAYS.

## JOHN LOCKETT & SON

You may be paid \$50 in Cash for improving your walk like this

108 Canadian farmers will receive cash prizes (twelve in each Province) in our big

**1912 FARMERS' PRIZE CONTEST**

WE held a contest last year in which 36 prizes were offered. This year there will be three times as many prizes (108) and therefore three times as many chances for you to win one of them. You do not have to use a large quantity of cement to win a prize. Many of last year's prize-winners used comparatively little cement.

**Prize Classes:**  
 Class "A"—For concrete walks, driveways, and steps. Prizes range from \$10 to \$50.  
 Class "B"—For concrete walks, driveways, and steps. Prizes range from \$5 to \$25.  
 Class "C"—For concrete walks, driveways, and steps. Prizes range from \$2 to \$10.

**Prize Schedule:**  
 1st Prize: \$50  
 2nd Prize: \$25  
 3rd Prize: \$10  
 4th Prize: \$5  
 5th Prize: \$2  
 6th Prize: \$1

**How to Enter:**  
 Fill out the coupon and send it to the Prize Contest, Canada Cement Company Limited, 503 Herald Bldg., Montreal. Send me, free, your book and full particulars of the 1912 Prize Contest, on a post card and mail it today. Address: Publicity Manager.

**Belleisle.**  
Belleisle, July 16th—Mrs. Samuel Reed of Roxbury, Mass., is the guest of her sister, Mrs. A. P. Nelly.  
Miss Annie Young, Miss Maude Coleman and Miss Janie Nelly are attending the "Old Home Week" at St. John.  
Mrs. John Halliday of Karsdale is the guest of Mrs. Archie L. Bent.  
Mr. and Mrs. Fred Dodge and son, Ronald of Bridgewater, are guests of his parents, Mr. and Mrs. R. L. Dodge.  
Mrs. Harris Oakes of Albano is a guest at the home of her niece, Mrs. Steppen Wade.  
Mrs. Thomas Kennedy and daughter, Mrs. Lowe of Yarmouth, were guests over last week of Mr. and Mrs. Frank F. Bent.  
Mrs. M. O. Wade and son, Eric, spent the week end at Karsdale, the guests of her sister, Mrs. Russell Longmire.  
Mrs. H. N. Gessner is visiting her daughter, Mrs. Samuel McAndrews at Wolfville.

**Belleisle Division installed the following staff of officers last week:**  
 W. F.—Genie Troop  
 W. A.—Jennie Parker  
 F. S.—Annie Young  
 Treas.—H. W. Bent  
 Com.—Jennie Bent  
 A. Com.—Muriel Parker  
 R. S.—Carrie Dodge  
 A. R. S.—Seymour Guest  
 I. S.—Corra Parker  
 O. S.—Harold Bent  
 Chap.—Josie Willett  
 P. W. P.—Genie Troop

**Hampton.**  
Hampton, July 15th—Among the many visitors to our village are Arthur Dew Foster, M.P., and Mrs. Foster of Kentville; Mrs. Bessie Foster, of New York; Mrs. G. E. Jones and son, Harold of Lynn, who are spending their holidays at the pleasant home of their parents, Mr. and Mrs. Judson Foster.  
Mr. Roy Brooks of Boston made a short visit to his parents, Mr. and Mrs. L. D. Brooks, returning to Boston again today.  
Mr. John B. Templeman, who has been remodeling "Lapond Cottage," has it about done, and is moving in this week. With a thorough water system from a never-failing spring, a fine coat of paint inside and out, the cottage is a credit to Hampton.  
Haying, which is now well under way, promises a good crop, though not up to two years ago.  
The extremely hot weather of last week was broken yesterday, when a very refreshing shower relieved the parching crops, but much more is needed.
