

CHIGNECTO POST AND BORDERER

SACKVILLE N. B., APRIL 12, 1894

THE ORIGIN OF THE TARIFF.

The discussion in the house of commons on the budget does not deal with the tariff changes to any extent. So far as the tariff bill is attacked outside parliament the answer is made on behalf of industries said to have been deprived of legitimate protection.

The establishment of a dairy school in connection with the Sussex creamery and cheese factory, to be followed by a similar course of instruction at Nappan is a practical move. It is of the highest importance that the cheese of the Maritime provinces should have a good name in the English market.

At Ottawa the members are still talking budget, that is to say they are still discussing the state of the country. It is said that the late Lord Sherbrooke once observed a member of parliament using an trumpet in order to catch the words of some house of commons orator, and expressed surprise that a man should refuse to avail himself of his natural advantages.

Attorney General Blair proposes to prove to the satisfaction of a committee of three out of five members of a legislative committee that he did not know about Mr. Quinn and the alleged sale of offices. He does not however propose to allow Mr. Powell, Mr. Pitts and the three ministerial members to enquire whether there was a sale of office to Mr. Quinn, and a payment of money with the election fund by him. This appears to be a matter of no consequence.

The Post supplement published this week which gives a very fair and correct idea of Sackville, its business men and its prospects is due directly and almost entirely to that enterprising ex-printer Mr. Chas. J. Willis. He it was who visited our representative business men and ascertained the facts of their lives and work. He it was who wrote up this matter in the choice and expressive English which our readers will find throughout the supplement: he it was who "stuck" a great part of the type, who read and corrected the proofs and assisted in making up the forms, and he it is who will receive such slight remuneration as the poor printer, in addition to the pleasure of doing good, is accustomed to receive for his weary toil.

The following comparative table shows the principal tariff changes proposed by the Wilson bill, as submitted to the Senate for ratification, in so far as Canada is concerned.

The Wilson Tariff bill is now fairly before the United States, and despite predictions to the contrary is thought likely to pass that chamber substantially as it now reads. The adoption of the act by congress would bring into effect the reciprocity clauses of the New Canadian tariff, and cause breadstuffs and lumber to be admitted into Canada free.

Work on Yarmouth's \$40,000 hotel, La Grande, under course of construction by Rhodes, Curry & Co. is making rapid progress and it will be finished in a few weeks. It will be the finest hotel building in the Maritime Province.

The Provincial Legislature.

THE WEEK'S WORK AT FREDERICTON.

On the 4th inst. the debate on Stockton's motion that prerogative rights of crown regarding distribution of insolvent corporations and persons should be abolished was continued by Sivewright, Powell and Stockton who favored resolution.

Mitchell committed a bill incorporating societies for the sale and distribution of seed grain on credit. It was promoted from Kent county where such societies were doing excellent work among the farmers. Agreed to with amendments.

On motion of Blair, seconded by Stockton, rule 8, for the admission of private bills was extended till the 12th inst.

Phinney made his inquiry as to whether a complaint had been made by John Taylor, of Kingston, Kent County, against Hugh M. Ferguson, Justice of the Peace and what action had been taken. Blair said such an action had been made but he did not think it well to state its nature to the House. The complaint, however, had been duly investigated and nothing disclosed so that a case of any gravity had been made out against Mr. Ferguson and it would be allowed to drop.

Powell committed a bill to enable the University of Mount Allison College to issue debentures. This was agreed to with amendments.

The bill to provide a woodman's lien for wages was agreed to with amendments.

On the following day the Woodman's Lien bill was amended to make the stampage of private owners as well as of the crown a first lien.

Mr. Blair introduced a bill to provide for a county valuation of the county of Westmorland during the present year.

Mr. Blair committed a bill relating to levying and assessing rates and taxes.

The Parraboro Shore.

FAMOUS VISITORS TO THE PLACE THAT IS HALLOWED BY HISTORY AND LEGEND.

There is a story told in glory that hangs around the Parraboro shore. It is a story that is as old as time and as true as the sun.

Other important men besides Glooscap have wandered about the Parraboro shore. The explorer Champlain was probably the first white man who ever visited Parraboro. He was there in 1604, and wrote, in language quaint and olden, a faithful description of these shores.

This is not going to be a continuous, letter-flowing, connected series of letters. It will be a mysterious mixture composed of the enchanter Glooscap and the ship Glooscap, of Captain Kidd and the pirate Captain Kidd, of the Indian children of the Devil and Tom Walker of everything and nothing of anything else that comes handy.

The "little" is ironic. For the shovels with which Glooscap broke the beaver dams was assuredly not being judged from the fact that the shovels were, well, this was the way of it. The beavers, Glooscap's greatest enemies, and who will know some day how it was that they were his greatest enemies—built a big dam from Cape Blomidon to the opposite shore of Minas Basin, that is, the Parraboro shore. When they had got the dam all nicely finished, and the people of the Annapolis Valley were in the midst of great feasting and merriment, there was a rush of mighty waters. The whole great mass took a swing around, and in a long mountain stretching from the Parraboro shore to the Parraboro shore, and the western end, which once touched the Parraboro shore, was broken up by the Indians Plegues, which means "the opening of a beaver dam."

Some of the best authorities say that Glooscap hung at them a shovelful of earth, which is now the shovelful that he made the break in the dam and the shot at the beavers with his hands.

The Indians on the St. John River say that there was only one beaver near the dam, and that Glooscap saw a rock at him. The rock is now the rock that he made the break in the dam and the shot at the beavers with his hands.

One night Glooscap, who fished in a pail instead of a basin for they appeared a whale, which was tossed into their stone canoe. They took it to Parraboro Island, and ate it, with the bones and all. Not a single trace of that whale may now be found at Parraboro Island.

Old Glooscap used to amuse himself somewhat after the style of the prophet Jonah. Like the famed stowaway he had a whole forerunner, the only difference being that the prophet, who liked being in the shade, rode in a cramped position in the hold, whereas Glooscap was wont to remain on deck. Not content with that, he was taken having a regard for posterity that night he aroused the ire of Sir Boyle Roche, he formed the "Boar's Back," the wonderful roadway that stretches over so great a portion of Cumberland, and which the country people aptly describe as a "curiosity." He did this great engineering work in order to accommodate some friends of his that were staying at Fort Cumberland, which, in those days, had a name that was almost English, is Hardwood Point. These friends wanted to go to Parraboro, and could not wait for the train.

Glooscap engaged an old woman as his wharman keeper, and a beautiful youth was his chere-boy. The giant dwelt on Parraboro Island for a long time, showing the Indians many things in woodcraft and medicine. But these people did not always treat their benefactor with proper respect, so he gave a farewell party to all the country's birds and beasts, with the exception of his enemies the beavers. There came the wolf, wolf, wolf, the old red wolf at the door—as Bilis Carman would remark—there came the bull and the bear, and the little boy who told the famous "bird in the greenwood tree." At the close of the At Home the Minnie Hivath stepped into his stone canoe, and paddled away to the west of the blessed. After his departure there was as great confusion among the beavers as there was at the lower end of the blessed. For they no longer understood one another. Many feuds arose from this cause, which their descendants continue till this day.

The Owl's Mourn.

THE OWL'S MOURN FOR GLOOSCAP, AND MAY BE HEARD IN THE WOODS NEAR PARRABORO ISLAND CRYING "KOO KOO SKOO!"

Other important men besides Glooscap have wandered about the Parraboro shore. The explorer Champlain was probably the first white man who ever visited Parraboro. He was there in 1604, and wrote, in language quaint and olden, a faithful description of these shores.

This is not going to be a continuous, letter-flowing, connected series of letters. It will be a mysterious mixture composed of the enchanter Glooscap and the ship Glooscap, of Captain Kidd and the pirate Captain Kidd, of the Indian children of the Devil and Tom Walker of everything and nothing of anything else that comes handy.

The "little" is ironic. For the shovels with which Glooscap broke the beaver dams was assuredly not being judged from the fact that the shovels were, well, this was the way of it. The beavers, Glooscap's greatest enemies, and who will know some day how it was that they were his greatest enemies—built a big dam from Cape Blomidon to the opposite shore of Minas Basin, that is, the Parraboro shore. When they had got the dam all nicely finished, and the people of the Annapolis Valley were in the midst of great feasting and merriment, there was a rush of mighty waters. The whole great mass took a swing around, and in a long mountain stretching from the Parraboro shore to the Parraboro shore, and the western end, which once touched the Parraboro shore, was broken up by the Indians Plegues, which means "the opening of a beaver dam."

Some of the best authorities say that Glooscap hung at them a shovelful of earth, which is now the shovelful that he made the break in the dam and the shot at the beavers with his hands.

The Indians on the St. John River say that there was only one beaver near the dam, and that Glooscap saw a rock at him. The rock is now the rock that he made the break in the dam and the shot at the beavers with his hands.

One night Glooscap, who fished in a pail instead of a basin for they appeared a whale, which was tossed into their stone canoe. They took it to Parraboro Island, and ate it, with the bones and all. Not a single trace of that whale may now be found at Parraboro Island.

Old Glooscap used to amuse himself somewhat after the style of the prophet Jonah. Like the famed stowaway he had a whole forerunner, the only difference being that the prophet, who liked being in the shade, rode in a cramped position in the hold, whereas Glooscap was wont to remain on deck. Not content with that, he was taken having a regard for posterity that night he aroused the ire of Sir Boyle Roche, he formed the "Boar's Back," the wonderful roadway that stretches over so great a portion of Cumberland, and which the country people aptly describe as a "curiosity." He did this great engineering work in order to accommodate some friends of his that were staying at Fort Cumberland, which, in those days, had a name that was almost English, is Hardwood Point. These friends wanted to go to Parraboro, and could not wait for the train.

Glooscap engaged an old woman as his wharman keeper, and a beautiful youth was his chere-boy. The giant dwelt on Parraboro Island for a long time, showing the Indians many things in woodcraft and medicine. Local.

SKIPPED OUT.—Philip H. Theriault, of the Queen Hotel, Buctouche, skipped out last week, leaving behind a number of sorrowful creditors.

FERTILIZER.—Mr. Alex Ford announces in another column that he is agent for the Provincial Chemical Fertilizer Co. of St. John. He expects a car of fertilizer about the end of April and will be prepared to supply customers.

RIVER HEBERT MINE.—Mr. Wm. Hall, of the Canada Coal Co. has leased from the River Hebert Mining Co. their coal mine at River Hebert and will hereafter continue to work it. The output of this mine has not been very large but the quality of the coal is such that a ready sale is made of that raised. Mr. Hall took over the property on the 1st inst.

DROWNED WHILE DUCK SHOOTING.—Eustache Hebert, aged 45, and leaving a large family, was drowned at Casey Cape, off Coogan's Saturday. He was out in a boat alone shooting geese, and the boat was upset by the gun kicking, throwing Hebert into the water. The accident was seen from the shore, but assistance could not reach him in time to be of any service.

MEMPHIS GOLD MINING CO., has arranged with its president, Mr. Neilly, for him to put in machinery for reduction by the new electrical process and receive his pay from the excess of profits above those yielded by the old system, until they shall amount to the cost of the plant (not to exceed \$5000) at which time it shall become the company's property. The shareholders are much pleased with present indications.

ACCIDENT AT AMHERST.—George Floyd of St. John, an employee in Rhodes, Curry & Co's car works at Amherst had his foot crushed to a jelly while crossing the railway track on which was standing Casey's special, on Monday. He supposed the cars to be still and went between them stepping on the drawbar. Just then the engine backed suddenly and caught his foot between the drawbar pin and buffer. Medical aid was summoned and the foot dressed. Amputation will probably be necessary. Floyd is aged 48 and has a wife and three children in St. John.

MR. ALLISON.—Miss H. S. Olive of St. John will be valedictorian of the University class of '94 having made highest marks during her course at the college. The other orators will be Miss Laura Morehouse of Sandy Cove N. S. and Messrs Seller, Townsend, Ardou, Ryan, and Archibald.

MR. HICKEY wife of Rev. David Hickey of Sydney C. B. arrived in Sackville last night to take up art studies under Prof. Hammond's direction at the Ladies College. Mrs. Hickey was a former student of Mt. Allison.

THE BUILDING COMMITTEE held a meeting on Tuesday evening when the tenders were examined and the contract awarded to J. F. Teed of Dorchester who it will be remembered is building the new University residence. Other tenders were from Rhodes Curry & Co. of Amherst, Oxford Farming Co. of Oxford N. S. and Robert Donald of Moncton. The contract was signed Tuesday evening and Mr. Teed will begin work at once. The building which is to be entirely of light olive stone will be a handsome addition to the stately pile which already crowns the classic Mount. The centre of the building will front where the tank now stands.

Following is the programme of the election held in Becthoven Hall to-morrow evening.

1. France Solo.—"Mimic." Federewski. 2. "Washington." A. S. Downes. 3. "A Russian Christmas." Selected. 4. Vocal Duet.—"Serenade." Schubert. 5. "Mimic." Miss Goodwin & Harper. 6. "Mimic." Miss Allison. 7. "Mimic." Friedrich Von Schiller. 8. "Mimic." George from 2nd Company. 9. "Mimic." Miss Robb. 10. "Mimic." Miss White. 11. "Mimic." Miss White. 12. "Mimic." Miss Deacon. 13. "Mimic." Miss Deacon. 14. Cutting from "The Life of the World's Fair." 15. "Mimic." Miss Hay. 16. "Mimic." God Save the Queen.

CUMBERLAND LUMBER, OCT.—The lumber out in Cumberland county will be about the same this year as last. Young Bros. & Co. have about eight million to saw—three at River Hebert and five at Half Way Lake. Kelly Bros. will cut three million at River Hebert; B. B. Barnhill, the same quantity at Two Rivers. Prescott, Gillespie & Co., three and a half million at Shulice; the Shulice lumber Co., about the same quantity at that place; C. T. White, between six and eight million at Apple River, and E. I. White, a million and a half at Sand River. Other people will manufacture smaller quantities. A very considerable quantity of piling has been cut up the bay this year. The Shulice Lumber Co. got out 8,000 pieces, B. B. Barnhill between 5,000 and 6,000, E. I. White, 8,000, and small operators lesser quantities.

THE STORM.—"The worst storm for any month in twelve years and the worst April storm in thirty years" so say the sage "oldest inhabitant" in regard to the late fifty hour storm the Sackville "oldest inhabitant" is thoroughly reliable and knows well what he is talking about. Such a blinding storm and such drifts have not been seen in Sackville for years and most other towns in the Maritime Provinces tell the same story. The Buctouche and Moncton railway closed down temporarily. The N. B. & P. E. R. ran no train Monday and on Tuesday with two engines and a plow, broke through with some difficulty and returned to Sackville on time. On the I. O. R. a special consisting of two engines and a plow and a fanger was all the time to keep the track clear all the evening C. P. R. stuck at Memramook for two hours and had to be shovelled out. No serious delays occurred however.

THE EASTER SALE.—The blizzard of the decade for April has wrought such havoc in its interior that the location that the ladies of St. Paul's Church guild have decided to postpone their Easter Sale and five o'clock tea till Thursday 19th inst. The elements it is hoped will be more propitious at this time, as the fair promises to be one of unusual interest, as several novelties are to be introduced. Indeed we may say the countries clasp hands in contributing to the entertainments of the evening.

SENATOR BOSTFORD'S WIFE.—The late Senator Bostford left a detailed will valued at \$65,000 as follows: To his wife all personal property valued at \$4,000 an annuity of \$1000, also a legacy of \$10,000 drawing interest at 6% until paid in full; likewise some other property to his step daughter Margaret Basted \$6500 to his grandson Edward R. Basted \$1000 and other property to his step daughter Frank F. Basted \$250 with other property; for the support of his grand daughter Lizzie Basted \$250; to Mrs. Basted \$250; to Alex Basted \$500. To his stepson J. Fred Allison he can collect the claim he held against the "Mason" property about \$1800; and left other property. To his stepson Frank Allison \$200; to Mrs. Harris Ruggles \$7000; to Francis and Ellen Murray \$250 each; to Mrs. Elizabeth Murray Mrs. Eliza DeLany, and Mrs. Eliza Barrie \$150 each; to Mary Snider \$200; St. Ann's Church, Sackville \$500; to Clara Norris \$1000; to Alice A. Kinson \$250; to Chas. Bostford the annual legacy of \$150 (He died before the Senator); to Fanny Murray \$500; to Francis E. Murray \$500; to Susan and Minnie Cogswell each \$500. The residue of the estate is divided into four parts as follows, one fourth part to the children and heirs of his brother George and his widow Fannie Bostford share and share alike; one fourth part to his nieces Annie Gertrude and Margaret B. Bostford share and share alike; one fourth part to the widow of his brother Elias, Jane Bostford and her children; the remaining part to the widow of his brother Blair Sarah Bostford and her children, Murray Bostford excepted. The last codicil is dated 12th March 1894.

MISS OLLIE TORBETT.

THE SUN SAYS.—Miss Torbett, bright and winsome, received a succession of greetings that demonstrated the strong hold she has obtained on the music loving people of St. John, and all her numbers were universally encored, the audience insisting on a double recall in two instances. Never before has a violinist created such a furore in this city.

Prof. A. A. Mack writing from Raleigh N. C. to the Post says: "Having just in the Post 'the announcement of a concert to be given in the Music Hall by the Concert Company' allow me to say in their behalf, that I am personally acquainted with these artists in Raleigh last December. Now any vocal soloist will surely be giving attention to the fact that the performance of all the songs in a good note is not only a necessity, but a duty. If you can do it, you will see that the Sackville people may avail themselves of this opportunity of hearing an excellent concert."

TYPHOID FEVER.—A little son of Mr. George E. Ford is reported dangerously ill with typhoid fever.

THE STANLEY COMMENCED carrying mails again on Wednesday 4th inst. She runs between Pictou and Georgetown.

WITHOUT FOUNDATION.—The report published in several papers lately that the C. P. E. was about to purchase N. B. & P. E. I. Ry., and put on a line of boats to the Island is as far as the Post is able to ascertain entirely without foundation.

NEW SAW MILL.—The Robb Engineering Co. of Amherst have ready for shipment for David Wheaton of Midgie a saw-mill out fit including Robb Armstrong Engine, Monarch boiler, perfection Rotary Mill mounted on their new iron wheels of their own design, Edge Trimmer etc.

MISS READ'S RECITAL.—Amherst papers speak very highly of the musical entertainment given by the pupils of Miss Maud Read in Royal Temple Hall Amherst on Friday evening last. Miss Read has a large class and has proved herself to be a very efficient teacher.

REVOLVER ACCIDENT.—On Tuesday Charlie Wry son of Albert Wry of Sackville was taking some cartridges from a revolver 32 calibre when in turning the cylinder the weapon was discharged and the bullet passed through his hand entering near the centre of the palm and passing out at the base of the fore finger. Dr. Bowser dressed the wound which is now doing well.

S. A. SUPPER.—A Salvation Army Supper will be held in their hall on Wednesday evening 18th inst. After the supper the meeting will be held in Chignecto Hall at which Ensign DesBrisay, Capt Frizzell, and Happy Jim Miller from Springhill will be present.

ANTIGONISH was the only County in Nova Scotia which voted against prohibition. Six out of the sixteen polling places in the county voted in favor and the percentage of those qualified to vote who availed themselves privilege was 78. The percentage in the several counties ranged from 92 to 70.

THE EASTER SALE.—The blizzard of the decade for April has wrought such havoc in its interior that the location that the ladies of St. Paul's Church guild have decided to postpone their Easter Sale and five o'clock tea till Thursday 19th inst. The elements it is hoped will be more propitious at this time, as the fair promises to be one of unusual interest, as several novelties are to be introduced. Indeed we may say the countries clasp hands in contributing to the entertainments of the evening.

SENATOR BOSTFORD'S WIFE.—The late Senator Bostford left a detailed will valued at \$65,000 as follows: To his wife all personal property valued at \$4,000 an annuity of \$1000, also a legacy of \$10,000 drawing interest at 6% until paid in full; likewise some other property to his step daughter Margaret Basted \$6500 to his grandson Edward R. Basted \$1000 and other property to his step daughter Frank F. Basted \$250 with other property; for the support of his grand daughter Lizzie Basted \$250; to Mrs. Basted \$250; to Alex Basted \$500. To his stepson J. Fred Allison he can collect the claim he held against the "Mason" property about \$1800; and left other property. To his stepson Frank Allison \$200; to Mrs. Harris Ruggles \$7000; to Francis and Ellen Murray \$250 each; to Mrs. Elizabeth Murray Mrs. Eliza DeLany, and Mrs. Eliza Barrie \$150 each; to Mary Snider \$200; St. Ann's Church, Sackville \$500; to Clara Norris \$1000; to Alice A. Kinson \$250; to Chas. Bostford the annual legacy of \$150 (He died before the Senator); to Fanny Murray \$500; to Francis E. Murray \$500; to Susan and Minnie Cogswell each \$500. The residue of the estate is divided into four parts as follows, one fourth part to the children and heirs of his brother George and his widow Fannie Bostford share and share alike; one fourth part to his nieces Annie Gertrude and Margaret B. Bostford share and share alike; one fourth part to the widow of his brother Elias, Jane Bostford and her children; the remaining part to the widow of his brother Blair Sarah Bostford and her children, Murray Bostford excepted. The last codicil is dated 12th March 1894.

Local.

FIRE AT HILLSBORO.—Justice George H. Barnett's store at Edgemoor Landing near Hillsboro A. Co. and the drug store near by kept by his son were destroyed by fire Monday night. Cause unknown. The insurance was light and the loss will be very heavy.

ROUSSEAU OF DEBUS.—Mr. Blair has committed a bill by which registrars of deeds be paid a fixed salary instead of by fees as at present. The proposed salary for Westmorland is \$2,500; the receipts for last year were \$3,101, and in 1891 \$4,081.

ATHLETES AND GLEE CLUB.—The concert which is to be given by Mr. Allison Athletes and Glee Club in Music Hall Saturday 14th promises to be a grand success. Extensive preparations are being made not only by the club, but in excellent form but particularly by the Glee Club. Considerable time has already been spent in rehearsal. A horizontal bar is now erected in Music Hall and other apparatus will soon be in place. Tickets for reserved seats sold from 11 in Goodwins Book Store are in great demand. Do not lose the opportunity of spending the most enjoyable evening of the season.

Termentine Notes.—Mr. Vincent is absent in Amherst assisting the chaplain pastor there at revival work.

Owing to the absence of the pastor there were no services at the Baptist appointments last Sunday.

A severe snow storm from the north east, and the wind blowing in a hurricane force, prevailed all day Monday. Snow ceased falling in the night, but continued drifting all day on Tuesday.

The regular afternoon train did not arrive on Monday, and the fear is that there will be no train to day (Tuesday) owing to the sticky nature of the snow and the heavy drifts along the Railway.

During the last week there has been some very good shooting and many birds have been captured. But success has not been so easy as it seems, and it is difficult. This is owing to the fact that the fowls are so harassed by the great numbers of sportsmen who go to and fro around the shores on foot and out on the water in boats.

Mr. Edward Allen of Upper Cape is furnishing the inside of his dwelling house which was begun a year or two ago. The work is being done by his brother Anslie who seems to be a master of the carpenter's art. The house is most conveniently laid out and is being finished in style that is once the nearest and most substantial. The finishing is chiefly all being wrought out by hand. The panels and the top finish of the wood work and parts of the mantel-pieces are made of Ash burl which gives an air of beauty to the surroundings. The parlor and kitchen are being furnished with all the modern appointments which reduce the labor of house-keeping to a minimum. Inside all the arrangements of this little mansion now remaining complete are such that, considering of course the generally acknowledged excellencies of the owner, the lady who is to be installed in it is being fitted in style that is once the nearest and most substantial. The finishing is chiefly all being wrought out by hand. The panels and the top finish of the wood work and parts of the mantel-pieces are made of Ash burl which gives an air of beauty to the surroundings. The parlor and kitchen are being furnished with all the modern appointments which reduce the labor of house-keeping to a minimum. TRIGGS' CAT.

BY EDEN PHILLIPOTS.

(Continued.)

"Change! Why! It was good enough for my ancestors. I'm no better than they were. What's the use of changing?"

The weather changed to be fine and warm, so when Triggs retired I generally strolled out into the grounds and smoked and turned over ideas.

And here I am on the threshold of my mystery: Triggs' cat. We met a few evenings after my arrival. He jumped from the darkness one night, rubbed himself against my leg, raised two green moonlit eyes to mine and mew'd.

Here, then, was Triggs urging one thing all day and Triggs' cat arguing for quite a different course by night.

GRANBY RUBBER. Look for this pattern on the heel when you buy a Rubber or Overshoe. It guarantees a perfect article.

SHILOH'S CURE. Cures Consumption, Coughs, Croup, Sore Throat. Sold by all Druggists on a Guarantee.

Corona and Chaska.

A ROMANCE SET FORTH IN SOMETHING WORSE THAN BLANK VERSE.

When Cora Belle Fellows was wedded to Chaska and came with her dusky liege lord to Nebraska the skies seemed bedecked with a constant aurora and the little hut seemed a palace to her.

Next morning I told Triggs I was going back to the city, and asked him if he had heard of any old country place like his in the market to let me know.

Edith's eyes looked out of every page; and I couldn't get interested in anything but my own thoughts. At length, however, I came on to a paragraph which I read with a certain attention. It ran thus:

Edith's eyes looked out of every page; and I couldn't get interested in anything but my own thoughts. At length, however, I came on to a paragraph which I read with a certain attention. It ran thus:

Edith's eyes looked out of every page; and I couldn't get interested in anything but my own thoughts. At length, however, I came on to a paragraph which I read with a certain attention. It ran thus:

CHIGNECTO POST

SUPPLEMENT.

SACKVILLE, N. B., AND ITS Representative Business Men.

We purpose in this Supplement giving our readers some idea of the importance of the town of Sackville, not only on account of its advantages as a place of residence, but on account of its industrial and commercial enterprise. There is more money invested in industrial enterprises in Sackville than in any other town of its size in the Maritime Provinces. To appreciate and understand the volume of trade and manufacture carried on here, a perusal of the following columns is necessary, and will repay the reader by the knowledge attained of this thriving and industrious town.

Nearly one hundred thousand dollars were expended in building operations last year, and a like amount will probably be put in circulation this coming season for the erection of substantial and elegant buildings. Among the buildings to be erected this season, that we know of, we may mention Fawcett's Foundry, the Owen's Art Museum, Geo. E. Ford's store, Enterprise Foundry Company's warehouse, Prof. Hunton's dwelling house. W. C. Milner, Howard Kay and Wm. Megeny also intend building, besides a number of others whose plans are not yet completed.

This fact alone may give our readers some slight idea of the present rate of growth of this energetic town.

Sackville is the most centrally located town in the Maritime Provinces, being situated about midway between Halifax, N. S. and St. John, N. B., and is connected with Prince Edward Island by the N. B. & P. E. I. Railway to Cape Tormentine, and thence across a narrow strait only nine miles wide to Cape Traverse, by boat, from which point the P. E. I. Railway will carry you to any part of the Island. It is situated at the head of the tidal waters of the Bay of Fundy, and is a port of entry, large shipments of lumber and farm products being made to the West Indies and United States, and kiln wood is exported to the Maine lime kilns. There is a regular packet to Boston, and one to St. John. It is also in the centre of a highly productive agricultural region, the surface, soil and climate being very favorable to farming pursuits. Standing in almost any part of Sackville you can look out over the famous Tantramar Marsh, the source of no little of the wealth of the farmers of Sackville and its vicinity.

Sackville ranks sixth on the St. John and Halifax Division of the I. C. R., being close behind Amherst, which, until the establishment of the car works in that town, it exceeded, in freight and passenger receipts. The rank in which the different towns come

is as follows: St. John, Halifax, Moncton, Truro, Amherst and Sackville.

The facilities for business have been greatly advanced by the establishment of branches of the Merchant's Bank of Halifax and the Halifax Banking Company. The mail, telegraph and express services are very good. The Western Union Telegraph Co. and the Canadian Pacific Telegraph Co. have offices conveniently situated for the transaction of business. Two express companies, the Dominion and the Canadian, do a large and increasing business, and are represented by the managers of the telegraph offices.

The local stores and warehouses would do credit, in many cases, to a town of much greater population. A building known as the Music Hall Block contains six large stores and offices, and one of the finest concert halls in the country. The stores are high studded, are lighted with great plate glass window panes, are heavily stocked, and, when brilliantly illuminated by electricity, have decidedly more of a city than country town appearance. The Halifax Banking Company, the Canadian Express Co. and the Canadian Pacific Telegraph Co. have their offices in this building.

The offices, store and warehouses of Josiah Wood, Esq., M. P. for this county, is a fine building of freestone, and adds very much to the appearance of the street. Powell's brick block, on the corner of Main and Bridge streets, is a three story building, and contains on the first floor the Merchant's Bank of Halifax and W. Turner's shoe store. The law offices of Messrs. Powell & Bennett occupy the whole of the second floor and the Masonic Hall occupies the third story. The Brunswick House and Chignecto Hall, on another hill, have a fine appearance, the former being a very large hotel.

There is a band stand between the Music Hall and Wood's store, where the Sackville Cornet Band favors the good citizens with sweet music on summer evenings.

Large lumbering operations are carried on in the immediate vicinity, and have proved highly remunerative to the operators. The output, principally deals, are shipped over the N. B. & P. E. I. Railway to Baie Verte, whence they are shipped to the English markets. A very large amount of capital is invested in industrial enterprises, the principal of which are, two foundries, two tanneries, two shoe factories, one larkin factory, two harness factories, one of which is the largest in the provinces, two wood-working factories, three carriage shops, two tin shops, and a well-equipped printing office.

One of the most important industries is that carried on at Wood Point, and consists of the two stone quarries of the Atlantic Brown Stone Quarry Co., operated by Messrs. Clark & Son, and the New York Freestone Quarrying Co., at present operated by Messrs. Ford, Wood & Robb, and employing in the neighborhood of 150 men.

The industrial and commercial enterprises of the town are treated of in detail in the columns following this sketch, and as it would be invidious to make mention of one more than another, a careful reading of the articles in question will better enable our readers to judge of the extensive business interests of the town. The town is supplied with the electric light and telephone by the Sackville Electric Light & Telephone Co., the service being excellent in every respect. Three hotels give accommodation to the traveller and tourist.

Sackville offers special inducements as a place of residence from an educational point of view, on account of the Mount Allison institutions of learning being established here, which have gained an enviable and thoroughly deserved reputation for efficiency. These institutions have greatly assisted to advance the best interests of the community since the inception of the Academy in 1843, and have materially added to the importance of the town by the extensive building operations carried on from time to time. In another column more detailed mention is made of resources, aims and prospects of the institutions.

There are many elegant private residences, nor are any of them neutralized by the proximity of shabby, neglected dwellings; on the contrary, neatness, taste and care are as conspicuous in the appearance of the smaller cottages as in that of the more pretentious residences; and a close and experienced observer could not make a visit to Sackville without being convinced that its population was intelligent, prosperous and contented. The handsome and elaborate buildings of Mt. Allison University are a particularly noticeable and picturesque feature, being visible for miles in every direction as they are situated on quite an eminence, as the name no doubt would suggest.

The climate is temperate and the situation of Sackville one of the most healthy, bracing and vigorous in the province. The townspeople are sociable as well as energetic and industrious, and there are various associations including the Masonic, Foresters, Royal Arcanum lodges and the Women's Christian Temperance Union.

The different religious denominations have large and commodious places of worship, the more prominent being the Methodist, Baptist and Episcopal church edifices.

The famous Ship Railway, of which so much has been written, is an object of great interest to

the traveller, and a drive to it well repays the time and trouble, as it is only five miles distant, and the historic forts Cumberland and Lawrence may be visited at the same time. There are many other pleasant and picturesque drives in every direction; and in the course of a somewhat circuitous career, the writer does not know of a more desirable town to make a home in.

Sackville offers many advantageous openings to capitalists, manufacturers, farmers and merchants. It is growing rapidly, steadily and substantially, and by the time the century closes will probably have attained such development as to fully justify even the most sanguine predictions of those who fully appreciate the many advantages it now controls.

There is an excellent opening for one of the many great pulp mills now being established throughout the other provinces of the Dominion, and other mills and factories could be established here under favorable conditions, the townspeople being prepared to warmly welcome such enterprises, and to give them all reasonable aid.

Sackville Stove Foundry.

CHARLES FAWCETT, PROPRIETOR,
SACKVILLE, N. B.

This foundry has been running steadily and successfully since the commencement of the business thirty years ago, and has always competed successfully with the manufactures of Ontario and those nearer home, both as regards quality and price. Mr. Charles Fawcett is a native of Sackville, and is a comparatively young man. He is probably the best known man in mercantile circles in the maritime provinces, as he has travelled and visited every town in the maritime provinces in pursuit of business.

Mr. Fawcett commenced business at the age of nineteen, with but a limited capital, as a tinmith and dealer in stoves which he imported from the States. He commenced the manufacture of stoves about six years after, with no practical knowledge of the foundry business, but with attention to business, perseverance and industry, today stands in the front rank of successful men of the period. It would be difficult to find an originator of a business such as Mr. Fawcett's has grown to be, that has been in business as long as he has without some change in the concern. There are few if any foundries in existence today that are under the same original management that they were when he commenced business. He has always paid dollar for dollar, and never asked for any extensions or renewals, and always pays cash every Saturday night to his workmen. He pays in wages altogether in his different business enterprises some five hundred dollars weekly. It is such men as Mr. Fawcett that build up a town, and it is only fair and just and right that he should receive every encouragement from his fellow townspeople, in patronage of his manufactures, both of the foundry and also of his cornmeal and feed mill which he operates at Moncton.

After several parties had unsuccessfully attempted to run this mill, Mr. Fawcett took hold of it, and, it is unnecessary to state, has made a complete success of it. There is a shingle mill in connection with the grist mill, and both are found to be a great benefit to the town of Moncton. The output of cornmeal and feed mill is sent to every town in the provinces, from Campbellton to New Glasgow. Employment is given in this mill to from ten to fifteen men, whose wages are paid every Saturday night.

The foundry was burned on Christmas eve of last year. The buildings burned were the moulding shop, 175x35; milling and dressing rooms, 43x35; fitting and finishing shop, 30x60; grinding and polishing shop, 24x30; carpenter shop, 30x60; nickel plating rooms, 30x60; boiler and engine room, 22x25, and the coal sheds. Everything in these buildings, machinery, shafting, belting, nickel plant, and 200 stoves, besides a great number of patterns and a lot of lumber, coal, etc., was destroyed. This fire entailed a loss of \$50,000, but Mr. Fawcett, with his characteristic energy, has had plans made and the stone for the foundations hauled during the winter, and as soon as the frost is out of the ground the erection of a new and larger foundry will commence.

The cessation of business due to the fire has been felt by the whole community, and the merchants are awaiting the commencement of operations and the return of the cash era, as obtained before the fire, when wages were paid and the purchasing power of a large number of mechanics was put in circulation.

Mr. Fawcett has built up a small village in the immediate vicinity of the foundry, which affords homes to numbers of his workmen. He also employs a number of men on his different farms, as he is a very enterprising and successful farmer, as well as business man and manufacturer. He has several farms. About fifty acres on the home farm are seeded down and cultivated, besides a one hundred acre farm about half a mile distant, together with several adjoining pieces, are cultivated, and make a profitable return. He cuts about 250 tons of hay, and has fattened 70 head of cattle a season until fattening stock became unprofitable. Thoroughbred stock such as Polled Angus and Durham were raised. Since he has given up cattle raising he has turned his attention to rearing horses, and has about twenty in his stables, including drivers, team horses, mares and colts.

The new foundry that has been commenced will be much superior to that destroyed, and it is intended to be the best shop in the Dominion. The foundations throughout will be stone laid in mortar. The moulding shop, 55x192, with a truss roof, no pillars to obstruct being necessary, will be a well lighted and ventilated building, with 32 floors for the moulders, with room to add as many more when required. The fitting shop, a two story building the same size as the moulding shop, and to which it is connected by the milling and polishing room, 55x50, will be fitted up with the newest and most improved machinery. A 60-horse-power Robb-Armstrong automatic engine, said to be the best manufactured at the present time, has been purchased from the Robb Engineering Company of Amherst, N. S., will be the motive power of the best equipped shop in the Dominion. The latest patterns of new cooking, parlor and hall stoves have been secured at a very large outlay. A large number of men will be employed, and it is expected that the new foundry will commence operations on the 1st of July.

The new premises, and also the office and warerooms and the private residence of Mr. Fawcett, will be lighted by electric light from a dynamo which will be on his premises and under his own control. A complete nickel plating plant will be put in, thus affording every facility for turning out the most finely finished goods in the stove line.

The productions of Fawcett's Foundry are so widely and favorably known throughout the provinces, and in Quebec and Montreal itself, that it is unnecessary to enlarge very much on the excellence of the work done. Suffice it to say, with the large and varied line of stoves and furnaces on hand, the trade of the different portions of the provinces and Quebec can all be supplied. By taking advantage of cheap markets and paying spot cash for large purchases, and obtaining every cash discount, and by the situation of the place along side of the vast iron and coal deposits of Nova Scotia, competition is defied, and he can successfully compete for trade in any part of the Dominion, as he can manufacture as cheap if not cheaper than any other manufacturer.

The line of stoves is so varied and great that nearly every manufacturer in the provinces and also in Quebec and Montreal find something that they re-

CHIGNECTO POST SUPPLEMENT.

quire for their trade. Stoves have been shipped to Newfoundland, Bermuda and the West Indies, and as it is expected to manufacture from 250 to 300 stoves per week this trade will be extended and increased.

James R. Ayer,

TANNER, AND MANUFACTURER OF WATERPROOF LARAKINS, SHOE PACKS, MOCCASINS AND LACE LEATHER. ALSO, HAND MADE WHOLE STOCK, WAX, KIPP, CALF AND GRAIN BOOTS; SINGLE DRIVING HARNESS, DOUBLE TEAM HARNESS, TEAM AND DRIVING COLLARS, MIDDLE SACKVILLE, N. B.

It would be difficult to overestimate the importance of the great business carried on by Mr. James R. Ayer, that is, its importance so far as the people of Sackville and vicinity are concerned; for not only does it afford remunerative employment to a great number of men directly, but also to many more indirectly, as it supplies a means of disposing of all kinds of farm products.

The magnitude of the tanning industry carried on by Mr. Ayer can hardly be appreciated, but when it is known that 400 hides and 300 skins are tanned weekly, a person begins to realize the extent of the business. The tanneries are fitted up with improved machinery which is run by steam. All the stock tanned is manufactured on the premises.

The hides for this business come from all parts of the Maritime Provinces, a by no means small amount coming from the island of Cape Breton. Rough tallow is also bought wherever available, and this is tried out and a superior article is manufactured, which is sold to the railways and the various mills in Moncton for lubricating purposes.

More than thirty different styles of harnesses are manufactured, varying in price from \$10.00 to \$35.00. About fifty men are employed in this department, and about \$55,000 worth of harnesses are turned out annually. It is the largest harness shop in the Maritime Provinces. The manufacture of larakins and shoe packs was commenced about twenty years ago, and from small beginnings has got to be one of the most important departments of this great enterprise. Lace leather is also manufactured and sold by the side or in strips. A large number of men are employed in the manufacture of men's long boots, in calf, grain and kipp leather, and 375 pairs are turned out weekly, and as the stock used is carefully selected, and skillful workmen employed, a ready and constantly growing demand is being created and supplied.

Mr. Ayer, who is a native of Sackville, is a comparatively young man, and succeeded his father, who inaugurated this enterprise more than fifty years ago, but upon a much smaller scale than that now operated. Mr. Jas. R. Ayer has acquired and well deserves the reputation of being one of the most enterprising men of the country. When he took charge he commenced extending his business and it has increased year by year until it has reached its present large proportions, and is an illustration of what well directed pluck and enterprise can do in this country of ours.

A large and varied stock of general merchandise consisting of flour, feed, meal, pork, beef, staple groceries, dry goods, hardware, furniture, &c., is kept constantly on hand to supply the many and varied wants of his large number of employees, and gives employment to a staff of assistants who give particular prompt and polite attention to customers.

The premises occupied are naturally very large and extensive, ten separate buildings are required for the manufacturing and warehousing of the goods handled, and occupying an area of close upon two acres in extent. 145 men were employed and about 150,000 dollars worth of goods are manufactured and placed upon the market, which includes the whole of the Maritime Provinces and parts of Ontario and Quebec. Three travellers are kept constantly on the road and three book-keepers are employed in the office. This large business is thoroughly systematized and orders are filled with a promptness and accuracy which might be profitably imitated by many much smaller undertakings. Mr. Ayer intends building a much larger and more conveniently arranged store this year, but the plans are not yet completed, and we cannot at this time give any definite statement of it.

In connection with the harness business, he is prepared to supply the trade, with carriage robes, blankets, whips, boots &c., and everything that goes to make a complete and comprehensive stock of horse furnishings, and the prices quoted are bottom figures, quality being considered.

Mount Allison Academy and Commercial College.

SACKVILLE, N. B.

Detailed description of the record, resources, aims and prospects of this institution, is, of course, quite beyond our power to give in the necessarily limited space available, and we will simply say here that it was organized in 1843, and is therefore, now in its semi-centennial year. It is conducted on strictly non-sectarian principles. The general denominational control under which it is placed, however, furnishes a sufficient guarantee that the moral and spiritual welfare of the students will not be neglected. The social advantages of the institution are unique. Through the kindness of Principal and Mrs. Borden, of the Ladies' College, with its 150 students, the students from the other branches are frequently invited to receptions in its drawing rooms, and occasionally the young ladies are invited to the Academy parlors. These social evenings, cannot but have a highly elevating and refining influence, while they make college life more enjoyable.

A new gymnasium was fitted up last year, with the best appliances, and a competent instructor engaged. The students have access to one of the finest libraries in the Provinces. In the reading room are found the principal newspapers of Canada, and some from Great Britain and the United States. The building is large, and is beautifully situated, each room is warmed with hot water radiators, and always comfortable. The rooms are airy, with high ceilings, and are comfortably furnished. The sanitary conditions are good, and Sackville is noted as a healthy place. The dining hall is a large and attractive room, bright and cheery. Pupils are admitted any time, but the best time is at the commencement of the term, as the classes are then organized. The only pre-requisites for admission, are good moral character, ability to read and spell, and age sufficient to enable a pupil to prepare regularly for recitation.

The Alumni Society of Mount Allison offers two Scholarships of \$25 each: one in classics and the other in mathematics. Mr. J. Wesley Smith, of Halifax, has given \$25 to be awarded as prizes, \$20 is divided between the two highest in the commercial department, and \$5 is given for the best essays and recitations throughout the year. Mr. Charles Pickard, of Sackville, gives a prize of \$10 to the student who obtains the highest average in all his studies and department throughout the year.

Mr. C. W. Harrison, M. A., the Principal, has had sixteen years experience in his profession. He was formerly Professor of Natural Science, in Hamilton Ladies' College, in Ontario, and for some years was principal of an important high school in that province.

Mr. W. H. Dalpe, B. A., is an honor graduate of McGill University. He is a painstaking and very successful teacher. Madame Dalpe has charge of the French classes.

Mr. A. W. Young is a graduate of the Ontario Business College, and has charge of the commercial department. Mr. Geo. M. Blakney, the mathematical master, holds a first class provincial certificate, and is a very successful teacher.

Mrs. Young has had such success as teacher of photography and typewriting as guarantees the highest advantages to her pupils. The surroundings and atmosphere are of a character highly favorable to progress, especially when compared with those of large cities or bustling towns, and although it is true here, as elsewhere, that "there is no royal road to learning," and each student must depend principally upon himself for whatever advancement may be made, still the favorable conditions here present cannot but be of material advantage to every scholar.

Information relative to terms &c., will be furnished on application to the Principal, C. W. Harrison, M. A.

Blair Taylor,

CARRIAGE MAKING, REPAIRING AND PAINTING, SACKVILLE, N. B.

The work done by Mr. Taylor is dependable in the full sense of the word, for selected material is used and the workmanship first class. The premises, which have been occupied by him for the past sixteen years, are 30x40 feet and two stories high. Those who find it difficult to get their work done promptly and in a satisfactory manner would do well to make Mr. Taylor a call.

J. L. Black,

WHOLESALE AND RETAIL DEALER IN DRY GOODS, GROCERIES, PROVISIONS, HARDWARE AND FURNITURE, MIDDLE SACKVILLE, N. B.

Very few men are engaged in active business for forty years, and the number of those who carry on one certain enterprise for that length of time, is so small that when a case is met with, it can hardly be given too prominent mention, but, even if such were not the case, we would still be justified in ascribing to Mr. J. L. Black a leading position in this review of Sackville's representative business men, for no man more universally known and esteemed, or is a more truly representative citizen in every sense of the word. He is a native of Amherst, N. S., and began operations as a dealer in dry goods and groceries, forty-four years ago, since which time it has grown to its present large proportions. He represented this constituency in the Legislative Assembly, for seven years, and he is also a member of the Board of Regents of Mount Allison University.

Mr. Black occupies spacious and convenient premises on Main St., and deals at both wholesale and retail, in flour, meal, feed, oats, hay, staple groceries, dry goods, clothing, hardware, furniture, &c. and carries a very large stock, quotes low prices and assures prompt service. The tailoring department, conducted by Mr. Snowden, gives employment to six assistants, so that orders can be filled at short notice, and those desiring a good fitting and honestly made garment can get just what they want at a moderate price at this establishment.

Mr. Black also makes a specialty of lumbermen's and farmer's supplies, and is prepared to fill the largest orders at the shortest notice. He has always made it a rule to deal liberally and fairly by his customers, and give them an opportunity to choose from a very large and complete stock, to sell all goods strictly on their merits, and to quote bottom prices on all commodities dealt in. Employment is given to quite a large staff of careful and attentive assistants, and customers are promptly as well as politely served.

Mr. Black is also largely engaged in the manufacture and shipment of lumber. His mills are located at Aboushagin, and are run by water power, he also has two portable, rotary steam mills in different sections of the country. This department of his business gives employment to a large number of men. His shipments are principally to the English markets, and made from Belle Verte and Point du Chene, and last year, amounted to 3,000,000 feet, and the prospects are that a larger business will be done this year.

Large farming operations are also carried on, as Mr. Black is a practical and very successful farmer. One hundred acres were plowed last fall for seeding this spring and a hundred and twenty five acres will be planted this season with grain and roots, 1400 bushels of grain, 5,000 bushels of roots, and 300 tons of hay were harvested last fall to supply the large stock of horses and cattle kept. About 85 head of beef cattle are sold annually and the same number are wintered. He has 140 tons of hay to sell this spring, besides having had to supply his mills where a number of horses are kept. He has fifteen horses in his stable, seven of them are Clydesdales, and beauties they are. He imported two mares with foal, three years ago. One stallion that he has is said to be the handsomest horse of the breed in the Dominion, he is not three years old, and weighs 1800 pounds.

Amos Lawrence,

TINSMITH AND DEALER IN STOVES, CASTINGS &c., CORNER LOBBE AND BRIDGE STS. SACKVILLE, N. B.

Mr. Lawrence commenced business late last fall and notwithstanding the hard times and bad winter weather, reports business much better than his expectations. The premises occupied are conveniently situated and are 25 x 40 feet in dimensions, and are well stocked with the latest and most improved machinery for the manufacture of all kinds of tinware. Finance work and roofing orders will be promptly attended to, skilled and experienced workmen are employed in turning out the best work. An assortment of stoves is also carried and he gives close, personal attention to the business, his prices are very reasonable, and no pains are spared to satisfy every customer.

J. W. Sangster,

DENTIST, MAIN ST., SACKVILLE, N. B.

That it pays to take care of the teeth is a fact that every one learns by experience, sooner or later. The principle "better late than never" applies with especial force to the care of the teeth,

for in the present advanced stage of dentistry, much can be done to preserve impaired or badly injured teeth and in this connection, we would call attention to the services of Dr. Sangster as an experienced and reliable practitioner, and one who keeps well abreast of the times. He is about to take a course in the American College of Dental Surgery, in Chicago. This college is the only one of the kind in the States, and is for the promulgation of the most advanced knowledge of this science, and is only taken advantage of by the more advanced and regular practitioners. Dr. Sangster is a native of Nova Scotia, and commenced the practice of his profession here in 1882. He has an enviable reputation as a well informed and scientific dentist and he has the confidence of the public and we have no hesitation in guaranteeing satisfaction to those availing themselves of his services. Parties living out of town would do well to make arrangements by mail, as by so doing they will be spared unnecessary travelling and serve their own interests in every way.

Sackville Drug Store,

AMASA DIXON, PROPRIETOR, DRUGS, MEDICINES, CHEMICALS AND TOILET ARTICLES, SACKVILLE, N. B.

The drug store conducted by Mr. Amasa Dixon is so generally and favorably known throughout this vicinity, that commendation of it will appear quite superfluous to many of our readers; but a review of the business enterprises of this town to be complete must include mention of this popular establishment. The business was commenced in 1872, by the present proprietor; the store occupied is on the corner of Main and York streets, and is the best business stand in the town, and is 80 x 90 feet in size, and is thoroughly fitted up, and is well lighted with full plate glass windows. Particular attention is given to the prompt and accurate compounding of prescriptions, and the assortment of drugs and medicines is so complete that all orders can be filled without delay. A soda fountain proves a great source of attraction to the thrifty of both sexes. A full line of druggist's supplies are carried, and the prices are in strict accordance with the lowest market rates.

Joseph W. Dobson,

HARNESS MANUFACTURER AND REPAIRER, SACKVILLE, N. B.

Considering the cost of the materials and the labor involved to make up a harness, it is sold at a very reasonable figure, and although it is possible to find establishments where fancy figures are charged, it is not at the store of Mr. Joseph W. Dobson, who makes light and heavy harnesses of every description, and sells them at low prices. A specialty is made of custom and repair work, which is charged, it is not at the store of Mr. Joseph W. Dobson, who makes light and heavy harnesses of every description, and sells them at low prices. A specialty is made of custom and repair work, which is charged, it is not at the store of Mr. Joseph W. Dobson, who makes light and heavy harnesses of every description, and sells them at low prices.

B. B. Teed, M. A.,

BARRETER, NOTARY, INSURANCE AGENT, &c. SACKVILLE, N. B.

As the amount of insurable property in Sackville and vicinity is not only already large but is constantly increasing there is naturally a brisk demand for dependable insurance, at fair rates. Those who own no insurable property have all the more reason for insuring their lives, in order to protect those dependent upon them. Mr. B. B. Teed is prepared to place fire insurance to any amount desired in the Union Insurance Company, of London, which he represents, and to issue life policies of the London and Lancashire Life Insurance Company, which are liberal in their provisions and absolute in the protection they afford. Full information will cheerfully be given by him on application in person or by mail, and all instructions will be cheerfully executed.

H. F. Pickard,

DEALER IN GROCERIES AND PROVISIONS, MUSIC HALL BLOCK, SACKVILLE.

Prominent among the most enterprising business houses in Sackville is that conducted by Mr. H. F. Pickard, who is engaged in the carrying on of an establishment devoted to the sale of staple and fancy groceries and provisions, &c. He has built up a large retail trade which is annually increasing, and to those who have inspected his goods and prices this seems but the natural result of the excellence of the one and the lowness of the other. The store is centrally located in Music Hall Block, and is large and commodious. Prompt and accurate service is assured, and goods are delivered free of any part of the town.

Brunswick House,

THOMAS ESTABROOKS, PROPRIETOR, FREE COACH TO AND FROM ALL TRAINS, SACKVILLE, N. B.

The Brunswick House may properly be called one of the "Institutions" of Sackville, for this hotel has been in existence so many years and has been so excellently managed from the start that it is well and favorably known to all whom business or pleasure call frequently to the town. It was established in 1858, by the father of the present proprietor. The old hotel was struck by lightning and burned to the ground, in August, 1882. The present hotel was opened to the public in 1888, and is a large, two-story building with Mansard roof, size 92 x 41, with an oil 45 x 35, containing 30 guest rooms, besides parlors, sitting, smoking and sample rooms, and has a fine, spacious and well lighted dining room. The hotel is conveniently and very pleasantly situated. It is a thoroughly neat and well kept hotel in every respect. The furnishings are modern and comfortable in style, while the service is efficient, being prompt and obliging. There is a stable connected with the house at which teams can be obtained at reasonable rates.

As Sackville is in the immediate vicinity of excellent hunting and fishing grounds and the genial proprietor an enthusiastic sportsman, brothers of the gun and rod will find this hotel just the place to make a halt for a few days, where they can get points about hunting and fishing to the best advantage.

R. S. Pridham,

PHOTOGRAPHER, MAIN ST., SACKVILLE, N. B. AND AMHERST, N. S.

Since the time that the great French artist discovered the art of daguerreotyping, photography has been making rapid and continual advances, until today it occupies a position of commanding influence. The photographic studios conducted by Mr. R. S. Pridham have been under his management for many years, and the popularity and success which he has attained in this business speak most conclusively for his skill as an artist and the good taste of the people of Sackville and Amherst. He occupies a fine studio where he is prepared to offer his patrons the most satisfactory work in all branches of fine photography. An examination of his work, and the testimony of his large circle of patrons will confirm all he claims for his talents and workmanship. He has every modern improvement connected with his business and is prepared to execute orders for all kinds and sizes of pictures that come under the head of photography. For fine photographs or out door views we most heartily recommend Mr. Pridham to our readers.

Sackville Bookstore,

WILLIAM I. GOODWIN, MUSIC HALL BLOCK, SACKVILLE, N. B.

All information as to how homes may be made beautiful at small expense cannot fail to be of interest. We therefore would draw attention to the fine display of goods made by Mr. Goodwin. There is nothing capable of so thoroughly changing the appearance of a room or an entire house as books and art goods. Mr. Goodwin offers a very select assortment to choose from. A large and fine variety of picture frames will be found at this establishment, and as low as the lowest. Stationery, key goods of all kinds and prices are dealt in, and comprise the latest publications in books and the most novel designs in stationery and fancy goods, including Japan ware, as well as an extensive assortment of window shades, drapery poles and room papers, and no one in need of goods in that line can fail to satisfy themselves at this establishment.

Horace S. Ford,

OYSTERS, COARS, CONFECTIONERY AND ALL KINDS OF CAKES, PIES, BREAD AND ROLLS SUPPLIED TO ORDER WITH PROMPTNESS AND CARE, HANSON'S BLOCK, BRIDGE STREET, SACKVILLE.

The man who carries on an establishment and furnishes food that is all right both as regards quality and quantity, is a public benefactor, and as such deserves every credit; and as Mr. Ford is just that kind of an individual, we take pleasure in commending his establishment to the public. A full stock of choice confectionery, fruit, cigars and temperance drinks are kept constantly on hand. Orders left at the store for ice cream, baked beans, pies, cakes, bread, rolls, &c. for family use, promptly attended to. Mr. Ford started business less than a year ago, and has succeeded much beyond his expectations. He speaks in the highest terms of the patronage that has been extended to him. Quality and quantity has always been combined by Mr. Ford, to which is added low prices; thus making an almost irresistible combination. Orders left for painting, decorating and paper hanging will have prompt attention.

CHIGNECTO POST SUPPLEMENT.

George E. Ford,

DEALER IN STAPLE AND FANCY DRY GOODS, CROCKERY, HARDWARE, GLASS, CROCKERY, MEATS, FISH, READY MADE CLOTHING, MILLINERY, FARMERS' SUPPLIES, CARPETS, AND FURNITURE, ALSO IN CONNECTION WITH ABOVE, A FIRST CLASS TAILORING DEPARTMENT.

Mr. George E. Ford is a prominent business man of the town, indeed, few men in the Province of New Brunswick are doing a more extensive and varied business, and probably none surpass him in enterprises that yield larger local benefits. Mr. Ford is of that type of man especially calculated to build up and improve his surroundings. As a business man, he has a quick judgment, ready and prompt decision, and very large executive ability. In short, Ford is a hustler, and as a natural result, a successful man. He is a native of Sackville, about 47 years of age and has been in business with his father and alone for a period of 30 years.

Mr. Ford's business instincts were displayed most characteristically about two years ago, when he purchased the Bower property (so called,) lying in the very centre of the town. Its central location makes it very desirable for building lots, which he now offers for sale. It is especially the most pleasant, convenient, and healthy situation in the town. Intending builders of homes stand even those who are seeking investment lots to sell again will find it worth their while to correspond with Mr. Ford, as to terms, etc. Mr. Ford deserves just credit for the enterprise that has thrown up this large and eligible addition to the residence portion of the town. He intends putting up a handsome and well appointed building to be used as a store by himself. It is to be of wood and will front 75 feet on Main St., and in the centre will be three stories with Mansard roof, with wings on each side two stories high with flat roof, extending back 90 feet. A front porch will extend under the whole building. The main store will be 52 feet wide, with a store on the right, 23x40 feet and connected with the main store, intended for the custom tailoring department, the workshop in connection will be on the second story. It will be heated throughout by hot water and will be the most complete and conveniently arranged store for the transaction of a general merchandise business in the Maritime Provinces outside of the larger cities. It is to be completed by the end of the summer ready for the fall trade.

His stock comprises full lines of dry goods, groceries, hardware, agricultural implements, crockery, millinery, ready made clothing, watches, clocks, jewelry, furniture, carpets, fancy goods, builders' materials and lime, and as it is constantly being renewed it always includes the latest and most attractive novelties.

We can heartily recommend to all classes of purchasers that no matter how much or how little you propose to spend you cannot possibly spend it to better advantage than at Geo. E. Ford's who not only handles ready made clothing, but does fine custom tailoring and carries a stock and employs a first class cutter that enables all forms to be fitted and all tastes to be suited.

The millinery department, conducted by Miss McDonald, is very popular among the ladies carrying a large and skillfully selected stock of trimmed and untrimmed hats and bonnets, ribbons, laces, velvets and millinery goods in general, besides fancy goods and being prepared to do millinery work to order, in the most artistic manner at short notice and reasonable rates.

It is undoubtedly true that home furnishing goods are cheaper to-day than they ever were before and that about every man can now afford to furnish his home comfortably and even handsomely. In this connection we may very properly call attention to the large and complete stock kept constantly on hand, consisting of parlor suites, bedroom suites, dining room furniture, kitchen furniture, centre tables, extension tables, easy chairs, rockers, lounges, mattresses, children's cribs and carriages and an assortment of oak and rattan furniture at prices as low as the lowest, and will bear the closest comparison with those of other dealers.

A competent staff of assistants are employed and customers are assured prompt and polite treatment, while orders are accurately filled.

The University of Mt. Allison College,

SACKVILLE, N. B.

The Mount Allison Wesleyan College was organized in July, 1862, under a charter obtained from the Legislature of New Brunswick. An Act was subsequently passed amending the charter, and changing the name of the Corporation to the "University of Mount Allison College." By virtue of this charter it possesses full University powers.

The Faculty is composed of such well known names as—David Allison, LL. D., President and Professor of Mental Philosophy and Logic. Rev. Charles Stewart, D. D., Professor of Moral Philosophy and Evidence of Christianity. Alfred D. Smith, LL. D., Wood Professor of Classics. Sidney W. Hunton, M. A., Professor of Mathematics. Rev. B. C. Gordon, D. D., Professor of Political Science. Wm. Morley Tweedie, M. A., Professor of English Language and Literature. Rev. William Andrews, M. A., Professor of Chemistry and Experimental Physics. Rev. Ralph Brecker, D. D., Professor of History of Philosophy. W. H. Dalpe, B. A., Lecturer in French Language and Literature.

The College is conducted on strictly non-sectarian principles. Students may enter the college either as regular undergraduates, having passed the regular matriculation examination; or as specialists, who do not look forward to a University degree. For undergraduates two complete courses of study are provided, viz.—1. The regular arts course for the B. A. Degree. The special course for those who prefer to substitute modern languages for Greek and Latin, and who may desire a greater number of elective studies than the Arts course permits. The degree of Bachelor of Philosophy will be conferred on students who have completed this course. There are also Honor Courses in classics, mathematics, science, Philosophy, and modern languages and literature.

Special arrangements will be made for the convenience of public school teachers who may desire to pursue a college course while continuing to teach during the summer term. Ladies wishing to pursue an undergraduate course will find at Mount Allison facilities for thorough collegiate training under the most favorable conditions as regards health, and domestic and social advantages.

Mount Allison was the first chartered college in Canada to admit women to all the privileges of regular collegiate courses and degrees. The collegiate year is divided into two terms of 13 and 21 weeks respectively. There are a number of students Aid funds, the parties of which are too lengthy for this short article.

The University Buildings are handsome, elaborate and substantial. The Memorial Chapel, where the classes are held, is built of freestone and is situated on quite an elevation, is a striking feature in the landscape. The University residence in course of construction and which will be ready for occupancy at the commencement of the next term, is situated at the junction of York and Salem streets, with plenty of room in the rear, and a broad sloping campus in front and looking far away to the eastward over the Maritime provinces to the wooded shores of Nova Scotia, the new building has probably the finest site in Sackville. It will be a noble structure, over two hundred feet long, of brick with stone trimmings, three storeys high, with Mansard roof, virtually affording another story. The monotony of the front is broken by projections and horizontal courses of stone, and on top, over the front door, is a cupola, set off by two smaller ones at the corners. Projecting from the centre, behind, is a large ell, containing the kitchen, washrooms etc., and another ell, running along York St., contains additional rooms for students. The building, like the Ladies' College, faces east, but there is an entrance for students on York St., and one for servants on Salem St. Each pair of students will share two rooms, a study and a connected bed room. Single rooms will be provided for those who prefer rooming alone. Besides the students' rooms there will be parlors, reception rooms, committee rooms, offices, hospital, dining room, kitchen, pantries etc., and an Assembly room, nearly as large as the University chapel. It is to be heated by the new system patented by Sines, David & Co. Eleven large furnaces with separate flues to each room to be heated, are in the cellar which extends under the whole building. It will be lighted with electric light, the wire for the building has cost three hundred dollars, this may give the reader an idea of the size of the building. When all is completed, no students in Canada will have a more beautiful or more comfortable residence than the students of Mount Allison University.

The Eucharistarian Society, is a voluntary literary society the history of which

reaches back for thirty years. Its special objects are, the acquisition of reading and power in debate. It has a well furnished room in the college in which meetings are held weekly. A branch of the Y. M. C. A. was organized in 1887, and has a membership of forty-five. A committee of this association is appointed to meet new students at the railway station and introduce them to college life. A commodious gymnasium and reading room are accessible to all the students upon payment of a moderate fee. In the course of the last two or three years valuable additions have been made to the library, and to the chemical and physical apparatus of the Science department.

All young men and women aspiring to the advantages of a liberal education should correspond with the president, who will be happy to answer in fullest detail.

Enterprise Foundry Co., Ltd., Capital, \$40,000.

W. B. DIXON, SECRETARY AND TREASURER, SACKVILLE, N. B.

The productions of the Enterprise Foundry are so well and favorably known throughout the Maritime Provinces that no detailed mention of them is necessary. They include over one hundred styles and sizes of different patterns of stoves and ranges that are unsurpassed for beauty and efficiency of design and excellence of material and workmanship. Spacious and well arranged premises are utilized and they are fitted up with improved machinery. They are situated near to the wharves and a track is laid to the warehouse. It is the intention of the management to erect a larger warehouse and to use the present one for storing patterns etc. The new building is to be 60x80 feet in size, and three stories high. A nickel plating plant will also be put in and the premises lighted by electric lights generated on the premises. This business is an old one, having been commenced by the firm of E. Cogswell & Co. in 1873. The present company commenced operations in 1888, and employ 25 men; wages are paid every fortnight. About \$5,000 worth of stoves and ranges are sold annually. They are putting in five-new patterns this spring and contemplate adding thereto during the year.

Hiram Copp,

DEALER IN COFFINS, CASKETS AND UNDERTAKER'S SUPPLIES, SQUIRE ST., SACKVILLE, N. B.

Mr. Copp makes a specialty of undertaking and is prepared to assume entire charge of funerals and to supply everything required for such occasions, at very reasonable rates. He has a single and double hearse, and carries in stock, caskets, coffins and all other funeral necessities, and is prepared to fill all orders entrusted to him with fidelity, intelligence and dispatch. Mr. Copp is also a master builder, and his work has always given every satisfaction to those who have favored him with their commissions. He is a native of Bale Verde, and so well and favorably known in this community.

Abner Smith & Son,

FANNERS AND BOOT AND SHOE MANUFACTURERS, MIDDLE SACKVILLE.

The productions of this shop are so well and favorably known that no detailed mention of them is necessary. Suffice it to say that they are unsurpassed for good workmanship and wear. The business is probably the oldest in the province. David Ferrington having commenced the business of tanning some seventy-five years ago, to whom succeeded James Hamilton. Mr. Abner Smith, the father of the present proprietor, Mr. James Smith, bought the premises in 1860, since which time Mr. Smith has gained such a reputation for his goods that his orders were always in excess of his output.

Mr. James Smith bought out the business on the first of February of the present year, and hopes to keep up the reputation of the work turned out, which is principally hand made. No steam tanned leather is used, as it is all tanned in cold liquor, making it much more serviceable. The tannery is two stories, 25x36 feet, and the shop is 60x36 feet, two stories high with a fine workshop and office. Thirty-five skilled workmen are employed throughout the year.

The present proprietor is a young man and has been identified with the business for a number of years, and is therefore thoroughly familiar with the practical details of the trade. He is very enterprising, and is deserving of the success which no doubt will be his.

J. W. Doull,

CONTRACTOR AND BUILDER, LUMBER, MOULDING AND PLANING MILL, BRIDGE ST., SACKVILLE, N. B.

A visit to the mill carried on by Mr. J. W. Doull will show that he is prepared to furnish all kinds of building finish made possible by the use of im-

proved machinery. The mill is two stories 30x75 with an addition built this spring 26x34. A spacious dry house is connected. The machinery is of the best type and power is furnished by a 25 horse power engine. Mr. Doull was awarded the contract of the Methodist Church at Shediac, which is to be built this season. Last year he had a large force of men employed as he had the construction of Eugene Bowser's, Alex. Ford's and John Humphrey's houses, besides the repairs and extension of the Central School house. Mr. Doull's facilities for building are unexcelled and as large building operations will be carried on in the near future it would be well for intending builders of homes to get estimates from him. We feel assured that anyone entrusting him with a contract will be pleased with the substantial thorough and workmanlike manner in which all he undertakes is carried out.

Mt. Allison Wesleyan Ladies' College, Owens' Art Institution, and Conservatory of Music.

SACKVILLE, N. B.

The Mount Allison Ladies' College was opened for the reception of students on Thursday, the 17th of August, 1884. The edifice was planned and finished for the express purpose of affording a pleasant, healthy, and in every respect desirable residence for young ladies requiring a course of liberal educational training. The main building exclusive of the Conservatory, is 160 feet long by 50 feet wide, three stories high, with a French roof. It is heated throughout with steam, each room being provided with one or more of Nason's radiators, fitted with valves, by which the temperature may be regulated at pleasure. The apartments are exceedingly commodious, and are all tastefully and comfortably furnished, so as to present a most inviting home for a large number of resident students. It is designed to be, in every respect, equal to any institution devoted to the advancement of female education in the Dominion. The eminence on which the college is situated, commands an extensive view of a rich and beautiful stretch of country. The surrounding grounds are well adapted for exercise and pleasant walks, secluded from public observation. The locality is specially noted for its healthfulness.

Over boarders and between 50 and 60 day pupils are in attendance, being the largest number since the opening of the institution. A steady annual increase in the number of boarders is reported. A conscientious, painstaking and experienced staff of 18 teachers is provided and every care is taken to insure the moral and intellectual welfare of the students. The physical welfare is greatly improved by the Physical Culture Drill conducted by Miss Landers, the talented teacher of elocution.

OWENS ART INSTITUTION.

Owens' Art School will, until the new building is erected, be conducted in Victoria Hall. The teaching staff consists of Professor John Hammond, R. C. A., an exhibitor in the Paris Salon, Royal Academy, London National Academy of Design, New York and other leading Art Exhibitions of Europe and America, also a member of the Royal Canadian Academy with its highest rank, R. C. A. Associate teachers Miss Bessie Alcorn, and Miss Alice Haggarty. The school commences August 1st on the opening of the collegiate year. The course of study is based on the system in use in the best art schools of Europe, which includes free hand and model drawing from the flat and antique, painting from the cast, still life, flowers, landscape, marine, portrait and the draped living model; also perspective competition, modelling, etching, and china painting.

The "Owens' Museum of Fine Arts" as the building that is to be erected this season is to be called, will be built of freestone, from our local quarries, and will be 115 feet long and 65 feet wide and one storey high. It will face on York St. between the Conservatory of Music and Memorial Hall. It will contain three galleries for the display of pictures which will be lighted from the roof, and four painting rooms in the rear, lighted by high side lights with a north exposure. This arrangement is regarded by artists as the best possible light.

The following, from the pen of the distinguished art critic, Dr. S. E. Dawson, published in the Montreal Gazette, September, 1889, after a visit to St.

John, conveys a good idea of the advantages possessed by the Owens Art Institution for imparting instruction in the fine arts.

"This leads us to call attention to a peculiarity in this gallery which renders it in some respects more helpful to a student than our own. It is the fact that the managers have expended their funds upon a very characteristic and wide selection of original studies in black and white, and in water color by the great London masters. These are invaluable as giving a key to the greater works of the artists represented. Thus, of the English school, the gallery has original works by Morland, Sir John Gilbert, Collins, W. H. Hunt, Copley, Fielding, Mulready, Harding, Stanfield, Nash, Constable, Landseer, Pyle, Herby, Sir Joshua Reynolds, Cattamole, Etty, West, Cooper, Lewis, Elizabeth Thompson, and others. In the collection of the president (Mr. Reed), also upon the walls, are specimens of Richardson, Pugin, Millais, David Cox, Sir A. Colcott, Prout, Creswick, Maclise, Corbould, Absalon, and Frederick Taylor. These cover the greatest names in English art. Some of these are slight sketches and some are finished works, but the important point is that the student can study the work of the English school by specimens from the hand of each master. There are also works from the hands of Gaspar and Nicholas Poussin, Carlo Dolci, Sir Peter Lely and Rembrandt, and among the moderns, from Horace Vernet, Claude Veret, Bouvieu, and Jean Francois Millet. Canadian art is represented in examples by L. O'Brien, Bell Smith and Blain Bruce.

CONSERVATORY OF MUSIC.

A knowledge of music has now become a necessary part of an education. As the study of higher mathematics cultivates the mind and reasoning powers, so the study of music cultivates the emotions, and opens to the student a greater capacity and love for the refined and beautiful in art and nature. The director of this department, Prof. Charles Woodworth Landon, is a talented and experienced musician, who has devoted his entire life to the study of music with remarkable success. In 1883, he organized the musical department of the College at Claverack, N. Y., into a Conservatory of Music. He organized the Music Teachers' Association of N. Y. State, was its president for two terms, for three terms was vice-president of the Music Teachers' National Association of New York, and is still on the committee, besides being vice-president of the musical department of the World's Fair. He is also editor of *Etude*, the leading educational magazine of music. Mr. Landon is a well known writer on musical subjects, and is a composer of some note.

The director is supported by three well trained and accomplished lady teachers who devote their attention exclusively to pianoforte instruction. Vocal culture is under the direction of a lady who has studied under some of the best vocalists in Germany. The violin department, already one of the most popular in the institution is in charge of an accomplished musician. A system of teaching is used that is in line with the most advanced modern ideas, thus rapidly developing a smooth, clear, expressive and brilliant style. Further information regarding this deservedly popular institution can be had upon application to the principal, Rev. B. C. Borden, D. D.

George Campbell,

MANUFACTURER OF ALL KINDS OF CARRIAGES, SLEIGHS AND HEAVY WAGONS, MIDDLE SACKVILLE, N. B.

Mr. Campbell is one of the best known carriage builders in this neighborhood. The business was commenced by his father, Mr. Roland Campbell, seventy years ago. He succeeded to the business on the death of his father in 1864.

Great care is used in the selection of materials, and the work is all done on the premises by skilled hands, Mr. Campbell's sons, Clinton, William and George are engaged in the business, and the work turned out has become so thoroughly and favorably known that nothing we can say will be new.

Mr. Campbell makes a specialty of undertaking, and is prepared to assume charge of funerals and furnish everything that is required. Coffins, caskets and undertaker's supplies are kept constantly on hand, so that orders can be filled without delay.

Alfred Atkinson,

HORSE SHOER AND GENERAL BLACK SMITH, MAIN STREET, SACKVILLE, N. B.

Mr. Atkinson is a native of Sackville and has conducted this business for eight years, and we believe now takes the lead in his special line. He is known and respected in the community for his sterling honesty and upright character. He does all kinds of blacksmithing, horseshoeing, carriage and sleigh ironing, and can fit up a quarry set of tools. He has had thirty years' experience, and we may say in closing that all work done at this establishment is fully warranted in every respect, being done at very reasonable prices, and in the best possible manner.

CHIGNECTO POST SUPPLEMENT

Woodford Turner,
DEALER IN BOOTS, SHOES AND RUBBERS, POWELL'S BLOCK, SACKVILLE, N. B.

When buying boots or shoes the main point is to get a pair that will fit you; and it is worth while to take more pains than one would suppose, for not only is good fitting footwear decidedly more comfortable than that which is too loose or too tight at one point or another, but it is also more durable, as has been repeatedly proved by actual test. Now, feet vary considerably in size and proportions, and hence the only way to get something that will really fit is to choose from a stock containing practically all sizes and widths; and if you make your selections from the assortment offered by Mr. Woodford Turner, Powell's Block, Sackville, you will have little trouble in getting a satisfactory fit, for the stock is complete, both as regards sizes and varieties of footwear.

His stock is bought from the old reliable firms of Ames, Holden & Co., J. & T. Bell, Geo. T. Slater & Son, J. & T. Stevens and Abner Smith & Son, who have their names stamped on all their manufactures as a guarantee of their goods. These are a few of the firms dealt with. This spring's stock far exceeds in quality and quantity any ever before offered in this place.

Mr. Turner is a native of Baie Verte. He began business about three years ago, and conducts the only exclusive shoe store in the town. Mr. Turner spares no pains to keep his assortment of boots, shoes and rubbers complete in every department, and there is nothing in the line of seasonable footwear he is not prepared to furnish. His prices are low as the lowest; the goods guaranteed as represented. No better place to trade can be found in this town.

Horsler & Gass,
MERCHANT TAILORS AND DEALERS IN DRY GOODS, GROCERIES AND HARDWARE, SACKVILLE, N. B.

The popularity of this firm since the commencement of the partnership business just a year ago, speaks well of the business methods and quality of stock. A year ago Mr. Thomas Horsler, the senior partner of the firm, and the manager of the tailoring department, after a successful business carried on since 1885, associated with him Mr. Gass, whose long, thorough and practical knowledge of the dry goods and grocery business makes him conversant with the wants of the public. An inspection of the stock offered by Messrs. Horsler & Gass at their store in Chignecto Hall Block will go far to explain the wide popularity of this establishment, for it includes full lines of dry goods and groceries. The leading novelties as well as staple goods being offered in both departments. Customers are served promptly and politely, and every thing sold is guaranteed as represented.

On the opposite side of the street is the tailoring establishment, a fine shop well lighted with plate glass windows, and stocked with a full assortment of woolsens and suitings, embracing the new and fashionable styles of the season, which will be made up to order in the best style and at the lowest rate for the quality of goods and work.

Mr. Horsler feels confident of giving satisfaction in every respect, and is pleased to show goods and assist in the selection of material. Orders receive prompt attention, employment being given to seven assistants, and with the close supervision of Mr. Horsler all tastes can be suited.

Edward Read,
DEALER IN GROCERIES, PROVISIONS, CROCKERYWARE, AND RUBBERS, SACKVILLE, N. B.

Among those establishments (which both on account of the character and extent of the stock carried, and the low prices named on the articles comprising the same), worthy of prominent and favorable mention, is that conducted by Mr. Edward Read, this gentleman caters to all classes, while his prices are as low as the lowest, quality of course being considered. The premises occupied are spacious and well lighted. A full selection of everything usually carried in a first-class grocery and provision store is always to be found here. Crock-

ery, glassware, stoneware and lamp goods are also dealt in, and prices quoted defy competition. A complete line of boots, shoes and rubbers are shown. Mr. Read gives personal attention to customers, and guarantees goods to be as represented.

John Hickey,
DEALER IN DRY GOODS, GROCERIES AND HARDWARE, BELL'S CORNER, SACKVILLE, N. B.

We confess that we don't know how long the store occupied by Mr. John Hickey has been utilized for the sale of dry goods and groceries, for it was founded by Mr. Bell, but we do know that its present general proprietor has been in possession since the fall of '93. Mr. Hickey is a native of the county, and has been in business a number of years, and no means are neglected to assure satisfaction to his customers. The charges are uniformly moderate, and we feel sure that all dealings with this gentleman will be satisfactory.

William Megoney,
BARBER, RAZORS, BRUSHES AND SOAPS, ALSO PROPRIETOR OF THE SACKVILLE OYSTER SALOON, CHIGNECTO HALL, BLOCK, SACKVILLE, N. B.

The success that Mr. Wm. Megoney has attained has been earned by strict attention to business, and courteous attention to customers. Mr. Megoney started the barber business in 1887, and is thoroughly conversant with his business in all its branches. In the fall of 1893 he opened an oyster saloon, and keeps on hand all the good things found in a first class restaurant. Oysters served in all styles and delivered to order by the quart, peck or barrel. He reports business prosperous considering the state of the weather and roads this winter.

J. & T. L. Wood,
BLACKSMITHING AND HORSE SHOEING, MAIN STREET, SACKVILLE.

A blacksmith shop is necessary in a community, but in order to be ranked among the leading places it must be first class in every respect. Such is the reputation that Messrs. James & Thomas L. Wood have earned for themselves. They make a specialty of horse shoeing, and those who own valuable horses can appreciate the services of one who understands this branch of blacksmithing as do both the proprietors of this shop. Strictly first class work and moderate prices, with prompt attention to all orders entrusted to them, make this shop one to be patronized.

Albion Gray,
DEALER IN FLOUR, FEED, MEAL, GROCERIES, CANNED GOODS & C. MAIN ST. SACKVILLE, N. B.

This establishment is really a boon to the neighborhood and we take pleasure in commending the enterprise, for we know that Mr. Gray's methods of doing business are bound to please. The store occupied is Squire John Ford's old store and the stock on hand is new and complete. The Groceries and Provisions are the best that the markets afford, and the Canned Goods handled are varied in kind and best in quality, and are quoted at prices as low as the lowest. Boots, Shoes and Rubbers may also be bought to excellent advantage, and the goods sold are never knowingly misrepresented.

Doull & Dickie,
WOOD WORKING, PICTURE FRAMING AND FURNITURE, BRIDGE STREET, SACKVILLE, N. B.

The work done by Messrs. Doull & Dickie is strictly first class, and they are prepared to attend to all orders for planing, matching, turning, bracket work, etc., with accuracy and at short notice. The premises occupied comprise a very conveniently located shop, 35 x 65, and three stories high. A twenty-five horsepower engine runs the machinery. Both members of the firm are well known in Sackville and vicinity. They intend carrying on the furniture business, and to open a complete stock of all kinds of furniture. They have a spacious and well lighted warehouse, and goods can be shown to excellent advantage. They also keep a well selected assortment of picture moulding and picture frames are made to order with neatness and despatch. Moderate charges are the rule in all the departments.

Charles Pickard,
DRY GOODS, HATS, CAPS AND GENTS' FURNISHING GOODS, MUSIC HALL BLOCK, SACKVILLE, N. B.

The popularity of the establishment conducted by Mr. C. Pickard is by no means the result of luck, but on the contrary has been brought about by hard, intelligent and faithful work. The premises occupied are a large, spacious and well lighted store in Music Hall Block, and containing an extensive and well assorted stock of goods. On the score of magnitude alone Mr. Pickard's assortment is paralleled by few if any similar stocks in this section, his aim being, not to sell cheap goods, but to give best possible value at a fair price. The very latest and most fashionable goods are always well represented. Mr. Pickard is the only direct importer in the place; his dress goods, linens, silks and satens are imported direct from England, and he receives Canadian staples direct from the mills in bale lots. He pays spot cash, and takes advantage of all and every trade discount, and is thus in a position to sell lower than others in the same line. The millinery and fancy goods department, under the management of Miss Carter, is surpassed by none in this section of the province. A select stock of the very latest novelties

Mr. Pickard, besides his business enterprises, is an enthusiastic and successful farmer. To give an idea of his success, we herewith present an engraving made from a photograph of a field on the farm of Mr. Charles Pickard, showing where the chemical fertilizer and where the ordinary fertilizer were used. From one acre of potato land (a measured acre), on which was used five barrels of special potato phosphate only, he got a crop of four hundred and thirty-one bushels—7 1/2 lbs. About three-fourths of the potatoes were Beauty of Hebron, the remainder Black Montanas.

George S. Wry,
PAINTER AND PAPER HANGER, SACKVILLE, N. B.

As spring approaches the time for house cleaning is at hand and painting, papering and lamination are the subjects which are occupying the attention of all good housekeepers. We would here call the attention of those in need of a painter or paper hanger, to the work done by Mr. George S. Wry; who for rapidity, style and neatness cannot be surpassed. Mr. Wry, although a young man is making for himself an enviable reputation as a painter and decorator, and is building up a flourishing business. He gives employment to a number of experienced painters, and is prepared to do better work this season than ever before and at reasonable rates. All orders receive the promptest attention and work is guaranteed.

W. H. Tracy,
RESTAURANT, LOJNE ST. NEAR RAILWAY STATION, SACKVILLE, N. B.

Mr. Tracy opened this restaurant four years ago and has always enjoyed the patronage of the largest portion of the community. It is a thoroughly well managed establishment, and without making any extravagant pretensions, affords a decidedly superior service. The restaurant is close to the depot and meals are served upon the arrival of all trains and at all hours. Canned goods, oysters, choice confectionery, fruit and temperance drinks are kept constantly on hand. Oysters are served in all forms and delivered to order, by the pint, quart or gallon. His prices are low, and those who give him a call will surely treat again.

in millinery and fancy goods are constantly being placed upon his counters. It is the only store in the place that is devoted exclusively to dry goods and gents' furnishing goods. One feature of his business in the line of boys' and men's ready-made clothing is particularly worthy of attention. He buys the cloth and trimmings and has them manufactured to order, and therefore gives much better value than otherwise. All classes of trade are catered to, and the closest buyers agree that at no store in the town is more genuine value given for money received. Six reliable and well-informed assistants are employed. Customers are assured prompt and courteous attention, goods being cheerfully shown and every opportunity given to make a deliberate and satisfactory selection.

Mr. Pickard also operates a steam saw mill at Brooklyn, and employs from twenty-five to thirty-five men. The cut this season will be about one million feet of deals and dimension lumber. He has also got out three hundred cords of wood during the past winter.

Mr. Pickard is a young man, a native of Sackville, and is one of the most prominent members of the community, and during his business career has gained a most enviable reputation for constant attendance to business and strict integrity.

The Hebrons grew at the rate of about 400 bushels to the acre, and the Montanas fully 600 bushels to the acre. The potatoes were of good size and clear of scabs. About fifteen barrels of the Provincial Fertilizer Company's fertilizer were used on turnips, carrots, beets and grain, and the results were very satisfactory, even more so than that stated above. This will compare very favorably with the vaunted yields of the far West, and shows conclusively that it is not necessary to leave this province to succeed on a farm if a little energy, intelligence and industry are used.

Alexander Ford,
AGENT FOR JOGGIN'S COAL AND PROVINCIAL CHEMICAL FERTILIZER CO'S (LIMITED) FERTILIZERS, SACKVILLE, N. B.

Fuel is a very necessary article of consumption to every one and a good article can be procured from Mr. Alex. Ford, who is agent for the Joggin's coal, which is unequalled in quality, all orders entrusted to him receive the promptest attention. He also handles the Provincial Chemical Fertilizer Company's high grade fertilizers. These fertilizers have been used throughout many sections of the province. They have been endorsed by many leading farmers, and we feel warranted in advising farmers who require a good fertilizer to try these. Mr. Ford is a native of Sackville, and has the confidence of the people, and when he guarantees an article it may be depended upon. He is also prepared to furnish teams of a character that makes them presentable everywhere, at short notice and at reasonable rates.

C. W. Warmunde,
DEALER IN CLOCKS, WATCHES, JEWELRY AND SILVER WARE, SACKVILLE, N. B.

The stock kept by Mr. C. W. Warmunde is of course bright and handsome but still it owes a good part of its attractive qualities to the taste and skill with which it is arranged. Business was commenced here in 1890, and the public have learned that the articles sold at this establishment prove just what they are represented to be in every respect. Mr. Warmunde offers a fine line of clocks, watches and jewelry, and he quotes the lowest market prices for them. He gives personal attention to the repairing of watches and the price is moderate.

M. Wood & Sons,
IMPORTERS AND WHOLESALE DEALERS IN FLOUR, FEED, GROCERIES AND PROVISIONS, BRIDGE STREET, SACKVILLE, N. B.

Notwithstanding the high average character of the mercantile establishments located in Sackville and vicinity it is obvious that here as elsewhere there must be certain houses in each line that excel all others, and it is an open secret that at this establishment unequalled inducements are offered to purchasers, as they are enabled (by reason of large importations, careful study of the markets, by taking advantage of every cash discount, and buying direct from producers and manufacturers, and importing in their own bottoms), to quote positively bottom prices on positively dependable goods. West India goods, flour, feed, meal, oats, provisions and staple groceries are dealt in.

Mr. Josiah Wood, the only surviving member of the firm, is a native of Sackville, was educated at the University of Mount Allison, where he graduated in 1866. He was called to the New Brunswick Bar in 1866. After practicing a short time he relinquished the profession to enter mercantile life. He has represented the County of Westmorland continuously since the general election of 1882. At the last general election his majority was 2,165. He is also president of the N. B. & P. E. L. Railway, director of the Sackville Music Hall Company, and treasurer of the University of Mount Allison.

The business was founded many years ago by Mr. Mariner Wood, since which date a large and still increasing trade has been built up. The premises made use of comprise a very fine substantial building of freestone, erected some 21 years ago, and has a frontage on Bridge street of 30 feet, extending back 72 feet, two stories high, together with a warehouse, 35x82, to which a side track is laid, thus affording all facilities necessary to enable operations to be carried on to the best advantage, the largest orders being filled at short notice. He is largely interested in farming and stock raising. The West India Trade was commenced in 1849, in a vessel built by the firm, and has been successfully carried on ever since.

James Robinson,
JAMES ROBINSON, HORSE SHOEER AND GENERAL BLACKSMITH, MAIN ST. SACKVILLE, N. B.

Mr. James Robinson is the oldest established blacksmith in the town, and his work is so well known as to need but little said in its favor. He has been established at his present stand which is very conveniently situated in the centre of the town, and has a most respectable appearance for a blacksmith shop, for thirty years, and all work done by him is sufficient guarantee of its being well done, while his prices are reasonable and moderate. Carriage work and all kinds of blacksmithing is attended to, and we would advise any one needing the services of a blacksmith to give him a call.

R. M. Fulton,
DEALER IN HARDWARE, PAINTS, OILS, GLASS, AND HOUSEHOLD FURNISHINGS, MUSIC HALL BLOCK, SACKVILLE, N. B.

Retail purchasers are not generally expert judges of the articles they wish to procure, and hence are liable to imposition. To such we would say, buy of a reliable house, such a one as is conducted by Mr. R. M. Fulton, who deals in all kinds of hardware, paints, oils, glass and farming tools, and then you may feel assured of perfectly honorable treatment full value being returned for every dollar received.

Mr. Fulton commenced business here three years ago and by attention to business, a courteous and pleasant manner, has made himself very popular, and as a natural consequence has made a success of his business.

Hibbert Black,
MANUFACTURER OF FINE CARRIAGES, SLEIGHS, ETC., REPAIRING OF ALL KINDS PROMPTLY ATTENDED TO, SACKVILLE, N. B.

Mr. Black commenced business about twenty years ago, having succeeded his father, who had carried on the business for forty years previously. The premises occupied are 25x40, with two stories, and the work turned out may be safely depended upon to prove as represented, and the prices as low as the lowest. He is also prepared to do all kinds of jobbing work in proportion to the work.
