MAYOR'S POCKET PICKED BUT \$600 OF BAIL WAS SAFE IN THE VAUL

Sensational "Touch" Was Made Shortly After Cash Had Been Accepted for the Appearance of a Man Charged With "Flimflamming" Visitors at the Western Fair.

Mayor Beattie, who was actingpolice magistrate at the time, had his pocket picked on Friday last, and some small change removed.

That he was not robbed of \$600 was by the merest good fortune.

His worship attended a meeting of the water commissioners in the city hall. While there, Mr. J. M. McEvoy solicitor for F. Kipp, of Ottawa, who was arrested on a charge of flimflamming visitors at the fair, and a friend of Kipp's, called his worship out of the building and offered to give \$600 cash bail for the release of the

After an hour or two, he missed his pocketbook. He had it when he was at the police station, but on his way home it disappeared. He notified the police, but kept very quiet about the occurrence, and only today consented to give out a statement. A NEAT BIT OF WORK.

"It was a neat bit of pocket-picking," said his worship. Fortunately I had only a dollar or so in change in the purse at the time, or it would have all gone. Something seemed to strike me when I left the city hall to go and place the \$600 in the police station. I did so. Had I not done so

COMPETITIVE PRICES FOR PRINTING ROLLS

All Local Firms Should Be Given a Chance to Submit

Figures.

Prices will be obtained from all the printing firms in the city for the publication of the assessment rolls. The rumor was current yesterday that the contract had been awarded a certain firm in the city by the finance board, but such has not been the case. All the printing firms will be asked to submit prices in the regular way, and the lowest will be recommended to the

council, and accepted. "We want all the firms to tender or this contract," said Ald. Richter to The Advertiser. "We will be pleased to receive their prices; in fact, we want them to submit them. Everything will be done in a straightforward, legitimate manner.

Already several firms have been busy preparing prices for the work, and they will be forwarded to Ald. Richter at an early date.

A September Fish Story

The fishing season is nearing an end, but the fish stories are coming along nicely. The latest is a real gem.

A local fisherman went to Byron last week, and selecting a cool spot, threw in his line. Near him were some willows, leaning over the water. The branches were about two feet from the surface, and among them were several grey birds singing. Suddenly a monster pike shot out of the water over two feet in the air, picked off one of the grey birds, and disappeared beneath the surface.

It is argued that is was a flying fish not a pike, but the angler swears positively that it was a pike. So there you are. "You pays your money, and takes your

THE NEEDS OF THE COUNTRY.

Lord Clinton, who is rated amongst the wealthiest of the English nobility, is at present in this country, having travelled as far west as the new mining town of Stewart, B. C. His object is to investigate for himself the opportunities for investment. He has studied the country, and his conclusion is that Canada needs men more than money. He is much interested in colonization schemes, of which many are planned in England, and means to take a hand in the movement himself. Naturally, he says, the class of men that we will get through these colonization schemes will be high. They will be placed on the land by men who are looking for returns from their investments, and who will see to it that only the men from whom Lang. Where Woman Really IS Man's Incomparable Superior

BY CYNTHIA GREY.

It's a safe wager that the question of woman's superiority or inferiority to man-which is up for occasional profound discussion-never has been, and never will be, settled by these learned men to their own

They all agree among themselves that woman IS inferior, of course, but just turn any one of these wise old owls loose among a lot of babies and he'd howl for a woman to COME QUICK.

The majority of those women who were born to be mothers content to be queens of their home, and are perfectly willing that their husbands shall reign supreme elsewhere, hence this question never causes a ripple in the little worlds they rightfully call their own. FATHER is bound to provide his children with necessaries, but MOTHER gives them the physical care and the early mental training which FATHER is totally unable to supply.

The true mother consults her children as junior partners in the home enterprise; she interests herself in the small affairs of these juniors, and as the proper times is a child with them.

When maternal counsel is needed in times of childish revolt, she is pre-eminently the mother-gentle, patient, sympathetic and ate. She never forgets that the education of her babies begins at her very breast, and that every spoken word tends toward the formation of their

Cut in half without peeling, which holds them together without breaking, season with salt and pepper and roll in flour or very fine bread crumbs. Fry in hot fat until brown, but not blackened. Take up carefully with a pancake turner so as not to break the slices, and arrange neatly on a hot chop platter. Add a tablespoonful more of drippings or butter to that remaining in the pan (if there is only a little), stir in a tablespoonful of flour, and as soon as "bubbly" pour in a cup of hot milk. Stir until smooth and creamy and pour over tomatoes. Garnish with parsley.
Frenched Tomatoes.

Scald and peel half a dozen small, solid, round tomatoes. Make half a pint of good cream sauce by cooking together a rounded tablespoonful of flour, then adding a cup of milk, cooking and stirring until a smooth creamy sauce results. Season with a level saltspoonful of salt and half a saltspoonful of pepper. Put a tablespoonful of this sauce in the bottom of a buttered custard cup, lay on it one of the little peeled potatoes, cover with another tablespoonful of the sauce and a dusting of bread crumbs. Stand the cups in a pan of boiling water and bake half an hour in a moderate oven. Serve in the cups.

Was it my fault that the lamp got too high, and that Flanigan couldn't hear Jim calling? or that just as Bella reached the top of the steps Jim should come to the door of the tent, wearing the barrel part of his hot-air cabinet, and yelling for a doctor?

"Well, he said it was the picture of an empty-faced society girl."

"Well, he said it was the picture of an empty-faced society girl."
"Oh!" I exclaimed.
"I—I maintained there were possibilities in the face." He put both hands on the table, and, bending forward, looked down at me. "Well, I was a fool, I admit. I said your eyes were kind and candid, in spite of that haughty mouth. You see.

New York, Sept. 20.—Philly McGovern, accompanied by some ten pounds of sur-plus fat about his mid-section, made a woeful appearance at the Fairmont Club tonight against Joe Coster, whom he had ONE FROM BROWNS tonight against sole of times previously. Coster was in fine fettle and carried a rapid-fire left and punishing right cross. The former he stuck into the overlapping paunch of the Brooklynite something like 500 times. Coming Rivals in World's Series Compared

FRANK L. CHANCE, manager and field captain, first base—Bats .280, fields .996. Is a born leader, aggressive, daring, fast on the bases and thoroughly seasoned in several championship series. JOHN J. EVERS, second base-Bats .250, fields .965. Is a

student and exponent of inside ball, crafty, always striving to outguess the opposing side; an ideal ball player to head the batting list. JOSEPH TINKER, shortstop-Bats .297, fields .936. Is pronounced by most critics the greatest fielding shortstop in the major leagues. Is at his best in important games and a main cog in the Cubs' inside play.

HARRY STEINFELDT, third base-Bats .238, fields .950. Is steady, a swift, accurate thrower, fast and sure on ground balls and high flies and a dangerous batter in

JAMES T. SHECKARD, left field—Bats .235, fields .980. Was champion sacrifice hitter of the National League in 1909. Is a sure fielder, studying every batter, covers ground rapidly and has a perfect "peg." ARTHUR HOFMAN, centre field—Bats .329, fields .977. Is

styled by most critics the greatest outfielder in the game today, in addition to being one of the hardest hitters in the league. FRANK M. SCHULTE, right field—Bats .288, fields .975. Is a finished fielder, fast in all branches of the game, a terrific, slashing hitter and possessed of a deadly

throwing arm. JOHN J. KLING, catcher—Bats .290, fields .978. Is an expert in every particular, keen, calculating, quick to discover the weakness of an opponent and to act accordingly. In short, the star of them all.

JAMES ARCHER, catcher—Bats .257, fields .970.' Is the only exponent of the "squat" throw in either league, has a perfect heave, is dangerous at bat with men on bases and fairly swift. MORDECAI BROWN, pitcher-Bats .165, fields .964. He i

past master as a strategist, gifted with almost perfect control and a varied assortment of bewildering curves. For years a bright star on the slab. EDWARD M. REULBACH, pitcher-Bats .105, fields 917. When right Reulbach is almost unbeatable. Owing to an attack of diphtheria early last spring he has been

slow in attaining his best pitching form. JOHN PFIESTER, pitcher—Bats .100, fields .939. Is the star lefthander of the Cubs, effective against all clubs, whether left or right hand batter. Is counted upon as

one of the mainstays in this series. ORVAL OVERALL, pitcher-Bats .118, fields 1,000. Has been out of the game a major part of the season with an injury to his pitching arm. Is gradually preparing for the series and sure to start. LEONARD (KING) COLE, pitcher-Bats .240, fields .880. Is

easily the most sensational pitching find of the season, scoring many victories over the strongest clubs in the league, using a drop ball and terrific speed. HARRY McINTYRE, pitcher-Bats .300, fields .950. Is a veteran relying upon a side arm spit ball and the old-

time curve. LOU RICHIE, pitcher-Bats .143, fields .934. Richie has aided the Cubs materially this season in the pennant struggle. Is a heady twirler using a curve and change of pace, and of especial value in finishing up. HENRY ZIMMERMAN, utility-Bats .285, fields .988. Has been of inestimable value to the Cubs in many important contests and is noted for his great all-around play-

ing and batting abilities. CLARENCE BEAUMONT, utility outfielder—Bats .280, fields .981. A hard-hitting seasoned veteran, valuable as pinch hitter, a close student of opposing batters and fast on the bases and in the field.

NEW YORK BOSSES CLAIM A VICTORY

"Old Guard" Republican Leader Says Roosevelt Loses in Primaries.

Albany, Sept. 20 .- A clear majority 55 votes for the selection of Vice-President Sherman as temporary chairman of the New York State Republican convention over Colonel Roosevelt was claimed tonight by William Barnes, jun., as a result of the up-state primaries today. Mr. Barnes. who has been leading the fight of the old guard, declared that the only contests at Saratoga will be in the committee on resolutions. This committee will have for consideration the question of direct nomination.

HAMILTON GETS ANOTHER. Hamilton, Ont., Sept. 21.-Hamilton has landed another important industry. The Canada Steel Company has decided to locate here. It will build a plant costing \$400,000 and employ 300 men. The manufacture of light steel articles from used railway tracks will be the modus operandi. Welland offered a free site, but Hamilton's superior shipping facilities and cheap power were what induced the company to locate in Hamilton.

Sir William White Denies Report That British Navy Plans a Change.

London, Sept. 20. — Sir William White, who from 1895 to 1902 occupied the post of director of naval construction and assistant controller of

bustion engineering in ship propulsion. I do wish that these gentlemen explosion committee, which has in-vestigated the subject carefully, and look at modern hustlers. read some of their meanderings.

A "Silly Season" Story.

We have had the funnelless battleship rushing about again. It always will suppose, only it is to be regretted that when such a mass of scientific and ex-perimental information is available or anyone who will take the trouble to read, these sensational and absolutely incorrect views of the present situation regarding internal combustion should be put before the public.
"I admit that if it were possible to concentrate the great amount of power now provided by huge engines, which is required for the propulsion of a battleship, into smaller engines such as one might imagine a motordriven engine would be, we should be getting to a position of tremendous possibility, but we are far from that position yet. The chief difficulty which the committee on gaseous explosions, which has been investigating the subject for the British Association, has had to contend with is that of energy wasted in the explosion of gas, what-

ever form it may take in a cylinder.

Waste Is Important Point. "Now, consider that point along with the fact that at the present time the most powerful petrol motors in serviceable use are from 100 to 120 horsepower. In those motors the amount of energy wasted is very considerable. What would be the amount of waste if you were dealing with motors of 30,000-horsepower, and if you had the same proportion of waste? Work and experimentation is proceeding on scientific lines, and it is from that that our friends, the physicists and chemists, will be able to help us so much by showing the direction

"But the public should not be so

deceived as it has been by such nonsense as the probabilities of getting in the immediate future a success which we hope and believe may ultimately be achieved, but in order to obtain which there must be much more experimenting, and in which there must be the most cautious advance.

"Of course, the report that the Government was about to lay down a motor-driven battleship represented an advance, the importance of which, had the statement been correct, could not possibly have been overrated. But all this talk of the immediate running of petrol-driven battleships is sheer non-

The C.P.R.'s Big Move at Quebec St.

Have you any conception what the new big move of the C. P. R. means to London?--- and to you?

You have heard that this enterprising railroad has secured a big block of property at Quebec street for the purpose of building big new shops, big new offices and a new station.

Do you know what that means?

Has its importance occurred to you?

They have spent over \$100,000 for the property--they will without doubt spend the balance of \$500,000 (a round half million) in buildings, machinery and equipment.

They will give employment to many skilled hands---and annually expend thousands of dollars in wages. They will bring many people to this section of the city, all of whom must be provided with homes and food and clothes and the necessaries and luxuries of life.

Business will follow and mercantile establishments to cater to their wants will locate near this new and vital artery of trade and business.

Homes will be required in the close proximity and real estate values will shoot skyward.

Do you know how this will affect you?

Just this way if you are wise you will invest in real on the ground floor and secure all you can carry—develop it and live on it while it is steadily and surely rising in value and in a few short years have the satisfaction of seeing your investment increased many times.

What Hillcrest Offers

To the home seeker-- A home site in a healthy, beautiful section at low prices, where values are sure to rapidly increase. In other words, a nice home for the present, and a big investment for the future.

To the investor-- A means of making money grow with great rapidity and positive certainty.

To the farmer-- A home in the city, that is also a safe and profitable investment.

To you-- A city home with county expenses—the tax rate is about one-fifth what it is just across the street.

How to See the Property

Take cars to corner of Dundas and Quebec Streets, opposite the Western Fair Grounds, walk north on Quebec until the Hillcrest sign meets your eye, or take Hillcrest automobiles, which will run to and from the property all day from the corner of Dundas Street.

WOLSELEY BARRACKS,
Hillcrest Is Just East of the Grounds of Wolseley Barracks.

Crest London's Newest Suburb

Hillcrest is located just east of Quebec Street, north of the C.P.R. tracks—opposite the Wolsey Barracks, and diagonally opposite the new C.P.R. station site

It is only a few minutes' walk from the street cars on Dundas Street, and only seven minutes on the cars to the heart of the business district.

As soon as the C.P.R. improvements are under way—and they will begin im-

mediately—it is understood that the street railway will be extended up Quebec Street to the C.P.R. tracks, right to the property.

Hillcrest is well wooded, the lots are high and dry, lying on a gentle slope com-

manding from every point a good view of the entire city.

The lots will be sold at prices ranging from as low as \$5.00 up to none higher than \$10.00 per foot, even for the choicest corner lot.

The First Sale at Hillcrest

The sale of lots will open at the property at 9 a.m. Saturday, Sept. 24th.

But Hillcrest may now be inspected and plans and full particulars be obtained from our representatives at the office on the grounds, which will be open every day from 9 a.m. to 9 p.m., or at our downtown office, in London Loan Building, corner of Dundas and Clarence Streets.

London--City of Homes and Opportunities

You're proud you live in London, aren't you?

You right well should be.

Look at some of its record—right here.

London is growing like a weed.

This may be a bit of news for you, but it is a fact.

Listen---

1870--15,000, 1880--20,000, 1890--30,000, 1900--40,000, 1910---50,000 and 1920 look for 75,000.

It now has over 50,000, and with the healthy impetus it has, an increase of 50 per cent. in ten years is by no means an idle dream.

It is the hub of a population of over a million people-the third distributing centre of the Dominion--a thriving, throbbing, hustling centre of trade in the midst of the richest agricultural district of Canada.

It is the fourth city in population in Ontario, and is about to enter with giant strides in the race toward third place

It it the fifth city in all Canada as a manufacturing centre with its factories numbering over 228, covering 72 separate and distinct lines.

It has transportation facilities unexcelled in any part of Canada, with its 127 passenger and freight trains daily, and its lake connections through its outlet at Port Stanley.

London is already big-husky and important-bigger than some people think—and owing to the additions and extensions of the C.P.R.'s facilities and equipment is on the verge of the biggest business boom in its history.

In the very near future all eyes will be on London.

Are you going to take advantage of it? Or is the other fellow going to reap all the advantage?

We are offering you a chance early in the game—read it thoroughly—acquaint yourself with particulars—and act.

big fortunes.

It is the only unchangeable—stable investment.

It can neither dry up and blow away---nor is it affected in value by panics or hard times.

Look at the rich men in your own city or in any city in Canada or America and you will find that their real estate holdings are a big and valued part of their fortunes.

Ownership of the land is a patent of respectability—marks you as a desirable citizen and, no matter how small the start, will be the beginning of your prosperity

If you don't own a home—stop paying rent—buy a lot at Hillcrest and build a home. If you already have ons—buy a lot at Hillcrest for investment. In either case you can then grasp this epportunity as it is passing—and have a part of the profits that are sure to come in this new section.

CRITICS CONFOUNDED

Interested critics said a year ago: "Do not buy a Knight Motor, it is an experiment-in a year or two it may be all right."

Partly this is true-the Knight engine will be improved. Quite frankly we venture to hope that each Knight engine and each Russell car we make will be better than the one before. We believe that our 1914 cars will be better than those of today.

But this is the fact that must be borne in mind: The Knight engine built in its first year, by the first firm building it in a commercial way, under official observation, put up a performance which no valve motor made by any firm after years of experience has been able to equal.

Is that not conclusive proof of the Knight superiority?

Then consider that since that time the engineering skill of five of the leading engineering firms of the world have worked for the improvement of the motor, and have been aided by the experience of over 2,000 users.

Today the Knight motor stands on its record in all quarters of the globe as a tested, tried-out product of superlative excellence.

LIVE STOCK.

TORONTO, Sept. 20.—The feature of the live stock market this morning was the marketing of several lots of morthwest stockers and feeders. Very few shipments of western cattle have been coming to the market of late, 2lthough the demand has been quite keen, and so today's arrivals were more than wellowing to the state of th

the demand has been quite keen, and so Bank of Commerce today's arrivals were more than welcome. Choice stockers sold at \$4 50 to come. Choice stockers sold at \$4 50 to \$5 25, and light ones at \$3 to \$4 50, a slight advance over former levels. "More shipments of this kind of cattle are expected on Thursday," stated a commission merchant, "but the more the better, the inquiry being more than normal." The offering of export cattle was large, but there was scarcely any change in prices. Several lots of exceptionally choice stock brought as high as \$6 50, but the bulk was disposed of in the neighborhood of \$6 25 to \$6 35. Light exporters sold from \$5 75 to \$6 15, and medium stock from \$5 65 to \$6. Bulls were steady.

Some 15 loads of hay sold this morning, mainly at \$13 per ton.

New oats are going a few cents higher, good quality grain bringing \$1 10 per cwt.

New wheat averages 95c per bu.

Fruit prices are being pushed up higher, dealers claiming that the fruit season is drawing very near to a close. Plums are practically an unknown quantity on the local market. Grapes are moderately plentiful, and average 30c per basket.

Produce prices are holding firm.

HARVEST HOME SUPPER IN ST. MARK'S CHURCH

Squire Chittick Presided at a Pleasant Affair in an East End Edifice.

On Sunday last St. Mark's Church, London Junction, held their harvest thanksgiving services, which were entirely successful in every way. Mr. A. A. The bylaw.will be repealed in two weeks, but in the meantime all owners of unmuzzled dogs will be summoned to police court. Local sportsmen are making an effort to have the dog regulations imposed by the department at Ottawa, abolished or modified. These regulations, preventing the movement of dogs within or from the rabies-in-fected district, are proving very annoying to lovers of dogs and promoters of dog shows and field trials. The field trials, which have been held in Western Ontario each year for the past twenty-two years, may not be held this autumn on account of these regulations, as dogs cannot be moved from one place to another. Local sportsmen have written A. B.
