St. Petersburg, March 13, 1:30 p.m.-No further Russian news was received and placed batteries commanding the from the front this morning, but the magnitude of the catastrophe is now apparent to all here. The war office admits that even the remnants of the army are still in danger. Field Mar-Oyama holds a magnificent strategic position.

It is reported that Japanese flanking columns are in touch above Tie Pass and that there may be a Sedan there. No adequate estimate of the losses has been furnish, but with the units captured on the left unaccounted for, the killed or wounded already total 65,000. The war office does not even know accurately what units are captured.

Kuropatkin Asks Permission to Hand Over His Command.

London, March 13. - The St. Petersburg correspondent of the Times says: "Gen, Kuropatkin has asked the Emperor's gracious permission to hand over his command, alleging that he is little more speed they could have into the mountains in the direction of Tawan. They threatened our troops, in urgent need of physical and mental

"I learn on the best authority that Japan twice has approached Russia through informal channels on the subject of peace negotiations, but that in each case the proposal failed because Japan demanded an indemnity and a pledge that Russia would not keep warships in the Pacific for 25 years. "The Japanese insistence on indemnconvinces the Russian Government that her pecuniary resources are exhausted, and that by continuing the

It was to sacrifice his artillery by massing the batteries so as to paralyze the enemy. The Russian gunners did their duty and

saved what is left of Kuropatkin's.

Kaulbar's Narrow Escape.

St. Petersburg, March 13. - Little additional information was vouchsafed at the war office today. General Linevitch's army, although its units were scattered and confused, got off of wounded who have been sent north, with the fewest losses. Russians Were Misled

New York, March 13. - A St. Petersburg dispatch to the Times says: The story of the defeat at Mukden and the dreadful retreat to Tie Pass is coming out piecemeal. It shows that the Russians were misled and outmaneuvered at every point. They were misled about the direction whence the next blow would come,

Yet Gen. Kuropatkin seems at one time to have realized the critical nature of the situation, for on March 8 he began the gradual removal of impediments. Had he then ordered a general retreat, as he intimated he would do on that day in a telegram to the Czar, the disaster might have been averted. History will say what influences or motives prompted him to re-

It is known that Japan at present is negotiating a loan with British and American bankers, and that she is also negotiating for 100,000,000 yen (about \$50,000,000) with an oil company, giving as guarantee naphtha deposits in North Japan and in Sakhalin Island. Interested parties are encouraging these reports in order to assure success of a loan after removing the fears caused by the uncertainty as to the duration of the war." "The Associated Press is enabled to make the following statement: "The moment might prove opportune, but the question of peace lies with Japan, and not with Russia. Russia would welcome peace, and peace could be arranged, not through a third power, but by direct negotiations between the two countries if Japan would propose moderate terms. As the victor, Japan is in a position to take the first step. Russia cannot and will not sue for peace. Neither could she accept terms which did not recognize Russia as a power in the far east. It is idle to speculate on the concrete terms. The only thing is that Russia's position in the far east must be recognized, Friends of peace throughout the world should use their influence with Japan. The victor should show moderation. Otherwise no end of the war is yet in sight."

SMALLMAN & INGRAM,

TOO TIRED

Are You One of the WEAK WOMEN

To Become Bright, Happy and Healthy?-Use Ferrozone.

Modern life makes demands on every woman's strength that seems impossible to meet. Only the robust and strong can stand the strain. The weak, with their delicately-balanced organisms, must fail. Blood gets thin, it's innutritious. Nerves go to smash, vitality declines, and then follows misery

and suffering caused by interference with certain functions upon which the very existence of every female depends.

Don't let your condition grow worse. Check the decline of vital force before it is too late! The one sure remedy is Ferrozone-not a temporary stimulant—but an uplifting nutritive tonic that contains the kind of building material a weak body requires.

FERROZONE revitalizes the system by putting new life into the blood. Not only does it nourish the ordinary blood supply-it does more, it makes new blood, the rich, red kind that denotes

Energy is reinforced, strength is steadily and surely rebuilt. Keen appetite, strong nerves, more restful sleep, buoyant feelings, all tell of the enormous good Ferrozone invariably accomplishes. For restoring the weak, the pale, the despondent, there is no treatment so instant and permanent in effect as Ferrozone. A trial proves this. Won't you use Ferrozone yourself? It will surely make you well—its effect is instant.

Ferrozone Assures Good Health

Beware of the substitutor who urges you to accept something "just as good." Only FER-ROZONE can cure satisfactorily-see you get it and nothing else. BUILT UP HER STRENGTH.

MRS. M. E. ETHERINGTON, a wellknown merchant's wife, of Troy, writes: "I am quite willing to give a public testimonial for Ferrozone, believing it to be a tonic of superior excellence, and one that will rapidly build up strength and supply new energy to anyone not feeling well. Last spring I was in a very poor condition of health. I was nervous, felt tired and completely worn out. No doubt it is quite a common complaint with ladies of my age, but I placed great reliance in Ferrozone, and took it for several weeks. It made me quite strong, and, in fact, I have been in better health ever since. I can

He therefore thinks the efforts of those who wish to improve social life should be directed to the liberation of themselves "from the governments whose futility in these becoming more and more obvious." The Russian people see and feel the results of their "particularly coarse, cruel, stupid and deceitful Government," and think the evils are due to the fact that it is not organized on the model of other existing Governments. For the purpose of correcting this they had used all the means at their disposal, "imagining that an alteration of the external forms might alter the essence." The present political agitation, he says, is pernicious "because it distracts people from the moral perfecting of separate individuals whereby only can be obtained the objects towards which those who are fighting the Government are striving." He declares that in America, France, Germany, Japan and Great Britain the pernicious character of the Governments is so marked that people belonging to those nations point to events in Russia and naively imagine that what is done in Russia is done only in Russia, while they enjoy complete freedom and need no improvement in their positions. "They are in trustees cannot do more than postpone the most hopeless state of slavery- both manual training and domestic the slavery of slaves who do not understand that they are slaves, and pride themselves on their position as slaves." Every coercive Government, M. P. P., are aiming to collect \$25,000 adds Tolstoi, is in the essence of a great and unnecessary evil. not the bomb-throwing anarchist, but the disciple of Proudhon, the father of so-called philosophical anarchy. Proudhon was a Frenchman, but his ideas have flourished chiefly in Russia, the new Temiskaming Rai The leading exponents of the cult today are Tolstoi and Prince Kropotkin, the latter an exile, living in England, where he enjoys the friendship of men of science and letters. It has been well said that anarchists of this school insist on taking the last step in social development before they have taken the first. The last step assuredly will be the religious and moral perfection of all the individuals in society, which Tolstoi says is the only thing worth striving for. This means the millennium, and when that arrives there will be no need for governments or laws If the present despotism in Russia were destroyed tomorrow, the Russian people in self-preservation would be forced to establish some other authority or would welcome a new despotism to create and enforce law and order, as the French people welcomed the first Napoleon. In Russia, where all authority is odious, and even the church is the prop and pillar of tyranny, it is not unnatural that purely destructive theories of government should spring up, but Tolstoi plays into the hands of the autocracy when he denies the efficacy of political ideals. Governments and laws have been and may be made the instruments of social amelioration. The Russian bureaucracy has spread the peison of official corruption through the empire and has kept the mass of the people in ignorance. A representa. tive government would provide for their education and train them in the duties of citizenship. Their moral and religious development is now retarded by a system which denies them freedom of thought.

This is the doctrine of the anarchist,

The Proposed School Compromise

It is said the Liberal members from the West have framed an educational clause for insertion in the autonomy bill. It provides that the Provincial Legislature may exclusively make laws in relation to education, but that nothing in any such law shall prejudicially affect any right or privilege with respect to separate schools which any class of persons have at the date of the passing of the act. The clause likewise provides for an appeal to Ottawa, and for remedial legislation, where the rights of minorities have been infringed, in accordance with the act of Confederation.

It is becoming evident that some compromises of this nature will be accepted by the Government, and that the education clauses will provide for nothing more than a guarantee of the maintenance of the present school system in the Northwest which is based on the ordinances of the Territorial Government in 1901. These ordinances emphasize the supremacy of the state in everything relating to education. They create a department of education which is administered by a member of the executive council. This department has "the control and management of all kindergarten schools, public and separate schools, normal schools, teachers' institutes and the education of deaf, deaf mute and blind persons." Further, the department is given full power to make regulations for "the classification, organization, government examination and inspec- it for short, but it's a chair to teach tion of all schools hereinbefore men- graduates to get a job."

ioned"; and for "the examination, liensing and grading of teachers." The department is also given power to auhorize "text and reference books for the use of the pupils and teachers in all schools hereinbefore mentioned." There is an educational poard of five, two of the members of which must be Roman Cathoics, but it has no executive powers, its functions being purely advisory.

The absolute control of all schools whether separate or public, is thus vested in the Government, which in In the Territories today all the teachers have certificates from the same normal schools, all the schools are subjected to a common inspection and clesiastical control.

Domestic Science and Manual Training.

The Hamilton Herald is gratified by the favorable comments of Principal Radcliffe and Inspector Edwards on the domestic science and manual training courses, as illustrated in public and high schools across the line and hopes the London Board of Education will act on their reports. Says the Herald:

"In London, as in Hamilton, there are school trustees who having committed themselves to opposition to domestic science and manual training in the public schools continue to oppose these subjects through mere egotism. To change their attitude would be to admit they had erred and there are many people who ar dominated by that mean sort of pride which makes it painful to acknowledge error."

Some of the local trustees deserved his rap. The domestic science course could have been extended to many of the senior girls in the public schools at very little expense by utilizing the equipment at the Collegiate Institute. This would have made an excellent preparation for its introduction into the public schools themselves. The science, as their adoption is inevitable

The friends of the late E. F. Clarke, for his wife and family, who are left opposition, but there are many examples of Canadian public men who have spent much of their time in office and left it poorer than when they entered. Their families should not suffer for this unselfish service.

The Ross Government appointed a commission composed of Liberals and Conservatives to construct and finance commission performed its work satisfactorily and this public enterprise was taken out of politics. The Whitney Government called for the resignations of the commissioners, and has replaced them by Conservatives exclusively. It is not a reassuring sign.

> But some of the Emperor's advisers insist that the Government is irrevocably committed to the war, that it would be harder to stop than to go on, and that if the war is indefinitely prolonged the financial resources of Japan are sure to be exhausted before Russia's, while Russia's prestige abroad is irreparably gone, if she now bends the knee. The situation is not dissimilar to that which prevailed at the end of the Crimean war, which Nicholas I took a sudden decision to conclude peace on the best terms obtainable The effect on the international situation of either alternative will probably govern the final decision. The practical difficulties are not only in getting a new army to the front, but in actually mobilizing it, are fully appreciated even at the war office, where many officers reluctantly declare it is idle to hope for victory under the present cirumstances. Another general mobiliza tion might set the country in flames. At home, the elements which are trying to force the Emperor's hand, would employ either horn of the dilemma selected, whether peace or a continuation of the war, to press for the granting of a real constitution. They declare the Government is now in a corner from which there is no escape without the support of the people. There is reason to believe that some of the Emperor's advisers share this opinion, and are again advocating the bold stroke of summoning a veritable constituent assembly, appealing to the patriotism of the people and allowing them to decide the question of peace or war. Such a move, they argue, would confound Japan if the decision was war, and if peace, would relieve the Government of responsibility, and insure tranquility at home. But, of

Mrs. Mary Dimmick of Washington tells How Lydia E. Pinkham's Vegetable Compound Made Her Well.

It is with great pleasure we publish the following letters, as they convincingly prove the claim we have so many times made in our columns that Mrs.

Pinkham, of Lynn, Mass., is fully qualified to give helpful advice to sick women. Read Mrs. Dimmick's letters. Her first letter:

Dear Mrs. Pinkham:—
"I have been a sufferer for the past eight years with a trouble which first originated from painful menstruation—the pains were excruciating, with inflammation and ulceration of the womb. The doctor says I must have an operation or I cannot live. I do not want to submit to an operation if I can possibly avoid it. Please help me."—Mrs. Mary Dimmick, Washington, D. C.

Her second letter;

Dear Mrs. Pinkham :advice very carefully and am now entirely not only my health but my life to Lydia E. Pinkham's Vegetable Compound and to your advice. I can walk miles without an ache or a pain, and I wish every suffering woman would read this letter and realize what you can do for them."—Mrs. Mary Dimmick, 59th and East Capitol Streets, Washington, D. C.

How easy it was for Mrs. Dimmick to stamp. Yet how valuable was the reply!

Mr. Clark again dwelt upon the principle enunciated by St. Paul in I. Corinthians, x., 31. "Whatsoever, therefore, ye eat or drink, or whatsoever ye do, do all to the glory of God," with which words

the apostle summed up all his teachings concerning the outward conduct of the life based upon Christian principles. The speaker dealt first the question of work, then athletic sports, cards, dancing and the theater, and finally the general attitude which a Christian should maintain towards such amusements. He reasserted his belief that neither church nor preacher had the right to dictate to the ndividual in these matters. During the service, the Misses Green and

these things will settle themselves." Autonomy Bill Denounced.

The theme announced by T. T. Shields for his evening sermon at the Adelaide Street Baptist Church yesterday was "Hypocrites," and his text was Christ's denunciation of the twofaced policy of the Scribes and Pharisees as described in Matthew xxiii., 1 to 3. Mr. Shields explained that he had intended at first to give a plain evangelistic discourse from of Dr. Von Stan's Pineapple Tablets the above passages of Scripture, but he had been so impressed with the importance from a religious point of 60 in a box, 35 cents.-16 view of the Northwest autonomy bill Snakes may almost be said to have now before Parliament that he determined to state his views on this mat-

Mr. Shields also explained that to avoid misconstruction he had written what he wanted to say on the subject and proceeded to read ais address. Mr. Shields emphasized the well-known fact that Baptists are opposed to anything like a union of church and state—they had no wish to keep other men's consciences and they would not allow their consciences to be kept by others. They were uncompromisingly opposed to the use of public money or lands for the teaching of religion. They held that the e should be no reli-

The question of the bill's constitutionality was not so the bill's constitutionality was not so great, however, is the question of the Premier's inconsistency, as he has changed his yie's, he said, since 1896.

STOCK MARKETS.

H. C. Becher, stock breker, Bank of Commedce building, received the follow-ing by private wire from Bartlett, Frazier & Carrington today:

New York, March 13. - Although some stocks advanced very sharply at the opening, principally Canadian Pacific and Pennsylvania, these advances were not well maintained, and for the first half-hour considerable disappointment was expressed both in regard to the way in which the market acted, and to the comparatively small volume of business. The reaction, however, did not last long, and a general recov ery subsequently took place, in which Pennsylvania was very prominent. Buying of this stock was in large blocks, and by very good houses. Union Pacific was under some pressure, but the scarcity of the stock was evidenced during the second hour by the fact that execution of an order for 5,000 shares caused a rally of about 1 per cent. Copper was inclined to be heavy on the institution of fresh litigation in Montana by Mr. Heinze. Colorado Fuel shot up rapidly on what was called good buying. There is steady absorption of N. Y. C. by people who are convinced that the stock is to be retired by an issue of bonds on the basis of two for one. It is figured that the bonds will be worth at least 85, which makes N. Y. C. worth 170. Sales which makes to noon 875,900.

ADELAIDE THURSTON IN "POLLY PRIMROSE." Some plays seem to have an irresistible charm in consequence of their name. "Polly Primrose," which Paul

Wilstach wrote for Adelaide Thurston's use, is a case in point. The Christian name, Polly, has a roguish, saucy swing in it, and for a Polly Primrose, or even a Polly Smith, or a Polly Jones, to be sour-visaged, ugly-tempered minx would be totally out of the "Polly Primrose" in the play is exactly like her name, and who better than Adelaide Thurston has been most fortunate in the selection of plays, and "Polly Primrose," which this delightful little star is to present at the Grand tomorrow night has been found the best in which Miss Thurston

Baseball Match Between Officers

The indoor baseball team of the officers of the Seventh Regiment came officers of the Queen's Own Rifles in Toronto Saturday night by a score of 29 to 13. The game was hotly contested throughout, and the London team showed that they thoroughly understood all the tricks of the big sphere. The Globe says:

"London had little difficulty in taking the Queen's Own Rifles into camp in the game. Murray's running catch was the best feature of the game. Davison and Carling also did some fast fielding that greatly, pleased the spec-

After the match the visitors were dined in the officers' mess and royally entertained by their hosts. The London military men hope soon to be in a position to entertain the Q. O. R. team in the new armories. Such games undoubtedly do a lot of good in the way of bringing the various regiments into contact, as well as affording pleasure to the participants. Philadelphia "Drummer" Injured While Walking On Street.

H. M. Grotta, a wholesale tobacco dealer of Philadelphia, Pa., and who has been a guest at the Tecumseh House for ten days, had a nasty fall a slippery sidewalk on Saturday. He was walking along the west side of Richmond, between King and York streets, in the afternoon, when his foot slipped and he fell heavily upon his face. He sustained a severe sprain of the wrist, some bad bruises and several cuts around the right eye, Mr. Grotta had intended leaving the city today, but he is now confined to his room at the Tecumseh.

Numerous complaints regarding the tate of the sidewalk in the locality above referred to are being heard. Or account of the height of the wareouses above, the ice remains a long time on the west walk. Moreover, the walk itself is not level, and when coated with ice, is one of the most treacherous places in town for the unwary pedestrian. Those who are "wise" o this particular stretch of walk invariably take the east side of the road if possible.

FOR OLD LONDON

Not Afraid of an Action On the Vast System of Wharves On Thames to Take Care of Growing Commerce.

> Chairman
> English presided at a meeting of the board of health, held in the city hall today. Mayor Campbell, Dr. W. J. Stevenson, William Skinner, R. A. Carrothers, C. Taylor, Dr. At a meeting of the Thames Conservancy Board this week sanction was given to the construction of a huge system of wharves, which will be of great importance to the port of Lon-

The new scheme is conceived on scale which at once strikes the imagthe board was the threatened suit of ination. When they are completed the Mr. Bennett, of Adelaide street north, wharves will be able to deal with 6,ice-cutting purposes by the board of health. A letter was read from Mr. R. M. C. Toothe, threatening an action, and another from City Call to the stimulation of 3,000,000 tons. and drawing a depth of water up to 30 feet will be able to lie alongside at one time, while a hundred barges can be in attendance to have cargoes trans-

ferred to them. The wharves run across a bend the river for 6,600 feet in all, and at one end there is ample space for the hotels. The report states that the construction of a graving dock, which will be made after the wharves have

been constructed. The place for the wharves has been hosen. It is a long reach on the Kent side of the river, within eighteen miles of London by rail. Here there is a great area of land practically uncovered at present and upon this an option has been procured by men who have started the scheme of wharves. A low embankment wall will be constructed, and on what is the sheltered side of the river a wharf more than a mile long will be thrown across a bend, the frontage being 140 feet beyoud the line of low tide. Between the embankment and wharf,

therefore, there will be a great area of sheltered water, in which barges can lie and be loaded from vessels by long-armed cranes on the wharf lifting goods straight out of the holds of the ships on the river side. This, it is believed, will do away

with one of the great objections to wharves, which is that of having parges lying alongside a ship and imping her with every swell. If 3,000,000 tons can be handled at the wharf, as estimated, that will be qual to about one-sixth of the whole rade of the port. Of course the scheme depends for

uccess upon being able to offer charges very much less than the docks, and the contemplated scale shows great eductions upon the present dues

Wedding of Two Well-Known West town with Mrs. George Glassco, East Nissourians.

A very pretty wedding was solemnized on Wednesday last at the home of Mr. and Mrs. John Johnson, con. West Nissouri, when their eldest daughter, Jennie, was united in marriage to Mr. W. Carey Vining, of the same place. Only the near relatives were present. The bride was beautifully gowned in pearl gray crepe de chine, with white chiffon yoke and silk applique, and carried white carnations and smilax. She entered the parlor, leaning on the arm of her father, while the Wedding March from Mendelssohn was rendered by Mrs. J. E. Johnston. The bride was unattended. The ceremony was performed by Rev. James Hamilton, of Granthurst. After congratulations were extended the guests, numbering about 50, repaired to the dining-room, decorated with pink car-nations, where a wedding dinner was served. The bride's traveling suit was of green ladies' cloth, and white silk waist. Mr. and Mrs. Vining have the best wishes of their friends, as was shown by the numerous and costly presents, of which they were the recipients. The happy couple will reside

Made Sacred by the Saviour.

London, March 13.-General Booth, head of the Salvation Army, who is making a tour of Palestine, went to the Mount of Ascension, accompanied by his staff, and prayed aloud for more of the spirit of Christ. Thence he went to the Mount of Olives, and the traditional tomb of the Saviour, where he again prayed affectingly, his hearers weeping. Thence he went to Gethsemane, where he fell on the ground beneath the so-called tree of agony, and prayed fervently and wept. Subsequently he visited Calvary, where, M. C. V. Gould, of Hamilton, under the waving flag of the Salvation Army, the party repeated the hymn, "When I Survey the Wondrous Cross."

SLEEPLESSNESS.—When the nerves are unstrung and the whole body given up to wretchedness, when the mind is filled with gloom and dismal forebodings, the result of derangement of the digestive organs, sleeplessness comes to add to the distress. If only the subject could sleep, there would be oblivion for a while and temporary relief. Parmelee's Vegetable Pills will not only induce sleep, but will act so beneficially that the subject will wake refreshed and restored to happiness.

If you have small children in your home, you cannot afford to be with-out Chamberlain's Cough Remedy. For coughs, coids and croup, it never fails. For sale by all druggists.

THE EFFICACY of Bickle's Anti-Consumptive Syrup in euring coughs and colds and arresting inflammation of the lungs, can be established by hundreds of testimonials from all sorts and conditions of men. It is a standard remedy in these ailments and all affections of the throat and lungs. It is highly recommended by medicine vendors, because they know and appreciate its value as a curative. Try it.

Apparently London is not the only city in the Province which is in sore need of an isolation hospital, as the following from the Hamilton Herald shows: "The crying need of the hospital, according to Dr. Langrill, medical health officer, is a larger isolation building. Of the six cases of diph-theria reported this week, four were contracted from other members of the family, who were being treated at their homes, and could not be properly isolated. TRAVELER FOUND DEAD IN HIS BED

Mr. Wm. Flannagan Expires Suddenly at His Residence On Byron Avenue.

A well-known commercial traveler, Mr. William Flannagan, passed away very suddenly last evening at his residence, 95 Byron avenue, South London. Mr. Flannagan had been in poor health for some time, Mr. Flanhagan returned Friday night from a business trip to Toronto and last evening, about o'clock, complained that he did not feel well. He retired to bed, and a short time afterwards his daughter on passing his room, became alarmed at not hearing her father breathing. Going into his room, she found him lifeless in bed. Thinking that possibly he had fainted, the family sent for Dr. Piper, who found that the man was

LENT A SEASON OF DEEP IMPORT

Glance Back Through the Ages at the Origin of the Forty Days of Penance.

Lent is a name derived from the Anglo-Saxon "Lenckton," signifying spring, and is a season of the deepest import. Its dominating thought is penitence, its law abstinence. Throughout the period perfect resignation, unflinching obedience, absolute consecration-these dominate the earnest soul. It is not a deprivation, but a privilege, to order one's footsteps in the way of holiness. The principle of mortification is as old

as the centuries. Fasts were enjoined among the Greeks by the Cynics, Diogenes, Epicurus and Pythagoras. All honored the canonical obligation. The great lawgiver, Moses, instituted a fast in connection with the Day of Atonement, and death followed disregard. Other fasts are coupled with the Jewish captivity. Always does especial sanctity mark resignation, and disfavor indifference. The number 40 is of peculiar significance in sacred history. The flood prevailed 40 days; the ark rested on Ararat a like period; 40 years the Israelites wandered in the desert; malefactors were beaten with 40 stripes; Ninevah was allowed 40 days of grace; Moses fasted 40 days in the mount, and Elijah occupied like space be-fore Horeb. Therefore Christ's sojourn in the wilderness for 40 days is but a

In the Christian Church a period f fasting and repentance came early into vogue. Originally it lasted 40 hours—the vogue. time during which our Lord was under the power of death. The great Sabbath, or Easter Eve, always remained the great fer Easter Eve, always remained the great feast of the year, more strictly observed in the east than Good Friday. By degrees the time was enlarged until the present method was adopted. Anciently Lent was a special time for penance and preparation for baptism and Easter communion. The grand purpose and office of Lent resolves itself into prayer, religious study, deeds of reconciliation and love.
