

ROSSLAND WEEKLY MINER.

Two Dollars a Year.

ROSSLAND, B. C., THURSDAY, SEPTEMBER 22, 1898.

Fourth Year, Number 28

ORES OF THE LE ROI

Gold and Silver Values the Same From the Surface.

AN INCREASE IN COPPER

The Ore Enlarged in Siliciousness Also as Depth Was Attained, and the Pay Chute Widened Out From Twelve to Sixty Feet.

"An increased percentage of copper and a slight increase in the silicious character of the ore are the only changes in the character of the Le Roi ore that have been demonstrated by increased depth," said Nicholas Tregear, the superintendent of the property, last Tuesday. "In the way of gold and silver values, they have been practically the same from the surface down to the 700-foot level. There seems to be little probability that the future development of the property will show any material change in the character of the ore as depth is reached. Free gold is, of course, associated with the siliciousness of the ore, and fine free gold is found in the assayers' sieves, but it has been seen only two samples of visible free gold from the whole property. In the west 450-foot level we once found a piece of calcite that was fairly representative of the ore. These two specimens represent all the visible free gold that I have ever seen coming out of the mine.

"One can take the iron oxides found on the surface of the chute, however, and pan colors without trouble. By the way, the ore on the surface of the property shows native copper, too, which has never been met in the underground workings.

"There is splendid ore on the surface of the Le Roi," continued Mr. Tregear. "One can get a \$100 assay without difficulty right from the very top of the ground. In the early days the management of the property shipped some \$17,000 worth of ore from an open cut near the present machine shops. As the rock had to be packed out on horseback, it is plain that it must have been of very high grade.

"The surface cut from which the ore was taken shows that at the grassroots the Le Roi ledge is about 12 feet wide. At a depth of 20 feet it had steadily increased in size until at the 450-foot level the vein reached the enormous width of 60 feet, and we stepped out ore for the full width of the lode.

"From the surface down to the 600-foot level the vein was divided into three distinct streaks. Next to the hanging wall was the pay streak, where the smelting ore was found. Underneath the smelting ore lay a large body of silicious ore, and next to the foot wall was a deposit of low grade iron ore, carrying values around \$5 and \$6. When I speak of walls, you understand that I mean walls as they are commonly found in this camp, where the ore and the country rock are frozen together vaguely. Walls of this nature were the rule in the huge chute in which the main shaft is sunk, but in the Riddpath stope as the lately discovered west chute is called, there are two walls as perfectly defined as can be found anywhere.

"Down at the 700-foot level, which at present is the deepest workings in ore, the silicious ores and the iron ore have given way to a solid body of clean smelting ore 28 feet wide. Every ounce of the ore broken comes direct to the smelter. It is impossible to sort it. We are now working seven machines side by side in the 700-foot level, and the showing is unsurpassed anywhere in the mine."

Blackstock Denies the Story.
The rumor has been current lately that the Gooderham-Blackstock syndicate has secured an option on the B. C. Summit camp for \$500,000. T. G. Blackstock denied the story most positively last night. "I did not even know of the existence of the B. C. until the present story got in circulation," he said. Alex. Dick is back from the B. C., where he has been conducting negotiations, but he refused to say anything about the result.

Are Interested in Rossland.
"People back in Montreal are taking more interest than ever in the Rossland mines," said O. G. Labaree last evening after his return from the Quebec metropolis. "They are surprisingly well acquainted with the conditions here, and they realized fully the expenditure of time and money that they must expect in developing properties here. They are making investments intelligently, and results are certain to come."

MINING NOTES.
News was received by telephone from Spokane Tuesday to the effect that the management of the Grand Prize company had decided to resume work on their property within the next few days. The property is the Grand Prize mine, which is located next to the Deer Park, and it is claimed has the same vein as the Deer Park.

R. E. Crawford, secretary of the Silver Queen Gold Mining company, reports that the recent development work on the company's property, which is located about eight miles of Greenwood, has resulted very satisfactorily. A tunnel has been driven for a distance of 160 feet and two feet of grey copper ore has been encountered. The ore carries 12 per cent copper, \$9 in gold, and a small quantity of silver. Work has been temporarily stopped, but it will be resumed in the winter.

LETTERS TO THE EDITOR.

Increased Values With Depth.

ROSSLAND, Sept. 21.

EDITOR MINER—Sir: Kindly allow me space in which to comply with the request of friends to make a statement covering my experience in the Le Roi mine, as to values and depth, in comparison with the statement made by Nicholas Tregear, superintendent. I read Mr. Tregear's statement with great interest, and herewith submit mine.

Development and values as encountered from the surface to a depth of 360 feet. On August 10, 1898, I found the shaft 200 feet deep, with a drift five feet west at the 100-foot level, crosscut 10 feet, width of ore 20 inches, values \$14. At a depth of 180 feet a drift was run to the east 44 feet, width of ore two feet, average value \$20. A drift west 42 feet, with no sign of mineral. The bottom of the shaft was used as a sump at this time. The ore was measured and sampled from the bottom to the surface. The average width to within 60 feet of the surface was two feet, average value \$20. From the 100-foot level to within 40 feet of the surface the ore was at times a little over four feet wide, which by careful assaying was kept at \$35, but when the width decreased to within 20 feet, it also decreased so that this place had to be abandoned for the time being by reason of the shipping limit of \$27.50. However, 200 tons of ore was extracted from this point. After this ore had been shipped came the darkest period in the history of the Le Roi mine. There were instructions from headquarters to ship ore, and not a pound of shipping ore in sight. My one hope was by continuing the east drift at the 200, which I did and in six feet met with increased width and values to the extent of nine feet wide, with an easy assay of \$45. This continued for 33 feet along the drift, when the ore again contracted to two feet and \$20 value. This body of ore was stopped upon at three feet and \$20. The shaft was now continued down 50 feet when the ore body was encountered, full width 15 feet, an easy assay of \$60. The shaft being still continued developed signs of the ore chute existing on the west side at the 300-foot level, where a drift was driven west in search of and encountered five feet of ore, with an easy assay of \$50. This ore chute was followed for a distance of 61 feet along the level when it reached to the east side of the shaft, which was five feet above the top of the drift, indicating it to be the apex of an enormous ore chute. At this depth a drift was also driven east, which encountered the ore body at 28 feet from the shaft, which proved to be 26 feet wide, with an easy assay of \$70; the ore at this point was more silicious than above. The shaft was continued down to the 360-foot level when the drifts were in 10 feet each from the shaft showing favorable signs of the ore bodies existing on each side, being near. Values on the bottom of the shaft were \$50, which was not very good considering the narrow and fragmentary nature of the ore. This was the highest value I encountered in the shaft. By this time the shipping limit had dropped to \$14.50 and the Le Roi had passed from the ranks of a doubtful prospect to the position of a mine, while the lower workings were being thus extended the surface received attention by having the east and west open cuts developed from which several hundred tons of ore was shipped. The disintegrated quartz sand, freed by oxidation of the iron sulphides, averaged \$100, while the pure sulphides would not average over \$30, showing the oxidized part had been concentrated by nature 3 1/2 into 1. In brief review of the foregoing it will be noticed that it was possible to ship ore from the 300-foot level, and ore from the 360-foot level at \$50 shipping limit, and from the 200-foot level at a \$35 limit, and realize a profit of \$10 per ton, which shows that increased values accompanied increased width of ore and depth, so far as my experience went. As regards native copper I found it sparingly at the surface of the Le Roi. No. 1 and 3 shafts, also on the Blue Elephant, Syphon and Fernalde mineral claims, in every instance the native copper was in oxidized copper sulphides. This covers a period from August 10, 1898, to March 20, 1898, during which time I was superintendent.

E. W. LILJENGRAN.

IN OUTSIDE CAMPS

Slocan Boy Bonded to an English Company For \$50,000.

Peter Larsen Bonds the Rawhide Property in Greenwood Camp For \$40,000—Wilson Brothers Bond the Canadian Belle at Ymir.

STRIKE IN THE COMSTOCK

The following is the list of ore shipments from Sandon for the week ending September 8: Payne 400 tons, Last Chance 60, Ruth 100, Slocan Star 60. Total 620 tons.

The Bouson, near New Denver shipped two carloads of ore last week.

The Queen Bess and the Minnesota Silver company mines have just completed two as complete bunk houses and boarding apartments as are to be found anywhere in the country. Lodging apartments will soon be at the best prices as comfortable as they are at good hotels.

Silverton has 140 miners at work.

Vancouver groups have bonded the Moyie property for \$12,000.

A strike of over a foot of clean ore has been made in the face of No. 4 tunnel at the Comstock mine. This tunnel is now in a distance of 500 feet, and has a vertical depth on the vein of 450 feet.

W. H. Sandiford has secured an option to purchase a controlling interest in the Sultana group of claims, above Silverton. Ed. Stewart, one of the owners, has taken charge and considerable work will be done this fall.

The trail to the Evening Star mine, Slocan City, is completed and the machinery for working the mine is now on the trail and will be at the mine in a couple of days, when it is hoped that operations on a large scale will be inaugurated.

The trail to the Wakefield mine, Slocan City, is rapidly completed and will be in splendid shape for shipping ore before the snow flies. This mine will send out upwards of 2,000 tons of ore this winter. Extensive improvements are being made to the buildings at the mine.

THE BOUNDARY COUNTRY.

For the past three months considerable development work has been done on the Buckhorn mineral claim, situate in Deadwood camp. It is owned by Messrs. Eilenberg and Dunn. One third of the property is exposed for 70 feet in an open cut. The ore is copper and iron pyrites, in a diorite gangue. Another body of ore has been exposed by a cut 20 feet long and 10 feet wide, carrying an average value of \$14.13 in gold. A third body of ore about eight feet wide was sunk on to a depth of 14 feet and the following assay returns were secured: Copper 10 per cent, gold \$2.08; copper 23 per cent, gold \$2.90; copper 21 3/4 per cent, gold \$6; copper 12 per cent, gold \$2. Four shafts, averaging 16 feet, were sunk; out of these shafts values as high as \$24 in gold were obtained; also various assays running from one and a half to nine per cent in copper have been obtained from these shafts. This enormous ore body must be not less than 200 feet wide on the surface. It has been opened up by means of crosscuts and shafts for nearly 1,000 feet along the ore body.

The Rawhide mine in Greenwood camp was bonded to Peter Larsen this week for \$40,000. Mr. Larsen is one of the contractors for the railway between Robson and Greenwood. Five per cent of the money is to be paid within 12 days from the time the bond was signed. The Rawhide lies to the south of the Snowshoe, and is considered one of the big properties of Greenwood camp. It is of the same character as the other big Greenwood camp properties. The ore vein is very wide and the values are principally in gold and copper with a little silver. But very little work has been done on the property. An open cut crosscuts the vein for 50 feet, and from this cut values as high as \$22 have been secured. The Rawhide is owned by Robert Denzier, A. McInnes of Grand Forks, Thomas Tighe and Mayor Wood of Greenwood.

REVELSTOCK AND TROUT LAKE

The Silver Dollar on Mohawk creek, a tributary of the Poole, in the Iardreau district, is fast coming to the front. It is a silver-lead and gold proposition owned by Moore and Orlando, of Sandon. They received a 60-pound lump of ore last week which assayed \$60 in gold. The Sunshine, limited, the owner of the now famous Silver Cup mine in the Trout Lake district, has just received from the Shelby Smelting & Lead com-

IN OUTSIDE CAMPS

Slocan Boy Bonded to an English Company For \$50,000.

STRIKE IN THE COMSTOCK

Peter Larsen Bonds the Rawhide Property in Greenwood Camp For \$40,000—Wilson Brothers Bond the Canadian Belle at Ymir.

The mining review this week shows that there is considerable movement in the way of bonding properties. The Slocan Boy has been bonded to a British syndicate for \$50,000. The Rawhide property in the Boundary country has been bonded by Peter Larsen and there are other deals of large magnitude under way, which shows that capitalists are constantly securing interests in the better class of properties. Appended is the summary for the week:

SLOCAN DIVISION.

The following is the list of ore shipments from Sandon for the week ending September 8: Payne 400 tons, Last Chance 60, Ruth 100, Slocan Star 60. Total 620 tons.

The Bouson, near New Denver shipped two carloads of ore last week.

The Queen Bess and the Minnesota Silver company mines have just completed two as complete bunk houses and boarding apartments as are to be found anywhere in the country. Lodging apartments will soon be at the best prices as comfortable as they are at good hotels.

Silverton has 140 miners at work.

Vancouver groups have bonded the Moyie property for \$12,000.

A strike of over a foot of clean ore has been made in the face of No. 4 tunnel at the Comstock mine. This tunnel is now in a distance of 500 feet, and has a vertical depth on the vein of 450 feet.

W. H. Sandiford has secured an option to purchase a controlling interest in the Sultana group of claims, above Silverton. Ed. Stewart, one of the owners, has taken charge and considerable work will be done this fall.

The trail to the Evening Star mine, Slocan City, is completed and the machinery for working the mine is now on the trail and will be at the mine in a couple of days, when it is hoped that operations on a large scale will be inaugurated.

The trail to the Wakefield mine, Slocan City, is rapidly completed and will be in splendid shape for shipping ore before the snow flies. This mine will send out upwards of 2,000 tons of ore this winter. Extensive improvements are being made to the buildings at the mine.

THE BOUNDARY COUNTRY.

For the past three months considerable development work has been done on the Buckhorn mineral claim, situate in Deadwood camp. It is owned by Messrs. Eilenberg and Dunn. One third of the property is exposed for 70 feet in an open cut. The ore is copper and iron pyrites, in a diorite gangue. Another body of ore has been exposed by a cut 20 feet long and 10 feet wide, carrying an average value of \$14.13 in gold. A third body of ore about eight feet wide was sunk on to a depth of 14 feet and the following assay returns were secured: Copper 10 per cent, gold \$2.08; copper 23 per cent, gold \$2.90; copper 21 3/4 per cent, gold \$6; copper 12 per cent, gold \$2. Four shafts, averaging 16 feet, were sunk; out of these shafts values as high as \$24 in gold were obtained; also various assays running from one and a half to nine per cent in copper have been obtained from these shafts. This enormous ore body must be not less than 200 feet wide on the surface. It has been opened up by means of crosscuts and shafts for nearly 1,000 feet along the ore body.

The Rawhide mine in Greenwood camp was bonded to Peter Larsen this week for \$40,000. Mr. Larsen is one of the contractors for the railway between Robson and Greenwood. Five per cent of the money is to be paid within 12 days from the time the bond was signed. The Rawhide lies to the south of the Snowshoe, and is considered one of the big properties of Greenwood camp. It is of the same character as the other big Greenwood camp properties. The ore vein is very wide and the values are principally in gold and copper with a little silver. But very little work has been done on the property. An open cut crosscuts the vein for 50 feet, and from this cut values as high as \$22 have been secured. The Rawhide is owned by Robert Denzier, A. McInnes of Grand Forks, Thomas Tighe and Mayor Wood of Greenwood.

REVELSTOCK AND TROUT LAKE

The Silver Dollar on Mohawk creek, a tributary of the Poole, in the Iardreau district, is fast coming to the front. It is a silver-lead and gold proposition owned by Moore and Orlando, of Sandon. They received a 60-pound lump of ore last week which assayed \$60 in gold. The Sunshine, limited, the owner of the now famous Silver Cup mine in the Trout Lake district, has just received from the Shelby Smelting & Lead com-

pany checks for \$12,821.95 (freight, treatment and duty charges deducted) in respect of shipments of 123 tons, 310 pounds of Silver Ore to the smelter. A further shipment of about 56 tons has just gone forward. This makes a total of something over 650 tons shipped during the last few months, all the ore being of the same high grade character.—News-Advertiser.

On the Waverley and Tangier properties, near Albert Canyon, extensive development work is going on, the vein at three levels, the lowest being at a depth of 600 feet from the outcropping on the surface. At this property a concentrator is being built, after which it is expected a regular output will be maintained. The concentrates have a value of about \$70 to the ton in silver and lead.

J. D. Graham, manager of the Waverley mines, recently made a trip with the surveyors over the proposed railway line from Albert Canyon up to the headwaters of Downie creek, down Downie creek to the Columbia river, thence down the Columbia river to Revelstoke.

NELSON DIVISION.

Every available team in Ymir is at present engaged in hauling lumber to the Ymir mine. About 240,000 feet of lumber will be required for the big stamp mill and other buildings to be erected.

The miners and prospectors so far have brought into Ymir a fine display of ore to be sent to the mineral exhibit at the Spokane fruit fair. This display is now on exhibition at the offices of the Ymir Development company.

Walter Lanchester and W. J. Hughes are at work in the Meadow Lark mine on Wild Horse creek, not far from the Wilcox. D. A. McKenzie, the owner, visited the property recently and says that the Meadow Lark is looking better every day. The whole width of the shaft is in solid ore, carrying carbonates of silver, galena, zinc blend and arsenical iron. Assays received from four samples taken by Mr. McKenzie went \$18, \$32, \$46 and \$53 in gold to the ton.

W. H. Sandiford has secured an option to purchase a controlling interest in the Sultana group of claims, above Silverton. Ed. Stewart, one of the owners, has taken charge and considerable work will be done this fall.

The trail to the Evening Star mine, Slocan City, is completed and the machinery for working the mine is now on the trail and will be at the mine in a couple of days, when it is hoped that operations on a large scale will be inaugurated.

The trail to the Wakefield mine, Slocan City, is rapidly completed and will be in splendid shape for shipping ore before the snow flies. This mine will send out upwards of 2,000 tons of ore this winter. Extensive improvements are being made to the buildings at the mine.

The Canadian Pacific company, operating the Porto Rico mine at Ymir, announces to its shareholders that the management expects to be turning out gold bricks by the end of October. Work on the Rio Grande is being pushed actively. This property has a promising showing.

EAST KOOTENAY.

Mr. Neave, of Rossland, went to Windermere by last boat with the intention of putting in a camp for winter development of the mine in which he is interested on Toby creek.

A good showing has recently been opened in the Bugabo. E. A. Knowlton has got an assay of \$387 on ore from his Bluewater mine which he had shipped to Montreal. He has now a ton of ore ready for shipment.

Provincial Geologist Robertson is in East Kootenay gathering data for his annual report. Ore from Klinton, Starke and Harrison's property on Toby creek made one of the highest assays recorded in the district. The assay gave 400 gold and 9200 silver, equal to \$396.80 per ton, and the ore was not assayed for copper and lead. The first shipment of three tons has been made to the river and pack trains are now being put in to get out 20 to 40 tons from the mine before the snow flies. The ore is being shipped to the sampler at Kaslo.

The south fork of the Spillimacheen affords a virgin field of great promise for the prospector. The country is cut by deep gulches exposing the formation, and there is an area extending for about 25 miles to the headwaters of the Bugabo that has not yet been explored save by the rush of a few placer miners in the early days, when every stream of its country was traversed in search for its golden sands. The most southerly stream on which any prospecting seems to have been done to any extent is Cryslar creek which traverses the valley across the divide from the mine before there are the basins beneath the summit.

The North Star company will soon start a new shaft to be sunk a depth of 300 feet, and an order has been placed for new hoisting machinery. Some 20 men are employed at the mine prospecting and developing the property.

One of the most surprising and interesting developments of the past week has been the find of rich gold quartz on Boulder creek, which promises to be higher than anything heretofore found in the East Kootenay district. The quartz is of surprising richness, and small samples when panned give large returns in gold. The location of the new discovery is on the west side of Boulder creek, about two and one-half miles from Wild Horse and not over seven miles from Fort Steele. The ledge is visible for about 400 feet on the surface, and the ore chute has been followed for a distance of 150 feet. The

trend of the vein is northeast and southwest, and lies between well defined walls of slate and granite. The ore is a sort of porphyritic quartz, carrying high values in gold. It cannot be said at this time whether the ore contains tellurides or not, but there is no doubt as to its richness. The ore runs \$2,000 in gold and \$30 in silver.

Twelve feet of ore is now exposed in the Queen of the Hills group and the foot wall is not yet in sight. It is reported that a Butte syndicate has bonded three very promising properties on Boulder creek. Representatives of several other large syndicates have been in the district, and succeeded in tying up a number of properties.

Another deal is on hand for the purchasing or bonding of a group of four claims on Boulder creek. It is evident that the completion of the railway and the near approach of good and sufficient means of transportation is the cause of this large influx of capital.

It is reported that D. D. Mann and William Mackenzie, the principal stockholders of the North Star mine, are expected at Fort Steele during the next 10 days, and the question of the railway to the North Star and Sullivan group of mines will be settled.

Subscription Organ Recital.

Music lovers and those interested in the success of the English church and Father Pat, will do well to attend the recital to be given this evening on the new Vocalion by Charles F. Fonday, assisted by Miss Beardsley and Fred. Burroughs in organ and Mrs. McInnes, Mrs. Haskins and W. Hart-McHarg in vocal selections.

The soloists are among the most popular local talent, and the program, subject to change, is as follows:

- PROGRAM.
(A) Prelude in C.....Fonday
(B) Andante in G.....Fonday
Solo.....Selected.
Mrs. Haskins.
1 "Narcissus".....Nevin
2 "Bye Gone Dances".....Housley
Solo.....Selected.
Mrs. Beardsley.
Selection.....Handel
Solo.....Mr. Burroughs.
Solo.....Mrs. McInnes.
March aux Flambeaux.....Scott-Clark
"Dismissal".....MR. FONDAY.

Appointed Works Manager.

Gerald V. Hopkins has been appointed works manager of the British Columbia Bullion Extraction company, limited, of Rossland, of which L. H. Webber is the business manager. The works of this company are located at Silica. Mr. Hopkins has just returned from a visit to Republic where he spent a fortnight in the reduction works of the Republic mine, which are of a similar character to those at Silica. He says that the works at Republic have operated in so satisfactory a manner that it has been decided to double their capacity. The sinking of a shaft to the level of the ore, which is considered to be good work. Mr. Hopkins says the works at Silica will soon begin operations. Mr. Hopkins has been the assayer and analytical chemist with the Kamloops Mining & Development company for the past four months.

The Carpenters' Union.

One of the finest representations of union men in the parade on Monday was formed by the Rossland Carpenters' & Joiners' union. The order has a membership of nearly 60, and nearly all of the members were in line. Every week more carpenters are added to the number. The union is entirely independent, and is not connected with any of the brotherhoods. Its only affiliations are the Rossland Trades & Labor council and the Dominion Trades & Labor congress. J. McLaren is the president of the Rossland union, while Joseph Martin is secretary. A. Dunlop is vice-president, J. Dancy treasurer, while James Pearson is financial secretary.

LOCAL BRETITTES.

The Miner acknowledges the receipt of a handsome bouquet from Mrs. E. Dreyfus. The flowers were grown in the garden at the Dreyfus family residence.

James Campbell, who was among the American troops at the storming of Santiago, is confined to the Sisters' hospital with an attack of fever. His case is not serious.

The ferry over the Columbia river at Northport, which had not been running since last spring was started up again a day or so ago, and is now ready to transport either vehicles or horses.

T. J. Henry, who has been in the police court frequently of late, will ornament the court room no longer for some time to come. He was tried for a vagrancy yesterday, and was given short shrift to leave town.

David Stussl was severely burned about the hands in putting out the fire in the Sparta fruit stand on Tuesday last. The burns, while painful, are not likely to be dangerous. Frank Albe, the proprietor of the place, who was covered with blazing gasoline at the time of the explosion of the stove, is getting along very well at the hospital.

Charles Dempster, who was run over by a horse and severely bruised during the races Tuesday, was confined to his bed yesterday. He will probably be up in a day or so. His hurts are not likely to be lasting.

This office is indebted to Mrs. L. M. Kiem for a beautiful bouquet of flowers. These were grown in the garden of the giver at Missoula, Mont. Mrs. Kiem arrived in Rossland yesterday on a visit to a daughter, Mrs. Richard Marsh.

Angus Buchanan, the blacksmith's helper at the Columbia-Kootenay, who was recently released from the sisters' hospital after being operated upon for appendicitis, received a purse of \$93 yesterday from the officials in miners at the property. Mr. Buchanan is very grateful for the assistance.

The opera house, of which Mr. Lindley is lessee, will be closed dramatically for six months on Friday night, although the management will play some variety shows in the interim. Meanwhile his dramatic company alternates between Victoria and Vancouver.

THE STOCK MARKET

Flurry in Jumbos Was the Feature of the Week.

A BIG JUMP IN ONE DAY

Dear Parks Are Active and There Promises to Be an Advance in Them Soon—There Was Considerable Trading in the Cheaper Shares.

There was more than the usual volume of trading in stocks during the past week and a noticeable feature was the increased dealing in the cheaper grades of shares. The higher priced shares were also dealt in, but not to any large extent. The cheaper stocks traded in are those of companies which recently have resumed operation after periods of inactivity.

Jumbos were a feature of the market. On Saturday morning the shares could have been purchased for 30 cents and on Saturday afternoon they had jumped to 62 cents. They fell to 50 cents on Monday, rose on Tuesday a point or two and last evening they were quoted at from 55 to 60 cents. The demand for these shares was large, and a large number changed hands at the commencement of the flurry. All the excitement was the result of a strike of ore in the tunnel at a depth of 350 feet from the surface. The strike has so encouraged the company that it has decided to install a power plant.

Dear Parks continue to move at a lively rate at about 21 cents. The plant is being rapidly installed, and as the contractors are to receive a bonus of \$10 for each day they have the plant running before the 1st of September, it is fair to presume that it will be in motion before the end of the present month. When it gets in motion it is certain that there will be a sharp advance in the price. Dear Parks, and this will be justified by the condition of the mine, as it will not be long before it will join the ore shippers. There are large reserves of ore in this mine.

There was an enlarged movement in Novelities and a large number of shares were sold. The property of the Novelty company adjoins the Giant. The price of Novelities was from 4 to 5 cents.

Giants were in good demand, and a large number changed hands. The price of Novelities on the Giant property is improving.

There was an increased demand for Iron Horse from 16 to 18 1/2 cents, but supply of shares is short. All the treasury has been subscribed for, and the sinking of a double compartment shaft has been commenced. This shaft will be run to the 200-foot level before drifting will be commenced. The intention is to put in a seven-drill compressor plant so that the work of opening up may not be hampered through lack of machinery.

Virginias are slow and quiet and are selling at from 73 to 75 cents. The work of developing this property is being actively pushed and one of these days there is certain to be a sharp reaction in prices.

Monte Christos are sluggish and hard to move and the few transactions made are at 27 cents. The management of the Monte Christo is energetically engaged in pushing the development work and these shares should go higher before long.

White Bears are strong and the movement in them is large. The shaft has reached a depth of 250 feet, and cutting will be commenced in a few days. A station has been cut out. The shares are selling at 8 cents.

Iron Colts are quoted at 9 1/2 cents and there is considerable inquiry for them on the report that work is shortly to be resumed on the property. The Iron Colts have experienced a severe fall and are now down to 85 cents. The hitch in the negotiations with the Gooderham-Blackstock syndicate is responsible for the drop in the price of these shares.

The trading in Grand Prizes has been exceedingly lively and this is due to the fact that work is to be shortly resumed on the property of the company, which adjoins the Deer Park. The good result attained in the Deer Park has encouraged the Grand Prize people to develop their property. The shares are firm at 4 1/2 cents.

There is considerable inquiry and not a few transactions in Alberta. The price of these shares is 5 cents. The development of the Alberta is going steadily on and the results attained are satisfactory.

There is considerable local demand for Keystone shares and a few sales were reported within the past few days. The price of the Keystone is to be extended 200 feet further.

There is considerable local demand and a number of orders have come from Great Britain for Wild Horses. Uticans are in demand locally and some have been sold during the week. The property of the Utica company adjoins the Tamarac near Ymir, and has the same veins.

Fairmonts are selling readily at cents. Monarchs have been placed on the market, and are selling readily. This is a new venture, which will probably be heard from later on.

The Strike on the Tamarac. J. L. Parker has returned from a visit to Ymir. He reports that the recent strike on the Tamarac is an important one. There is two feet of arsenopyrite ore that goes \$34 in gold to the ton, and 15 inches of oxides carrying fine gold and a foot of gangue. This makes the total width of the vein four feet six inches. While there he made arrangements to let a contract for 400 feet of tunnel in the 200-foot level. On the Tamarac work is being rushed on the concentrator, and it is now thought that it should be in operation inside of 30 days.

NEWS FROM WEST

J. M. Robinson Talks of the Mines of Okanagan.

A FREE MILLING LEDGE

Glen-Robinson is a Typical Mining Camp—Considerable Development Work in Progress—The Health Resort of Peachland.

J. M. Robinson, the general manager of the Canadian-American Gold Mining company, which is operating in the Okanagan country, was among the arrivals yesterday.

"The company," he said, "is operating two groups, the Alma Mater and the Kathleen. The first named properties are near Glen Robinson, the new mining camp lying about 15 miles back of Peachland on the west side of the Okanagan."

"There are altogether about 30 men at work around Glen Robinson, and a dozen properties are being operated in that neighborhood. Of these some Spokane people are working a refractory proposition across the gulch from the Alma Mater group, and they have had assays ranging around \$30."

"On the Kathleen group, nine miles west of Glen Robinson, we are working two shifts of men, who are driving a tunnel in a big body of free milling quartz. It is now in 180 feet and we expect that within 100 feet more we shall encounter a large amount of free milling quartz, and the tunnel is being driven."

"Glen Robinson, which is to be the mining town of that section of the country when the properties there are more thoroughly developed, is at present a collection of only half a dozen cabins. The government has surveyed a wagon road from the place down to Peachland road from the lake, but owing to the change in the provincial ministry the road has not yet been started."

"Peachland now has a population of about 100 people, and more are coming in. There is a store at the place, and a first class school with 20 students in attendance. The people are right up to date, and they are not satisfied with anything but the very best in the way of public improvements. Peachland is primarily a health resort, and on that account it is destined to a promising future, whether or not the mines of the district ever become producers. The climate is delightful, for while the place is 200 miles from the coast, yet it receives the Chinook winds without any of the heavy rains which are such a drawback to life on the coast. In January there is likely to be a slight flurry of snow, but it passes off in a day or so and otherwise the winters are almost perfect. A number of Manitoba people are coming out this way to spend the winter, and it looks as if the resort will grow rapidly."

THE DUNDEE MEETING.

Concentrator to be Completed and Compressor Plant Purchased.

The first meeting of the Dundee mining company, since the directors returned from England, was held on Wednesday in the office of the company in this city. The following directors were present: W. A. Galliber, Colonel Robert Scott, Ernest Kennedy and J. L. Parker. Charles Dundee, president, was in the chair. The chief business transacted was the arranging for the future development of the mine and the erection of the concentrating mill and the purchasing and installation of a seven-drill compressor plant. The several matters were debated at length and as a result it was decided to complete the concentrator as rapidly as possible, to continue the development of the mine and to at once purchase and install a seven-drill compressor. The matter of purchasing the plant was left to J. L. Parker, the consulting engineer of the company. The report of Frank Robison, mining engineer, on the conditions of the Dundee and its promising outlook was read. It showed that there were some 24,000 tons of ore in sight and that the outlook and said that it was a good mine and might with development become a great one. It corroborated all the previous reports of J. L. Parker, and seemed to greatly please the directors.

Send a copy of THE MINER to your friends in the east.

SERVED WITH PAPERS.

B. A. C. Officers Restrained From Dealing in Le Roi Shares.

An incident in connection with the Le Roi deal occurred at Northport Thursday. Hon. C. H. Mackintosh and General Warren left on the Red Mountain train yesterday for Spokane en route for Vancouver, to attend the wedding of Miss Maude Mackintosh. They were accompanied by far as Northport by Edwin Durant, the local manager of the British America corporation. When the train arrived at Northport the party waited on the station platform for the Spokane train. While thus engaged they were approached by a deputy-sheriff and Messrs. Mackintosh and Durant were served with papers, which proved to be injunctions and restraining orders in connection with the Le Roi suit. The gist of the documents was that the parties served are restrained from dealing in any way in the state of Washington in shares or any business connected with the transfer of interests in the Le Roi company.

Mr. Durant returned to Rossland by the noon train. When interviewed by a reporter of THE MINER he treated the incident with indifference, and expressed the opinion that the papers would in no way interfere with the status of the case.

A Strike in the Tamarac.

J. B. Dabney of Dabney & Parker, returned Thursday from a visit to Ymir whither he was called by a telegram informing him that an important strike had been made on the Tamarac. He brought back with him a 60-pound chunk of ore which came from the find on the Tamarac at a depth of 205 feet. The chunk was placed on exhibition in the office of the company yesterday afternoon where it attracted the admiring attention of all who stopped to inspect it. The ore body at the point where the point where the strike is made made is four feet in width, and for the entire width it is of shipping value. The find is regarded as of such importance that J. B. Parker, the consulting engineer for the company, leaves for Ymir this morning and as soon as he arrives at the mine he will arrange to let contracts for the drift on the ore body for a distance of 200 feet to the east and 200 feet to the west from the point where the find was made.

THE EMPRESS OF INDIA.

A Valuable Property Acquired by Kennedy Bros. & Purgold.

An important deal for the acquisition of the Empress of India has just been put through. The property is near Hall's siding, and only a mile and a half from the Porto Rico mine. It is considered one of the best properties in that section. Kennedy Brothers & Purgold have purchased the property from Fuzo & Cousins. The price is withheld, but it is said to be a large sum. The veins are wide and assays reveal that it carries as much as 31 per cent in copper. The intention of the purchasers is to form a company and immediately begin the development of the Empress of India.

Legal Tender Litigation.

Edward Haney of Spokane, the locator of the Legal Tender, was among the arrivals in the city Thursday. He will leave today for Nelson to confer with his solicitor regarding the litigation in which the Legal Tender is involved, as against the Olivette location of the same ground. Mr. Haney's title to the ground was recently confirmed by the supreme court, but an appeal was taken by the Olivette people, and is still pending. A fortnight ago Mr. Haney also won the action brought by the claimants to Pack Train location of the same ground. The only litigation now involving the claim is the appeal taken by the Olivette people from the judgment securing the ground to Mr. Haney.

Commonwealth Gold Mining Company.

J. M. Robinson, the general manager of the Commonwealth Gold Mining Company, left Friday night for Trout lake to look after the interests of the company. The Commonwealth holds two silver-lead properties on the north fork of Lardeau creek, near the town of Ferguson, and about \$5,000 worth of work was done on them last year, while some development has been carried along this season. Mr. Robinson is now seeing to the acquisition by the company of another property in the same neighborhood.

Returned From East Kootenay.

Captain James Morish, the engineer for the Velvet Mines, is back from a trip on professional business through East Kootenay. Captain Morish says that there is some little activity throughout the district, only a few properties are as yet being developed. He rode through on horseback from Goat river to Fort Steele and back. The railway line is now being extended to the head of Kootenay lake by the last of the month. The grade has already been completed to Kuskanook, and track is being laid at a rapid rate.

The Deer Park.

The cut on the surface of the Deer Park ledge, about 100 feet south of the shaft house, is showing some excellent results, and while no assays have been made it will apparently give excellent results. The work has shown the hanging wall of the ledge, which heretofore had never been found, and the discovery may prove of considerable importance in the future development of the property. The cut is about 30 feet long, but the foot wall has not yet been disclosed.

Retracts the Denial.

T. G. Blackstock reiterates his denial that there is a deal on for the purchase by the Gooderham-Blackstock syndicate of the Iron Mask, and further states that there is not likely to be one. It is now stated that this syndicate had an option on the purchase of the property, which expired on Wednesday of this week. There is a rumor extant that parties in Toronto, other than the Gooderham-Blackstock syndicate, are endeavoring to secure the control of the property.

A. C. Sutton, the city solicitor of Grand Forks, is in the city.

Mr. Sutton states that the business conditions in the Boundary Creek country are changing greatly for the better. The work on the construction of the Robson-Penticton railway has given an impetus to mining in that section, and many properties have recently changed hands.

JUMBO IS ALL RIGHT

There is a Marked Improvement in the Showing.

COMING INTO GOOD ORE

Mr. Galusha Says It Will Take Some Time to Demonstrate its Value But That its Showing is Satisfactory—Mining Notes of Interest.

"There has been a very marked improvement lately in the showing on the Jumbo," said M. R. Galusha, the manager of the property, to a MINER reporter last night. "The face of the lower tunnel is now coming into good looking quartz and iron ore. As yet it is too early to say what the extent of the find may be. It will take some time yet fully to demonstrate its value. But the showing is very satisfactory."

The tunnel where work is now being carried on is a prospecting drift, which has been under way for over a year past.

It is being directed towards a large chute of ore which was opened by one of the shafts on the upper side of the hill. As yet the face of the tunnel has not reached the point where it was expected that the chute would be found, but it is very near.

"We are thinking of running a new crosscut tunnel, which would be the main working vent of the property," continued Mr. Galusha. "The site has already been selected and cleared, a few hundred feet south of the entrance to the present workings. The slope of the hill is admirably adapted to running the new tunnel, as a depth of 400 feet would be afforded by a crosscut 300 feet long. We should gain more than foot for foot. I hope that we will be able soon to put in machinery."

A RICH STRIKE.

It Has Been Made on the Waterloo at Camp McKinney.

Some references have been made to the recent rich strike in the Waterloo claim in Camp McKinney, and so little has been said that it may be conjectured that the recent find of much visible gold in the ore was of small moment, and hardly worthy of consideration. This is not the case, however, for apart from the visible gold, a large quantity of which was blown out by a shaft which was put into the ledge right on the surface, the claim is an interesting one, from the fact that the ore disclosed in the vein and the tendency of the vein itself, would show that it is an extension of the same ore body from which so much bullion has been taken by the now famous Cariboo company. This can be of course the more readily be understood by those familiar with the fact around the Waterloo, and with the fact that no great distance separates the eastern side of the Cariboo property from the western side of the Waterloo, and that all work so far done on the latter, which consists of a 30-foot shaft which is comparatively recent location, is owned by Messrs. J. Murphy and Thomas Graham and Mrs. Finnigan, all parties residing at Camp McKinney, and this fact makes the new strike more interesting, for it is a favorable comment upon the mine, will, no doubt, see to it that the recent rich strike is followed with an amount of development calculated to establish the Waterloo as one of the permanent gold producers of the camp.

THE LARDEAU COUNTRY.

It is Great From a Scenic and Mining Standpoint.

W. R. Meyers, one of the pioneer investors of the Lardeau country, is in the city on a visit. Mr. Meyers speaks in enthusiastic terms of the sections both from a scenic and mining standpoint. In speaking of the scenery he said: "The scenery there is to my notion very grand. To be sure it is Alpine in character, but it is so beautiful to be real. In the years that are to come I am sure that the Lardeau mountains will become as much a Mecca for sightseers and mountain climbers as Switzerland. As far as mining is concerned there is no section, in my opinion, that is richer than the Lardeau. There are a large number of properties there that run very high in silver and lead, and there are others that are rich in gold. I know of one property from which the ore sent to the smelter gave returns of \$1,000 to the ton. It seems certain that we are going to have railway transportation and then there will be a repetition there of the scenes that have been witnessed in the Rossland. I am interested in the Lexington group, which is made up of the Lone Star and Kitsap claims. This group is located only a few miles from the lake and about five miles from the head of the Lardeau. The ore goes 63 ounces in silver and 72 per cent lead and \$4.50 in gold. I am interested in a townsite on Whisky flat on the rim of the lake. On Whisky flat I am interested in a claim, the ore of which runs \$154 in gold to the ton. It is within 50 feet of the lake and affords a splendid opportunity for shipping. It is a great country and I intend to stay with it till I have made something."

Sydney B. Roach, the manager of the Vernon & Nelson telephone company, is in Rossland.

Mr. Roach states that the business conditions in the Boundary Creek country are changing greatly for the better. The work on the construction of the Robson-Penticton railway has given an impetus to mining in that section, and many properties have recently changed hands.

J. C. O. Fraser, the manager of the Bank of Montreal, is in Rossland.

Mr. Fraser states that the business conditions in the Boundary Creek country are changing greatly for the better. The work on the construction of the Robson-Penticton railway has given an impetus to mining in that section, and many properties have recently changed hands.

MINING NOTES.

The Mugwump Gold Mining company has received a certificate of improvements for the Mugwump on Red mountain, near the War Eagle.

A strike of three feet of ore has been made in the 50-foot level of the Good Hope. The full width of the find has not yet been determined.

Operations have been resumed on the Red Fox property, which adjoins the Buckeye in the south belt. There are three distinct veins on the surface of this property and it is thought a little development will show an ore body.

Work is shortly to be resumed on the Grand Prize. The Reddick-Jackson company has just sold a block of 100,000 of the treasury shares of this company. The proceeds are to be put into development work. The good results being attained in the Deer park have so encouraged the directors and stockholders of the Grand Prize that it was some time since decided to resume operations.

James Goldsmith, who has been acting as foreman on the properties of the Lardeau-Goldsmith Mines, limited, on Fish creek in the Lardeau country, is in the city. He reports that the tunnel on the property is a distance of 50 feet and that the showing is an excellent one. There is a splendid seam of galena ore that carries gold, and silver is mixed with the copper.

John McKane, secretary of the board of trade, reports that the exhibit of ore intended for the exhibition at New Westminster is growing. The mine owners are commencing to respond and the exhibit promises to be a credit to Trail Creek division, although ore have been received from outside mines. Specimens from the following have been received: Colman-Kootenay, Velvet, Jumbo, Porto Rico, Homestake, Le Roi, Nickel Plate, Great Western, Giant, Josie, No. 1, London Consolidated and others.

FROM THE RECORDS.

Transfers.

SEPTEMBER 14.

Copy of supreme court order confirming W. G. Merryweather's title to Rubenstein mineral claim, as against the city.

Sept. 8.—Mugwump, to Mugwump Gold Mining company.

Water Rights.

Sept. 10.—A. G. Lang, to 200 inches of water out of McCormick creek for placer purposes on Pend Oreille.

Sept. 13.—To city of Rossland, 50 inches out of north fork of Murphy creek, 30 inches out of Murphy creek and 20 inches out of Rock creek.

BACK FROM ENGLAND.

Rossland Operator Makes a Successful Business Visit to Europe.

Harry White, ex-mayor of Seattle, managing director of the Fourteen Consolidated Gold Mines, Limited, and a heavy stockholder in the English Canadian company, has returned from a five months' trip to Europe, whither he went on business connected with his interests in this camp.

During his absence he succeeded in organizing the English Canadian company, which has practically arranged to take over the Lily May mine and extensively develop it. A deal was also made for the properties of the Fourteen Consolidated, and the result will probably be that a large sum of money will be spent in opening out the groups in the near future.

Mr. White states that the London mining market is closely watching the development of the Rossland camp, and it is certain that a large amount of English capital will be invested here during the next few years. He heard nothing in London with respect to the Kootenays. The district is looked upon there as the coming mining region of the world.

Mr. White visited Paris, Berlin and Brussels. Rossland is not unknown in these cities and it is believed that capital may be expected from these sources as soon as the Kootenay boom strikes London.

Mr. White leaves this morning for Montreal and will return in about 30 days.

Has Declared a Dividend.

The Republic mine of Republic, on the reservation, has declared a dividend of \$20,000, and the management declares that it will be able to declare dividends every month. Messrs. Robbins & Long of this city, are among the larger shareholders in this company, and are much pleased over the fact that the company has begun to pay dividends.

A Friend's Advice Leads to Health and Happiness.

Paine's Celery Compound Used by a Mother and Her Daughter.

Rheumatism, Nervousness and Kidney Disease Banished.

A Letter that should Inspire Hope

A Guarantee of New Life to Every Sufferer.

WELLS & RICHARDSON CO.

Dear Sirs—I think it is a duty to write to you regarding the benefits derived by my daughter and myself from the use of your Paine's Celery Compound.

For years I was troubled with rheumatism and nervousness. I was treated by doctors, and tried medicine after medicine without any good results. Fortunately a friend of mine advised me to try Paine's Celery Compound. I did so, and after using four bottles I found I was stronger and better than I had been for years. My daughter was cured of kidney disease after suffering for twelve years, by using a few bottles of Paine's Celery Compound. I advise all suffering from rheumatism, nervousness and kidney troubles to give the compound a trial. Yours sincerely, MRS. LOUIS LEFAVE, Chapeau, Ont.

The subscription price six months or one year, foreign \$2.50, also in advance.

THE ORE SHIPMENTS.

Table with 2 columns: Ore Name, Amount. Includes Le Roi, War Eagle, Centre Star, etc.

The ore shipments for the seven days from Sept. 15 to Sept. 21, inclusive, were as follows: War Eagle, 1,412 tons; Centre Star, 2,657 tons; Iron Mask, 2,565 tons; Le Roi, 4,043 tons.

THE AGENT-GENERAL'S OFFICE.

The Provincial government has dismissed Hon. Forbes G. Vernon, agent-general for British Columbia in London, and it is rumored that the office will remain closed indefinitely. Surely this is a mistake. The government cannot possibly be so short-sighted as to cut off such a valuable department of the civil service.

A MODEL CELEBRATION.

Rossland may well claim to be the place in the Kootenays where the most successful public entertainments are given. Look at the list for this year. First there was the midwinter celebration, during which the hibernial sports lasted for three days and attracted visitors from all over the Kootenays and not a few from Washington.

CAMP IS NOT A MISNOMER.

A contributor to a Rossland paper, who is evidently a tenderfoot and not used to "wild western ways" has had his sensibilities somewhat severely shocked by the use of the word camp as applied to Rossland. He thinks that now that it is a good sized city that the application of the word camp to it is a misnomer.

Another feature worthy of comment was the tone adopted by the speakers. They told of the pleasant relations that exist here between labor and capital and expressed the wish and prophesied that these conditions would remain as they are for some time to come.

the name to the collection of tents and rudely constructed houses in which they resided while conducting their first mining operations. If the mines they were working were rich and important and the collection of tents and shacks evolved into a large city it was still a camp to them. In this way Butte grew from the simple tent of the first prospector, to a city of 35,000. To the first prospector it was a camp and to the mining men it is still a camp, even with its magnificent buildings, its large hospitals, its banks and all the conveniences of modern life.

AN INTERESTING QUESTION.

The interview with Nicholas Tregear of the Le Roi mine, published in this issue, will be found interesting. In this Mr. Tregear states that the ore of the Le Roi was as rich on the surface in gold and silver as it is at the greatest depth in the mine. There was an increase in the copper values and the ore became more silicious with depth.

MR. MACKAY'S OPINION.

"J. W. Mackay, the mining and cable magnate, is on his way to the Pacific coast, and it is not improbable that he will visit Kootenay before proceeding to San Francisco. Mr. Mackay is already heavily interested in the Rossland camp, being the head of the Mackay-Hosmer syndicate, which control the Monte Christo, Virginia and other properties in the North Belt.

ROSSLAND'S GENEROSITY APPRECIATED.

Rossland's extraordinary generosity to the New Westminster fire sufferers has amazed the people of the Dominion. The newspapers east and west are commenting on it. The Toronto Telegram declares that "The little city hidden among the Kootenay mountains has taught its older sisters a wholesome lesson."

THE FLEBSOITE.

A plebiscite is a piece of machinery borrowed from the French, by means of which the people are permitted to express their opinion upon proposed legislation free from the intervention of parliament and without party entanglements. The object of the Prohibition Plebiscite to be taken on the 29th inst. is to enable the electors of the entire country to answer "Yes" or "No," the following question: "Are you in favor of an act prohibiting the importation, manufacture, or sale of spirits, wine, beer, and all other alcoholic liquors used as beverages?"

its scope is wider, embraces the country as a whole, and prevents the manufacture and importation, as well as the sale of spirits of liquors. This is the first experiment of the kind in Canada. There have been attempts to force Prohibition within limited areas, but this the first occasion when the entire country has been asked to pronounce the verdict upon the adoption of such a measure, and where the importation is to be stopped, as well as the manufacture and sale.

EDITORIAL NOTES.

The price of silver is steadily climbing upward. Today, at 61 5/16, it is higher than it has been for many months past. This will be cheering news to the silver miners of the district. A few points higher and the hum of industry will be heard on all sides in the Great Slope.

For the 12 months ending August 31, 1897, the gross receipts of the Toronto street car lines were \$1,020,215.40 and the city's percentage \$22,021.54. For the 12 months ending August 31, 1898, the gross receipts were \$1,142,876.54, and the city's percentage \$24,387.66.

WIDENING THE GAUGE.

The Work Will Be Finished by the Middle of November. "Alterations in the line of the broad gauge track between here and Trail will delay the completion of the improvements slightly," said F. P. Gutelius, the superintendent of the line, last evening.

MAJOR WALLACE HAS RECEIVED THE FOLLOWING MESSAGE FROM MAYOR OWENS OF NEW WESTMINSTER, ACKNOWLEDGING THE RECEIPT OF THE SECOND CONTRIBUTION OF \$1,000 IN AID OF THE SILVER SUFFERS:

Major Wallace, Rossland, B. C.—Second contribution of \$1,000 in aid of the silver sufferers and the sufferers in general. The Rossland club will erect a monument to the memory of the silver sufferers in the name of the Rosslanders. Thomas Owens, Mayor.

"MY FRIENDS DESPAIR."

La Grippe and Nervous Prostration Death—South American Nerveine Was the Life-Saver. "I was ailing for nearly four years with nervous prostration. I tried many remedies and was treated by physicians without any permanent benefit. A year ago I took a gripe, which greatly aggravated my trouble. My friends despaired of my recovery. I was induced to try South American Nerveine, and was rejoiced to get almost instant relief. I have used four bottles and feel myself completely cured. I believe it's the best remedy known for the nerves and blood." Wm. M. Cope, Newcastle, N. B. Sold by Goodvee Bros.

STREET IMPROVEMENTS.

Cutting Down of the Bluff Will Not Soon Be Completed. The street improvements which the board of works have undertaken, are employing what few idle men there were in the city. Columbia avenue is being reduced to grade at the west end of the standard streets. There was a good demand for iron horse but it is almost impossible to find any stock at price quoted.

MARKET FEATURES.

Yesterday's market was active and considerable trading was done in the standard stocks. There was a good demand for iron horse but it is almost impossible to find any stock at price quoted. There is a lot of trading in Grand Prize and it is likely when work starts this week that the market will be active for it. Commander is a great favorite in the east and it is impossible to supply the demand. There was also a good local as well as outside demand for Giant.

ALL SORTS OF NEWS

Several Cases of Glanders in the Boundary District.

CLUNE IS NOT CHAMPION

A Test Case of the Kellie Truck Act at Brooklyn, Which Was Decided in Favor of the Defendants—Three Lives Lost in the Columbia.

Mr. Mickle, one of the proprietors of the International hotel at Greenwood, was rather severely burned last week by an explosion of acetylene gas.

Lord Charles Beresford, rear admiral of the British navy, passed through Revelstoke last week en route to China, where he goes to see that Britain's demands are carried out in the deposition of Li Hung Chang and to keep cases on the situation, with a probability of his having to take British interests in charge.

Dr. J. Christie, Dominion veterinary surgeon, has discovered several cases of glanders in the Boundary country. All the affected animals have been quarantined.

Fred. Wollaston, P. L. S., and corps of assistants, are busy putting out Mr. Moody's townsite the foot of Christina lake.

A force of men is now at work improving the road between Cascade City and a contract has been let for the erection of a hotel there.

F. E. Simpson, formerly of the Wardner International, has succeeded H. M. Wentworth as editor of the Cranbrook Herald.

W. N. Casey, of Bossburg, has ordered the machinery for a six horse power launch, which will be 30 feet long and six-foot beam and will carry 35 passengers.

The tracklayers on the Crow's Nest railway are keeping up close to their promises. It was stated that the steel would reach Moyie City by the end of August. This was not verified, but at 8 o'clock on the morning of Saturday, September 3, the rails were within a mile of Moyie.

Dr. Arthur held an inquest Thursday afternoon of last week at Nelson to determine the cause of the death of Joseph Pepin. A verdict was rendered to the effect that Pepin's death was caused by wounds self-inflicted while temporarily insane.

At the construction of the Lawley Hardware company's building, and went on a protracted spree when the work was finished. The wounds which caused his death were inflicted with a knife at the Poorman mine early Wednesday morning.

D. J. Clune, one of the pioneer miners of Boundary creek, declares himself the champion rock driller of British Columbia. A few days since he met and defeated A. D. McLeod, the former champion, Clune drilled 32 1/2 inches in 15 minutes, while McLeod only got down 30 1/2 inches in the same time.

On Monday, Sept. 12, there was a collision on the line at the loop on the Crow's Nest railway between two trains, owing to a mistake in running orders. Roadmaster Giles and two Italian employees were killed. It is difficult to ascertain the cause of the collision, but it is reported that Mr. Giles attempted to jump when he saw that a collision was inevitable and fell between the cars and his body was cut in two.

Frank Hoffman, of Sandon, B. C., was drowned on Great Slave lake on July 17, by the boat in which he was being swamped. Hoffman was accompanied on the trip by his wife and Messrs. Joe Snieder and J. A. Hoffmeyer, of Sandon. 2,500 pounds of rock were lost, which was driven on to the rocks near the shore and was destroyed and the cargo lost. Hoffman was the only one drowned. Mrs. Hoffman and Snieder joined another Yukon party and went on.

The Fort Steele Prospector has notice of application for a charter for a railroad to connect with the Crow's Nest Pass line at some point between Wardner and Elk river to run up the east side of Kootenai river to Windermere, where the river will be crossed and the road continued up Toby creek and across the Selkirk range to the foot of Lake Duncan, thence up the Lardo river to Trout lake and thence as direct as possible to the Revelstoke branch of the C. P. E. It is stated that work will be started on the line next spring, if a charter is granted. Almost every mile of the line would be through a mineral country, which needs transportation and is ready for it.

J. W. Stewart, manager for Mann, Foley Bros. & Larsen, the railway contractors, has been in Greenwood for several days. He is sizing up the situation and will let sub-contractors know the line in a very short time. All the work to Grand Forks has already been taken by sub-contractors. Next week a construction gang will beat work in the vicinity of Fisherman creek, and by the end of October Mr. Stewart expects that the whole of the work will be covered. C. P. R. Engineer Rice has almost completed the survey of the branch line to Deadwood and Copper camps. The line winds around the mountain and comes down to the switches at the Greenwood station.

A few days since J. Neilson, with a crew consisting of Frank E. Saunders, William Doyle, J. Laplante, Sam Bouten, Alf. Palmer, Donald MacRae, George Mackintosh, William De Faut, Joe Rolleston and an unknown Swede, left Revelstoke with T. Horn's freight boat with a cargo of machinery, cable and provisions for the French Creek company, and were just about through the canyon when a huge sweep wrenched the bow of the boat from the linemen on shore, swung it and in an instant it capsized, broke in two and sunk, throwing seven of the crew into the mad waters of the Columbia. The boat and men were washed ashore and rescued by the shermen, but Joe Rolleston, W. Doyle and an unknown Swede, after a desperate struggle with the cold, treacherous waters, sank to rise no more.

Under the Kellie Truck Act, Richard Crozier, a blacksmith, sued Mann, Foley Bros. & Larsen, for cash instead of time check in payment for wages. The justices, Major Cooper and G. C. McGregor

THE SPORT IS OVER

An Exciting Race Run on Columbia Avenue Yesterday.

"55" WAS THE WINNER

In Order to Defeat Sleepy Buck the Rider of "55" Fouled the Former and This Resulted in Almost a Serious Accident—The Shooting.

The Labor day celebration ended Tuesday with some unusually exciting races and a gun club tourney. Most of the visitors from the outside towns had returned home on the previous night, but enough remained to give plenty of animation to the streets. The races were started from the Windsor and run down the street to the corner of Columbia avenue and St. Paul street. The course was very nearly in perfect condition. It was as level as a sheet of ice, and just hard enough to make good running possible. Hopes had been put upon the side of the street to keep the crowds from the course. The idea was an excellent one for it gave the jockeys an open speedway, while at the same time it reduced the danger of accidents.

The Open Pony Race was an interesting event as one seldom sees. There were four entries, Oregon's Roseland, Leckie's 55, Kirkland's Sleepy Buck and Hartline's Sleepy Jim. Roseland was easily beaten by both 55 and Sleepy Buck, between whom the real race lay. Sleepy Buck won the first two heats, with 55 a shade behind in each case. In the third and fourth heats, the results were reversed, and 55 led with Sleepy Buck a whisker-length behind. The final heat which would decide the event was half way completed, with the two leaders so close together that it was hard to say which had the best of it, when Sleepy Buck, which was hugging the sidewalk, collided with the lamp post in front of O'Hearn's store. Shelley Jones, the rider, was thrown with frightful force to the ground, and the post was smashed on behalf of the competitor. The other part, which was reversed, and 55 led with Sleepy Buck a whisker-length behind. The supporters of Sleepy Buck claimed that the accident had been caused by 55's forcing her rival against the post. They wanted the decision. The judge, a solicitor of the supreme court, and gave the heat to 55, which thereby won the race. The foul was a palpable one on the part of 55's rider and he should not have been given the heat.

Jones, the jockey who was thrown, was not seriously hurt and was able to be around again in a few minutes. The green pony race was won by Charles Dundee's Firefly, with McLean's Bones second.

GUN CLUB TOURNEY.

The Sportsmen Had a Fine Day's Shooting Yesterday.

The gun club tourney was contested Tuesday morning at the club's grounds on East Columbia avenue. A good-sized crowd was in attendance. The electrical equipment at the club grounds worked admirably, and though the wind was equally and shifting, the target was high and fine day's shooting. The first event, with 20 clay birds, from known traps at known angles, went to W. S. Haskins, with J. W. Graham second and R. C. Palmer third. The prizes were \$7.50, \$5 and \$2.50.

The second event was open only to those holding miners' licenses. Twenty single clay birds were thrown from known traps at unknown angles. The winners were the same as in the previous event. The prizes were \$10, \$5 and \$2.50. Mr. Haskins took first money, \$20 in cash for boys under 10, while Dan Forthath won \$2 worth of goods donated by J. H. Robinson, and L. Jones got \$1 worth of goods offered by M. J. O'Hearn.

In the race for girls under 14, the winners of first, second and third places were Roseland and Trail. Roseland and B. White. The first prize was \$5, the second, a silver bird dish, and the third \$2 in goods from M. J. O'Hearn's. In the race for girls under 12, A. Trombley took first place with \$3 worth of goods, while E. Cosgriff won third place and \$1. The little girls under 10 had a race of their own, when A. Inchee received the first prize, \$1; E. Wood, second place, got \$1 in goods; and A. Simonsen, who came in third, received an equal amount.

The boys' sack race resulted in B. Rawlins getting first money, \$2, while B. Donahue, who came in second, was awarded \$1 in merchandise. The union men's race resulted in first money going to W. Carlson, while J. Pascoe got second place and F. Menary third.

The tug of war brought out two entries, Roseland and Trail. The latter won without much trouble after an interesting little struggle.

THE HORSE RACES.

The races in the afternoon, whilst not of a very sensational character, attracted plenty of interest. The program was revised so that the green pony race was deferred until today, while the open race was advanced so as to take place yesterday afternoon. In the open pony race 55 won three straight heats against R. Leech's Molly took second place in each heat, while Fellowes' Dick the Devil got the third position.

The other race of the day was a new one, and between Major and Kennerly's Maude for \$100 per side. Major won two straight heats, which carried the race.

Today the final horse races will be run. The events will be a green pony race, 55 barred, and an open race, three in five. The entries in the green pony race are Yankee Doodle, Dick the Devil, Bones, Kit and Johnny. In the open race the entries are Kirkland's Sleepy Jim, Dave Maloney and George Baker are the starters. Jerry Spellman, Charles Howson and Lee Combs are the judges.

LABOR'S HONOR

Intervals and the result was 54 strokes the first minute, 50 strokes the fourth minute, 50 the seventh and 51 the fourteenth minute. This would make the average number of strokes 51 1/2 per minute. There seemed to be considerable power in his blows, but veteran miners declared that Davis was an excellent hand to turn the drills and a lighting changer he was not quite as good as some of Burn's former partners.

When the end of the 15 minutes had come and the measurements were made it was found that Burns and Davis had drilled 30 1/2 inches. The knowing ones shook their heads and declared that it was not up to the average and that it would be beaten.

Michael McNicol and William Talon were given a cordial reception when they stood stripped for the contest. McNicol who was to strike is not quite as large as Burns, but is more cleanly built and is a powerful looking man, Talon is an intense looking individual of much strength and build, and full of nervous energy. When the hammer began to fall one of the group of miners who were standing nearby said: "Talon is the best drill turner in the Kootenays and McNicol is a fine hammer man; Burns was not at himself and these two will win." McNicol began his operations with 54 strokes to the minute, but the gait was too speedy for him and he slowed down at times to 47. The predictions made by the miners as to the ability of Talon were realized, for as soon as McNicol struck, his partner would lift the drill six or seven inches and send it down with a great deal of force and this helped to increase the depth of the hole materially. In changing the drills when they became dull, the fact the star at the hammer was strongly supported by the drill turner and the crowd watched and applauded the points that each made. It became manifest that McNicol and Talon were men of nerve and from that time on they were encouraged by loud applause from the assemblage. In the first minute McNicol struck 54 blows, in the fourth minute 48, in the eighth 47 and in the twelfth 45. He gave an average of 50 1/2 blows a minute. He struck the hammer fewer times than Burns but he hit it harder, as is evidenced by the result. When time was called, and when the result had been announced, Talon and Talon had drilled 37 inches in 15 minutes and won the prize of \$150 and also the championship of British Columbia a great cheer went up, indeed. It was a surprise to many that Burns, the hitherto invincible champion of British Columbia, had been beaten by 6 1/2 inches.

The youngsters of the town had a drilling contest all to themselves in the afternoon. The prizes were substantial ones, as purses of \$25 each were offered by the committee. The winning team among the boys under 12, and among the boys under 16. Willie Furlong and John Dooly got the money in the latter class. They drilled 13-16 inches in 10 minutes, which was very good for the class. The purses in the 12 year old class was carried away by Harry Martin and Arthur Smithers, both sons of mining foremen, who put down a hole 5-13-16 inches deep in five minutes.

THE FOOT RACE.

It Was Won by Jack Allen of the Fire Department.

The 150-yard foot race for a cash prize of \$100 was won without much difficulty by Jack Allen of the Roseland fire department. The only entry was Dan Miller of Clifton. Both are professional racers, and they made a pretty contest. Allen won by about 10 feet.

The children's races made plenty of fun for the spectators, and as cash prizes worth working for were offered, the youngsters contested bravely for them. Chairman McLaren supervised the events, assisted by T. M. Beamish, James Law and P. H. Reed. The race for boys under 14 was won by J. Lawler, with A. Fraser second and F. Trombley third. Martin began first place in the race for boys under 12, while B. Donahue won second money and B. Rawlins third. The prizes in both races were \$5, \$3 and \$2, respectively. J. Matheny got first money \$2 in cash for boys under 10, while Dan Forthath won \$2 worth of goods donated by J. H. Robinson, and L. Jones got \$1 worth of goods offered by M. J. O'Hearn.

In the race for girls under 14, the winners of first, second and third places were Roseland and Trail. Roseland and B. White. The first prize was \$5, the second, a silver bird dish, and the third \$2 in goods from M. J. O'Hearn's. In the race for girls under 12, A. Trombley took first place with \$3 worth of goods, while E. Cosgriff won third place and \$1. The little girls under 10 had a race of their own, when A. Inchee received the first prize, \$1; E. Wood, second place, got \$1 in goods; and A. Simonsen, who came in third, received an equal amount.

The boys' sack race resulted in B. Rawlins getting first money, \$2, while B. Donahue, who came in second, was awarded \$1 in merchandise. The union men's race resulted in first money going to W. Carlson, while J. Pascoe got second place and F. Menary third.

The tug of war brought out two entries, Roseland and Trail. The latter won without much trouble after an interesting little struggle.

GREATER BRITAIN EXHIBIT.

A Member of the London Chamber of Mines Strongly Recommends It.

George Taunt, of Toronto, who is representing a London mining syndicate, is in the city. Mr. Taunt is also a member of the Incorporated London Chamber of Mines, and he has been requested by the secretary of that institution to do exhibit from British Columbia for the Greater Britain exhibition that will be held in London next year.

Mr. Taunt expressed much surprise and disappointment at the announcement in THE MINER that the provincial government was hesitating to financially assist in making a mineral display at the exhibition. He is of the opinion that it would be criminal for the government not to take part in this exhibition. "We want," he said, Canada and especially British Columbia to make the largest and best exhibit of all the colonies. There is nothing that could better advertise the mineral resources of this province. Now is the time to push our services to the front as Britain's richest colony. British capital today is at a standstill with regard to Australian mines, and money is being withdrawn as fast as possible from South Africa. There is also considerable anxiety among Englishmen as to their investments in the United States. The attention of the minded men of London is at present centered on Canada and particularly British Columbia.

Mr. Taunt says that if the ore exhibit at New Westminster is sent to London he will guarantee that it shall be shown in its entirety at the special exhibit of the New Westminster Fair.

There seems to be some doubt as to where the Greater Britain exhibition will be held. It has been reported that Earl Court has been selected, but Mr. Taunt says that Olympia is more suited for the exhibition, as it is a much larger and more convenient place. It has been decided to hold the exhibition at the Olympia grounds.

WESTMINSTER FIRE.

Losses Were Fully \$3,000,000—Insurance Over \$1,000,000.

It is estimated that the loss suffered by the people of New Westminster by reason of the recent fire was fully \$3,000,000. Of this sum something over \$1,000,000 was covered by insurance. This amount is divided between 28 companies, of which the London Assurance company is the heaviest loser, with a total of \$147,000. The following shows the loss of each company:

Table listing insurance companies and their respective losses: North British & Mercantile, Gold San Fire, London, 44,000; Royal, 44,000; Hartford, 30,000; British America, Toronto, 15,000; Liverpool and London, 15,000; Phoenix of London, 75,000; Guardian, 45,800; Alliance, 35,800; Atlas, 28,000; Actua, 28,000; Connecticut, 28,000; Union of London, 23,900; Insurance Company of North America, 24,800; Manchester, 24,800; London and Lancashire, 18,000; Imperial, 18,000; Northern, 17,000; Commercial Union, 10,750; Norwich Union, 23,700; Scottish Union and National, 18,000; Lancashire, 18,000; Queen's, 21,000; Phoenix of Ireland, 21,000; Phoenix of Hartford, 19,000; Western, of Toronto, 19,000.

The Crescent Dry Goods company expects to be at home in its handsome building on Columbia avenue about the first of next month. The Bank of Toronto is talked of as a possible occupant of the quarters in the Stone block, at present occupied by the Crescent.

ROSSLAND MINING MARKET

DICKINSON & ORDE,

WALTER L. ORDE. DANIEL DICKINSON. P. O. Box, 631. Telephone 61. 46 Columbia Ave., Rossland, B. C.

THE WEEK'S REPORT.

Business was last week diversified by a flurry in Grand Prize, which stock rose from about 2 1/2 cents to about 5 cents, where it is still standing, though not in any very great demand. A strike on the Jumbo which are securely held and are not easy to obtain at present. Giant is a strong favorite and Novelty and Gertrude are also in good demand. Virginia is still weak, but has many friends and should soon take an upward turn. There are plenty of inquirers after White Bear and Deer Park.

Our Market Quotations, Corrected Weekly.

Table of market quotations for various stocks: Athabasca, Brandon & Golden Crow, Canadian G. F. Synd., etc.

GOOD THINGS.

2,145 Canadian Gold Fields Syndicate, 8 1/2%; 1,000 Cariboo, (Camp McKinney), 7 1/2%; 1,000 Deer Park, 10 1/2%; 400 Dundee, 48c; 1,000 Evening Star, 5 1/2%; 1,000 Giant, 7c; 5,000 Iron Colt, 9 1/2%; 4,000 Roseland Homestake, 4c; 1,500 Snaugler, 15c; 1,000 Sloan Star, \$1.50; 1,000 Victory-Triumph, 9c; 5,000 Virginia, 7 1/2%; 10,000 White Bear, 7 1/2c.

Harris, Kennedy & Co.

Mining Brokers and Agents. P. O. BOX 328. ROSSLAND, B. C.

We are in a position to negotiate the sale of some of the best properties in West Kootenay. Roseland mining stocks have made fortunes of late for those who have invested judiciously. SILVER BELLE will be a money maker in the near future under the reconstruction now in progress, and we advise you to pick up any cheap shares of this stock that are offered. We also recommend Deer Park as a good buy.

Stocks Bought and Sold. Correspondence Solicited. Cable Address "Graham," Rossland.

IN THE SUPREME COURT, IN THE MATTER OF

O. K. GOLD MINING COMPANY

Limited Liability, (Foreign). In Liquidation. The Undersigned Official Liquidator Will Sell by Private Treaty Subject to Ratification by the Court

IN ONE LOT

The property known as the O. K. Mine and the buildings belonging to the said company also the entire mining and milling plant of said company, the whole situated on the south slope of O. K. mountain, in the Trail Creek Mining Division of West Kootenay, Province of British Columbia. The claim is surveyed and crown granted and known as the O. K. mineral claim, official number 678. The property is about two and one-half miles west of the City of Rossland and close to the main wagon road and Red Mountain railroad, both leading from the City of Rossland to Northport, in the State of Washington.

The development consists of three main tunnels, with one winze and numerous drifts, together aggregating over 1,500 feet of work. The property is open to inspection, but an order for that purpose must be obtained at the office of the liquidator, 3 Imperial Block, Rossland, B. C., where prices, terms and further information can be obtained.

Under an order of the court heretofore issued the undersigned is authorized to give a show-up or working bond on the mine. Telegraphic and cable address, Plewman, Rossland.

Richard Plewman, Official Liquidator.

THE STOCK MARKET

Latest Information Furnished on Application by M. E. DEMPSTER & CO., 43 East Columbia Avenue, Rossland, B. C.

(ONE OF THE OLDEST ESTABLISHED FIRMS IN ROSSLAND). ESTABLISHED 1895. CODES: A B C, Moring & Neil's, and Clough's. Cable Address: "MEDCO."

Lee, 2 1/2%; 25,000 Roseland Green Mountain (pooled), 1c; 3,000 Silver Queen, 11c; 10,000 Virginia, 7 1/2%; 10,000 Giant, 7c; 5,000 Vulcan, 2 1/2%; 5,000 Winnipeg, 6 1/2%; 10,000 Home, 4 1/2%; 5,000 Pay Ore, 1 1/2%; 2,500 Yon Consoledated, 2 1/2%; 4,000 Novelty, 4 1/2%; 5,000 Monte Carlo, 3 1/2%; 30,000 Lardau-Goldsmith, 2 1/2%; 14,000 Home (Res.), 3 1/2%; 10,000 Gopher, 3 1/2%; 10,000 Fuller, 3 1/2%; 20,000 Eureka Consolidated, (Res.), 3 1/2%; 4,000 Dundee, 3 1/2%; 25,000 Bean Pot, 2 1/2%; 4,500 Abe Lincoln, 4 1/2%; 5,000 Iron Colt, 9 1/2%; 10,000 Jumbo, offer; etc., etc.

BALL GAME OF SUNDAY.

Large Crowd Witness the First Ball Game of the Season. The first baseball game and the only one of the season, was played on Sunday afternoon at the grounds near the Black Bear mine. Fully 700 people were present, composed of every section of Rossland society, the grand stand and the bleachers being packed, and the grounds encircled by a human ring. The Roseland Independent band, discoursed music at intervals but the heat and dust acted as a sort of damper to the proceedings. The usual amount of wrangling took place, especially at the commencement, but towards the end the most amicable relations existed between the players who treated the game as a huge joke. Con. Whalen for Roseland and Partridge for Nelson acted as the coaches and were a source of unfailing amusement. Roseland batted first and immediately began to score, and forged ahead, the final result being 20 to 9 in favor of the team from this city. As the game was a financial success and proved a source of amusement to Americans and wonder to the old country people present, the committee must be congratulated on their attempt to please the public.

Injured During the Races.

During the races Tuesday Charles Dempster was knocked down by one of the race horses, and his back was severely bruised. He was taken to the Ochrida bath house, and a physician was summoned. His hurts while painful are not believed to be serious.

TORONTO TESTIMONY.

Cattaraugus' Victim for Years—An Unsolicited Story of a Wonderful Cure by Dr. Agnew's Cattaraugus Powder. "I am so well pleased with Dr. Agnew's Cattaraugus Powder and the good results derived from it that I hardly know how to express myself. For years I have been troubled with catarrh in the head, but I tried different remedies but found no relief until I began to use Dr. Agnew's. Words cannot express my gratitude for the good it has done me. I highly recommend it. Mrs. M. Greenwood, 20 Adelaide street, West, Toronto. Sold by Godeve Bros.

Almost a Fire.

An explosion of a gasoline stove Tuesday in the Sparta fire stand burned Frank Albo, one of the proprietors, so seriously that he had to be taken to the Sisters' hospital. The blazing liquid set fire to the woodwork of the place, and it looked for a while as if the whole building would go. Had the fire gained a little more headway, it is impossible to tell how far it would have gone before it was extinguished. The occupants of the building, however, managed to put out the blaze before any serious damage had been done. The fire department was called, but by the time it reached the spot the blaze was under control.

Sold For \$1,500.

Lots 20 and 21 in block 11, on Columbia avenue, were yesterday sold by the Reddin-Jackson company to Thomas & Smith, the hay and grain merchants. The price was \$1,500. The lots are located on Columbia avenue beyond the bluff, and the intention is to carry on a hay and feed business on the property.

Parliament Buildings Inquiry.

VICTORIA, Sept. 20.—The royal commission appointed to inquire into the parliament building contract made to the legal representatives of the late Fred Adams and of Richard Drake, met today. Chief Justice McCall being the commissioner. A. L. Byles, who stated that he appeared for the crown, asked an adjournment until Monday in order that he might further inquire into the details. Dr. George H. Dunton left today for Dawson City where he proposes to practice his profession.

The Yukon Military Force.

OTTAWA, Ont., Sept.—Louis Coste, chief engineer of the department of public works, returned from the Yukon today. He made an inspection of the Stikine route and has reported as to its practicability. The first detachment of the Yukon military force, he says, has reached Fort Reliance safely but a detachment is stranded on Hooplaqu river owing to the destruction of its boats. Owing to the lack of transportation facilities this may delay the progress of half of the force for a month.

IS GATHERING DATA

Hewitt Bostock, M. P., Talks of Matters Political.

IMPORTANT LEGISLATION

Most Prominent Will Be the Matter of Redistribution as the Liberals Wish to Reorganize the Representation on a Fairer Basis.

Hewitt Bostock, M. P. for Kootenay-Yale-Cariboo, is again in the city. Mr. Bostock has been in Trail for the past few days, gathering information concerning the local smelting industry, and especially as regards lead reduction, with a view to using the data thus obtained at the next session of parliament.

Mr. Bostock could not say positively when parliament would next assemble, but he anticipates that the session will be earlier than usual, probably commencing in January. Mr. Bostock was not prepared to say what would be the most important legislation introduced at the next session, but he expects that considerable attention will be paid to redistribution. He referred to a desire of the representation in the house of commons on a fairer basis than was provided under the present rule. He expects to consider Conservative legislation given out, and greater representation given to districts that have increased largely in population in recent years. In this connection he expects that the Kootenay-Yale-Cariboo district will receive favorable consideration. He indorses the Provincial contention that the Kootenays should be organized as a separate constituency, and this he will do his utmost to secure at the earliest possible moment. He said the approval of the Ottawa administration.

Speaking of the organizing of the Liberal party in British Columbia Mr. Bostock admitted that a move was on foot to thoroughly marshal the forces of the party for the next campaign, in Provincial as well as Dominion politics, but as to the details of the scheme he was not prepared to speak at present.

Asked if he would use his influence to secure an appropriation for a federal building for Kootenay, Mr. Bostock said to accommodate the postal, customs and inland revenue departments, Mr. Bostock replied with considerable enthusiasm that such was his intention. He said, however, that Rossland must not be overlooked as to the result of his efforts in this matter, as the demand on the government for similar appropriations was very great, and, of necessity, most of them had to be kept waiting.

HE WILL BE WELCOME.

Mayor Wallace invites Joseph Chamberlain to visit Rossland. When the old country tourist first sets his foot on the domain of Canada, he first proceeds decorously to the Chateau Frontenac in Quebec, and secures his quarters there. Then being safely ensconced in the famous hostelry, he forthwith makes inquiry as to the latest news from Rossland, and sends out for a time table showing how he may best get to the famous mining camp in the Kootenay country. That, at least, is the procedure adopted by most right thinking pilgrims in this country, and consequently there have been few potentates and personages who have visited Canada in the past year without spending some time in the Rossland camp.

And now comes the Right Honorable Joseph Chamberlain, secretary for the Dominion, and it is probable that he will spend some time in Rossland before returning to his homeland. He will have a hearty welcome if he comes. As a result of The Miner's suggestion that Mr. Chamberlain be invited to the city, Mayor Wallace last night telegraphed an invitation to Mr. Chamberlain. The message was as follows: Hon. JOSEPH CHAMBERLAIN, Ottawa. The citizens of Rossland, Canada's famous mining town, earnestly desire you to visit them. I, on their behalf, beg to extend to you a cordial invitation to do so, and hope you may find it convenient to honor us.

SEATING RINK.

A Company Formed to Build One of the Finest in the Province. Through the enterprise of A. Lorne Becher, the Rossland Skating and Curling Rink, limited, has been organized and it bids fair to become a success. The company is capitalized for \$13,000 in 520 shares of \$25 each. Shares will be allotted as follows: \$10 application, \$5 on allotment, \$5 in 30 days after allotment and \$5 in 60 days after allotment.

An option has been obtained on the east half of block 14 in railway addition. This gives a space of 172 x 200 feet, which is admirably suited for a rink, and is at the same time valuable property. The price of the lot is \$5,500, it is estimated that the cost of constructing and fitting it will be one of the largest and finest rinks in the province.

It is anticipated that the venture will be one considerable profit to the stockholders, as Rossland is rapidly becoming an important centre for liberal sports of all descriptions. The scheme is backed by Ross Thompson, and is, therefore, certain to be a success. The board of directors so far consists of Ross Thompson, T. Mayne, W. H. Goodve and George E. Pfunder. There is already a lively demand for shares in this company.

The Le Roi Case Appealed. The majority stockholders of the Le Roi have filed notice that they will appeal from the recent decision of Mr. Justice Irving dismissing the receiver W. A. Carlyle on the receivership of the mine. The appeal is made to the full bench of the Supreme court and will come up on October 5.

THE SHOOTING SEASON.

It Opened on September 1—Some Provisions of the Law.

The shooting season opened on September 1st and already some of the local mimrods have been out and secured some game. The game act contains numerous prohibitions and those who go into the field should secure a copy and study it so that they may not break any of its provisions. Following are some of the chief provisions of the law:

Section 10 of the act states that it shall be unlawful to kill, catch, destroy, or pursue, or to buy, sell or expose for sale, show or advertise any of the game birds or animals during the close seasons and prohibited times of sale set out in schedule B.

The following is the synopsis of this schedule, in as concise a form as possible: The open seasons during which the undermentioned game may be killed, are, respectively, as follows, all dates inclusive: September 1 to December 14—Deer (buck or doe), mountain goat, mountain sheep (ram).

September 1 to December 31—Oribi, elk, wapiti (bull), muskox of all kinds; Spotted prairie chicken, hare, moose (bull).

September 1 to February 28—Bittern, duck of all kinds, heron, meadow lark, plover.

November 2 to March 31—Beaver, land otter, marten. It is unlawful to shoot or destroy at any time—Birds living on noxious insects; blackbirds (English); caribou, cow or calf; deer, fawn under 12 months of age; elk, wapiti, cow, or calf, or calf of age; gull; linnet; moose, cow or calf under 12 months of age; mountain sheep, ewe or lamb; English partridge; pheasant, cock or hen; quail, all kinds; skylark; thrush; eggs of protected birds; Robins may be shot by farmers only, in gardens between June 1 and September 1.

It is unlawful to buy, sell, or expose for sale, show, or advertise, any of the above mentioned animals or birds, at any time except animals or birds, at above mentioned animals or birds, after November 30th; deer (buck), after August 31st; duck, during close season, blue grouse, during open season; hare, after September 30th; heron, during close season; moose (bull); mountain goat; mountain sheep (ewe or lamb), after September 30th; plover, during close season. The above restrictions as to sale do not apply to beaver, land otter, and marten.

In addition to the above restrictions it is unlawful to kill or take in one season: More than five caribou; more than ten deer; or to hunt deer with dogs, or kill or hide alone; more than 250 ducks; more than two elk or wapiti; more than two moose; bulls; more than five mountain goats; more than three mountain rams.

THE ATHLETIC CLUB.

It is Growing and Will Flourish Much Amusement This Winter. The Athletic club promises to be a feature in Rossland during the winter months. The mess now being run there meets with universal praise, the wives and ladies friends of the members availing themselves freely of the privilege extended to them of joining in it. The charges are extremely moderate and the cuisine of the best.

The club has some 20 neatly furnished beds rooms, with both rooms, for the use of members and visitors, which they rent at from \$5 to \$12 per month. Most of them are now occupied. A second billiard room has been added to the building and the reading room will shortly be provided in the shape of chess, backgammon boards, dominoes, etc.

To follow the ball, which proved such a complete success, the entertainment committee are arranging a smoking concert for the end of the month. A billiard tournament commences on Saturday night, and Saturday and Wednesday nights have been appointed as whist nights, when the committee expect the card rooms to be well patronized. Every effort will be made to provide amusement for the winter evenings, and if the members display the same zeal and energy as in the past, the organization scheme should prove an unequalled success. The membership has increased already from 34 to 95. The club has made arrangements to rent a building in the rear of their premises, to be enlarged and converted into a gymnasium, the apparatus for which the club already possess.

The committee, however, is desirous of seeing the membership further increased before this work is taken in hand. With so much to attract, and so little to pay—the subscription being but \$1.50 per month—it is certain that it will not be long before they obtain all the members they require.

A Holiday for the Children.

On the occasion of the visit of Lord and Lady Aberdeen to the city of the school children sang for the pleasure of the visitors, and Lord Aberdeen requested in return for the pleasure they had given by their vocalization to both himself and Lady Aberdeen that a holiday be granted to the youngsters of the school. The directors have decided to give the children of the schools a holiday on Monday next in honor of the request made by the governor-general, and it will be called Lord Aberdeen's holiday. This will give the youngsters an opportunity to participate in the festivities of the occasion. The regular labor day was on the 5th of September, but the day celebrated by the workers of Rossland has been declared a holiday by proclamation of his worship, Mayor Wallace.

To Prevent Forest Fires.

Gold Commissioner Kirkup has called the attention of prospectors and hunters unto the necessity of extinguishing all bush fires which may be lighted by them. In past years immense damage has been done to the forests of the province by fires due to the negligence of prospectors, and it has been made a crime punishable heavily for failing to put out any fire that may be kindled in the hills.

A Bayonet Thrust is as a pin scratch to the tortures of indigestion and Dyspepsia. The bravest soldier will weaken before the onslaught of these redoubtable enemies to health. Dr. Von Stan's Pineapple Tablets break down the stronghold of disease, build up new life, new hope, new energy, hoist the banner of victory in the stead of the flag of distress. 35 cents. Sold by Goodve Bros.

INDIAN VISITORS.

Seven Aborigines Attract the Attention of the Rossland Population.

A party of seven Colville Indians, consisting of five squaws, a buck and a papoose, attracted considerable attention on Columbia avenue Saturday afternoon. They were mounted on cayuses and the feminine portion of the outfit did not use side saddles but they rode like centaurs. The aborigines explained that their home was at the Little Dalles and that they were engaged in picking huckleberries on the north side of Spokane mountain. They brought a number of gallons of these toothsome berries here with them and sold them to the grocers and invested the proceeds in sugar, tea, coffee, ham and, strange to relate, one of the squaws purchased 20 cents worth of soap. She explained that she wished to wash the baby with it. The faces of the Indians were smeared with the juice of the huckleberries which they had been picking. Quite a crowd gathered around and watched the aboriginal cavalcade as it departed for the huckle berry fields.

MR. CHAMBERLAIN'S VISIT

It Would Be the Greatest Possible Advertisement.

It Would Result in Directing Both Capital and Population Into Kootenay.

KAISER, Sept. 17.—EDITOR MINER:—Sir: Mayor McLean absent. Council thinks every effort should be made to induce Chamberlain to visit Kootenay. (Signed) E. E. CHAPMAN, City Clerk.

KAISER, Sept. 17.—EDITOR MINER:—Sir: No man in the world is more capable than Mr. Chamberlain of directing population and capital into Kootenay. Meeting of board of trade will be held here Monday to consider invitation. (Signed) G. O. BUCHANAN, President board of trade.

The above telegrams are the samples of the sort that are being received at this office, regarding the visit of Mr. Chamberlain to Rossland and the Kootenay country, who is now in Eastern Canada. No suggestion ever offered was ever so warmly received and with such widespread enthusiasm than has the matter of having Mr. Chamberlain visit the Kootenay country. Chamberlain visited the Kootenay country with the hearty and most cordial approval, but the citizens of Rossland are still in the process of the matter, as shown by the foregoing messages.

"It is a splendid idea and should be carried out by all means," said Mayor Wallace last evening. "I cannot imagine any means of doing it more valuable in attracting the attention of the whole world to Rossland and the Kootenays. Mr. Chamberlain is a business man, and he will visit this part of the country, for it would open up the eyes of the world to the great possibilities of this country. I am confident that the council will do all in its power to further the visit of Mr. Chamberlain."

"One cannot say too much in favor of Mr. Chamberlain's visit," said Mr. S. S. Goodve. "His presence here would be especially opportune. Were he to see for himself the reasons of this country, he might with certainty expect that he would use his powerful influence to divert hither, under the auspices of the Rossland and Kootenay, the stream of population and capital which is now going into the South African fields. Mr. Chamberlain is a man of the world, and he will grasp in a single day the visit the great fact that this country is one of the greatest gold producing countries in the world."

"No one has more weight or influence in the old country than Mr. Chamberlain," said Mr. S. S. Goodve. "His opinion as to the worth of the camp would be of more weight than that of the average man, and he would know that would the views of anyone else I can imagine. We are perfectly safe in saying that Chamberlain will grasp in a single day the visit the great fact that this country is one of the greatest gold producing countries in the world."

"The visit of Mr. Chamberlain, in common with a good many others, may have a very far-reaching effect on the Rossland and Kootenay mining towns," said Alderman J. S. Cate, Jr. "He may have an idea that a visit to Rossland and the Kootenay is a very much more than a mere visit, and that he will be very much interested in the case, if he can be much easier to get him to visit the city. He will be very much interested in the case, if he can be much easier to get him to visit the city. He will be very much interested in the case, if he can be much easier to get him to visit the city."

THE RIO GRANDE.

A Find Recently Made of High Grade Ore.

T. A. Helm, superintendent of the Rio Grande Mining company, is in the city from the Ymir section, where the property of the company is located. Mr. Helm reports that a new vein of ore was recently found on the Rio Grande which is regarded as important. It consists of a five foot quartz vein, 20 inches of which is high grade ore. The vein carries silver, gold, and arsenical silver and gray copper. Half of the value of \$60 is in gold. The company intends to push work on this line and hopes to begin shipping to the smelter from this new find. There is a tunnel in another part of the property which is in for a distance of 110 feet, but which has uncovered an excellent body of ore, that averages 30.50 to the ton. The property is one and one-third miles from the tracks of the Nelson & Fort Sheppard railway and three miles from Ymir on Porcupine creek. The promoter's stock is 100,000 shares. Shares of \$10,000 were put in the treasury and of this quantity 225,000 are still there. The conveniences for shipping from the Rio Grande are excellent and it is certain that the property has a future before it. The shares are nearly all held by local people.

GATHERING MATERIAL.

Mrs. Coleman-Stuckert Intends to Deliver Lectures in Canada. Stopping at the Allan house is Mrs. Coleman-Stuckert, traveler, lecturer, and author. Mrs. Coleman-Stuckert is visiting the whole of the Dominion with the view of getting material for a series of lectures, which she expects to deliver next winter throughout Great Britain. She will probably be here several days, and from Rossland will go on to the coast. Her return to the old country will be undertaken about the first of the year. Mrs. Coleman-Stuckert is traveling in a way under the auspices of the Canadian Pacific railway, and the officials of the line all over the country are assisting her in gaining the material she desires.

Mrs. Coleman-Stuckert is an Ontario woman, by birth, and was raised in Lindsay, but much of her life has been spent in the states and in England. She has given no little attention to the making up of new life, new hope, new energy, and during the last year she has lectured for several weeks on the subject of co-operative housekeeping.

OUR LONDON CABLE

Black Thunder Clouds are Hanging Over Europe.

THE CANDIA MASSACRE

Powers are Willing to Let Great Britain Attend to Punishing the Turks For Killing Her Subjects—The Trouble With France.

LONDON, Sept. 17.—Three or four black thunder clouds are overhanging the political horizon of Europe. The diplomatic atmosphere is anxiously waiting to see whether it will pass away or burst. The Dreyfus, Cretan and Egyptian questions have become more acute and it is difficult at present to forecast the outcome of either case. An indication of the activity in the official world is found in the fact that the Marquis of Salisbury went on a quiet holiday to take the waters of Centreville, had a special telegraph office established at his hotel during the week in order to deal with the mass of official telegrams pouring in and out. It is understood that the British press has ordered that the most vigorous measures be taken with a view to punishing the British troops who have been constantly fired upon by the Turks, the execution of which Great Britain's soldiers who now number 2,000 while another battalion is on its way to Candia from Will Give Great Britain a Free Hand.

The most recent advice tend to show that the powers are disposed to give Great Britain a free hand to obtain reparation for the massacre of Christians and the insults to British arms. Admiral Noel, the British naval commander in Crete, has reported to the British government the immediate withdrawal of military contingents. The British government has ordered that the most vigorous measures be taken with a view to punishing the British troops who have been constantly fired upon by the Turks, the execution of which Great Britain's soldiers who now number 2,000 while another battalion is on its way to Candia from Will Give Great Britain a Free Hand.

The Situation is Critical.

In the meantime the situation at Candia is critical. Thousands of the most notorious Bashi Bazuks have now left the town and fortified themselves just inside the military cordon, while outside the cordon the Christians are in a state of panic. They are like cats watching their prey, eager to spring forward if the Bashi-Bazuks are driven from the town. The chances of a bloody fighting hinges upon the Turkish government's reply to the British ultimatum. The British government has notified by Admiral Noel that the British government is determined to enforce the disarmament of the Bashi-Bazuks, whether it be by force or not.

The African Trouble.

The absence of news from Fashoda the important place about 400 miles from Khartoum, which is reported to have been occupied by a French force, has put the British into a state of anxiety. General Sir Herbert Kitchener, and have cheerfully assumed that the British and Egyptian forces are in a state of readiness to meet any emergency. The French commander in the Sudan, Major Marchand, has been reported to have taken a most compromising attitude in regard to Fashoda. They are daily issuing warnings to the British to withdraw their forces, and there is no doubt the Marquis of Salisbury will have the nation in a state of anxiety. The French commander in the Sudan, Major Marchand, has been reported to have taken a most compromising attitude in regard to Fashoda. They are daily issuing warnings to the British to withdraw their forces, and there is no doubt the Marquis of Salisbury will have the nation in a state of anxiety.

What French Papers Say.

The French newspapers, which first took the matter up quietly, and are now in a state of excitement, and they declare that if Major Marchand is really at Fashoda, he will stay there until the British are withdrawn. The Egyptian sphere is now in a state of excitement, and they declare that if Major Marchand is really at Fashoda, he will stay there until the British are withdrawn. The Egyptian sphere is now in a state of excitement, and they declare that if Major Marchand is really at Fashoda, he will stay there until the British are withdrawn.

Kirk May Be Surveyor-General.

J. A. Kirk, P. L. S., will very probably be the next surveyor-general of the province to succeed Tom Kaine, who has been appointed by the Dominion government. Mr. Kirk is one of the best surveyors in the province, and his friends are very hopeful that his appointment will be shortly gazetted.

Spokane Falls & Northern

Nelson & Fort Sheppard R'y RED MOUNTAIN RAILWAY

The Only Direct Route to Nelson, Kaslo, Kootenay Lake and Slocan Points.

Every day in the year between SPOKANE, ROSSLAND AND NELSON.

C. G. DIXON, G. P. T. A., Spokane, Wash. R. W. KUPF, Agent, Rossland, B. C.

J. M. MILLER, President and Treasurer. GEO. N. TAYLOR, Vice-President. M. F. CHESNUT, Secretary. CLOUGH'S CODE USED.

The Old Gold Quartz and Placer Mining Co. LIMITED.

Capitalization 1,500,000 Shares, Fully Paid and Non-Assessable. 500,000 Treasury Shares. Par Value \$1 Each.

A Grass-Roots Proposition. One Hundred Dollar Ore on the Surface.

The officers of the Old Gold Quartz & Placer Mining company take pleasure in announcing to the public that they have completed the purchase of the famous Silver King and Silver Queen properties of the Lardeau-Duncan country, and that the same have been amalgamated with the already promising properties of the Old Gold company. The Silver King and Silver Queen have two well defined and highly mineralized ledges running through the entire properties, each being over five feet in width. A number of assays have been made from the property, every one of which shows over \$100 in value and one reaches the magnificent sum of \$135.75. Average taken assays across the entire ledge give values of 102-37.

They are located only about one mile from the rich Gainer creek gold properties, are within three-fourths of a mile of rich placer grounds, are nestled among such well-known mines as the Bad Shot, Silver Cup, Wagner and Bannock Burn groups. The Old Gold properties now consist of eight claims, (comprising about 400 acres of mineral lands) six of which are on the North Fork of the Salmon river, one of the most promising gold producing districts in British Columbia.

The last assays taken from the quartz ledges on this group give the satisfactory results of over \$20 per ton. NOTE THE FOLLOWING FACTS: 1. A large area of rich mineral lands. 2. Low capitalization. 3. Shipping ore from the surface. 4. Water and timber in abundance. 5. No salaries to any officer until the property becomes Dividend paying. 6. A large, economical and honest management. 7. The company is out of debt, has a careful fund both in treasury and unsold treasury stock, and is working its properties.

The above are some of the reasons why an investment in the shares of the Old Gold Quartz & Placer Mining company at present prices is the most profitable that can be made in British Columbia. Only a limited number of shares will be placed on the market at 10 cents. An advance in price will soon be made.

(Editorial continued from Page 4.)

MR. CHAMBERLAIN IN ROSSLAND.

Mr. Chamberlain, at 63, might have been pardoned had he considered his position in British politics secure without making such a tour of exploration as Mr. Curzon at 27 thought it desirable to make.

The Nelson Miner on Thursday, September 15, publishes an interview with C. A. Gregg of Victoria, who is reported to be in Kootenay on a mission connected with the organization of the Liberal party in British Columbia.

UNIVERSAL PEACE.

It begins to look as if the powers intended to ignore the peace plans of the Czar. The proposal coming as it did from the most autocratic ruler in Europe seemed as strange as seeing a lily growing on a dunghill, and is a verification of the saying that out of things foul and unnatural good sometimes comes.

events, ensue a smashup of some kind or another. For that reason, if for no other, the powers should give heed to the Czar's appeal and at least agree not to increase their already burdensome armies and navies, even if they refused to entirely disarm themselves.

THE MINER IS RIGHT.

The Nelson Miner on Thursday, September 15, publishes an interview with C. A. Gregg of Victoria, who is reported to be in Kootenay on a mission connected with the organization of the Liberal party in British Columbia.

COMPANY FLOTATIONS.

The diorite formation in this camp is exceedingly hard, the surface is more or less broken and depth must be reached in order to secure permanency of ore bodies, and ore that carries paying values.

LABOR DAY.

Tomorrow the Labor Day festivities will begin and for two days they will last, and there will be 48 hours of unalloyed joy for the sons of toil of this camp.

THE SURVEYOR-GENERALSHIP.

There is a well defined rumor that J. A. Kirk, P. L. S., and one of the best known civil engineers in British Columbia, is slated for the position of Provincial surveyor-general.

he be appointed to that office, it is certain that he will do his duty to the complete satisfaction of the public. Rossland has a claim on this office.

GREATER BRITAIN EXHIBITION.

William Thompson, a mining engineer appointed by the London Chamber of Mines to secure a collection of British Columbia mineral specimens for the Greater Britain to be held at Earl's Court, London, next year, has, according to the Victoria Colonist, interviewed the Provincial government in the hope that an appropriation would be made to defray the expense of making the exhibit.

The Dominion government has expressed a desire to take space in the Great Britain exhibition, and all the other colonies are so impressed with the importance of the benefits to be derived from a display of their resources in London next summer, that they are preparing magnificent displays.

LABOR DAY.

Tomorrow the Labor Day festivities will begin and for two days they will last, and there will be 48 hours of unalloyed joy for the sons of toil of this camp.

LABOR DAY.

Tomorrow the Labor Day festivities will begin and for two days they will last, and there will be 48 hours of unalloyed joy for the sons of toil of this camp.

Sentiment plays an important part in human affairs and people are ruled by it more than they think. A late evidence of this is shown in the action of the school board in giving the pupils of the public schools a holiday on Monday next.

Charles Bahmmer, sold agent for the Kimberly townsite, is in the city. Mr. Bahmmer is an surprising real estate broker. He has great faith in the town of Kimberly and is determined to build it up to a place of importance.

Beau Gowen of Quebec, a nephew of the Hon. Sir Henry G. Joly de Lotbiniere, is in town for a few days. Mr. Gowen is associated with literary concerns of Toronto, and is here for the purpose of interviewing some of the leading citizens in the interest of "Canada, an Encyclopedia of the Country."

Beau Gowen of Quebec, a nephew of the Hon. Sir Henry G. Joly de Lotbiniere, is in town for a few days. Mr. Gowen is associated with literary concerns of Toronto, and is here for the purpose of interviewing some of the leading citizens in the interest of "Canada, an Encyclopedia of the Country."

are no regrets in the minds of the celebrants over what happened the preceding day. There are no broken heads, no wounded in the hospital nor dead men to bury, nor any of the aftermath of violence or resistance of the law.

This is as it should be. Our labor day will come and go and it will be remembered with pleasure by the laborer and those by whom he is employed, and this is so because each is honestly endeavoring to do justice to the other.

EDITORIAL NOTES.

Says the New York World: No victory of Kitchener's Sudan expedition over the Dervishes should surprise us, but what the people would like to know is how Kitchener managed to keep 10,000 white men marching and fighting along the Nile up to equatorial Africa in midsummer and to keep them in good condition.

The new conception of Canada is a country producing not only grains and fruits and forest products, but mineral wealth of almost every kind and in great abundance. The new national policy does not mean the exclusion of foreign manufactures so much as the intelligent use of the natural resources of Canada.

The Midway Advance makes a righteous protest against the failure of the Provincial government to appoint a government agent for the Osoyoos-Kettle River district. At the last session of the legislature provision was made for the creation of a separate government agency for the southern portion of the Yale district.

The following places in the Kootenays will be utilized for polling votes on the prohibition plebiscite, which will be held on September 29:

The Cubans, as will be seen by the dispatches today, are showing signs of ingratitude toward the Americans, who lifted the heel of the Spanish oppressors from off their necks. They seem to resent very much the fact that the Americans are ruling the territory which they won by force of arms.

It is Uncertain Whether It Will Locate a Branch Here. D. R. Wilkie, the general manager of the Imperial Bank of Canada, and A. R. B. Hearn, manager of the Revelstoke branch, who were in the city for a day, left Friday night for the north country.

Mr. Wilkie is here to consider the advisability of starting a branch in the city. Mr. Wilkie only laughed when questioned regarding the matter.

A Plant for the Jumbo. O'Brien Reddin & Co., received a telephone message yesterday from M. R. Galusha, the manager of the Jumbo, at Spokane, announcing that at a meeting of the directors of the Jumbo company held yesterday it was decided to commence work at once on the No. 3 shaft at the mine.

Beau Gowen of Quebec, a nephew of the Hon. Sir Henry G. Joly de Lotbiniere, is in town for a few days. Mr. Gowen is associated with literary concerns of Toronto, and is here for the purpose of interviewing some of the leading citizens in the interest of "Canada, an Encyclopedia of the Country."

THE SUPREME COURT.

The appointment of Archer Martin as puisne judge of the supreme court of British Columbia in the place of Mr. Justice McColl, who was recently made chief justice, leaves no vacancy in the supreme court, but it still remains for the Dominion government to provide for the urgent need for a resident judge of the supreme court in Kootenay.

ROSSLAND'S ORE SHIPMENTS.

The Miner predicted last week that the total ore shipments of Rossland for the seven days ending last Saturday would amount to more than 4,000 tons. This estimate is borne out as correct by the record that now appears at the head of this column.

PLEBISCITE VOTING PLACES.

The following places in the Kootenays will be utilized for polling votes on the prohibition plebiscite, which will be held on September 29:

Revelstoke: Revelstoke, Cowan block, D'Arcy street, C. F. R. station; Albert Canyon, C. F. R. station; Waverley Mines, Forest's store; New Denver, Answorth, government building; Kinlo, Kyle's house; Pilot Bay, Warrington's house; Brooklyn, court house; Johnson's office; F. A. Wilkin, acting agent for the British Columbia Corporation, 151-164, A. Street; and further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements.

IMPERIAL BANK.

It is Uncertain Whether It Will Locate a Branch Here. D. R. Wilkie, the general manager of the Imperial Bank of Canada, and A. R. B. Hearn, manager of the Revelstoke branch, who were in the city for a day, left Friday night for the north country.

A Plant for the Jumbo. O'Brien Reddin & Co., received a telephone message yesterday from M. R. Galusha, the manager of the Jumbo, at Spokane, announcing that at a meeting of the directors of the Jumbo company held yesterday it was decided to commence work at once on the No. 3 shaft at the mine.

Silver Bell Mining Company, Ltd.

A special general meeting of the shareholders of the Silver Bell Mining Company, Limited, will be held at the office of the company, Rossland, B. C., on Friday the twenty-third day of September, A. D. 1898, at four o'clock in the afternoon, for the purpose of electing officers and to consider the following propositions:

Rossland Homestake Gold Mining Co., Limited Liability.

Shareholders in this company are hereby notified that under the agreement duly sanctioned and executed for the transfer of the undertaking to the Homestake Mines, Limited, they must claim their allotment of shares and pay an assessment of two cents per share in the new company within 30 days from this date.

R. E. Lee Gold Mining Company, Limited Liability.

Shareholders of this company are hereby notified that under the agreement duly sanctioned and executed for the transfer of the undertaking to the R. E. Lee Gold Mines, Limited, they must claim their allotment of shares and pay an assessment of one cent per share in the new company within 30 days from this date.

The Virginia Gold Mining Company.

All shareholders of this company are hereby required to send in their stock certificates to the secretary at Rossland, B. C., within 21 days from this date, to obtain certificates of the Virginia Mining Company, Limited (non personal liability) in exchange.

Certificate of Improvements.

Bannock, Red Top and Ethel mineral claims situate in the Trail Creek Mining division of West Kootenay district. Where located: About five miles east of the Columbia river on the north-west fork of Bear creek.

Certificate of Improvements.

No. 1 Le Blanc group, No. 2 Le Blanc group, No. 3 Le Blanc group, Drill and Northern Light mineral claims, situate in the Trail Creek Mining division of West Kootenay district. Where located: About six miles east of the Columbia river on the divide between Champion and Bear creeks.

Certificate of Improvements.

East Columbia Mountain, Fraction, Banner Hill Fraction and North Columbia Fraction mineral claims, situate in the Trail Creek Mining division of West Kootenay District. Where located: On Columbia mountain, about 1 1/2 miles northeast from Rossland.

Certificate of Improvements.

Tootie mineral claim, situate in the Trail Creek Mining Division of West Kootenay district. Where located: On Sophie mountain, adjoining the Velvet mineral claim. Lot 3, 324 G1.

Certificate of Improvements.

Whooop-up mineral claim, situate in the Trail Creek Mining Division of West Kootenay district. Where located: On Sophie mountain, adjoining the Velvet mineral claim. Lot 3, 324 G1.

Certificate of Improvements.

Frankie H. and Fred F. mineral claims, situate in the Trail Creek Mining division of West Kootenay district. Where located: On the south slope of Columbia mountain.

Certificate of Improvements.

Concordia mineral claim, situate in the Trail Creek Mining division of West Kootenay district. Where located: Adjoining the Atlantic Cable, Dominion and Baroka mineral claims.

Certificate of Improvements.

Concordia mineral claim, situate in the Trail Creek Mining division of West Kootenay district. Where located: Adjoining the Atlantic Cable, Dominion and Baroka mineral claims.

A NOTABLE WEDDING

The Mackintosh-McGovern Marriage at Vancouver.

A GREAT SOCIETY EVENT

Many Distinguished Guests Were Present From All Over the Dominion—A List of the Presents and Those Who Gave Them.

VANCOUVER, Sept. 21.—The marriage of Harold Buchanan McGovern of Ottawa, and Miss Alice Maud Mackintosh, was celebrated today at Christ's church by Archdeacon Pentreath of Vancouver. The church was most elaborately decorated and thronged to overflowing. The bride was arrayed in rich ivory satin; handsomely embroidered with diamonds and pearls, gauffered and trimmed with orange blossoms, and a coronet of orange blossoms. The bridesmaids were Misses Isabella Hazel, Violet and Gladys Mackintosh, sisters of the bride. They were dressed in white, with Valenciennes insertions of white satin and straw trimmed with net, opseys, and maline carnations. They carried charming bouquets of roses and white heather. The group of beauty and color excited general admiration as it moved forward to the chancel rail, while the organ pealed forth its glorious and hope-inspiring strains. The wedding was the greatest social event in the history of the province. A reception was held by the bride and groom at the home of Governor Mackintosh and the reception rooms and the parlors were crowded with beauty and fashion, as well as with distinguished men from all over Canada.

Sir Charles Hibbert Tupper, in felicitous language, proposed the toast of the bride and bridegroom, and a scene of intense enthusiasm ensued when the assembly through him honored the bride in a universal favorite, and the groom looked the picture of a man capable of achieving a great career. The Earl of Ava proposed the toast of "The Bridesmaids," and did it in a style that recalled the elegant genius of his illustrious father. This was responded to by A. R. Machin of Victoria, and then the guests toasted Mrs. Mackintosh and the governor himself.

Governor Mackintosh's speech in reply was in his happiest vein. It was full of delightful allusions to the bride and her mother and to the brilliant young man who had just been added to the family. In the afternoon the bride and groom, with their attendants, and all Vancouver seemed to turn out to bid them bon voyage. The bride's traveling dress was lawn cloth, with a vest of turquoise blue satin and lace, and a black velvet hat trimmed with pale blue.

The wedding presents were magnificent and multitudinous. They were so numerous and elaborate that it looked as if Canada, England and the United States had united to show the newly married couple the love and friendship in which the people of two continents hold the parents of the bride. Telegraphic congratulations were received by Governor Mackintosh addressed to the bride and bridegroom from all over Canada, and the governor seemed to be more pleased with those sent from Rossland and from the British America corporation officials and employees, than with those from the United States and Europe. The very first for the sun burst forth in fullest splendor after a week's downpour and gloomy weather.

Following is a partial list of the wedding presents received by the bride: Mr. and Mrs. J. W. Morrison, silver dessert tongs and forks; Mr. and Mrs. F. W. Avery, Ottawa, double set of silver handled carvers; Sir C. H. Tupper, mounted purse; Miss E. White, silver candle sticks; Miss E. White, silver mounted purse; Charlie Dean and Archie Fleming, silver salt cellars; Mr. and Mrs. S. H. Fleming, cabinet of silver; Bishop of Ottawa and Mrs. Hamilton, card tray; Mr. and Mrs. Hogg, coffee spoons; the Misses Ritchie, silver bon bon dishes; Miss A. Ritchie, silver paper knife; Mr. and Mrs. Irwin, coffee spoons; Mr. and Mrs. Castellane, silver entree dishes; Mr. Hautain and Mr. Dodd, silver spoons; Mr. and Mrs. E. L. Newcomb, bon bon dishes; J. A. Ritchie, silver salt cellars; Mr. and Mrs. Gilpin Brown, silver sugar sifter; J. F. Smallie, silver pepper pots; George Whitmore, shoe horn; Mr. and Mrs. Raymond Koopce, silver spoons; Mr. and Mrs. Miss McCee, silver pickle fork; Mr. Grubbe, silver shoe horn and button book; Newbold Ething, silver fruit dish; J. S. C. Fraser, silver soup tureen and ladle; John Wolfsohn, ebony clock; G. H. Levy, clock; Mr. and Mrs. Tierney, silver berry spoon; Mr. and Mrs. Williams, hand painted biscuit jar; Mr. and Mrs. W. Nichol, silver berry spoon; Mr. and Mrs. J. O. McLagan, silver bread fork; Mr. and Mrs. Miss Susan Cambie, Miss Sadie Cambie, silver cut glass mullage pot; Mr. and Mrs. C. B. MacNeill, silver coffee spoons; Mr. and Mrs. J. B. Bohn, cut glass water jug; C. S. Brands and J. Poff, Japanese jars;

bridemaids, sealskin coat; bridegroom, traveling bag and diamond and ruby ring; E. Mackintosh, nugget pin; Mrs. S. H. Fleming, turquoise and pearl bracelet; Mr. and Mrs. Thos. Dunn, hand painted bowl; H. C. Bellinger and James Breen, gold brick from Le Roi smelter; Mr. and Mrs. Senkler, silver bowl; Mr. and Mrs. Hindetower, silver fruit dish, spoon and fork; Alex. Gartschow, glass celery bowl; Mr. and Mrs. G. McL. Brown and Miss Crener, chafing dish; Mr. and Mrs. Whit Fraser, two photograph frames; Mr. B. de Veber, silver bon bon dish; Mrs. O. C. Bennett, coffee spoons; Mr. and Mrs. E. B. Skinner, china flower boat; E. Rintoul, silver bon bon dish and tongs; L. G. McPhillips, C. B. Abcream jug; Mr. and Mrs. H. B. Hal, silver smelling salts; D. C. Campbell, pearl horseshoe pin; Dr. Fleming, mustard pot; F. G. Crickmay, writing set; Mr. and Mrs. Denny Mc Kay, silver cake knife; Major and Mrs. Johnson, silver salt cellars; Mr. and Mrs. Sweeney, silver cream jug; Alex. Dick, cabinet of silver; Dr. and Mrs. McKenzie, fruit knives; Mr. and Mrs. A. Martin, silver photo frame; Mr. and Mrs. J. H. Gemmill, silver spoon; Mrs. Sherwood, Japanese vase; Mrs. Moncrief, Japanese jar; C. B. Wornop, bon bon dish; Mr. and Mrs. W. E. Thompson, cut glass bowl; Alex. Mar-tin, set of glass knives; Dr. Lefevre, silver cream jug and sugar bowl. Also a number of valuable presents from Ottawa and Hamilton friends, of which Miss Mackintosh is unable to give a list.

FRANCE IS NOT AFTER FASHODA

Major Marchand Is There His Object Is Purely Geographical. LONDON, Sept. 21.—It is reported in government circles that news has been received that the Egyptian flag is flying over Fashoda. The fact, however, has not been officially announced. A dispatch to the Daily Graphic from Paris says that Sir F. J. Manson, the British ambassador in the course of an interview with M. Delcasse, minister of foreign affairs, casually referred to the reports that Major Marchand at the head of a French expedition was at Fashoda on the Nile. M. Delcasse assured the ambassador in the most friendly manner that the government was absolutely ignorant of Major Marchand's whereabouts. He added that if the expedition was in the neighborhood of the Nile, it was in the neighborhood of the Nile, it was not regarded this as an official communication on behalf of the government.

The correspondent recalled that M. Delcasse was minister of the colonies when the Marchand expedition was equipped, and that he made a motion in the chamber of deputies that the sum of \$400,000 be appropriated for the expense of the expedition. It is consequently presumed that he is aware of the object of the expedition. The Paris press generally holds the view that the settlement of the question of the occupation of Fashoda ought to be brought about through diplomacy and not by force of arms. LeClair says it is in position to fully confirm the falsity of the report that Major Marchand had been recalled. LeMatin, however, believes that the British received timely information of the occupation of Fashoda through secret sources. The paper does not believe that any trouble will grow out of the Fashoda affair, but feels certain that an amicable agreement will be reached.

At the cabinet council yesterday, M. Delcasse, minister of foreign affairs, explained the foreign situation and communicated to the council full information in regard to the mission of Major Marchand in Africa. The Depache Coloniale, which is a strong national newspaper, comments on the Fashoda matter as a practical utility to France and it is ridiculous to suppose that holding it would lead to a settlement of the Egyptian question. The paper appeals to the press to abandon school boy tricks, which it says consists of decrying their neighbors when they think them too strong to be attacked with safety. It feels sure that M. Delcasse, the foreign minister has a higher conception of what ought to be the foreign policy of a great country.

MUSULMANS ARE OBSTINATE

Holding Back the Bulk of Their Military Supplies. CANDIA, Crete, Sept. 31.—About 1,600 firearms have thus far been surrendered by the Mussulmans in response to the demand of the British admiral. The most credible reports place the number of rifles in possession of the Mussulmans at about 25,000, which is exclusive of 5,000 Martini, which are the property of one Turkish regiment. Much difficulty in compelling the surrender of all those arms is expected. Sir A. Biliotti, the British consul, has visited the Christian chiefs and informed them that Great Britain had undertaken the protection of the disarmed Moslems. He warned the chiefs that any attack on the Moslems would be regarded as an attack on the British. The chiefs promised to abstain from attacking the Moslems.

ENGLISHMEN LEAD AT CRICKET

Have an Overwhelming Lead Over the New York Club. NEW YORK, Sept. 21.—Captain P. F. Warner's team of English cricketers began a two days match against the representative eleven of New York players on the grounds of the Staten Island cricket club, at Livingston, S. I., today. At the end of the day's play, the English were leading by an overwhelming lead. When stumps were drawn at half past five o'clock this evening the English had made 410 runs for the loss of nine wickets and the local players had only made 49 in their first inning. The game will be resumed at 11 o'clock tomorrow morning.

Martin A. Schweig, one of the tailors of the city, and Miss Alice Coleman were married Monday evening at the home of the bride's father on North Washington street. Rev. George H. Morden performed the ceremony.

WILLIAM I. REDDIN

C. O'BRIEN REDDIN & CO.

Miners and Brokers, ...

ROSSLAND, B. C.

PARTIALLY DEVELOPED MINES FOR SALE. CONFIDENTIAL REPORTS ON MINES.

Rossland, B. C., Sept. 22.

Dear Sir: The feature of the week was the flurry in Jumbo, Giant and Novelty. On Saturday over 70,000 shares of Jumbo changed hands at from 30 to 32 cents. On Monday almost 15,000 shares sold at from 44 cents to 47 cents. The price then advanced to 61 cents and remains at this figure at this writing. The management is very reticent as to the nature of the strike in No. 2 tunnel, but it is said that there is 20 feet of \$20 ore with a two foot streak of tellurides, showing free gold. The stock was all sold to Rossland men, a significant fact. At 61 cents Jumbo is a good buy, as the company is only capitalized for \$500,000, and the property is sufficiently developed to prove it to be a valuable mine. Work started yesterday on No. 3 tunnel, which cut the three ledges at a depth of 400 feet.

Giant--All the cheap stock in Eastern Canada and in Spokane and Rossland was picked up Monday and Tuesday for Rossland buyers. Some 40,000 was taken out of Toronto at from 6 1-2c. to 7 1-4c. The mine looks well, and it is understood, the company will hold the balance of its treasury, 350,000 shares, at 25c. a share.

Novelty--This stock has sold freely during the week. Since Monday we sold 85,000 shares treasury at 5c.

In the South Belt, Gopher, R. E. Lee and Homestake are the favorites among the cheaper stocks, and Deer Park is firm at 20 1-2c.

A solid body of ore seven feet wide has been encountered on the Good Hope, but the values continue low. At three cents this stock should be a good buy.

Our tip is to buy the following stocks at prices named: Deer Park, 20 1-2c; Giant, 7 1-2c; Novelty, 5c; Gopher, 5c; Homestake, 4 1-2c; R. E. Lee, 4c. We can supply any stocks sold in this market, but above are our favorites.

Sincerely Yours, EDDIN & CO.

We are cash buyers of good stocks. Write or wire us.

WANT TO INVEST

Eastern Canadians Seek Rossland Securities.

OFFER FUNDS IN PLENTY

Investors of Montreal and Toronto Are Intimately Acquainted With the Conditions Here—Are Willing to Expend Time and Money.

F. J. Walker has returned after an absence of 25 days in Eastern Canada. While he was away he visited Toronto, Montreal and other leading points in Ontario. In speaking of his trip Tuesday he said that the people of Eastern Canada have developed a very great interest in Kootenay and particularly in the Rossland division. He reports that he found in interviews he had with different people that the residents there are fast becoming identified with and keep in close touch with the mining that is in progress here. They realize that there are splendid chances for making investments here. This being the situation there is any amount of capital ready for investment in meritorious mining ventures. Some of the people there have been accumulating for generations and they seem to think that mining investments promise better returns than any other thing they can put their money into. The residents there seem to possess accurate knowledge of the situation here, and Mr. Walker says he was surprised at the information which they were provided with regarding the mines of this camp. Canadian manufacturers greatly believe in carrying on of their respective industries and it is because they believe, judging from all previous acts of your public life, from all previous acts of your public life, that you are thoroughly in accord with them in this belief, that they so confidently confide in you this delicate and important task.

MANUFACTURING INTERESTS

Want Representation Before the Commission at Quebec. QUEBEC, Que., Sept. 21.—Clarke Wallace, M.P., is here on a non-political and non-partisan mission to the premier and his members of the British commission. The former minister of customs has a letter from J. J. Cassidy, secretary of the Manufacturers' Association of Canada, in the fact that the international convention is endeavoring to arrive at a modus by which some measure of protection between Canada and the United States and desiring the British commissioners that they be duly advised regarding the enormous manufacturing industries of this country, it is desired by our association that you send in your communication with Laurier, the premier of Canada, and other British commissioners, and remain there as long as you deem it in the interest of Canada to do so.

"I am instructed to say, in asking you to consider the Canadian interests, that this association has every confidence in your knowledge, ability and discretion, and that it does not desire to restrict you in your liberty to accept the best judgment in your intercourse with the British commissioners, nor to interfere with your complete freedom as an independent member of the parliament of Canada. The members of the association of Canadian manufacturers greatly believe in carrying on of their respective industries and it is because they believe, judging from all previous acts of your public life, from all previous acts of your public life, that you are thoroughly in accord with them in this belief, that they so confidently confide in you this delicate and important task."

ROSSLAND

Stock Market

There was a good steady demand for stocks yesterday. Considerable Novelty and Gertrude changed hands. Iron Horse is firm at 16c to 17c and very little can be obtained at those figures.

Kennedy Bros. & Purgold

Stock Market

The past week once more breaks the record of the shipments of ore exceeding 4,000 tons, and this without the assistance of the Centre Star. The increase in shipments has had the effect of inspiring confidence in the intending investors, and the consequence has been heavy dealing in shares. Large blocks of Iron Horse, Tamarac, Fairmont, Giant and Novelty have changed hands, while there has been a good demand for Grand Prize, Commander, Dundee and Deer Park. We are placing a new prospect on the market this week, viz: the Monarch group, capitalized for \$1,000,000, with \$350,000 in the treasury for development. The Monarch is a copper proposition consisting of five full claims, and is situated about four miles from Hall Sidling, on the Nelson & Fort Sheppard railway. A shaft has been sunk 44 feet, and recent assays give 19 per cent copper, 6 ounces silver and \$2.20 in gold. We have called for tenders for the erection of necessary buildings and the sinking of a shaft to the 100-foot level. The first block of treasury stock is now on the market at 7 cents, and our clients should avail themselves of the opportunity offered. We have large samples of ore on exhibition at our office, taken from the Empress of India (which is a continuation of the Monarch ledge) running as high as 31 per cent in copper. The Monarch has every appearance of becoming "The Galmet and Hecla" of British Columbia.
