### AUDITORS' REPORT.

#### TO THE SHAREHOLDERS OF THE GREAT WESTERN RAILWAY OF CANADA.

We have examined the foregoing Accounts and find them stated in accordance with the books and vouchers.

The receipts on Capital Account during the half-year are almost entirely in respect of the 5 per cent. Preference Stock. The sum of  $\pounds 254,650$  being the first instalment of 25 per cent. on the issue of  $\pounds 1,018,200$ , includes the discount of 20 per cent., and commission paid to Brokers, amounting together to £54;201 178. 3d. which amount is deducted from the "Remission of Government Interest" as shewn in the Balance Sheet.

The expenditure on Capital Account during the half-year (less £124. 1s. 2d. received from the sale of surplus lands) amounts to £4,490 6s. 9d. the details of which appear in the reports of the Engineer and the Mechanical Superintendent.

On reference to the Revenue Account it will be observed that the ordinary work-Sing expenses during the past half-year amount to \$22,4506, 198. 1d. as against \$200,340. 6s. 4d. for the corresponding half-year, being an increase of 2 per cent. on the gross receipts of the respective periods. This increase does not arise under any particular head, but is spread over the various items of expenditure, and the Causes which have given rise to it, are explained in the respective reports of the Engineer and the Mechanical Superintendent, so far as relates to their departments; the present low freight-rates also materially affect the ratio of expenses to receipts.

the present low neight-rates also materially affect use rates of express to receive the The special reports to which we alluded in our last two half-yearly reports, have lately been received from the Engineer and Mechanical Superintendent, in which they have treated, very ably and elaborately, the subject of the condition and future renewals of the Permanent Way and Rolling Stock ; but as further communication with Canada, in elucidation of these reports is necessary before we can deal with them satisfactorily, we defer until next half-year making any observations upon

them. The increase in the "Coaching Transit Expenses" will be observed is due to the amount of compensation paid for damages arising from an accident to one of the Sleeping cars. The increase in "Merchandise Traffic Expenses" is caused by the rise in the wages of Conductors and Porters, and by the additional expenses attend-tion of the increased traffic of the Rine Line. ing the working of the increased traffic of the Blue Line. The General Charges for the half-year include £1,050 for extra remuneration to

some of the principal Officers of the Company, who assisted in carrying out the arrangement relating to the Government Loan.

The sum of £2,000 has been set aside this half-year, as in the corresponding period of last year, for the renewal of the Ferry Steamers. The balance now at the credit of that fund, with accrued interest, being £12,560.(13s. 10d.

The dividend for the half-year to 30th June last on the Detroit and Milwaukee Preference Shares hald by this Company has been credited to Revenue Account, less one-fourth theredy, which has been written off the Detroit and Milwaukee old Interest Account, reducing the balance at the debit of the latter to  $\pounds 0.944$ . 198. 3d. We think it right to mention that the dividend has not yet been received by this Company, as was the case last half-year, when a moiety of the amount was credited to Revenue, and the other moiety carried to the old Interest Account, but it is explained, that following the custom of American Railroads, the Acounts of the Detroit and Milwaukee are made up and adjusted annually, and not as in this country half-yearly.

The American funds on hand and receivable on account of Outstanding Traffic at the close of the half-year, unconverted, amounted to \$218,635,41, being only \$3,109,69 more than at the end of last half-year.

13th October, 1869.

JOHN YOUNG SIDNEY SMITH Auditors.

## Hamilton, Ontario, 30th August, 1869.

I hereby certify that the whole of the Company's permanent way, stations, buildings, and other works, have during the past half-year been maintained in good working condition and repair.

GEO. LOWE REID, Engineer.

## Hamilton, Ontario, 19th August, 1869.

I hereby certify that the whole of the plant, including engines, tenders, cars, machinery, and tools: also, the ferry steamers, with their engines and boilers, have during the past half-year been maintained in good working order and repair.

W. A. ROBINSON, Mechanical Superintendent.

## GREAT WESTERN RAILWAY OF CANADA.

## **REPORT OF THE DIRECTORS**

OF THE

# Great Western Kailway Company

## OF CANADA.

1. The receipts on Capital Account during the half-year amount to £258,050. 16s. 1d., and mainly arise from the first instalment of the issue of 5 per cent. Preference Stock. This includes the proportion of discount thereon, which has been charged against the remission of interest allowed by the Government, on the final settlement of the loan.

The aggregate expenditure to the same date amounted to  $\pounds 5,392,593.5s.3d.$ , leaving a balance to the credit of Capital Account of  $\pounds 126,284.$  19s.

In accordance with the resolution of the shareholders at the Special General Meeting held on April 28th, the directors have to announce that the whole of the 5 per cent. preferred stock, amounting to  $\pounds 1,018,000$ , has been issued at the agreed rate of 80 per cent., the first call of 25 per cent., was payable on the 17th May, 1869, and carries dividend from that date. The remaining instalments are payable, viz.:—

£16 or	i each a	£100 of a	stock or	1 1st December, 1869
16	,,	,,	. ,,	1st December, 1870
16	"	,,	,,	1st December, 1871
12	. ,, .	. ,, .	,,,	1st December, 1872

An Act of the Canadian Parliament (32 Vic., cap. 62) has confirmed this issue of preference stock, with option of conversion into ordinary shares until 1st January, 1880.

2. The outlay on Capital Account during the half-year, after deducting sales of surplus lands, has been £4,490. 6s. 9d., as follows:—Cost of extending sidings rendered necessary in consequence of the increased through tonnage and number of trains; additions to Detroit freight shed; Petroleum oil platform at London; proportion chargeable to capital for new windmill tank at Port Credit, and 20 new 8-wheel flat or platform cars.

3. The receipts and expenditure on Revenue Account were as follows :---

The dividend to July 31st on the first instalment of the 5 per cent. preference stock amounts to £2,608. 2s. 8d., leaving a balance of £55,110. 1s. 8d. From this balance the Directors recommend a dividend on the ordinary shares at the rate of 3 per cent. per annum, free of income-tax, payable in London on 9th November, which will absorb £53,259. 9s. 8d., and leave a surplus of £1,850. 12s. to be carried to the credit of next half-year.

The Renewal Fund for the Ferry Steamers now amounts, with interest, to £12,560. 13s. 10d.

4. The loss on conversion of American currency for the halfyear amounts to £53,781. 15s., as compared with £54,748. 12s. 5d. for the corresponding period in 1868. The average rate of conversions during the half-year was 135½, the average price of gold for the same period being  $137\frac{1}{2}$ . The amount of assets in American funds in hand at 31st July, 1869, amounted to \$218,635.41, against \$215,435.72, at the commencement of the half-year.

7. The low tariff of rates referred to in the last report as arising from competition has been continued throughout the half-year by rival American Railroads, and the North Shore route (of which the Great Western forms the middle link) has been obliged to adopt the same rates. This has considerably affected the ratio of working expenses to earnings, which this half-year amounts to 60.45 per cent., against 58.45 per cent. in the corresponding half-year.

The cost, of ordinary working expenses per train mile for the last five corresponding half-years is as follows :---

"	,,	1868		The week	4/81	·, ·	
"	,,	1869	and the are	100.00	4/8	,,	

8. The opening of the Pacific Railroad will bring to the Great Western Line a considerable traffic between the Atlantic and Pacific coasts, which was formerly conveyed by water by the Panama route. Passengers can now travel through in the same car from New York to Chicago, where direct connections are made with the Pacific Railroad. The Great Western will participate in the advantages of 2,000 miles of additional railway communication west of the Missouri River. The development of this traffic will, doubtless, lead to a closer alliance with some of the lines between Chicago and New York; indeed the Erie, Lake Shore, and Michigan Southern Railroads are already said to be consolidated. Should any definite and acceptable proposals be made to this Company, they will be submitted to the Shareholders for their consideration.

9. The unbroken gauge established between the East and West by the Third Rail over this line, has developed a large grain business never before conveyed by railway. From this traffic important results may be expected in the future. Millers in New England States formerly obtained cargoes of grain during the period of navigation only; they now receive their supplies in car loads all through the winter. The lumber trade has also been promoted by the same means. It is satisfactory to be able to state that on all the sections of country in the neighbourhood of the line, the crops have been more abundant than for some years past.

A Special Freight Line has been established in connection with the Detroit and Milwaukee Road, by which freight is transported between Grand Haven and the Atlantic seaboard without transfer.

10. The last half-year's report referred to an agreement with the Wellington Grey and Bruce Railway Company to work the traffic (under certain conditions) of the first section (16 miles) of that line as far as the town of Fergus, and which portion is now approaching completion. The same arrangement has since been made with regard to the entire main line of the Wellington Grey and Bruce Railway, intended to be constructed from Guelph to some point on Lake Huron, making altogether about 90 miles, but not to any future branches or extensions. The agreement can be seen at the offices.

(h)

11. The Directors have to announce that the surplus revenue of the Detroit and Milwaukee Railroad Company on 30th June, 1869, admits of a dividend at the rate of seven per cent. per annum to this Company on the \$2,095,000 Preference Shares. One-fourth of this sum of £10,602. 11s. has been applied in part liquidation of the Detroit and Milwaukee Old Interest Account, which now stands in the balance-sheet at  $\pounds 6,944, 19s. 3d.$ 

The gross earnings of the Detroit and Milwa	ukee Railro	bad	for
the half-year to 30th June, 1869, were	£154,786	17	11
Working expenses, taxes, and insurance	99,621	18	1
Net revenue	£55,164	19	10

On behalf of the Board of Directors,

THOMAS DAKIN,

President.

London, October 13th, 1869.

## REPORT OF THE ENGINEER.

## ENGINEERING DEPARTMENT,

GREAT WESTERN RAILWAY, HAMILTON,

#### 24th August, 1869.

## THOS. SWINYARD, Esq.,

fo

General Manager.

DEAR SIR,-I beg to submit to you the following Report upon the working of my department during the half-year ended 31st July last :---

## CHARGES TO REVENUE.

The total expenditure of this department during the half-year charge- able to Revenue amounts to	£ 58,602	s. d. 13 11	
As compared with the corresponding half of 1868, which amounted to	51,028	8 4	
CHARGES TO CAPITAL.			
During the past half-year the undermentioned new Works we	ere exec	cuted,	
orming a charge to Capital Account.		5	
	£	s. d.	
stSuperstructureLabour and materials laying down a through siding with a third rail at Constown : extension of sidings at	1		

siding with a third rail at Copetown; extension of sidings at London, and laying down a third rail in the Oil, Coal and Pork sidings at Hamilton 1004 tons of rails laid down in same Making switches and crossings and preparing materials for additional narrow gauge sidings to be laid down at various points along the Main Line	357 929	5	
<ul> <li>2nd.—Buildings.—Proportion chargeable to capital of the cost of building a tank and erecting a windmill pump at Port Credit, charge from Mechanical Department</li></ul>		4	9
Cost of building an Oil platform at London 16 15 11		13	5
	£2,508	18	2

Nearly the whole of the above amount charged to construction account is for several new narrow gauge sidings, which were absolutely necessary for the adequate accommodation of the traffic.

More narrow gauge sidings are still urgently needed, and an additional number, extending in the aggregate to  $3\frac{1}{2}$  miles of new sidings, are at present under construction. These will obviate many of the difficulties experienced during the past winter in the prompt despatch of the trains at a time when the freight business of the main line fully taxed the capacity of our single track railway.

• Nors.-In the Capital Account No.1 this amount is reduced by the sum of £124. 1s. 2d., received for the sale of surplus lands.

#### REVENUE ACCOUNT.

Engineering s								880	0	3	
					Total			£58,602	13	11	
				111 - 1			-		-	-	

The above expenditure exceeds that of the corresponding half-year in 1868 by a sum of  $\pounds 7,574$ . 5s. 7d., but the freight tonnage and engine mileage having increased in very nearly the same proportion, the additional outlay on maintenance and renewals is thus to a large extent accounted for.

The following tabular statement shows the relative proportion of the cost of maintenance and renewals to the Traffic Engine Mileage and tonnage of freight passing over the line since the completion of the extraordinary renewals in 1867 :--

Half-year ended	Cost Mainter and Ren	nance	Traffic Engine Mileage.	Cost per Engine mile.	Total freight tonnage carried over Line and Branches.	Total freight tonnage car- ried whole length of Main Line.
31st July, 1867	£. 42,773	s. d. 8 9	Miles. 1,141,901	d. 8·99	Tons. 296,787	Tons. 136,693
31st Jan., 1868	43,589	11 8	1,151,833	9.08	284,985	147,064
31st July, 1868	51,028	84	1,202,913	10.18	286,733	140,643
31st Jan., 1869	48,535	17 4	1,317,863	8.84	338,911	203,656
31st July, 1869	58,602	18 11	1,358,530	10 <sup>.</sup> 35	375,576	208,773

\*This sum is in mixed currency, being increased by a sum of \$1,264, 108, 2d., arising from the purchase of coal and firebrick, &c., in the United States, and charged in American currency in the accounts. The above proportion of cost of maintenance and renewals to the engine mileage and freight tonnage compares very favourably with that of the leading railways of the Northern States.

The increase during the past half-year is in re-rolled rails, trackmen's wages, sleepers and ballasting, whilst on the other hand there is a large reduction in the cost of repairs of bridges and buildings, arising from the recent heavy renewals of these works.

The weight of re-rolled rails laid in the track during the last six months was 3,184½ tons, being 1,054½ tons (or nearly fifty per cent.) in excess of that of the corresponding half-year of 1868, owing to the unusual breakage and lamination of both rails and joint fastenings which took place during the severe weather of last February and March, following suddenly as it did upon an exceptionally mild and spring-like season, which prevailed throughout January and the first half of February. The rails which suffered most severely were those which had been earliest re-rolled, viz., in 1861 and 1862, and those imported from Wales in 1866 for the narrow gauge track, a large proportion of which latter have proved to be very ill adapted to withstand the severe stress of our heavy freight traffic during the winter months.

y

e

d

1-

1

The gross weight now passing over our Main line (embracing all classes of trains), exceeds two and one quarter millions tons per annum on the central division on a single line of rails, a load which in this climate wears out the best quality of 66lbs rails in a very few years. All the leading railways of the Northern States are now rapidly relaying their main tracks with Bessemer steel rails (with most successful results), and I beg strongly to recommend that we should lose no time in commencing to relay the heavy gradients of our Central and Eastern divisions between Suspension Bridge and London with Bessemer steel rails as fast as the iron rails are worn out.

Bessemer rails are now considerably less than twice the cost of iron rails, and it is established beyond all doubt that their duration is at least five times that of an iron track.

The wages of the trackmen throughout the line have been increased during the past half-year from 80 cents to 90 cents and one dollar a day, in order to check the wholesale emigration which was taking place to the Western States where the demand for railway labourers is very great. This increase adds a sum of  $\pounds 2,054$ . 155, 11d, a-year to the wages of the permanent force employed on the line.

...

. £23,762 15 10

The stock of surplus rails is 2,542 tons, valued at

GALT AND GUELPH BRANCH, 151 MILES.

Cost of maintenance, renewals and watching for the half-year	£702	15	5
The cost of the corresponding half-year was	£845	15	11

ERIE AND NIAGARA RAILWAY, 311 MILES.

Cost of maintenance for the half-year ... ... ... £475 11 5 The cost for the corresponding half-year was ... ... 170 1 9

The above is the cost of Maintenance for a period of four months as compared with three months in the corresponding half-year of 1868, and it includes the cost of working a ballast train for repairing the track during a period of three weeks.

I am, dear Sir,

Yours faithfully,

### GEORGE LOWE REID,

Engineer.

## REPORT OF THE LOCOMOTIVE AND CAR SUPERINTENDENT.

MECHANICAL DEPARTMENT,

GREAT WESTERN RAILWAY, HAMILTON,

19th August, 1869.

THOS. SWINYARD, ESQ., General Manager.

DEAR SIR,—I beg to submit to you the following Report of the working of this department for the half-year ending July 31st, 1869.

## CHARGES TO CAPITAL.

For 20 new eight-wheeled Flat or Platform Cars constructed in the Company's works as additional stock for use of Traffic ... ... ... ...

£2,105 9 9

## CHARGES TO REVENUE.

## LOCOMOTIVE DEPARTMENT.

The expenditure in this department during the half-			
year chargeable to revenue amounts to	£55,667	8	3
As compared with the corresponding half-year of 1868	53,018	9	0

## CAR DEPARTMENT.

The expenditure in this department during the half-			
year chargeable to revenue amounts to	£30,654	19	7
As compared with the corresponding half-year of 1868	24,115	13	10

### LOCOMOTIVE DEPARTMENT.

Renewals .- The amount expended for renewals of engines during

the half-year, and included in the charge to Revenue Account, is as follows :--

On account of new Passenger Engines to replace			
"Norris" and "Amoskeag" classes	£6,124	19	2
On account of new Boilers and general reconstruction			
of the two Engines of "Gunn's" class	914	16	3
On account of new material manufactured for other			
Engines	1,697	18	2
Total	£8,737	13	7
An company of with the summer it is 1, 10 and 1000	07.045	~	
As compared with the corresponding half-year of 1868	£7,345	Ð	11

Three more of the six new Passenger engines mentioned in last halfyear's report as under construction, have been completed and put to work during the half-year. Their names are the "Elk," "Antelope," and "Greyhound," and they replace the three old engines of the Amoskeag class, hitherto called by the same names. Two more of these new Passenger engines are now under construction.

In addition to the above mentioned renewals, considerable progress has been made during the six months with the construction of two new boilers for two engines built by Gunn & Co., formerly of Hamilton, the present boilers of these engines being worn out.

Repairs.-31 Engines have received heavy, and 18 light repairs.

The repairs to the boilers of many of our Engines continue to be exceedingly heavy; four Engines were supplied with new half barrels, six with new copper flue sheets, and two with new copper crown sheets, like those mentioned in last report. These special repairs have enabled us to increase the strength of the boilers of six Engines in such a manner as to permit an increase of their working pressure from 120 to 130 lbs. per square inch.

The following new material has been supplied, and charged in the half-year's expenses :-5 cast steel crank axles, 3 straight cast steel axles, 12 tender axles, 37 axle boxes, 13 pistons, 2 eccentric pulleys, 2 eccentric

straps, 1 pair of cylinders, 7 crank pins, 5 cross heads, 9 cast-iron driving wheels, 4 engine springs, 3 smoke stacks, 74 cast steel tyres.

Stock of Engines.—The number of Locomotives is the same as reported last half-year, viz :—

- 46 Passenger Engines.
- 44 Freight Engines.

8 Shunting Engines.

- 1 Locomotive Fire Engine.
- Total ... 99

8,

ic

The Locomotive Stock generally is in satisfactory condition.

Pumping Engines, Tanks, &c.—The repairs necessary for the maintenance of the different water stations have received efficient attention, and the tank service generally is in satisfactory condition.

At Port Credit a new tank and windmill pumping apparatus were created, to replace the old arrangement hitherto worked by steam power.

At Toronto three new tanks and tank frames were erected in place of the three old tanks which were too much decayed for further use.

During the month of May the tank buildings at Bothwell Station were accidentally destroyed by fire, caught from a large conflagration in the town, which commenced near the Company's premises. Newbury being a station where a more abundant water supply can be secured, new buildings to replace those destroyed at Bothwell are being erected there, with the improved windmill pumping apparatus.

*Turntables.*—These have been maintained in good order. The timbers and foundation of the turntables at Toronto Station have been renewed.

Comparative Expenditure of the Department.—The increase in the Locomotive expenses amounts to £2,648. 19s. 3d., and is accounted for by the increased traffic, the tonnage carried having been greater by 35 per cent. than in the corresponding previous half-year, while the mileage of engines in carrying the same has only increased 12 per cent.

\*

The following Table shows the total expenditure of the Locomotive Department for seven consecutive half-years, including that under report and exclusive of the "Galt and Guelph" and the "Erie and Niagara" Railway charges.

	Half-YEARS ENDING JULY 81st.							
	1868.	1864.	1865.	1866.	1867.	1868	1869.	
Total Locomotive Expenses	£41,590	£41,162	£86,248	£40,799	£44,760	£58,018	£55,667	
Per Centage on Earnings	14.13	18.00	12.50	11.80	12.20	14.80	14-40	
Number of cords of Fuel	17,016	15,881	18,592	17,218	21,832	26,391	80,742	
Total Cost of Fuel	£10,489	£9,488	£7,680	£9,726	£12,865	£20,888	£19,708	
Cost of Fuel per Engine traffic Mile	2.29d.	2-23d.	2·19d.	9-84d	2.60d.	4.05d.	8-48d.	
Ditto Train ditte	8.51d.	8.05d.	8.08d.	8.81d.	8.60d.	5.76d.	4-91d.	

## CAR DEPARTMENT.

Renewals—The amount expended for renewal of cars during the halfyear, and included in the charges to Rovenne, is £3,859. 0s. 8d., the following renewals having been effected—4 first-class cars mentioned in last report as under reconstruction, were completed during the half-year with all the latest improvements; 7 flat and 27 box cars rebuilt; the trucks also of 7 baggage van flats were converted to narrow gauge during the period. 626 new side-springs, 6 sets new lateral motion springs, 336 axles, and 718 new chilled wheels, have also been supplied, and charged in the expenses of the half-year.

Repairs .- The repairs have been thoroughly attended to as required.

Stock of Cars.  $\rightarrow 20$  new flat or platform cars have been added to the stock, and 2 first-class cars, 10 conductors, and 7 baggage van flat cars have been converted from broad to narrow gauge.

and started prove light in stress as

Description of Cars.	Broad Gauge.	Narrow Gauge.	Total.

The Car Stock generally is in a satisfactory condition.

### STEAMERS.

"Great Western" and "Union."—These boats have worked most satisfactorily during the half-year, the traffic ferried over the river having been much in excess of the corresponding period.

Two new pistons have been made at the cost of revenue for use as spare gear in case of accident, for the car ferry boat, and two additional safetyto white the Meridian

14

valves have been provided in accordance with Government requirements \* also at cost of revenue; the hull also and upper works of this boat have been painted, and the pipes for carrying off the bilge water extended.

Both boats are in good and efficient condition at the present time.

## BUILDINGS AND TOOLS.

During the half-year considerable progress has been made with two new and improved boilers, now under construction at the cost of revenue, for the Hamilton stationary engine of this department, to replace the two at present in use, which from long service are now nearly worn out.

A new piston has also been constructed for this stationary engine.

The condition of the other tools, and of the buildings generally, has been well maintained.

Yours faithfully,

W. A. ROBINSON, Mechanical Superintendent.
