ST. JOHN N. B. SATURDAY, NOVEMBER 23, 1901.

NO. 20.

VERDICT OF CORONER'S JURY IN DEATH OF THE CAUSTON CHILD.

Assign Lockjaw as Cause and Express Opinion as to Whence Infection Came—Evidence of Physicians, Druggist, and Child's Mother.

Thursday night in the police station building Coroner D. E. Berryman, with a jury, held an inquiry into the death of the six year old daughter of Oscar Causton, which occurred on Wednesday from lockjaw, following vaccination.

After hearing the evidence of Mrs. Causton, mother of the dead child, Mrs. Causton, druggist, who performed the vaccination, Dr. H. G. Addy and his son, Dr. G. A. B. Addy, who attended the child after she developed symptoms of tetanus, was taken the jury rendered their verdict: "We find that the child died of tetanus, caused by the use of impure vaccine, in a case where every precaution was used in this particular case."

The coroner—Then this sending boys to college to study is all a humbug? Witness—I do not say that. To jurors Mr. Hawker said all his vaccinations were under one method. The lymph used was considered to be the best in the market. Explaining to the coroner, the witness said he vaccinated about 100 persons in about two-thirds of the cases he washed the arms. In conclusion, Mr. Hawker said he had no idea how the child contracted tetanus.

Dr. H. G. Addy on the Stand. Dr. H. G. Addy described his visit to the Causton child, whom he found to be suffering from tetanic convulsions. Being told the child had been vaccinated, he examined the arm and found the vaccination was not a proper one. Had a hemorrhagic appearance with a hard seal over it. On a second visit to the child in company with his son and Dr. Baxter, made a diagnosis which showed tetanus, which he observed on his first visit earlier in the day.

The coroner, asking how he accounted for the tetanus, the witness explained that it could only be produced by contracting the germ of tetanus. As a rule tetanus germs accumulated in manure heaps. Then, describing the method of developing and procuring vaccine, Dr. Addy said he was conveying the theory that the vaccine used on the child was impregnated with the germ of tetanus. At the close of his evidence, Dr. Addy qualified his statement that the vaccination on the Causton child was not a proper one, saying he meant the development was improper instead of the operation.

Dr. G. A. B. Addy. Dr. G. A. B. Addy, bacteriologist of the General Public Hospital, told of his attendance in the case. The child died from tetanus, a disease caused by a germ which might have entered the system at the time of vaccination or afterwards. It might have been contracted by inoculation of the vaccine or subsequently from another source when the wound was exposed. The period of incubation was from four to fourteen days. Did not think the germ was transmitted in the Causton case by a needle used on another person. Considered vaccination a surgical operation and any other than a registered physician performing the work for fees to be an infraction of the law. According to Mr. Hawker's evidence he thought that he took the ordinary precautions in making the vaccination.

The Coroner's Address. The coroner, in reviewing the evidence, said that the question of Mr. Hawker's which his long experience was qualified to perform the operation of vaccination. He (the coroner) thought that Mr. Hawker had taken the ordinary precaution, it ought to be thought, he determined if Mr. Hawker under any circumstances should be permitted to practice vaccination. Whether Mr. Hawker was quoted but not legally authorized to vaccinate was a point which could be considered. The coroner also mentioned that there was a finding in the evidence on how the germ was contracted and pointed out to the jury that full deliberation should be taken before attributing it to the vaccine. Such a finding, he added, would be calculated to demoralize the community, obstruct the board of health in their efforts to fight the outbreak of smallpox and probably ruin the particular firm who manufactured the vaccine.

AWAITING WORD TO SEND FORWARD TROOPS.

If Imperial Authorities Accept Canadian Offer, Short Time Will Suffice to Make Ready.

Ottawa, Nov. 21—(Special)—"You may say that if another contingent is called for, we can have it outfitted and under way to South Africa in from three weeks to a month." This is what the stores' branch of the militia department has to say. The outfitting of a mounted force is a much heavier contract than would be involved in sending off an equal number of foot soldiers, but what the stores' branch has not now in stock for a contingent of 800 can be ready by that time. A reply to the government's message from London to set about active preparations for the enlistment and outfitting of another contingent. It remains only for the militia department to make arrangements for the enlistment and outfitting of another contingent. It remains only for the militia department to make arrangements for the enlistment and outfitting of another contingent.

MORE OF THE STORY OF THE PLOT IN ALASKA.

Alleged Now That Parties Arriving at Victoria from the North Confirm It.

Victoria, C. B., Nov. 20—Parties arriving from the north confirm statements made in the despatch from Skagway, which appeared in the San Francisco Sunday Call, telling of the existence of a conspiracy at Skagway for the overthrowing of the Canadian rule in the Klondike. Inspector Horvath did arrive in Skagway on Nov. 5 and held a consultation with the United States officers at Skagway. It appears to be generally accepted that the conspirators were in the city when they returned from there, that it was attributed to the machinations of a Russian center, with its local headquarters in the Klondike. The leaders of this local center are very well known to the authorities. The information was obtained from Major Woods, Northwest Mounted Police, discovered the scheme and took prompt steps to suppress it. American officials at Skagway co-operating. The discovery of the scheme is supposed to have happened in the city. When the scheme was first discovered Maxin and Colt guns were mounted at White Horse, which was the first place to be attacked. The police there also received reinforcements, and patrols were kept on duty day and night. It is said the scheme originated in Seattle, and \$200,000 was available to aid the venture. The information was obtained from ex-police officers of the Yukon force and members of the gaubing fraternity who have come to the coast cities in the past winter. It is generally believed that the officials who have just come down from the north.

The Times of this city says: "The exceedingly hostile spirit which prevails in Skagway toward everything Canadian and British is said to be largely due to the plotting of the local center. Recent investigations of the British flag culminating in the actual hearing of it down on one occasion, as well as certain well carried out plots to bring Canadian officials into disgrace are all traceable to the same gang. The Times of Seattle has positively stated that the report from Skagway is not all fake and buncombe, that the watchful officials of our government know it is not all our country now and always stands in need of great alertness and preparation."

Seattle, Wash., Nov. 21—The Evening Times of Seattle publishes an account today which is offered as confirmation of the story published in the San Francisco Call to the effect that a conspiracy had been planned covering the entire Northwest territory for the overthrowing of an independent republic. The Times in its article lays great stress on the story obtained from Fred Clark, formerly a stage driver in this city, but who has been in the Yukon for some time, and admits a knowledge of the order of the Midnight Sub, which is supposed to have been organized for the sole purpose of the rebellion.

TO GUARD AGAINST TUBERCULOSIS.

German Government to Issue Leaflets Informing the People.

Berlin, Nov. 20—The imperial government is about to circulate among the people of the empire millions of leaflets informing the masses how to guard against tuberculosis, of which 100,000 Germans die each year. The government urges the people to hold the milk they use, to avoid excess of alcohol and tobacco, to sleep in cool rooms, and to quit the use of beer, tea and coffee. Women are told to abandon long skirts, and all are advised to take plentiful exercise, eat nourishing food, sleep long and guard the general state of their health. Incidentally, kissing is condemned as highly dangerous.

GOSPELS INTO MODERN GREEK.

Serious Demonstrations at Athens Caused by Proposal—Greek Premier Shot At.

Athens, Nov. 21—The agitation against the proposal to translate the gospels into modern Greek was continued today. Twenty thousand persons assembled around the ruins of the Temple of Jupiter Olympus and took part in a demonstration organized by students. A resolution was adopted, calling upon the Holy Synod to excommunicate any person who translated the gospels into Greek as now spoken. Eight hundred men were landed and co-operated with the troops in patrolling the locality. Several collisions occurred and occasional shots were fired. The students still hold the university buildings.

Called to the Associated Press from Athens last night, the students of the university had been making riotous demonstrations for five days against two newspapers which had been advocating the translation of the gospels into modern Greek. Yesterday the students fired on the police. Troops were then summoned and a riotous fight occurred, which resulted in the founding of a score of cavalrymen and several students. The university was guarded during the night by the students, who feared the building would be occupied by the civil authorities.

MRS. BONINE'S TRIAL.

Prosecution's Theory of Death of James Ayres in His Room at Washington Hotel.

Washington, Nov. 21—The trial of Mrs. Louis Bonine on the charge of killing James Seymour Ayres, jr., was fairly launched today. The preliminary presentation of the case on behalf of the government was made by Assistant District Attorney Taggart and after he had concluded a number of witnesses were heard. Mrs. Bonine's story was presented only by the testimony taken at the former trial, and on briefs to be filed afterwards. Mr. Pearson, who is interested in scientific matters, claimed to have located extensive areas of coal fields in the west for the railroad company, and that he had not been paid as agreed. The amount of coal that he avers he discovered for the railway aggregates nearly 100,000,000 tons. It is exceptional that a case of such importance is thus withdrawn from a jury and submitted to a judge, who is said to have taken both upon the law and the evidence.

LEAVE ALL TO THE JUDGE.

Suit for \$1,500,000 Withdrawn from Consideration of Jury.

St. Paul, Minn., Nov. 21—The suit of Herbert W. Pearson, for \$1,500,000, against President J. J. Hill, of the Great Northern Railroad Company, which sum is alleged to be due for the location of iron mines on the part of the railway company, was called for a second trial today. The first trial resulted in a disagreement. Counsel agreed to submit the case to Judge Kelley, on the testimony taken at the former trial, and on briefs to be filed afterwards.

WILL HAVE REPRESENTATIVE.

Railway Conductors Will Send a Man to Ottawa to Watch Their Interests.

Ottawa, Nov. 21—(Special)—The International Order of Railway Conductors will have a paid representative in Ottawa next session, to watch legislation affecting the interests of railway employees. This representative will be elected by the conductors of the Ottawa district, and his expenses will be paid by the international order.

PRISONER'S ACCOUNT OF PUGWASH AFFRAY.

Trial of John A. McArthur, Accused in Row in Which Charles McAulay Lost His Life.

Amherst, Nov. 21—(Special)—The trial of John A. McArthur, the accused in the Hallowell tragedy, in which Charles McAulay lost his life at Pugwash, opened this morning in the court house before Judge Morse. Hon. W. T. Pipes appeared for the prosecution; T. S. Rogers for the accused, and C. R. Smith for other prisoners interested. The court room was crowded. Quite a number of witnesses were examined both for the crown and the defence, the evidence being similar to that at the inquest. The accused was sworn on his own behalf and gave an account of the affair at the time of the cutting as follows: "I asked deceased to go out and stop the fight. He called me a hard name and I took hold of him trying to get him to go out. He knocked me back against the table. I had a knife in my hand. I was struck over the left temple. I was partly stunned. As I recovered myself I fell towards the door and there was a crowd behind it. I thought deceased was in front of me. At the foot of the steps outside the door the deceased made towards me. I would be about clear of the steps when deceased made for me. I tried to keep them clear of me with my arm. If the injury was caused by the man, I made no attempt to strike the deceased. I did not strike deceased in the middle of the road. I was not close enough to have struck him. I did not know he was out."

HANDLING OF CATTLE FOR EXPORT AT ST. JOHN.

Mr. Blair Interests Himself in the Matter on Communication from Upper Canadian Organization.

Toronto, Nov. 21—(Special)—Secretary Huntett, of the Dominion Live Stock and Cattle Dealers Association, has received a letter from Hon. A. G. Blair, minister of railways, in reply to a letter from Mr. Huntett, asking that better facilities be ordered at St. John for the export of cattle from that port. The cattleman had complained that unless the requirements of the trade were better complied with, it would mean that the trade would, of necessity, have to go to Portland and Boston. They, however, would prefer patriotic motives that the business should go to St. John. The Patrie publishes an account of the matter of some importance and delayed replying in order that he might make a full investigation. He informed Secretary Huntett that the Intercolonial management had made no special arrangements for export trade, except for local business; but terminal facilities had been provided through agreement with the Canadian Pacific railway. He had, therefore, been in communication with that company on the matter and had received their assurance that the Intercolonial management provided for handling 1,800 cattle at a time.

I. C. R. ENGINES COULD NOT BE SPARED FOR WEST.

Application for Their Use to Assist in Braving Out Grain Which Can't Be Handled.

Ottawa, Nov. 21—(Special)—Those engaged in the grain trade in Manitoba and the Northwest have been applying to the minister of interior to endeavor to get the minister of railways to permit locomotives from the Intercolonial Railway to assist in taking out grain from the west. Mr. Sifton laid the matter before Mr. Blair, who in turn consulted with Mr. Pottinger, general manager of the government railway. Mr. Pottinger said that the Intercolonial had not any locomotives to spare and they had not sufficient to carry on the large business which was being done on the west. That being the case, it will be absolutely impossible to get any locomotives to aid in taking out the heavy wheat crop of the Canadian Northwest.

MAN FOUND DEAD IN THE WOODS NEAR CHAPEL GROVE.

Found his lifeless body in the woods about a mile from his home.

Hampton, N. B., Nov. 21—(Special)—Patrick Sinnott, 86 years old, left his house at Chapel Grove on Tuesday morning to go to the woods to cut an axe handle. As he did not return, search was made for him. On Wednesday morning seven men went to look for him but without success. This morning 26 men continued the search and about 9 o'clock they found his lifeless body in the woods about a mile from his home. The body was taken to the home of Peter Scullin, and Dr. Wetmore, coroner, who happened to be attending a patient in that neighborhood, was called in. After making careful inquiry he considered an inquest unnecessary, the man having died from exposure and fatigue. Mr. Sinnott had been known to lose his way on several occasions.

BRITISH ROUND UP TWO BOER COMMANDOS AND MAKE CAPTURES.

Another Boer Force Makes Attack, Then Withdraws, When British Show Fight—Buller Incident a Less Prominent Topic Than Previously.

London, Nov. 22—The Pretoria correspondent of the Standard remarks as "A significant proof of the growing cleavage in the Boer ranks as a hopeful sign," the fact that an increasing number of ex-burgers are joining the British forces in the field. He says that several such corps are now doing excellent work. London, Nov. 20—A despatch from Lord Kitchener, dated from Pretoria today, says Lieut. Col. Colenbrander's column has rounded up Beyer's and Badenhorst's Boer commandos 30 miles northwest of Pretoria. The troops killed three men, wounded three and captured 54, including two field cornets. The colonel also captured much stock and munitions of war.

LIBERALS IN COLON ASSIGN OFFICES.

Open the Captured Treasury and Find Little There—French View of Situation.

Colon, Nov. 21—The following provisional appointments were made by the Liberals today: Senor Esprella, to be prefect; Dr. Valverde, to be mayor; Dr. Franco, to be postmaster, and Senor Silva, to be captain of the port. Other minor appointments were also filed. The treasury sale was opened this afternoon in the presence of witnesses. It was found to contain 1,000 Colombian dollars, equivalent to \$450 gold. The former postmaster also handed over to the Liberals the cash and the postage stamps in his possession. The municipal offices, in charge of Liberals will probably be opened tomorrow.

SETTLING GLOBE BANK AFFAIRS.

Directors of Boston Institution Pay \$240,000, and Depositors Will Get Another Dividend.

Boston, Nov. 21—An important step toward the settlement of the Globe Bank affairs was accomplished today when six of the directors of the bank paid over to Receiver Wing \$240,000 in cash, in full settlement of the claims that the bank held against them. This payment is the result of long negotiations and patient work on the part of Mr. Wing and others associated with him in the settlement of the bank's affairs and it is counted, on the whole, very satisfactory. It will place Mr. Wing in position to pay another dividend of ten per cent. at an early date. Such a dividend will call for \$250,000, but the cash assets already on hand, together with the \$240,000 just paid in, will give ample funds for the purpose. The comptroller authorizes the payment of the dividend immediately, and the distribution of the \$240,000 just paid in, will be made on or about December 1. This 10 per cent. will make a total of 90 per cent. already paid and there is in sight sufficient assets which, as soon as they can be realized on, as they are likely to be at an early date, will yield sufficient to pay the depositors in full and give the stockholders a substantial dividend as well.

WHEAT CROP UNDERESTIMATED.

So Says Official at Winnipeg—Asks Extension of Period of Marine Insurance.

Winnipeg, Nov. 21—(Special)—Ware-house Commissioner Castle has requested the marine insurance companies doing business on the upper lakes to extend the period of insurance until December 15th. Castle says the wheat crop has been underestimated and there will be fully 50,000,000 bushels for export, not to speak of oats or barley.

NO TETANUS IN VACCINE.

White Rats Inoculated in Camden, N. J., Came Through the Test.

Camden, N. J., Nov. 21—The white rats were inoculated with vaccine virus Monday for the purpose of ascertaining whether the virus contained tetanus germs. The rats were kept in a period without developing any symptoms of lockjaw. Some of the older physicians at Cooper Hospital, where the experiment was made, say either that it is inconclusive, inasmuch as it was made on young men, but not by pathologists, or else that it has proved merely that every bacteriologist already knows to be true—that the tetanus germs are in the air and not in the vaccine virus. The experiment will be continued along several lines, and a report will be made to the board of health at an early date by the county physician. The investigation was started at the instance of the board, as a result of the development of nine cases of lockjaw following vaccination of the nine cases seven of the

THE HORSE'S FOOT.

Some of the abuses most prevalent at the present time are: First, most horseshoers are rated as to how long a time it will stay on.

Another abuse practiced by horse owners themselves is that in case a horse pulls off a shoe and it becomes necessary to re-set it, the owner often does so himself and in most cases thinks it is necessary for him to pare the foot.

Another abuse practiced by horse owners themselves is that in case a horse pulls off a shoe and it becomes necessary to re-set it, the owner often does so himself and in most cases thinks it is necessary for him to pare the foot.

IN NOVA SCOTIA.

Description of One of the Great Fruit Houses That is Becoming More Numerous Yearly.

The following description of a Nova Scotia apple storage house is furnished me by my friend, Prof. F. C. Sears, director of the horticulture school at Wolfville, writes P. A. Waugh, in Orange Judd Farmer. He says that apple warehouses are each year becoming more common in the great apple district Nova Scotia, the Annapolis valley. They are built either by large speculators who deal extensively in apples, or by the small commission firms for the ac-

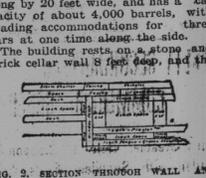

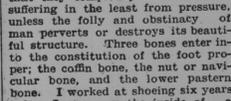

FIG. 2. SECTION THROUGH WALL AND WINDOW.

A CIRCULAR HOUSE.

The accompanying illustration which we present to our readers, says The Maritime Farmer, represents the poultry house lately built by Mr. Wm. Clark, Sackville, N. B.

The house is a circular being 198 feet in circumference and 4 1/2 in diameter. There is a circular centre room 14 ft. in diameter. On the ground floor there are 15 windows, two entrance doors and a stairway leading to the second floor. The roof is 20 ft. rafter and above that is a cupola containing 3 windows, 10

A CIRCULAR POULTRY HOUSE.

is sealed and plastered from top to bottom. On the first floor there are five pens 15x14, with an average width of 11 ft. There are five pens that size in which I keep my best hens for breeding purposes.

The second floor has six large pens, one of them is fitted with fattening pens in which I can keep about 50 chickens. On this floor I have my outside yard enclosed with wire, 150 to 200 feet of wire and for pens, I also have a manure shed to which the droppings are removed two or three times a week.

Often it will not pay the farmer to advertise in the papers, when the value is small and the expense of advertising is large in proportion. In such cases the farm bulletin board fills the bill. The sketch shows how such a board is made and utilized. A fair quality of stock boards, tongue and grooved, and well seasoned, should be used. The post should be of good size and set deep enough to be perfectly solid. For a large board, two posts would be more suitable.

Make the board complete with cleats across the back, and finish with a good border strip, well nailed on the sides and bottom. Use a wider border on the top for better weather protection. The bulletin board should be kept well painted.

Best cheese must have a close solid body. The presence of numerous, irregular holes makes what is known as "open" cheese. Openness in cheese is usually the result of an insufficient development of the curd before salting and putting to press.

This defect may be overcome by allowing more acid to develop in the curd before salting; that is to say, more time should be allowed from the drawing of the whey until the curd is salted and put to press. The less acid there is in the curd, when the whey is drawn, the longer will be the time required to mature it properly.—J. A. Riddick, Chief of Dairy Division, Ont.

It is best for bees to have much more honey than they really need to consume when they go into winter quarters, as it will do no harm and may be taken away in spring if the space is needed for brood.

Begin at the ground floor. Procure a few fowls, attend to them personally, watch them eat and examine their quarters, measure their food, note the breeds, keep account of the profit and loss, and do not neglect a single detail.

One of the best individuals in the herd of five Holsteins in the model dairy at the Fair-American Exposition was the cow Meg, No. 1207. The illustration hardly does her justice as the photograph was taken shortly after milking when the udder was empty and gave no indication of her capacity.

Without exception, names of new subscribers will not be entered until the money is received.

RULES FOR CORRESPONDENCE.

Write plainly and take special pains with names. Write on one side of your paper only. Attach your name and address to your communication as an evidence of good faith.

AUTHORIZED AGENTS.

The following agents are authorized to canvass and collect for The Semi-Weekly Telegraph, viz.:

WM. SOMERVILLE.

W. A. FERRIS.

Semi-Weekly Telegraph

ST. JOHN, N. B., NOVEMBER 23, 1901.

SPECIAL NOTICE.

As a great number of our subscribers are interested in the Census Guessing Competition, for which prizes were offered to the persons coming nearest to the correct enumeration of the population for the Dominion of Canada, a given out by the Minister of Agriculture from the results of the recent census, we wish to advise the readers of THE TELEGRAPH that no announcement had yet been made by the Minister of Agriculture.

As soon as the Hon. Mr. Fisher has made the official statement showing the results of the Census, the coupons will be sorted out by the Press Publishing Association of Detroit, and the announcement made of the prize winners in the SEMI-WEEKLY TELEGRAPH for several issues, so that all may know who the successful competitors were.

This will save our readers and ourselves any trouble of correspondence in regard to the competition.

THE TELEGRAPH PUBLISHING CO. OTTAWA, Ont., Aug. 16.

To Press Publishing Association, Toronto: Official figures are Five Million, Three Hundred and Thirty-eight Thousand, Eight Hundred and Eighty-three, but they are not final.

A. BLUE, Director of Census.

As soon as final figures can be obtained, the awards will be announced.

THE AUXILIARY CRUISER SYSTEM.

The Naval Intelligence Department of the British Admiralty has lately produced some interesting tables in tracing the progress of the movement by which in return for an annual payment of \$77,813 as admiralty subsidies, Great Britain has now the call of no fewer than 48 feet merchant steamships capable of serving as armed cruisers.

The subsidy, it is true, is paid only in respect of eighteen of these, but the remaining thirty are at the disposal of the admiralty under agreement and without further subvention.

It appears that the policy of relying to some extent on mercantile auxiliaries was mooted as far back as 1878, but it was not then received with official favor, on the ground that when occasion required there would be plenty of suitable steamships available for admiralty requirements.

That this was a mistaken decision is obvious by the light of more recent events. Even in 1878, however, it was deemed advisable to order that the armament requisite for a certain number of mercantile auxiliaries should be set apart and stored at particular places. In 1885 came the Russian "scare," and then the admiralty took up sixteen vessels, presumably with some haste.

Of those vessels only one, the Canarder Umbria, had a speed of anything like twenty knots, although the fleet included some of the finest ships of the principal British companies, while today the subventioned vessels include such Atlantic greyhounds as the Canarders

Campania and Lucania, the White Star liners Majestic and Teutonic, the P. & O. liners Australia and Himalaya, as well as the three "Empress" ships of the Canadian Pacific Railway Company.

The experiment made in 1885 proved rather costly to the country and the results obtained were not so satisfactory as had been anticipated. The sixteen vessels referred to were employed for periods varying from five to nine months and the total amount paid for their hire was \$475,904, or nearly thirty thousand pounds apiece.

The following year agreements were only effected with two of the lines, the White Star and Cunard, and provision was made for the employment in the subsidized ships of a certain proportion of men of the Royal Naval Reserve. Later on arrangements were also made with the P. & O. and the C. P. R. companies.

In 1891 the conditions were the subject of some revision and again quite recently it has been necessary to make certain modifications of agreement in respect to manning.

The payments made under the head of merchant cruiser subventions during the fourteen years, 1887-8 to 1900-1, amount to \$573,000, which is at the rate of about \$41,000 per annum, a figure that does not appear excessive for such a definite national service.

What the British Admiralty obtains for these payments is the right to take up the vessels subventioned, at the first port of call, at a fixed rate of hire, thus avoiding all haggling on the subject of chartering; while the subventioned companies are bound to inform the Admiralty of any new steamship they are building, so that it may, if possible, be constructed according to official requirements.

The obvious value of this latter arrangement is that the nation gets a sort of option of new fast steamships as they come to be built. The companies do not now guarantee to supply the crew on the admiralty taking the ship up; but agree to assist the admiralty in that respect.

Under this arrangement, if peace continues for a number of years it serves the shipowner, who receives a certain fixed sum during that number of years in consideration of his agreement. But if war suddenly breaks out, the arrangement is disastrous to the shipowner and highly beneficial to the Admiralty who will get cruisers and transports at rates at which they never would be able to obtain them then without this subvention.

A somewhat similar arrangement has obtained during the past few years in the United States and a number of the steamers available during the war with Spain, including the fast trans-Atlantic liners Paris and New York, rechristened for war purposes the Harvard and Yale, was the result.

WHERE THE RESPONSIBILITY LIES.

The board of health have apparently awakened to the fact that the people of this city hold them responsible for the present epidemic which exists in our midst.

Dr. Christie announced at the municipal council Tuesday that he and Mayor Daniel were responsible for directing the actions of the board. It would appear from Dr. Christie's speech that the medical members of the board do not possess a sufficient knowledge of the elementary principles of public health to express an opinion upon them without recourse to the consultation of authorities.

The mere tyro in public health could have directed the proper course for the board to pursue without opening any book upon the subject. Even at this late day one would imagine that these capable digesters of medical literature would have assimilated sufficient knowledge to adopt strictly scientific methods to prevent the spread of the disease. But they apparently have not. Let us just take one small and minor example.

About three weeks ago some houses were quarantined and the occupants vacated. Some eighteen days later the quarantine was raised. The day prior to their release from quarantine the occupants were examined and the houses disinfected. During the sixteen or seventeen days intervening between the time of quarantine and disinfection the people were living in houses which doubtless contained some of the infectious matter. The occupants were in a position to come in contact with this material. Assume for instance that one of them was infected with the matter three days before the raising of the quarantine, then the medical examination one day before the release would not indicate that the person was suffering from smallpox, as the disease would not have developed sufficiently to be recognized and discovered, nor would the disinfection of the person destroy it. The infected person would then be permitted to mix with the general public, with the authority of the board of health, and thus afford an opportunity for spreading the disease through the community. We know that our health authorities would reply to this that the occupants were vaccinated. But first, how do the board know that the vaccination was successful, not having revised the vaccinated? And further, vaccinated persons can be attacked by the disease.

What any authority on public health would have done was, upon removal of the smallpox patient, to disinfect the house at once and then sixteen days later, after medical examination, to again disinfect the house. In this way the authorities would shut out the possibility of the occupants becoming infected at any time after the removal of the patient and the public would feel assured that the released persons were not a danger to the community.

Having pointed out one small item in which the board of health are not adopting the proper methods, probably upon

closer examination they will find a number of others of a more serious nature.

INVESTORS TO BE CONGRATULATED.

The avidity with which Ontario capitalists have embraced the opportunity to obtain possession of the Yarmouth duck and yarn mills at a price double the amount of the capital stock, shows the appreciation in which such investments are at present regarded by Canadians in the greatest manufacturing centres.

The new proprietors of these mills have undoubtedly given the matter most careful study and realize the field for such manufacturing in the maritime provinces. The announcement that the mills will immediately be run full blast, night and day, must be good news for Yarmouth, and the humming hives of industry resulting must mean much for the progress and prosperity of that thriving town.

If the present investors did not see money in it, they certainly would not enter into the project now so vigorously.

This example must be cheering to the new proprietors of the St. John cotton mills. These properties were purchased for \$145,000, and, as has been stated in these columns, the enterprise is being capitalized at but \$250,000. A capitalization at such a moderate limit certainly does not imply any watering of stock.

When the renovation of the plant has been completed, the necessary stock purchased and a suitable working capital provided, a capitalization of a quarter million will surely represent more than the actual value of the business, especially when it is remembered that a great bargain in the existing outfit was at the price paid.

The earning of very substantial dividends with the St. John mills, under the business management of which the names of the purchasers is a practical guarantee, seems therefore an assured conclusion. The stockholders who have embraced the opportunity for investment in this local enterprise are consequently to be congratulated upon their prospects, from a purely commercial point of view and apart altogether from the great benefit the industry will be to our city.

A comparison of value between the St. John and the Yarmouth mills would seem to show strongly in favor of the local property, for whereas the Yarmouth plant is only capable of manufacturing duck and yarn, the St. John mills are equipped for making a much greater variety of product, including duck, as well as white and colored cottons of all descriptions. There is also a splendid market in Canada at present for print cottons, which this mill will be in a position to supply to advantage.

THE DEFENCE OF ST. JOHN.

In time of peace prepare for war. The article which we print in another column today on the Defence of St. John is prepared by a gentleman who has given the matter careful thought and earnest study, and his places it in a very matter-of-fact and sensible fashion. It is a thing that many people may be inclined to laugh at, because the condition of war does not now exist. But neither did smallpox threaten us a few months ago and people would have been inclined to laugh at the wisdom of vaccination. In these days of supplanting history no one can be sure of anything a few months ahead, and it is only by grasping all the opportunities that present themselves while we may that it is possible to guard against danger when it comes. What is said in the article referred to presents to us a condition, not a theory, and the picture drawn is not a very pleasant one.

It would not be very pleasant to have a foreign warship demand as a ransom all the money in the banks of this city, with the option of immediate reduction of the city to ashes and splinters. Yet at the first signal of war upon England by any other naval power, it would be one of the possible strokes of enterprise attempted. If, as our article states, no warships were at the time available to guard the entrance to the Bay of Fundy and our city were left to its own resources for defence, existing conditions furnish no hope of success to the other hand, we have a few good guns, well mounted, the natural elevation and character of the country would enable our local forces to put up a very strong defence of our city. With a very few guns mounted on the heights of the Strait of Canoe, and one or two torpedo boats to act as scouts at the entrance, that waterway would be utterly impassable to any foreign vessel, and there are various other points at which they might be placed with equally good effect.

It is our cities, however, that present the fairest targets for a foe, and, perhaps excepting Sydney, St. John is the only approachable city of Canada which a foreign ship could safely dare to assail. Defense of it, therefore, seems to be certainly called for, or else a guarantee that a sufficient fleet of floating forts would be stationed to protect us. It is true that England herself relies upon her navy almost entirely to prevent or repel invasion, and is a fact that the object of the American navy today is very largely to protect the seaboard cities of that country. But if ships were unavailable for us, then what?

WHY THE ENGLISH ARE SATISFIED.

The pessimists who have lately been writing much about the alleged economic decay of England have at last struck a snag which has been set up on what seems to be a very solid basis by Mr. H. Morgan-Brown, in the Contemporary Review. The pessimists have been generally strong advocates of protection in the mother country and they have endeavored to make much of the showing of the latest

trade returns which exhibit the unusual feature of a decline in exports. This feature, they argue, would seem to point to a falling off in British purchasing power, and it has been even alleged that England has come to a stage in her career when she is obliged to live upon her capital instead of upon her trade. The snag to the progress of such reasoning, however, is in showing the broad fact of the improved condition of the English masses, and the statistics show that the average Englishman today is much better housed, better fed and better dressed than he was thirty years ago, so that the country in which he lives cannot be "going to the dogs in the sense of economic decline."

It is shown that since 1871, comparing the census statistics of then and now, there has been a reduction of 35 per cent in the number of persons per house in the United Kingdom, that the population of Great Britain has in the same period increased by 20 per cent and that the number of assessed houses has increased by 48 per cent. And above all, the people have been so blessed with facilities for obtaining food and ability to purchase it that the annual ratio of meat consumption per head of the population is now 104 pounds, compared with only 71 pounds a generation ago.

Such facts as these are readily comprehensible and they constitute an argument that is not easily controverted. When a greater population is supported in much greater comfort and with greater ease than it formerly was, it does not look as though the country were in a serious or backward condition. Moreover, such a satisfactory state of affairs does not argue much in favor of protection, for a great deal of the cheapness of food is owing to the largeness of its importation, while at the same time its variety is so accomplished as to make the diet of the average Englishman of today, an uncommonly wholesome one, resulting in an uncommonly wholesome nation.

PRACTICAL CHARITY PROMPTLY NEEDED.

The expressions of opinion presented in another column this morning by a clergyman of this city who has been a prominent supporter of the Y. M. C. A. and also actively engaged in charitable work in the section of St. John where such work is at present most necessary, are such as to command the attention of the public. It seems a curious coincidence that just at a time when a few enterprising business men of St. John are exerting themselves to inaugurate an industrial enterprise which, in the employment it will give to the masses, must be regarded as of the greatest practical benefit to the community, there is also launched a project which means directly the looking up of capital in the construction of an ornamental edifice. It seems to be almost like a project to build a fine school house as compared with a project to provide food and clothing for the children so that they might go to school. If there were a sufficient plethora of capital readily available for the carrying out of both projects, it would not be a matter for consideration as to which should be most deserving; but judging from the remarks of the gentleman quoted, and the fact that he came to THE TELEGRAPH to set forth the conditions which had come under his notice, he would seem to have obtained the impression that our people are not looking upon the cotton mill matter in the thoroughly sincere light in which it should be regarded. There is certainly much food in what this gentleman tells us, that the community should first consider the practical wants of the dependant part of its population and afterwards its luxuries. A prominent merchant, who is also a great giver to charities, in conversation upon such matters the other day remarked: "It is work, not recreation, that St. John needs."

In the meantime, the matter of distress appealing for practical aid; deserving supplicants, made such through circumstances over which they have had absolutely no control, confronts us, and it is to be hoped that our charitable societies will, as the clergyman we have quoted suggests, take prompt action in the premises.

THEY HAVE NOTHING TO SAY.

The Halifax papers have had nothing more to say about the Jamaica mail service. The utterances of their merchants at their Board of Trade meeting in regard to the paucity of freight furnished from St. John were so deliberately misleading that they should have had the grace to make the correction, but no comment has appeared. The members of the Halifax Board of Trade should have known that the aspirations of the St. John merchants were to divert nothing of legitimate West India trade from Halifax, but to double the service to Jamaica so that Canada's trade might expand and that Halifax herself should have twice the accommodation, yet because it would mean that Canada could export through two ports instead of through Halifax only, her merchants become terror-stricken and reckless in their statements. Well, St. John will probably survive.

NOTE AND COMMENT.

That bunch of promise case in St. Thomas, Ontario, has quite a Dickens-like appearance: Mrs. Bardell vs. Rev. McCawber Short. Shades of Mr. Pickwick!

The salary of Mr. S. of the Steel Trust, is only \$250.00 a month. This is most disappointing to calculate upon.

Great Premium Offer

We reproduce, in miniature, half tones three handsome Artogravures of famous paintings. The Artogravures themselves are in natural colors on heavy plate paper, size 22 by 30 ins., and represent the highest art in reproduction of paintings which have attained a world wide celebrity. The pictures referred to are THE SISTINE MADONNA, THE HORSE FAIR and NIAGARA FALLS.

SISTINE MADONNA.

The SISTINE MADONNA is the most famous work of Raphael, the greatest painter of any age. The original is in the Art Gallery at Dresden, and is of priceless value. It represents the highest type in religious art. Our reproduction is taken from the original, which assures its accuracy, and is executed fine for line, color for color of the original.

THE HORSE FAIR

The original of THE NIAGARA FALLS Artogravure is the work of Mr. Frank Cecil Schlitzer, and is the finest art effort extant of nature's greatest wonder.

NIAGARA FALLS.

All who have heard descriptions of this greatest piece of Canadian scenery, as well as the many who have seen it, will desire to become the possessor of this artogravure, which is a wonder in art coloring.

We have also secured a splendid reproduction, in black and white, of the latest pictures of Their Royal Highnesses the Duke and Duchess of Cornwall and York.

These are separate plates on heavy paper, each being 18x24 inches, and are very artistically gotten up with a border of roses.

OUR OFFER.

With every yearly subscription, paid in advance, to The Semi-Weekly Telegraph, we will give the subscriber his choice of either the Sistine Madonna, Horse Fair or Niagara Falls Artogravure in colors 22x30 inches, together with the splendid engravings of The Duke and Duchess of Cornwall and York, each 18x24 inches.

For \$1.00 we will send The Semi-Weekly Telegraph for one year and the three pictures. This applies to both old subscribers, whose subscription is paid up to date, and to new subscribers. Old subscribers taking advantage of this splendid offer will have their subscription marked one year in advance of the present expiry date, or if they are in arrears by paying their subscriptions to date and \$1.00 for another year's subscription.

Send in your subscriptions at once as the stock of pictures is limited and this offer cannot be held open indefinitely. Cut out the coupon herewith and send it with necessary amount to

The Telegraph Publishing Company, ST. JOHN, N. B.

The cash must accompany your order. The Semi-Weekly Telegraph for one year costs you only \$1.00. You get the three pictures absolutely free.

(CUT THIS OUT AND RETURN WITH REMITTANCE.)

Telegraph Publishing Co., St. John, N. B.

Gentlemen: Enclosed herewith please find \$_____ to pay for my subscription to Semi-Weekly Telegraph from _____ to _____ as per your picture offer. I desire the _____ and The Duke and Duchess of York pictures as a premium.

IRISH ENVOYS AT OTTAWA.

Premier at Luncheon Given Mr. Redmond and Colleagues—Resolution by Irishmen of the Capital.

Ottawa, Nov. 21.—(Special)—Ottawa Irishmen gave a cordial welcome today to John Redmond, Thos. O'Donnell and P. A. McHugh, the Irish Nationalists. The visitors were met by a couple hundred Irishmen.

Speaking about his welcome in Canada and the States, Mr. Redmond says it has been most hearty. "He had a great crowd in Montreal last night," remarked Mr. D'Arcy Scott, president of St. Patrick's Society, "and there were many French people in the audience who cheered him heartily."

"You don't expect much more than cheers from French-Canadians, do you Mr. Redmond," one of the reporters asked. "Why not," said Mr. Redmond. "The French and the Irish are Celtic, and they have always been friendly. The French of old France are heartily in sympathy with us, and why should not the French in Canada?"

When asked if the Irish had as much independence as Canadians have they would have cause for rebellion, Mr. Redmond said: "They would have as much cause as you have in Canada, and I do not think you have any."

Sir Wilfrid Laurier and Hon. R. W. Scott attended the luncheon given to Mr. Redmond and his colleagues at the Russell today.

The following resolution was drawn up for presentation to the visitors: "That the Irishmen of Ottawa, represented by St. Patrick's Literary and Scientific Society and Ancient Order of Hibernians, in joint meeting assembled, tender to John E. Redmond and his colleagues a cordial welcome to the capital of the Dominion of Canada, and blessed them in the fullest measure with liberties and freedom, and pledge them our sympathy, and support in their constitutional efforts to obtain the long sought blessing of home rule for Ireland."

Mr. Redmond lectured to a large audience tonight in the Russell Theatre.

IF YOU CATCH COLD.

Many things may happen when you catch cold, but the thing that usually happens first is a cough. An inflammation starts up in the bronchial tubes or in the throat, and the discharge of mucus from the head constantly irritates the sensitive mucous membrane of the throat, causing the act of coughing to irritate so that the more you cough the more you have to cough. It is, of course, beyond question that in many cases the irritation starts in this way and results in lung troubles that are called by various names. It is in this irritated bronchial tube that the seeds of consumption find lodgment and breed.

Great numbers of persons disregard cough at first and pay the penalty of neglect. Cough never did any one any good, it should be dispensed with promptly. Adams' Peppermint Cure is a well-known remedy, and it is the surest and quickest cough cure known today. It soothes the irritated parts and helps them, then the cough stops of its own accord. The action of this medicine is so simple that it seems like nature's own provision for curing a cough. Every drug store has it. 25 cents. Be sure to get the genuine, which has "F. W. Kinsman & Co." blown in the bottle.

Many a man who desires to turn back the hand of time to correct mistakes goes right on in the old way.

DON'T LEAVE IT TO CHANCE. You may need to use Kendrick's Liniment at any time in the house, or perhaps in the stable. Always have a bottle or two on hand.

Forcing an issue, practically, is nothing more than having your own way.

Intercolonial Railway

On and after MONDAY, October 8, 1901, trains will run daily (Sunday excepted) as follows:

TRAINS LEAVE ST. JOHN. Express for Halifax and Campbellton... 7.00 Express for Point du Chene, Halifax and Pictou... 12.15 Express for Sussex... 12.15 Express for Quebec and Montreal... 17.00 Express for Halifax and Sydney... 22.30

TRAINS ARRIVE AT ST. JOHN. Express from Halifax and Sydney... 4.00 Express from Sussex... 4.30 Express from Montreal and Quebec... 12.45 Express from Halifax... 12.15 Express from Montreal... 17.15

General Manager MONROE, C. T. A. City Ticket Office: 1 King Street, St. John, N. B.

THANKS-GIVING DAY, NOV. 28.

Will sell Round Trip Tickets for 1st Class One Way Fare (made to end in 0 or 5) GOING NOV. 27th and 28th Returning until Dec. 2, 1901.

Trout and Ale in the system lead to points Detroit Fort Huron, Salt Lake Marie, and stations on points on Prince Edward Island and Dominion Atlantic Railways.

Kerr's Bookkeeping.

Fourth (enlarged) Edition just published. Joint Stock Accounts a prominent feature. Detailed for retail trade. Send for our Catalogue, containing terms, etc., for our Business and Shorthand courses of study. Now is the time to enter.

247-4249-4251-4253-4255-4257-4259-4261-4263-4265-4267-4269-4271-4273-4275-4277-4279-4281-4283-4285-4287-4289-4291-4293-4295-4297-4299-4301-4303-4305-4307-4309-4311-4313-4315-4317-4319-4321-4323-4325-4327-4329-4331-4333-4335-4337-4339-4341-4343-4345-4347-4349-4351-4353-4355-4357-4

HOW YOUNG WOMEN SHOULD BE EDUCATED.

By Julia Ward Howe.

The greatest object of education is the formation of character. It may not suit the ambition of youth to be told at the outset that an honorable and useful citizenship is the highest end attainable by the individual, and that most desirable to the society of which he or she is to form a part.

Even the immortal Shakespeare shows us the pitiable subject of the shrew as a fortune-teller's result. The concession of the higher education to women marks more than any other measure the progress of the last fifty years. It implies on the part of society a tacit confession of the injustice of long done them in their exclusion from the opportunities of their natural ability and best aspirations.

While in the plan of education the diversities of talent and of circumstance should receive our consideration, we must not forget that the cardinal points of training are properly the same for all. Every girl should be taught to look upon herself as a member of a civilized, Christian community, and as such is bound to hold the interests of such a community dear and sacred.

But it isn't the pain alone that is dreaded, it is the loss of time. The pain is not the worst, it is the loss of time. The pain is not the worst, it is the loss of time. The pain is not the worst, it is the loss of time.

St. John man in New York. In notes upon the staff of the New York Morning Telegraph, the Journalist of Nov. 16, has the following concerning a former St. John man:

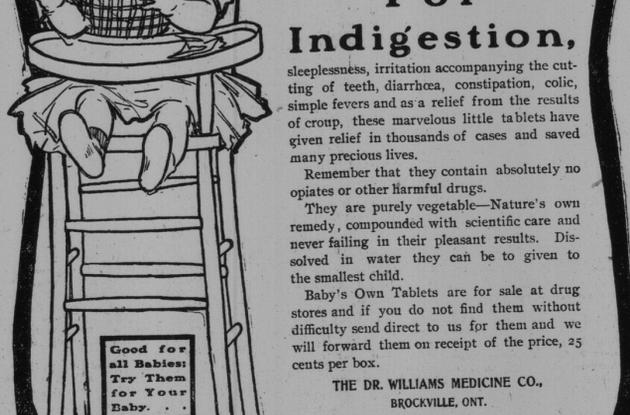

Another clever penman is Ernest M. Cressley. As a rewriter he stands out in striking contrast with many of his mediocre contemporaries. Calm, reserved and discreet, his work reflects rare scholarship and judgment in the selection of the general topics of the hour. His journalistic spurs are already won and fortuitous circumstances will ultimately place him on the highest rung of newspaper fame.

Having done our best to prepare the youthful mind for acquisition in the moral departments of learning, let us ask accordingly more frequently as education shall furnish the fair receptacle with its treasures; speak with diffidence, having been bred in the old-fashioned ways of 60 years since, but according to my best judgment, I should say: Language, first, in order that thought as it develops, may find its pure and appropriate expression. Fortunate do I account those who are born to the possession of the English tongue. Let each endeavor, above all things, to speak it with clearness and precision.

BABY'S OWN TABLETS

Babies never cry unless there is some very good reason for it. The cry of a baby is Nature's warning signal that there is something wrong. Every mother ought to set to work immediately to find what that something wrong may be.

If the fretfulness and irritation are not caused by exterior sources, it is conclusive evidence that the crying baby is ill. The only safe and judicious thing to do is to administer Baby's Own Tablets without the slightest delay.

Good for all Babies! Try Them for Your Baby.

THE DR. WILLIAMS MEDICINE CO., BROCKVILLE, ONT.

Shool highlight Nov. 9, but on the 10th was driven off to the southeast 12 miles. When the gale moderated she was put on her course again, and passed South Shoal Light on the second time on November 21. While off there she encountered a terrific gale.

DEBUSSING WILL NOT CURE CATARRH. This loathsome disease is caused by germs that invade the air passages of the head, throat and chest, and are cured only by inhalation of medicated air. Stomachic and antiseptic sprays are of little use, because they fail to reach the cause of the trouble. Catarrh is successfully treated by the use of the Inhalant, which is inhaled through the nostrils and reaches the inflamed tissues of the throat, chest and lungs.

Shipping Notes. Sydney, C. B., Nov. 20-The barquentine Cudlow and Hector, called Monday, for St. John. The barquentine Borda Grey, called Tuesday, for St. John.
