FOR ALL THE PURPOSES OF A

FAMILY PHYSIC.

There has long existed a public demand for an effective purgative pill which could be relied on as auro and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pull, but not easy to make a physical pull, but not easy to make of all pulls—one which should have none of the objections, but all the advantage, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient hitherto that almost every purgative medicing is actimonious and irritating to the bowers. This is not. Many of them produce so much griping pain and sevulsion in the system as to more than counterbalance the good to be derived from them. These pulls produce no irritation or pain, unless it arise from a previously existing obstruction or derangement in the bowels. Being purely vegetable, no hards can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given on the box. Among the compliants which have been speedily cured by them, we may mention Liver Complaint, in its various forms of Jaundice, Indirection, Languer and Loss of Appetite, Listlessness, Fritability, Bilious Headache, Bilious Fever, Faver and Agua, Pain in the Side and Loine; for, in truth, all these are but the consequence of diseased action in the liver. As an aperient, they affired prompt and ears relief in Contreness, Piles, Colic, Disentery, Humors, Scrofula and Scuryy, Colis with soreness of the body. Did space pormit, we could give many hundred such names, from all parts where the Pills have been used, but evidence even more convincing than the certificates of these, eminent public men is shown in their effects upon trial.

These Fills, the result of long investigation and tudy, are offered to the public as tag best and nest complete which the present state of medical sense care Afford. They are compounded not of he drugs themselves, but of the medicinal virtues and of Vegetide remedies, extracted by chemical mores, in a state of parity and combined together in such a numer as to insure the best results. This system of composition for medicines has been found in the Chery Pectoral and Fills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obtained, with the process of the condition of the drug that is desired for the quantitation. While by the old mode of composition, every medicine is burdened with more or less of armonices and injurious qualities to take the process of armonices and injurious qualities, but this, each individual virtue only that is desired for the quantitation of each substance employed are left behind, the curative virtues only being retained. Hence it is self-cuitent the effect should prove as they have proved more parely remedial, and the Fills a surer, more powerful actidates to discuss than any other medicine known to the world.

As it is frequently expedient that my medicine should be taken under fine counsel of an attending Previous and Fills see yade to the whole body of tractitioners in the United States and British American Provinces of however there should be any one who be not received them, they will be promptly forwarded by m
