QUESTIONS UNANSWERED WITH REGARD TO THE LONDON OUTRAGE.

When Mr. Hume Elliot revived the London Seat Steal, the other evening, he probably did not think the London Free Press would rush to the defense of the perpetrators of that outrage with Arrival of the Teutonic in the Lower a series of untenable arguments. But when one begins to excuse the inexcusable it seems difficult to be logical. Here are some of the questions for which the Free Press, with all its twistings and turnings, can find no answer:

quiry, put on the voters' list names of the Sandy Hook lightship. The Teupersons declared by James H. Fraser, revising officer, to have no votes?

(2) Why did Judge Elliot pretend to be waiting to respect the decision of the Court of Appeal, and then when it was given against his view, refuse to be bound by it?

(3) Did not the Free Press, before the election acknowledge that it was just that the bogus votes had been scored off, and that its friends, the Conservative leaders, never relied on them, but intended to win by the legal vote?

(4) Why, when it was found that Mr. Carling was in the minority, did Judge Elliot refuse to be bound by the unanimous judgment of two superior courts -one of them sought for by the Conservative managers-and count the bogus votes?

(5) Why was the charge to which several reliable witnesses were ready to screw steamship of 7,290 tons, and is comparatively a new vessel, having been launched in 1886. The hull is of swear, that Judge Elliot acted as a bitter partisan in the election of 1891, not investigated?

(6) Why did the partisan majority in Parliament refuse all investigation into the London Seat Steal and into Judge Elliot's partisanship in editing the Free Press and discussing the bogus voters' case while it was before him?

(7) Is it not a fact that Chief Justice Hagarty, Chief Justice Armour, Mr. Justice McLennan, Mr. Justice Street, Mr. Justice Falconbridge and Mr. Justice Burton were absolutely unbiased in their judgment that the London Seat Steal was indefensible, and that the names taken off the list by Mr. Fraser, according to law, should never have been replaced there by Judge Elliot?

(8) In view of Judge Elliot's declarations on the street and as political other ships whose voyages have been delayed. The two most noticeable cases of this sort which have happened editor of the Free Press as charged in the petition presented for an investigation could his decision be held to be disinterested?

(9) Is it not noteworthy also that every independent journal in the country, Liberal as well as Conservative, has condemned the Seat Steal and the burking of its investigation?

Our contemporary will not face these questions, but falls back upon Judge Elliot's right to do as he please under the provisions of the infamous Franchise Act. We admit that such a right exists, and the more shame to the men who are responsible for the placing of that rascally measure on the statute book. But we are no more prepared to admit that the Free Press reasons justly in this respect than that it reasoned justly or prophesied correctly when it maintained that the Conservative candidate in the recent Provincial election should be sustained, and that he would have a good majority. At the close of the poll there were 803 reasons why our contemporary was wrong. We believe the Seat Steal will be condemned on an

equally signal vote of the people. CONFESSED THE CRIME.

Brusseau's Terrible Tale - Mrs. Pope Planned and He Executed the

Murder.

DETROIT, Mich., Feb. 9.-William Brusseau, who has since last Saturday sold two stories of the murder of Dr. Pope, in his home here, last night made a clean breast of the whole affair to the police. According to his latest story the murder was a carefully planned affair, in which Mrs. Pope, the doctor's wife, was the moving spirit, and \$14,000 the object. For two weeks before the fatal day the two planned the crime in every particular. Saturday night Mrs. Pope made her husband sleep in a chair at her bedside. Towards morning she quietly called Brusseau, and the latter secured the hatchet and struck the doctor on the head. Then in obedience to the woman's command he rained half a dozen blows on their victim's skull. Mrs. Pope's 8year-old daughter, who slept at her bedside during the murder, was then awakened, and the three carefully rehearsed the story they were to tell to

To the Editor of the "Advertiser": As a setlement of the present controversy, I would offer the following proposition as a basis of settlement:

1. That the Humane Society appoint veterinary surgeon, the company another, and the two agree to a third party, all to be non-residents, and the third party to be an owner and user of at least twenty horses, to examine and report on the condition of the horses, said report to be accepted as final.

2. The company to pay the cost in case their report is not sustained. 3. Each horse to be driven one mile attached to a car containing commis-

STILL IT STORMED. The storm continued to rage with unabated fury during the whole of yester-day. The streets were deserted of almost all save the snow-covered police-men and stray watchmen, while once in half an hour or forty minutes a slowmoving street car would make its appearance and pass on again into the storm, the wheels crunching and grinding the snow with a ringing sound that told plainly the intensity of the frost.

"We are letting the horses take their time," Superintendent Deharte told an "Advertiser" reporter during the evening. And they certainly were. Mr. Deharte was inclined to take exception to the conduct of the Humane Society's inspector and police during the day, and invited the reporter up to look at the horses which he claimed were fit

for work. HUMANE INSPECTOR AT WORK. Humane Inspector Sanders ordered left Havre on her previous trip this way Dec. 23, a day late, reaching this fourteen horses to the stable during the afternoon. Chief Williams will prose-cute Driver Rockett at the Police Court and endeavor to reach the comgers, of whom 30 are in the saloon, 14 in pany through the men. Mr. Williams stated last night that a number of other drivers would be summoned.

The limited number of cars running last night made it easier for the men, who were changed oftener. There were no cases of forstbites reported among the drivers. The company had very hard work keeping the tracks clear, and had their sweepers and plows going con-

ELECTRICITY KNOCKED OUT. Electricity was not as good as horse power yesterday. London West's little street railway service was completely knocked out. In the big blizzard of Jan. 25 the line on the Wharncliffe road was buried in several places under from two to four feet of snow. It took a gang of men some time to clear the tracks, and now the line is drifted as bad, if not worse, than before. The only service bus which generally runs on Dundas street west. Quality Good.

Londoners Use Nearly 100,000 Tons a Season.

Paying to Get Warm in Wirter and Paying to Get Cool in Summer-Getting in the Crop-An Interesting Process.

It is almost as much as a man's life s worth at the present time to ask his neighbor if it is cold enough for him. It might be just as unnecessary to remark that the season's ice crop is a good one. Every man who is the owner of whiskers is prepared to assert that ice is very plentiful. Also that it ought to be cheap next summer. And as you walk on in the cold he may stay with you long enough to remark that it's a cold wind that does not blow an ice man some good. This is the season of the ice man's harvest, or rather the season of the ice man's harvest home. For the crystal crop is almost all gathered, and, like the farmer putting on the cap sheaf, the ice men are waiting to put on the crowning blocks and scatter now. over all the sawdust or the straw to preserve the lot until the ice cream season comes around again and the mercury goes mounting upwards until it registers something like 102 degrees in the shade

THE QUALITY IS GOOD. Last year, it will be remembered, ice was somewhat scarce. And what there was of it was not of the very best

quality. "We have never had a better quality of ice or more of it in the 22 years during which I have been in the ice business," said Mr. D. Collins, the veteran ice dealer of London West, yesterday. Mr. Collins has already stored away in his mammoth ice-house over 5,000 cords of crystal ice. As there are over three and a half tons to each cord, this means a storage of over 17,500 tons of ice. And even then the ice-house was not filled. Allowing 25,000 tons of ice to each of the three dealers—Messrs. Collins, Cushing and Stanton-it will be seen that Londoners have quite a relish in the summer time for what they do not appreciate now to any rapturous

LONDONERS USE LOTS OF ICE.
This amount is by no means the limit, and it is within bounds to state that Londoners dissolve nearly 100,000 tons of ice each summer. Of course, this amount is not by any means used exclusively to cool drinks or freeze ice cream. The greater part of it finds its way into the refrigerators - and ice dealers say that the use of refrigerators is on the increase. This is noticeable among the cottage population, and the average housekeeper, for the sake of, say \$1 a month, appears to prefer cool butter to rancid oil, and fresh milk to the half-boiled article. The ice bill of a large residence or a hotel amounts to as serious an item in summer as the coal bill does in winter. They are forever paying to get warm, and then paying, and even praying, to get cool again.

Without giving away any trade se crets, the "Advertiser" is at liberty to state that the price of ice will next summer remain the same as last. GETTING IN THE CROP.

The work of getting in the crop is an interesting process, and Mr. Collins alone gave employment to 36 men while the work was in progress. This year's ice was cut at a thickness of from eight to twelve inches, and in blocks four feet long by two feet wide. The cutting of the ice at this thickness makes it easier to handle, and nicer to cut and break into small pieces. The surface of the ice to be cut has first to be carefully cleared of snow, and then marked in parallel lines two feet apart. Then a team of horses and a plow follow the lines and cuts a decided nick in the surface. The ice is then sawed into the requisite lengths, and after being wedged off by a couple of vigorous blows with an iron bar, the blocks are floated to the bank and loaded into bobsleighs to be carried to the storehouses. Here they are piled on edge in such a manner that they will freeze together, but not in a solid mass. After they are frozen hard the whole is covered and made airtight by means of sawdust and straw. When the summer comes the iceman uncovers a portion and bores into the ice, and the pile grows less and less until the summer is over and the storehouse is ready to be filled again. not in stock anything can be made to

Collins and Cushing have their store houses on the river bank. Mr. Stanton also has a storehouse on the north branch and another at the cove. The ice is so clear that the bottom of the iver can be plainly seen by the men at work.

Manager Carr of the London Street Railway a Passenger – Mr. Turner Expected Home.

Among the injured in the wreck on the G. T. R. about five miles west of Toronto was Mr. Wm. Turner, Ann street, a Canadian Express messenger on the London local that crashed into the Chicago train. Mr. Turner was injured about the head and was taken to Toronto, where his injuries were dressed. He thought he was well enough to come home, and his family expected him on No. 1 this morning, and had a cab in waiting for the train. But No. 1 was cancelled. Mr. Turner is the man who was alleged to have been imperson-

COLLISION ON THE G. T. R.

Several Pullman Car Passengers Badly Hurt.

Judge Burton and Mr. Atkinson, of the Globe, Among the Injured.

TORONTO, Feb. 8.-While the Grand Trunk train from Stratford was on the way to Toronto this afternoon, a train following behind crashed into the rear car—a Pullman—which was occupied by a party of gentlemen who had been connected with the South Perth election trial at Stratford, when the train was about a mile east of Weston. The passengers included Judge Burton, Court Reporter Monaghan, Registrar Joseph, of the Legislative buildings, and J. E. Atkinson, of the Globe. Judge Burton received serious in-

juries. Mr. Monaghan had a leg broken, and received other injuries. Mr. Atkinson had two ribs broken.

Mr. Joseph is missing. After the wreck the car caught fire, and, with another, was completely

burned. A later account says: All except Mr. Joseph at the moment of the shock rushed towards the center of the car. Mr. Joseph when last seen was near the front of the car. The passengers were dashed violently about and received more or less injuries. Judge Burton was cut about the head and bled profusely.

Court Reporter Monaghan had both legs broken. Reporter Atkinson escaped with a broken rib, and the other passengers escaped serious injury, save Mr. Joseph. Fire broke out at both ends of the hind car, and the passengers had to be pulled out through the windows. It was taken for granted that all were out, and it was not until some time later that Mr. Joseph was found not to be among

the party. The two Pullmans were then burning flercely, and there was no possible way of rescuing the unfortunate man, who is supposed to have met his death there. The engineer of the local train was Charles Manvering, of Stratford. He was very severely injured, being squeezed between timbers. He was subsequently badly scalded, and with the ter-

rible shock to his system added, his re-

MIDDLESEX.

Margaret, relict of the late John Richardson, died the other day, aged 72. Born in North Shields, Eng., in 1823, her maiden name being McDonald, she was married there in 1845, and came to Canada about 1854, settling in Metcalfe, where she has ever since resided. She was a consistent member of the Methodist Church, but owing to deafness had not heard a sermon for some 30 years. Nine years ago she suffered a very great loss in the leath of her husband. Four sons and one daughter are left to mourn her loss-James, of Kerwood; Wiliam, of Cairngorm; John, of Culloden; Robert

and Thomas, of Cairngorm; and Mrs. W. Dymond, of Metcalfe. Frank J. Hutchins, postmaster, of Parkhill, son of W. H. Hutchins, M.P., was married on Thursday to Miss Sadie Griffith, daughter of John Griffith, of Parkhill. The bride was attended by Miss Addie Gibbs; and Miss Wynnie Smith, daughter of Dr. Smith, of Mitch ell, acted as maid of honor. The groom was supported by Mr. Oscar Griffith, of Chicago, and Fred. H. Griffith, of London.

PETERBORO, Feb. 9.—Procrastination is not only the thief of time, but the cause of many serious illnesses and much severe suffering. It is particularly the cause of many forms of kidney disease. A slight pain in the back, frequent headaches, burning hands and feet, impaired eyesight, ravenous appetite and constant nervousness or weakness may be the precursors of a danger-ous kidney complaint, although thought little of by the sufferer. In all diseases of these organs it is most desirable to take advantage of the first warning. A MANUFACTURER SPEAKS.

An Independent Factory Owner on the Evils of High Taxation.

Trade Restriction an Evil to the Workers in Many Cases.

At the great trade freedom meeting in the Massey Hall, Toronto, Mr. Paterson, M. P. for South Brant, and a well-known manufacturer, replied to the taunts of Dr. Montague, who asserted that Mr. Paterson should not oppose the policy of high taxation because it put money in his pocket. To the contentions of the Dunnville doctor Mr.

Paterson repied: "Dr. Montague said that I was a manufacturer - that I make biscuits, and jellies, and jams. He did not mention the other lines of my business. I suppose I have no reason to find fault with that, as he charged nothing for the advertisement. But when a man refers to a person's business, especially if that is done in a tone of contempt, I think he must be a little angry. The doctor alleged that I was a protectionist, because, he declared, that I had asked for more duty on biscuits, and that under the National Policy I had trebled my business at Brantford, and put up another factory at Belleville, 'and that,' he says, 'is the man who criticizes my speech.' Well, now, I only repeat these things-these personal matters do not concern you at all, but I only allude to them to give you one thought to take home with you. I do net admit that I am so rich as the doctor makes out. It is not a case for libel, though, because if a man makes you out richer than you are it does not hurt your credit. Take it for granted that the doctor believes whe he says, that the National Policy ha, made a rich man of me-mind, no energy or any ability that I may have is to be taken into account, or the skill of my co-workers in the factory, the artizans, the heads of the departments, the representatives on the road coming into contact with the public, pushing their part of the business. All this seems to have

no weight with him. I mention that be-cause I hold that there is not a successful business man in this country conducting any large business whose suc-cess is due to himself alone and to the ability which he has got. It is the men that surround him, the skilled help that he has got, the faithful employes with him. (Applause.) The general on the battle field commands more promi-

for the courage and steadfastness of those men to whom he gives the order to advance, and who, being called to do their duty, and knowing it do it. So it is in reference to any successful busido their duty, and knowing it do it. So it is in reference to any successful business enterprise that is carried on. But, sir, the doctor makes ? allowance for that. The National Policy, he says, has made me wealthy, has trebled my business at Brantford, built me another factory at Belleville, and so on. Take it that way, the point I want you to take home is this: Believe the doctor that I have been made rich by an act of Parliament which his Government passed, and which is on the stat-

ment passed, and which is on the statment passed, and which is on the ute book. Has it made you rich? (Applause.) I hope it has. I hope it has made every man here present rich. But if it has not, and if you should chance to know someone who instead of being if it has not, and if you should chance to know someone who, instead of being as well off now as he was when it was introduced, is not so well off, what I want you to consider when you go home is whether the law passed by the Tory Government and placed on the statute book that made Paterson rich has made you not rich or some of you even poorer you not rich or some of you even poorer than you were before; whether this is a just law or not, and one that should be continued. (Applause.) I am glad that the doctor has singled me out, because it enabled me to put the ques-

that the doctor has singled me out, because it enabled me to put the question in that way, dealing with myself personally without being offensive to anyone else. Think that question over when you go home. If there happen to be any farmers in the room you perhaps will ask yourselves the question whether it is a just law that put up another factory for Paterson i. Telleville, which, by the way, it did not do. We have a business in Brantford and Belleville, and I had them both be fore the National Policy came in, br., believing that what the doctor said was true, and that it has put up another factory in Brantford, and another in Belleville, has it put up any barn for you, bought

has it put up any barn for you, bought another farm for you or raised the price of your land, and if not, why not? Have no rights in this country to be conserved and advanced by the Government? Has not every man the same right? We stand on an equal footing in this country, and the Government has to do equal justice to all. Should they be there when they passed a law that has made me rich and made others rich, while it has failed to enrich the community? It is an unjust law, and it ought to be repealed. (A Voice—"Good boy, Billy," and cheers.)

New Is the Time.

The benefit to be derived from a good medicine in the early spring is undoubted, but many people neglect taking any until the approach of warmer weather, when they wilt like a tender flower in the het sun. Something must be done to purify the blood, overcome that tired feeling and give necessary strength. Vacation is earnestly longed for, but many weeks, perhaps months, must elapse before rest can be indulged in. To impart strength and so give a feeling of health and vigor throughout the system, there is nothing equal to Hood's Sarsaparilla. It seems per-feetly adapted to evercome that prestration caused by change of season, climate or life, and while it tones and sustains the system it purifies and renovates the blood.

NO CLASS LAWS FOR LONDON.

The Montreal Gazette very foolishly falls into the trap set for it by a local contemporary, which contrasted the progress of four wards of this city in the days of the Hon. Alexander Mackenzie with the progress of six wards, that is, with East London added in 1886 and South London in 1891. We affirm that London and its suburbs grew more under a revenue tariff than under the high tax policy recently prevailing. The census returns, details of which regarding this city are mysteriously kept secret, prove this. Here they are: Population of London in 1871.....15,826

WHAT CANADA NEEDS.

One of the good results of the Young Liberal gathering was the speech de-livered by Mr. G. C. Gibbons, Q.C., of London. Mr. Gibbons is an able talker, and is thus deservedly popular with any audience he may happen to address .-Toronto Mail and Empire.

Probably the best point which Mr. Gibbons made was the proof he adduced that enormous deposits in the banks of a country are no guarantee that that country is prosperous. Mr. Gibbons was able to show that the disposition to hoard money in banks was a proof that business is not prosperous -that men are disinclined to invest their money under a condition of affairs that does not bring them safe returns. Trade restriction, Mr. Gibbons argued, had that effect everywhere, and such has been the experience in Canada.

With freedom to buy and to sell, no country in the world is today in a position to advance like Canada. The country is all right. Its resources are magnificent. Its agricultural, mining, forestry and manufacturing possibilities sail. are great. But we must have markets -the nearest possible markets, the best possible markets. How are they to be obtained? BAD AIR CAUSES COLDS. While the very cold weather lasts it is well to remember that sore throats and colds generally are more apt to be caused by bad indoor air rather than by severe outdoor weather. "Cold air," asserts a medical expert,"does not cause throat and lung diseases, but only bad air." The fact that there is a marked increase in these diseases during cold weather he fits to the theory by declaring that such disorders are produced, not by the cold air, but by the indoor life that accompanies the season. "An open fire in every living-room in every house," says another enthusiast on the same subject of ventilation, "would do more to lower the death rate from re-spiratory diseases than any other medi-cation or other existing remedial agen-steamer Elbe, are now at Aberdeen, where they are being examined by a commission of the board of trade. Those

heated rooms," pursues this critic, "particularly in apartments, usually reach a temperature of 80 degrees. This, I may say, is a mild statement. Any person living in such places endures this or greater heat until it becomes intolerable, and then throws open windows recklessly. The temperature is lowered too suddenly, a chill is sure to follow, and often serious mischief. Why not take the pains with our lives that a florist does with his plants? The air in a greenhouse is regulated by a thermometer and kept even and pure without a sudden chill or overheating. It is the high temperature and bad air of our homes that have made us a race of catarrhal wheezers, and not at all climatic conditions." Does not the experience of many of our readers confirm this view?

THE GENERAL ELECTION. Our local contemporary avers that it has been asked repeatedly for information as to the general elections; yet persistently withholds the same.-London

Free Press. Why this misrepresentation of the "Advertiser," neighbor? We have again and again said, on what we believe to be good authority, that the Dominion elections will take place before another session is held; that many Conservative M. P.s, knowing they cannot be re-elected, are clamoring for another session, but that the men in power at Ottawa, recognizing the troubles they would have to face during another session, are determined to force a dissolution, and take the "leap in the dark." This is our information. It matters not to us or to the large majority of the people of London and of the Dominion when the elections may come; the people are ready to decree in a far more decided way than in 1891 in favor of greater freedom to buy and sell, and in favor of honest and economical government. What we have said is that there is an inconvenient and a convenient time for holding electoral contests in a country like Canada. If the convenience of the mass of the population were to be consulted, for example, the election would not now be held till the beginning of June. But the exigencies of the high tax advocates are such that it may be decreed for the end of March or during April, a time of the year when in many parts of Canada, on account of the break-up of the roads, the farmers can with difficulty get around. In any case, however, we believe that the turn of the tide has come, and that the electors are ready for a change. They will not be deterred from so voting, even if difficulties are thrown in the way that men

HONORS FOR ANNA.

LONDON, Feb. 8.-Ex-Empress Frederick has invited Anna Bocker, the only woman saved from the Elbe, to visit Osborne next Monday to meet the Queen and herself.

BOYS FOR CANADA.

LONDON, Feb. 8 .-- Home Secretary Asquith has promised to consider favorably the request of a deputation that the qualifying age of training school boys who are sent to Canada be reduced. main argument of the deputation was that younger boys could be adapted more readily to the conditions of colonial life.

TWELVE MAJORITY.

LONDON, Feb. 8 .- Arthur Jeffreys (Con.) moved an amendment to the address in the Commons yesterday concerning the depression of agriculture and industry.

The Parnellites supported Mr. Jeff-

After the wreckage had been cleared away the Craithie steered back for Rotterdam.

ROYAL MATCH-MAKING. ROME, Feb. 8.-The United Press correspondent inquired at the Foreign Office as to the truth of the Giornale's statement that the Prince of Wales was coming here to arrange for the mar-riage of one of his daughters and the Prince of Naples. The Princess Maude of Wales was supposed to be the young woman in question. Nobody of the Foreign Office knew of the slightest ground for the Giornale's announcement, and members of the court circle are equally ignorant on the subject. At the Vatican also nothing was known of the reported arrangement outside the Giornale's statement. The story is generally discredited. It is supposed to have been made to fit the London dispatch saying that the Prince of Wales was coming to Italy.

The Tribuna has a London dispatch repeating that the Prince of Wales will meet the Prince of Naples in Florence next spring to arrange for the marriage of Princess Maude. Government and court officials regard this as merely an echo of the Giornale story.

HALIFAX, Feb. 8.—The following dispatch has been received from Ingosh, C. B.: Telegraph lines are down and are buried in the rocks for half a mile.

Twenty-two houses and shops were washed off the beach. Nothing was saved at Middlehead. All the fish stores were swept. At New Haven all the fish stores and dry goods stores are gone. These are the results

of Tuesday's storm. The place where the casualty occurred is a small settlement built on a narrow peninsua of rocks called "The Beach," which divides the sea from the harbor. The beach is very narrow, low, and exposed to the sea. The heavy sea washed completely over it, sweeping away

The party left about 2 o'clock for their respective homes, all very much pleased with their evening's outing. Much credit is due to the host and hostess.

-Sixteen young ladies, under the control of Miss Wallace, costumed in pink, blue, sea green, and yellow, four in each color, with shepherds' crooks for arms gave the empire drill last night at the Christian Endeavor concert in St. James Presbyterian lecture room. Mr. Mercer and Mr. Guise provided music for the young ladies, each performing on an autoharp and mouth organ. Miss C. Simon's recitations and Mr. J. Gilmour's vocal solos were also much appreciated. The whole entertainment was excellent.

-In managing a furnace there are a few

points that it is well to remember. In the first place, the house should be thoroughly warmed through, then an endeavor should be made to keep it at one temperature all the time. To do this a thermometer must be hung in the house. It is economy to fill the fire pot full of coal; if only a small amount is put in it soon burns out, and heat is lost in coaling up again and starting the fire afresh. Never poke the fire from the top. Keep the ashes and cinders out of the bottom of the grate and thus leave the air passage free. If your furnace draft is too strong, so overheating the house, let the ashes remain in the grate, clogging up the passage, but keep the ashpan empty. Ashes lessen the combustion. A coal fire is about the contrariest thing on earth, and you never gain anything by neglecting it. Tend to it carefully, methodically and with brains, and it will give you no trouble. > For some time past the present St. Matthew's Church building has been found to be too small to accommodate the growing congregation and for over a year there have been rumors of building. These rumors have at last assumed definite form by the purchase of two lots on Dundas street east, between Ontario and Quebec streets, just opposite the center of the fair grounds. In all probability the work will be gone on with in the spring. The change will bring the church nearer to the central portion of the East End and will attract many who don't care to go

away out to the present place of worship.

Wood, of Military street, an old colored man named Mann spent a could get from colored neighbors, almost as destitute as himself. When the thermometer dropped to . 24 below the other night the old man awoke in the morning to find one of his feet badly frost-bitten. Yesterday a kindhearted lady of Dufferin avenue sent him up a quarter of a cord of wood-the first fire he had had for one week. Later in the day a young man took him some coal and meat and bread and soup. He found the old man in his next door neighbor's place trying to get warm. His cwn hovel, where he was obliged to spent the night was a miserable abode. There were little drifts of snow on the floor and some even on the pillow of his makeshift bed. Clothes that ought to have been used ty keep him warm in bed were being used to fill up crevices and apertures through which the fine snow would persist in drifting. The old fellow says he is 107 years old and that he was born in Spain in 1788. He was for 60 years a slave in Kentucky, and came to Canada when the emancipation took place. He says that he applied for aid at different times from the city, and at last the inspectors threatened to send him to the "place on the hill" if he did not stay away. Inspector Bell

was asked about this this morning. "Why, I haven't seen him for twelve months," said that gentleman. And he probably had not, as the old man says he afraid to go again. Mr. Luttman, of the inspector's office ridicules the idea of the man being as old

as he claims, and said he was a "dead Mr. Mann says that the chief objection to giving him relief was that he was an

SKATING.

THOMAS GETS THE MEDAL, The final heat of the three-mile championship was skated last night at the Westminster Rink, and despite the storm there was a large crowd present to witness it. Bert Thomas won, Griffith second and Jarvis third. Crabb dropped out early in the race. The quartet lined up at 8:15, and when the word was given Griffith went ahead. He kept the lead for 34 laps, when Thomas passed him and won the race, both handicapping Jarvis. Griffith's endeavors to regain the lead were futile, owing to the position Jarvis held at the turn. The race was for the gold medal, which is a very handsome one. Thomas having won a previous heat is entitled to the prize. The time was 10:45-10 seconds faster than the time made last Friday, Feb. 1, and 20 seconds faster than the time of Friday, CURLING.

AT CAPE COD. BUZZARDS BAY, Mass., Feb. 8.-The blizzard from the south struck on Cape Cod with all its fury soon after midnight. At Buzzards Bay no storm for many years has done so much damage in so short a time, and the scene at the President's summer home, Gray Gables, this morning was wild. The water is within close proximity to the GALT, Feb. 8.—The curling match played estate. Immense cakes are seen nearly on

also in bad shape.

JERSEY CITY, N. J., Feb. 8.—Up to 1 o'clock this afternoon not a single Western or Southern train on the Pennsylvania Railway had arrived at this city.

A RECORD BREAKER. NEW YORK, Feb. 8.-According to E. B. Dunn, weather prophet, today's storm is worse than the famous blizzard of March 12-15, 1888, in three ways-wind, temperature and area, only in snow-fall was the storm of '88 greater than in today's. Mercury will probably go 10° below zero. The storm center is now east of Boston; wind west 70 miles an hour; foggy.

At Momment Beach the damage is extensive. At Binghamton, N. Y., the electric street railway system is paralyzed by the snow storm.

WORST IN TWENTY YEARS. EXETER, Feb. 8.—A regular northwest blizzard has been raging here all day with unabated fury, with the temperature about 3 degrees below zero. The roads will be badly blockaded by morning. The trains on the L. H. and B. Railway were from one to four hours late. It is the worst storm known here for over twenty years.

COLD WEATHER IN FLORIDA. JACKSONVILLE, Fla., Feb. 8. - Palm Beach, on the shore of Orange Lake, was the warmest place on the mainland of the United States this morning, the mercury registering 35° above zaro. Key West reports 54° above, and other points in Florida report from 28° to 14°. Orange trees are probably destroyed, also all vegetable crops and 500,000 quarts of strawberries just beginning to ripen. The loss will aggregate many millions of dollars. Tampa reports the mercury at 22° above at daybreak and snowing, which is unprecedented.

NO LET-UP. TORONTO, Feb. 8 .- The blizzard which has raged here all day shows but little signs at midnight of moderating. Nearly all trains leaving the city tonight had to be canceled, and the Peterboro local which did start got struck in between York and Scarboro and was obliged to return to the Union station. Snow banks are from eight to ten feet deep, and the cuttings are packed full.

No. 1 G. T. R. from Montreal, due here at 9:20 p.m., had not reached Kingston at 11 p.m., the engine having broken down. No. 2 from here for Montreal was canceled.

The crew lashed themselved to the rig ging and waited for help. The wind blew with terrific fury and in desperation at midnight four of the crew launched a dory in the hopes of reaching shore. The wind changed to the westward and the dory was lost to sight, and has not been heard from. Capt. Hapson and the remaining sailors fearing to stand by Harry Lenox, the wreck any longer decided, at 2 a.m., to launch another dery and attempt to reach the shore. After a desperate struggle with the heavy ice and intense cold and blinding spray they sighted the light of Fort Tomkins, and shortly after 6 a.m. managed to reach the shore.

LOST IN LAKE MICHIGAN. MILWAUKEE, Feb. 8,-Three men from the intake crib perished in Lake Michigan last night. They had just returned to the crib from shore with a load of provisions,

on these in an heroic effort to save their companions. Signals of distress were at once sounded, and in response a yawl boat with five volunteers was sent to the crib. The distress signals continued, and the fire boat Foley was later sent to the rescue. The names of the drowned are Gustave Stoyner, Chicago; James Brown, Port Huron, and Thomas Anderson, Milwaukee. The tug boat Foley, with the lifeboat and crew returned at 2 p.m. They reported that the yawl boat with the five volunteers sent to aid the first boat was rescued and the men saved after a hard fight in the ice.

HELLGATE SHUT. NEW YORK, Feb. 8.—Hellgate became impassable with ice this afternoon. There is no open water in the vicinity of City Island. Montreal Liberals Will Contest Every City Seat.

Big Liberal Gains on the East Bruce Voters' List.

WORKING LIKE BEAVERS. A Montreal dispatch says: The Libcity, and the Liberal Club will lend its assistance to every outside constitu-ency which seems in need of backing. It is encouraging the spread of Liberal clubs throughout the Province, and it will shortly be in a position to send speakers to outlying constituencies. As for the three city members, it can be said that they do not appear to have given satisfaction even to the Conservative party.

VICTORIA LIBERALS. COBOCONK, Feb. 8.-Taking into consideration the very severe storm. there was a fair representation at the Reform convention held here today, and great enthusiasm was manifested. Delegates were present from Fenelon Falls, Woodville, Kirkfield, Victoria Road and Kinmount. Dr. McKay, M.P.P., and others addressed the convention, but as the state of the roads had prevented the delegates from the north from being present it was decided to adjourn the convention, to meet in this place on the 22nd inst., when a candi-

date will be chosen.

The annual meeting of the East El-Tuesday, the 12th inst., but owing to smallpox being in the riding the executive have decided not to bill the meet-ing until all danger is past.

Two French Conservative members who would not allow their names to be used, but who share the views of Mr. Ouimet, stated that there would be a short session and the elections would follow. The present campaigning was being carried on to save its being done after the session.—Montreal Star. This statement is not generally believed.

SWORN IN.

ST. JOHNS, Nfld., Feb. 8.-The Whiteway Cabinet was sworn in today. The Cabinet is the same as before their resignation last spring, except that Emerson, formerly Speaker of the As-sembly, is on the executive council, vice Fox. It is practically a complete reinstatement of the Whiteway executive. The rout of the Goodridge-Morin Ministry is now complete.

GOOD ROADS ASSOCIATION. GOOD ROADS ASSOCIATION.

TORONTO, Feb. 8.—The Good Roads Association closed the convention this morning, after electing officers and passing a number of resolutions bearing on the necessity for legislation for the improvements of roads. The following were elected: President, Andrew Patwick Woodstock: first vice-president. I and while they were landing the boat without oars, was washed away with one of the men. Two of his companions tore doors from the crib and were also swept away

AFFORD?

To permit such an opportunity as the one we now offer to pass? You may let it pass, but that is no proof that you can afford to. We can scarcely afford to let our stock of fashionable Jackets and Ulsters pass out at the prices now in vogue, and we only do so in order that our big department will be cleaned out of this season's stock and be ready for the next. You see the point? We Can You Keep a Secret? would rather sacrifice the entire profit now than carry them over to next season. If you want to help us in this you can save yourself several dollars and secure one of the most fashionable and best made Jackets in London. The merit of our stock is known to all. Shoppers.

That they are getting not single value for their money, but double, and in some instances treble value. Instead of asking \$11 70 for some of our Ladies' Ulsters, we are now parting with them for \$3 90. You get the profit now and more. We want to clear out our entire stock of Mantles, Ulsters and Coats. The Ulsters going at \$3 90 have triple capes, circular capes and top frill, long capes, silk-lined hoods, and are all detachable. These capes will come in very handy for spring wear. There is more than \$3 90 worth of cloth, to say nothing of the making, etc. See them in the window. We have still left a few of these Jackets that many of our customers have been saving money on. Think of a Black Cloth Jacket at \$1 90, \$2 or \$2 75. But this is only a sample of what we are doing.

An Early-Morning Blaze at Markham, Ont.

Stable Fire. Two Hundred Lodgers Turned Out During a Blizzard-Two Firemen

Injured.

Ten Horses Cremated in a Livery

MARKHAM, Ont., Feb. 8 .- Early this morning fire broke out in the tailor shop of J. R. Hoover at Mountjoy, a suburb of Markham, consuming the building, contents and \$98 in cash. Loss, \$1,500, covered by insurance.

NEWBURGH, N. Y., Feb. 8.—Fire early this morning at Fishkill Landing destroyed Peattie Brothers' livery stables and carriage repository. Ten horses were burned to death. Loss, \$75,000. NEW YORK, Feb. 8.—Shortly after 1 o'clock this morning fire was discovered in a five-story factory building at Gansevoort and West streets, A blind-ing snowstorm was falling and the wind blowing a hurricane at the time. Next door to the factory is the Manhattan lodging house, in which 200 lodgers had gin Liberal-Conservative Association taken refuge from the blizzard. All was to have been held at Aylmer on escaped scantily clad, and made their way through the storm to Helena lodg-ing house, two blocks away. The hotel was not even scorched by the fire, but the loss to the occupants, and on the five-story building will amount to \$50,-

000. Two firemen were injured.
FISHKILL LANDING, N. Y., Feb. 8.
—Fire here this morning destroyed
Beatty Bros.' livery stable and carriage repository. Twenty horses perished in the flames. A block of the buildings adjoining the stable, with their contents, were also burned. Loss, \$100,000. DETROIT, Feb. 8.—Lake Erie and Detriot River Railroad station at Merlin, 61 miles from Walkerville, was destroyed by fire at 12 o'clock last night. The cause of the fire is unknown. Two freight cars, one loaded with salt, were caught by the flames and burned. The building was insured.

Mrs. Pope in Prison.

DETROIT. Mich., Feb. 8 .- Mrs. Pope na le life m serable to all the juil last night, All night long she kept the inmates of the jail awake with her shouting demanding to be supplied with "medicine." She wanted whisky, laudanum, morphine, quinine, in fact any stimulating drug that she could think of. Dr. Keifer had examined her yesterday and told the turnkey that she needed nothing, and was simply simulaat-ing sickness, consequently nothing was given her.

Pounding a felon is very different from compounding a felony.

SCHOOL CHILDREN FROZEN.

Many Perish in Oklahoma-Meagre Re

HENNESSY, Ok., Feb. 9 .- Two children are reported frozen to death while on their way home from school, eighteen miles north in the Strip. The driver of Lacey's stage reports the finding of the body of an unknown man several miles north of here. Reports from several points in the strip, many miles distant from here, where the suffering was most intense, are very meagre, but it is known there was much suffering any many have perished.

And Has Just Died-She Attended Lafayette's Ball.

COLUMBUS, Feb. 9. - Mrs. Margaret Cook, the last of the passengers on Robert Fulton's Ceermont, the first steamer, was buried yesterday. She was a descendant of the famous Diedrich Knickerbocker, and was a guest at the reception and ball given in honor of Lafayette at Albany. She preserved until the time of her death the dresses and jewels which she wore on that occasion.

Local Market. Reported by A. M. Hamilton & Son LONDON. Feb. 9.

weather—but that was about all up to 10 o'clock. Two or three of our regular vegetable growers, were the only arrivals of sellers. It was a complete blank till 11 o clock. The only thing to be seen was the empty square and knots of buyers gathered on the sheltered side of the building. The old heads say they never saw the like. The boys took things easy and had a good time bantering one another, but some of the serious fellows showed by their faces that they were short of stock, and didn't like their luck a little bit. Ten bags of oats sold at 88c; about a dozen hogs brought \$5 25. Even the beef men got rid of about two loads quick, and didn't have a chance to complain of slow sales. Poutry, butter and eggs had prices in their own hands. One or two sellers made their appearance and were pounced on by a swarm of buyers more numerous than the pounds, dozens or pairs. The plucky hay marketer did not tackle it, much to the surprise of everybody, for he always shows up. If we take it the roads must be awful to keep him home. C. P. R. Passengers Spend the Night in a Snowbank. While a Gang of 50 Men Dig Their

Train Out. Released This Afternoon - The Line

Blockaded But Now Open.

The Canadian Pacific last night and today felt the effects of the storm very severely. The line between London and Detroit has been kept open without any very great trouble, but between London and Woodstock a large cut was completely filled, and in consequence one train arrived in the city today eighteen hours behind time, another about 15, while a third was only

delayed three hours. About six miles this side of Woods stock (and very near Embro,) a long May, \$14 20 to \$14 20; spot steady, 16c to 24c, Dec., \$14 20 to \$14 30; spot steady, 16c to 24c, Buffalo, N. Y., Feb. 8.

OATS—Scarce: firm, Sales: 1 car No. 2 white, 36c, new billed; do, 35ic to 35ic, old billed; no offerings of other grades on track; No. 2 mixed, 33 1-2c asked in store. cut was drifted in. The local train from Toronto, due here at 8 o'clock last night, reached Woodstock considerably behind time. The through express, dut here at 11:40 p.m., passed the local and came on ahead. The drift, however, proved too much for the heavy train, and there she stuck. To back out was impossible. Word was sent back to Woodstock, and there the local had to stand all

night and this morning.

Before daylight this morning the company had a gang of 50 men, 4 engines and 2 snowplows at work in an endeavor to release the snowbound train. It was a FLOUR-Dull; unchanged.

TORONTO, Feb. 8.—There were 39 car loads of stuff on the western cattle markets today, which included 200 sheep and lambs and 700 hogs. All lines were firm and hogs were quite a bit stiffer before the close of the market. In butchers cattle, offerings were fairly heavy, but most of the stuff was sold before the close of the market. Good to choice cattle sold readily enough, but prices realized were not quotably higher than they were last market day. One or two picked cattle touched 3½c per lb. the general range being from 3c to 3½c per lb. the general range being from 3c to 3½c per lb mostly; poor and common cattle sold at from 2c to 21-2c per lb. In stockers and feeders, one or two head were picked up at 2½c per lb.

Hogs—Were active and firmer, the cold weather seeming to have given it considerable weather seeming to have given it considerable to eat, but the company's employes proved very obliging, and did everything they possibly sould to make us comfortable. The cars were kept very warm, and the only thing we longed for was

SARNIA DEFEATS FOREST CITY. The four rinks of the Forest City Curling Club that played at Sarnia yesterday met a regular Waterloo. The weather probably had something to do with it. The curlers turned out at 6 a,m. in a howling blizzard. At Sarnia the atmosphere was ten degrees below zero in the rink. The ice was rough and the snow was drifting through the roof. The Sarnia Club entertained the curlers handsomely, providing hot refreshments at the rink and a dinner at the Belchamber House. The curlers of Sarnia are excellent hosts. THE BALLOONIST'S BILL.

Discussed by the Hospital Trust-Proposal to Buy Hellmuth Ladies' College-The Hospital Full.

Mademoiselle Ruby Deveau, the young woman who made air voyages on a trapeze bar during the Western Fair, was a topic of discussion at the meeting of the Hospital Trust yesterday. She was confined in the hospital several weeks through injuries received by falling on a housetop, and the cost of her maintenance was about \$54. The trust thought the Fair Board should pay the

bill or part of it. Col. Lewis said the woman's employer should have settled it, but he didn't stay in London. The girl only got \$5 for each ascension. It was decided to ask the Fair Board

to pay one-half. Col. Lewis said that the Hellmuth ed chairman of the trust, it being the first meeting of the board. In compliance with the City Council's request, the estimates will be prepared as soon as possible.

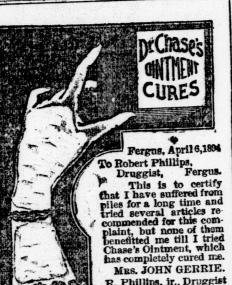

The question of a new hospital was brought up by Mr. Purdom, who thought it was time something was done. Col. Lewis said that the Hellmuth Ladies' College, with 125 acres of land, could be bought for \$25,000. Messrs. Complin and Purdom opposed moving from the city. Mayor Little thought no unavoidable expenditure should be

The Council will again be asked its intentions as to this matter.

There are 64 patients in the hospital -33 men, 29 women and 2 children. Owing to the cold weather the place is full. Receipts from paying patients in January were \$257 20.

"My six-year-old daughter, Bella, was afflicted with eczema for 24 months, the principal seat of eruption being behind her ears. I tried almost every remediy I saw advertised, bought innumerable medicines and soaps, and took the child to medical specialists in skin diseases, but without result. Finally, a week ago, I purchased a box of Dr. Chase's Ointment, and the first application showed the curative effect of the Remedy. We have used only one-sixth of the box, but the change is very marked; the eruption has all disappeared, and I can confidently say my child is cured.

best; Iar better than turning into a domestic phaeton and setting the world on fire. Seriously, my darling, this shall not happen again, if you will help me.

So ended their first quarrel, which Silence persisted was not a quarrel, but only a slight variety in opinion. And she did help him from that time forwards in many things from that time forward; in many things that might otherwise have been very painful to a proud man, very wearisome to a busy man. But she had a way of doing them ail, even the most humiliating, which took the sting out of them entirely. And when the money was obtained everybody paid, and the preparations control for their next day's journey to B and a grang Mrs. Jardine saton her boxes, which she had , young Mrs. packed with her own hands, looking pale and tired certainly, but with the cheerfullest of countenances. Her husband, too, went about whistling, "Oh, Nanna, wilt thou gang wi' me?" in which song, sung under his instruction as to accent, she had created quite a furore at several dinner

parties. "Evidently you do not wish to leave the flaunting town, and are anything but dis-gusted with the lowly cot and russet gown to which I am dooming you, "said he, lau hing. "So give me the song; even though our piano is gone, and our parlor locks any-thing but that 'bower of roses by Bendemer's stream,' to watch you are so often calling

my a tent: ... Sing, my bird!" She sat do and sung, clear as a bell and gay as a lark, the lovely old ditty. Her voice was her one perfectly beautiful possession. "except," as Roderick sometimes said,
"except her soul," of which it was the exponent. He listened to it with all his heart

in his eyes. "Do you remember, Silence, that first night at the Reyniers', when you sung 'My Queen?' And again—no, you could not remember that-the first Sunday when I heard you singing behind me, unseen, in Neu hatel Cathedral? It sounded like the voice of an angel-my good angel. And now I have her in my home, my own home, forever! And she is-only a woman, and has

got no wings,"
"Nor has mine either! He is—only a man; and I find out a new-shall I call it peculiarity?—in him every day. And worse he cannot sing at all; he can only whistle;

And then being a weak-minded woman at best, and also exceedingly tired, she stopped laughing and began crying, clinging passionately to her husband's breast.
"Oh, take care of me and I will take care

of you, as well as I can. We are very foolish; but we may help one another. Only love me, and then— No, whether you love me or not, I shall always love you."

"My darling!"

"But"—with the sun shining brightly through the summer shower—"since you do love me all will go well. We will fight the world together, and not be afraid. No"—tossing back her light curls (they were terribly unfashionable, and she had been urged to abolish them, but Roderick objected, and they remained)—"no!"—and a gleen that might have come from some gleam that might have come from some High and ancestress of both, fearless till death, and faithful till death, shone in Silence's eyes-'I am afraid of nothing, so

CHAPTER XI.

They were standing together, the young husband and wife, "at their ain door," in the long northern twilight, the midsummer twilight, beautiful as I have never seen it anywhere but in Scotland: cold, gloomy, rainy Scotland. But, as if Nature herself wished to be kind to the souls that loved her, and unto whom the world was just a little unkind, from the day they reached Blackhall there had set in an extraordinary

long spell of fair weather.

Already both were a good deal changed, the mysterious change which marriage makes to all, but to none so much as those who marry early. Already they had learned to forget themselves each in the other, with the hope of a long future in which to rub down opposing angels, striving to become heirs together of the kingdom of heaven" that kingdom of heaven which begins or

"How quiet everything is!" shesaid; "how plainly we can hear the burn singing down below—hear and not see—so that you cannot complain of the mill which has spoiled it so, nor grumble at the sins of your—our—mis guided great-grandfather!"

This was an impecunious Jardine of the last century, who had sold two acres of land half a mile below the house, on which was built a cotton-mill, now owned by Mr. Black, the factor, their only near neighbor, and the only person who had yet called on young Mrs. Jardine. He was an old bache or-there was no Mrs. Black to callwhich fact, remembering Mrs. Maclagan, was a great consolation to Roderick, who betrayed somewhat of a lurking dislike both of the mill and its master.

"Yes, Blackhall is very quiet," he answered, "especially after Richerden. You don't regret Richerden, though you are 'no longer dressed in- How does the line

By the way—it one dare name such a thing in the face of those glorious hills—did your new kitchen-range work well to-day?"

She laughed merrily.

"Yes, everything is beginning to work
well, after a good deal of trouble."

"I know that, my darling. Anybody less

A Year of Great and Unpre- Total cash income for 1893... 482,514 08 cedented Success.

The annual meeting of the North American Life was held at its head office, Toronto, on Jan. 29. The president, John L. Blaikie, Esq., was in the chair, and surrounded by a goodly number of prominent policy-holders and guarantors. The managing director, Mr.

Wm. McCabe, acted as secretary. The annual report submitted, after adverting to the intensity of the financial stringency which had characterized the year 1894, presented the following successful results: Applications were received for new insurance and restorations for over \$3,000,000, the amount ex-

eeding that of any former year. Entire satisfaction had been expressed by the holders of investment policies which had matured in 1894, and the report of the consulting actuary allocating the profits to those maturing in 1895 had been approved by the direc-

WILLIA'I McCABE, Managing Director. Audited and tound correct. JAMES CARLYLE, M.D.,

Auditor. Auditing Committee of the Board, EDWARD GALLEY, JAMES SCOTT. The report of Mr. W. T. Standen, of

New York, the company's consulting ctuary, was very full. Referring to the very c reful investigation which he had ma e of the company's methods and systems of business, he declared that that investigation had conclusively proven to him the very great degree of executive and administrative capacity brought to bear by the officers of the company. The secret of the company's prosperity must be found by looking back to 1881, the success achieved since, being the logical result of the strong and enduring foundation then laid. He further said: "In view of the serious depression in business circles during the past two years, your increase in premium income is very noteworthy, and will be found to be very unusual. The increase of \$63,859 65 in premium income for 1894 evidences the adaptability of your agency staff, and proves that it consists of men of vigor and intelligence, who know how to apply their energies

with the best effect. Your gain in interest receipts speaks well for the judiciousness of your investments. The comparatively high rates of interest obtainable is something for which the holders of your deferred dividend policies may be pro-

foundly grateful. "The valuation of your assets and the determination of your liabilities have been conducted conservatively, and they show a clear surplus of \$338,-216 75. This surplus fund shows beyond any question the absolute securty you are enabled to offer to policyholders during even the severest of monetary depression. The profits you are in a position to earn is very largely in excess of what can be earned by companies debarred from privileges of being able to invest their assets in Canadian securities.

"Policy-holders are often carried away by the size or age of & life company. The crucial test is the ratio of assets to total liabilities. Next in order of importance, probably, stands the surplus and surplus-earning power of a company.

"With assets held down to a rigid gold basis, you nevertheless cover every liability and have a large margin of safety over and above every requirement.

"Undoubtedly the North American Life Assurance Company has attained that degree of solidity which can best be understood by comparison with any of the large companies. In all essentials -especially those of acquiring surplus and surplus-earning power-it is not excelled today by any other company.

"Insurers are too apt to overlook these requisites and give undue importance to mere age and size, which, unsupported by other valuable considerations, really count for nothing. Il-lustrations of this can be seen today in the United States, where many of the smaller companies, although forced into competition with their larger rivals, are giving much better and more satisfactory returns to their policyholders than many of the larger com-

"Stupendous assets are offset by cor-respondingly large liabilities. In the balance sheet they do not add strength the test of which, in well established companies, is the true ratio of re-sources of assets to liabilities, which is absolutely independent of the question

The adoption of the report and bal-ance sheet was moved by Mr. John L. Blaikie, president, who had no doubt that they would be heartily approved, as, in all the vital particulars which indicate solid success, they marked grati-fying progress, as shown by the fol-

Increase (18 per cent.)....\$ 285,664 49 These large increases are all the more gratifying when we consider the duli times, experienced by so many, and the keenness of competition for business. They cannot fail to convince any thoughtful and intelligent student that not only is ample provision being made by the company for every contract, but that a large surplus is being built up, out of which alone profits for policy-

holders can come. A comparison of the business of the company at the close of 1894 with what it was five years ago showed an increase in payments to policy-holders of 123 per cent; in insurance in force, of 60 per cent; in cash income, of 91 per cent; in assets, of 143 per cent, and in surplus, of 374 per cent. Thus while the assets have increased about one and a half

fold, the surplus has increased fourfold. The more closely any person scrutinizes the figures of all the life insurance companies doing business in the Dominion of Canada, with a view to ascertain which can do the best for the insurers, the more he will be convinced orth American Life stands

The vice-president, Hon. G. W. Allan, seconding the resolution, said that he fully indorsed every remark of the chairman as to the progress of the company and the solid position it had attained, and as a Canadian institution we could all look forward with perfect confidence to its increased growth and future prosperity. The motion was unanimously carried.

Owing to the absence, through illness, of the chairman of the finance committee, his able and comprehensive report on the satisfactory position of the investments of the company was read by the Hon. G. W. Allan, who further said: "I should like to be permitted to add to what has been said with regard to our mortgage investments Perhaps I may claim to speak, with the advantage of experience, having been connected as a director and president with loan companies for over 30 years. have taken a good deal of interest in the subejct as a member of the board of directors of this company; and I can say without hesitation to our policyholders and others, that I doubt very much if there is any other company in the country whose securities are of so high a character as those held by the North American Life. They have been selected with great judgment, and we have the advantage of a man of very large experience in Mr. Galley, who exercises great care in reporting on all properties offered to us for loans.

James Thorburn, M.D., presented his full and interesting annual report on the mortality experience of the company, after which Mr. J. K. Kerr, Q.C., moved a vote of thanks to the medical director for the able manner in which he had conduted the affairs of the medical department. This was seconded by Sir Frank Smith, who expressed confidence in the future of the company and his satisfaction at the excellent financial result of the past year's work.

Hearty votes of thanks were tendered the board, officers and agents of the company, and at a subsequent meet-ing of the newly elected board, Mr. John L. Blaikie was unanimously reelected president, and Hon. G. W. Allan and J. K. Kerr, Q.C., vice-presidents.

NORTH AMERICAN LIFE. As will be seen by the annual report in another column this leading Canadian company not only held its own during 1894, but made very considerable advances in those most important departments which concern the policy holder. The new business received was over \$3,000,000, being the largest in the history of the company. Notwithstanding the procurement of this large volume of new business, and the payment to policy holders of death claims, matured endowments, profits, etc., of the large sum of \$133,426, it increased its reserve and surplus funds for policy holders by about \$284,000. The report shows evidence of progress, and financial solidity despite the financial depression that has prevailed throughout all the countries of the world. From the comparison made of the figancial position five years ago, and that of today, it appears, the assets now amount to almost \$2,000,000, being an increase during the period referred to of over 143 per cent. A matter of great interest to the holders of policies in the company is the large amount of net surplus accumulated for their benefit, which now figures up over \$338,000, being an increase of 374 per cent over the surplus five years ago. The report and the speeches of those present, especially that of President Blaikie, are well worthy of careful perusal.

The annual meeting of the Steam Boiler and Plate Glass Insurance Company of Canada was held at its offices on Tuesday, Feb. 5, at 3 o'clock p.m. The directors submitted the report of the business transacted during the year, which was satisfactory to the shareholders, the business in both branches showing steady progress. The company sustained no loss in the steam boiler branch of its business, which fact is largely owing to the efficiency of its staff of trained inspectors, who make regular periodical inspections of all boilers insured by the company. The paid-up capital of the company has been increased to \$40,100, and its powers enlarged by act of Parliament. The following gentlemen now constitute the board of directors, which has been increased from five to nine: E. Jones Parke, Q.C., F. A. Fitz-gerald, Hon. David Mills, T. H. Concert at St. James' Church School. Last evening a concert was held in St. James' Church school room in aid of the choir. Spite the fary of the elements and the intense cold many lovers of music were present, the room being well filled. Mr. Hungerford (church warden) presided. The following programme was admirably carried out, the glees and recitations being particularly popular: Piano solo, Miss Holmes; song, "Answer," Mr. Develin; recitation,
"The Christians to the Lions," Miss Love; violin solo, Miss Webb; glee, "Hush Thee, My Baby," Misses Weld, Emery, Hungerford, Farncombe and Fenwick. Messrs. Farncombe, Tancock and Wilson song, "For All Eternity," Mr. Tancock, accompanied by violin, Miss Webb, encored; song, Miss Chadwick, encored; dust, two planos, Misses Chadwick and Morphy; glee, "Good Night, Thou Beam of Light"; song, "Tomorrow Will be Friday," Mr. Tancock; song, "My Lover Will Come Today," Mr. Wilson; song, "Beauties' Eyes," Mrs. Hint, encored; recitation, "Mice at Play," Miss Love, encored; song, "Past and Future," Mr. Develin, encored; song, "Ave Maria," with piano, organ and willing accompanies. violin accompanists, Miss Chadwick. The concert will be shortly repeated; the date will be advertised.

Adulteration means poison and weakness. Only Price's Cream Baking Powder is absolutely pure.

CRAZED BY GRIP. BUFFALO, N. Y., Feb. 8.-Miss Nellie A. Cutter, the beautiful 22-yearold daughter of Mr. Charles Cutter, of East Aurora, left her bed while demented from the grip last night, and, attired only in her nightdress, with a shawl over her shoulders, walked to the mill stream near the village and plunged through a hole made by ice-cutters. The body was found today.
