As the allied columns debouched into the plain of Jandreville, they could see the enemy in two lines, the first occupying a sort of table-land, the surface of which was varied by gentle undulations and dotted with green clumps and coppices, and the second supporting it, a little in the rear.

"The enemy's left," says his biographer, "being planted in rear of a morass, though safe from all direct attacks upon itself, was necessarily immovable, at least for offensive purposes. The right, again, if the brigade posted at Tavieres be so considered, was too much detached either to give or receive support; while the whole line, being formed upon the arc of a semicircle. was liable at all points to be assaulted in superior numbers, by a force manœuvring along the chord. It was per fectly evident, too, that the heights on which the Tomb of Ottomond stands formed the master-key of the position; for were these once carried, the assailants would not only uncover the flank of the cavalry, but be able to enfilade all the posts to the left. To this great object, therefore, Marlborough directed his attention, and the measures which W. E. Ashman, Geo. These drew up in line on the right of the allied force, with a steadiness which furnished proof of their discipline and valor, and which had the effect of striking a panic into the enemy, who wheeled about and fled to the rear; and then the ridge surmounted by the Tomb of Ottomondthe great object of the struggle-was

The village of Ramillies was mean while as bravely assailed as it was defended. The attacking corps, under General Schultz, drove in some battalions of Swiss, and gradually fought their way among the houses. They then rushed with the bayonet upon the troops who occupied the hedges and barricades, and soon made themselves masters of the place, Rallying two regiments of Cologne Guards, the Marquis de Maffie maintained a useless but resolute struggle in a hollow way or oad beneath the village, till, outflanked, and overborne by numbers, his corps gave way, and by the cavalry were destroyed almost to a man.

The French were completely defeated on their right and in the centre, but not without causing severe loss and confusion among the victors. Marlborough made a halt to restore order in his brigades, and of this halt Villeroi hastened to take advantage, by forming a second line out of the rains of his army; but this attempted formation was cumbered by masses of baggage and store wagons, and bat horses, and hence proved futile.

The allied trumpets once more sounded the advance; again the cavalry charged, and in five minutes the whole plain was covered with wounded writhing in agony, with dead men and riderless horses, and with fugitives flying for their lives.

Perceiving the enemy recoiling, one column effected a passage through the morass, and took the village of Autre Eglise: another captured that of On seeing this, Marshal Villeroi be- Offuz, which they found abandoned; came alarmed for the safety of his left and, in a word, the battle which had flank, and withdrawing in haste from lasted without, intermission for five his centre, sent several brigades to support the point that seemed in peril. MR. SOUTTAR'S DEFINITIONS OF EXISTING PROBLEMS.

Work. Robinson Souttar, an English labor leader, who was a candidate for Parliadist Church. He protested against the use of the term "English pauper labor" by American politicians and news-

THE LABOR MOVEMENT.

"The present labor movement is twosided," continued the speaker, "corres ponding to the artisan and the agricultural classes. Wheat growing is no longer profitable in England. The great fields of the west can raise and ship grain across the ocean for less money than it costs the English farmer to much English land does not pay to cultivate for the market it can afford an ample living to occupiers of the soil.

#### THE OTTAWA AND PARRY SOUND RAILWAY

LADIES AND GENTLEMEN;

OTTAWA, DECEMBER 17TH, 1892.

I address you, as freeholders of Ottawa whose votes will decide whether the Ottawa and Parry Sound Railway Bonus Bylaw is carried or rejected. The road will be practically an Air Line between the City and Parry Sound, on Georgian Bay, a distance of 300 miles. For one hundred miles it passes through an old and well settled country, and will touch the important villages of Carp, Kinburn, Galetta, Amprior, Renfrew, Eganville, Killain every respect a grand success, sur- loe and others. The next one hundred and fifty miles will be part through pine wooded land, and the balance, about passing the most sanguine expectations fifty miles, is a magnificent stretch of hard-wooded land, all being suitable for settlement and agricultural purposes. of both officers and committee of that The road will pass in the midst of a number of lakes, and adjacent streams of large capacity, where towns may be built and mills and other manufacturies may be established tributary to Ottawa,

The first point a ratepayer will consider in deciding for or against the bylaw is, what it is going to cost 100, was recently in New York. He white and blue, such as "God Save the him; the second, what he is going to get for his money.

As regards the first. I wish to point out:

That the conversion of the city's 6 per cent. debentures, (falling due next year and in 1895 and 1896,) into 44 per cent. debentures (the price at which Ottawa City Debentures are now saleable) is going to reduce the interest debt of the city upwards of \$15,000 a year.

That the rates of the City cannot be increased beyond the present rate. Bonus or no bonus. The law less across the water, but food ly two hundred were present. The fixes it at 1½ cents; it is 1½ cents and it cannot be more than 1½ cents. In any case the Railway Bonus would not increase it. That is a fixed fact and unalterable.

> The above figures are not mine; they are taken from the official statement furnished by Mr. Lindsay, the City Accountant, and are unassailable.

As regards the 2nd question, I respectfully submit:

That the passage of the Ottawa and Parry Sound Railway By-law will enable the railway to build its workshops here. Ottawa has always labored under the disadvantage of stoppage of work at the mills in the long winter months. The cessation of regular wages, to the amount of half a million of money, means less money in circulation things which our worthy Brother, R. less money for the shop-keeper, for the merchant, for every man, woman and child in the City. Every industry, on A. Jones, ably assisted by his son and the other hand, that gives employment to the industrial population thrown out by the stoppage of winter work means daughter, had so liberally provided for so much more money than before put into general circulation; the effect of which is immediately felt by every family the inner man. After that portion of in the City in increased employment, more money and easier burdens.

If this Ottawa and Parry Sound Railway Bonus is passed, it means work all the year round for hundreds of President, Bro. Tyler, called on our hands in our own workshops and yards, an annual expenditure of at least \$350,000 in wages alone, not counting esteemed Bro. Capt. Denison, of Lodge supplies, more money to pay taxes, distributing the burden of taxation among more contributors to the municipal funds, and a general quickening of municipal and industrial life.

> It must not be forgotten that the building of a station at the Canal Basin will be a great benefit to all parts of the city, particularly the eastern portion, and will not interfere with the Chaudiere Station, as the latter must always be the shipping point for lumber and all the products of manufacturies at the Chaudiere and Hull.

It is also my intention to erect car works here, to build our own cars and subsequently for other roads.

These benefits are immediate and positive and flow inevitably from the passage of the bylaw as surely as

There are other benefits, and they are many. There will be 30 stations between Ottawa and Parry Sound, when this Ottawa and Parry Sound Railway is built. Every one of these stations means trade, industries and con-D. D. G. President, Adderson. who expressed himself as very much pleased to see that his efforts in the way of

Another effect of the new railway will be to bring back to Ottawa's merchants and traders, and residents and hoped they would continue; from generally the benefits of the former trade of Ottawa in supplyin the extensive regions through which it passes.

Bro. Parnell, of Lodge Trafalgar, Ald-

And did you ever think what a distributing point on a through line of railway means? When this Ottawa and Parry Sound Railway is built Ottawa can be made a great grain distributing centre. The erection of wheat elevators employing large numbers of hands all the year round wi! necessarily follow, unless the trade is driven elsewhere by Ottawa refusing her aid. I see no reason why with the great water power here, Ottawa should not become a second Minneapolis, and a great industry be created in grinding wheat in transit.

Chicago is a great city to-day because it is a railway centre and distributing point; so is Buffalo, and Detroit, In a parliamentary investigation into the great Scotch railway strike it was no unusual thing for men to work fourteen, six
SLAVERY.

Company occurred and distributing point; so is Buffalo, and Detroit, and Toronto and Montreal. What would Ogdensburg be to-day without her railway facilities? These places are all railway points on Western through routes, and precisely the same class of business that has built up these cities is what the P.S. R'y will bring to Ottawa, when it is built. What is the mileage from the train growing the brethren, with a song, "The Ghost thing for men to work fourteen, six
of the Unfortunate Spiritualist Prof.

Chicago to New York, via Buffalo is 1,344 miles. Duluth to New York, via Buffalo is 1,452 miles.

(These are the best and shortest United States routes.)

Now see what the mileage by our own Ottawa Road will be.

Chicago to Montreal, via P. S. R'y-880 miles Duluth to Montreal, via P. S. R'y-955 miles.

Trade always follows the shortest routes. It must do so. It is a question of dollars and cents. No sooner will the new railway be running than it cannot help having at once all the through business it can handle. Not a pound of this but must come through Ottawa, pay tribute to Ottawa, give employment to citizens evils as these, strikes entail untold for his esteemed daughter, the singing of Ottawa and leave some of its value behind in Ottawa.

I hope these reasons will be considered satisfactory and will induce you to endorse the railway by recording a year afterward employers are back in not the best, meeting ever held in your vote in favor of the Ottawa and Parry Sound Railway Bonus on the 2nd of January.

Doubts have been expressed whether the workshops and station will really be built. I hardly think the people of Ottawa will credit such statements. I hope I may without impropriety refer to the fact that I was instrumental in getting the Canada Atlantic Railway to Ottawa, and in building the Coteau bridge. Last spring, I promised the people of Arnprior if they voted me a bonus I would give them railway accommodation within 18 months. The road was commenced in August last, and the rails will be laid and the cars running by the 15th of January. What I have promised Ottawa in case the Ottawa and Parry Sound Railway Bonus By-law is carried, will be as faithfully carried

The Governments, Federal and Provincial, made no grant for the first 60 miles of the eastern end of this road, i. e., from Ottawa to Renfrew, and I am unable to complete this great undertaking without aid.

The road passes through the best farming land in the Dominion, and consequently the right of way was very expensive, and the approach to the city especially so, as every one who takes the trouble to walk over it will understand; and the bridges, including the overhead crossings of the St. L. and O. and the C.P.R. will cost \$180,000.

I am carrying out this enterprise single handed. It has been said that other corporations are connected with me. I wish to say now for the information of the public that positively no corporation or monied institution is in any way connected with the road, and if I had been able to secure the usual subsidy for the first 60 miles of the eastern way connected with the road, and it i had been able to state the state and it is a section, which I think I should have received, I would not have asked the citizens of Ottawa for one dollar. But as I was not able to obtain the grant, I have to appeal to my fellow-citizens for a helping hand. As the city will be so greatly aided and benefited by the road, I think I am justified in asking aid and assistance, and in hoping that the appeal will not be made in vain.

In concluding, I may call the attention of the citizens of Ottawa fo the fact that a great and pressing need of diversified manufactures, giving employment all the year round, is felt here with increasing severity. Ottawa will not always be the great lumber centre it now is. As the lumber industry decreases, other industries should be created in their place. Owing to the great natural advantages of the capital and the cheap power available, Ottawa only needs increased railway facilities to become the seat of diversified manufacturing industries, giving employment to large bodies of labor, skilled and unskilled. But without increased railway facilities, the gifts nature has bestowed with so lavish a hand will lie stagnant, useless and undeveloped.

I need hardly recall to your memory how many promising western towns have lost their manufacturing enteres through lack of railway facilities. Almonte is a case in point. It will be remembered that the Edison Electric Works were to have been established there, but on the management finding Almonte was reached by only one railway was decided to go to Peterborough, where the competition of two roads ensured lower freight rates

I hope that on the 2nd of January every freeholder in the city will go to the polls and help his fellow-citizen to carry this great work to a successful conclusion, by recording his vote for the Ottawa and Parry Sound Railway By-

Trusting you may be among those who will be found on the side of Ottawa's progress and prosperity on that

I remain, yours respectfully,

J. R. BOOTH.

O. E. B. S. is at last making, as one of the most reasoning signs of the present general and it is impossible for any man to become and remain a tent member of the Order with out benefit to every fibre of his physical and moral nature. No man can be a true S. O. E. and at the same time lead a vicious, idle and profitless life. He must be a useful and valuable member of society. He gets the help that comes from worthy associations; the atmosphere of the lodge room is purity itself. Everything he hears, everything he is taught, everything he does, within the Order, is conducive to his own and the general good. The expansion and increase of such an organization is, consequently, not merely an individual, but a public gain. The whole the Order. The very marrow and estion; and those members who live up throw their weight on the side of the to its simple and purer precepts are as certain, humanly speaking, of a well spent year, as weak and fallible men can be. Let us devote ourselves with renewed earnestness and vigor to the duties we have cheerfully taken upon us to perform. So doing, we may be sure that when the end of 1893 comes around, we shall look back on a year well spent, with quiet consciences, fresh strength, and a sense of duty faithfully accomplished.

With these sentiments animating us, we are ready to take up our labors afresh, and we sum up every desire for your temporal and eternal welfare by wishing one and all

Elections in this country have been run,too long for party and too little for principle. Boodling has become an established system. Whole communiestablished system. Whole communities have been corrupted by successive governments with bribes of one sort or another, not temporarily or for an emergency, but as a regular thing. Englishmen in Canada can do a great deal towards remedying the evil by working resolutely against such practices and the men who resort to them. When both parties are found to be tarred with the same brush, the English element should whenever possible put up an independent candidate of unimpeachable character, with the assurance that the best blood in the community would rally around their assurance that the best blood in the community would rally around their man and very likely elect him. Sir,-Water does not run up hill, naturally, but we must have water, so now we make it run up hill almost everywhere. The mere fact of having prices and make our purchases for our to do this necessary act to meet the requirements of our civilization may reasonably be claimed as the first cause of the whole mechanical development of the present day. Of course it was easy hand, and so long as it was merely re viduals, most probably of that order who use little for ablutionary purposes, there was small development or moral progress, and one generation followed another for ages in the old rut.

Now, we may draw a parallel to this state of affairs in regard to Canada's of Sir William Neville Abdy, recently trade relations with the United States petitioned the Divocre Court to grant and Great Britain. In this case the same distortion of the bodies at the time of death, the bowels absolutely torn out, without any attempt at what is technically known as drawing; then the whole are probably jammed in and crushed together in packing cases holding hundreds of pounds, the packers relying upon Jack Frost to prevent any undue heating. In those great cities there would be no purchasers for such produce. This sort of thing does for the Yankees; they are used to it and know no better; but they can in some sections, if they go into it, grow turkeys, geese and chickens cheaper than we. So now an attempt has been made to close the United States to us, we must seek trade in other quarters and prepare our produce by methods suit- years of age, desiring to join Class B, may do so able to the requirements of those markets.

The day is about come when Canada must go into the raising of produce on a large scale for export; that is, if she is ever to fill the proud destiny we who are optimistic are fond of laying out for her. cent. of Britain's import trade was not a matter to be sneezed at, even as it is, There is one thing certain, that as the United States get settled up they will require less and less from Canada, tariff or no tariff, as they can produce all that we do within their own limits, while they can sell to us much that we require that climatic conditions will never enable us to grow. The markets of the world, then, surely should be the object of our research, in order that we

Again, let us remember distance will not affect our trade. Shippers only deliver free aboard cars; the cost of the freight is paid by the purchaser, whether in New York or Najasaki, so freight smould be no drawback. And in this connection we must always remember that freight rates by water will not exceed

ONE-EIGHTH OF THE COST of the transit by rail, so that in purchasing the products of warmer climes we must necessarily obtain them from the West Indies at far less cost than from the most southern of the United States, though the latter are, from a geographical point of view, so much nearer to hand.

An Interesting Account Given by Domin-ton Immigration Agent Webster of his Experiences in Nebraska and Dakota.

Winnipeg, Dec. 17.-W. A. #### THE ANNEXATION CORPSE.

ATTEMPTS TO RESURRECT A DEAD ISSUE.

The "Issue" Finding its way into Young Men's Bebating Societies - A Sample Bebate - Facts that English-Canadians better Make Themselves acquainted

The attempt of a small Toronto clique, in the pay of Washington wirepullers, to resurrect the annexation corpse in British North America, has set half the debating societies in the country going with renewed vigor. There was a dearth of subjects, and the old issue galvanized into a semblance of life again, has proved a perfect godsend to the youthful orators of the land. One of the best debates of the kind that has come under our notice took place at the rooms of the Y. M. C. A. in Ottawa. Particular pains appear to have been taken to ensure a good debate, and young Ottawa was all stirred up about it.

A large number of strangers were present, not a few of whom gave unmistakeable evidence of annexation and independence sentiment. The debate was on the resolution, "That annexation would be beneficial to Canada?", Mr. W. A. Code led the affirmative, and Mr. G. H. Wilson the negative. Mr. G. H. Bradbury, president of the debating society, occupied the chair, and decided the debate on the 'points" raised.

THE CASE FOR ANNEXATION. Mr. Code, for the affirmative, made a clever address on the material at his hand, but he lacked sufficient facts and sound, forcible arguments to win. His principal contention was that the United States, being a live, progressive people, Canadians becoming part of the United States system, would share in the alleged general prosperity. He appealed for annexation on the ground that Canadians and Yankees, springing from one stock, and having many interests in common, should have politi- which will be of the gun-boat order, on cal union. Nature, he said, never in- the ground that the Canadian governtended the continent to be divided up into different nationalities.

THE CHAMPION OF THE NEGATIVE. Mr. Wilson, for the negative, claimed annexation would not benefit Canada, asmuch as if we became part of the rannical, grasping and ruinous mon-olies, which, according to Gen. The chairman decided that the affirmative had not made what he considered a point and gave the debate to the negative.

After the debate proper the discusfion was thrown open and a number took part. Several spoke in favor of annexation much on the same lines as Mr. Code; others favored Canadian indepence, while others still advocated Imperial Federation.

One speaker said that Canadians might talk as they liked of annexation but if it ever came to it, Great Britain which is keeping its eyes open, would step in and put a veto on the movement. Her people would not consent to lose this great country with its Atlantic and Pacific coasts, naval stations and its short cut highway to India, for use in case of war.

We have received the following from P. D. D. Bro. W. E. Pethick, Sec. of Wellington Lodge, Bowmansville:-A new lodge of the Sons of England Benevolent Society was instituted on Friday, Dec. 16th, at Newtonville, with 21 charter members, by D. D. P., W. Edmett, of Port Perry, assisted by acting Grand Vice-President; Bro. Hy. Bro. A. Roland, Whitby, acting assistant secretary, and Bro. J. N. Kivell, acting S. G. Chaplain, Bowmanville.

This ledge will be known as Lodge Tennyson, No. 166. \* The officers are: en, V.-President; John W. Bradley, secretary; Philip Edwards, treasurer; Rev. R. T. Courtice, chaplain; Dr. Aldaging Committee-Messrs. Geo. Hancock, Geo. Mitchell, Geo. Payne, Geo. Stapleton, Jno. Wade, Jared Woods. Portland, Me., Dec. 20.—The Allan Walter Millson, I.G., Walter Bassett, O.G. The lodge will meet in the Orange month.

After the beautiful ceremony of dedicating the lodge and business being sent to a banquet, which was prepared the Atlantic is not over \$20 each. It is great credit to them. After the tables understood that the Dominion line has were cleared, the President took the tions, etc., were enjoyed until the wee sma' hours.

This Lodge has great prospects before it, and will, before the charter next meeting, and about eighteen to deposit their cards.

I might say that any reader of the Anglo-Saxon who may be near Newtonville, to give the Lodge a visit, as I am sure all who do so, will be well repaid for their trouble.

The President is in the right place when in the chair. There were visitors from Whitby, Bowmanville, Newcastle, Orono and Port Hope.

on wheat should be reintroduced.

The currency question appears to be acting the part of the Old Man of the Sea to various industries, though to none with more fatal consequences than to agriculture. What the world wants as a starting point from which to develop business transactions of all kinds is a standard of currency which will not change in value in relation to commodities generally, as the standard employed by the European nations has changed during the last two decades. It is a question which, though affecting every one, must be left to a committee of experts."

Protection Needed for the Poorer Classes of Farmers who come into the Country Without Capital — Other Interesting Matters.

WINNIPEG, Dec. 22. This being the off season in regard to politics, the local sorts and conditions of men upon rious grievances. The worst of all as ars to be the unmitigated voracity of ie implement men, the rapacity of the companies, and the crafty scheming It is true the farmer in common th others in this province at least, is tled to certain exemptions, but as well been pointed out, in many cases hundred dollars would more than wer the cost of the average farmers pply of those articles which the law protects, while he, the farmer of the poorer class, is often compelled to borrow on chattel mortgage at the mos uxurious interest, one per cent. per month. In his case should nature at any time prove capricious, here as in the old country, and frost, hail or storm prevail any unseasonable time much of the fruit of his three or more years toil may be ruthlessly devoured by some one of other of the sharks first mentioned. LEGISLATIVE ACTION WANTED.

Our people can and must rise in their might, and right themselves; they must insist that no man shall enter the legislative chamber as their delegate, who will not pledge himself to both support and insist on the passing of an efficient Bankrupt Law, and a Homestead Law,

# THE CITY AND THE OTTAWA AND PARRY SOUND RY. BY-LAW

Summary of the Clauses of the Agreement, Prepared for the Information of the Freeholders.

The Proposed Central Station at Sapper's Bridge.—What the Ottawa and Parry Sound Railway Has Agreed With the City to do in the Event of the Railway Bonus Being Voted.

As a great deal of misapprehension seems to exist among the freeholders who are asked to vote on the Ottawa, who are asked to vote on the Ottawa, arilway may find necessary and profit-bound of the official agreement entered into between the city and the railway as the basis of said by-law may be of service to the voters.

I coated, there also will be located any other works and enterprises that the railway may find necessary and profit-bounds are greater inducements are offered and the foregoing agreement entered into between the city and the railway as the basis of said by-law may be of service to the voters.

basis of said by-law may be of service to the voters.

The agreement is to submit a by-law to the people for a bonus of \$150,000, divided as follows: \$50,000 on completion of the railway from Ottawa to Arnprior, \$50,000 on completion of the second link (Arnprior to Renfrew), and \$50,000 on the erection and completion of a central passenger railway station in Ottawa

where the advantages to be obtained are greater than Ottawa offers.

EMPLOYMENT ALL THE YEAR ROUND.

In the yards, workshops, railway lines, rolling stock and so forth, the railway will somewhere or other be compelled to engage hundreds of hands, employed all the year through. Every freeholder can compute in a few moments what this means in increased money put into circulation, enhanced value of property and in the general prosperity and welfare. For economy and efficiency of administration these hands must be centred in one place. Refusing the bonus may drive a considerable part of this busy hive of industry elsewhere.

WAYS AND MEANS.
The remaining clauses simply provide for the formal ways and means of carrying the foregoing agreement legally into effect, such as the application for a special act allowing the debentures to run 40 years instead of the ordinary term, in order to make the repayment as easy as possible, and assisting the company to obtain the necessary right of way to the station they undertake to erect at Sappers bridge provided the bylaw is carried by the vote of the freeholders of Ottawa on Jan. 2.
