EXHIBITION OPENING

Notwithstanding the unfavorable weather the Exhibition is to be opened this afternoon—Grounds in Bad Condition—Numerous Exhibits.

Arrangements were fairly complete and a good exhibition was to be expected on every side. The race track on Monday was in splendid condition, there were exhibitors in numbers for every class on the list and large numbers had made preparations to attend.

Of course that was the condition of things on Monday. But Tuesday's story was different. The best laid plans may come to naught. The heavens opened on Monday and a down-pour of rain continued Monday afternoon and all night. And such a mess it made of the exhibition grounds! On Tuesday afternoon when the writer visited the grounds there was water lying everywhere. The race track was flooded in places and it was impossible to move about any place without getting loaded down with the far famed Regina soil. Only a limited number of the exhibits were placed, even in the main building. The midway was all there, but only a few of the refreshment stands and a few of the ring and shooting tents were doing business.

From the indications in the main building there was a good display of manufactured articles. The Young-Thomas Soap Co., Heintzman & Co., McGregor & Jones, North-West Electrical Co., The Singer Sewing Machine Co., New Scale Williams Piano Co., The McCarthy Supply Co., The Modern Supply Co., The National Manufacturing Co., the Saskatchewan Flour Mills Co., J. C. Stokes, and others are represented on the ground floor. The upstairs is pretty well given over to the exhibit of flowers and household articles etc. Up here too is a good display from the Regina public school art gallery. While the displays were not complete yet the basis of a very pleasing effect was there.

A large number of machine companies had exhibits on the grounds, and these were drawing cards for any farmers who visited the grounds yesterday.

The stock stables were filled and yet we understand there were more to follow.

Altogether there were promises of a splendid show had the weather continued fine.

On account of the weather the official opening did not take place yesterday. It will take place at two o'clock today notwithstanding the rain which has continued to fall all morning. The judging will also be done today.

Relics of Buddha.

London, July 24.—Excavations conducted by the archaeological department of the Indian government near Peshawar, the British stronghold on the frontier of Afghanistan, have resulted in the discovery of an ancient Buddhist memorial mound containing a bronze casket within which are some of the ashes of Gautama Buddha, the founder of Buddhism. They are enclosed in a wrought hexagonal rock crystal receptacle, sealed with the royal seal of Emperor Kanishka, who was ruling in Peshawar at the opening of the Christian era.

"When the Buddha died in 483 B.C. his body was cremated and his ashes divided in eight parts among his disciples," says Dr. L. D. Barnett, keeper of the Oriental books in the British museum.

Distribution of the ashes of Buddha was made because of the rival claimants of relics of this founder of a great religion, and each portion of them was preserved in a great monument. As the mounds were known to contain rich works of art and other treasures, as well as records of great value to the historian, a search for them has been actively prosecuted.

Buddha is believed to have been a prince in a petty nation south of Nepal and was born near the beginning of the sixth century, B.C. He was named Siddhartha, and was also known as Sakya, his family name, and Gautama. He spent many years in study and solitary meditation, despite the efforts of his family to interest him in court life, and finally evolved the philosophy that now, with modifications, has the greatest following in the world.

He spent forty-four years in preaching, traversing a great portion of northern India and converting converts by thousands from the Brahmins. He died in Kusinagara, in Oude, at the age of about eighty.

TRADE IS RESTRICTED

Committee of Manitoba Grain Growers Find that a Coal Combine Exists Which Affects Trade—Further Investigation.

Winnipeg, July 27.—A meeting of the executive of the Manitoba Grain Growers' association was held in Brandon, July 23, to receive and consider the report of the committee appointed at the last annual convention to investigate the alleged coal combine. The committee reports several specific cases which it has investigated and announces that there undoubtedly exists an association among the mine owners to protect the dealer, to keep up the price and to prevent freedom of trade in coal.

The report of the committee is as follows:

"The present price of Souris coal in Napinka per ton is \$4.25, the freight being \$1.20. The price at the mine are \$1.65 per ton mine run; \$2.15 screened and ribbles and reductions are sometimes made on these prices. The prevailing opinion is that the dealers obtain about one-half and one-half mine run and screened, and the evidence we can gather goes to support the view that this is about the common practice of most of the dealers.

"Mr. Jackson informed the committee that Chas. Thomas of Laurier had to pay Geo. Moore, coal dealer at Laurier, 95c per ton on Souris coal, just for Mr. Moore ordering and obtaining the car for him, and not for handling the coal in any way.

"The general trend of the evidence shows that about 40c or 50c per ton is what is generally demanded as the dealers' share of reward for others besides the dealers being supplied with a car of coal. About \$1 per ton seems to be what profit the dealers demand for handling Souris coal and \$1.50 for Lethbridge, Galt, etc.

"The chairman produced documentary evidence showing that he had been in the coal business for some time and that he had always had a fair profit. That one firm from which he ordered coal, accepted his order, but that his opposition joined the Coal Dealers Association and then complained to the association about this firm supplying a non-member.

The said firm were evidently intimidated for they then refused to supply the car on order, except to the order of the man who had joined the association, and if ordered through him, he would have to get 75c a ton, \$1c a car, because he belonged to the association.

"Another case: A large customer of a Souris coal mine (a mill owner) ordered some cars for various men at a neighboring station, which was supplied, but complaints being made by the dealers there, the mining company told the mill owner they could not supply any more that way. He replied that they would supply all he wanted and where he wanted, or none, and the combine evidently not being yet strong enough to carry out all they would like, cared in and came to terms.

"The committee have numbers of letters from different mining companies (which are attached hereto) refusing to sell direct to the consumer and in nearly all cases referring the applicant to the local dealer.

"The Eureka Coal Company of Estevan, made replies to that effect last fall, but since then have been selling direct to the consumer on different occasions and at points where there are local dealers.

"We also have a letter from Jas. Ashcroft, of the Pioneer Coal mine, Lethbridge, to the Pioneer Grain Growers' association, offering coal to anyone at \$3.75 per ton on car at the mine.

"One letter from the Roche Perce coal company to a farmer enquiring, told him they could not sell to him except at a price which was 75c per ton higher than that quoted to their agent. We presume this would be handed over to their agent at his rate, which would mean in effect that on a 30-ton car the agent would have to have five or six tons of it himself for allowing the farmer to deal direct with the mine.

"Later, about the time the coal was shipped, the farmer received notice that the price would be a sum amounting to only 50c above the agent's price, instead of 75c. Was their conscience troubling them, or was the coal dealer's troubling him? or did they anticipate trouble?

"Taking it altogether, we find that undoubtedly there exists an association, the object of which is to protect the dealer, to keep up the price and prevent freedom of trade in

coal. They have evidently not come to maturity yet, but are growing stronger.

T. K. SPENCE, Chairman.
 RICHARD JACKSON,
 M. J. BASTARD, Secretary.

It was moved by Geo. H. Malcolm, seconded by J. S. Wood, that this interim report of the committee be received and commended and that they continue to investigate further, and further, that we would recommend any grain grower who can furnish any information as to discrimination in the handling of coal and has cause of complaint in the matter of coal handling to communicate with the secretary of the committee, M. J. Bastard, of Pierson, Man.

DREADNAUGHTS FOR BRITAIN

Four Additional Super-Dreadnaughts to be Added to the Ship Building Program This Year—Announcement Made in the British House—Some Protests.

London, July 26.—The big navy campaign has won the day and four additional super-Dreadnaughts are to be added to the year's shipbuilding program. Rt. Hon. Reginald McKenna, first lord of the admiralty, confirmed this officially in the house of commons this afternoon, saying that after an anxious and careful examination of shipbuilding conditions in foreign countries the government had come to the conclusion that it was desirable to take steps to assure the laying down of four additional Dreadnaughts in April to be completed in March 1912.

Mr. McKenna went on to say that foreign shipbuilding had developed apace. Italy and Austria-Hungary, according to the ample evidence collected by the government, having definitely committed themselves to the construction of four battleships each, of the largest size and the latest type.

Mr. McKenna mentioned that two of the projected vessels would be launched during the present year and that of the two large ships to be laid down in November the government had decided that one should be an improved cruiser, as the admiralty had plans of cruisers more powerful and faster than the Invincible and Indomitable types.

He pointed out that, much as he personally regretted the necessity it was incumbent upon Great Britain to build still faster cruisers, which would be able to capture any hostile vessels threatening English commerce.

Asked if Great Britain had anticipated the British programme or had adhered to the understanding as given out by the British foreign office, Mr. McKenna deprecated the comparison, but said that while during the past three years, the British government had been doing its best to

The only Up-to-Date Undertaking Parlors in the City

Chicago, July 27.—"I am on my way to New York, where I will post a forfeit of \$5,000 to defend my title of heavyweight champion of the world," was the statement of James J. Jeffries given out from his apartments at the Stratford hotel last night. "I have finished my theatrical season," he said, "and as I promised months ago that I would defend my title when the season was over, I am now going east to redeem that promise and will post the forfeit this week in New York."

The big fellow arrived in the city

on a late train last night from Minneapolis with his wife and partner, Sam Berger. They left for the east at 9 o'clock this morning.

WEDNESDAY, JULY 28, 1909.

The Engineer Appointment.

In questioning the appointment of Gordon Grant, C.E., to succeed Mr. Hugh Lumsden, the Mail and Empire says:

"It is announced that Gordon Grant, C.E., has been chosen by the Ottawa Government, at a salary of \$10,000 a year, to succeed Mr. Hugh Lumsden as chief engineer of the Government, or Winnipeg to Moncton, section of the Grand Trunk Pacific. This is an important appointment. Before it can be approved, some of the facts relating to the work on the railway must be examined. Major Hodgins, it will be remembered, was the first engineer to take charge of the division of the new line between Lake Superior Junction and Winnipeg. This official, after a short experience, came into contact with the authorities at Ottawa. It was charged that he was not classifying the work high enough—in other words, that he was not paying the contractors so much as they desired.

"The Major stood by his classification, and the outcome was dismissal from the public service. Had Major Hodgins satisfied the demands of the contractors, he would no doubt have retained his position. As a consequence of the complaints of the contractors that they were not being paid enough, and in advance of the dismissal of the Major, Mr. Gordon Grant, an assistant engineer at the Quebec end of the line, where high prices were being paid, was appointed to the office of inspecting engineer, with power to examine the work as it proceeded. The Major, who testified at Ottawa in 1906, says that when Mr. Grant came to inspect his division that engineer was in favor of the high classification, such as had been adopted at Quebec. That this view is in accord with the facts, is made apparent from a report which Mr. Gordon Grant submitted to the Transcontinental Commission. In that report he says: 'I found from questioning the resident engineers and from looking over the progress estimates that the classification given the contractors has been very low, and in many cases absurdly low, and for that reason alone there are probably 1,000 men less on the work to-day than there would have been if the work had been fairly and justly classified. Classification is left entirely to the resident engineers, and they are too timid to give the contractor what he is entitled to in that line.' Mr. Grant is thus of the opinion that the contractors were not well enough paid, and that their claim for more was justifiable. About this time the classification was raised. Contractors then, according to the evidence of Major Hodgins, began to be paid rock prices for earth work. At once the Grand Trunk Pacific objected, for, as it had to pay a rental based upon cost, it is interested in seeing that the outlay is not excessive. The objections of the Grand Trunk Pacific were very strong, and as a result of the complaints a commission was appointed to determine what was right in the

premises. That commission reported not so long since, and its report was entirely favorable to the view advanced by Major Hodgins, that there had been overclassification, and overpayment to the contractors. One of the members of the commission was Mr. Lumsden, the chief engineer of the road. This gentleman agreed that we had been paying too much.

The report did not suit the Government or the Transcontinental Commission. Mr. Lumsden was therefore asked to change it. He promptly declined, and resigned his chief engineership. The Government has since made a search for an engineer to succeed the expert who refused to alter his opinion on this question of classification, and has hit upon Mr. Lumsden's former subordinate. The curious point about this selection is the fact that the new chief engineer is the man who wrote the report saying that in his opinion the prices paid to the contractors were "absurdly low" owing to the timidity of the resident engineers. How can the new chief engineer be expected to protect the country from the excessive demands of contractors? How can he endorse the judgment of his former superior on the subject of over-classification?

Editorial Notes.

Sir Frederick Borden and Hon. L. Brodeur, two Canadian cabinet ministers, dined with the King last Saturday.

Regina is to have a Union depot for three transcontinental railways. Just let the significance of that statement filter into your mind.—Victoria Colonist.

Church union is still proceeding. Creelman is the second in this province to organize. A report of the work done at Creelman appears elsewhere in this issue.

Right Hon. Joseph Chamberlain is evidently nearing the end of his career. He was recently visited by His Majesty the King and the visit of a sovereign to a subject is very rare, except in a case of the probability of such an event.

Reports from all parts of the province indicate a splendid growth. The grain is now well headed out and should nothing in the way of hail or frost interfere as heavy a crop as has yet been produced in these western provinces is predicted. Those who have been over the province say that the crops look as heavy as they did in 1907.

The Carrot River Journal says:

"The Liberal Government we have at Regina has out the appropriation to agricultural societies in two. Fifty cents only per member now instead of \$1.00. One cent an acre tax also may be two cents next year. And they are spending \$275,000 out of the \$3,800,000 in the 'country' on improvements this year. Truly this is a farmers' province and the farmers are getting a big slice."

Press Comment.

(Winnipeg Tribune)

Fifty thousand able bodied men, it appears, are needed in the U. S. west to harvest the ripened and ripening crops. Thrice 50,000-able-bodied men are wandering around the streets of the U. S. commercial centres asking

impeding the progress of humanity. An ideal education should teach us to live, not merely to gain a livelihood. It is the drawing forth the harmonious development of all one's powers, physical, mental, moral and spiritual in order that they may be fruitful, inspiring, and unifying in their influence. It is apt to be forgotten that in the first six years of a child's life more knowledge is gained and more habits acquired than in the whole of the school life. This then is the parents' golden opportunity for sowing the seeds of moral and mental growth. There is no doubt, whatever that habits of passion or self-control, formed in the first six years according to the training of even the first six weeks.

(Toronto World)

Outside opinion regarding Canada and its climate has undergone a wonderful change within the last few years and the process is not yet complete. Kipling's poetic personification of the Dominion as "Our Lady of the Snows" was the quintessence of the older notion prevalent in Britain perhaps due in no small measure to the Peter Parley storybooks very popular in and about the middle of last century. The youthful mind is receptive and its impressions continue to exert their influence long after more reliable sources of information have become available. But blame for erroneous beliefs touching our much maligned climate can be made too severe, and it is prudent to remember that Canadians themselves have been none too remarkable for knowledge of the possibilities of their country. And what the native-born did not know can scarcely be charged against his distant kinsman.

People anywhere do not connect Berlin, Copenhagen, Moscow, or even Stockholm with arctic conditions. Yet Berlin is only half a degree south of Edmonton, Alberta; York Factory on the Hudson's Bay is south of Regina on the Baltic, and Fort Churchill is almost on the same parallel as Stockholm. United States official records show that Sitka, Alaska, has a higher average temperature than Washington, D.C., although, of course the extreme temperatures are more separated. Five hundred miles north of Edmonton, at Fort Vermilion, which is situated on the Peace River, wheat is being successfully grown, and the region which will shortly be opened by the northward movement of the railroads, will certainly be ere many years have passed, covered with fields of golden grain. James J. Hill has declared his belief that noble states with populous cities will cover the enormous area bounded by the United States, Hudson Bay, the Arctic circle and the Pacific ocean. If this anticipation is realized, it will probably modify the rigor of the present winters, but be that as it may, there is an evident fascination in the far north that will always attract, for it builds up strong men and fair women.

Educational Responsibility of Parents.

The following extracts from a paper read before the International Council of Women are full of food for thought. Happily, theoretically at least, most parents wish their children to have better advantages educationally than they themselves have had. National greatness is commensurate with national education. Education no longer means mere book learning. It is rather a preparation for life, a means of fitting every unit in a community to be, not an irresponsible unintelligent burden,

UNION CHURCH AT CREELMAN

Organization Now Complete and a Regular Minister Will Shortly Take Charge of the Work.

On Saturday, July 17th, the subscribers of the proposed union church met and completed its organization. We now have established the second union church in Canada, and may the movement succeed as the church in Frobiisher is succeeding. The question of church union is one which is occupying the minds of Christian Canada today from the Atlantic to the Pacific and any movement which has for its object the hastening of this end will be watched with keen interest. It was the late statesman Sir John Thompson who said, "Any movement which brings together people of different religious denominations or political beliefs will be patriotic in its aims and divinely blessed in its results." We believe this was a wise statement of a wise man and when applied to our churches is doubly true.

The question of church union for Creelman has been discussed frequently for the past year and after an energetic campaign of a little over two months has been completed. As was the case wherever this has been tried a strenuous opposition spring up which, strange to say, received the support of the ministers of the Gospel. Every conceivable objection was brought forth and magnified a thousandfold. This, however, acted as a boomerang and made the provisional committee of the proposed Union Church more watchful. The result is that the organization is founded on sound principles. Discussion was kind always desirable upon a great question. In fact, if a question will not bear investigation it has little or no value. We now have a church which with a good Christian Minister as leader must needs mean much for the spiritual upbuilding of Christian character in our town and surrounding country. Already there is a movement on foot to build a church in the country for holding service south of Gooseberry Lake and as this is one of the most prosperous districts in the west, no doubt a fine edifice will be erected this fall and a strong congregation formed. May this church succeed and bring forth fruit a hundredfold.

Saskatoon Man Killed.

Saskatoon, July 25.—Eddie Green, a popular young hardway clerk, employed by the S. A. Clark Co., met with a most tragic death some time Thursday night, but it was not until late yesterday afternoon that the fatality was revealed. About 4 o'clock Saturday afternoon the R.N.W.M.P. were notified that the body of a man was lying on the rocks underneath the C.N.R. bridge. Immediately proceeding to the spot designated, the constables discovered the bruised, battered and almost unrecognizable remains of young Green. Just when and how the accident occurred or whether there was any foul play is not quite apparent, but opinion seems to favor the former theory. It would appear that on Thursday evening last about eleven o'clock Green left the city for his boarding house, which is with his employer, Harold Willoughby, in Idylwild park. In getting there he had to cross the bridge and it is believed that while walking the "stringer" he was hit with something which projected from one of the cars which were shunting on the bridge and hurled from the structure.

WIRE WOUNDS

My mare, a very valuable one, was badly bruised and cut by being caught in a wire fence. Some of the wounds would not heal, although I tried many different medicines. Dr. Bell advised me to try MINARD'S LINIMENT, diluted at first, then stronger as the sores began to look better until after three weeks the sores have healed and best of all the hair is growing well, and is NOT WHITE as is most always the case in horse wounds. F. M. DOUCET, Weymouth.

CRAIK SASK

The People Back of Sunshine Furnace
Sunshine Furnace is the triumph of sixty-one years' experience—growth from a small tinshop to 16 1/2 acres of floor space, from a half dozen artisans to 1,500, from an annual wage sheet of \$4,000 to one of \$670,000, from a capital of energy to one of \$3,000,000, from obscurity to recognition as Largest Makers of Furnaces in the British Empire.
SUNSHINE FURNACE
was placed on the market the first furnace to be wholly and solely designed by a Canadian Company.
We employ a consulting staff of furnace experts, who are continually experimenting with new ideas in order that Sunshine Furnace shall not have to travel on its past reputation for goodness.
We buy materials in such large quantities that its quality is guaranteed to us. We have our own testing rooms, so that supervision of construction is exercised down to the finest detail.

CROSSED THE ENG. CHANNEL

Daring French Aviator Crossed the English Channel in Twenty-five Minutes—Wins Prize of \$5,000—Flew From Calais to Dover, Twenty-one Miles.

Dover, Eng., July 25.—Louis Bleriot, the French aviator, landed on the cliffs of Dover this morning, having made a successful flight across the English channel in his monoplane. Bleriot's only mishap during the flight was a slight injury which he sustained in landing. Bleriot started from Calais at 4.35 o'clock. The morning was perfect for the flight, as there was hardly a breath of air stirring and the weather was clear and fine.

Besides winning the Daily Mail's \$5,000 prize for the first aeroplane to cross the English channel, Louis Bleriot has also awakened the dormant English fear of continental invasion which has long operated as a stumbling block in the way of projects for the construction of a tunnel beneath this storm tossed strait. Now that an aviator has succeeded in landing at a designated point on British territory 25 minutes after ascending from the starting point on the French coast, it is expected that England will soon be in the throes of another war scare and that measures providing for the strengthening of the defenses will encounter much less opposition in parliament than heretofore.

Details of M. Bleriot's flight show that the aviator left Calais at 4.30 a.m. and landed at Dover at 4.55 a.m. Owing to the strong winds that had prevailed throughout the night the arrival of the daring aviator was not expected and of the crowds that had waited all day yesterday for a glimpse of the aeroplane there were only a few newspaper men and soldiers on hand when the French airship was sighted ten minutes after the ascent from Calais. The news of the successful flight spread quickly, however, and by the time the automobile conveying the daring Frenchman to the home of the lord warden had arrived at the outskirts of the town a crowd of several hundred was on hand to welcome and cheer the winner of the prize.

M. Bleriot will arrive in London at noon tomorrow, when Lord Northcliffe will present him with a thousand pound cheque on behalf of the Daily Mail at a luncheon at the Savoy at which many prominent men are expected to be present.

Bad Water. A number of cases of typhoid fever have recently been reported traced to the use of water from the Moose Jaw creek, east of Moose Jaw. The water of this creek is being polluted by the sewage of the city of Moose Jaw emptying into it.

As this water is used by a large number of settlers living in the vicinity of the creek, warning should be given of the danger of contracting typhoid fever by its use.

This water should be boiled for from five to ten minutes before drinking it, or using it for washing dishes, vegetables, milk pails, cans, churns or other utensils used in the storing or handling of milk.

It will be better to take these precautions now, than to be obliged to care for cases of typhoid fever later on.

M. M. SEYMOUR, M.D. Provincial Health Officer.

Fined for Selling Beer. Rosthern, Sask., July 25.—Wholesale convictions in contravention of the liquor license law were secured at Rosthern yesterday when seven men were each fined fifty dollars and costs, amounting to a total of four hundred and thirty-one dollars and fifteen cents.

Their names were W. Wry, Frank Kugler, Joe Weber, Otto Seafort, Henry Gruending, Frank Reinhart, Rev. Father Benedict, a Catholic priest, George McFicken. The case arose over selling beer at a picnic on July 1, at Hoodoo, forty miles east of Rosthern. All but Seafort pleaded guilty and the case against him was proven. Max Hoffman was charged with the same offence and was dismissed. License Inspector W. Drain prosecuted.

Homesteader Disappear. A probable tragedy, which will necessitate the investigation of the police authorities, occurred last Friday night, at the hour of 10 p.m., at the homestead of Robert Empey, six miles north-east of the Goose lake post office. The facts of the affair are these: The house of Robert Empey, homesteader, is burned to the

THE HUDSON BAY ROUTE

Head Railway Surveyor Returns from Going Over the Route—Nelson River Was Free of Ice in March—Good Country from Split Lake to Nelson River.

R. D. Fry, who was in charge of the Nelson river party of the Hudson Bay railway surveyors returned to Winnipeg yesterday morning. He came down from Norway house with his party on the steamer Wolverine, and disembarked his men at Selkirk, reporting at the head office at noon.

Like all men who spend their time out of doors while driving forward the feelers of civilization and progress, Mr. Fry has little to say of his work, but beneath his conversation there was a current of suppressed enthusiasm over the Hudson Bay route. He took the field in October of last year, working out from the Pas mission. After completing that section he took charge of the party which was the line from Split Lake to the Nelson river, the optional route to Hudson Bay.

He started that piece of work on March 1, putting the line through in record time. He says that there are no impediments along the whole route which would delay railway construction. Though the surveys were run in winter it was possible to get a fair idea of the country traversed. There are no muskegs, no large lakes no streams of consequence which would entail expensive bridges, and no rock ridges or heavy cuts which would mean expensive or slow construction. The country is almost timber interspersed. So far as could be judged the land would be valuable if brought under cultivation. The snowfall for the winter was light, and because of the timber it was not liable to drift.

On his arrival at Nelson river in March, Mr. Fry says that he found the river open at its mouth, and there was nothing to prevent steamships from entering. One of the reasons why so little is known of the Nelson river is that the established route of travel follows the Hayes river, which lies some distance to the southward. So great is the volume of the Nelson that it has cut a channel for itself, which does not make for safe canoe travel. The banks in many places are high and steep, and as many flows too fast for canoes, the Hayes has been taken. The banks of the latter are lower so that canoes may be "tracked" or towed through the rapids by means of a line from the shore. Then too, the Hayes does not open out into so many huge lakes, always a source of delay and danger in time of storm.

Mr. Fry came back by the Hayes river route as far as Split lake, taking the Nelson from there to Norway House. At Split lake he met and talked with W. J. McLean and his treaty payment party, and also met Rev. Mr. Semmen and the latter had just disembarked for their northern trip. All the members of both parties were well and in high spirits.

With the completion of Mr. Fry's work nothing now remains but the decision as to which of the two routes will be selected for the railway beyond Split lake. The location work is completed and the topographical maps are in course of preparation. When the final report has been made to the department all the necessary information will be in his hands.—Winnipeg Free Press.

Sudden Death at Pilot Butte. A farm laborer named Bartoock died on Sunday evening at the home of Ludwig Guttel near Pilot Butte. It appears from the investigation held so far that he had done the work around as usual and after coming to the house sat down and complained of his legs, and shortly afterwards died. Post-mortem examination showed that he had been poisoned. The R.N.W.M.P. are making further enquiries.

Misery in Stomach. Why not start now—today, and forever rid yourself of stomach trouble and indigestion? A dieted stomach gets the blues and grumpiness. Give it a good eat, then take Pope's Diapepsin to start the digestive juices working. There will be no dyspepsia or belching of Gas or eructations of undigested food; no feeling like a lump of lead in the stomach or heart burn, sick headaches and Dizziness, and your food will not ferment and poison your breath with nauseous odors.

Pope's Diapepsin costs only 50 cts. for a large can at any drug store here, and will relieve the most obstinate case of Indigestion and Upset Stomach in five minutes.

There is nothing else better to take Gas from Stomach and cleanse the stomach and intestines, and besides one triangle will digest and prepare for assimilation into the blood all your food the same as a sound, healthy stomach will do it.

When Diapepsin works, your stomach rests—gets itself in order, cleans up—and then you feel like eating when you come to the table, and what you eat will do you good.

Absolute relief from all Stomach Misery is waiting for you as soon as you decide to begin taking Diapepsin. Tell your druggist that you want Pope's Diapepsin, because you want to be thoroughly cured of Indigestion.

Misery's Linctum Cures Colds, etc.

WHITE SLAVE SUPPRESSION

Countries Enter Into An Agreement Having in View the Suppression of the White Slave Traffic.

Ottawa, July 25.—The terms of the international agreement for the controlling of the white slave traffic are announced. The agreement is for the purpose of providing for the women of age, deceived or under restraint, also for women and girls under age, adequate protection against the criminal traffic known as the white slave traffic. Thirteen governments have signed the agreement each naming a representative to act as plenipotentiary to see to its enforcement. There are several clauses to the agreement, the most important of which are:

Each of the contracting governments undertakes to appoint or designate an authority whose duty will be to gather all information concerning the hiring of women and girls for immoral purposes in foreign places; this authority to have power to communicate directly with a similar service established in each of the contracting states. Each of the governments undertakes to have a strict watch kept for the purpose of seeking especially at railway stations, ports of departure and during voyage, conductors of women and girls intended for debauchery.

Instructions will be sent to officers and all other competent persons, to obtain within legal limits all information leading to criminal traffic. The arrival of persons likely to be authors, accessories or victims of such traffic will be signalled, if necessary, either to the authorities or at the place of landing, or to the diplomatic or consular agents concerned or to all other competent authorities.

The governments undertake to provisionally place victims of the traffic in institutions and as far as possible, send back to their own countries those who ask repatriation. Where a person cannot reimburse the cost of her transfer, it will be defrayed by the country on whose territory she resides as far as the next frontier or port of departure, and the surplus by the country of origin. The contracting governments undertake to exercise as far as possible a watch on agencies employing women and girls in foreign countries.

The list of countries, British colonies and protectorates which have decided to adhere to the white slave traffic agreement are: Austria-Hungary, France, Germany, Great Britain, Italy, Norway and Sweden, Portugal, Russia, Spain, Switzerland, the Bahamas, the Barbadoes, British Guiana, Canada, Ceylon, the Commonwealth of Australia, Gambia, the Gold Coast, Malta, Newfoundland, Northern Nigeria, Southern Rhodesia, Trinidad, and the Windward Islands.

Excursions to the Farm. India Head, July 25.—The excursion to the experimental farm this year were better attended than ever. Nine hundred visitors came Friday, and seven hundred and fifty Saturday. These figures were added to by fifty per cent. by farmers who drove in, some coming as far as thirty miles, to see the farm and hear the addresses by Mr. Rutherford, of Regina, deputy minister of agriculture; Hon. W. H. Motherwell, minister of agriculture; Supt. McKay of Indian Head experimental farm; Dr. Murray, president of Saskatchewan university; Saskatchewan; and T. H. Wilking, chief inspector of weeds for the province.

Messrs. Motherwell and Rutherford spoke on improved methods of farming. Supt. McKay made particular reference to the work at Indian Head and the cultivation of shelter belts, and farm work in general. Mr. Wilking lectured on noxious weeds, their various names, descriptions and the methods used for their prevention and destruction. Twenty-five conveyances

SPANISH TROOPS TO BE DESPATCHED TO MOROCCO—NO NEWS TO BE GIVEN OUT.

Madrid, July 26.—Fighting between the Spanish forces under General Marina and Moorish tribesmen was resumed outside of Melilla at 8 o'clock last night. General Linares, minister of war, in an interview today announced that the mobilization of the Spanish troops would soon reach 24,000, thereby bringing General Marina's effective force up to 40,000 men, but on account of the extent of territory on the Riff coast to be covered, he considered it doubtful whether that number would suffice, and consequently the formation of new brigades would continue. General Orogo's division and the Gibraltar brigade will leave here today for the Riff coast.

General Linares declared that General Marina enjoyed the full confidence of the government, and that he would be given every man he asked for. The Spanish papers have been notified that hereafter they will not be allowed to print special despatches from the seat of war until the accuracy has been confirmed by the general staff. Foreign correspondents are forbidden to telegraph any except official news. The government denies that it intends to suspend the constitutional guarantee in Catalonia and other provinces.

Conde de Aliende Salazar, minister of foreign affairs, in a note to the press today, announces that the war in Morocco is limited to the protection of Spanish possessions and frontiers covered by the treaty of Tetuan and is in no sense directed against Morocco.

Barcelona, July 26.—A general strike was declared here today as a protest against the Spanish Moroccan war. The government replied by proclaiming a state of siege which is equivalent to martial law.

A Nation of Savers... Franchises Are Thrifty and Invest in Government Bonds... If you were a Frenchman with a very small surplus to invest, if even that surplus were but a modest franc, you might become the holder of a French government bond.

An Innocent Victim... Swinburne and the Grouchy Head Master of Eton... Once when Algernon Charles Swinburne was traveling back with his father from school at the end of one of the terms they entered a carriage in which the other passengers were all men.

The Lark's Song... A Writer on "The Wonders of the Spring" Says that the Volume of Sound Produced by the Skylark is Most Wonderful... "The lark ascends until it appears no larger than a nidge and can with difficulty be seen by the unaided eye, and yet every note of its song will be clearly audible to persons who are fully half a mile from the nest over which the bird utters its song.

Not So the Flood... Sir Henry Irving once received what he says was the most gratifying compliment of his life, delivered him by a highlander... While touring in Scotland the actor visited some of the notable traditional scenes associated with Shakespeare's drama.

Surgeon's Opinion of Knife for Piles... Operating on a "fad" - The modern way of curing piles is with Dr. Chase's Ointment... Sir Henry C. Burdett, K.C.B., of London, England, writes in a recent address said: "What we want are surgeons, who with wisdom to be conservative have courage to protest against the growing tendency to pull a knife into everybody on the smallest possible pretext."

His First Recognition... The Turning Point in the Career of Nathaniel Hawthorne... The first reading of "The Scarlet Letter" has been told in T. W. Higginson's book of essays, "Contemporaries." The reading was given to the author's dearest critic, his wife. During the entire winter when he was at work upon the book he seemed oppressed by some secret anxiety.

The Camel... Characteristics of the Patient, Strong and Useful Animal... As far back as the middle of last century General Augustus in his descriptive letters from Asia Minor had many good words to say about the camel. "This animal," he said, "can carry a burden of nearly 600 pounds and is used by the nomads and Arabians in taking their animals, children, old men, tents, food, water, etc., from place to place. It is able to withstand a march of ten days without drink, and a fifth station ever reserves a drink for its master in an hour of extreme distress. The hair of the camel is used for clothing and tents. The milk and flesh are healthy. It exists on the most miserable food, such as grass and thistles. Such are the characteristics of this patient, strong, fearless and most useful of all animals."

Not So the Flood... Sir Henry Irving once received what he says was the most gratifying compliment of his life, delivered him by a highlander... While touring in Scotland the actor visited some of the notable traditional scenes associated with Shakespeare's drama.

Not So the Flood... Sir Henry Irving once received what he says was the most gratifying compliment of his life, delivered him by a highlander... While touring in Scotland the actor visited some of the notable traditional scenes associated with Shakespeare's drama.

Keep Children Well During Hot Weather... Every mother knows how fatal the summer months are to small children. Cholera infantum, diarrhoea, dysentery and stomach troubles are distressingly frequent at this time and too often a little life is lost after a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevents stomach and bowel troubles or if the trouble comes suddenly will bring the little one through safely.

A Growsome Bequest... Extraordinary Legacy by the Father of Lord Audley... Probably the most growsome bequest ever named in a will was that made by Philip Thicknesse, a distinguished Englishman, who died in 1792. Some years before his death he had quarreled bitterly with his son, Lord Audley, and to spite him had placed on the outside of the family mansion a board bearing this inscription in large black letters: "Beasts and shoes mended, carpets beat, etc. by P. Thicknesse, father of Lord Audley."

Not So the Flood... Sir Henry Irving once received what he says was the most gratifying compliment of his life, delivered him by a highlander... While touring in Scotland the actor visited some of the notable traditional scenes associated with Shakespeare's drama.

Not So the Flood... Sir Henry Irving once received what he says was the most gratifying compliment of his life, delivered him by a highlander... While touring in Scotland the actor visited some of the notable traditional scenes associated with Shakespeare's drama.

Local and General

Farmers in Manitoba are cutting barley.

H. V. Bigelow spent Saturday in Winnipeg on business.

A. Champagne, M.P., of Battleford was in the city yesterday.

Mr. and Mrs. Geo. Ross have gone to Seattle to take in the fair.

S. Clarke, Y.M.C.A. secretary has returned from Vancouver and Seattle.

The price of Galt coal will be raised 25 cents a ton on Monday next.

Miss Mae Dawson, accountant at the Regina Trading Co., has gone to the coast on a holiday trip.

Dr. McIntyre, M.P., for Strathcona constituency, died last Wednesday morning at Strathcona, Alta.

The annual meeting of Regina Farmers' Elevator Co., will be held in the city hall next Saturday afternoon.

J. Kelso Hunter, city clerk, is attending the annual convention of Canadian municipalities being held at Medicine Hat and Calgary this week.

D. A. McDonald recently made a trip to Lumsden Beach in his automobile, and brings back good reports of the crops between here and there.

Rev. W. R. Adams of Whitewood, will succeed Rev. G. N. Dobie at Indian Head, when the latter moves to Regina to become warden of St. Chad's hotel.

W. M. Williamson was in Brandon last week in the interests of the Exhibition Association and brought back a number of entries for the racing events here.

The Methodist summer school opened at Lumsden Beach on Monday and will continue for ten days. Several interesting addresses will be given during the term.

R. B. Davidson, who has completed his law course and passed his final examinations, will open an office at Watrous, Sask., for the practice of his profession.

T. A. Anderson, M.L.A. for Last Mountain is in the city for the fair.

R. B. Fergusson attended a meeting of the executive of the western baseball league at Medicine Hat this week.

Sergt.-Major Bowdridge has taken leave of the R.N.W.M.P. after serving twenty years with the force. A large number of his police friends met him at the sergeants' mess on Saturday evening and gave him a send-off.

A number of the delegates en route to attend the annual convention of Canadian municipalities arrived in the city from the east on Sunday morning and spent the day in the city. They were entertained at lunch in the King's Hotel.

The contract for the building of the new municipal hospital has been awarded by the city council to Messrs Sawyer Bros. for \$98,265. The building is to be erected from plans submitted by Messrs. Storey & Van Egmond, architects, Regina.

J. K. R. Williams of the Glasgow House has purchased the remaining part of the old city hall site for a departmental store. The price paid was \$45,000. The corner lot of this property was sold by auction some time ago to Whitmore Bros.

A letter recently received by A. Champagne, M.P., from the Department of Justice, Ottawa, states that the appointment of J. W. Hannon to a judgeship is a strong possibility of the near future. The high esteem in which Mr. Hannon is held in this district makes Mr. Champagne's commendable efforts in his behalf a matter for keen appreciation.—Battleford Press.

Hon. Mr. Justice Johnstone, of the supreme court of Saskatchewan, is a visitor in the city for a few days. He is one of the historic men of the Canadian west, having been associated with Chief Justice Fitzpatrick and Mr. Justice Lemieux in the famous trial of Louis Riel at Regina in 1885. He will spend several days visiting friends in the city.—Winnipeg Free Press.

21,598 pounds of butter were turned out by the Melfort Creamery last month, a record which will bear favorable comparison with any other creamery in Saskatchewan. The creamery is going ahead with leaps and bounds and has now 218 patrons, a number nearly double those of last year. All this has been done without a dollar of government assistance and in the face of great difficulties. There are evidently good men at the head of this business and there is no doubt that they will succeed.—Melfort Moon.

The death of another western old-timer occurred at Tregarva last Wednesday when Alexander Seed passed away in his seventy-seventh year. The funeral was held on Friday at the Tregarva cemetery, the services being conducted by Rev. Mr. Naismith of Condie. There was a very large number present from not only the immediate vicinity, but from other districts as well, thus testifying the esteem in which deceased was held. The Seeds brothers of Tregarva

who are so well known are sons of the deceased.

The report from Sloughton that a farmer near that town while digging a well struck a six foot seam of Hebe coal, has proved to be quite authentic. It is a well known fact to scientists who are acquainted with the formation of the Moose Mountain district that coal exists at varying depths in the underlying strata. The report of the discovery of coal in the neighborhood of Sloughton or anywhere in this vicinity does not come as a surprise. Whether it is there, however, in paying quantities is another question.—Aroola Star.

It is a noteworthy fact that the houses in Yorkton which were struck by lightning in Sunday morning's storm all belong to Conservatives. Sir Willfrid has on more than one occasion pointed out that Providence favors his government. People who vote against it and have no home-stand entries to be cancelled, must be prepared to take the consequences in some other way. Only the chimneys were knocked this time, but the punishment is not always made to fit the crime. A word to the wise is sufficient.—Yorkton Enterprise.

Gertrude Hall was brilliantly lighted, beautifully decorated, and was the scene of a very pleasant assemblage on Monday evening when "The Young Ladies' Club" of Battleford held a reception to Mrs. Thos. Bennett of Regina, Sask., who gave a very pleasing address on Women's Clubs, and ended with a glowing tribute to the west and its possibilities. After the address she answered a number of questions and then refreshments were served and a social time was passed. All present congratulated Mrs. Bennett and the club on the successful event and this enjoyable occasion passed into the Club's history as one of its red-letter days.—The Victoria News, Battleford, C.B.

THE CANADIAN MAGAZINE for August is composed mostly of short stories and entertaining travel articles. "Victoria the Aristocrat," is a title of a pleasing appreciation of the capital of Vancouver Island, and "In the Land of Windmills," by the late E. M. Yoeman, is full of quaint observations on Holland and the Dutch people. "The Witchery of the Alps," by Hedley P. Sommer is a well illustrated description of Swiss mountain scenery and its effect on the spectator. The centenary of the birth of Alfred Tennyson and Oliver Wendell Holmes takes place this August, and therefore the number contains appreciative articles on the works and characters of these two celebrated authors—Tennyson by Rev. W. T. Allison, with portrait by A. J. Clark, and Holmes by Grace McLeod Rogers. The fiction contributions are particularly strong, with short stories by Anna B. Fries, E. S. Kirkpatrick, Fred Jarman, Lillian Vaux Mackinnon, Marjorie L. C. Pickthall and Helen Guthrie. The chief poem is a patriotic one by Willfrid Campbell and entitled "The Sea Queen." There are poems also by Virna Sheard, H. O. N. Belford and others.

It has been decided to give up the proposed trip of Winnipeg business men to Regina. Following after the successful trip to the Brandon exhibition, it was supposed to go to Regina on Thursday of this week, but investigation has compelled the conclusion that the trip is impracticable at this time. Both Regina and Saskatoon were down for excursions, but distance and expense stand in the way of securing a large enough number of patrons to make these trips successful. Business men feel themselves too crowded by purely business demands to spare the time that will be needed to make these trips and the cost for fares and incidentals make too high a charge for the general public to take up with sufficient enthusiasm to guarantee the expense of a special train. It is a matter of much regret to the exposition committee, in whose hands the matter rested for disposal, that the Regina and Saskatoon trips had to be given up because the experiences of the committee in this line have led to the conviction that excursions of this nature are of high value in drawing the people of the west into closer and better acquaintance and understanding.—Winnipeg Tribune.

Surface Only Scratched.

London, July 26.—Replying to the statement that the British Empire Trust devoted its efforts too much to Canada, R. M. Horne Payne, presiding at a meeting of that body, said that up to the present time Canada offered by far the greatest attraction to investors of any part of the world. "Canada," he said, "has not yet really begun to exploit her natural wealth. So far she has done little more than scratch the surface overlying sound Canadian enterprises as distinct from loans." The speaker advocated more travel about the empire, as then there would be less nonsense written and talked.

Continuing Mr. Payne said that unless something most unforeseen occurred, Canada would have a wonderful record crop this year, and he ventured the prophecy that its value would exceed \$10,000,000. The companies with which the trust was connected were prospering exceedingly, and he did not regret the large sum of money which was being invested in Canada. His only regret was that more English capital did not find its way there.

THE TRADING CO. WEEKLY STORE NEWS

Semi Annual Clean Sweep Sale

In The Men's Store

Sale Lasts Two Weeks, August 2nd to 14th

MODERN store keeping demands that each line of goods be sold in its own season, and the decks made clear and clean for the next season. We find this method a good one—though it means drastic measures and deep price-cutting. In keeping with this policy we will, for the next Two Weeks, sell all our Summer Goods in the Men's Store at prices that will affect a speedy clearance of all Summer Goods. Aside from the above reason we must have room for Fall Goods. Many thousands of dollars' worth are on the way, and some are even now knocking for admission to the stock room.

EVERY LINE OF SUMMER GOODS WILL BE REDUCED FOR THIS SALE

Men's High-Grade Hand-Tailored Suits, Boys' Suits, Men's Trousers, Boys' Knickers, Men's Hats and Caps, Boys' Hats and Caps, Men's and Boys' Furnishings.

Millinery Cut In Two

EVERYTHING IN Flowers and Foliage Trimmed Hats Untrimmed Hats

WILL BE PUT ON SALE AT Half-Price!
