## The Sound of Wedding Bells

—OR—  
Won After Great Perseverance!

CHAPTER XXVIII.

"Glad!" he echoes. "Why, Maud is young enough to be his grandchild!" She smiles placidly.

"Not really?"

"Well, pretty nearly," he says. "The idea seems to be repugnant to me. Gretam is older than he looks, and— and—in short, I cannot believe it."

"Is he so old?" she says, innocently taking the camellia from her bosom and holding it up to the light.

"Old? Yes! I suppose he has nursed Maud on his knee many and many a time. Think of it! Why, suppose he had come to pay attentions to you?"

"To me?" And she laughs softly. "That is too ridiculous."

"But you are not older than Maud," he persists, "or very little. How would you like it?"

She laughs again.

"It is too ridiculous! No duke will pay matrimonial attentions to me."

"But I say how should you like it?" he insists.

"I—it is different with me," she says, with a little suppressed sigh.

"Well, then, it's the same with Maud," says simple-minded Hugh.

"The idea is dreadful! Gretam is a very good sort of a fellow; but—but if he meant to marry he should have thought of it years ago; or if he means to marry now he should look out for a woman near his own age. Then—well, it would be more consistent! But Maud!" and he laughs grimly.

"But," she says, still holding the camellia, "Maud would be a duchess. Many a young girl has married an old man for a title."

"Then," he says, sternly, "you think a title covers all other disparities? Lucy, I did not think you would have spoken so."

"But I did not say so," she says, softly, putting her arm on the chair again. "I don't think so. Nothing should induce me to wed where my heart was not given, but others may

my boyish, youthful troubles; it was you who sympathized with all my projects and ambitions. There was no thought or hope of mine that was not bound up with thought of you. When fortune smiled on me, and fame came within my grasp, I thought of you, and wondered whether you would be pleased. Do you not remember those old times?"

"Yes," she murmurs, falteringly, "I remember."

He is silent for a moment.

"You were a part of my existence," he goes on, with a gloomy brow—a brow that surely no lover ever wore before. "When I was fighting there under the Southern Cross, I used to think of you, my little sweetheart—the girl who had promised to be my wife!"

He pauses, overcome by the memory, and she sits and listens with bowed head, and her hand goes up to the camellia which but a few short hours ago had shone on the coat of the duke.

"I thought of you," he goes on, "and pictured to myself how glad you would be that I had not been picked out by bullet or shell, and then when it was all over I made my way home."

He pauses again, and her small hand steals a little way towards his.

"I made my way home," he goes on, "but on the way I met with one of those adventures which fall to one whether one seeks them or does not. Lucy, it was a midsummer madness. It was hot and fierce and strong while it lasted, but it passed. Lucy, I was mad. I forgot in that short delirium your fond, faithful love; I forgot everything, enveloped in the glamor of that hour. But it has passed. And, see, I come back to you—to you, my first faithful love, whom I have caused to suffer, I fear, for your heart can know no unfaithfulness. I come back to you, Lucy, and I offer you my old love, tarnished and stained though it be. Will you accept it, Lucy?"

His voice, broken and hesitating at times, when he thinks of Dulcie and speaks of his midsummer madness, grows firmer toward the close, and as he bends over her, he takes her hand.

She does not withdraw it, but looks up at him with a tender smile.

"Lucy, answer me," he says. "I know I deserve to be sent away with an indignant refusal, but I throw myself on your mercy. I feel that you have been true to me through all my fickleness. Lucy, if you still cherish an atom of the old love for me, tell me so, and let there be an end of the past!"

She looks up at him, still with the gentle, trusting smile.

"Dear Hugh," she murmurs, and the green eyes grow tender and loving, "what shall I say to you?"

"Tell me the truth," he says. "Do you still love me? Will you forgive me?"

She sighs.

"Yes, I forgive you, Hugh."

"Lucy!"

"I forgive you. But," with a little plaintive smile, "are you sure that your midsummer madness is past?"

"Quite," he says, "and if I were not, the end of that madness would be very near at hand. Dul—Miss Dorrmore is engaged to Sir Archie."

"I know," she murmurs.

"She loved him all the time," he says, with a sharp twinge, even at this moment.

"I knew it," she murmurs, with a smile, enjoying his sudden twinge; "she was not worthy of you, Hugh; but am I?"

"Lucy!"

"Think!" she says, glowing over him. "She was very beautiful, while I—"

"You are always beautiful in my eyes," says poor Hugh. "Come, Lucy, do not keep me in suspense; do not recall the past; let me—let us both forget it. Will you be my wife?"

She is silent for a moment, and her hand goes up to the camellia.

"Hugh—"

"Yes, Lucy."

"Will you be angry if I ask you to give me time?"

"Why should you ask me, Lucy? Are you uncertain, undecided?" he asks.

"I?" and she eyes him with a glance of angelic reproach.

"Well!" he says, impatiently.

"Well, Hugh, you will not be angry with me!"

### Doctor Said Operation.

When Chatham Lady Suffered From Extreme Nerve Exhaustion. Now Feeling Fine and Working Large Garden.

Chatham, Ont., November 16th.—This letter will interest every lady reader, because it describes a condition for which many doctors advise an operation. That the operation is often unnecessary and very often leaves the patient an invalid for life is well known.

You will read here of what Dr. Chase's Nerve Food has done for this lady and will then understand the great good it is accomplishing in many thousands of similar cases throughout the continent.

Every woman should think long and earnestly before consenting to an operation of this kind. It is a simple matter to give Dr. Chase's Nerve Food a trial and the results are almost always entirely satisfactory. You not only avoid the risk and expense of an operation, but find yourself restored to health and vigor.

Mrs. E. M. Ford, 82 Delaware avenue, Chatham, Ont., writes: "For four years I suffered from my nerves. I was restless and could not sleep well. I had headaches, neuralgic pains through the body and backache. There was buzzing in my ears and twitching of nerves and muscles. I also had palpitation of the heart, which caused shortness of breath. I was easily tired and always droopy after eating. When walking or on my feet very much my feet would seem to go dead in my shoes. I consulted two doctors and both told me that I would have to have an examination and probably an operation, but I would not have either. Shortly after this I commenced using Dr. Chase's Nerve Food and after a treatment of this medicine I can say I am now feeling fine. I am able to do my household duties without difficulty, and besides this attend to a half-acre of garden. I can go about without that dead feeling in my feet, and am grateful to Dr. Chase's Nerve Food for my cure. I think very highly of this medicine and recommend it to other sufferers whenever I have an opportunity."

Dr. Chase's Nerve Food, 50 cents a box, a full treatment of 6 boxes for \$2.75, at all dealers, or Edmanston, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations only disappoint.

**Wedding Bells.**

A very pretty wedding took place on Wednesday, November 14th, 1917, at the Chapel of Our Lady of Good Counsel, Prescon Convent School. The contracting parties being Miss Maggie Shelly, Gover Street, and Mr. Gregory Clooney, the popular young farmer of the White Hills. The bride was handsomely attired in a gown of rose colored silk and black hat. She was attended by her sister, Miss Mary Shelly; Mr. William Clooney, brother of the groom, acted as best man; the three little maids of honour were Misses Laura Clooney, Mary Heale and Mary Egan. After the wedding ceremony the bridal party drove to the residence of the bride's parents where a sumptuous repast was partaken of after which they drove to their future home, White Hills. The presents were numerous and costly, testifying to the esteem in which the young couple were held.

### Road Boards and Mails.

Editor Evening Telegram.

Dear Editor—The same rule holds here re Election Road Boards as in Conception Bay, Holyrood and elsewhere. A Proclamation posted as per the last Act passed for simultaneous election to be held 15th Nov., and still the Stipendiary Magistrate to hold all Elections throughout the District thus rendering the Elections illegal. Why is it?

And why is it necessary for all parcels from U. S. or Canada to be sent past their destination to St. John's? Can they not trust their officials in the outports to perform their duties in examination and collection of duties? If not they should change them, and get others whom they could trust, and not incommode, and give a lot of unnecessary worry to the public who will ere long get sick of their quibbling ways and try a bit of Russian on them. That time is approaching rapidly.

Yours truly,  
KERENSKY.

## WOMAN GIVEN TWO DAYS

To Make Up Her Mind for Surgical Operation. She Fused; Cured by Lydia E. Pinkham's Vegetable Compound.

Philadelphia, Pa.—"One year ago I was very sick and I suffered with pain in my side and back until I nearly went crazy. I went to different doctors and they all said I had female troubles and would not get any relief until I was operated on. I had been married three years before this time, but I kept getting worse the more medicine I took. Every month since I was a young girl I had suffered with cramps in my sides at periods and was never regular. I saw your advertisement in the newspaper and the picture of a woman who had been saved from an operation and this picture was impressed on my mind. The doctor had given me only two more days to make up my mind so I sent my husband to the drug store at once for a bottle of Lydia E. Pinkham's Vegetable Compound. I believe me, I only took four doses before I felt a change and when I had finished the third bottle I was cured. I never felt better. I grant you the privilege to publish my letter and am only too glad to let other women know my cure."—Mrs. THOS. MCGONIGAL, 125 Hartville Street, Phila., Pa.

### That night Cough!

You know it! It begins  
with a tickling, irritating sen-  
sation in your throat. You  
cough to clear the throat. In  
a moment, there it is again!  
A minute's peace, then  
again you cough, and so on  
until you cough your throat  
sore, and by the time the cough  
is sufficiently allayed to permit  
you to sleep, you are thorowly  
worn out. This kind of ex-  
perience is particularly trying  
to old people.

Peps make it quite unneces-  
sary for you to have this kind  
of thing happening.  
These night coughs are due to the  
formation of mucus in the air passages,  
or to a little inflammation in the bron-  
chial tubes. As soon as you put a Peps  
essence on your tongue, and allow it  
to slowly dissolve, healing balsamic  
fumes are liberated, which are breathed  
down the air passages and bronchi.  
These healing essences kill and soften  
and so transform the hard phlegm and  
mucus that it is easily expelled. They  
impact, too, a feeling of warmth and a  
glow of comfort in the region where pain  
and irritation were before felt. Remem-  
ber, also, Peps contain no opiates—no  
poisonous compounds. This makes Peps  
so suitable for the coughs and colds of  
children; and mothers should quickly  
obtain and appreciate this vast super-  
iority.

Just as the out-door treatment for  
consumption—the "breathing" treat-  
ment—is now admitted to be the only  
rational home treatment, Peps treat-  
ment means the BREATHING down  
to the lungs, bronchial tubes, and chest  
cavity, of healing, strengthening, purify-  
ing medicinal ingredients. You can  
SWALLOW medicine into your lungs.  
If a medicine can be BREATHED, it  
can't get to the lungs and bronchial tubes.  
Peps provide a medicine you breathe—  
not swallow. For all disorders or ir-  
ritations of the lungs, or bronchial tubes,  
therefore, use Peps. These include  
asthma, coughs, bronchitis, sore throat,  
tightness or aching across the chest,  
difficulty in breathing, hoarseness,  
asthma, laryngitis, smoker's throat,  
etc.

All druggists and stores sell Peps  
in 45c. box or 2 for \$1.00. Should  
your dealer be out of stock, order  
direct (postpaid) from Peps Co.,  
Duport St., Toronto, or 22 Front  
St., Winnipeg.

### Milady's Boudoir.

To eat too heartily is to ruin the  
digestion, not perhaps in youth, but  
as the years pass and every organ  
grows a little less able to do its ap-  
pointed duty. Perhaps this may be  
called the one special fault of women  
generally. They eat too heartily and  
take too little exercise. There will  
always exist the difference when it  
comes to proper exercise between the  
busy housewife who is on her feet  
most of the time and she who has al-  
most nothing to do in that way but is  
compelled to walk abroad for the pro-  
per amount.  
There is danger of straining the  
nerves and then the disaster of the  
broken or varicose veins, always the  
result of to severe a strain on the  
muscles of the calf and thigh. To go  
for extreme long walks when a num-  
ber of hours have been spent going  
about the house, is about a foolish as  
a thing as a woman, who wishes to pre-  
serve her beauty, can be guilty of.  
While this may seem not to be a need-  
ed bit of advice, as I am telling what  
should be the food to make a woman  
healthy and therefore, beautiful, it is  
in reality a very good point, because  
the woman who overtaxes her strength  
by too violent exercise is very apt to  
overload her stomach and be made ill  
thereby.  
If a woman must rise very early and  
prepare breakfast, she should take a  
little coffee or something hot, as soon  
as possible. Then she should eat leis-  
urely, no matter how many or how  
urgent her duties.  
If she eats a fairly hearty breakfast,  
the middle meal should be light, as it  
is then the extra pounds of flesh are  
likely to accumulate. If she takes a  
hearty luncheon the dinner should be  
light. The gist being that three hearty  
meals a day are only for the woman  
who does a hard day's work with her  
hands.

### Pape's Diapiesia for Indigestion Or Sour, Acid Stomach

In five minutes! No dyspepsia,  
heartburn or any stom-  
ach misery.

Sour, gassy, upset stomach, indigestion,  
heartburn, dyspepsia; when the  
food you eat ferments into gases and  
stomach lumps; your head aches and  
you feel sick and miserable, that's  
when you realize the magic in Pape's  
Diapiesia. It makes all stomach mis-  
ery vanish in five minutes.

If your stomach is in a continuous  
revolt—if you can't get it regulated,  
please, for your sake, try Pape's Dia-  
piesia. It's so needless to have a  
bad stomach—make your next meal a  
favorite food meal, then take a little  
Diapiesia. There will not be any dis-  
tress—eat without fear. It's because  
Pape's Diapiesia "really does" regu-  
late weak, out-of-order stomachs that  
gives it its millions of sales annually.

Get a large fifty-cent case of Pape's  
Diapiesia from any drug store. It is  
the quickest, surest stomach relief and  
cure known. It acts almost like ma-  
gic—it is a scientific, harmless and  
pleasant stomach preparation which  
truly belongs in every home.

### In Italy.

The world is watching Italy. As the great struggle draws nearer which will decide the fate of the northern provinces and which will have a profound effect upon the whole war, there is a lull upon the other fronts, as if they too stood still in expectant sympathy. We know, however, that there is nothing more than chance in this. Italy is preparing to strike again, for there are yet more places to be won on the heights before Roulers, and the stroke will not be delayed. Russia is working out her own salvation, or damnation as the case may be, whichever it is it will only be for a time. In Turkey in Asia great things are being done, things passing all expectation and to give due praise when the world has leisure to take stock of them. But the crux of the war at present is in Italy. A great battle, it may be the greatest since the beginning, is preparing along the line that runs from Lake Garda to a point barely twenty miles above Venice.

It is yet only possible to speak in generalities, and of these the most pertinent is that the situation would seem to be quite safe. A map is worth consulting and the boundary line of Italy and Austria worth noting. For it marks the battle-front from which Cadorna's forces had to withdraw, and its contour alone is proof of the merit of that feat. Had either wing of his armies caved in, disaster immediate and irremediable would have followed. But the wings were strong and are now stronger. The centre rests on the broad P i a v a. The position is very strong, and with reinforcements of men and guns pouring in to support an army which is already numerically stronger than its opponents, there ought not to be the slightest anxiety over the outcome. The enemy for the present appears to be confining his attacks to the one point where their success would be at all likely and of effect. This is in the Asiago region, against the Italian left; but the attackers are being held and the terrain greatly aids the defence. Every day and every hour that passes without a decision for the Austro-Germans is lost to them and gained by the Allies. Once the latter have their big guns in place the idea of a further advance by the invaders is inconceivable.

But it will be deplorable if nothing more than the halting of the advance is achieved. In fact such a thing is most unlikely. Whether intentionally or not, Germany has concentrated a huge force and striking power against her on this front, a new front we might call it, which, after the first danger is past, will not long be content with mere defence. The chances offered by a successful counter are too inviting to be missed. We are confident, as we have been from the beginning, that Germany has thrown a boomerang which will return upon her own head. General Diaz' left, as we have said, rests securely upon the Dolomite mountains. His right rests still more securely upon the sea, where it has the great assistance of Italy's full naval power. Once his centre is made strong enough and has resisted the enemy's onslaught, the whole line should be able

to pass at once to the offensive. This would hold out the same threat to the enemy that the Italians have escaped, with consequences far more serious by reason of the failure of his advance. Winter will be his foe rather than his friend, for fighting is possible right through the winter on this battlefield, while his communications through the Alps will be impeded by it.

We think the worst menace in the present situation is that to Venice. Berlin has announced the military importance of the famous port and it is undeniable, but the announcement had unquestionable sinister motives behind it. The German line is about twenty miles from Venice, possibly less, and a great effort will certainly be made to take the city. Failing that, however, the Huns will equally certainly do what damage they can to it with their long guns—hence the presence from Berlin that the bombardment will be justified on military grounds. They will count it a fine feat, almost compensating for the total failure of their ambitious drive, if they can ruin or disfigure some of the incomparable beauties of this home of beauty. If they can drop their monstrous shells on the Rialto, the Piazza or St. Mark's. Against the satisfaction such acts could give them the certain knowledge would weigh as nothing that the whole of Italy would be stirred to a white hot fury of revenge; nor is the threat of reprisals any more effective, since there is nothing in Germany to make them against except architectural monuments. It is the case of Rheims cathedral again: there is little fear in this great to raise in return an eyepiece like the cathedral of Cologne. Sentiment and love of beauty for its own sake avail little against these barbarians, but such is the love and veneration of the whole world for the treasures of Venice that it trembles for their fate almost as much as for that of the Italian armies.

### McMurdo's Store News

FRIDAY, Nov. 16, 1917.  
We are now again in a position to supply Cantharidine Hair Tonic our special and well known hair preparation. We are putting it up in bottles in 4 and 8 oz. bottles. On account of the rapidly increasing cost of the materials of which this remarkable tonic and dressing is composed, we have been compelled to raise the price of the 4 ounce size to 35 cents a bottle; but the large (8 oz.) size is still selling at the old price of 50c. a bottle.

We regret that we shall be unable to supply Dutch Bulbs this season, having found it impossible to procure shipment for them.

### Obituary.

There passed away on the 11th inst. at St. Joseph's, Salmonier, an old and respected resident in the person of John White, aged 84 years, a native of County Waterford, Ireland, who came to Nfld. with his parents in 1837. He leaves to mourn him, besides an aged widow, two sons and one daughter residing at Boston, Mass., one son and three daughters at Salmonier, and one daughter at St. John's. He was a carpenter, which trade he worked at all his life and until a few weeks before his death could be seen at his work bench. He was one of the real old stock, who are fast passing away and was always known as a hard working and honest man. His remains were interred at St. Joseph's on the 13th inst. May his soul rest in peace. —SALMONIER.

### Prohibition Case Dismissed.

JUDGMENT OF JUDGE MORRIS. In the Magistrate's Court. Between Stephen Rosewater, Complainant, and H. A. Smith, Defendant.

This is an action for a breach of Section 21 of the Prohibition (Plebiacite Act, 1915). The facts deposed to at the hearing are as follows:—The Defendant is a duly qualified Medical Practitioner. In October last Joseph Perez called at Defendant's surgery in St. John's, stated his uncle, Edward Butler, boarding at the Tremont Hotel, St. John's, was ill in bed, and asked for a prescription for him.

The Defendant knew Perez and also knew that his uncle, Edward Butler, had been ill for some time past, and believing Whiskey would do him good, wrote the following prescription:—"Siga. Frumentii ℥ XVII for medicine. H. A. Smith, M.D. E. Butler."

This prescription was never utilized; it having been lost by Perez shortly afterwards.

It is contended by the Prosecution that the giving of this Prescription was a breach of the 31st Section of the Prohibition (Plebiacite Act, 1915). Section 31 reads as follows:—

"In any medical practitioner gives a prescription for intoxicating liquors, or dispenses intoxicating liquors at any place within the Colony, except only for bona fide medicinal treatment, he shall be liable to a penalty."

A medical practitioner has the right under the law to prescribe and dispense intoxicating liquors for bona fide medical treatment, and I hold there is nothing in the foregoing section, which makes it incumbent upon him to personally visit his patient and diagnose his case before prescribing a remedy.

In this case prescribed the whiskey for bona fide medical treatment, and I therefore dismiss the complaint.

Messrs. Higgins and Duffell Counsel for Complainant.  
Higgins, B.L., Counsel for Defendant.

(Sgd.) F. J. MORRIS,  
Stipendiary Magistrate.

### A Child's Tongue Shows if Liver or Bowels Are Active

If cross, feverish, sick, bilious, give fruit laxative at once.

Every mother realises, after giving her children "California Syrup of Figs," that this is their ideal laxative, because they love its pleasant taste and it thoroughly cleanses the tender little stomach, liver and bowels without griping.

When cross, irritable, feverish or breath is bad, stomach sour, look at the tongue, Mother! If coated, give a teaspoonful of this harmless "fruit laxative," and in a few hours all the foul, constipated waste, sour bile and undigested food passes out of the bowels, and you have a little, playful child again. When its little system is full of cold, sore, has a simoniacache, diarrhoea, indigestion, colic, nervous, a good "inside cleansing" should always be the first treatment given.

Millions of mothers keep "California Syrup of Figs" handy; they know a teaspoonful to-day saves a sick child to-morrow. Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has directions for babies, children of all ages and grown-ups printed on the bottle. Beware of counterfeits sold here, so don't be fooled. Get the genuine, made by "California Fig Syrup Company."

### Boy Seriously Injured.

George Dowden, aged seventeen years, son of Mr. Thomas Dowden, Mullock Street, now lies in a critical condition at his home as the result of being thrown from a horse's back. The lad, who is fond of horses, was riding a saddle in a horse owned by Dr. Anderson and left the stable for a run. When passing Monkstown at the foot of William Street, the stirrup strap broke, and losing his balance he was thrown violently to the ground, his head striking first. He was picked up in an unconscious condition and conveyed to his home, where he was attended by Doctors Anderson and Macpherson. At 3 o'clock this morning he regained consciousness, but for only a few minutes, and up to a late hour to-day his condition has been critical. The young man was for some time attached to the regimental drum and bugle band and later was accepted as a regular soldier in the Regiment, but owing to a slight defect was obliged to resign. This was keenly felt by George, who possessed the spirit, if not the physical requirements, of a first class soldier.

### Police Matters.

The police are busy at present seeking an interview with the light fingered gentleman who removed goods from McRae's and Sapps store, without making any arrangement as to payment. Detective Byrne has gone up country on special duty.

WOUNDS GIVING TROUBLE.—Corporal Heenebury, who succeeded Corporal Hackett in looking after outport recruits on arrival in the city, has been obliged to relinquish the post, owing to his wounds giving him trouble. He is now replaced by L. C. Parsons.

### The Grand Falls Conscription Meeting.

Editor Evening Telegram.

Dear Sir,—The Patriotic Committee of Grand Falls having discussed recruiting at several meetings, and having come to the conclusion that some form of compulsory service was necessary, decided to call a public meeting in the Town Hall, which took place on Sunday evening, Nov. 11th, presided over by Mr. H. F. Fitzgerald, S.M., when Rev. W. T. D. Dunn, Rev. H. V. Whitehouse, Mr. N. Pike, Mr. F. W. Willis, Mr. Josiah Goodyear and Mr. W. Scott appeared on the platform, and between three and four hundred citizens in the body of the Hall.

Mr. Fitzgerald called the meeting to order at 9 p.m. and explained the nature of the meeting, and introduced Mr. F. W. Willis, the mover of the motion, who favoured the audience with the following address:—

Mr. Chairman and Gentlemen.—The question we have met to discuss is a very serious one, and one which has to be settled in Newfoundland very soon.

The Newfoundland Regiment has been engaged in serious fighting many times, and has been largely reduced in strength, and, as sufficient reinforcements are not coming forward, the authorities are already considering a measure of Compulsory Service. Our meeting to-night has been called to pass a Resolution in favour of Compulsory Service, and so to strengthen the hands of the Government, and urge them to quicken their action, thus to save valuable time.

In my opinion there can be no question of the necessity of the measure, and anyone who notices the results of the efforts made to keep the Regiment

at strength by the Voluntary Enlistment system is bound to be forced to the same conclusion. There are only two conditions open to us; either we must keep the Regiment up to strength or it must go out of existence as a separate unit. The latter condition is absolutely unthinkable.

Does anyone venture to suggest that we allow the splendid work of our boys to go for naught? What about Beaumont Hamel? What about Bellefleur? What about Monchy? These are names to be held in reverence. Has anyone the audacity to suggest allowing the Regiment to go out of existence?

And after speaking of the Regiment in general let us consider for a few moments our Grand Falls boys. We have sent from here nearly 500 volunteers, and many of these by sheer ability, shown in examinations and work, have risen in rank and fame. We can point with pride to all ranks as high as Captain, all from Grand Falls, and the latest report received is that one of our Lieutenants has won the Military Cross—Lieut. George Hicks. Is Grand Falls going to consent to allow our Regiment to go out of existence? I don't think so.

And to appeal stronger to you, gentlemen, what about our dear boys who have fallen? Are their names to go out of memory? No. Governor Davidson's Report gives a list of these up to May 3, 1917, which totals up to 388, and since that date there have been many more who have died the Supreme Sacrifice, and some of them from Grand Falls.

Now to go to official figures. At the beginning of this year the strength of the Regiment was, approximately 2,500, and since then, while 596 recruits have been accepted, 769 men have been put permanently out of action. Then there are the wounded, which must be reckoned at,

at least, half this number in addition. This works out that the strength of the Regiment is about 160 less than at the beginning of the year.

Grand Falls has done its part well, and has every right to express its opinion as to what other parts of the country ought to do. There are comparatively few belonging to Grand Falls who would object to a scheme of Compulsory Service immediately, as I am proud to say it, nearly all have either enlisted, or offered themselves and been rejected. This, I take it, gives us every right to give our opinion of what ought to be done in the matter. The eventual result will be the same, whether we pass this Resolution or not; the only thing being that if we pass it Grand Falls will have taken the lead again.

Some will ask why I, an Englishman, venture to publicly advocate such a measure for Newfoundland. My answer is that I consider myself as much a shareholder, and take as much pride in the Newfoundland Regiment as anyone. Two of my sons joined its ranks and have gone to the Front. Most of you know the result. For while I am too old to go, but am doing whatever I can to back up our brave boys here, and intend to continue to do so, and this is one way in which to do it.

I don't think I need say much more, as everyone must be perceiving well aware of what is going on. When it needs 37 men to work for three weeks, holding 43 meetings, to get 43 recruits where 500 ought to have been obtained, surely it is time to do something drastic. Those who were fit and ought to have offered sheltered behind these. The only fair way to keep the Regiment at strength is to produce some form of Compulsory Service, and it is our DUTY here to urge the Government to quicker action, to save valuable lives and time.

Before moving the Resolution I will ask you to discuss the question here

in the room, and not leave discussion until after the vote has been taken and the meeting is over, as that will not help us to come to a decision.

I now move:—"That this meeting of Grand Falls Citizens endorses and emphasizes the demands already made for the introduction in Newfoundland of some form of Compulsory Military Service; this being the only fair and equitable way to keep the Newfoundland Regiment in existence, and to ensure that the sacrifices already made by those who have voluntarily answered the Call of Duty shall not have been made in vain. A copy of this Resolution to be forwarded to the Minister of Militia."

Mr. N. Pike seconded the Resolution and gave a short account of the recent recruiting visit to Green Bay and White Bay. The Chairman then read the Resolution, of which several copies had been distributed over the Hall, and asked for a full and free discussion. Pte. H. Randell (returned soldier), Rev. W. T. D. Dunn, Rev. H. V. Whitehouse, Mr. W. J. Dover, and Mr. J. Goodyear spoke in favour of the motion, and as no person spoke against, a standing vote was taken, when their appeared a substantial majority for Resolution; but to give everyone an opportunity to record their vote, it was resolved on motion of Pte. H. Randell, seconded by Mr. P. Edwards, that a vote by ballot be taken. Ballots were then distributed and on being collected and counted by Pte. H. Randell, seconded by Mr. P. Edwards, after the result of the ballot was declared there was hearty applause, and the meeting closed by singing

GOD SAVE THE KING.

**Dr. Blackall Lectures**  
AT LLEWELLYN CLUB.

Dr. W. W. Blackall gave an interesting lecture at Llewellyn Club last night on "The Unsettled Paths of Newfoundland." Rev. Dr. Jones presided and introduced the lecturer who was, however, well known to all present. Dr. Blackall, explaining to the gathering that in saying "unsettled paths" he did not use the word in the literal sense, but meant places which are extremely isolated. His idea was to give a description of a tour which he made as Supt. of the C. of E. Schools around the great northern peninsula. Leaving the city, he described the various points of interest along the railway to Bay of Islands, where he joined the steamer at Humbermouth for Trout River. The scenery along the route and the industries carried on at various places were fully described. At Goose Brook he witnessed the coal boring operations where most of the coal is found in the country, but owing to its shallow layers, though they are distributed over a wide area, its working would be difficult and costly. The condition of the people at the different places and the natural beauties were fully described. Owing to pressure of time Dr. Blackall had to discontinue his address at a point known as Lobster Head, but will continue the story at a later date.

Mr. Henry of Parsons' Pond material, who was present, spoke of the present state of the people along the coast, who owing to the lack of education, were in a pitiful condition, and should a capitalist come in and open up the mineral resources of that great peninsula, the residents, would be nothing better than scavengers of wood by the water's edge, and the outsiders. He had unbounded faith in the resources of the north west coast. Speaking of Parsons' Pond, he referred to the hardships endured by the people. Recruiting at that section of the coast was nil. Only recently he saw two very young lads who had offered leaving Bonne Bay, and their conduct was a striking example to the many young men who stood idly on the wharf looking on.

Mr. Henry will address the Club on his next visit.

**City Council Meeting.**

The regular weekly session of the Municipal Council Board was held last night.

On behalf of Antonio Michael, Gibbs and Barron claimed \$250, account of damage done to client's stock by water when city employees were testing water supply in the adjoining Inspector Rooney reported on the matter and both communications were referred to the Solicitor.

Plan of proposed addition to Nfd. Brewery were submitted by Mr. J. C. Jardine and approved.

Some routine business was disposed of, after which the meeting adjourned.

**Gassed With Canadians**

The Director of Records at Ottawa wired yesterday to Mr. James Vey, stating that his son, Stanley, had been gassed and admitted to Second North Midland Field Ambulance. Stan, who was employed in the Bank of Nova Scotia at Victoria, B. C. before enlisting, was three years at the scene of war and this is the first time he has been put out of commission.

**A Dangerous Fire.**

At 3.15 p.m. yesterday the Central and West End Companies were summoned to the residence of Capt. V. Dawe, 11 Alexander Street, where a serious fire was in progress. Reaching the scene the fire-fighters had considerable difficulty in getting at the heart of the fire, which was mostly confined to a room over the kitchen and is supposed to have been started by live sparks coming from an open flange. In order to get at the blaze the firemen had to cut their way through, and having done so they soon had the fire under control. After almost an hour's fighting the "all out" signal was sent in. The house, which is owned by Capt. Reuben Benson, has been considerably damaged both by fire and water. The building and furniture are partly covered by insurance. Capt. Benson is at present on a foreign voyage.

That the meeting of Grand Falls Citizens endorses and emphasizes the demands already made for the introduction in Newfoundland of some form of Compulsory Military Service; this being the only fair and equitable way to keep the Newfoundland Regiment in existence, and to ensure that the sacrifices already made by those who have voluntarily answered the Call of Duty shall not have been made in vain. A copy of this Resolution to be forwarded to the Minister of Militia.  
Mr. N. Pike seconded the Resolution and gave a short account of the recent recruiting visit to Green Bay and White Bay. The Chairman then read the Resolution, of which several copies had been distributed over the Hall, and asked for a full and free discussion. Pte. H. Randell (returned soldier), Rev. W. T. D. Dunn, Rev. H. V. Whitehouse, Mr. W. J. Dover, and Mr. J. Goodyear spoke in favour of the motion, and as no person spoke against, a standing vote was taken, when their appeared a substantial majority for Resolution; but, to give everyone an opportunity to record their vote, it was resolved on motion of Pte. H. Randell, seconded by Mr. P. Edwards, that a vote by ballot be taken. Ballots were then distributed and on being collected and counted the result was 169 for Resolution and 124 against. After the result of the ballot was declared there was hearty applause, and the meeting closed by singing

## "Things" and Peace.

By RUTH CAMERON.

RUTH CAMERON

Isn't it an astonishing thing the way people who have been having a hard struggle to make their incomes cover their standards of living, and hating that struggle bitterly, will act when their incomes are enlarged. One would think their first feeling would be—here at last is freedom from this bitter struggle. I can pay my bills and stop worrying.

But no, nine times out of ten their first thought appears to be, now I can buy a piano, or a music box, or some expensive clothes, or an automobile, or have a telephone. And to the margin that would have meant freedom from struggle disappears, and the struggle goes on, dealing with larger sums to be sure, but just as bitter, just as harassing, just as peace destroying as ever.

Naturally Such People Must Spend Their Increases.

Mind you, I do not speak now of people who are below the dead line of a decent living wage. Naturally they spend any increase they get. Or rather they don't do anything as active as spend it, they simply see it gobbled up by the necessities of existence. I mean people living in decency and comfort.

Not long ago I was visiting a woman who with her husband has been waging a hand to hand fight for some years with narrow means. Life has grown a little smoother for them the last few months, the business her husband has been struggling to establish is at last beginning to show signs of life and activity. She told me that he

had made twice as much in the last six months as in the six months before that.

What Did She Do With All That Money?

"Isn't that splendid," I said, "and what are you going to do with all that money?"

As we talked she was picking up her bedroom and at that question she suddenly swooped down and picked up a worn pair of bedroom slippers. She held them towards me. "I'm going to buy myself a new decent pair of slippers without feeling extravagant," she said, "or without thinking I ought to wait till Christmas and see if someone doesn't give them to me."

I suppose I looked astonished for she went on.

Money To Replace Things That Wear Out.

"I mean that's the sort of thing I'm going to do, not try to get a lot more things or finer things, but just have enough money to replace little things when they wear out without wondering where the money will come from and if I can afford it. That's enough luxury for me."

In other words the money was not to mean more possessions to her but more peace.

Peace of mind is one of the most blessed things in the world. Why we continually pass it up for the sake of more "things" and still more things, is one of the riddles of existence.

## WAR NEWS.

### Messages Received Previous to 9 A. M.

NEW YORK, Nov. 15.

An Associated Press cable from London says: The storm warning of a ministerial crisis which flared up suddenly as a result of Premier Lloyd George's speech in Paris subsided almost as suddenly. Challenged in the Commons yesterday to explain his speech, the Premier contented himself by reading the actual terms of the agreement creating an Allied Council, which he declared made it clear that the Council was merely advisory and possessed of no executive power, and therefore could not override the decision of the respective governments or their military staff.

The Premier further offered to submit a letter in the formal debate next Monday, if the House desired, and with this offer the matter was dropped. It is assumed that the debate will have a lively character and although the possibility of a crisis is not excluded it is suspended until next week. The general opinion is that in the present difficult situation, despite the existence of a strong feeling against the Premier in some quarters, no statesman is anxious to shoulder the heavy responsibilities the Premier holds. A section of the British press made a great play on the alleged connection of Winston Spencer Churchill with the crisis on the ground that he was with Premier Lloyd George at Rapallo and at Paris. An authoritative statement issued last night declared that Churchill was not at Rapallo and therefore took no part in the conference at which the agreement was reached.

### Another Fish Carrier Torpedoed.

The schooner Hilda R., Capt. Yetman, owned by Messrs. McRae and Sons, of St. John's, was torpedoed recently off Cape St. Vincent, word to that effect having reached here last evening. At the time she met her fate the vessel was on her way to the Mediterranean with a cargo of fish loaded on the Labrador.

THANKS BIRATES.  
AMSTERDAM, Nov. 15.  
The German Emperor, according to a Berlin despatch, addressing U-boat crews in the Adriatic, and referring to the development of the U-boats,

said that a voyage of three or four weeks was now an every-day occurrence, and declared that the development of the U-boats had not reached its highest point. He expressed gratification at the amount of tonnage sunk in the Mediterranean, which showed that the U-boats had fulfilled what had been expected of them. The submarine war would have a decisive part in the final outcome of the war, and would not be stopped until the enemy was vanquished.

### NAVIES CO-OPERATE.

LONDON, Nov. 15.  
In an official statement issued this evening, the British Admiralty says: Since the arrival in England of Admiral Benson (U.S.N.) and his staff, he has been in frequent conference with the First Lord of the Admiralty and the chief and principal members of the naval staff. He also visited the Commander in Chief of the Grand Fleet on board his flagship, and is now visiting our principal naval bases. Very good benefit has been derived from these meetings and from the interchange of ideas and views. Co-operation between American and British Navies thus has been made easier and more complete.

### CANADIAN CASUALTIES.

OTTAWA, Nov. 15.

### THANKSGIVING.

There's much, on this Thanksgiving, we should be grateful for, although we now are living beneath the shade of war. Though we may push the dagger in foemen, to the hilt, when we stagger, there'll be no sense of guilt. We did not start to scatter the blood around in showers, no treaties did we shatter, the rough-house is not ours. The trouble we evaded so long the neighbours cried that dollar had faded our courage and our pride. Not to impose our kultur on other nations' schools do we ply catapult or the other deadly tools. Not that our hearts are burning with hate for Wilhelm's hordes, do we begin a-turning our stovehooks into swords. When peace again is reigning, and seems as good as new, there'll be no shamed explaining for Uncle Sam to do. No words need then be spoken, in Uncle Sam's defence; he has no pledges broken, in spirit or in sense. For this we should be grateful, while smiling cooks produce the large and brimming plateful of turkey, duck or goose.

### LEMONS BRING OUT THE HIDDEN BEAUTY

Make this lotion for very little cost and just see for yourself.

What girl or woman hasn't heard of lemon juice to remove complexion blemishes; to bleach the skin and to bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quarter pint of skin and complexion lotion at about the cost one usually pays for a small jar of ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for months. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin.

Any druggist will supply three ounces of orchard white at very little cost and the grocer has the lemons.

### Everyday Etiquette.

"When a new employee comes into the office and is introduced to me, should I rise and shake hands or simply acknowledge the introduction while sitting?" queried Mabel, the stenographer.

"It is a business affair. You should certainly rise but need not shake hands unless he extends his hand to you. A courteous bow is only necessary in such cases," said her older business friend.

### Respect for the National Anthem.

St. John's, Nfld., Nov. 16, 17.  
Editor Evening Telegram.  
Sir,—I have noticed with regret the disrespect unconsciously shown by the public towards the National Anthem!

I feel safe in saying this respect is unconsciously shown, and that the attention of the general public has only to be drawn to the fact to have the matter set right.

People seem unaware that whilst "God Save the King" is being played, every soldier stands at attention and that it is customary for the general public, in the British Empire, to at least stand perfectly still and not fidget around until the last bar is played.

Sincerely, with no apologies,

### Man Injured at the Station

At 11:30 o'clock this morning Mr. John Healey had a narrow escape from losing his left leg when a heavy set of train wheels, weighing thirteen hundredweight, slipped from off the flat car on which it was being placed and fell between the car and the breastwork at the rear of the general freight shed. The end of the axle, which extends about a foot outside the hub of the wheel, fell heavily across his foot, bruising and cutting the flesh, but fortunately no bones were broken. He was immediately removed from his unfortunate position by his co-workers, who also brought him to P. O'Mara's drug store, where he was attended to by Mr. John Roach, who rendered first aid. Dr. Roberts was phoned for and on arrival examined the wound and ordered the man to his home. It will be a considerable while before Mr. Healey will be able to resume work.

### DIED.

## \$4 Save Two Fingers

The fingers were those of J. W. Bonard, of 539 College St., Montreal. He says, "I was in a beam badly smashed my fingers. Two fingers were so badly crushed that the doctors said they would have to be amputated. Usually I didn't want this, but I decided to try Zam-Buk first. I applied Zam-Buk daily, and by the time I had used \$4 worth the injury was completely healed. My fingers were saved!"

Just another illustration of the healing power of Zam-Buk. It may be that your fingers will happen. It may be that you will get a burn, or a scald, or an eczema, or a skin disease. Keep it handy. Accidents are frequent than skin diseases, remember this—Zam-Buk is just as good for eczema, ulcers, skin diseases, piles, as for cuts, burns, blisters. All druggists and stores. Price 50c or \$ for \$1.25. Refuse substitutes.

**THE ITALIAN STRUGGLE.**

With the Russian situation still obscure by reason of the fact that no direct news has been received from Petrograd or Moscow, the Italian front remains of transcendent interest in the news of the world war. Everywhere along the battle front from Lake Garda eastward and then southward along the Piave River to the Adriatic Sea, the Italians are holding the enemy in check except in the hills in the vicinity of the Asiago Plateau, where more gains have been made by the invaders. The new advances by the Teuton Allies, as observed on the war maps, do not indicate that points of extremely great strategic value have been won but rather that the Italians on various sectors have given ground before superior numbers and at the same time have straightened out and lessened the length of their front. In the hills north of Venchian, General Diaz, the new Commander-in-Chief of the Italians, has withdrawn his advanced posts south of Monte Tomatic. On the Asiago Plateau and thence eastward to where the battle front meets the upper reaches of the Piave River the German and Austro-Hungarian forces are adding strength to their attacks, doubtless hoping to drive through the highland country to the plains of Venetia before the expected arrival of the British and French reinforcements become a fact. Notwithstanding the arduous retreat from the Isonzo westward the Italians evidently have been able to reinforce their northern line sufficiently to give battle to the enemy in such strength as to prevent a precipitate invasion of the lowlands, where undoubtedly it is the ambition of the enemy to turn the flank of the defenders and force a retreat of the Italians. Farther west, along the Piave from the

Fifteen hundred men at Trail Smelter are out on strike as a protest against the enforcement of the Military Service Act. They refused to present themselves at the tribunals. The situation is serious. Representations have been made to the Provincial Government, but it is unlikely that a provincial policy will be used to enforce the observance of the Act. Premier Brewster to-day was in conference with Major General Lockie of the district, but the latter is unable to take any steps without advice from Ottawa. Premier Brewster is placing the whole situation before the Ottawa authorities. The employees of Trail Smelter, mostly all aliens, are said to be determined in their attitude. At a meeting on Tuesday they decided not to subscribe to the Victory Loan and a number of them made bonfires of Victory Loan literature.

**GERMAN ATTACKS REPULSED.**

**LONDON, To-day.**

An official statement from British Headquarters in France and Belgium, issued last night, says: "Early this morning the enemy bombarded heavily our positions north of the Menin Road and shortly afterwards its infantry attempted to advance. The attack was successfully repulsed by our fire. Another party of the enemy which endeavoured to approach our lines northeast of Passchendaele also was driven off. The hostile artillery again has shown great activity in the neighborhood of Passchendaele and also north and south of it."

**KERENSKY GETTING UPPER HAND**

**LONDON, To-day.**

The Wallf Bureau, the official German news bureau, according to a despatch from Geneva admits that the Provisional Kerensky Government has mastered the revolt in Moscow. It says that Lenin still controls Petrograd, where fighting was severe. In the afternoon a despatch to Reuters says that telegraphic communication with Petrograd has been restored.

**PLAIN TALK FROM NOTHCILFFE.**

**LONDON, To-day.**

Northcliffe's letter to Premier Lloyd George declining the proffered Cabinet position follows: "Dear Prime Minister, I have given anxious consideration to your repeated invitations that I should take charge of the new

region of Foltre to the Adriatic, the invaders at numerous points have endeavoured to make new crossings of the river but everywhere they have been thwarted. Those of them who already are on the west bank of the river are being hard held to their original positions, the artillery and rifle fire of the Italians keeping them in check. Near Zonson the position of the enemy are gradually being encroached upon, while near the mouth of the river at Grisoleria the invaders in the swampy lowland are constantly under vigorous shell and rifle fire. Varied reports are still coming through concerning Russia, but out of the mass it has been impossible to disentangle one statement that may be considered trustworthy. One report has Petrograd in flames, another has 2,000 persons killed in the streets of Moscow during the fighting between the Kerensky and Bolshevik factions. Still another is that a Coalition Government has been formed in Moscow with members of the Bolshevik holding portfolio in it. Other unconfirmed reports are that anarchy reigns in Kiev and other Russian cities and that excesses against the Jews are being committed. Comparative quiet still prevails along the west front in France and Belgium. Geo. Clemenceau, one of France's most eminent public men and a former Premier, will form the new French Government.

**NO NEWS FROM PETROGRAD.**

**STOCKHOLM, To-Day.**

Telegraphic communication with Petrograd is still completely suspended. The only news of events there has been brought by travellers through Finland or transmitted by telephone, and these reports add to the confusion by their failure to give the dates of the various alleged happenings. According to what is apparently the latest telephone report from Finland is that all was quiet in Petrograd last night.

**THE IRISH SITUATION.**

**LONDON, To-day.**

Viscount Chaplin in the House of Lords to-day called attention to the gravity of the situation in Ireland. He referred especially to the Sinn Fein Campaign for an independent Republic. Baron Wimborne, Lord Lieutenant of Ireland, replying said he did not share Viscount Chaplin's gloomy anticipation despite the inflammable material. The gravest danger to be apprehended was the importation of arms or a hostile landing, but he had been assured that in view of the steps taken neither possibility was likely to arise. As to the internal situation in Ireland, that was not out of hand and generally the country was prosperous. The governing factor in the situation was the Irish Convention, which he believed had been rewarded with substantial progress. After alluding to the expected rising in Ireland last Sunday week, which didn't materialize, he said that had the Executive taken precipitate action the Convention would have been killed. This incident justified the Government policy not to seek trouble but to be prepared.

**Russia Still in the War.**

Premier Kerensky shows the strain of his tremendous exertions to rally the Russian people to face their duty to themselves and to stand by their allies in the war. The marvel is that this man of heroic soul but frail body has not succumbed to the ordeal. He

has been soldier as well as statesman, teacher as well as leader, orator as well as administrator, and everything at high pressure; carrying such a burden as no contemporary in the great struggle has known. The interview at Petrograd, which at first occasioned concern because it was misunderstood, reflects a weariness of the spirit verging on exhaustion. Kerensky is war worn, more even than his people; but he has no idea of abandoning the conflict, of turning his back upon his allies in the common cause of human liberty.

Russia's allies may find Kerensky's retrospect of their contributions to the war hardly to their liking. All have made supreme sacrifices, and if the East has saved the West in emergency, the West has reciprocated in full measure. Kerensky is just a little hysterical when he says that Russia "claims as her right that the Allies now shoulder the burden." What more could France have done in the field? Has not the British Empire responded to every demand upon her strength on sea and land and shared her purse with all her European allies? Mistakes, blunders in fact, have been made by all, a result of lack of co-ordination; and in Russia's case the revolution dislocated the strategy of the Entente, compelling Russia's allies, America among them, to "shoulder the burden." Certainly America is helping Russia with generous hands; and long ago America went to Russia's aid when the Rood mission and the Stevens railway commission were dispatched with plenary powers. All this Kerensky cannot have forgotten.

The assurance that Russia is still in the war was not necessary from the Premier, for less than two weeks ago he was rekindling the fighting spirit of his countrymen with fiery eloquence; and the Russian people have given so many exhibitions of recuperation and of their will to continue the struggle in spite of political and economic handicaps that we in America have never lost faith in them.

It may be, as Kerensky says, that "the disorganized state of life in general has had a psychological effect upon the people, so that they doubt the possibility of attaining their hopes"; but the fit of black depression will pass, new leaders will rise to compose differences, and soldiers will come to the front to inspire the army and restore discipline. The behavior of the Russian people in this war justifies that hope.—N. Y. Times.

Grape Juice is a mild, humane beverage which can be drunk in large, moist quantities without upsetting the equilibrium of the drinker. It is highly recommended by the clergy, who find that they can drink freely of Grape Juice just before ascending the pulpit without affecting the length or lucidity of their discourse. Grape Juice is made chiefly in western New York, where the Concord grape rears its shy head every fall and runs into the early frost with open arms. Grape culture is one of the most exciting pastimes known to the American people, as it is subject to frost at both ends of the route and is also liable to be drowned or dried out before reaching its destination.

Grape Juice is consumed with great eagerness by advocates of temperance, for whose benefit all of the alcohol is extracted before the process of bottling. William Jennings Bryan has declared that he would rather have one good swig of Grape Juice than run for president, while Roger Sullivan and Champ Clark are alive,

The Grape Juice industry has been a priceless boon to the newspapers and magazines, as it is advertised in several colours by the chief page. Grape Juice is about the only cold drink on sale that can be kept in the cellar without calling forth the ungodly jibes of the neighbours, and on that account its use should be encouraged.

##### ITALIAN OFFICIAL.

ROME, Nov. 15.  
The Italian official report is as follows: The enemy has intensified his action on the mountainous front from the Asiago zone to the Piave Valley. On Tuesday night he attacked Monte Slemol, Meletta, Davanti sector, and was resisted effectively. The action was continued successfully by us yesterday with the object of driving back with local counter attacks enemy parties which, having reached some advanced elements of our positions, attempted to remain there. Yesterday morning the enemy made an attack more to the north along the front of Meletta, Davanti, Monto Fiove and Mont Castigoberto, and was repulsed. He repeated his attempt during the night with larger forces and greater violence, but was again repulsed. Columns, which were advancing in fan-like formation, towards the front between Friaun and the confluence of the Brenta and Ciamon Rivers, were caught under the fire of our artillery and stopped. Large forces engaged our advanced lines between the Clesmon and Plavo Rivers. At Monte Roncone the enemy was repulsed. At Monte Tomotico our advanced posts withdrew, after offering effective resistance, to positions previously decided upon. In the direction of Quoro Pass the enemy attack was paralyzed on the plain. The struggle continues.

##### BRITISH-FRENCH TROOPS ON THE WAY TO ITALY.

WASHINGTON, Nov. 15.  
General Payelle will command the French armies now being sent to Italy, according to an announcement made here to-day. General Foch, Chief of the French Staff, is only temporarily in command of the French forces. From Nice comes the report that train loads of French and British troops are rolling constantly through that place on their way from France into Italy, and are greeted with great popular enthusiasm.

##### BRITISH CAPTURES.

LONDON, Nov. 15.  
In the Commons to-day during a speech, Henry William Forster, Financial Secretary of War, said that since July 1, 1916, the British had captured from the Turks 30,197 prisoners and 186 guns, and from the Germans on the west front 101,534 prisoners and 519 guns. The ap-

proximate square mileage of ground conquered or reconquered by the British in the same time, said Forster, was 128,000. The total number of prisoners captured on all fronts since the war began was 166,000, while the captured guns numbered 890.

##### PETROGRAD BURNING.

LONDON, Nov. 15.  
According to press reports from Stockholm, travellers who arrived yesterday evening in Haparanda, Sweden, from Finland say rumors are current there that Petrograd is in flames.

##### NEARING PETROGRAD.

LONDON, Nov. 15.  
According to a Petrograd despatch to the Exchange Telegraph Co. dated Wednesday, Nov. 14, Kerensky detachments are concentrated close to Petrograd.

##### POLLEN'S STATEMENT.

NEW YORK, Nov. 15.  
Arthur Pollen, the famous British war expert, has made the following statement to the Associated Press on the submarine war and various political crises in Europe: "Anything unsatisfactory in the military and political situation in Europe is balanced by the extraordinary news that the German submarine campaign has broken down altogether. The submarine is defeated. This is the most momentous event since the United States declared war. It means we can all stay in and that America can really come in. Six months ago shipping was being destroyed, according to some authorities, at the rate of nine millions of tons a year. Had this loss continued, the Germans had a right to expect, not indeed a military victory, but a peace that would mean something less than defeat. This was Germany's only hope, and it was the Allies' only anxiety. In the first fortnight of November the rate of loss of British tonnage in ships was greater than 1,600 each, has fallen to about one million tons a year. The present shipbuilding capacity of Britain alone can make this loss good in less than eight months. At the rate America, Britain and Japan are striving to attain, we should replace this in less than eight weeks. That rate of loss for a week is actually less than the annual toll of wrecks in peace time. It is an amazing development. It is not to be expected that the losses can remain as low as this. They must fluctuate up and down, but they should never cause us serious uneasiness. Compared with this, Germany's recent successes against Russia and Italy, and the jolt these have given the Allied morale, which we see reflected in the discussions on Lloyd George's speech, are really trivial incidents; whether the Italians hold the Piave, the Brenta or the Adige, whether it takes Kerensky and the forces that are

making for ordered government in Russia, a week, two weeks or a month to pull together that distracted country, whether the Commons on Monday forgives the British Premier's blazing brutality or resents it, are all compared with the change in the situation at sea, quite unimportant."

##### HAIG'S REPORT.

LONDON, Nov. 15.  
Field Marshal Haig's report from Flanders to-day reads: Yesterday afternoon hostile reconnoitering parties endeavored to approach our lines in the neighbourhood of Polderhoek Wood, north of the Menin Road, but was driven off with the loss of prisoners and killed. On the night of Nov. 13-14 Belgian troops entered German lines north of Dixmude and blew up a number of the enemy's concrete shelters. A hostile raid attempted last night north of Bixchoote was repulsed by artillery and machine gun fire.

##### PRISONERS TAKEN.

PARIS, Nov. 15.  
French reconnoitering parties in the region of Albert took prisoners to-day's official statement. The night was calm except in the region of the Cantieres, Verdun front, where a heavy bombardment is being carried on. On Tuesday four German airplanes were brought down by our pilots and four others fell disabled within the enemy lines. Our aviators made a number of effectual raids dropping many projectiles on various enemy depots and cantonments in the region of Mulhausen. German aviators carried out a violent bombardment on Tuesday night in the region of Calais. It is reported there were a number of victims among the civilian population.

##### UNCONCERNED ABOUT AMERICA.

COPENHAGEN, Nov. 15.  
Capt. Baron Von Richtefen, Germany's leading aviator, expressed himself as unconcerned over the reported preparations to place twenty thousand American aviators on the Western front; he believes it will be impossible to get together that many trained pilots. Lieut. General Von Ardenne, of the Berliner Tagblatt, who reports a conversation with Von Richtefen at the Flanders front, adds that the German air service, which evidently has been forewarned by the newspaper discussion of American plans, is steadily increasing the number of aviators and machines.

##### JAPAN.

NEW YORK, Nov. 15.  
An answer to the charges that Japan is lukewarm to the Allied cause because its armies are not fighting on European battlefields, which he said appear occasionally in the American press, was made before the Rotary Club here to-night by Dr. T. Lyonaga,

##### Director of the East and West News Bureau.

He declared Japan is understood in Europe, and is carrying out fully its part as originally agreed upon, and that it had not been seen fit by the Allies to suggest any change in the plan.

##### FRENCH OFFICIAL.

PARIS, Nov. 15.  
The War Office announcement to-night reads: There is nothing to report except rather violent artillery action north of Brave-on-Laonnois and on the right bank of the Meuse, Eastern Theatre.—There was moderate artillery activity along the whole front. Patrol encounters occurred in the region of the lakes.

##### NEW GOVERNMENT FOR FRANCE.

PARIS, Nov. 15.  
Geo. Clemenceau, one of France's most eminent public men, and former Premier, will form a new French

##### Government.

It was Clemenceau, for many years one of the most forceful figures in French public life, who instituted the campaign against German propaganda in France, and it was largely on that issue that the Pauley Cabinet fell. The "Figer" as he is nicknamed, is known as an exponent of the big stick, and it has been prophesied that if he should be appointed Premier he would stamp out socialism, radically and rapidly. The chief obstacle to his employment was felt to be the implacable hostility of the united socialists who have never forgiven his drastic methods when he was Premier. Clemenceau is 76 years old. He is sometimes referred to as more of a destructive than constructive statesman and is reputed to have upset nearly a score of cabinets. He has held no ministerial posts in recent years, devoting himself largely to his newspaper, "L'Homme En-

chane," which has been suspended several times because of his biting criticism of the Government.

##### NORTHCLEFFE DECLINES.

LONDON, Nov. 15.  
Lord Northcliffe has declined the offer of the Administration of the new Air Ministry made to him by the Premier. In a long letter to the Premier, Lord Northcliffe explains that his refusal of the portfolio is due to dissatisfaction with some of the methods of Lloyd George's administration, especially with regard to relations with the United States. Lord Northcliffe says his desire, therefore, is to maintain an independent attitude.

##### THE RUSSIAN PROBLEM.

COPENHAGEN, Nov. 15.  
A Helsingfors despatch to the Politiken says, the military committee last night received the following by

telephone: "When the revolutionary troops reconquered Gatchina, Kerensky with three thousand to five thousand men retired to the south. An order was given to cut off this retreat, and part of the northern army was despatched to attack him in the rear. The people seem to have lost confidence in Lenine and Trotsky, and it is intended to form a social revolutionary coalition government with representatives of all parties except the well-to-do. The first task of the new government will be to make peace with the enemy."

## MAURICE'S WEEKLY TALK.

LONDON, Nov. 15.  
In his weekly talk to the Associated Press yesterday, General Maurice did not attach vital importance to the fact that the Germans have already succeeded in crossing the Piave River at one point, as he said only a small force had crossed and the Italians should be able to deal with them adequately. The Italian line on the Piave, said General Maurice, is the shortest one for them and it was the line originally fixed by Cadorna when he began his withdrawal. Every day that the Italians hold this line makes the situation more encouraging. The next line of defence is the Brenta and the next after that the Adige, but both are much longer than the Piave line. One danger to the Italians is their northern or mountain front. If the enemy breaks through there he cuts off the Italian forces in the plains. On the other hand the mountain front is one which should be easily held. There is much reason for optimism about the Italian situation on the Piave. They have been established there now for several days and have had time to rest and improve their positions. Meanwhile the German lines of communication are getting longer and more difficult. Bridges must be repaired and the German railroads are a long way back so it takes much time to get up guns, ammunition and supplies. Regarding the operation in the eastern theatre, General Maurice said: The keynote of our operations in the Eastern Theatre is the defeat of Von Falkenhayn's preparations for the recapture of Bagdad, General Maude's latest move up the Tigris succeeded in destroying the Turkish stores of ammunition piled up for this enterprise. Having accomplished this Maude has now fallen back to his old position, and there is no point in prolonging the line of communication to no purpose. Meanwhile General Allenby has been striking powerful blows on the Palestine front. The forces opposing Allenby have been very roughly handled, they have lost half of their effectives and must be reinforced from the army which Von Falkenhayn has been preparing at Aleppo for the Bagdad attack.

## FIGHTING IN PALESTINE.

LONDON, Nov. 15.  
Reuter's correspondent at British headquarters on the Palestine front in a despatch dated Tuesday, says: There has been severe fighting in the vicinity of Vadi-Suskerier since yesterday. The enemy sanguard has taken up desperate resistance, apparently realizing that distance and lack of proper communication will not stop the British advance, and therefore like a cornered animal is determined to die game at Burkah. Scottish troops who had captured the ridge were counter attacked so vigorously that they were obliged to yield ground which afterwards was recovered, nevertheless the Turks made a second vicious counter attack but again their temporary success was converted into defeat and they finally were driven off with heavy losses. Since early morning fighting has been general along a considerable front. According to latest reports we have made an important advance bringing up within seven miles of Ramleh, some twenty miles northwest of Jerusalem, which is the centre of the Turkish position and Turkish headquarters. Our left has pushed across the Wadi Tubin and occupied the important town of Yebriah and reached El-Kaboleh. The Turks offered a stubborn resistance on the front of our right and centre which nevertheless gained considerable ground. More prisoners were brought in to-day bringing the total to about six thousand, while with the guns discovered yesterday a total of 90 has been reached. It is stated that the population of Gaza which, as reported, has been removed by the Turks, is being settled in Asia Minor to replace the massacred inhabitants of an Armenian village.

## BELGIAN OFFICIAL.

PARIS, Nov. 15.  
The Belgian communication issued by the war office last night says: During Nov. 13th, artillery fire was rather lively southeast of Dismunde. Enemy aviation carried out raids on the night of Nov. 13-14 and dropped a number of bombs on Adinkerke, Fance and Furnes, causing a number of victims among the civilian population. North of Dixmude one of our detachments exploded a mine near the German lines. During the day the activity of the two artilleries was stronger along the entire front.
