had been trapped, and it was not until the disclosure of his work in connection with the Pitzel murders were made that her friends began to fear the lives of herself and child had been taken. Mr. L. Conner, who was with their 12-year-old daughter, came from Davenport, Ia., to Chicago, in 1888. Holmes at that time was beginning to execute the swindles for which he afterward became notorious. One of his schemes was the "drug and jewelry store in the Englewood flats.

Had Holmes in Her Power. Conner, who was a jeweler, was ordered to conduct the jewelry store and moved, with his family, into a flat above it. When Holmes had perfected his plan of robbing his creditors, he pretended to make a sale of the store and stock to Conner. Mrs. Conner was given a position as bookkeeper. Soon afterwards Holmes, wishing to get rid of Conner, furnished him with proofs of his wife's infidelity. Conner promptly abandoned his wife, and she, it is alleged, became a partner in the nefarious schemes of Holmes. In this capacity she soon learned the character of the work he had in hand, and to a degree had him in her power. They had many violent quarrels, and in 1888 the woman and her child disappeared.

The theory of the people who have been investigating the case is that they were murdered to prevent exposure. If Mrs. Conner and her child are dead, as now seems almost certain, the list of murders with which Holmes is charged numbers eight, viz.: B. F. Pitzel, the three Pitzel children, the two Williams girls, and Mrs. Conner and child, and there is a plausible theory for the crime in each case.

Another Intrigue. Holmes had intrigued with four women at this time, and so clever was he that each believed she was the only one. Mrs. Warner was a handsome woman, and she was the only one who was brainy. Holmes caused proof of Mrs. Warner's frailty to fall into Mr. Warner's hands. There was a separation. Warner went to Chicago, and it was reported that his wife was dead. This message came from Holmes. Warner married again, and while walking with his bride he encountered his first wife. There was a scene, and he was threatened with prosecution for bigamy. He had his second marriage annulled, with the consent of his new wife, and began proceedings for divorce from No. 1. He got it, and re-married wife No. 2. Warner was the man whom Holmes, by false representations, induced to pose as the head of the Warner clan, and it was by which a number of Chicago investors were swindled out of a large sum of money.

Investigators Killed. During the search of the Englewood premises, formerly occupied by Holmes, three men, who were digging in the cellar, were seriously injured by an explosion of some sort of chemical. The first thing the plumbers placed there by the confessed swindler and suspected murderer. The injured are: Tim Mulcahy, Fire Marshal James Kenyon, and Charles Oshet. Mulcahy will probably die. The men were running a tunnel towards the street when they encountered a well that gave a hollow sound. When they broke through, they were overcome by an odor that indicated a charcoal house. A plumber was sent for, and the men gathered about while he proceeded to investigate. The first thing the plumbers laid to was to light a match. There was a terrific explosion inside the chamber, and flames poured out into the cellar. The only one that escaped uninjured was the plumber. Subsequently, when the chamber was opened up, a tank was discovered, in which Holmes had pretended to manufacture gas from chemicals. There was a small box in the center of the tank. When this was opened by Fire Marshal Kenyon an ill-smelling vapor rushed out. All ran except Kenyon, who was overcome by the gas. The tank was filled with gas, and for two hours acted like one de- mented. He says his head still feels queer.

The Gas Swindle. These incidents created great excitement in the neighborhood. There were more volunteers, and one tank was thoroughly searched, but nothing more was found. This tank was formerly in the center of the cellar. Holmes had filled it with water, then tapped a gas main under the street, and conveyed the gas into the tank, and ran a pipe with many jets up through the water. He brought investors to view the tank, and while they were looking in would throw in 20 pounds of chemicals and light the gas. This was the great Holmes gas, capital \$50,000. He caught four men for \$15,000. The Englewood Gas Company finally found where a big share of their output was diverted, and he was arrested for fraud.

later was arrested for the crime and sentenced to five years in the penitentiary. Mrs. Gurley refused to talk much about the case at the time, but threw out hints about having done the job for the police to be done merely for effect, and no organized effort was made to look up the woman's associates. Since the exposure of Holmes' rascality it has been ascertained that the Curleys were not only neighbors of his at 63rd and Wallace-streets, but were on intimate terms with him. It is believed now that the abduction of the child was put up by Holmes.

Not Human Ribs But Fire Clay. The rib-like fragments found in the ashes under the stove in the room of the Holmes building at 63rd-street, and supposed to be the remains of the two missing Williams girls, were late last night subjected to a chemical test by Dr. C. P. Stringfield, and pronounced by him to be bits of fire clay. When matched together the pieces of fire clay will continue the search of the cellar at 701 Bixby-third-street for more traces of the murderous work of Holmes. If there are any bones of Holmes' suspected victims the detectives expect to find them.

KILLED WHILE PLAYING GHOST. A Young Man Loves His Life Trying to Kill a Woman. Niagara, July 21.—A sad affair took place near Six-Mile Creek some time last evening, in which a young man named S. Rodgers lost his life while playing a practical joke on an Italian named Dominick, employed by Mr. Frank Havens as a farm hand. The two young men were cooking hay, when Rodgers left the field, and going to the house, returned with a sheet, intending to frighten the Italian, who has a mortal fear of ghosts. Enveloped in the sheet he hid behind a cock of hay, and as the Italian came along suddenly sprang up before him. The Italian, being nearly frightened to death, quickly thrust his pitchfork into Rodgers' eye, inflicting injuries from which he died almost immediately. Nothing has as yet been done with the Italian.

REPAIRING SMALL DRAGERS. The Morality Department is Busy With Its Paid Informers. Inspector Lechford has two informers out endeavoring to buy cigars on Sunday. One of the men is named Freyer, and with a companion goes about the city and makes acquaintance with a regular customer, and, if possible, inveigles the dealer into selling them. These men were admitted in the Police Court in the case of a blind tobaccoist named Wilson of 67 Queen-st. West. There are similar cases against John Burke, 504 King-street east; A. E. Walton, 718 St. James-st. West; and Joseph Wilder, Queen-st. west, and Louis Joseph, King-street east. All these cases will be heard on the 24th inst.

Toronto's Opportunity. Editor World's Toronto ought to be the eastern terminus of the C.P.R. and the western terminus of the New York Central. Few people who have not studied the import of the above lines are aware of the potentialities of this city. With the completion of the proposed lines to what is now required in order to make this a great city and connecting with the west, two great highways is the building at one of the Toronto C.P.R. lines, and the other line to the Canadian and American North-west territories. By the building of this link a saving of 50 miles would be effected in the journey. Winnipeg and St. Paul, and St. Paul, Minneapolis and Duluth passengers could be ticketed right through to New York and the Atlantic. Toronto. The time is opportune. Millions of money to be had in London. Steel rails are cheap. The right of way would cost but a trifle. The Mayor and Council should interview Sir William Hannay at once, and see what can be done to hurry up the project, which, if under way, would give this city another ward of great prosperity that would not stop until our population increased to half a million. The commencement of the work should be at the hotel, and also a fleet of steamboats similar to the Hudson and Fall River lines would be put on the route to Quebec and Montreal. In fact, it would divert a large share of the traffic from the Montreal route, and would be a scheme before the public that should excite our earnest and immediate consideration. The Mayor and Council should refer this City Council or Board of Trade will take this matter in lively shape.

LIVE MAN. East End Notes. Kew and Balmy Beach both presented the liveliest scene all Saturday afternoon and evening. There were hundreds of visitors who were seen on any day during the season. Everyone seemed to enjoy themselves.

The Oil Contract. There promises to be some fun at the joint meeting this afternoon over the oil contract for the Waterworks. The Engineer recommended the oil of the Vacuum company. The committee preferred that of McColl Bros. The battle of the oil contract promises to be as interesting as that of the coal supply.

Had La Grippe. Mr. A. Nickerson, Farmer's Point, died yesterday. He had La Grippe, and it left him with a fever, and he died. The doctor who was called to attend him was unable to do anything. He was buried yesterday. The cause of death was La Grippe, and it was a very severe case.

Local Jottings. The excursion to Brantford to-morrow is of the Grand Trunk employes. The Little York and not of Toronto. The Toronto trainmen will run an excursion to Collingwood on Civic Holiday, Aug. 13. L. & S.'s brand of hams, bacon and lard is the best, because made on hygienic principles and from clean, dairy-fed pigs. "Wheel Outings in Canada" is the title of a nicely gotten-up brochure by the Princes of the Canadian Wheelmen's Association. The work is illustrated with half-toned engravings and accompanied by letters descriptive of many scenes of natural beauty that are available for those who wish to enjoy the pleasures of the wheel. L.O.L. Maple Leaf, No. 455, held another annual enjoyed garden party at Ex-Ald. Small's grounds, Queen-street east, on Saturday. During the afternoon the members and their friends looked on at the games, of which a capital program had been arranged and promulgated around. The band of the Working Boys Home played a number of popular airs and rickety-tunes. After the various prizes were given away, a nice assortment of prizes was given away by District Master W. J. Blackard and Chaplain E. C. Harris from the veranda of Mr. Small's house. A woman's shoe was found closely pressed into the crevices of the firebrick of the stove, and several buttons partly charred turned up in the ashes. In the day the stove was taken down, and some hair was discovered in the chimney. The stove is not large enough to consume a body unless it were cut into pieces. Also a kidnapper. Some years ago Chicago was started by the bold kidnaping of little Annie Hedmond, daughter of a South Side blacksmith. Hit-abductors, while keeping their identity a secret, admitted in a series of notes sent to the parents of the child their sole object was to hold her for a big ransom. The kidnaping, as afterwards proved, was done by a Mrs. Gurley, who some time

Corwall White-washed. Corwall, July 21.—Never in the history of the Corwall Lacrosse Club has the team met a whitewash until they crossed sticks with the Capitals on the home ground yesterday. The Capitals won by the terrible score of eight goals to nothing, and it is now almost certainly a foregone conclusion that the club won't win this winter. When they jumped the fence and dispersed, they fled out the back door, and were seen to be carrying away a large quantity of the Capitals' equipment. They were prepared for a desperate struggle, the desperate struggle that did not materialize. The Capitals would not let Corwall win the game. The Capitals thought 7-12 minutes of the game. The Capitals scored. This they repeated, third in 2 minutes, fourth in 2 minutes, fifth in 2 minutes, sixth in 2 minutes, seventh in 1-1/2, eighth in 10-2 minutes. There is no doubt that the fact that the Capitals are so good is a great advantage. The home team have good material that is being developed, and the Capitals may be a great team in the future.

TO MEET PEASANT OPINION.

German Socialist Abandon Their War on Private Property. The annual congress of the German Socialists will meet on Oct. 6 in Breslau, where Ferdinand Lassalle, the great German Democrat leader, is buried. Although Lassalle is not now the ideal of the Socialists of Germany his memory is still potent to stimulate their oratory, and so long as they are themselves tall they are as happy a Socialist can be in this work.

Not a Different Question to Settle. Editor World: The Dominion Parliament acted with great wisdom when it resolved to refer questions relating to the grievances of minorities in the different provinces of Canada in regard to education to the courts. It is a pity the courts or some judicial body outside of Parliament had not been appointed to decide the extent of the grievance in each case that may arise, and to suggest the proper and just remedial course to be followed by the government. It is not a different question to settle in reality. The Privy Council of the empire decided that the minority in Manitoba has a grievance. Mr. McCarthy, counsel for Manitoba, practically admitted this fact; and the gentleman who introduced the Manitoba School Act of 1870. The question of the religion of the minority appealing should have nothing whatever to do with the settlement of the matter. Such a question would not be considered by a court. The minority appealing for relief would sometimes be Protestant (many people seem to forget this), and sometimes Roman Catholic. The courts would administer the same law equitably to both Protestants and Roman Catholics. All fair-minded people desire to see the Dominion settled by judicial consideration for such appeals in Parliament. It matters not which party is in power, race and creed issues will be appealed to, and the people of the Dominion will be agitated by bitter controversies, in which their prejudices, and not their judgment, will be aroused. Surely it is not even yet too late for the party leaders at Ottawa to agree on a judicial settlement of the Manitoba school question, as a precedent to be followed in deciding similar cases in other provinces, old and as new in the future. This appears to be the only truly patriotic course to adopt.
