To the Governors of

The Royal Victoria Hospital :

GENTLEMEN,

I have the honor to submit herewith the first Annual Report of the Royal Victoria Hospital.

The hospital opened its doors on the 2nd January, 1894, with accommodation for 146 patients. On the 5th October, by the opening of three more wards, the capacity of the hospital was increased to 180 beds, distributed as follows: Medical Department, male 30, female 30, children 10; Surgical Department, male 30, female 30, children 14; Gynæcological Department, female 20; Private wards 16.

There are three wards, with 80 beds, yet unopened. When these are occupied the hospital will be at its full capacity of 260 beds.

Until the 14th April, the work of the hospital was carried on under the direction of Drs. Stewart, Roddick and Adami; on that day the following appointments were made to the attending staff: Dr. James Bell, surgeon; Dr. F. Buller, ophthalmologist and otologist; Dr. W. Gardner, gynæcologist, and Dr. F. W. Hamilton, assistant physician; and on the 16th October, Dr. A. W. Gardner was appointed assistant gynæcologist.

The attendance of patients at the out-door department has been quite large, and greatly in excess of what was anticipated.

Surgeons.

ANE, M.D.

SON, M.D.

VIN, M.D.

W, M.D.

keeper.

MURRAY.

The Pathological Building was opened in October, and has proved an invaluable addition to the hospital, its arrangement and equipment being most suitable and complete in every respect.

There have been admitted into the hospital during the year, 1570 patients; of these 1345 were discharged; 776 cured, 401 improved, 97 unimproved, 71 not treated, 84 died, and 141 remained.

Of the 84 deaths, 20 took place within 48 hours of admittance.

The death-rate for the year has been 5.9 per cent., or, after deducting those who died within 2 days after admittance, 4.5 per cent.

There were 861 males, 709 females; 1017 Protestants, 501 Roman Catholics, 52 other religions; 1102 free patients, 300 public pay patients at fifty cents per day, and 168 private patients.

The average number of days in hospital per patient was 29.3; the medical being 29, the surgical 29, the gynæcological 32.4, and the eye-and-ear 25.6 days per patient.

The largest number of patients in the hospital on any one day was 180, the smallest 7, this latter being the number admitted on the first day of its opening.

The number of out-door consultations for the six months ending 31st December, was 4792:—medical 1795, surgical 990, eye-and-ear 1310, diseases of women 697.

The income for the year amounted to \$70,480.54, while the expenses were \$65,134.72, as set out in the accompanying statement.

The cost per patient per day was \$1.42. This, however, is higher than it will be hereafter, the expenditure for management and domestic purposes having been necessarily almost as large for the small number of patients in the hospital at the commencement as will be incurred when the hospital is fully occupied. Other expenses incidental to the first year, also contributed to this result.

The heating and ventilation of the buildings have been most satisfactory during the past year; the large wards have been very free from odor, and the temperature quite as high as was necessary. On the 24th February last, when the outside temperature reached as low as 20° below zero, the ward thermometers registered from 67° to 70°. The lighting of the buildings by electricity produced by the hospital plant, has also been very satisfactory.

The expenditure on the fuel necessary to produce these results has been large, but in view of the detached character of the buildings, the large quantity of air passing through the wards and corridors, and the lavish amount of light, it is easily accounted for.

To meet the probable financial requirements of the hospital over and above its fixed income, the founders, Lord Mount Stephen and Sir Donald A. Smith,

K.C.M.G. on the 18th June last very generously contributed \$20,000 each, which as will be observed by the accompanying balance sheet, has been more than sufficient to cover the expenditure.

The thanks of the hospital are due to the ladies and gentlemen mentioned in the accompanying list of donations for the presents received from them during the year, and also to Miss Angus, Mr. and Mrs. E. S. Clouston, Miss Duck, Miss Esdaile, Mr. A. Hodgson, Miss Paterson, Mr. Henry Robinson, Mrs. Shaughnessy, and Mr. D. Watson for their kind assistance at the Christmas festivities to the patients.

I append statements of the work done in the hospital during the year.

Respectfully submitted,

JOHN J. ROBSON,

Secretary & Superintendent.

SURGICAL OPERATIONS

For the Year ending 31st December, 1894.

HEAD AND NECK.			
SCALP.		FOREARM.	
Excision sebaceous tumor	2	Resection for compound fracture	1
EAR.		Removal of sequestrum from radius	1
Repair of deformity	1	Curetting carpus for tubercular disease	1
FACE.		Resection for green-stick fracture deformity	1
Hare-lip, repair of	3	Ganglion (incision)	1
Epithelioma of lip, excision of	2	HAND.	
Excision of tumor	1	Excision of wound and for tetanus	1
" pigmented naevus	1	Incision and curetting for cellulitis	1
JAWS.		Skin-grafting, ulcer on palm	1
Excision inferior maxilla (carcinoma)	5	FINGERS.	
Necrosis " " (curetting)	2	Amputation	1
MOUTH, PHARYNX, Etc.		Incision for cellulitis	1
Cleft palate, repair of	1	" " whitlow	1
Epulis	1	THORAX & CHEST WALL.	
Excision of tongue	1	BREAST.	
Partial excision for tubercular carcinoma	1	Excision for carcinoma	16
Post pharyngeal abscess	1	" fibroma	2
Carcinoma of Tonsil	1	" carcinoma (secondary)	1
NECK.		Incising and curetting abscess	2
Excision of tubercular glands	16	CHEST.	
Incising and scraping abscesses	4	Opening abscess, chest wall	2
Excision of cyst (submaxillary)	1	Curetting carious rib and et sinus	1
Removal of calcifoid thyroid tumor	1	Thoracentesis for empyema	1
Excision of internal jugular vein for septic thrombus	1	Removal of foreign body from bronchus	1
UPPER EXTREMITY.		Skin-grafting after burn	1
AXILLA, SHOULDER.		ABDOMEN.	
Caries of acromion, curetting	1	ABDOMINAL WALL.	
Opening abscess about shoulder joint	1	Abscesses incised	1
Removal of bursate exostosis (humerus)	1	Fibroid tumor removed (inguinal region)	1
Opening axillary abscess	1	Inguinal glands excised (recurrent cancer)	1
Recurrent fibroid of shoulder	1	HERNIA.	
ARM.		Radical cure (inguinal)	3
Suture of humerus for ununited fracture	1	" (femoral)	6
Abscess incised	1	Hernia of ovary (radical cure)	1
ELBOW-JOINT.		LAPAROTOMY.	
Reduction of backward dislocation of ulna	1	Appendicitis	36
Excision of septic joint	1	Resection of intestine	3
		Hæmatoma of broad ligament	1
		Removal of biliary calculus	2
		Inguinal colotomy	1
		Reopening for pus after appendicitis	1
		Intestinal obstruction	4

EXPLORATORY.		LOWER EXTREMITY.	
Tumor of liver.....	I	GROIN.	
Sarcoma of omentum.....	I	Incision and curetting suppurating glands.....	2
Tubercular peritonitis.....	I	Necrosis of pubic bone.....	I
Pelvic Tumor.....	I	HIP.	
General carcinoma.....	I	Excision of joint for morbs corae.....	3
Carcinoma of rectum.....	I	" old dislocation.....	I
Sinus in abdominal wall.....	I	Curetting sinus in buttock communicating with pelvic cavity.....	I
BACK AND VERTEBRAL COLUMN.		Incision to sacro sciatic notch (explorat'y).....	I
Psoas abscess, lumbar incision.....	I	THIGH.	
Laminectomy.....	I	Abscess (incision).....	3
Gunshot wound.....	I	" senile gangrene.....	I
GENITO-URINARY.		" septic knee joint.....	I
KIDNEY.		" sarcoma.....	I
Nephrotomy & drainage for Pyonephrosis.....	2	Incision abscess of stump.....	I
Perinephritic abscess.....	I	Curetting sinus following excision of knee.....	I
BLADDER AND URETHRA.		Sequestrotomy.....	3
Supra-pubic cystotomy for calculus.....	2	Trephining femur (ostronytitis).....	I
" " and prostatectomy.....	2	Curetting (caries).....	I
Supra-pubic cystotomy for tubercular cystitis.....	I	Cellulitis (incisions).....	I
Median, pennisal cytotomy.....	I	Removal of sarcoma from buttock.....	I
Evacuation of abscess in perineum.....	I	Opening psoas abscess.....	I
Incisions for extravasation of urine.....	I	KNEE-JOINT.	
Operation for ectopia vesicae.....	2	Incising and curetting suppurating patellar bursa.....	2
External urethrotomy for stricture.....	3	Excision of knee joint (tubercular).....	3
Internal " ".....	5	Suture of fractured patella.....	4
Ext. & int. " ".....	4	LEG.	
Ext. urethrotomy for recto-urethral fistula.....	I	Incision and curetting for necrosis.....	2
" scrotal sinus.....	I	Osteotomy for bow-legs.....	3
Removal of impacted urethral calculus.....	I	Removal of exostosis.....	I
SCROTUM AND TESTES.		" " bony prominence of stump..	I
Excision of testicle for sarcoma.....	I	" " " after bad union.....	I
" " tuberculosis.....	I	Trephining for abscess.....	2
Hydrocele tapping and injecting sac.....	I	Sequestrotomy.....	I
" excision of sac.....	2I	Skin-grafting, ulcer.....	2
Cancer, lepros.....	I	ANKLE.	
ANUS AND RECTUM.		Cauterization for arthritis.....	2
Ischio-rectal abscess.....	I	Curetting inner malleolus for tubercular disease.....	I
Removal of hæmorrhoids, clamp & cautery.....	5	FOOT.	
Incision of anal fissure.....	3	Amputation of toe for gangrene.....	I
" fistula.....	8	Abscess and necrosis of metatarsal bones.....	I
Excision of rectum for cancer.....	2	Incising abscess of heel.....	I
Incision of rectal stricture.....	I	Resec'n of tarso-metatarsal joints (de- formity).....	I
		Tenotomy for talipes.....	3
		Tarsectomy for talipes.....	I

To the Board of Governors

Royal Victoria Hospital.

GENTLEMEN :

The First Annual Report of the Training School in connection with this Hospital must of necessity be brief, as the School has been organized so short a time.

In January last we opened with twelve nurses—graduates of different schools—but the number of patients admitted during that month being greater than was anticipated, the staff was rapidly increased.

In March the class for pupil-nurses was organized, and probationers accepted. It was not deemed advisable, however, to begin the lecture course until October.

From October 1st, 1894, to January 1st, 1895, the following lectures have been delivered :

Three on Physiology, by Drs. Adami and Martin.

Three on Hygiene, by Dr. Craik.

Five on Diseases, by Dr. Stewart.

The nurses' library has been generously supplied with medical works by members of the Board, and with lighter reading, for hours "off duty," by Mr. S. Coulson.

During the year we have received 350 applications for admission into the Nursing School ; of these, thirty-four were accepted as probationers, and twenty-six retained as pupil-nurses.

Twenty-three graduate nurses have also been engaged at different times, six coming for post-graduate course of a year. Ten are still remaining with us.

The present staff consists of—

Night Superintendent.....	1
Graduates—Head Nurses.....	7
“ Senior Nurses.....	3
Senior Pupils.....	12
Junior Pupils.....	14
Probationers.....	3
	<hr/>
Total.....	40

The health of the school has been uniformly good, no case of serious illness occurring during the year.

As the practical training of the pupils depends so largely on the head nurses, and the general tone of the school is materially influenced by them, the plan of selecting head nurses from amongst graduates, and appointing pupils in exceptional cases only, is considered the best method of organizing a school, and the one which we have adopted and hope to retain as its advantages become apparent.

As an important part of the work for the coming year, I would strongly urge the necessity of a Diet Kitchen, where the nurses may receive practical instruction in preparing food and delicacies for the sick. This branch of training is universally recognized to be of the utmost importance in a nurse's education, and no school is complete without it.

In order that the training to be obtained here may be equal to that of the best schools anywhere else, we hope that this necessary addition may soon be included in our course of instruction, thus enabling us to send out nurses who will be doubly valuable to patients, both amongst the rich and poor.

Respectfully submitted,

E. A. DRAPER.
