The Mining area of the Company consisting of five square miles, is situated at Salt Springs, on the I. C. B., within a helf mile of the I. C. R. track, and but two miles from Spring Hill Mines, being the eastern or inner half of Spring Hill Basin, and in the very heart of that vast coal field. The Government have built a siding on the property, and the Company have built the rack to the mine; sunk a slope 180 feet, cut levels 300 yards, erected buildings for the miners, and stable for the horses. Also, erected buildings for the miners, and stable for the horses. Also, erected boiler house and smith shop, engine house, pit-head, carpenter shop, etc. Also, equipped the mine with boiler and engine, hoisting machinery co aplete, trollies, pit-boxes, steam pump and fixtures, hose and steam-pipe to-gether with all tools and appliances for carryon the business of mining and shipping coal.
Having thus thoroughly opened up the works, and tested the property, and proved beyond any reasonable doubt that the property contains an immense deposit of Coal, of a very superior quality, the Company offer this, the half of first issue of Stock to the public, for the purpose of extending the slope, and open-ing up the works on a more extensive scale; furnishing machinery requisite for the same, and for building more houses, and buying land The shipping facilities of this mine cannot

be surpassed and is not equalled by any mine in the country. Throughout the year ship-ping can be carried on without interruption; no locomotive is needed, and no expensive R. R. track and appliances for shipping to be supported; hence the saving from this source alone, is sufficient to insure a fair dividend on the small capital of the Company.

The main seam has a solid stone roof, and neither slope nor levels require timbering, hence the mine can be operated were alone. hence the mine can be operated very cheaply.

The coal is very clean and bright, resemb-

ling the Albertite in appearance and nature, more than any other coal yet discovered in this country.

It is a very valuable gas coal, while for being use it has no superior, being very clean and free from soot and smell, and makes very little ash.

It produces great heat, and hence is greatly prised by stoam users, especially where tubular bollers are used.

In the long grass above my grave. I shall not heed them where I lie, Nothing their sound shall signify; Nothing the headstone's fret of rain Nothing to me the dark day's pain.

Sooner or later the sun shall shine With tender warmth on that mound o Sooner or later, in summer air, Clover and violet blossom there.

I shall not feel, in that deep laid rest, The sauting light fall over my breast, Nor even note in these hidden hours The wind-blown breath of the tossing for Sooner or later the stainless snows Shall add their hush to my mute repose

Sooner or later shall slant and shift,
And heap my bed with the dazaling drift. Chill though that frozen pall shall seem, Its touch no colder can make the dream That recks not the sweet and sacred dread

Sooner or later the bee shall come and fill the noon with its golden hum; Sooner or later, on half poised wing, The blue-bird's warble about me ring—

Ring and chirrup and whistle with glee, Nothing his music means to me; None of these beautiful things shall know How soundly their lover sleeps below.

Sooner or later, far out in the night,

The stars shall oven me wing their flight; Sooner or later, the darkling dews Catch their white sparks in their silent noo

Never a ray shall part the gloom
That wraps me round in the kindly tomb;
Peace shall be perfect for lip and brow.
Sooner or later—Oh, why not now!

Fredericton, N. B. King Street, Piano Box Wagons. Concord Wagons, Iver's Wagons. White Chapel Wagons, Top Phætons. Miller Spar Wagons, Brewster Wagons, Cronin Wagons, Open Phætons.

Soe Manufacturers of Miller's Patent Shifting Rail. These Shifting Tops have no rival, as a glance at the cut will show for itself; it is so simple trequires only one person to take it off or put it on, and when off no one would think a Top had seen on, as no unsightly ends are sticking out. When the Top is on it is as firm as a rock. It cap e put on any carriage in use. Persons ordering Buggies or Canopy Top Carriages should see that they have this Rail, as it will be greatly to their interest.

These Tops were awarded a Diploma at the Provincial Exhibition in October, 1880
