They asser that the expedition consists of from four to five thousand men, well armed, and with abundant pecuniary means, commanded by Generals Lopez and Gonzales. Great care has been taken to keep which her pit themselves against the desires of the mass the affair secret, but it was believed that spice of the Upper Canadian population. Mr. Lafou- had communicated all their plans to the Cuban Authorities. If this be the case, a very few days will bring us authentic intelligence. The following is the only notice of the affair taken by the

contest, which his folly is bringing on, the Lower Canadian British will side with the Upper Canadians, and that he will not be supported by the intelligent of his own countymen in an attempt to continue what is, in reality, priestly domination. The times are against him—popular opinion is adverse to extending the power of priesthood by permitting it to hold or to control large endowments is land, or by forming itself into powerful Corporations. There is in the minds of men a strong disposition to the voluntary system, or the support of Ministers of religion hy the congregations to which they belong. Anything beyond this is, in fact, to create an establishmed Church, or what is almost worse, a set of Church, or what is almost worse, a set of Churches; and as such establishments support of less dependent on this Government, they, in return, add to the power of that Government, they, in return, add to the power of that Government, they in return, and thereby take so much power from the people. In this Parliament, subservient as it is, Mr. Lafontains will probably deficat the Bill for the secularization of the Clergy Reserves, but he will ruin the Ministry of which he is the leader, and open up an agitation more deaperate and determined than Canada has yet seen. The Upper Canadians have their eyes open now, and will not submit to his dictation on a question peculiarly their own.

in a Fix-Chancery Proceedings against the Rectors-Scotch Degrees-The Dixon Libel Case The League Manifesto-City Crowded. TORONTO, May 13, 1850.

Toronto, May 13, 1850.

Parliament meets to morrow. For two or three days past Members have been arriving in the city. The fitting up of the Parliament buildings was completed on Saturday; and at night both houses were illuminated, for the special benefit of the good people of Toronso, many of whom went to see the elephant. The large-glass chandelier, in the Assembly Room contains 129 gas lights. Before Saturday night, I had no correct conception of what the Legislative Council Chamber would be like when the fixings were completed. It is fitted up in a style of great extravagance. The Bar of the House is composed of burnished brans; and the caricature throne, an indispensable appendage of the gilded mockery of delegated royalty, is, of course, a great affair. A shocking bad portrait of the Queen hangs on the West wall. The rows of seats I spoke of in a previous letter, are for the Members of Assembly when they visit the "Lords." The chairs of the Members are much the same as those in the other House, but desks there are none.

the Members are much the same as those in the other House, but deaks there are none.

If the Royal Speech, as it is styled by courtesy or custom, omits all reference to the Clergy Reserves, Cameron or Perry—I am sorry to say that poor old "Pete" is very unwell—will have to move an amendment, and then the fun will commence. Sir Allan McNab will take the ground that the Ministry went to the country on this question at the last Election, and that they are bound to take it up and settle it. The utilicular of the matter is this:—Lafentusine, who is indebted for his political status to the Priests of Lower Canada, is utterly opposed to any interference with the matter. Five Members of the Cabinet are opposed to his policy; but as "he con the conditions of the constitution of the matter is this:—Lafentusine, who is indebted for his political status to the Priests of Lower Canada, is utterly opposed to any interference with the matter. Five Members of the Cabinet are opposed to his policy; but as "he con the condition of the Clear Grits has placed the Cabinet are opposed to his policy; but as "he con the in a most embariassing dilemma. The obliged to submit to his will and plessure.

The tact of the Clear Grits has placed the Cabinet meetings in this city last week, is to be carried out. A Committee meeting of the Anti-diction of the public meeting, that the Clergy Reserves and Rectory questions should be made to the promise made at the public meeting, that the Priest of the promise made at the public meeting, but in vain; the majority of the Michigan at \$4,81 @ \$4,871. Reserves and account of the promise made at the public meeting, but in vain; the majority of the Committee nailed them to the point, and the two Secretaries were authorized to wait upon Mr. Baldwin to ascertain when he and his collengues could make it convenient to receive a deputation from the Committee. The reply was that he would confer with his collengues on the subject. Here the matter stands at present. Whatever may be the result, it cannot be denied that the Clear Grits proved an over-march for the Mainisterialists at the public meeting, which were, in fact, originated by the Ministry for theatrical effect, and as a means of getting themselves let down easy.

fact, originated by the Ministry for discrete fact, and as a means of getting themselves let down easy.

I have it on good authority that proceedings in Chancery have been, or are about to lie, commenced to test the validity of the Rectory Patents. There are various opinions respecting the legality of these Patents, and it is difficult to say which amongst them is the correct one, as the facts, on which these various opinions are founded, are somewhat controversed, and not at all clearly satisfied. One party has it that the Patents were signed in blank by Sir J. Colborne; but this remains to be proved. The constitutional question respecting the involability of a Patent from the Crown is by this time probably not surrounded with much difficulty. There seems to be something like a general admission that, whether the Patents were legally or illegally issued, the Rectors have acquired certain rights under them, and could not be disturbed during their lives, even though the Court of Chancery should prosounce the Patents illegal. I do not believe that the Chancery proceedings will result in any disturbance of the Rectories. The Chancellor is known to have expressed himself strongly in favor of the

we have expressed himself strongly in favor of the vested rights created by the Patents; but this was before he had chiefled his way to fortune.

The trial for Libel of the parties who signed the Petition to the Government praying for the dismissal from the Magistracy of his. Dinon, of the Coopen has been postponed all the Fall Assires. The Crown Selicitor stated that he was unable to go on, owing to the evidence not having here purpose of giving time to procure the accessary evidence.

Our advices from South Australia are to the 15th f January. Adelaide papers of the 12th are re-

next week.

It appears that gold has been found in small quantities, from time to time, by various parties in South Australia. For nearly two years past the process of exploration has been going on silently and cautiously, and the result is in the formation of these Companies, backed by some of the best names in the Colony, who guarantee the sober reality of what has hitherto been only a dream, "that gold exists in large quantities in the soil and alluvial deposits made by the rivers of South Australia." There are great expectations that Both Companies will be eminently successful, and that the Colony will be greatly enriched by these discoveres. The disportion which existed for emigrating to Catifornia had quite abated, and parties who had engaged passages were for feising their passage money, being convinced that they were going to a distance to seek that which was to be found at the door.

The whole line of the Onkaparinga is said to exhibit suriferous deposits, on which river the Australian Gold Company had secured various sections. In some parts it was expected that gold in large quantities would be found.—N. Y. Trib.

may be accommodated by giving notice the day before.

Ice Creams, and other Refreshments, of various kinds, always ready.

The Healthy Situation of MONKLAND, (which contains upwards of SIXTY ROOMS, on the rising ground to the West end of the Montreal Mountain, and commanding a Splendid View of the River St. Lawrence, the Lachine Rapids, the Ottawa River, and the adjacent country,) is too well known to requise any remark; and the Extensive Grounds attached, afford a large and perfectly safe PLEASURE GROUND, in which children may roam at pleasure. All this will, he feels confident, justify the support of those whose desire it is to retire to the country during the heat of Summer, and be still within a few minutes walk of the City.

It is his intention to establish a LINE of OMNIBUSES from his house in Place D'Armes to Monkland.

HALSEY'S FOREST WINE! HALSEY'S FOREST WINE!

Patronized by the Nobility and Medical Forulty of England, and sevened the most extraordinary Medicine of the Age.

MEDICINES containing Melanes or Liquorice, like the boasted Sarsaparillae, require many large bottlen to produce the slightest change in health. The Porest Wine is altogether a different article. It contains no Syrupa to give it consistency, but acquires he excellent davor and powerful medicinal qualities from the vegatable plants of which it is composed. The Forest Wine combines the virtues of the WILD CHERRY. DANDELSON, YELLOW 100 K. and NARNAPARELLA. With other valuable Plants whose properties are still more powerful.

Its high concentration renders it one of the most efficient Medicines now in use. Less than a single bottle restores the lingering Parient from weakness, debility, and sickness, to strong and vigorous health. Every dose shows its good elfects on the constitution, and improves the stale of the liceth. The Forest Wine in recommended, in the strongest terms, for all complaints of the
