JUST ARRIVED

Bridgetown to Boston \$11.50.

It may be doubted whether the old adage, "A stitch in time saves nine," will apply with as much force to any other farm operation as it does to spraying, for with many of the fungous diseases of plants, unless the spraying is done before the plants are attacked, it is a waste of time and materials. And with All of the pears for which we spray. this coming season he will practice the most approved methods of spraying and then let him carry out that resolve.

The first two pests which claim our attention are the cyster-hell bark loses and the bud moth. If your trees are infested with bark lice or if they are covered with moss or old bark and lock as though they needed a general clearing up, nothing will do them so much good as spraying with potash, either the rock potash, which can be bought for about 8 c. per pound, or with the leachings from wood ashes. One who has never tried it will be surprised at the wonderful improvement this will make in the appearance and thriftiness of the trees. It cleans off all the old bark or roughness of any kind, thereby removing countless bark lice, insect eggs and fungous spores, and it makes the trees look almost as though they had been varnished. Try it and you will have all your neighbors stepping in to ask how you did it. And the beauty of it is that whatever material is applied in this way will eventually find its way into the soil, where it will make the best of fertilizers for the connt the milk, it has been mut, it has been mu

growth in the orchard, the little worm goaws its way into the centre of the expanding bad and there plays have with the prospective crop of fruit by eating the young bad. Our object should be, therefore, to prevent the worm from getting into the bud, and to do this requires very careful apraying with Paris green. I should alwing samples are opened ariginates among the proint of the little leaves, and if the insect is very troblesome I should apray a secondition as few days later when the buds are fairly well opened, using or both spraying Bordeaux mixture with #1b. of Paris green to the cask. The Boracas mong the proint of the little leaves, and if the insect is very troblesome I should be proved the word from the best way into the centre of the expanding the province of the little leaves, and if the insect is very troblesome I should be provinced to the cask. GENTLEMEN OF THE MUNICIPAL COUNCIL:
Allow me to welcome you to this Session
of Council, it being the Forty fourth Session
of the Municipal Council and fourth session
of this Council.
Since our Aunual meeting in January, I am pleased to inform you that the Committee on Turders and Public property have taken the advice of Doctor Sinclair, who so kindly came from Halifax last January and address-

came from Halfax last January and addressed this Council at our annual meeting, upon
the general management of our County
Lunatic Asylum at Bridgetown, and provided a new Superintendent and sufficient
help to run this Asylum as it should be run
for the benefit of the unfortnnate class of
patients kept in an institution of this kind;
and from what I have seen and learned the
committee are accomplishing more than they
anticipated. I hope you will all join with
me in tendering them congratulations. No

COUNTY ASSESSMENT.

GENTLEMEN, —In reference to County Assessment there is something about the assessing in this County which is very bad. Some properties are valued too high, while others are assessed far too low, and the inequality in our Ward assessment is very bad. If you would look over the assessment rolls of each Ward you would soon see the unequal assessment. It seems as if the Assessors of some Wards are bound to make a lower assessment than other Wards do, throwing the burden of County taxes on the Wards that are assessed near valuation. Is it not in our power to remedy this injustice? If so let us undertake to do it.

The Provincial Legislature has seen fit at their last session this winter to place another Bridge act on the Statutes, known as the "Small Bridge Act" the details of which sees the word of the statutes, known as the "Small Bridge Act" the details of which sees the word of the season of the season of the season of the statutes, known as the "Small Bridge Act" the details of which sees the word of the season of th

Hood's Pills cure all liver ills. Non irri-

many ways. If the piano pedal squeaks, hat squeaks, rub it with common hard soap, and it will act like magic upon it. If you have a corn that cries out for relief, bind a piece of a corn that cries out for relief, bind a piece of soap upon it. If a door hinge groans every time you swing the door open, give it a hard soap treatment. It is often the remedy close at hand that is overlooked.

It is said that horse chestnuts are valuable in ridding pot plants of earth-worms. Grate a horse chestnut, put with it nine times its bulk of water, let stand over night and strain; then water the plants with the liquid.

The Weekly Monitor,

At Bridgetown, Annapolis Co, N. S. M. K. PIPER, Proprietor and Publisher JOHN R. PUDSEY, Manager.

WEDNESDAY, APRIL 25TH, 1900. Board of Trade into a more effective organ ization for the promotion and protection of the town's interests, and a rally of the enterprise and public spirit, that is working in so many directions, to this cause is the only way to successfully accomplish this object. The true value of such an institution the mouth-piece of the commercial and general public interests, there its worth is fairly demonstrated. Because the Bridgetown Board of Trade has not accomplished great things in the past is no argument why it should not now be made an active factor in working out the welfare of the community. A period of apathy has left our organization with a substantial membership and a solvent treasury, and what we now urge is a renewed interest from old members and the association of every business man and citizen who tion of every business man and citizen who is interested in the progress of the town. A wideawake, representative Board will constitute an untiring-agent in discovering and mitigating the evils that hamper on and mitigating the evils that hamper our industrial development and in shaping the future growth of the town. That we need just such an agent cannot be fairly denied.

No metric how official to the control of the con No matter how efficient our civic government there are many matters that, need attention that will escape its notice, and the direction of the public eye to these matters, direction of the public eye to these matters, and agitating the improvement, can bette be done before the Board of Trade than i the Council Chamber. Experience has show us that the chief difficulty in engineering a improvement through the Town Council, unless that party itself is the prime mover, lies in the fact that it is well nigh impossible to present the scheme in a sufficiently adto present the scheme in a sufficiently advanced stage of agitation to ensure an intelligent vote when a ratepayers' meeting is called by the Council. The Board of Trade would furnish an excellent school for primary would furnish an excellent school for primary both political parties. tion of the Board would be a guarantee of the wisdom and popularity of any proposition emanating from its discussions. While

come deeply impressed with its possibilities.

Recognizing the loss our splendid farming and orcharding country sustains through the exodus of the young men from the farms to the neighboring Republic, he is sealth. exodus of the young men from the farms to the neighboring Republic, he is seeking to lay bare the cause and, if possible, check the drain. His action is commendable, and his remedial suggestions, as outlined in his letter in this paper, if acted upon, should improve than during March.

The apple house is being completely emptied. A shipment of one thousand barrels, which will constitute the last export for the season, is being sent to Liverpool was steamer from Halifax. The London market is reported as several points lower than during March. the situation. He is grappling with a problem that has only recently received any degree of attention from either the press or our legislators, though it is one of paramount importance to our province. Systematic education in all branches of farming must be promoted, and the government would be considered to the constant of t education in all branches of farming must be promoted, and the government would be justified in largely increasing its subsidies for this purpose. Demonstrate that there is money in farming, that an apple orchard is a better investment than a gold mine, and that the boy on the farm is more certain of health, peace and competence than his city brother, and the urban loadstone will lose much of its power of attraction. It is because he wants to earn money that the average farm lad seeks employment elsewhere. A desire for the excitement of city life or to see something of the world are subordinate to this longing to handle hard cash, and if

will be increased to four trips per week the latter part of June.

—Mrs. Greatorex wishes to thank, very much indeed, the kind friends who prepared for her such a pleasant and acceptable surprise. The writing desk and chair will always be highly valued by her as a practical proof of the kindly feelings exhibited towards her by her friends in Bridgetown.

—The Board of Trade meeting last Thureday evening in Mr. Daniels' office was not largely attended, owing, no doubt, to the disagreeable weather, and it was adjourned to meet to morrow evening at the same place at 730. It is hoped a large representation of the membership will be present, as business of importance is to be transacted.

—William Wigginton, policement of Annaof the membership will be present, as business of of the membership will be present, as business of this longing to handle hard cash, and if modern agricultural methods, or a father's willingness to show proper appreciation of the value of his son's services, will place him in a position of proper independence in this respect, farming will soon become a popular industry. Until he is made a partner in the farm and understands thoroughly that its improvement will result to his financial advantage, the boy can hardly be blamed if he seeks his fortune in another direction.

The Time is not Yet.

(The Pall Mall Gazette.)

After this war something will have to be a feature of the membership will be present, as business of importance is to be transacted.

—William Wigginton, policeman of Annapolis, was brought before Fred Leavitt, Eq., Stipendary Magistrate of that town, yesterday, on the charge of embezzlement. J. G. H. Parker appeared on behalf of the crown, and O. T. Daniels for the prisoner. No evidence of the commission of any crime being produced, the Justice ordered his discharge.

—Rev. E. B. Moore gave his second discourse to men only at the Y. M. C. A. last Sunday afternoon, subject "The Majesty of Strength." The address was practical and very appropriate to the work of the Association. Mr. Moore will deliver another address next Sunday week, May 6-h, subject "Honor and Honesty." Every young man will find it to his advantage to attend these meetings.

regulating influence, and every public spirit ed citizen should lend his aid to this end.

The Time is not Yet.

(The Pall Mall Gazette.)

After this war something will have to be done, no doubt, to facilitate such united deference in the future, but even that process cannot be rushed, much less that of the political consolidation to which also recent events have given a decided impetus. Above all, it would be fatal to give the Colonies any sort of impression that we are anxious to force them, to compel them to come in and incidentally, as they might apprehend, to lose something of their absolute freedom and autohomy. No Briton desires anything of the kind, and, as Mr. Chamberiain well says, it, is our place rather to follow the Colonies than appear to dictate, while they may rest assured that "however far they may be willing to go in the driection of Imperial unity, we shall be willing to follow."

The Invitation must and will in good time, we are convinced, come from them. But there are steps to be taken first. Australia is about to federate; South Africa will probably federate not very far on in the twentieth century; and consolidation of the whole. In Great Britain itself men's mind's may by degrees come to favor a Zollverein and all that it involves. But everything must work itself out gradually and naturally. It is not one of those things that must always be thought of but never calked about. The more we all accustom ourselves to the problem the better. But to precipitate official or semi-official overtures would be one of the worst services to a cause which all approve, and which is certain of success if judiciously left to develop itself.

[The Railway News.]

The Chigneeto Ship Rallway.

[The Railway News.]

The Chigneeto ship railway is again attracting attention as Mr. Provand, the principal content would some the more are a more or two of the preceding ones, but it was undoubtedly hard play, and the winners left or ground for dispute as to their right to the championship. This game practically ends and profitable service may go ad

[The Railway News.]

The Chigneeto Ship Railway.

The Chigneeto ship railway is again at tracting attention as Mr. Provand, the principal promoter of the late company's interests, is again at Ottawa in the hope of having the government reconsider its decision of some time ago. We believe under the circumstances that the former government of Cana'ts, whether rightly or wrongly, having held out certain encouragements to the projectors of the scheme whereby English capital to the extent of three and a half millions was spent on this project should not break faith and if the promoters can still show evidence that they will complete this project and-put it in operation the government should carry out its original intentions. Notwithstanding the numerous objections to the idea, we believe, properly managed, It would open up a new avenue of traffic and make a short out in navigable waters be tween the Upper Provinces and the U. S. that would be conducive to the commercial trade interests of the country.

The Apple Barrel.

The latest parliamentary attempt to regulate the size of the apple barrel is as follows:—

1. Subsection 1 of the section substituted by section 2 of chapter 28 of the statutes of the derivation and rided the pockets of the local quarters but our lads soon adapted themselves to the larger play area, and administered a good drubing to the home team. The score was 6 to 0 in favor of Bridgetown. While the game was in progress, smak theives entered the dressing room and rided the pockets of

late the size of the apple barrel is as follows:—

1. Subsection 1 of the section substituted by section 2 of chapter 28 of the statutes of 1899, for section 18 of the Weights and Measures Act, chapter 104 of the Revised Statutes, is repealed and that the following substituted therefor:

"1. All apples packed in Canada for sale by the barrel shall be packed in good, strong barrels of seasoned wood having dimension not less than the following, namely: twenty-six inches and one-fourth between the heads, inside measure, and a head diameter of seventeen inches and a middle diameter of eighteen inches and one-half.

"3. When potatoes are sold by weight, the weight equivalent to a barrel shall be one hundred and seventy-four pounds."

"4. Roggles, Herman Young, Evelyn Legge, and L. J. Phalen.

Auctioneers and Fruit Brokers.

The Useful Toad. That the toad is beneficial to the farmer d particularly to the gardener, is admitted ov everyone who has observed its habite dditional facts have been secured by recent bservations at the Massachusetts expe ent station, which show the toad's food i Warerooms at J. H. HICKS & ent, of which are directly injurious to cult

vated crops, or in other ways obnoxious to The toad feeds on worms, snails, sowbugs mmon greenhouse pests and the many legged worms which damage greenhouse and garden plots. It feeds to some extent or rasshoppers and crickets, and destroys large

numbers of ants. It consumes a considerab umber of May beetles, rose chasers, click peetles or adults of the wireworm, potate ectles and cucumber beetles. It is a prime To all agriculturists the toad renders co picuous service, but the gardeners and enhouse owners should make this animal of especial value. Every gardener should im to keep a colony of toads among his rowing crops, and the practice of collecting

and tranferring them is a commendable one Two years ago I found some black knot on plum tree. To remove it by cutting off the limbs would greatly disfigure the tree. The idea occurred to me to cover it with a plastic salve that would prevent the spores eing cast off and thus prevent any further crease. I mixed equal parts of kerosene. Special attention given to Repairing

weight, especially after a rain. In going over

WHAT ALL MILE SHOULD BE AND MAKE IT SO. the lover of flowers, and she will be wild to To produce pure and wholesome milk the the lover of flowers, and she will be wild to get to work in the garden. "The Roses ought to be uncovered," will be the first thing to be done is to procure a good, relating the business for which you want her, says shine of such a day as this." But, do not let your enthusiasm run away with your good judgment. Remember that "one swallow does not make a summer," and be sure that though the air is balmy to day it is not at all certain that it will be so to-morrow. Be content to wait the coming of settled warm weather before doing what you have in mind.

weather before doing what you have in mind.

I have more than once yielded to just such an impulse, and lifted plants that had been covered in autumn, thinking surely no harm would come of it. But the "cold spell" and wholesome milk it is important to have pure, unadulter-ated food and pure water for the cow, for it which was quite sure to follow the first warm days would so injure the plants that I had been cruel to, in my mistaken kindness, that | water, as they do not undergo any manner they were worse off when the time came for them to begin to grow then they would have stomach until they are converted into milk. been if left unprotected all winter. "Haste makes waste," and "make haste slowly" should be written down in the note-book of

every amateur gardener in connection with hintsand suggestions about spring gardening.

The first thing to be uncovered will be the be so of builts, and these should be allowed stable you need not expect to get a pure and to keep their winter wraps about them until | wholesome article of milk. I don't care you see their leaves peeping up through the soil. Then it will be necessary to remove or how good a cow you may have it is an most of the litter from the bed. But be sure to cover the bed at night, for a week or two with thick blankets, which should be prevented from settling down upon the tender | plenty of pure air to breathe, and without it plants by sticking pegs into the soil here you cannot have a good, healthy cow, and

Neatness should prevail here at all times.

proprietor of probably the most singular collection of wealth in the United States, nearly 10,000 pairs of buffalo horns, which once adorned the heads of herds of bison which occupied the plains of the West. Her fortune is made, for she is a trust, not a combination of capitalists, but a complete rust in herself, without fear of any competition, for, she has a monopoly of the product and there is no fear of competition

Nearly 20 years ago when the plains of the

West were covered with the remaining herds

of bnffalo, the woman's brother was engaged in purchasing the rights of way for the Great orthern railroad, and during his travels saw immense quantities of bones, skulls and horn of buffalo being collected for shipment east, to be ground into fertilizer for New England farms. Two hundred carloads had been colleated and were being packed, when this sagacious man reflected that the staughter of buffalo would extinguish the species, and buffalo gone, there would be no more buffa'o horns, which he had seen converted into various articles of usefulness and decoration. With him, to reflect was to act, and he soon decided to purchase all he could buy. ting Indians at work, he soon made arrange ments for them to separate the horns from the skulls, which had lain bleaching on the plains of Montana for many years. Horns were a drug on the market then and were worth about a cent a pound of the hoof. When the had got his horny collection to falo horns stored away up in a corner of the

state and he had cornered the market. Other enterprise commanded his attention. one little diversion being the purchaseof town sites along the line the road which alone was ard and rosin, melted them together, then sufficient to make him immensely rich, and applied with a swab, covering completely the | in course of time he almost forgot his collecmlargement, and in the fall gave another tion of horns. Meantime, his sister, a wo-thorough application. In the spring the tion of horns. Meantime, his sister, a woman who has displayed considerable inventive genius in a small way, had heard of her borther is growing over the bare spots and will soon cover them. There is no guesswork about this. It does the work says a Rural New Yorker correspondent.
