Canadian Institute for Historical Microreproductions / Institut canadian de microreproductions historiques

C 1981

Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured covers/

The copy filmed here has been reproduced thanks to the generosity of:

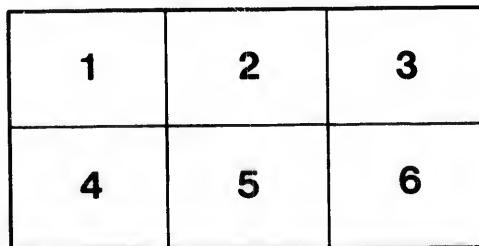

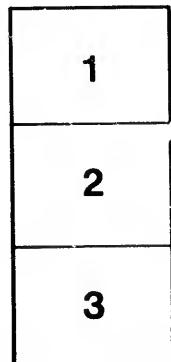

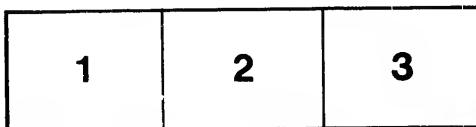

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shell contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

P R E F A C E.

The following Tables of Interest at 8, 9, and 10 per cent. have been prepared with a view to supplement the very useful Tables at 5, 6, and 7 per cent., compiled by Mr Joseph M. Price.

They have been calculated with very great care, and every precaution has been taken to ensure accuracy in passing through the press. The publishers can offer the book with confidence to bankers, merchants, and accountants.

The excellent arrangement of the 5, 6, and 7 per cent. Tables has been retained, as tending to swiftness and accuracy in calculations, and to readiness of reference. The product being in all cases close to the capital sum, the attention of a discount clerk is not attracted by the columns which are not in use.

Very little attention is required to become perfectly familiar with the use of these Tables. The interest on every hundred dollars, from one hundred to ten thousand, is given to the nearest mill or tenth of a cent of its exact value; by which the interest on any number of hundreds of dollars within such range is obtained at sight. The interest on any number of dollars less than a hundred is obtained by observing the interest on the similar number of hundreds, and using the dollars of such interest as cents, and the cents of such interest as the decimal parts of the cent.

EXAMPLES.

Required 132 days' interest on 1815 dollars, at 8 per cent.

$$\begin{array}{r} 1800 = 52.07,7 \\ 45 = \underline{1.30,19} \end{array}$$

Ans. \$53.37,89...say \$53.38.

Required 253 days' interest on 7567 dollars, at 9 per cent.

$$\begin{array}{r} 7500 = 467.87,7 \\ 67 = \underline{4.17,97} \end{array}$$

Ans. \$472.05,67...say \$472.06.

Required 305 days' interest on 4319 dollars, at 10 per cent.

$$\begin{array}{r} 4300 = 359.31,5 \\ 19 = \underline{1.58,76} \end{array}$$

Ans. \$360.90,26...say \$360.90.

The above examples fairly illustrate the use of the Tables, giving the interest on any number of dollars not exceeding ten thousand, to within less than one mill or tenth part of a cent of its exact value, by the addition of not more than two quantities, which for a given time and rate, are always found in the same column.

On sums exceeding ten thousand dollars, the same degree of exactness may be attained by dividing the given amount into two or more such parts that the interest on all but two of them shall be exact values, which exact values are indicated in all the Tables by the absence of cents and mills, or of mills alone. Thus the interest on 7300 dollars is in all cases an exact value.

EXAMPLE.

Required 226 days' interest on 15672 dollars, at 9 per cent.

$$\begin{array}{r} 7300 = 406.80 \\ 8300 = 462.52,6 \\ 72 = \underline{4.01,22} \end{array}$$

Ans. 15672 = 873.33,82...say \$873.34.

The calculation of interest on cents has become obsolete, the practice being to increase the dollars by one when the cents are fifty or more, and to disregard them when less than fifty. Such interest, however, if for any purpose it should be required, is readily obtained by these Tables, by finding the interest on the number of hundreds of dollars similar to the number of cents on which the interest is required, and using the hundreds of dollars of the interest thus found as cents, and the remainder of the dollars of such interest as decimal parts of the cent.

EXAMPLES.

Required 227 days' interest on 92 cents, at 8 per cent.

On 9200 dollars the interest is \$457.73: on 92 cents the interest is 4 cents 57 hundredths.

Required 57 days' interest on 25 cents, at 10 per cent. On 2500 dollars the interest is \$39.04: on 25 cents the interest is 0 cent 39 hundredths.

The Tables will also be found very materially to facilitate the calculations of interest on Sterling money.

EXAMPLE.

Required 145 days' interest on 432 pounds, at 9 per cent.

$$\begin{array}{r} 400 = 14.30,1 \\ 32 = \underline{1.14,41} \\ 15.44,51 \\ 20 \\ \hline 8.9020 \\ 12 \\ \hline 10.8210 \end{array}$$

Ans. £15 : 8 : 10.

In this example, the interest is found as if the given number of pounds were dollars, the dollars of such interest answering to 1 pounds; the arithmetical rule* for the reduction of decimals being used to reduce the cents and decimal parts of the cent (in this case answering to the decimal part of the pound) to shillings and pence.

To those familiar with the use of decimals, it will readily suggest itself that the interest on any number of tens of dollars not exceeding 1000 in amount, may be obtained at sight, by supposing the decimal point to be removed one place to the left. Thus the interest on 6500 dollars for a given time and rate being \$62.54,1, the interest on 650 dollars for the same time and rate is \$.6254,1; and in like manner, that the interest on any number of thousands, not exceeding 100,000 in amount, is obtained by supposing the decimal point to be removed one place to the right, thus the interest of \$6,500, as above, being \$62.54,1—the interest of \$65,000 for the same time and rate is \$625.41; and to such persons the author would suggest, in connection with the application of the Tables for obtaining the interest on cents, that in calculating the interest on Sterling money, the shillings may be readily converted into the decimal part of the pound (answering to cents) by observing that a shilling, being the one-twentieth part of a pound, is equivalent to five one-hundredths, and is decimaly represented by .05; and that multiplying any other number of shillings by five, the product will bear the same decimal relation to the pound as the similar number of cents does to the dollar. Thus, 119 pounds 17 shillings is decimaly represented by £119.85,37 pounds 16 shillings by £37.80, 150 pounds 9 shillings by £150.45, and so on.

EXAMPLE.

Required 156 days' interest on £345 : 11, at 10 per cent. per annum. Decimally represented, this sum is £345.55.

$$\begin{array}{r} 300 = 12.82,2 \\ 45 = 1.92,32 \\ .55 = \underline{2.35} \\ 14.76,87 \\ 20 \\ \hline 15.3740 \\ 12 \\ \hline 4.4880 \end{array}$$

Ans. £14 : 15 : 4.

* Multiply by 20, and from the product cut off as many figures, counting from the right, as there are figures in the multiplicand—the remaining figures to the left are shillings; multiply the figures thus cut off by 20, and from the product cut off the same number of figures as before—and the remaining figures are pence.
