DISTRICT AND GENERAL

London is planning an old boys' reunion for next summer.

The sale of thrift stamps has been discontinued by the Government.

The store of James Bros. at Clachan was broken into and robbed of \$80 in money a few nights ago.

Wm. Edward Nichols, formerly license inspector of West Elgin, died suddenly at his home in St. Thomas last week.

Ontario will obtain this year revenue from the take-off on race track betting amounting to at least two and a quarter million dollars.

Mrs. Melvin Brewer, of Bothwell, a well-known and esteemed resident, died on September 22nd in her 63rd year. She is survived by her husband, three sons and a daughter.

A sad death occurred at the home of Mr. and Mrs. John Patterson, Clachan, on Tuesday, Sept. 26th, when their youngest daughter, Helen, aged seven years, passed away after a few days' illness from pneumonia and throat trouble.

The last Oberammergau performance of the season—the 69th presentation this year—has just been held. It was announced Friday that 317,000 visitors saw the Passion Play this year, paying a total of twenty million marks in admission fees.

According to an official estimate, United States tourists last year spent \$75,000,000 in Canada. This amount must have been greatly exceeded this year, as published figures show a vast increase in the number of automobiles entering Canada for touring purposes this season.

Fuel Controller Ellis has issued a statement announcing that prices of American anthracite in Toronto will be fixed at \$15.50 a ton for the present, and householders anywhere in Ontario are prohibited from holding or storing more than one month's supply of American anthracite.

Fire at Delaware on Wednesday night destroyed the hotel owned and conducted by F. Eichenberger, the local branch of the Home Bank of Canada and Stanley Blodale's garage. Three or four motor cars in the garage were burned, including contents of the hotel the loss will be between \$20,000 and \$25,000.

Dr. W. H. Woods, of Mount Brydges, met with an accident while motoring home from London on Thursday. The radius rod on his sedan broke and the car was overturned in the ditch at Parry's Corners, between Lambeth and Delaware. The doctor, who was driving alone, had the good fortune to escape with scratches and bruises. The body of the car was much damaged, and all glass broken.

Godfrey Montgomery, concession 4, North Dunwich, lost his dwelling house by fire about eight o'clock on Wednesday morning. He was working at the barn, and as no one was around the house, he knew nothing about the fire until neighbors arrived on the scene and told him. The fire is supposed to have started from a fire in the kitchen stove. The house was burned to the ground and most of the contents destroyed.

Fire on Thursday completely destroyed the fine barns and implement buildings of Wm. C. Franks, con. 3, Aldborough, together with all the contents. The loss, which will reach \$10,000, is partly covered by insurance. The blaze broke out in the loft, where a crop of beans was stored, and it is believed that the fire was caused by combustion in the beans. Over 1,000 bushels of grain were destroyed, together with farm implements which had been stored in the barn.

LONDON PRESBYTERIAL

Reporting receipts of over \$5,000 to date this year, Mrs. Mary McEachren, treasurer of the London Presbyterian, informed the members of the presbyterian executive meeting in London last week that the entire reports for the third quarter, just ending, are not yet in.

Mrs. (Rev.) Paton, of Glencoe, was appointed to succeed Mrs. J. P. Foster as secretary of the Young Women's Auxiliaries.

Arrangements for the annual meeting, to be held at New St. James' church, London, in January, were left in the hands of a committee—Mrs. Paton, Glencoe, and Mrs. W. R. McIntosh, Mrs. W. J. Knox and Mrs. J. M. McEvoy, London.

THREW STONE, HIT PASSENGER

Miss Ophelia Thomson Severely Hurt by Missile Hurlled at Train

Returning to her home in Glencoe from London by train one evening last week Miss Ophelia Thomson was severely hurt and rendered unconscious for a few moments when a stone supposed to have been thrown by some mischievous boy crashed through the window of the car and struck her in the face. She also received some cuts from the pieces of broken glass. Dr. McLachlan was on the train and gave her attention.

Grand Trunk police officers are busy searching for the person who threw the missile. The act was committed shortly after the train left the London yards.

Miss Thomson at the time was returning from Victoria Hospital after receiving treatment for the nose which required a surgical operation. It was necessary for her to return to the hospital on Monday.

GLENCOE COUNCIL

The regular monthly meeting of Glencoe council was held on Monday evening, with all the members present. On motion of Councillors McCracken and Lumley the following accounts were ordered paid:—Wm. McRae, cleaning street \$7, hauling loam and gravel \$10; Orville Quick, hauling loam and tile \$45, cleaning street \$6; Chas. George, third quarter's salary \$56.25, preparing by-law for the license \$5, fire engine \$5, express on coupling for hose \$5, paid Municipal World \$1, postage \$1.40; City of Chatham, street sweeper \$100, 1 extra broom \$14; A. E. Sutherland, printing, \$64.04; Russell Eddie, hauling gravel \$25, team for half day \$2.50; D. Campbell, 5 days' work, \$15; J. B. Henry, salary for September, \$100.

By-law No. 253 re issuing debentures for sidewalks received its three readings and was finally passed. On motion of Councillors Lumley and Davidson the date of the court of revision on assessment for sidewalks was set for Friday, October 27, at 8 p. m.

BANQUET TO MR. CHARLTON

Minister, Leaving Glencoe, Honored by Citizens of the Town

(Press report)
A banquet was given Friday night at the McKellar House by business men of the town, in honor of Rev. T. J. Charlton, rector of St. John's church, who has been appointed by the Bishop of Huron to St. Matthew's church, London. Tables were beautifully decorated and the guests numbered about thirty.

After an enjoyable repast addresses were delivered by Rev. Mr. Paton, Reeve McPherson, Dr. Freese and a number of business men. The chair was ably filled by Gordon Dickson, manager of the Royal Bank here, who paid high tribute to Mr. Charlton and expressed deep regret at Glencoe's loss, but J. N. Currie, merchant, mentioned the fact that Glencoe's loss would be London's gain, and that, in fact, Mr. Charlton was too able a man to remain in a small place and only selfishness would ask him to stay. The statement was endorsed by ex-Reeve McLachlan.

C. J. Yorke, B. A., principal of the high school, made the presentation of a gold-headed cane, with engraving of "Glencoe," which it is hoped, may be a lasting memento of the town. Mr. Yorke spoke of the excellent character of man Mr. Charlton had shown himself to be and of how much his kindly advice had meant to him and to the community.

In reply, Mr. Charlton expressed deep regret in leaving Glencoe and hoped the kindly feeling of brotherly love between the different churches would continue. He thanked the citizens and members of other denominations for their kindly feeling.

Mr. Charlton leaves this week for London, where he is to be rector of St. Matthew's, Dundas street, and his London parishioners are to be congratulated on securing such an able preacher and man as Rev. Mr. Charlton, as he was popular with all denominations and at all times ready to lend a helping hand to others in time of trouble.

Mr. Charlton is prominent in Masonic circles, being chaplain of Lorne Lodge. He is also a member of the Board of Trade.

MELBOURNE'S BIG FAIR

Melbourne Fair, on Tuesday, always a huge success, was more so than ever this year when a record attendance filled the grounds and buildings.

The exhibits were well up to the standard, those in the horse classes being magnificent, while cattle, poultry, grain, fruit and articles in the ladies' departments were all good.

Close finishes featured the races on the splendid track. Two brass bands and Highland piping and dancing furnished other good entertainment.

The repeated successes of Melbourne fair are due in a great measure to the splendid spirit of unity prevailing in the community and to efficient management by a live board of directors and officers.

LIBRARY CONTRACT LET

The contract for building the Carnegie Library at Glencoe has been let to McPherson & Clarke. Work will be commenced at once and it is hoped to have the building completed and ready for furnishing by the first of January. The contract price for the building is a little over \$4,400.

H. S. ATHLETES AT DUTTON

Glencoe high school was well represented at the annual field day held by the school at Dutton on Friday afternoon, and our athletes gave a good account of themselves in the various events, winning 49 points against 55 by Ridgetown and 60 by Dutton. List of Glencoe winners follows:—(Girls) Ruth King, third in 75-yard dash for seniors; L. Gould, first for junior baseball throwing; Florence McEachren, second in standing broad jump for seniors; Elva Sutton, second in standing broad jump for juniors; M. Moore, second in putting 12-lb. shot; Glencoe, third in 120-yard dash; Glencoe, second in throwing and catching ball for seniors; Glencoe, third for throwing and catching ball for juniors; Florence McEachren, first in running hop-step-jump for seniors; Elva Sutton, third in running hop-step-jump for juniors; V. Henderson, first in sack race; Florence McEachren, second in running high jump for seniors; Glencoe, second in running high jump for juniors; V. and V. Henderson, first in three-legged race; Glencoe, second in relay race for seniors; Glencoe, second in relay race for juniors.

(Boys) seniors—McPherson, second in 100-yard dash; Webster, second in putting 12-lb. shot; McPherson, second in 220-yard dash; Hyndman, second in half-mile run; Webster, first in throwing baseball; juniors—Ewing, third in 440-yard run; Eddie, first in running broad jump; (intermediate) Webster, third in running hop-step-jump; McDonald, third in tossing 56-lb. weight; Coutts, second in half-mile run.

CELEBRATE GOLDEN WEDDING

Mr. and Mrs. Duncan A. McCallum celebrated their golden wedding anniversary on Monday. In the afternoon an at home was held. About 70 friends called to congratulate the bride and bridegroom of 50 years and partook of lunch. They also presented a number of handsome gifts of gold, including a number of gold coins, showing the high esteem in which the family is held.

During the evening dinner was served, at which more than 45 partook of the good things. Among these guests was John D. Smith, who was present at the wedding 50 years ago. Mr. Smith presented Mr. and Mrs. McCallum with a purse of gold. Among others present was Rev. Mr. Weir, of Ridgetown, a former minister here, and Rev. Mr. Paton, present Presbyterian minister.

Mr. and Mrs. McCallum reside on their farm, one mile west of Glencoe, in Mosa township, the same farm on which Mr. McCallum was born 76 years ago. Mrs. McCallum was Miss Elizabeth Gardiner, daughter of the late William Gardiner, of Mosa, and was born one mile south of the farm where they reside now. They have three children: William, of Glencoe; Duncan P. and Mrs. Charles Gould, both of Mosa, also seven grandchildren, all of whom were present on the anniversary. Mr. and Mrs. McCallum enjoy the best of health, and received many letters and telegrams of congratulation on the event.

FARM HOUSE ROBBED

John B. McKellar, of Ekfrid, Loses About \$300 Worth of Goods

On Wednesday afternoon, during the attendance of Mr. and Mrs. John B. McKellar and other members of their household at the Glencoe Fair, unknown parties entered their farm house, situated on lot 21, second range north of Longwoods Road, Ekfrid, and after thoroughly ransacking all the rooms, got away with articles to the value of nearly \$300.

The following is a list of articles stolen which was handed to the police by Mr. McKellar:—1 blue serge suit, new, waist 38, leg 32; 1 grey overcoat, with belt, new; 1 lady's gold watch, hunting case, engraved inside "Annie McKellar, Christmas, 1898;" 1 pair gold-rimmed spectacles; 1 cheap nickel watch, 6-16-22; 1 fountain pen; 1 pair gold bracelets, with gold markings; 1 gold brooch, set with pearls; 1 gentleman's gold watch chain, small links, small piece of nickel chain on one end.

Besides the above, a number of old coins, forming a valuable collection, and numerous small articles were taken, including eatables from the pantry. The robbery is supposed to have been committed by a couple of men who were seen prowling about the neighborhood during the day, and who later were seen making their way on foot in an easterly direction.

APPIN SCHOOL FAIR

Appin school fair was held Saturday afternoon. School section No. 10 took first prize in the parade, No. 13 second and No. 3 third. In the singing competition No. 3 was first, No. 13 second and No. 10 third. The exhibits of fruit and vegetables were excellent. Music was furnished by the Loughton orchestra. The singing by the different schools was good, considering so many young children took part. The Women's Institute cleared out sum at their booth. No fee was charged at the gate.

AWARDED \$250 AND COSTS

Over a year ago someone picked the pocket of Leslie D. Thompson, a London contractor, while he was attending a picnic at Port Stanley. The police were called and arrested three men at Thompson's instigation, two of whom were later convicted. The third man turned out to be William McRae, a respectable citizen of Glencoe, who was simply a bystander and had committed no crime whatever. McRae was acquitted, and at once entered an action against Thompson. At the assizes on Saturday the jury awarded the sum of \$250 and costs to the plaintiff.

DOBBYN—HILLMAN

A quiet but pretty wedding took place in the presence of immediate relatives at the home of Mr. and Mrs. D. Hillman, Mosa, on Tuesday, when their only daughter, Mabel Florence, was united in marriage to Derwood Garfield Dobbyn, eldest son of Mr. and Mrs. J. H. Dobbyn, of Florence. The ceremony was performed by Rev. Byron Snell, of Alvinston. The house was beautifully decorated with pink and white asters. The bride was unattended and was given away by her father, beneath an arch of asters and white wedding bells, while the wedding march was rendered by Mrs. Snell. The bride wore a simple gown of white georgette crepe, with a maline veil, and carried a shower bouquet of Ophelia roses and lily of the valley. After the ceremony luncheon was served, after which the bride and groom left for Eastern pride. For travelling the bride wore a blue poiret twill suit and champagne velvet hat. After their return they will reside in Detroit.

JOINS SUN STAFF

D. C. McArthur, formerly of The Globe, has joined the editorial staff of The Farmers' Sun. Mr. McArthur, who hails from Middlesex county, graduated from the Ontario Agricultural College in 1921. He will take charge of the agricultural department of The Sun, and in the near future will commence an important survey of farm conditions in Ontario.—Farmers' Sun.

As we look back over the years, we are astonished that so many infants survived without being deprived of their tonsils.

The Cow Puncher

BY ROBERT J. C. STEAD.

(Copyright The Munson Book Co.)

Synopsis of Preceding Chapters.
Dr. Early, famous specialist, and his daughter Irene, meet with an accident while on a morning trip in the foothills of Alberta and find a refuge in the cabin of the Edith ranch where dwell David and his dissolute father. The girl and boy promise to meet again in the future. After his father's drunken death David goes to seek his fortune in town and loses all his money at a pool table. He spends an evening with Conward, his poolroom acquaintance, and two actresses and takes liquor for the first time. Next morning he awakes from a drunken sleep resolved to amend his ways. He is attracted by the singing of a choir girl in a church; then he attended a Socialist meeting. When delivering coal at the home of Mr. Duncan, he meets an evening in return for occasional services as a coachman. The first evening he discovers the choir girl in Edith Duncan. Under his tutor's careful direction, David's education thrives. He becomes a student on The Call. One Sunday he told Edith the story of his life and his compact with Irene. Conward drops in with talk about "industrial development" and fires David's imagination. They form a real estate partnership. A boom follows, making David a millionaire, but he vaguely distrusts his partner. Roberta Morrison, compiler of the woman's page of The Call, comes to his office one evening and Dave orders dinner.

CHAPTER XI.—(Cont'd.)

Suddenly, from a sharp bend in the road, flashed the lights of an approaching car. Dave was able to switch his own lights on again only in time to avoid a collision. The oncoming car lurched and passed by furiously, but not before Dave had recognized Conward as the driver. Back on its trail of dust floated the rickety notes of half-intoxicated women.

"Close enough," said Dave, when the dust had settled. "Well, let us jog back home." They took the return trip leisurely, drinking in the glories of the night, and allowing time for the play of conversation. Bert Morrison was a good conversationalist. Her points of interest were almost infinite. And they were back among the street lights before they knew.

"Oh, we are nearly home," she exclaimed. "And, honest, Dave, I wanted to ask you something. Why don't you get married?"

"I guess I'm too sympathetic," he answered, after a moment's pause. "And it wouldn't be fair."

"Oh, can that. It's been warned over once already. Really, though, why don't you?"

"Why should I?"

"And you know you can't go on always just putting it off. It leaves your life empty. To-night, when I asked you if you had had dinner, you said, 'Such a meal as a man can eat alone. That betrays the emptiness.'"

"I suppose it does. But I don't know many girls. I don't know any girl very well, except you, and you wouldn't have me."

"No, I wouldn't," she answered frankly. "I like you too well. But you know other girls, and you could get to know more if you wanted to. There's Edith Duncan, for instance."

"Edith is a fine girl. The Duncans are wonderful people. I owe to them almost everything. But as for marrying Edith—"

"Why not?"

"I don't know. I never thought of it that way. She's a fine girl."

"None better," said Bert, with decision. "Dave, I'm not much on orthodox religion, as you know, but that girl's got something on me. She has a voice that would make her famous on the stage, but she uses it all the time, as she says, in the service of the King. I think she's narrow on that point, but I know she's sincere. Edith has had a great sorrow, and it makes her nobility stand out, pure and wonderful, like a white gem in a black setting. It is to be the last that one must rub shoulders with sorrow before he really begins to live. And any afternoon you can find her down in the children's ward, singing with that wonderful voice to the little sufferers."

"Reason enough, she behaves so strangely. Do you know, I begin—I really do begin to suspect that she's in love."

It was Dr. Hardy's turn to sit up.

It sprang to Bert's lips to say, "Oh, what's the use?" but she checked herself. They were at the door of her boarding-house. As he helped her to the side-walk Dave stood for a moment with her hand in his. He had long liked Bert Morrison, and to-night he was powerfully drawn toward her. He knew—what she would have most strenuously denied—that her masculinity was a sham. Her defiance of convention—rambling like a fellow bachelor into his apartments—her occasional profanity and occasional giggles—there were but the cloak from which her own deep womanhood was for ever peering forth. He felt impelled to kiss her. He wondered if she would be angry; if such a familiarity would obstruct their growing friendship. He felt sure she would not be angry, but she would probably think him foolish. And man cannot endure being thought foolish by woman.

"Oh, I almost forgot," she said as they parted, as though she really had forgotten. "I was at a reception to-day when a beautiful woman asked for you. Asked me if I had ever heard of Mr. David Elden."

"What, Dave Elden, the millionaire?" I said. "Everybody knows him. He's the beau of the town, or could be,

right. "Nonsense," he said. "Why should she be in love?" It is the unfortunate limitation of the philosopher that he so often leaves irrational behaviour out of the reckoning. "She is only a child."

"She will be eighteen presently. And why shouldn't she be in love? And the question is—who? That is for you to answer. Whom did she meet?"

"If you would find a Hamlet at the root of this melancholy you must ask our Orpheus. She met no one with me. My accident left me to enjoy my holiday as best I could at a ranch deep in the foothills, and Reenie stayed with me there. There was no one else."

"No one? No ranch men, cowboys—cow punchers—think I have heard—"

"No. Only young Elden—"

"Only? Who is this young Elden?"

"But he is just a boy. Just the son of the old rancher of whom I have told you."

"Exactly. And Irene is just a girl. Dr. Hardy, you are all very well with your fevers and your chills, but you can't diagnose a love case worth a cent. An epidemic would break out under your very eyes and you blissfully unconscious. What about this young Elden? Did Irene see much of him?"

The doctor spread his hands. "Do you realize that there were four of us at that ranch—four only, and one of us for miles. How could she help seeing him?"

"And you permitted it?"

"I was on my back with a broken leg. We were guests at their home. They were good Samaritans to us. I couldn't chaperon her. And, besides, they don't do things that way in that country. You don't understand. It's altogether different."

"Andrew," said Mrs. Hardy, leaning forward, and the word was ominous, for she used his Christian name only in moments of crisis, "was Irene ever with this young man—alone?"

The doctor arose to his feet and trod heavily upon the rich carpeting. "I told you you don't understand," he protested. "The West is not the East. Everything is different."

"I suppose human nature is different," she interrupted, meaningly. Then her head fell upon the table and her hands went up about her hair. It had been brown hair once, but was now thin and streaked with grey. "Oh, Andrew," she wept. "We are ruined. That we should ever have come to this!"

It was now Dr. Hardy's turn to become exasperated. There was nothing his philosophy could not endure. That was a person who was not, and would not be, philosophical. Mrs. Hardy was not, and would not be, philosophical. She was an absolutist. With Mrs. Hardy things were right or things were wrong. Moreover, that which was done according to rule was right, and that which was not done according to rule was wrong. It was apparent that the acquaintanceship of Irene and Dave Elden had not been according to rule.

(To be continued.)

Dye Faded Sweater Skirt, Draperies in Diamond Dyes

Every "Diamond Dyes" package tells how to dye or tint any worn, faded garment or drapery a new rich color that will not streak, spot, fade, or run. Perfect home dyeing is guaranteed with Diamond Dyes even if you have never dyed before. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. For fifty years millions of women have been using "Diamond Dyes" to add years of wear to their old, shabby washes, skirts, dresses, coats, sweaters, stockings, draperies, hangings, everything!

Benefits of Insurance.

There is a Chicago clubman noted for his presence of mind in exigent circumstances. Just before the war, while proceeding from Vienna to Warsaw, he met, with considerable sangfroid, a situation which, otherwise, might have caused him considerable trouble.

For some reason he had failed to provide himself with a passport. When he reached the Russian frontier he was, of course, instantly held up by an inspector of customs, who demanded to see his passport. For a moment he was stumped, but he quickly met the emergency. From the recesses of his overcoat he drew forth his life insurance policy and handed it to the Russian officer. With great gravity the latter scrutinized the imposing seal and the bewildering array of signatures. Then, satisfied, he returned the policy to the Chicago man and the latter passed on.

Popular Salads.

In the arrangement of salads there is quite as much opportunity for artistic expression as there is in a piece of lovely embroidery. A beautifully arranged salad does to a meal what the looks, salads are appetizing, nourishing and really necessary.

The secret of preparing appetizing salads is to combine the right fruits or vegetables, serve cold as possible and arrange attractively. The salad course is served on individual salad plates or from a salad bowl or round platter. It is usually placed on the table at the beginning of the meal. For more formal occasions some hostesses prefer to serve the salad from the platter on which it is arranged, letting it fill the place of a separate course.

Macedoine salad—1 c. diced celery, 1 c. diced carrots, 2 c. cooked peas, 2 c. cooked cauliflower, French dressing. Arrange lettuce leaves on a round platter. Heap the diced celery in the center, surround with a ring of carrots, then a ring of peas and finish with a border of cauliflower. Care should be taken not to break the cauliflower into too small pieces or let it mash in cooking. Sprinkle evenly with French dressing and serve from the platter at table. Each serving will consist of a lettuce leaf and a small portion of each vegetable.

Poinsettia salad—Cut medium sized tomatoes crosswise into eight sections. Spread apart and place cheese ball in center. Serve on lettuce leaf with French or boiled dressing.

Waldorf salad—Mix equal quantities of apple and celery and moisten with mayonnaise. Garnish with nuts or strips of green peppers or pimento. Serve on lettuce leaf. In apple season, a very attractive way to serve this salad is to hollow out red apples, fill the cavity with the salad and top with the dressing.

Stuffed celery—Cut off tops and scrub celery stalks well with vegetable brush. Fill the hollow in the stalk with a mixture of cottage cheese and boiled dressing. Sprinkle with paprika. Serve on lettuce leaf. Chopped nuts may be used in the cheese mixture, if desired.

Combination salad—1 cucumber, 1 green pepper, 2 medium sized tomatoes, radishes, lettuce. Arrange lettuce leaves on salad plate. Place tomato slices in center and surround with thin slices of cucumber and radish. Garnish with a radish rose and sprinkle with French dressing.

Radish roses are made by cutting the radish in eighths, just through the skin, and peeling back this skin to the base or stem end. These sections of peel form the petals of the rose, and the white centre of the radish represents the centre of the rose.

Cabbage-and-peanut salad—Shred firm white cabbage very fine and mix with chopped peanuts in the proportion of half a cup of peanuts to a small head of cabbage. Moisten with mayonnaise dressing. Serve on lettuce leaf.

Raw Cabbage-and-onion salad—Chop fine the heart of a tender cabbage and let lie for an hour in slightly salted, cold water. Chop onion, in quantity according to the onion-taste of the family. Make just enough French salad dressing to season the whole. Drain the cabbage and dry on a clean towel. Toss cabbage, onion and salad dressing lightly together. Serve on lettuce or cabbage leaves.

Boiled dressing—1 tsp. sugar, ¼ tsp. salt, 1 tsp. mustard, 1½ tsp. flour, few grains cayenne, 1 egg, ¾ c. milk, ¼ c. weak vinegar, 1 tsp. melted butter. Measure dry ingredients and mix well in pan in which dressing is to be cooked. Add slightly beaten egg, milk, add vinegar slowly while stirring, and melted butter. Cook over boiling water, stirring all the time, until mixture thickens, or about five minutes from time water begins to boil.

Stuffed date salad—Slit dates open at side and remove stones. Fill the cavity with a mixture of cottage cheese, chopped nuts and boiled salad dressing. Arrange on salad plates five of these stuffed dates on a nest of crisp lettuce leaves. Serve cold with French dressing.

Mayonnaise dressing—1 tsp. each, mustard, salt, sugar; few grains cayenne, 2 egg yolks or 1 egg, 2 tsp. each, vinegar, lemon juice, 1½ c. olive oil. Mix dry ingredients, add egg yolks and when well mixed add oil gradually, drop by drop at first. Beat constantly with egg beater. As mixture thickens, thin with vinegar and lemon juice. Add oil and acid alternately until all is used, beating constantly.

French dressing—½ tsp. salt, ¼ tsp. pepper, 2 tsp. vinegar, 4 tsp. olive oil. Mix ingredients and stir well until blended, or put ingredients in a small jar and shake. This dressing be made in larger quantities and kept in the jar in a cool place, to be used when needed.

Whipped cream dressing—1 c. whipped cream, 2 tsp. boiled dressing. To the whipped cream, add boiled dressing and mix well. Serve with fruit salads.

Many Ways to Hold the Sun.

There are so many ways to hold the sun When winter skies are leaden over all:

A pot of jonquils blooming one by one, A spring-lit picture smiling from the wall,

A rainbow-flashing prism bathed in light, A sudden bar of music golden-sweet, And from the kindled hearthstone, warm and bright

Imprisoned sunbeams dancing freed and fleet.

There are so many ways for Joy to stay, In spite of black horizons banked with cloud;

Small bits of gladness budding day by day, Swift understandings smiled across the crowd;

A baby's wonder-smile, the shine of stars, A lingered strain of memory to bless, And tender, healing, on the throbbing scars

Warm outstretched hands of love and kindness. —Martha Haskell Clark.

Into the Caldron.

This novel indoor pastime requires only a simple equipment but provides enough excitement to satisfy the most energetic. It combines the attractions of a potato race, tiddly-winks and a relay race and adds a twist of its own.

Have three teams of three members each, or, if the table is large enough, you may have four teams. Give each team a receptacle—one that will not break if it is swept off the table in the excitement—and let each team place its own receptacle in its own corner of the table. Also give each player a parlor match and a piece of string two feet long.

When the signal to begin is given, the first member of each team lays his match about two feet from his container and, taking an end of the string in each hand, tries to place his match in the receptacle. He may work his string under the match and snap it in, as in tiddly-winks, or he may wind the string round the match and lift it in; but he must take care that the match does not touch his hands or body, and he should not let go of the ends of the string at any time. That prevents him from tying knots in the string. If the match falls to the floor, he should place it once more on the table and continue as before.

As soon as he puts his match in the container according to the rules, the second member of his team immediately takes the string and, placing his match two feet from the receptacle, goes ahead and the first player went; and after him the third.

The team that first gets all of its matches into the container wins the contest.

Keep Minard's Liniment in the house.

Some rivers of Siberia flow over ice many years old, and almost as solid as rock. A tributary of the Lena has a bed of pure ice more than nine feet thick.

DYEING

THE postman or express man will bring Parker service right to your home. Suits, dresses, ulsters and all wearing apparel can be successfully dyed.

Curtains, draperies, carpets and all household articles can be dyed and restored to their original freshness.

We pay carriage one way on all orders.

A SIN TO LET

HAIR FALL OUT

35c "Danderine" Saves Your Hair—Ends Dandruff! Delightful Tonic

Hurry! It's your duty! Each day you see a little more hair falling out and you are making no effort to avoid baldness. What a pity. Falling hair means your hair is weak, sick, possibly dandruff is strangling it, or the hair root pores in the scalp are not firm and tight, thus wasting the hair-growing oils.

Danderine almost instantly stops falling hair of men or women, and cleans every particle of dandruff away, then the hair takes on new life, vigor and strength to grow strong, thick, and long.

Danderine is delightful—not sticky or greasy. Go to any drug store now and get a bottle. Use it. Have healthy, heavy, beautiful hair and lots of it.

Getting Her Hand In.

In London they tell a story of a very parsimonious man whose wife had always experienced great difficulty in inducing him to part with any change. One day she followed him to the door and quietly asked:

"Henry, can't you et me have \$10? I want to—"

"There you go again," exclaimed Henry. "It's always money, money, money! When I am dead you will probably have to beg it."

"Well," said the wife, "I shall be a whole lot better off than some poor women who have never had any practice."

What a Scolding Once Did.

"What was your first invention?" somebody asked Prof. Alexander Graham Bell a few weeks before his recent death.

"That takes me back a long way," he replied. "I was a schoolboy. My father, who was a teacher of elocution, had a pupil of about my own age, named Benjamin Hardman, who had been sent to him to be cured of stammering. He and I were playmates and great chums. His father owned a flourmill near Edinburgh, and Benny and I spent a good deal of time there, playing about."

"As boys will do, we managed to get into a lot of mischief, and one day Benny's father called us into his office and read us a rather severe lecture. Said he, 'If you have so much extra steam to blow off, why don't you turn it to some account? Why not try to do something useful?'"

"Some what at a loss for a reply, I asked him what there was that we could do. In response, he picked up from a bin a handful of wheat and said, 'If you could take the husks off that grain you would do something worth while.'"

"I said nothing, but began to wonder if a machine could not be devised that would remove the husks from grains of wheat before milling. It seemed to me that brushing might do it. I experimented with a handful of wheat and a nail brush, and the idea appeared to work well."

"Then it occurred to me that there was in the mill a rotating machine, used for other purposes, which, if lined with brushes, might do the business. Wheat, thrown into it, would be dashed against the brushes as the machine revolved, and thus the husks would be torn off."

"I took the idea to Mr. Hardman, who ordered it to be tried. It proved a success, and the process was permanently adopted in the mill."

Sixty Miles of Books.

With its five million odd printed volumes, the British Museum Library can claim the distinction of being the largest in the world, so far as the number of books is concerned. Indeed, over sixty miles of shelves have been called into requisition to accommodate them.

The library was started in 1553, since when it has grown by enormous strides, absorbing vast and wealthy collections of books, such as the Old Royal Library, the King's Library, a magnificent treasury containing 65,250 volumes besides pamphlets, the Grenville Library, and many large special collections, not to mention the multifarious stores of books in papyrus and inscribed tablets from the ancient libraries of the East.

The catalogue, which is a bare alphabetical list of books, gives one the best means of realizing the stupendous extent of the collection. It consists of 1,500 folio volumes, each as big as one can handle with any facility, which are arranged on both sides of a series of cases describing an arc ninety yards in length.

The Reading Room of the Library, a magnificent circular hall with a dome 166ft. high and 104ft. in diameter, only two feet less than the dome of St. Peter's, Rome, provides accommodation for 500 readers. As the Library enjoys the right to receive a copy of every publication issued in England, its collection is being added to at the rate of 100,000 volumes a year, and it has had to construct a special repository at Hendon to hold some of its treasures.

Facts About Foreheads.

According to an authority on character-reading from the face, a high narrow forehead is a bad sign.

People possessing this feature, although not capable of great thinking, unhesitatingly attempt the study of the most abstruse subjects, without any good results. They are exceedingly popular with themselves, and, let it also be admitted, with others.

A broad forehead is always an advantage, for it indicates breadth of character. Should the rest of the face be weak it should be taken into consideration, although one feature indicating strength is not enough to indicate strength of character.

A forehead that curves easily back from a little above the eyebrows shows a poetic temperament with a liking for art, particularly music or painting, and a forehead that rises perpendicularly from the eyebrows in a straight line indicates severity, tenacity, and even inflexibility.

A high forehead is by no means always a sign of intellect. An intellectual forehead is well developed about the eyebrows, with the ears set well back. It is a good sign if a forehead is broad as well as high.

The marks of a cool and deliberate thinker are a high forehead with well-developed "knobs" at the top and a noticeable "bulge" of the eyebrows.

Address communications to Agronomist, 73 Adelaide St. West, Toronto

A Balanced Ration for Laying Flock.

During the past few years our attention has been continually called to the profits from culling our farm flocks. It is true that we have too many hens which, due to inferior breeding and selection, are failing to return the profits which they should. On the other hand, however, a good many hens fall by the wayside, due to the fact that they have not received the proper nourishment to produce eggs. The slogan, "Breed, Feed and Wean," in the poultry flock has never been improved on. The first step in getting high egg yields is to breed a strain of birds so constituted that they will use their food material to the best advantage in the production of eggs and not in fat storage. This, however, is but the preliminary step and once having the stock well bred we then must devise a suitable ration.

Too often do we find the farm flock dependent on a ration of corn and water. A ration of this kind is far from being conducive to high egg production for the simple reason that the elements for egg building are not being supplied in the proper proportion. For instance, 100 pounds of corn contains sufficient materials to produce 255 yolks and 134 whites. A ration properly balanced would contain materials for the production of equal numbers of whites and yolks. The terms "Protein and Carbohydrates" have been largely used in balancing rations, but we will discuss these feeds from the standpoint of their ability to produce albumen (whites) and yolks.

Let us look for a moment at the machinery which a hen uses in the production of eggs. A postmortem examination will reveal the following parts:

1. The Ovary. Here we find yolks being developed and hanging in a grape-like cluster. The yolk is the first part of the egg to be developed. After becoming mature it is freed from its attachment and follows down through the oviduct.

2. The Oviduct consists, roughly, of two parts: the first part where the white is produced, and later the shell is laid on by a secretion from the walls of the oviduct.

Thus we can see that the hen makes the egg by piece work. She is producing high-class breakfast food and putting it up in sealed packages. If she is going to produce eggs economically she must be given the raw materials in proper proportions. To feed a hen nothing but corn and expect her to produce heavily would be like giving a mason all brick and no mortar to build a house. A hen were far to build a house as a hen were fed a ration containing one food material for the production of 100 yolks and only fifty whites she would produce only fifty eggs. The limiting factor might be lime for shell building, but whatever it is, the egg production will be governed by it. Our idea is to balance a ration to produce equal numbers of yolks, whites and shells.

In balancing a ration we must also look to the form in which the hen receives her nourishment. The physical condition of the feed has as much to do with production as has the chemical composition. The nutrients must be easily digested and nutritious. The hen should have the five G's of egg production—Grains, Grubs, Greens, Grit and Gumption. The grains are supplied by feeding a combination of scratch feed and dry mash in such a proportion to keep the body weight up and maintain a maximum of egg production. The amount of mash which is being consumed is a good barometer of egg production. As the mash consumption increases the egg production takes a similar rise. Thus we attempt to keep up the consumption of mash by practicing the limited feeding of scratch.

Grubs form a very necessary part of a hen's ration and would be easily obtained if angleworms and grasshoppers were in abundance. The supply being limited, however, we have to resort to the use of meat scrap, tankage, and skim-milk to supply this element in our ration.

Greens play an important role in a ration and are too frequently neglected. They impart a laxative quality to the ration, tend to whet the appetite and keep the bird generally in good condition. It would seem also that green food has a direct effect on the hatching power of an egg, and also on the strength of the baby chick. This subject, however, is a large one and for now it is sufficient to say that green food is essential, particularly to breeding stock. Sprouted oats, cabbage and mangels are commonly used for winter feeding. Fall rye, oats or rape can readily be grown and matured in summer. For fall, lettuce and cabbage give a good supply of excellent greens.

Grit forms, of course, the material for grinding. In addition to this we must have a supply of available lime. This is most easily supplied in form of oyster shell or ground up egg shells. The average commercial grit is composed largely of harder rock formations and contains only a limited amount of available lime and should be supplemented by lime in some more available form.

The remaining "G" stands for

"Gumption," whatever that may mean, conveys to our minds the idea of being up and at it. This may refer to the poultryman as well as the birds. Hens fed on a good condition must have exercise. This can be most readily supplied by feeding the scratch in a deep litter. A clean, dry, well-lighted and well-ventilated coop adds materially to the putting of "Gumption" into the flock.

From the foregoing paragraphs we see the importance of giving the birds a ration showing a variety of food nutrients. We must then look into the available food materials and select from them those which give both the proper physical properties, but also will balance up equal numbers of yolks, whites and shells. For purposes of easy calculation the following table has been devised and instead of giving the analysis of the food materials in terms of carbohydrates and proteins, it expresses them in terms of yolks and whites. This is calculated from the assumption that one pound of protein will produce sixteen and two-thirds whites, and one pound of carbohydrates will make three and one-third yolks.

	Grains.	Yolks.	Whites.
Corn	255	134	
Wheat	243	182	
Oats	195	155	
Barley	203	145	
Buckwheat	178	128	
	Milk Products.	Yolks.	Whites.
Bran	155	205	
Middlings	205	220	
Gluten Meal	230	430	
Cottonseed Meal	148	620	
	Meat Products.	Yolks.	Whites.
Beef Scraps	106	1,107	
Fresh Cut Bone	196	336	
	Dairy By-Products.	Yolks.	Whites.
Skim-milk	22	52	
Buttermilk	22	65	
	Green Feeds.	Yolks.	Whites.
Mangels	19	18	
Cabbage	40	11	
Rape	56	11	
Alfalfa	46	67	

From a study of the above table it is not difficult to arrive at a definite conclusion regarding the feeding value of the common feeds. There are, however, other factors to consider. Take, for example, barley and buckwheat, which appear to contain a reasonable amount of food value but are not good feeds, due to the excessive amount of fibre contained in the hulls. In the mill feeds, we find cottonseed meal showing a good analysis, but we know it to have a constipating effect on the birds and consequently we would not select it for a mash constituent. The green feeds appear low in food value but cannot be omitted, due to the laxative effect and their qualities as a conditioner. The dairy by-products appear low in food value but, however, have a large quantity of water present. The food value here is high, due to the readily available form in which the protein is found.

No mention is made here of shell-forming materials. Oyster shell or ground lime rock should be before the birds at all times.

To balance the ration from the above table we attempt to select the most desirable materials from the standpoint of their physical qualities as a food and their market quotations.

The following ration is excellent:

	Scratch.	Yolks.	Whites.
100 lbs. Corn	255	134	
100 lbs. Wheat	243	182	
	Mash.	Yolks.	Whites.
20 lbs. Oats	39	31	
20 lbs. Bran	31	41	
20 lbs. Middlings	41	44	
20 lbs. Cornmeal	40	27	
20 lbs. Beef Scrap	21	221	
	680	680	

This is a simple ration which balances and gives equally good results in actual feeding practice. The mash is bulky enough to avoid any constipating effects, but does not contain an excess of fibre. The meat scrap is added to comply with conditions where dairy products are not being used. If milk is available the proportion of meat scrap should be reduced accordingly to the amount of milk fed.

The most common shortcoming in the feeding of a farm flock is to entirely omit the mash. As we have said before, the mash consumption is an excellent criterion of egg production and we invariably find where the birds are being fed on whole grains alone that the egg production is lower. Another common practice is to let the hens rustle for their own feed during summer. It is true that hens will pick up a great deal but this haphazard method will never give maximum returns. In summer we like to reduce the amount of scratch feed and induce the hens to consume more mash. The season gives a longer feeding day and the birds require less solid foods with which to keep up the body temperature. They do require, however, the more easily digested constituents of the mash and the protein, or white-building material which it contains.

Hogs

Do hogs need roughage? This is a practical question. It has become especially interesting, due to the results obtained in investigations along a number of lines of nutritional work. Owners of hogs frequently find pigs developing swollen joints, growing stiff and becoming crippled, and brood cows breaking down after farrowing, especially in the winter season. This question has been frequently raised as to whether or not these conditions are due to a lack of roughage.

Careful work has been done at experiment stations to determine the causes of these troubles. Rations were made from corn and oil meal to which was added two per cent. of ground rock phosphate and one per cent. of common salt to furnish needed mineral constituents. Four groups of animals were used in the experiment. One was left as a check. The second group received in addition to the above ration ten per cent. of finely ground paper, while the third group received ten per cent. of charcoal and the fourth ten per cent. of ordinary dirt.

The results from feeding these animals the above rations for a year are interesting. The check animals developed stiffness and swellings in the joints and showed difficulty in getting on their feet at the end of six to eight months. The second lot, which received paper, also developed this same condition which would seem to show that the roughage factor was not the cause. The lot receiving charcoal did not show this condition and those receiving dirt in their ration manifested the trouble to only a slight extent.

After these troubles had developed, the animals were given a daily dose of cod liver oil. Immediately they showed improvement. The department reports that in one instance a pig which had weighed 250 pounds and was losing in weight, immediately upon the administering of the cod liver oil began to grow at a normal rate while the stiffness and swollen joints soon disappeared.

Another evidence that roughage is not necessary in the ration for swine is furnished by a lot of hogs fed skim-milk for a year with no roughage added. Though the animals in this lot did not develop at a normal rate, which probably was due to the lack of fat-soluble vitamins in the skim-milk, no trouble from stiffness was experienced. From this work it would seem, therefore, that where all the necessary nutrients and vitamins are present in the ration, roughage is not necessary in obtaining normal development in swine. However, these constituents may be more economically secured for the animals through the use of green feeds during the summer season, but in winter other sources must be found.

The bawksaw may have to solve the fuel question for many this winter.

It is coming to the time to figure the profits and losses of a season's activity. Have you the facts and figures to do it with?

The dictionary contains every word found in a good book on agriculture, but it is not as interesting reading, because it contains only words, instead of thoughts.

Storing Winter Vegetables

After the vegetable crop is harvested it is of the utmost importance that it be given proper winter care. Potatoes, cabbages, turnips, carrots, salsify, celery, and even apples may be kept safely in outdoor pits properly protected, if there is no suitable cellar, and even when the home cellar is inadequate to care for the large crop. Indeed, good pits are more suitable in most cases than cellars.

First remember that apples, potatoes and celery all require a cool place and will rot if frozen or frost without injury, but if frozen hard will be spoiled. Keep them as near the freezing point as possible, not to actually freeze them. On the other hand, all root crops and cabbage may be frozen hard without injury, provided they thaw out while in contact with the earth. The same is true of onions. This applies to the first freeze; if allowed to freeze and thaw repeatedly for a number of times, even root crops will be spoiled. Parsnips, carrots and salsify are injured by a good freeze, and should not be stored before.

Board-lined pits, protected by a long open siled, are ideal for storing potatoes and apples, but the usual practice is to make a circular depression a foot deep in the ground, put in some straw, and upon this put the apples or potatoes in a conical heap, cover with more straw, then earth to protect them.

When the apples are gathered they should be put under a shed or in a rail pen in the shade, and left there as cool as they can be kept until severe weather. The earth should be cool before either apples or potatoes are stored. When they are first put in the pit, throw over them only enough earth to protect them from freezing at a time, and as the weather grows colder add more earth. For convenience in getting at the contents at any time during the winter, it is better to put no more than six inches of earth covering over the pits, and over this a good covering of corn fodder or something similar, then a few boards to keep off the rain.

Live Stock Receipts at the Leading Markets.

According to the Dominion Live Stock Branch weekly report, some of the principal live stock markets of the Dominion show considerable decreases in cattle receipts from the first of the year to early in September, as compared with the receipts during the same period of last year. The important yards at St. Boniface, Manitoba, however, is reported as showing heavy increase, the numbers marketed during the present year to date as compared with last year being greater by 7,000 head, when compared with offerings of the same period of 1921. The increases in cattle marketings in the Western Provinces are duplicated by the calf, sheep and hog marketings and more than offset any decreases in marketings in the Eastern Provinces. The result is that the combined receipts at all yards in the Dominion, are in every class in excess of those of the same period of last year. The Toronto and Montreal markets are behind in cattle receipts; Montreal is off in calves and Toronto in sheep but the combined receipts to September 7th at Toronto, Montreal, Winnipeg, Calgary and Edmonton, as compared with the receipts of the same period last year are: 451,597 cattle, against 377,620; 156,476 calves, against 138,200; 510,953 hogs, against 403,777, and 253,467 sheep, against 239,461.

Top prices on September 14th show as 25c to 75c per hundredweight lower on cattle than on the same date of 1921, excepting at Calgary where the market appeared to be 25c stronger. Calves showed a relatively sharp decline. Hogs were higher at Toronto and Montreal but lower at Winnipeg, Calgary and Edmonton. The prices on choice sheep and lambs were higher at all markets excepting Winnipeg, where the quotations for lambs were on a somewhat weak basis.

The auto which makes the greatest noise is not necessarily the fastest goer.

Something to drink helps Biddy manufacture eggs. A hen will drink twenty times her weight of water in a year, if she has water before her.

HIS ROLE IN THE BIG MOVIE DRAMA.

HIS ROLE IN THE BIG MOVIE DRAMA

—Chicago News.

Parents as Educators

"Falling—Falling"—By Martha Gallaudet Waring.

This title, so familiar to students of the Mother Play Book, by Friedrich Froebel, is the introduction to a large subject. To those who wonder that a man, as well as a philosopher, should have spent his time on a book of Nursery Plays, we have only to point out the deep psychology underlying each play.

The psychology of fear as an inheritance, an instinct, a symptom, as due to repressions, unconscious impressions, "taboos" imposed from without, has been the subject of much modern psychological discussion, so it is well sometimes to go back to beginnings and look at it simply and from a practical standpoint.

"Better a broken arm than the fear of it all one's life," says Jean-Paul Richter. "Better still to have neither," says the mother who considers every accident, and every disease that befalls her child a direct accusation that she has failed somewhere and somehow in knowledge or care.

"Falling—Falling" is a simple exercise for the tiny child, the mother taking her supporting hands from the child and catching him again as he begins to fall, giving him the suggestion of support, freedom, and support again, before the feeling of freedom turns into that of fear. I have played this with all my children when they were getting their air-bath, to their great delight.

From this point may come the first important training of the early years, how to do things freely but without fear because one does them correctly, and therefore safely. Show the little child how to lift his feet to avoid

stumbling and tripping. Show him how to open and shut doors and drawers properly, and there will be no mangled fingers. Show him the danger of all openings like stairs and windows. Teach him to go carefully up and down stairs and there will be no need for gates and bars. Show him that banisters are to hold by and that stairs may be safely descended one foot at a time, and after instruction let him do it himself until the right movement becomes a habit. Caution should be taught from the start but never fear. A child knows no fear naturally and to teach it to him is a crime against nature.

A child of twenty months was one day descending the stairs in the approved way when his hat got over his eyes and his feet slipped, but as he had been taught to do, he clung firmly to the banisters, and when we reached him was holding up his whole weight by one chubby hand, glad to be rescued, but not in the slightest degree alarmed for his safety, merely remarking by way of explaining his novel position "Baby boy's at on, got in his eyes."

The same little boy from this age up would sing himself to sleep in the dark absolutely without fear. He has been allowed to experiment in every possible way, under direction at first, then alone, and although a few unforeseen experiments have proved disastrous to property, he has fine use of himself and of material things.

This is the physical result, but there is much more to it than mere safety. His disposition is of the cheeriest. And he finds joy in everything.

Dairy Cow Records.

Nearly forty pages larger is Report No. 14 of the Dominion Live Stock branch of the Record of Performance for Pure-bred Dairy Cattle than Report No. 13. This is due to the great increase in the number of cows that have fulfilled the requirements entitling them to figure within the charmed circle. Report No. 14, which is procurable on application to the Publications branch, Ottawa, covers the twelve months extending from April 1, 1921, to March 31, 1922, both dates inclusive. In the previous year 321 Ayreshires and 381 Holsteins were entitled to record; last year there were 351 Ayreshires and 592 Holsteins. The "Honor Rolls," or 305 day divisions, of both breeds, exhibited remarkable development since its inception in 1920, the Ayreshires from 7 to 104, and the Holsteins from 6 to 84. For the first time similar divisions of Jerseys and Shorthorns are given, the former numbering 22 and the latter 32. In connection with these two breeds the 365 day division has also considerably increased, the total (that is, including the 305 day division), number of Jersey cows in the last report being 251 compared with 130 in the preceding report, and of Shorthorns 137 compared with 102. Ontario and Quebec are in front with Ayreshires, British Columbia coming third, but in Holsteins Ontario leads by a large majority, British Columbia coming second and Quebec third. British Columbia is quite a bit in the lead with Jerseys, Ontario coming second and Quebec third. Of the Shorthorns Ontario has to be credited with 28 out of 32 in the 305 day division and with 70 out of 105 in the 365 day class. There are also recorded 10 French-Canadian cattle, the highest performance being 12,449 lbs. of milk and 535 lbs. of fat in 365 days; 24 Guernseys, the best performance being 14,071 lbs. of milk and 627 lbs. of fat in 365 days, and 3 Red-poll, the best performances being 6,886 lbs. of milk and 291 lbs. of fat in 305 days and 8,164 lbs. of milk and 350 lbs. of fat in 364 days.

Long Stolons.

Often in harvesting the potato crop one discovers that the tubers are growing some distance from the plant stems. Hot weather has a tendency to cause the stolons, the underground stems on which the tubers are produced, to elongate. Sandy land will produce longer stolons than will heavier soil. Long stolons are also an indication that the variety of potatoes is running out.

Eating and Drinking in Sickness

BY DR. C. H. LERRIGO.

The rules of a few generations ago in regard to what a sick person might eat or drink have given place to regulations that are much more simple and more in accordance with common sense. It was forbidden, for example, to give a fever patient a sufficient amount of water to drink.

I remember that as late as the beginning of my own practice I was constantly running into people who clung to that cruel, foolish regulation. Nowadays, I think, it is understood by everyone that there are very few ailments in which the plentiful administration of cool, fresh water is not only permissible, but very desirable. The doctor with a fever patient today, instructs the nurse to see that water is offered to the patient at regular intervals, not allowing it to be a matter of chance.

I have just had a letter asking if it is dangerous to eat ice cream when one has a cold. I suppose the idea of the writer is that the frozen dish might aggravate the cold, and I believe that such an idea has been more or less prevalent. There is no more foundation for it than for the old superstition about the danger in drinking water. By the time the ice cream has reached the stomach its temperature is materially increased and the cold effect is very transient. On the other hand, ice cream is a very helpful food and one so acceptable that it often tempts the appetite of a sick child or adult when ordinary forms of nourishment are positively repellant. It is a food that may be used to advantage in many very serious diseases when more substantial articles of diet might possibly prove injurious. Nowadays it is a standby in typhoid fever and is used to very good advantage both in diphtheria and scarlet fever. Foods having as their base milk or cream are always safe in sickness excepting in diseases of the digestive tract in which all food is for the time being, prohibited.

Good sound common sense is a necessary element to success, and yet it often seems as if men think they can do without it in raising poultry. Some folks believe in good sense for dairying, good sense for growing all kinds of crops, but anybody and anything is good enough for hens. That does not sound very much like success.

ATTRACTIVE KEEP FARM LIFE

As one watches the drift of life in the older rural sections of the country, he is impressed with the need of keeping alive the community spirit and making rural life attractive. One not infrequently discovers places where a visible moral decline has set in. The roads are neglected, which in consequence prevents a freer social intercourse and results in small attendance at school, church and public events. Usually one discovers in these localities poor school buildings standing on weed-ridden grounds; a church hitting on not more than one cylinder; young people engrossed in frivolity; a lack of singing schools, literary societies, debating clubs, etc.

On the other hand, encouragement comes through the frequent discovery of localities where the community has developed a spirit of responsibility for the rising generation and a sense of pride in their environment. Here one is most certain to discover a live public school, active church organizations, clubs for the boys and girls, debating and literary societies and active social and fraternal organizations. Further investigation will usually reveal the fact that somewhere during the present or past such a community was blessed with foresighted leadership.

In order to give life in the rural districts the necessary vim, our rural educational policy should in many cases be redirected, the rural church reinspired and societies offering self-improvement and recreational opportunities should be multiplied to dispel the false appeal of the distant city. In every way possible demonstrations should be given to prove to the rising generation that when brains and energy are put into the farming business it furnishes a living every bit as attractive as that provided in our centres of population.

My Scales Make Me Money.

A valuable part of my farm equipment is a good set of platform scales that I have used for a number of years. An excellent set can be purchased for a moderate sum, and if properly installed and well cared for will last a long time.

I will give the method I employed in installing my scales: First I dug a trench for the wall about two feet deep, and half filled it with gravel. Then I mixed cement with the gravel until I had reached about 18 inches above the ground. The approaches were made at the same time. When I had reached a height of 18 inches I leveled the foundation and made cement sills. The scales are bolted in each corner. To keep the bolts in place, a wagon tire was bent at right angles at each corner and each bolted to the scale irons, for which an opening had to be made through the foundation. The scale platform was placed the same as usual.

It took \$10 worth of cement for the entire job, foundation, sill, and approaches. The scales are used almost every day, either by myself or a neighbor, and as much as four tons at a time have been weighed on them.—A. O. C.

Perfuming Ewes.

I'm going to give you my experience in making a ewe own her lamb. You can print it if you think it would interest any one.

A Cotswold sheep sheared twelve pounds of wool. She could have raised two good lambs, as she had so much milk. We found her lamb back in the field and carried to the barn. She refused to own it, so I decided to try my skill.

I tied her up. She kicked and stamped and butted the lamb for ten days. I must have given the idea of beating her out.

Then a new idea came to me. I washed the lamb with soap suds and rinsed it. It was so pretty and white when it dried. I put perfume all over the lamb and also on the sheep in her wool, and in twenty-four hours she was owning the lamb. That ended my trouble. I got the idea from reading of a lion tamer who used perfume on lions when taming them.—Mrs. David Harley.

This Post Will Stay Put.

If you have difficulty keeping a wire fence close enough to the ground to prevent stock from crawling through, and the post set in the ditch from pulling up, you might try this scheme:

Set a post in the centre of the ditch and one at the top of the grade on each side. Then fasten a double wire to the bottom of post on one side of ditch, run over the top of the post in the ditch, then down to the bottom of post on the other side. The wire may be tightened by twisting.

A New Way.

Little Emmeline was on a visit to her grandmother in the country. They had chicken for dinner, which pleased the little girl very much.

"Oh, where did you get the chicken, grandma?" she asked.

"From the chicken yard, dear. It's one of those you saw this morning."

"What one of those I fed?"

"Yes, dear."

"Did you kill one?"

"Yes, darling!"

"Oh, did you!" said Emmeline. "At home we buy ours ready-made!"

BIBLE THOUGHT FOR TODAY

THE ONLY SAFE TRUST.—Some trust in chariots and some in horses; but we will remember the name of the Lord our God.—Psa. 20: 7.

The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—In Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising.—The Transcript covers a wide section of territory in Western Ontario, and its readers are the leading farmers and townspeople. It is a first-class advertising medium. Rates on application.

Job Printing.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc.

A. E. Sutherland, Publisher.

After a careful survey of the Western situation and conferences with the various provincial governments, Hon. Charles Stewart, Minister of the Interior, has concluded that selected immigration is the solution of Canada's economic problems, and that the settlers needed are those people of agricultural experience who will go on the land and stay. Hand-picked immigrants in large quantities are needed in the West. To this end the Canadian Colonization Association has formulated a new policy for placing of desirable settlers on vacant Canadian lands under such conditions as will enable them to make good. The Association, which is financed by Canadian business men in both the East and the West, will receive the co-operation of the Canadian and British Governments and the Canadian railways. The business of actual land settlement will be financed by the income from commissions and collections to be paid by the land owners for the sale of their land. Another proposal is to bring boys and girls in their teens and to place them in rural homes under the contract system.

LET SHIRKERS STARVE

In a Hamilton despatch to The Globe of the 26th it was stated that Niagara fruit growers have been experiencing the greatest difficulty in securing pickers from the larger centres. One grower, after securing three men in Hamilton, had them all quit after putting in less than two and a half days' work. Two of them said they wanted to see the ball game in Hamilton, and these two men are alleged to have lived on public bounty all last winter.

About the same time that the fore-

going was published the writer received a private letter from Alberta, in which it was stated that while there were plenty of men in a local town who were available for harvest work, none of these would go out to the field for less than \$4.50 per day. That, with wheat at present prices, is a wholly impossible wage. Mean time farmers in Alberta, after having worked sixteen hours a day during seedling, and after having fought off grasshoppers at a very heavy expense for poison bait, the spreading of which began at three in the morning, are again working single-handed until near midnight in harvesting their crops.

Next winter, there is no doubt, we will once more hear the bitter wail of the "unemployed," and a cry will go up for free food for men who have abandoned the work of saving the bountiful fruit harvest of Niagara in order to see a ball game, or have refused to aid in saving the golden grain of Alberta for less than \$4.50 per day. Farmers will be even more gullible than they have been in the past if they permit a dollar of Provincial or Federal money to go for the purpose of providing bread for these shirkers. If the cities choose to encourage that sort of thing, let the cities bear the burden. Federal and Provincial treasurers should be sternly warned that their purse strings shall be held tight in winter against those who will not work when work is available.

WHY TELEPHONE OPERATOR REPEATS NUMBER ASKED FOR

After you remove the telephone receiver from the hook and ask Central for a number, you will notice that she repeats the number in a questioning voice. Her repetition of the number in such a tone calls for an acknowledgment from you that she has correctly heard the number.

It is to avoid the possibility of calling the wrong number that Central repeats the number given to her as she hears it.

The subscriber is expected to confirm the operator when she repeats the number. If she has the correct number. If not, the caller is expected to repeat the number desired. In this way the percentage of wrong number calls will be reduced to a minimum.

So when Central correctly repeats the number you ask for, just say "yes" or "please," or make some similar acknowledgment of its correctness. By adherence to this rule the service will be made surer and swifter.

DID YOU EVER STOP TO THINK

That the town that gets the publicity gets the business? Advertise! That the town that gets advertising grows? Advertise! That advertising a town is a business, not child's play? Advertise! That people will go miles to get to a good live town to trade? Advertise! That your property will increase in value when the outside world knows your town is wide awake? Advertise! That people from neighboring towns will come where there is something doing? Advertise! That the town which does not seek something better than it now has, is going to lose out? Advertise! That now is the time your town and business, need advertising more than ever before? Advertise! That if you don't get out and go after the outside trade, some neighboring town will? Advertise! That if they do, they will get the business you should get? Advertise!

CONCERNING LIFE INSURANCE

McLean's Magazine has the following question and answer:—
Question.—The agent of the Manufacturers' Life Insurance Company states this company is the only one that gives special rates for total abstainers and that an abstainer's guarantee special policy cannot be purchased elsewhere. A like this policy and I am a total abstainer. Are the agent's statements correct?—C. H. M., Kingston, Ont.

Answer.—The Manufacturers' Life Assurance Company is the only Canadian company which has a separate section for total abstainers and which gives special plans and rates. The abstainer is a much better risk than the moderate drinker, according to the officials of the company, and in their opinion the total abstainer should get the benefit of the saving in mortality. We do not hesitate to recommend a policy with this company.

H. J. Jamieson is the district agent for the Manufacturers' Life at Glencoe.

The world advances along some lines but it has never improved on the original lie: "I don't care about the money; it's the principle of the thing."

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

GOOD ALL-ROUND FAIR

Mosa and Ekfrid Agricultural Society Scores Another Success

Gate receipts at the Glencoe Fair this year were within a few dollars of last year's, which were the highest on record. And at that the ideal weather for fall work on the farm no doubt kept many farmers at home.

All round the fair was exceptionally good, with splendid exhibits in nearly all the classes. The show of cattle was particularly attractive. In the horse ring there were many fine animals shown. The display in the hall of products of the field and garden has seldom been equalled. In the ladies' department the display was not so large, but was none the less attractive, and a magnificent showing of cut flowers was pleasing to the eye. A fine display of millinery and ready-to-wear goods made by Mrs. W. A. Currie was artistic and greatly admired.

In point of interest and a feature that secured the commendation of all was the school fair, which capped all its predecessors and reflected greatly to the credit of the young folk. The list of winners will follow.

The speeding events attracted the interest of many and resulted as follows:—

2.18 Class
Joe Gratton, Galbraith Bros., Parkhill..... 1 1 1
O. Deen L., J. Wallis, Alvinston..... 2 2 2
Jessie Bars, Bass, Inwood..... 3 3 3
Time, 2.20 1/2, 2.20 1/2, 2.17 1/2.

2.50 Class
Jack Patchen, S. Hodgins, Luman..... 4 1 1 1
Castle Uno, P. Kerns, Wardsville..... 1 4 4 2
William H. N. Henderson, Glencoe..... 2 2 2 3
Baby Gola, H. Haveland, Melbourne..... 5 3 3 4
Maud Togo, R. McEllan, Watford..... 3 5 5 4
Mollie Mac, D. J. Mitchell, Glencoe..... 6 6 6 5
Time, 2.29 1/2, 2.25 1/2, 2.24 1/2, 2.26 1/2.

The fair this year had the following officers:—President, C. E. Davidson; 1st vice-president, Hugh McTaggart; 2nd vice-president, D. W. Gilles; secretary-treasurer, R. W. McKellar; directors—Dan McKellar, J. D. McKellar, John C. Gilles, Mungo Leitch, John Eddie, Dan Graham, J. L. Tait, George Walker, Wm. Reycraft, D. N. Munroe, Wm. Hagerty, G. McMurphy, R. M. McPherson, Chas. Willey, T. Henderson.

The prize list:

Heavy Draft Horses
Brood mare with foal by side—D. K. McKellar, C. McCallum, D. P. Campbell.
Foal—1st and 2nd, D. P. Campbell; 3rd, C. McCallum.

Gelding or filly 3 years old—J. D. McKellar.
Span—John Cairn, W. J. Welch, Peter Duncanson.

Agricultural
Brood mare with foal by side—D. P. Campbell.
Foal—D. P. Campbell, Arch. McAlpine.
Gelding or filly 3 years old—J. D. McKellar, Walter Hallstone.
Gelding or filly 2 years old—Peter Duncanson.
Colt or filly 1 year old—Walter Hallstone.
Span—B. C. Hoover, Thos. Kerr, R. E. C. McDonald.

General Purpose
Brood mare—J. C. Bowie, David Hardy, D. B. Ferguson.
Foal of 1922—D. B. Ferguson, David Hardy, Thos. A. Brown.

Gelding or filly 3 years old—Frank Brown.
Gelding or filly 2 years old—Thos. Henderson, Dan McMillan.
Colt or filly 1 year old—Dan Mc-

Judge Its Quality—Then Price

There's something alluring about the Studebaker Special Six Sedan. You notice it when you pass one on the street. It grows on you as you examine the car's details. It becomes even more pronounced when you take the wheel and drive it.

No wonder the Special Six Sedan carries such an appeal! Its beauty of line, finish and appointments fascinates you. The delightful harmony of color in the upholstery, the completeness of the appointments and the soft carpeting afford real elegance—and at a new low price.

The body is a striking example of the handicraft of Studebaker artisans. Built in Studebaker plants where the coachmaker's art has been handed down from father to son for more than two generations.

It is mounted on the same dependable Special Six chassis that has added new fame to the name Studebaker wherever cars are known.

Compare its appearance, its endurance records, its comfort, its equipment and its recognized reliability with any car within hundreds of dollars of its price. Judge it on quality first—then price—because price alone is no indication of its intrinsic value.

You can have confidence in the quality of Studebaker cars—in the 70 years of business success and manufacturing integrity back of them—and in the sterling dollar-for-dollar value built into them.

The name Studebaker on your car insures satisfaction!

Card of Thanks

Thanks are extended to the many kind friends of Glencoe and especially to the railroad boys for assistance and sympathy extended to Russell Hagghitt in his bereavement.

TOWN AND VICINITY

The price of bread in Glencoe has been reduced to 9c per loaf.

Daniel McEachern has bought Mrs. Atkinson's residence on Victoria street south.

Appin baseball team visited West Lorne on Thursday and defeated the nine there by a score of 8 to 5.

Rev. T. J. Charlton, who is leaving Glencoe for London this week, came here from Mitchell in October, 1917.

Why worry? The coal bin may be empty, but the corn is in the shock and the frost is not yet on the pumpkin.

Mrs. R. C. Troyer is teaching in the public school this week during the absence of Miss Margaret Morrison.

Mae McNaughton, of Moss, has purchased Mrs. Rose Munroe's cottage near Kilmarin and will move it to his farm near Walkers.

John Elsom, of Euphemia, has rented the 200-acre farm of Wesley Edwards, near Woodgreen, and intends moving there shortly.

The public school teachers of West Middlesex will meet in annual convention at Strathroy on Thursday and Friday, October 12 and 13.

Vera Jacobs, a pupil of the Mount Elgin Institute, Muncey, made the highest marks in West Middlesex at the high school entrance examination this year.

If a fall fair didn't serve any other useful purpose it would justify its existence by reason of the excellent excuse it gives for renewing old acquaintances.

The fall fairs have no fault to find with the weather this year, unless it be that farmers are more than ever tempted to stay at home and speed up the fall work.

Alvinston flax mill was totally destroyed by fire at 2.30 Tuesday morning, with a loss of \$12,000. The mill had only begun operating for the season on Monday.

Field day exercises of the Glencoe high school will be held on Wednesday, Oct. 11, commencing at 1.30 p.m. Dutton, Alvinston and West Lorne will participate.

Earl McDonald, who was in charge of a mission station in the West during the summer, is home for a few days prior to resuming his studies at Toronto University.

Misses Jessie Currie and Jean McEachern were successful in passing their supplemental examination at Western University and are now attending London Normal.

Local dealers are as yet unable to supply any coal. But Providence is tempering the wind to the shorn lamb and giving us a long lease of sunshine and warmth. Long may it continue!

The death occurred at her home in London on Tuesday of Mrs. J. A. McFarlane, formerly of Glencoe. Funeral service will be held at her late residence on Thursday.

Readers of the Transcript can make its news columns more interesting by sending in items regarding matters of local events which come under their observation.

The little son of Dugald Sinclair, of Ekfrid, was severely injured on Sunday evening, when by some means he was pinned between the automobile and door of the garage.

A new C. P. R. time table came into effect on Sunday. Train No. 633 westbound is now due at Glencoe at 8.22 p.m. instead of 8.18 p.m. This is the only change affecting Glencoe.

Rev. Dr. Henderson, of Bothwell, is occupying the Glencoe Methodist pulpit for a few Sundays in the absence of Rev. Mr. Whitehall, who is attending the general conference in Toronto.

Mrs. Paton addressed the Young People's Guild at Crinan on Sunday evening and gave an interesting account of her recent visit to Europe, including the Passion Play at Oberammergau.

W. D. Moss, Isaac Walker, John Tait and A. J. Wright were in conference with the Bishop of Huron at London on Tuesday to make arrangements for securing a new rector for St. John's church.

The small boy and others have been busy the past week or so putting in a stock of nuts for the winter. Butternuts are quite plentiful and there is also an abundant supply of hickory nuts and walnuts.

In a new time table which came into operation on the Grand Trunk Railway on Sunday the only change affecting Glencoe is in No. 18 eastbound express, which is now due at 3.10 p.m. instead of 3 p.m.

Dr. Freele has resumed practice after a severe illness from septic poisoning in the arm, which he contracted from a patient and which necessitated the doctor undergoing treatment in Victoria Hospital, London.

The past few weeks have been the busiest of the year on the farms in this neighborhood. Sowing wheat, threshing, filling silos, husking corn and harvesting fruit and root crops are occupations that are crowding one another closely this season.

Mrs. Betsy Mitchell, widow of the late John P. Mitchell and one of the pioneers of Moss township, passed away at the home of her grandson, John A. Leitch, lot 11, con. 6, on Tuesday, Oct. 3, in her 85th year. The funeral took place Thursday afternoon to Kilmarin cemetery.

The Grand Trunk Railway Company have notified C. O. Smith, their agent here, that prizes will be given for the best kept flower beds at the stations along their lines. Glencoe, it is understood, will make a strong bid for the capital prize. No doubt the local horticultural society will lend their encouragement.

Mrs. J. A. McCracken entertained at afternoon tea on Tuesday in honor of Miss Muriel Precious, who leaves this week for Florida. An interesting feature of the afternoon was the presentation on behalf of her girl friends by little Jean McIntyre of a number of handkerchiefs artistically arranged on a decorated parasol.

There are many fine exhibits at the rural school fairs, reflecting much credit upon the youthful exhibitors, but the best exhibit of all is the children themselves, eager, interested, anxious, and happy and all alive. Our county has an untold fortune in its rural boys and girls preparing in its rural and urban schools to be the men and women of tomorrow.

October is here, and we are right in the midst of the most glorious of Canadian seasons, when there is a tang in the air in the mornings and the great outdoors puts on its most attractive garb. Browning longest to be in England, "now that April's there," but so far as Canada is concerned, the month of October has a charm that is hard to resist.

On Friday evening the members of St. John's choir met at the home of Mrs. A. Burchiel and presented H. K. Charlton, who is leaving for London, with a fountain pen, as a slight token of the esteem in which he is held by the choir members. Miss Florence Westcott read an address and Miss Frances Moss made the presentation. A social time was spent in games and music.

The infant child of Russell Hagghitt died on Thursday at 1.30 p.m. and was buried along with its mother the same afternoon. The death of Mrs. Hagghitt occurred two days before. This is one of the saddest bereavements the village has known for some time. Mrs. Hagghitt leaving besides her husband a family of six under 11 years of age, not including the infant which died.

An enthusiastic number of young people met at the Presbyterian church on Monday evening for the opening meeting of the Guild. H. J. Jamieson, president, occupied the

chair. Rev. Mr. Rose, of Delaware, delivered an inspiring address on the "Aim and success of young people." Selections rendered by the orchestra and a piano solo by Miss Irene Reith were greatly enjoyed. Rev. Mr. Charlton dropped in and gave an interesting talk, extending the society his best wishes prior to his leaving Glencoe.

The regular meeting of the Epworth League in the Methodist school room on Monday took the form of a social evening, with Miss Muriel Precious as guest of honor. After the customary exercises Miss Precious was called forward, and Chester Bechill read an address and presentation was made by Miss Pearl George of several pieces of French ivory, including comb, brush, mirror, tray and clock, on behalf of the Sunday School, Epworth League, mission band and choir, of which organizations Miss Precious has been an active member. She left yesterday to spend some time with her sister, Mrs. W. B. Currie, at Deland, Florida. She was accompanied by her aunt, Mrs. James Gilbert, who will remain a short time.

HARVEST HOME—PRESENTATION

Harvest Home services held in St. John's church on Sunday were largely attended. Rev. T. J. Charlton, rector, preached two eloquent sermons. Special music was rendered by the choir, including solos by Miss Lovell and Stanley Humphries. On the following Monday a farewell social evening was held in the basement of the church, when the congregation met to bid farewell to Rev. and Mrs. Charlton, who leave shortly for London. A. J. Wright acted as chairman. Short addresses were given by R. Dimplo and John Tait, expressing regret at the departure of Mr. and Mrs. Charlton. Pleasant solos were rendered by Miss Lovell, Stanley Humphries and Savil Simpson. The main feature of the evening was the presentation of an address read by the people's warden, W. D. Moss, and the rector's warden, Isaac Walker, presented Mr. and Mrs. Charlton with a substantial purse, as a token of the high esteem in which Mr. and Mrs. Charlton are held, and of the appreciation of their faithful and untiring efforts. Both made very suitable replies. Refreshments were served and a social time spent.

SPECIAL NOTICES

33c trade and 31c cash for eggs, at Mayhew's.

Lincoln lambs and ewes for sale.—Bryden Glasgow.

Amazing values in all kinds of new fall goods, at Mayhew's.

Sewing machine for sale, \$3. Enquire at Transcript office.

Purse with sum of money found on fair grounds.—Transcript office.

For sale—2 Durham milch cows, 6 years old.—Earl Webster, Appin.

Home cooking sale on Saturday at 2 o'clock, next to George's store.

Two hundred bags of choice sand potatoes for sale.—John Cyster, Glencoe.

For sale—40-ft. self-oiling Chicago Aermotor windmill. Apply Mitchell Innes.

Jack Miner is coming to Glencoe town hall in November. Watch for the date.

For sale—Treasure heater, large size, burns coal or wood.—J. L. Tomlinson, tailor.

Sum of money found at Glencoe fair. Give particulars of loss at Transcript office.

Choice winter apples for sale by the bushel. Apply to Thos. A. Brown, R. R. 3, Glencoe.

Harness repair business for sale, including leather, saddlery hardware, tools, harness stitcher, riveting machine, etc.—D. Lamont.

We have our fall showing of millinery ready for early buyers. A complete range of sport and dress hats.—The Keith Cash Store.

We are wrecking a Gray-Dort touring car. Parts for sale. Apply to Hurdle Bros. garage, Newbury; phone 446, Bothwell line.

Upholstering, fine cabinet work, carpenter work, furniture finishing.—J. D. Brown, first door north of Transcript office; phone 68.

Parcel, containing man's wearing apparel, left in Dodge car about two weeks ago. Owner may have same by paying for this ad.—Transcript office.

For sale—200 cords of 16-inch dry, mixed, body wood; also 60 cords of 12-inch dry wood, same quality. Price \$5 and \$4.75. Enquire at Transcript office.

Lamont's selling out of harness still going on. Team harness, regular \$60, for \$45; good 1-inch team lines, \$5.50; team bridles, \$7; hame straps, regular price 35c, for 25c; horse collars away down in price.

Going to have a farm auction sale soon?

To be sure get out bills, because many look for them alone. The majority of farmers nowadays are having both bills and the list in the paper. But remember this, that the ESSENTIAL thing nowadays is the sale list in the paper.

WHAT CAUSES SO MUCH SICKNESS

Constipation Responsible for 90% of Disease

"FRUIT-A-TIVES" Corrects It

It is generally recognized among the medical profession that Constipation or Insufficient Action of The Bowels, produces more disease than any other one cause. Constipation is responsible for at least 90% of the disease in the world today—because Constipation is responsible for the Indigestion and Dyspepsia—the nervousness, Insomnia and Rheumatism—the Eczema and other skin troubles—the Headaches and Backaches.

Why is this? As you know, it is the duty of the bowels to carry off the waste matter in the system. If the bowel muscles are weak or the liver inactive, then this waste matter remains in the body and poisons the blood. As a result, every organ in the body is poisoned by this waste.

"Fruit-a-tives" has been wonderfully successful in relieving Stomach Troubles, Nervous Troubles, Liver Troubles, Kidney Troubles, Skin Troubles and Blood Troubles, because "Fruit-a-tives" positively and emphatically relieves Constipation.

"Fruit-a-tives" will always relieve Constipation, even though the trouble has been chronic for ten, fifteen and twenty years. Thousands of grateful users proclaim "Fruit-a-tives" the greatest remedy for Constipation that the world has ever known.

One box, 6 for \$2.50, trial size 25c. At dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

A Venus of the Stone Age

More prehistoric drawings of the Aurignacian period, 20,000 years ago, have been found in the caves of Comblieu, on the Aisne. They include, what might be termed a picture of the Venus of the stone age.

This drawing, which is on a fragment of mammoth bone, has been described by Dr. Lucien Mayer at Lyons university. The professor says that the drawing is of two figures, a man and the headless torso of a woman. The man is covered with hair and resembles the prehistoric man of our imagination, but the woman (contrary to H. G. Wells' conception) is of a remarkably high type of figure, and has a slender, graceful waistline, though the hips are somewhat prominent and the general aspect recalls forcibly the early manifestations of Greek art. The woman is in a kneeling posture, the drawing beginning just below the right shoulder and ending below the right knee.—London Times.

No Preacher Shortage.

Stevens county has a small but rather remarkable colored settlement. It was founded in the early '80s. Nearly every family lives in its own homestead. Their crops of maize, broom-corn and watermelons never fail in this favored district. Many of them are in independent circumstances.

"How many families have you in the settlement, uncle?" we asked a venerable old member of the race.

"Why, nephew," he replied, "there are summas about sixty."

"You must have a hard time getting preachers," we again ventured, having in mind the racial love of religious exercise.

"Deed we has, sah. There is only about twenty preachers regular."

Hugoton Hermes.

Was World's Champion Eater.

Bela Vezenyi, Budapest banker, has rendered his soul to his Maker. He was in a class by himself. In the first place, he was wealthy—since the war—and in Budapest, a vulgarity; in the second place he weighed more than four hundred pounds; in the third place he was the greatest eater in the world.

Every morning M. Vezenyi devoured twenty-four sausages and eight pounds of pate de foiegras for breakfast. At noon he engulphed three huge loaves of bread and six pounds of ham. In the evening—well, never mind!

Probably, like the worthy caterer in "Grillon du Foyer," he declared: "I eat little, but I eat what I do with a fine appetite."

Disgraceful.

An Irishman on a short visit to London for the first time happened to pass by the houses of parliament. He cast an interested eye at Big Ben and, after a little consideration, accordingly adjusted his watch by it.

The next day he happened to pass by again and pulled out his watch to see if it was correct. He looked very bewildered when he found that his timepiece had gained five minutes.

With a final glance, full of contempt and scorn at the towering Big Ben, he turned away, muttering to himself: "Arrah, ye great big spalpeen! Fancy letting a little watch beat ye!"

Toledo Cradles Godfish.

Toledo, Ohio, boasts of the largest goldfish hatchery in the world. Last year the firm controlling the hatchery shipped twenty-five carloads of goldfish and twenty carloads of fish globes.

PERSONAL AND SOCIAL

—Mrs. Ann McCallum is visiting her son, Geo. McCallum.

—Mrs. Edison, of Grand Rapids, is visiting her sister, Mrs. Saxton.

—Miss Florence Hurley was home from London over the week-end.

—Mr. and Mrs. R. F. Howard, of Sarnia, are on a visit to Glencoe friends.

—Miss Pearl Stocking, of Euphemia, has returned from a month's visit in Cleveland, Ohio.

—R. W. Oxley has returned from an extended trip to the middle west and British Columbia.

—Mr. and Mrs. Hugh Quick, of Windsor, are visiting his sisters, Mrs. Charles Hurley and Mrs. Thos. Mahwinney.

—Miss Elizabeth McEachern, of Edmonton, has returned there after spending her vacation with her brother at Campbellton.

—Mrs. Alice Stover, of Bay Minette, Ala., and Mrs. J. J. McHugh, of Detroit, were guests of Mrs. Charles Gould over the week-end.

—Mr. and Mrs. Wm. Bain announce the engagement of her sister, Joan McKenzie, to Alex. Bain, of Thamesville, the marriage to take place this month.

—Captain Hugh McAlpine and wife, of Cleveland, and Captain John McAlpine and son, of Detroit, spent a few days this week with relatives and friends here.

—Mr. and Mrs. W. C. King, of Moss, announce the engagement of their eldest daughter, Bessie Irene, to Raymond M. Hansen, of Detroit, the marriage to take place in October.

—J. A. Johnston, editor of the Mill-Mary Gazette, and Mrs. Johnston and children motored to Glencoe on Wednesday and spent until Monday with Mrs. Johnston's parents, Mr. and Mrs. Wm. Innes, and other relatives in this vicinity. On their return Mrs. Innes accompanied them as far as London.

AUCTION SALES

On west half south half lot 21, con. 14, Metcalfe, on Wednesday Oct. 18, at 1 o'clock—1 mare 4 years old, by Denure David; 1 gelding 3 years old by Lauriston Pride; 1 driving mare 8 years old; 1 cow due Oct. 28; 1 cow due Nov. 6; 1 cow supposed to be in calf; 1 fat calf; 1 yearling steer; 5 ewes 2 years old; 1 sow; 6 shoats; about 60 hens, Black Minorcas; 1 Massey-Harris binder; 1 M-H mowder; 1 M-H spring-tooth cultivator; 1 set diamond-tooth harrows; 1 walking plow, Wilkinson, No. 5; 1 disc harrow; 1 corn scuffer; 1 seed box for M-H cultivator; 1 Adams wagon, 24-in. tire; 1 set bobsleighs; 1 gravel box; 1 top buggy; 1 cutter; 1 set heavy harness; half set heavy harness; 3 horse collars; set single harness; string bells; quantity of wheat (for cash); quantity of oats; quantity of oats, peas and barley mixed; mow of hay; straw stack (to be fed on farm); 1,500 ft. 2-in. elm plank; hay car, rope and pulleys; fence posts; roll wire fence; number of 4-inch tile; large oak barrel; about 35 cords stove wood; "quantity of rails; whiffletrees, forks, shovels, chain, etc.; cook stove; extension table, chairs, sideboard and other household effects; telephone; mail box. The farm of 50 acres will be offered for sale subject to reserve bid.—Dan A. Leitch, proprietor; L. L. McTaggart, auctioneer.

A Wabash freight train was wrecked near Jeannette's Creek on Monday morning owing to an open rail where repairs were being made to the tracks. Traffic was delayed for several hours.

TURK LEADER HALTS MILITARY ACTIVITY; WITHDRAWS FROM CHANAK AREA

Armistice Conference Arranged Between Contending Forces
—New Line Established Between British and Turk
Troops in Neutral Zone—Other Bridges Yet to Cross
in Near East Situation.

Constantinople, Oct. 1.—Orders for a cessation of military movements in the Chanak region of Asiatic Turkey and for the suspension of the activities of the Turkish irregular forces in Thrace have been issued by Mustafa Kemal Pasha, the Turkish Nationalist leader.

The Turkish Nationalist authorities have agreed to an armistice conference in Mudania, on Tuesday and have requested the Allied High Commissioners to appoint delegates. The Nationalists will be represented by Ismet Pasha and possibly by Hamid Bey.

Kemal was requested by General Harrington, the British Commander, to arrange for a new line between the British and Turkish forces around Chanak, in the neutral zone. As a result the Kemalists have evacuated Eren Keui, and the British now control the whole coast of the Narrows from Chanak to Kara Bouroun. The latter point possesses an excellent key, enabling warships to anchor in deep water.

M. Franklin Bouillon, who has been conferring with Mustafa Kemal Pasha, is expected to arrive in Constantinople shortly and to inform the Allied High Commissioners fully of the Turkish views on the situation.

London, Oct. 1.—With the virtual acceptance by Kemal Pasha of a conference at Mudania, the whole Near Eastern situation is considered temporarily easier. However, the fact that Turkish troops are still concentrating in the Imdid zone, would indicate, according to remarks made after the British Cabinet's second meeting to-day, that "Kemal is still playing a game."

While the members of the Cabinet appear to be much gratified at the happy conclusion for the moment of a difficulty which might have necessitated the use of force in the Chanak zone, there are other bridges to cross. Up to the present there is no information from General Harrington, the

British Commander at Constantinople, that Kemal will attend the Mudania conference, although General Harrington's despatches indicate that he might.

The Mudania meeting will be a purely military affair, to arrange that the neutral zone shall be respected, and also to agree upon lines behind which the Greeks are to withdraw in Thrace, both points pending the general peace conference. There will be present military representatives of the three allied powers, as well as of Greece and Turkey.

It is pointed out that the very basis of this conference is respect for the neutral zone, and before it begins, the Turks will be expected to evacuate the Chanak area entirely. On this point there had been quibbling until the British Cabinet permitted General Harrington to send a virtual ultimatum to the Turks to clear out. Although the Turks have not yet withdrawn completely, they have evacuated the heights of Eren Keui and have desisted also from parading before the British wire entanglements. If the Turks around Imdid commence such actions are attempt to enter the neutral zone at that point, there is likelihood that the British will raise the question before entering the conference. It is known that while General Harrington is making every effort to maintain peace, he is a most exacting and determined person when given cause.

Another question which may arise within the conference is the form of government or control to be established in Thrace pending the terms of peace. It is certain that the Turks will demand that they be permitted to take over and occupy Thrace immediately for the purpose of protecting their Nationals, keeping order and preventing confusion and crime with the withdrawal of the Greeks. It is expected that allied officials and troops might be used for this purpose.

QUEBEC BOOSTS FARMING
One of the cars of the "Better Farming Special Train," organized by the Department of Agriculture of Quebec province, and the C.P.R., with the co-operation of the Dominion Department of Agriculture. Demonstrations are given in the cars from 10 a.m. to 5 p.m. and from 7 to 9 there are lectures illustrated with moving pictures. The car show is devoted to displays of farm engineering, drainage and field crops.

Canada from Coast to Coast

Glacier Bay, N.S.—With all its colonies working, the output of the Dominion Coal Company's mines is rapidly approaching normal. The average output of the mines is 14,000 tons a day, and officials of the company expect to reach this figure in a short time.

St. John, N.B.—Fishermen of the south shore of New Brunswick are in a happy frame of mind, as the result of conditions in the sardine packing industry. They have passed through three lean years, but the turn has come and again they are making money. A heavy run of the little fish has struck the coast and the dealers are commanding prices of \$12 and \$13 a hoghead instead of \$5, which has been the maximum price for a long time.

Quebec, Que.—There has been considerable activity in the pulp and paper industry in Canada lately. Michigan interests are negotiating with Kingston, Ont., with the view of building there a pulp and paper mill. The Premier Paper and Pulp Co., of Hartsville, N.S., is about to install a standard newsprint machine, with a capacity of 15,000 tons a year. The average daily production of the Abitibi Power and Paper Co.'s plant during August was 462 tons, and on the 29th of the month it reached as high as 494 tons. The groundwood pulp mill of the Backus Brothers Company, near Kenora, Ont., is also well under way. Work has started on the new \$13,000,000 plant of the Wigwam Pulp and Paper Co., at Elko, British Columbia.

Toronto, Ont.—All attendance re-

cords were broken at the 44th annual Canadian National Exhibition. In the thirteen days of the fair this year 1,272,500 paid admissions, against 1,242,000 last year, an increase of 130,500. Plans under consideration by the directors include the addition of 100 acres to the Exhibition City along the waterfront on the south.

Winnipeg, Man.—It is the boast of the Winnipeg Board of Trade that there are more University students in Manitoba, in proportion to population, than in any other province of Canada, or any state in the United States.

Saskatoon, Sask.—Seventy-five per cent. of the crop in Saskatchewan is grading number one. Threshing returns indicate that the farmers are getting five bushels per acre more than was expected, and the average will run about 18 bushels to the acre. Wheat is 60 per cent. threshed, and oats about 25 per cent. Some of the oats remain to be cut.

Edmonton, Alta.—The longest distance that Alberta coal has been shipped was recorded here when a local colliery company forwarded a carload of egg coal to Lewis, Quebec.

Nelson, B.C.—According to the latest report of the Okanagan district horticulturist, the apple crop will amount to 2,215,000 boxes. As the situation now stands, the Okanagan Valley will ship roughly 3,995 carloads of fruit, of which about 3,175 will be apples, 288 cars of crab apples, 96 of pears, 275 plums and prunes, 162 peaches, and 65 apricots. Of these totals a heavy percentage of peaches, apricots, and other soft fruit, will be shipped in cans.

"Automobile Foot" Added to Human Ills

Chicago, Oct. 1.—The "automobile foot" is the latest. Dr. Charles Cross, of San Francisco, here to attend the convention of Physical Therapists, tells about it. Automobile foot is caused, declared Dr. Cross, by the driver holding the foot for prolonged periods on the accelerator button. The lesion thus formed is usually located at the second toe. Sensations of pain occur across the ball of the foot. Forceful pushing of the clutch pedal with the left or a similar application of the right to the foot-brake may be the first cause of automobile foot.

70,000 Greek Prisoners Forced to Work by Turks

A despatch from Smyrna says:—The Turkish Government intends to use the Greek prisoners, who exceed 70,000 in number, in the work of reconstruction in the devastated regions.

A company in Brazil is preparing to produce paper from straw and the wood of a native pine tree, manufacturing chemical wood pulp for the first time in that country.

Venezelos Accepts Greek Request for Aid

London, Oct. 1.—Venezelos is expected to meet Lord Curzon at the Foreign Office, to-morrow. Venezelos received the representatives of the Manchester Guardian this afternoon. While declining to make any political statement on the ground that he has not yet made up his mind as to the course he would pursue, he said that he had received a request from the Greek Revolutionary Government to conduct the affairs of Greece abroad. He stated that in answer, he had asked for time to inform himself of the general political situation before giving any decision. He will be in London for some weeks.

About thirty-four per cent. of the automobiles now used in India are made in Canada, according to a report from H. A. Chisholm. Owing to the Manchester Guardian this afternoon. While declining to make any political statement on the ground that he has not yet made up his mind as to the course he would pursue, he said that he had received a request from the Greek Revolutionary Government to conduct the affairs of Greece abroad. He stated that in answer, he had asked for time to inform himself of the general political situation before giving any decision. He will be in London for some weeks.

GREEKS TO BLAME FOR BURNING OF SMYRNA

An English Woman Refugee
Makes Charges Against
Hellenic Troops.

A despatch from London says:—Mrs. Decondolle, an English woman, and wife of the manager of the Aïdin Railway, has written to the Manchester Guardian from H.M.S. King George, off Malta, describing the burning of Smyrna. She says, in part: "When the Greek troops first heard of the defeat of their main army they proceeded to carry out instructions previously laid down by their headquarters, and instituted wholesale carnage and incendiarism along the whole route of retreat."

Mrs. Decondolle declares that in Magnesia, almost wholly a Turkish town, the Greeks "rounded up and burnt in a circle the inhabitants of the city, leaving, however, a number of crucified women and children alive and writhing to welcome the incoming Turkish regulars."

"Whatever the English press may have to say upon the destruction of Smyrna, the Turk is, if anything, less blameable than any other nationality in this miserable business."

Serbs Oppose Giving Thrace Back to Turkey

A despatch from Belgrade says:—Serbian public opinion is against giving Thrace back to Turkey, and is in favor of fighting rather than have this take place. All newspapers express the same sentiment, and point out that as Turkey and Bulgaria have a common frontier, it would mean the defeat of Serbia before long.

The Serbs wish to act first, and want mobilization if Kemal persists in demanding Constantinople and East Thrace. The military party, which is the strongest, is eager for a chance to interfere, as they believe war would weld Jugo-Slavia into a solid nation, like Germany after 1870.

Weekly Market Report

Ontario corn—Nominal.
Ontario flour—1st pats., in jute sacks, 98 1/2 to 71.10 per bbl.; 2nd pats. (bakery), \$6 to \$6.30.
Ninety per cent. pat., in jute bags: Montreal, prompt shipment, \$4.50 to \$4.60; Toronto basis, \$4.35 to \$4.45; bulk, seaboard, \$4.20 to \$4.25.
Manitoba flour—1st pats., in jute sacks, \$6.50 per bbl.; 2nd pats., \$6.80.
Hay—Extra No. 2, per ton, track, \$27.00; mixed, \$13.50 to \$14.00; clover, \$13.50 to \$14.00; straw, 99c, car lots.
Cheese—New, large, 1 1/2 to 20c; twins, 19 1/2 to 21c; triplets, 21 to 21 1/2c; Stilltons, 21c. Old, large, 23 to 24c; twins, 24 to 24 1/2c; Stilltons, 25c.
Butter—Finest creamery prints, 39 to 40c; ordinary creamery prints, 35 to 37c; Dairy, 29 to 31c. Cooking, 21c.
Dressed poultry—Spring chickens, 30 to 35c; roosters, 25c; fowl, 24 to 27c; ducklings, 22 to 26c; turkeys, 30 to 35c.
Live poultry—Spring chickens, 25c; roosters, 17 to 20c; fowl, 20 to 25c; ducklings, 23 to 26c; turkeys, 30 to 35c.
Margarine—20 to 22c.
Eggs—No. 1 candied, 34 to 35c; select, 38 to 39c; cartons, 45 to 46c.
Beans—Canadian, hand-picked, bus., \$4.25; primes, \$3.75 to \$3.90.
Maple products—Syrup, per imp. gal., \$2.20; per 5 imp. gals., \$2.10; Maple sugar, lb., 20c.

EX-KING TINO MUST LEAVE THE COUNTRY

Constantine Has Taken Precautions Against Penury in His Latter Days.

A despatch from Athens says:—After an all-night session the revolutionary committee decided to submit to King George the names of a Cabinet, with Alexander Zaimis as Premier, and M. Politis as Minister of Foreign Affairs. M. Politis held the Foreign portfolio under Venizelos.

General elections probably will be proclaimed next week.

Friday's newspapers declare the revolutionary committee has informed ex-King Constantine that he must arrange for his departure as soon as possible.

King Constantine is in no danger of being reduced to the penury which embittered the last days of former Emperor Charles of Austria-Hungary. It is asserted that Constantine took precautions against this long ago, and has ten million gold francs in safe investments, deposited partly in New York, Brazil and Switzerland. In addition, as soon as the situation in Greece became disquieting the magnificent jewels of Queen Sophie and the royal household were shipped off to Zurich, Switzerland, in charge of a trusted friend and safely deposited in the vault of a bank there.

The Greek army in Thrace has definitely joined the revolution. The army corps in the Epirus also has thrown in its lot with the revolutionists.

Canada's Revenue Shows Big Increase

Ottawa, Oct. 1.—Customs and Excise revenue received during September showed an increase of \$4,712,256.46 over the corresponding month of last year. The total received September, 1922, was \$24,010,405.54, as compared with \$19,298,149.08 during September, 1921. During the six months of the fiscal year ending September 30, 1922, the total collected was \$131,256,560.36, as against \$115,636,186.34 during the corresponding period of the last fiscal year.

Motorist Beats World's Record for Driving

A despatch from London says:—The world's record for driving for twenty-four hours was broken Tuesday and Wednesday by a driver named Duff in a four-seater body, at Brooklands. He covered 2,085 miles in twenty-four hours, breaking the previous record by eight miles. His average speed was 87 miles an hour. Duff did the driving in two periods of twelve hours each, with a night's interval.

A further decrease in the net debt of Canada amounting to almost five million dollars, is shown in the statement for August issued by the Finance Department. The net debt August 31 was \$2,387,676,265, as compared with \$2,392,542,628, at the end of July.

Sultan of Turkey Offers to Abdicate Throne

A despatch from Paris says:—Mohammed VI., Sultan of Turkey, has abdicated in favor of the heir-apparent, Prince Abdul Medjid Effendi, according to a report sent by the Havas correspondent at Constantinople. The news, he adds, has not yet been officially announced.

It is reported that when the Sultan offered to abdicate the Grand Vizier communicated the fact to Hamid Bey, who telegraphed to Kemal.

He received a reply to instruct the Cabinet to accept the resignation, but to guard the situation closely.

Prince Abdul Medjid, who is a cousin of the Sultan, was born in 1868.

Foster Homes for Dependent Children

Officials of the Children's Aid Branch have now just about completed the personal visiting of eighty-two hundred children in foster homes located in all parts of the province, and a report has been submitted to the Provincial Secretary.

Reviewing all these reports, the superintendent, Mr. J. J. Kelso, states that it is gratifying to find that cases of ill-treatment have been exceedingly few—not one per cent., and where there have been mistakes or conditions calling for improvement, necessary action has been taken.

A noteworthy fact also, is that the Societies have in trust for these children sums ranging from five dollars to five hundred dollars, and in the aggregate amounting to eighty-two thousand five hundred and twenty-five dollars. This money is entered in the various banks to the individual credit of the children, and they receive the usual rate of interest. Where the amount has been over one hundred dollars, Victory Bonds have been purchased with the increased interest of 5 1/2 per cent. This money is handed over to the children as they attain years of maturity.

Another fact worthy of mention is that no difficulty is experienced in finding good homes for all classes of dependent children, and there are always applications ahead for a certain type of children. The sentiment in favor of home-finding, and the proper treatment of children is well recognized in Ontario, and the people generally deserve credit for the hearty co-operation that has been given.

The Prolific Chinese Hen.

We brag about the great Canadian hen, but the Chinese hen has her "skinned a mile," in the language of the vernacular. Nearly everybody in China keeps chickens, and the total output of eggs is astonishing.

Last year China exported about 250,000,000 whole eggs—i.e., in the shell—and an additional 330,000,000 dried, frozen or otherwise preserved.

The principal egg-producing provinces are those bordering on the Yangtze and Yellow Rivers; also Shantung. Nearly all of the eggs exported to America are frozen or dried.

Preserved Chinese eggs are exported in four different shapes—whole-egg powder, dried albumen (the whites), liquid yolk and dried yolk.

When the eggs are broken (unless meant for the whole-egg dried product), the whites and yolk are separated. The former are heated in shallow metal pans at 140 degrees Fahrenheit until all the moisture is evaporated out of them, and then are put up in 100-pound tins. The yolks are dried in vacuum machines. It takes fifty-one yolks to make a pound of yolk powder.

Yolk for the liquid product are treated with a preserving solution of boracic acid, and stirred thoroughly in vats. They are shipped in barrels of 430 pounds net, and are guaranteed to keep reasonably fresh for four months.

Canada exported goods valued at \$34,000,000 to the United States during the month of July, an increase of \$10,000,000 in value over exports in the same month last year. Imports from the United States during the same period were valued at \$50,000,000, a decrease of \$2,000,000 over July, 1921.

The preliminary estimate of the Bureau of Statistics of the total wheat yield of Canada for 1922 is 288,733,000 bushels, including fall and spring wheat, from 22,630,900 acres, or 17.25 bushels per acre, as against the 1921 estimate of 300,858,100 bushels from 23,261,224 acres, or 13.00 bushels per acre. Other grain yields for the whole of Canada, with last year's figures in brackets, are as follows: Oats 538,358,000 (426,232,000); barley 76,935,500 (59,709,100); rye 19,601,800 (21,455,260); flaxseed 5,296,000 (4,111,800). The figures for 1922 represent the following forecast of total yields in bushels or tons: peas 2,945,000; beans 976,000; buckwheat 7,825,000; mixed grain 30,235,000; corn for husking 14,000,000; potatoes 102,686,000; turnips, etc., 80,796,000; fodder corn 5,635,000 tons; sugar beets 346,000 tons.

Canadian Money at Premium in New York

A despatch from New York says:—One feature of the foreign exchange market here on Friday was the quoting of the Canadian dollar at a premium.

Whether Great Britain could take advantage of this financial position of one of her colonies, if the premium should continue, was a question discussed among exchange brokers. Britain is shipping gold here by millions of dollars preparatory to making a payment of interest on her war debt, while Canada has an embargo on the export of gold.

Canadian money now has a premium in all countries of the world.

The Earl of Cavan
From a new portrait of the Chief of the British General Staff, who is supervising the concentration of British troops in the neutral zone to guard the Dardanelles against the Turks.

Gold production in Ontario for the first half of 1922 shows a marked increase over a similar period last year, and gives promise of an output exceeding \$20,000,000 for the full year, as compared with \$14,624,086 in 1921, according to returns received by the Ontario Department of Mines. Silver production also shows a corresponding increase over the corresponding period in 1921.

A few months ago the Memnonites left Canada for Mexico because the Government of Manitoba insisted that English and not German should be the first language taught in their schools. However, the "liberty" of Mexico, where bandits raided and robbed them, was rather too much liberty; the Memnonites have asked Manitoba to take them back. The English language and a real government do not look so bad after all.

CONSTANTINE ABDICATES; GREECE UNDER RULE OF A TRIUMVIRATE

Revolution Accomplished by Army and Navy Without
Bloodshed—Crown Prince Succeeds to Throne.

A despatch from Athens says:—King Constantine, bowing to the will of the army and navy, has abdicated, and Crown Prince George, who married Princess Elizabeth of Roumania, becomes King of Greece.

A despatch from Paris says:—The Greek revolution, which was a military and naval coup, seems to have been carried out with surprising swiftness and completeness. The Crown Prince succeeds to the throne, while the victorious troops, with their leaders at their head, march triumphantly into Athens, which, pending the formation of a new Government, is in the hands of a military dictatorship in the shape of a triumvirate council of generals. One of the generals is said to be the famous General Nider, who for a long time was chief of staff and war minister under the Venizelos administration, and commanded the Greek expeditionary corps operating in South Russia in 1918.

Apparently the revolution was bloodless, although an unconfirmed report mentions the killing of one minister. It is assumed here that one

of the main objects of the revolution is to maintain the Greek rule in Eastern Thrace.

A Provisional Government, consisting of twelve officers, will rule Greece until a civil government is established, according to a telegram from Athens, received by the Greek Legation here.

The telegram recites events already known and adds: "The spirit and aims of the revolutionary movement being specially Nationalist, it was, from the first movement, warmly welcomed by all, and the entire population, as well as the army at Athens, received the revolutionary forces which entered the capital yesterday afternoon with enthusiasm."

"The revolutionary movement succeeded in uniting all Athens for the safety of the country. All, without exception, forgetting their hatreds and political passions, and including the royalists and reactionaries, grouped themselves in the National union movement, represented by the revolutionaries."

PLANTS "MADE TO ORDER" BY BURBANK

PATIENCE AND HARD WORK ARE HIS "SECRETS."

Worked Wonders in Plant-Life, Producing Seedless Potatoes and Shell-less Walnuts.

While I was making my "tour of inspection" through California I took the opportunity of visiting Luther Burbank, says an English writer.

Burbank is one of the marvels of the age in his own line of business. He has improved upon Nature almost past belief. His specialty lies in making plants of all kinds much more perfect than they ever were before.

What is Luther Burbank's secret? There isn't one. He has simply used intelligence and patience in crossing plants, and has brought out more varieties of plants than any other man in history. But it has taken him half a century of labor and some 100,000 experiments. The seedless potato which he evolved some fifty years ago had a greater effect on the world's supply than any single plant.

Horticulturists and floriculturists have been doing the same thing for centuries. Luther Burbank has been more successful than any of them because he possesses the capacity for taking infinite pains, and that is another way of saying he is a genius.

Weird Walnuts. Patience and hard work, and especially patience, have been the chief factors in his success. For fifty years he has thought of nothing else.

Deciding first what he wishes to create, recreate, or improve in the vegetable world, he begins by selecting specially fine specimens, allowing them to go to seed, and then experiment with the seeds under all sorts of conditions of climate, soil, and nourishment. The products of these experiments are in turn improved until the desired result is obtained.

Far be it from me to belittle the fame of Luther Burbank. But I want to dispel the idea that he possesses any supernatural powers, just as I am anxious to dispel the stories of "black magic" on his part. The truth about this really great man is much more interesting than are the wild tales told about him.

The cinema is often spoken of as one of the greatest benefactors of mankind. Well, Luther Burbank has done more for his fellowman than all the film stars going. He has added to the wealth of the world to an extent that we cannot yet estimate.

Only he doesn't enjoy a Press agent, so the world doesn't hear much about him and his work.

I returned to my first question—how he had produced the seedless cactus. For those who do not know this armor-plated plant, I just wish to say that the cactus is thorny and then more thorny. At least, it was until Burbank got busy with it.

"How did you do it?" I asked. "I simply experimented with the seeds until I got what I wanted," he replied, casually dismissing years of work. "It took time, and I don't know how many experiments. In the end I produced a new and better variety of cactus—and that's all."

"And that is what I am trying to do—to produce better grains, nuts, fruits and vegetables," he went on. "I am not only striving after new forms, colors and flavors, but for a better food supply for the world with less waste. My new wheat has been awarded a first prize in Canada. It is the finest wheat in the world. I have also a new oat and a new barley which will add millions to the world's wealth."

"Just now I am devoting most of my time to new varieties of fruits and nuts. You know, before I produced my plans it was impossible to export any California plums, as they got spoiled on the way. So I just grew a thicker skin on them!"

I also developed some walnuts without any shells, but the birds ate them off the trees, so I had to grow the shells back again. I want to show you my walnut trees. I think they are one of the finest things I have produced.

The Old, Old Story. He led me out into his gardens, which, by the way, are not exceptionally large, and only boast of a greenhouse no larger than many of the conservatories one sees in the grounds of ardent amateur flower-growers. Here he pointed out to me a huge tree.

"I grew that tree in ten years, and it is as large as a two hundred and fifty year old tree," he explained. "It is a cross between the black and the English walnut. Its timber is nearly ten times as valuable as that of the ordinary walnut. Think what that means. A forest of them would be worth a fortune."

As we walked about he pointed out to me various experiments which were under way.

And as we talked I got an insight into his philosophy of life, which was even more interesting than the plant wonders he had shown me. Luther Burbank is an optimistic pessimist.

"There is as much in life to hope for as there is to fear," he told me. "Life is self-expression, with action in certain definite directions, based on mechanical or chemical change. You cannot get away from the facts of evolution."

THE WAY TO BE WELL

Good Health Maintained Through Rich, Red Blood.

There are many men and women who, every few weeks, have spells of weakness, during which times they are little better than invalids; yet at other times they feel very well. Why does their health fluctuate so?

In the case of men worry and overstrained nerves are usually responsible for this state of unfitness and inability to face the anxieties of daily life.

As for women, her back aches, she is dizzy with sick headaches, and often has stabbing pains in the side. The only real health is all-the-year-round health, and the secret of it is good, red blood and plenty of it. On the way to keep the blood in good condition is to take Dr. Williams' Pink Pills. There is scarcely a nook or corner in Canada where someone will not be found who will tell you the benefit they have had through the use of these pills. And the reason is that through the improved condition of the blood, the lengthen and tone up the nerves of worried, enfeebled men and women, and at the same time have given new vigor to pale, delicate girls and thin, weedy boys. The value of these pills in all run down conditions is shown by the statement of Mrs. Lawrence Brown, Walton, N.S., who says:—"When I began taking Dr. Williams' Pink Pills I was in a weak, bloodless and nervous condition suffering from all the depressing symptoms that accompany this run down state of health. I had taken much medicine but it did not do me any good, and as I had a family of small children, I was much discouraged. Then, reading about Dr. Williams' Pink Pills, I decided to try them, and I can honestly say that I feel these pills have saved me from prolonged misery. My health is now good, and we now keep the pills in the house for use as a family medicine."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Australia exports 24,000,000 rabbit skins every year.

Ask for Minard's and take no other.

Timely Warning. The newly-appointed manager of a banking branch was being introduced to his employees.

He singled out one of the men at the cashier's desk, questioning him in detail about his work.

"I have been here forty years," said the cashier's assistant, with conscious pride, "and in that time I have only made one slight mistake."

"Good," replied the new manager. "But hereafter be more careful."

Surnames and Their Origin

HARKER
Racial Origin—English.
Source—A given name.

An older but obsolete form of this family name would be "Harkerson," or perhaps "Harkison," for it really belongs in the classification of surnames which end in "son" and which originally indicated the parentage of their bearers.

In a sense the name can claim greater antiquity than the English names of Norman origin, for it comes not from a Norman given name but from an Anglo-Saxon name which was in wide use prior to the Norman invasion, and which persisted even through that period, just as many other Saxon names did. As a matter of fact, however, it is likely that the family name was formed just about the same time the others were, and it is only as a given name that we can pick it up prior to the Norman invasion.

"Hardgaer" and "Heregaer" were the spellings which the Anglo-Saxons gave the name, and if you'll try it yourself you'll see there is really little difference between the pronunciations of "harker" and "hardgar." The meaning of this given name was "strong spear," or in the more general sense, "strong weapon."

Did You Know This?

Many ordinary, everyday things have names to which they are not really entitled.

Take tins, for instance. They have no right to the name, for they are made of sheet iron, with only the thinnest coating of tin.

Nor is "galvanized" iron really galvanized; it is merely dipped in molten zinc to give it the galvanized appearance.

The camel has nothing to do with the camel-hair brushes so beloved of artists, for they are made principally from squirrel's hair, and sealing-wax does not contain an atom of wax. It is made from shellac, cinnabar, and turpentine. It is the same with lead pencils, which contain no lead, and kid gloves that have no connection with young goats but are made from sheepskin.

From its name, one would think that the bit-mouse was a rodent, instead of a harmless, dainty little bird. The nightingale is not by any means only a night singer; its sweet song is heard just as frequently by day.

Small flies are not baby flies; they never grow any bigger, for the size of flies does not vary once they are fully formed. The dragon-fly is often accused of stinging; in reality, it is perfectly harmless.

It is a fallacy to suppose that a cat can see better in the dark than in the daylight, for it cannot, though its powers of sight at night are more highly developed than those of man and many of the humbler creatures.

A beef-eater does not get his name from the fact that he eats nothing but beef. The original word was *butifera*, a French word, meaning a man who waited at the Royal table or buffet.

Perhaps you have thought that it is steam which you see coming out of the kettle spout when the water boils. Steam is invisible; what you see is condensed moisture.

The newly-appointed manager of a banking branch was being introduced to his employees. He singled out one of the men at the cashier's desk, questioning him in detail about his work.

"I have been here forty years," said the cashier's assistant, with conscious pride, "and in that time I have only made one slight mistake."

"Good," replied the new manager. "But hereafter be more careful."

A Devout Oriental.

While on a special mission to the United States, a Persian official was entertained by a wealthy American, who invited the Oriental to his country place near the national capitol. On the morning of the Persian's arrival his host visited him in his apartment and was astonished, so the story runs, to see the Persian hopping about the floor in the most curious way. The host ventured to ask the reason for this extraordinary conduct; whereupon the Persian said:

"This rug is, as you see, green in color with pink roses here and there. Now, green is a sacred color with Persians, so I am obliged to hop from rose to rose. It is very good exercise, but somewhat fatiguing."

Diplomacy.

Young six-year-old Walter was reading a book far beyond his years. He looked up (he often did) and said:

"Papa, what does diplomacy mean?" "Diplomacy, Walter, means doing the right thing at the right time." The boy was silent for a minute. Then suddenly he spoke again.

"Then, I suppose," he said, "I used diplomacy last night?"

"How was that?" asked his father. "Why, when mother came in with the pastor oil last night, I rolled Johnny over into my place, and then rolled him back again before she got to the other side!"

SAVED BABY'S LIFE

Mrs. Alfred Tranchemontagne, St. Michel des Saints, Que., writes:—"Baby's Own Tablets are an excellent medicine. They saved my baby's life and I can highly recommend them to all mothers."

Mrs. Tranchemontagne's experience is that of thousands of other mothers who have tested the worth of Baby's Own Tablets. The Tablets are a sure and safe medicine for little ones and never fail to regulate the bowels and stomach, thus relieving all the minor ills from which children suffer. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

In Proportion. For weeks Perkins had been ill in hospital. With the beginning of convalescence he called loudly for food, declaring that he was being starved.

"The doctor says you may have something to eat to-morrow," said the nurse soothingly.

Now Perkins realized that there would be a restraint to his appetite; yet in his mind he could behold a meal, albeit a modest one, at his bedside.

On the morrow nurse entered and announced: "Here's your dinner." And she gave him a spoonful of tapioca, adding, "The doctor says that everything else you do must be in the same proportion."

A little later nurse was summoned to Perkins' bedside.

"Nurse," he gasped, "I want to do some reading; please bring me a postage stamp."

Real Expansion. "Now," said the physician who was examining an applicant for life insurance, "I shall have to ascertain your chest expansion."

"My what?" asked the applicant. "He means," said a friend who had come along, "the difference between what you measure when your chest is not inflated and what you measure when it is inflated."

"Oh," said the applicant, beginning dimly to understand. "Ten years ago I measured around here—indicating his round stomach—only thirty-two inches. I measure forty-eight now. I guess what you call my chest expansion is sixteen inches."

Says Indigestion Was Entirely Overcome

Hope for the millions of unfortunate men and women who are victims of stomach trouble is sounded by Mrs. O. E. Smith, of 169 Yarmouth Road, Toronto, Ont. Mrs. Smith was a victim of stomach trouble in its worst form but was completely restored to health by taking Tanlac. She says:

"I suffered terribly from indigestion, headaches and dizzy spells. My kidneys also bothered me, and my back and legs hurt constantly. But since I took Tanlac my digestion is perfect and I never have an ache or pain of any kind. In fact, I feel just fine all the time."

Undigested food ferments in the stomach and soon the entire system is filled with poisons. Tanlac was designed to restore the stomach to a healthy condition and build up the whole body. Millions everywhere have acclaimed its wonderful power. Get a bottle today.

Tanlac is sold by all good druggists. Advt.

A Stone-Dust Car-Blower.

A car has been designed for distributing stone dust in coal mines, to prevent explosions.

Much coal dust lodges on the "ribs" of coal-mine tunnels and in crannies of the rough-hewn walls. Currents of air created by trains of coal-cars passing through, or by other means, constantly blow it about. When the coal dust is mixed with air it becomes a dangerous explosive.

Accordingly, resort is had to the expedient of blowing stone-dust over the walls and ribs of the tunnels. The same air-currents that scatter the coal dust distribute with it the stone dust, which, mixed with the coal dust, renders the latter non-inflammable.

A conical receptacle is filled with stone dust, which is discharged through a hose, a gasoline engine actuating an air-blast that drives it out in a dense and powerful stream.

"Cascarets" 10c

Best Bowel Laxative When Bilious, Constipated

To clean out your bowels without cramping or overacting, take Cascarets. Sick headache, biliousness, gas, indigestion, sour, upset stomach, and all such distress gone by morning. Nicest physic on earth for grown-up and children. 10c a box. Taste like candy.

Playing It Safe. In navy circles there is told the story of an old sailor named Bill Taylor, who, while under court-martial, had been so impressed with the instructions of the young officer detailed for his defense that he was determined to exercise all care as to qualifying evidence when he was not absolutely certain. So, when the Judge Advocate asked him his name he replied:

"My name is William Taylor—or words to that effect."

You cannot dodge your responsibility by running away from duty.

Minard's Liniment for Distemper.

Saving Time Lengthens Life. Think of the tremendous efforts and pains business men take to attain the highest possible efficiency in manufacturing, in handling and selling, in building, the cutting off of unnecessary steps, studying the science of short cuts and effectiveness; but how few pay any attention at all to the time efficiency, the saving of the minutes and the hours as precious success products.

There is nothing so precious as time, because we cannot separate a particle of our existence from a moment of time. They are identical so far as we are concerned. We live in what we call time.

Now, I presume that the majority of people could save at least one hour a day during their whole active careers, by rearranging their life schedule. Most of us sleep too much. It doesn't follow that because we are sleepy when our usual time arrives to get up we need more sleep. If we lie abed nine hours or eight hours, and even if we sleep most of the time, it does not follow that we would suffer if we should cut off an hour of this precious time, because we would naturally sleep better during the shorter time we allowed ourselves.

I believe that seven hours of good sound sleep is enough for anybody, except small children and babies. I doubt if any healthy adult needs more. If those who are strong and in good health only allowed themselves this much time I believe they would get all the sleep they needed.

Just think what it would mean to save an hour a day for self-improvement, for good reading, for self-culture in different directions! How we could enlarge and enrich our lives with all these saved hours a week!—O. B. Marden.

Bad milk can be detected over the telephone by means of a newly designed electrical apparatus.

Every square mile of the ocean is believed to have a population of 120,000,000 fish.

One of the best known guides in Nova Scotia gives this testimonial of MINARD'S LINIMENT:

"Have used Minard's Liniment in my home, hunting and lumber camps for years, and consider it the best white liniment on the market. I find that it gives quick relief to minor ailments, such as sprains, bruises and all kinds of wounds. Also it is a great remedy for coughs, colds, etc., which one is liable to catch when log driving and cruising during the winter and spring months. I would not be without MINARD'S LINIMENT and cannot recommend it too highly."
(Signed) Ellison Gray.

Cuticura Heals Itching Burning Pimples On Face

"My face was entirely covered with pimples which not only disfigured me but bothered me with itching and burning. They were large, hard and red, and after a while began to fester. They itched so that I had to scratch them which made the burning more intense."

"I used various salves and creams but they gave no relief. The trouble lasted for nearly three months until I heard of Cuticura Soap and Ointment. I sent for a free sample. In about a week a decided improvement was made so I bought more, and two cakes of Soap with one box of Ointment healed me." (Signed) Elmer V. Foss, 7 Ocean View Ave., East Lynn, Mass.

Give Cuticura Soap, Ointment and Talcum the care of your skin.

Sample Free by Mail. Address: "E. F. McClellan," Box 100, Portland, Me. Send every-where. Soap, Ointment and Talcum. Cuticura Soap always without mail.

STOMACH MISERY, GAS, INDIGESTION

"Pape's Diapepsin" Corrects Sour, Upset Stomachs at Once

"Pape's Diapepsin" is the quickest, surest relief for indigestion, gases, flatulence, heartburn, sourness, fermentation or stomach distress caused by acidity. A few tablets give almost immediate stomach relief. Correct your stomach and digestion now for a few cents. Druggists sell millions of packages.

MOTHER!

Move Child's Bowels with "California Fig Syrup"

Hurry mother! Even a sick child loves the "fruity" taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful to-day may prevent a sick child to-morrow. If constipated, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

WHAT IS A LETTER

Many Times It's a Guide to Health as is This One

Women—Read It

Marmion, Ontario.—Before using Lydia E. Pinkham's Vegetable Compound I was a total wreck. I had terrible pains in my sides and was not regular. Finally I got so weak I could not go up stairs without stopping to rest half-way up. I saw your medicine advertised in the newspapers and gave it a trial. I took four bottles of the Vegetable Compound and was restored to health. I am married, am the mother of two children and do all my housework, milk eight cows and do a hired man's work and enjoy the best of health. I also found the Vegetable Compound a great help for my weak back before my babies were born. I recommend it to all my friends.—Mrs. HENRY JANKE, Marmion, Ontario.

Letters which you read in the newspapers recommending Lydia E. Pinkham's Vegetable Compound are genuine expressions from women who have been helped by this splendid medicine. They are anxious for other women, who may be suffering as they did, to know of the great merit of this medicine. Each one, with her reputation, stands behind it, to point out to sick women the way to health. Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write Lydia E. Pinkham Medicine Co., Lynn, Mass.

Never Mind What Granny Did—Remember—You're You!

MANY people refuse to believe that tea or coffee can possibly harm them, because they have used these table beverages ever since they outgrew the health rules relating to children.

"Nonsense!" they say, "Why, Granny has been drinking tea or coffee all her life."

It's true that some folks drink tea and coffee without apparent harm. These are the exceptions. But to most people there comes a day of reckoning.

Sold by grocers everywhere

Instant Postum FOR HEALTH

"There's a Reason"

WARDSVILLE

Mrs. Irwin, Mr. Irwin, wife and children, of St. Thomas, spent a few days with Miss Gardiner and Mrs. Potter.

Miss Gardiner spent a few days at Maidstone.

Mr. and Mrs. Lawrence Harvey and children, of St. Thomas, spent Sunday with Mr. and Mrs. Chas. Mimma.

Allan Henderson, of Walkerville, spent the week-end at his home here.

The old original dramatic company have started to rehearse their new play, "Kathleen Mavourneen."

A number from here attended the harvest home services in Cashmere Methodist church on Sunday.

Charlie Guest has returned to Wardsville after spending the summer at his home near London.

Mr. and Mrs. Jim McIntyre and family spent Sunday in Florence.

A meeting of the Women's Institute was held on Thursday afternoon at the home of Mrs. Frank Henderson.

A good number were present and a pleasant time spent. The president, Mrs. (Dr.) Glenn, took charge. The roll call was answered to by the name of a Canadian author and one of his quotations. Miss Alice Harvey gave a piano solo and a song was sung.

A contest was then entered into, after which lunch was served. Mrs. Mitchell, who has been seriously ill, is improving nicely.

Miss Farrington and Miss Clement spent Saturday in London.

Mrs. Margaret Tiernan, of Windsor, spent a few days with Mr. and Mrs. George Love.

Joe Guest spent Sunday in St. Thomas.

Morley Faulds, of St. Thomas, spent the week-end with friends here.

Mr. and Mrs. J. V. Faulds are visiting relatives in Detroit and St. Louis.

Mrs. Alex. Douglas is attending a board meeting of the Women's Missionary Society of the Methodist Church at Toronto.

Mr. and Mrs. George Love and Jean spent the week-end with relatives in Walkerville and Detroit.

Mrs. C. Bowles is visiting her sons in Toronto.

A number from here attended Rodney Fair on Tuesday.

NORTH EKFRID

Mr. and Mrs. Henry Howe, of Caradoc, were the guests of Mr. and Mrs. Harry Hardy Sunday.

Mr. and Mrs. Charles Webber, of Ohio, accompanied by Mr. and Mrs. Will Webber, motored to Windsor to spend the week-end with the latter's son, Floyd Webber.

Mrs. Gordon Roemmele returned

home last week from Windsor where she had been visiting relatives.

Mr. and Mrs. Edwards, of Arkona, spent Sunday with Mr. and Mrs. David Down.

Mrs. Ed. Cobbin, of Sarnia, has returned home after spending two weeks with her parents, Mr. and Mrs. Henry Roemmele, sr.

The little son of Mr. and Mrs. Will Down had the misfortune to fall and break his collar-bone.

A large number from this vicinity attended the school fair at Appin on Saturday. North Ekfrid school received first prize for costumes and drill, and also other prizes.

NEWBURY

Miss Florence Richards, of Gray's, Essex, England, arrived in town last week on an intended visit and is the guest of her friend, Mrs. George Harcourt.

J. Parkes has moved his residence and shoe repair shop to James Jeffery's house, south of the G. T. R.

Wm. Glennie was in London on Monday.

Wm. Martin, who is attending Normal school at London, was home for the week-end.

Rev. Mr. Carr, of West Lorne, conducted preparatory services in Knox church on Friday evening. On Sunday there was communion and baptism.

The following children being baptised: Watson Adair, son of Earl Blain; Robert William Gordon, son of James Jeffery, and Jean, daughter of Erwin Cuckey.

Mr. and Mrs. Adam Frayne, of Sarnia; Mr. and Mrs. Wm. Neal, of Inwood, and Mr. and Mrs. Earl Blain and son Adair, of Parkdale, spent Sunday at Mrs. C. A. Blain's.

Mrs. Frances Graham left for Toronto on Saturday after spending some time with her daughter, Mrs. R. H. Moore.

George Flagg, with his sister, Mrs. George Martin, and her daughter, Edith Martin, had a narrow escape from serious injury on Saturday evening. While driving to Wardsville their buggy was struck by an automobile and Mr. Flagg and Miss Edith were thrown out, both being somewhat bruised. The buggy was badly damaged.

D. J. Batsner was in Des Moines this week on a business trip.

Walter Dobbins, wife and two daughters, of Wheatley spent the week-end at his father's.

Mr. and Mrs. Wm. Connelly are visiting in Detroit.

Mrs. Annie Risk, of Flint, Mich.; Mr. and Mrs. Sylvester, of Detroit, and Mrs. Dobbins and daughter Winnie, of Florence, spent the week-end at G. D. Dobbins's.

Mrs. Yates and daughter, Miss Jennie Weaver, have been visiting Windsor friends.

Mrs. Duncan McRae, of Windsor, is visiting in town.

Miss Bertha Crim, of Detroit, is visiting her mother.

Mr. and Mrs. Mannings, of London, visited last week with their cousin, Mrs. Sellers.

Miss Jean Walker, of London, spent last week with her grandmother, Mrs. Fletcher.

The regular meeting of the W. M. S. of Knox church was held at the home of Mrs. W. Bayne, with 16 members and 3 visitors present. After a

short discussion on the work, Mrs. Stalker and Mrs. Moore gave excellent papers on the work being done in the western part of Canada, followed by an interesting talk from Miss Bessie Fennell on her work during her stay at Manitoulin Island and the great need of more workers.

CAIRO

The 51st anniversary of the Presbyterian church was celebrated on Sunday, Oct. 1st. Services were held at 2:30 and 7:30, conducted by Rev. W. I. McLean, of Thamesville, who gave two eloquent discourses to the large congregations. The music by Cairo choir, assisted by Mrs. (Rev.) Bell, of Bothwell; Miss Bessie Smith, of London; Mr. Sylvester, of Bothwell, and Mac McAlpine, of Glencoe, was much appreciated. The beautiful weather brought many from a distance.

Mr. and Mrs. Wm. Ball, of Strathroy, were the guests of D. M. Smith, Cyrene P. Smith and Mrs. Annie Smith, of Detroit, spent Sunday here.

Miss Bessie Smith and Miss Velma Handies were guests at John Randless's.

Mr. and Mrs. Floyd Coulter (nee Mary McGugan) and Mrs. H. E. Long, of Detroit visited at Archie McGugan's.

Miss Ila Burr and Maurice Baird, of Windsor, came up for the week-end.

G. L. Smith, wife and son Douglas, of Windsor, motored up for the week-end to visit his parents, Mr. and Mrs. D. M. Smith.

There will be no service in the Presbyterian church next Sunday owing to anniversary services in Armstrong church.

Mrs. Wm. McKeown entertained the choir and those who assisted on Sunday.

APPIN

Mr. Peckham, our progressive mail carrier, has constructed a cab on his rig to protect him from the elements.

Rev. John Crawford occupied the pulpit in the Presbyterian church on Sunday.

A dance was held in the town hall on Saturday night. The Laughton-Walker orchestra furnished music.

Anniversary services will be held at Springfield on Oct. 15. Rev. Mr. Sterling, who was on this circuit a few years ago, will preach. Special music will be furnished by a quartette from Appin and a soloist.

Dan McIntyre, sr., and Robert McDonald left on Saturday for the West to buy cattle.

We regret to hear that Dr. McTavish is leaving Appin, having obtained a practice at Tavistock.

Internally and Externally it is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

CASHMERE

Mr. and Mrs. E. F. Rycraft, Mr. and Mrs. Calvert Rycraft and Mr. Little and son, of Linden, Mich., spent Sunday with Mr. and Mrs. Charlie Tunks.

Mr. and Mrs. Johnston and daughter, of Clachan; Mr. and Mrs. James Dent and sons, of Bothwell, and Mr. and Mrs. Thos. Darke spent Sunday with Mr. and Mrs. Wed. Darke.

Miss Bessie Jeffery, of Shetland, is visiting her cousin, Mrs. Calvin Sittler.

Mr. and Mrs. Earle Linden, of Aldborough, spent Sunday with her parents, Mr. and Mrs. Henry Saylor.

We are sorry to hear that Mrs. Will Saylor is on the sick-list.

Mr. and Mrs. Angus McDonald and family, of Appin, spent Sunday with her parents, Mr. and Mrs. Jonathan Saylor.

Mr. and Mrs. Gordon Smith and son Douglas, of Walkerville, spent the week-end with her parents, Mr. and Mrs. A. J. Taylor.

Mr. and Mrs. Watterworth, of near Glencoe, spent Sunday with Mr. and Mrs. Robert Webster.

We are sorry to report the serious illness of John McIntyre, sr. On Thursday evening an operation was performed but his condition is still very serious. His daughters were called to his bedside.

Mr. and Mrs. Allen Sittler, of Bothwell, and their sons, Melvin and Basil, of Detroit, and Mr. and Mrs. David Smith, of Bothwell, spent Sunday with the latter's granddaughter, Mrs. Earle Tunks.

Harvest home services were held on Sunday. The pastor, Rev. Mr. Bridgette, preached eloquent sermons. The church was tastefully decorated with fruits, flowers, vegetables, grains, etc. The choir rendered special music at both services. The offering was very satisfactory.

For sale—some second-hand bugles, some new ones, 2 second-hand lumber wagons.—Wm. Allan, wagon-maker, Glencoe.

WOODGREEN

Mrs. A. Daum and Miss Myrtle Perlin spent the week-end in Blenheim.

Russell Clannahan, of Detroit, spent the week-end with friends here.

Miss Ethel Moore spent Sunday at S. Whitfield's.

The auction sale held at T. F. Robinson's last Friday was well attended. Born—to Mr. and Mrs. Jesse Lumley, a daughter.

A number from here attended the old time dance in Wardsville Thursday night.

A vegetable, fruit and clothing shower in aid of the Wharfedale Rd. Children's Shelter will be held at S. S. No. 3, Mosa, on Saturday, Oct. 7.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. They keep the child in a constant state of unrest and, if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by using a reliable worm remedy, such as Miller's Worm Powders, which are sure death to worms.

SHETLAND

Miss Virda Badgley spent Sunday at her home.

Mr. and Mrs. J. T. Armstrong and Mr. and Mrs. Henry Armstrong spent Sunday at Fred Jeffery's.

Misses Millie and Ila Bolton spent Sunday at their home.

Mr. and Mrs. Durward Dobbins spent Sunday at Joseph Dobbins's.

Mrs. Alex. McIntyre and little son are spending a few days at Fred Jeffery's.

The anniversary services in the Methodist church on Sunday were well attended.

FEEDING YOUNG PIGS

Practical Hints or Dealing With the Junior Hog.

Begin With the Mother—Wean When Eight Weeks Old—A Good Ration Suggested—Winter Feeding and Quarters.

(Contributed by Ontario Department of Agriculture, Toronto.)

Liberal feeding on a well-balanced ration suited to the needs of the sow previous to the birth of the young is very essential if the little pigs are to be worth rearing and the sow in condition to supply ample milk for them. With the sow well nourished and given opportunity for exercise, she is the best equipped individual to undertake the task of rearing a litter.

After the little pigs arrive, everything should be done for their comfort and safety if they are to succeed as feeders. Clean, light pens; dry yard or grass lot; abundant sunshine and a well fed mother, usually mean success to the little pigs. When the young learn to feed at four weeks, provision should be made whereby they can feed at a small trough in an enclosure away from the sow. Small quantities of sweet skim milk in which wheat shorts have been mixed should be fed in small quantities and, often, feeding a little less than the pigs will actually take. Pigs that have been feeding from the trough for two weeks or more can be weaned without a very serious setback. The longer the pigs can remain with the sow the better it is for them, but such practice is not always profitable, so it is usual to wean the pigs when they are eight weeks old. Since pigs are hunting the ground surface or rooting for morsels of food, it is good practice to encourage such by scattering plump grain on the floor of the pen or yard. This causes the pig to take the exercise necessary to treat.

When the pigs have reached the weaning age of eight weeks, they should be completely separated from the sow. It is better to remove the sow and leave the young pigs in the pen that they have been used to for a week, than their troubles may not all come at once. When the pigs have quite forgotten their mother, an ideal home for them is a colony house situated in an alfalfa, red clover, rape or blue grass pasture yard, where water, a wallow hole and shade are abundantly supplied. If the young pigs must be kept in the pigery, then everything should be done to provide dryness, protection from insects, a living temperature, ample room, cleanliness, comfort, sunshine and a ration suited to their needs. Green feeds should form a fair percentage of the total ration for pigs whether fed as a soiling crop or as pasture. The following mixed grain ration has proven very satisfactory: Wheat middlings 25 pounds, shorts 25 pounds, finely ground oats 50 pounds, oil cake meal 5 pounds, meat meal 3 pounds. Pigs eight weeks old will require a pound or more per day. The quantity required for each day should be set apart and soaked for twelve hours or more, using no more water than is required for the soaking process. When ready to feed use five pounds of skim milk to each pound of meal. Feed sweet skim milk until the pigs are well weaned, then change to sour skim milk and continue to use such, as long as possible.

Handling Them at Three Months. After the pigs are three months old, buttermilk with equal advantage. A change in the grain ration is also desirable at this age, and is most easily provided by adding a more fattening grain to the mixture already suggested for the eight weeks' old pig. The following is very satisfactory: Corn or barley 25 pounds, shorts 50 pounds, wheat middlings 25 pounds, finely ground oats 50 pounds, oil cake meal 5 pounds, meat meal 3 pounds. Pigs eight weeks old will require a pound or more per day. The quantity required for each day should be set apart and soaked for twelve hours or more, using no more water than is required for the soaking process. When ready to feed use five pounds of skim milk to each pound of meal. Feed sweet skim milk until the pigs are well weaned, then change to sour skim milk and continue to use such, as long as possible.

Winter Feeding. The success attained at pig feeding in the winter depends to a greater extent upon the skill of the feeder than does summer feeding when weather conditions are favorable. Comfortable quarters which may be under the strawstack or in an elaborate pen, some place that is dry and will stay dry, is the first necessity. A well balanced ration suited to winter conditions in that it will supply in so far as possible something to take the place of grass and clover and "on the soil" conditions. Roots and sods are the most easily supplied substitutes. Room for exercise, and inducement to take such by scattering whole grain in the litter or feeding ear corn are advised. The well supplied conditioner box is much more necessary during the winter than it is when the pigs are running on the land.

Dampness is the great trouble to overcome. In the modern pigery this is accomplished by abundant glass space in the roof and walls, and elevated platform for sleeping quarters and ventilators to carry away damp foul air. The pig will keep itself clean, but any other domestic animal if given freedom to do so.

L. Stevenson, Sec., Dept. of Agriculture, Toronto.

Mortgage Sale

Under and by virtue of the powers contained in a certain mortgage, which will be produced at the time of sale, there will be offered for sale by Public Auction at Wilson's Hotel, in the Village of Wardsville, on THURSDAY, OCTOBER 19th, 1922, at 2:30 o'clock p.m., the following Real Estate, namely:

ALL AND SINGULAR those certain parcels or tracts of land and premises situate, lying and being in the Village of Wardsville, in the County of Middlesex and Province of Ontario, containing by admeasurement two-fifths of an acre be the same more or less, being composed of village lots ninety and ninety-one west of Hagerty street and south of Henrietta street on which was formerly known as block D in Henry Ross Archer's survey of part of the said Village of Wardsville.

SECONDLY: In the Village of Wardsville and being composed of part of lot number seventeen and containing by admeasurement eight acres be the same more or less, more particularly described as follows, that is to say:—Commencing at a distance of two chains and twenty links from the Hagerty Road on the south side of John street; thence westerly along said limit thirteen chains more or less to the line between the easterly and westerly halves of lot number seventeen in the first range north of the Longwoods Road in the Township of Mosa and Village of Wardsville; thence south along said limit eight chains more or less to the northerly limit of lands formerly owned by one Amos W. Thomas; thence easterly along said limit thirteen chains more or less to lot number eighty-nine in block D in Henry Ross Archer's survey west of the Hagerty Road in the Village of Wardsville; thence north parallel with the Hagerty Road eight chains more or less to the place of beginning.

AND THIRDLY: All and singular that certain parcel or tract of land situate, lying and being in the Village of Wardsville, in the Township of Mosa, in the County of Middlesex, containing eleven acres, be the same more or less, and the parcel or tract of land hereby conveyed or intended so to be may be known and described as follows, that is to say:—Commencing at a point in the line between the easterly and westerly halves of lot number seventeen in the first range north of the Long-

woods Road in the Township of Mosa where the northerly limit of the corporation of the said Village of Wardsville intersects the said line between the easterly and westerly halves of said lot number seventeen according to the map or plan of the said Village of Wardsville made by John O'Mara bearing date the fourteenth day of July, A.D. 1868, and duly registered in the registry office for the West Riding of the County of Middlesex; thence easterly along the said northerly limit of the said corporation of the said Village of Wardsville a distance of fifty-one rods more or less to the north-westerly angle of village lot number 194 west of Hagerty Road in the said Village of Wardsville; thence southerly in a line parallel with the said line between the easterly and westerly halves of said lot number seventeen a distance of thirty-four and one-half rods more or less to the place of commencement.

This property is situated in the Village of Wardsville. It contains twenty acres of good land all planted with choice apple and other fruit trees now coming into full bearing. It has on it a frame dwelling house, frame stable and other improvements.

Terms of Sale:—Fifteen per cent. of the purchase price to be paid down at the time of sale and the balance within three weeks thereafter. For further particulars and conditions of sale apply to ELLIOTT & MOSS, Vendor's Solicitors, or Mary E. Walker, Administrator of the Estate of Thomas O. Simpson, deceased, L. L. McTAGGART, Auctioneer.

Dated at Glencoe, Ontario, this 19th day of September, 1922.
