INTRODUCTORY.

THIS WORK is compiled and issued by Ezekial Morrison, and its contents are the outcome of many years' experience.

The author is the pioneer photographer of Central Canada, and established in 1853 the first gallery for Daguerrotype, Glass and Iron Pictures and Photographs in the Counties of Leeds and Grenville and Lanark and Renfrew. Studied in art and chemicals under the best teachers of the day, and commenced using in 1853 what is now called "The Elixir of Life," which is the chief constituent contained in his Photo-Chemical Herbaline Remedies, which have and are now curing the ailments of mankind on every hand, as the testimony of hundreds of afflicted ones who have been restored to health and happiness goes to prove.

These Remedies speak for themselves.

God said: "Let there be Light," and light was. The Great Creator also said: "Behold I have given you every herb-bearing seed, which is upon the face of the earth, and every tree, in the which is the fruit upon a tree yielding seed; to you it shall be for meat." (Gen. I, 29). See also Ps. I, Ps. 37, and John 14.

ANTHRAX.

—
(TREATMENT.)

MAKE a swab and take an ounce of Black Oil, swabbing the mouth thoroughly. Let them lick away at the Oil as much as they like. Then one pound of salts as a drench. Let them stand for half an hour, then give desertspoonful of red pepper and one table-spoonful of tincture of Lobelia in a pint of warm water as a drench. If they will eat, give a bran mush with one ounce of salt petre. Give all this inside of three hours. In three hours pour down one ounce of Oil again. At the end of six hours give one pound and a half of salts, half an ounce of sulphur in a quart of water. Give all the water they will drink. They seldom will drink. If not drench them. Move them around if you can, it will do them good. Put a pint of linseed or Tanner's oil on top of this. The next morning give one ounce of black oil. Do not shake it up—an ounce off the top of the bottle. Give pepper and two tablespoons of Lobelia in one and a half pounds of salt petre. Move them around again, they will probably go to eating. Give pailful of slop if they will take it, it will not be long before they will. This cured a cow last year that lost her milk from fifty quarts in less than forty-eight hours to less than a pint. She was alright in less than two weeks. This was in the strong heat last year.

Black Jaw, Black Death, Spotted Tongue.

This disease is a combination of all the troubles known in all kinds of animals. It comes from influenza, lagrip, pink eye, epizootic, anthrax. These are some of the names that it has started from. This is what has been going the rounds of our country for the past six years and at the present time is called smallpox. It is not the old pox that we had sixty-five years ago. Any old practioner will tell you the same story. It can be cured in this way in horses, cows, swine and fowl, if taken in time by gargling with Black Oil the same as Anthrax or Rabies. Those poisons can be cured, that is sure, which can be proven by simply doing what you are told and do not wait till they are dead. It is simply cold, and the blood turning to water; in short, the blood congealing in the veins shutting the circulation off. There is no danger in handling the poison if the skin is whole by using Morrison's Photo Chemical Herbaline and medicines. As a disease you cannot guarantee it any more than the air that you breathe. You can not keep in bounds for the reason that as a nation we are feeding every day and night. We are burning all sorts of decayed matters both of man and beast. You can smell it at the present time after every lightning storm; you can see it rolling along the road. Three times in the last three years I have driven through it within 160 miles of the Capital, once at Winchester in July. You could see it like fire balls. Two years last eleventh of July from west of Ottawa was charged with electricity so much that the lungs were effected by it. So much so that the medical profession called it appendicitis all over Central Canada,

and many an aged and young life was sacrificed by it. The past year we had what the authorities called small-pox in January and February. A fog settled down on two different nights over this part of Canada, and what did we get:—the same old story, and the authorities style it tuberculosis. In this work you will find the experience of years. I have testimonials of Consumptives that have had tuberculosis and are cured and are about to-day to prove the fact that my Chemical Oils and Herbaline Medicines are saving lives.

BLOOD PURIFIER.

No. 1.—6 lbs. of Popple Bark,
4 lbs. of Black Cherry Bark,

Put in a gallon and a half of water, cook for two hours then strain and it is ready for use. Take a wine glass after dinner, adding desertspoonful of white sugar or maple which is better. In summer put in good rye whiskey to keep from spoiling.

No. 2.—The same that I used for Master Fielding and Mrs. Wm. Smirl, of Berwick, consumptive.

4 lbs of Popple Bark,
4 lbs. of Cherry Bark,
4 lbs. of Ground Hemlock,
4 lbs. of Sarsaparilla,
4 lbs. of Spikenard,
2 lbs. of Spruce,

Boiled in five gallons of water. Boiled to one gallon. Then add one half gallon of best rum. Take three or four times a day, adding teaspoonful of white sugar to wine glass, with or without just as you like. Barks and Roots must be green.

No. 3.—For Scrofula and Eczema.

- 4 lbs. of Popple Bark,
- 4 lbs. of Cherry Pine,
- 4 lbs. of Spruce Bark,
- 4 lbs. of Red Hemlock Bows,
- 2 lbs. of Log Alder Bark.

Put in three gallons of water. Boil down to one gallon. Strain and use with liquor or just as you please. Wine glass at a dose. All those barks and roots are to be green or if you have to get dry half the quantity, but get it as fresh as possible.

CONSUMPTION SYRUP.

- 2 lbs. of Licorice Root,
- 2 ozs. of Pleurisy Root,
- 8 ozs. of Ellecampaine Root,
- 3 ozs. of Sumach Root,
- 12 ozs. of Skunk Cabbage,
- 12 ozs. of Hazzle Berry Bark,
- 12 ozs. of Horehound Leaves and Flowers
- 6 lbs. of Popple Bark,
- 6 lbs. Black Cherry Bark.

To be put in four gallons of water and stewed down to two gallons by measure. Strain and add two ounces of gum arabic, 16 lbs. White Sugar. Stir till dissolved, adding the whites of six eggs, one and one-half pints Tincture of Blood Root, one and one-half pints Tincture of Lobelia and one-half gallon of the best gin. Do the adding while warm. Then bottle for use. Use one teaspoon three or four times a day.

BERWICK, Jan. 25th, 1902.

MR. MORRISON,

DEAR SIR,—I cannot find language with which to express my gratitude for the benefit I have received from the use of your valuable medicine. It has cured me of Consumption after two physicians gave me up and told me that I could not live. I had no less than eight doctors during my illness. I cannot say that I received much benefit from any of their medicine except from what I got from you, and I sincerely believe that I would not be alive to-day only for yours. It is almost three years ago since I was taken down and thank God I am well to-day.

Hoping that this will be a benefit to others as it has been to me.

I remain,

Yours sincerely,

(Sgd.) MRS. WM. SMIRL.

TREATMENT.—Found a dry hacking cough in this case. Coughing night and day. The lungs full of pus. Commenced by putting on a pad of Black Oil from throat to bottom of lungs. Gargled the mouth and throat to kill the tuberculous germs. Gave internally Intestine Powder night and morning, followed by sulphur then Kidney Medicine. Wine glass of Blood Purifier and one Stomach Powder at night. After getting through with course of Medicine you will find in another part of book in treating Consumption. At the present day you have to battle with Grip in one form or another and that course of Medicine is given on that page in full.

DROPSY.

TREATMENT.—Cedar tips made in poultices. Take the green tips of Cedar, break them off the large limbs, pound and chop them up fine, put in a kettle, pour boiling water on them and let them steep for twenty-five or thirty minutes. Pour off the liquor, let it stand a few moments. Place your subject for treatment on the bed with a number of cloths under the knee to catch the drip from the poultice. Fill the bandage around the knee above and below, about four inches thick, with the herbs, draw the bandage pretty tight. Have the poultices as hot as you can hold your hand on them with comfort. Then have your bricks or sand stones, which are the best, for keeping up a steady heat of ninety degrees temperature or thereabouts. You will have to keep this heat up for three hours. Put these on after the poultices have been on for about half an hour. See that they are kept at a steady heat. This will allay the pain and reduce a swelling of this kind in a short time. Then you can bathe it in pretty warm water. Dry it well and bandage it with Black Oil, rub on plenty above and below the knee. Put on plenty of bandage cloth so as to keep the oil from staining the sheets or clothing. Change the bandage twice in twenty-four hours, bathing once in that time with a good strong soap suds. By shaking the bottle you can get any desired strength you want. You could raise a blister in an hour, also put the same oil on a piece of cotton on your eye. Also receive the greatest satisfaction in reducing inflammation of any kind such as a black eye or a bruised face. There is

no gangrene or inflammation that you cannot reach with it. Medicines to take internally : Sour Medicine, Kidney Medicine and Blood Purifier.

BERWICK, 1901.

MR. MORRISON,

This testimony is to certify the efficacy of your treatment and cure of the Dropsy and Kidney Disease and Stone in Bladder without injuring my health by your Photo Chemical Herbaline. It is invaluable. My hair all fell out and now I have a reasonable covering on my head of brown gray hair. You treated me for five months and I believe I would not have been alive to-day if it had not been for you. I had been doctoring with others for fourteen years. They only made matters worse, five Doctors nearly ruining my system. All the time my body and limbs were swollen. I suffered intense pain nearly all the time. I am nearly seventy-seven years of age.

(Sgd.) MRS. JOHN D. McMILLAN.

TREATMENT.—Treatment in this case was a course of medicine. Applied the powder night and morning. The next night a tablespoon of Sulphur, which was taken regular once a week. Every other day a G.M. one tablespoon. One teaspoon of Sour Medicine followed by a wine glass of Blood Purifier at noon. Using the cedar poultice once a month then follow the powder night and morning, the sulphur and so on until the cure was effected.

ERYSIPELAS.

RUSSELL, DEC. 11, 1901.

TO MR. MORRISON,

DEAR Sir,—On the 11th of July, 1892, I had Erysipelas of the bone in my leg. I had the best of Doctors and they could do nothing more than let it take its course. I suffered for two and a half years. During that time I had to be carried everywhere and a constant discharge from the knee to the ankle, also bones breaking out in different parts of my body. Such was my state when Mr Morrison took me in hand on Thanksgiving morning 1894 and in six months I was able to go to school.

The first thing he did was to purify my blood with his Photo Blood and Chemical Medicines, of which I believe there is no equal, and as soon as I was able the Doctors removed the bone from the knee to the ankle. Then Mr Morrison attended me and I gained every day. It is my earnest belief that I never would have suffered so had I been treated by him in the first place for his Oils and Blood Medicines have no equal. I remain,

Yours ever,

(Sgd.) MASTER WILLIE FIELDING.

MR. FIELDING'S TREATMENT.—I used the cedar poultice on his limb for three hours, giving Scale Medicine night and morning relieved him of all pain, followed by a wine glass of Blood Purifier a day. Sour Medicine teaspoon to three of water three times a week. Liver and Kidney Medicine. It was made in this proportion, six ounces of Agrimony, four ounces of Juniper Berries, one ounce of Salt Petre, one ounce of Spirits of Sweet Nitre will make one gallon of syrup. Take one tablespoon a day the first week, then every other day until well. Have a gallon of the Liquor when finished.

FIRE.

Fire is just the opposite of cold or freezing in Chemistry. A limb that has been burned or scalded should never be exposed to the air in any way if you can help it. Never tear the clothes off but pour on water or plunge the victim in water. Roll up in a blanket or clothes of any kind and keep them soaking with water. Do not expose to the air any way till the fire is out, which will be in less than forty-eight hours. I have treated limbs that have been plunged in vessels of boiling water. I never covered them but simply plunged them in cold water. Kept them rolled up in a quilt saturated with cold water. At the end of sixteen hours there was not a mark to show that they had ever been scalded. Try it and be kept from suffering. If you want the fire to burn or scald to death expose to the oxygen of the air, and pour on water and stop it burning in deeper. I have proved this over and over again. Many a life has been saved by so-doing.

Frozen Limbs, Hands, Feet, Etc.

Never uncover or unstrip the limb in any way till you have everything ready. Keep from heat until you start treatment. Take equal parts of ashes and salt enough to cover the part or parts frozen, three or four inches deep until all pain is gone which will be known by a tingling sensation like a chilblain. Then commences the proper circulation of the blood. Let the frozen limb remain in the preparation for an hour or more as the case may require. This may look simple, but I cured cases in shanties where they were frozen half way to the knee. Bathe the limb in normally cold water after being thawed out. The skin will not be broken while in the bath of salt and ashes. The experience will be excruciating but that is nothing to going limbless all your days and it is all done inside of an hour. It is simple and sure and the remedy is always on hand in this Canada of ours. Tell it to your neighbors. This was never known to fail when taken in time. Try ashes and salt on your ears and they will not blister.

GREEN OIL.

One gallon of coal oil in an iron kettle, 4 or 5 lbs. of hen droppings. Hang the same across a large vessel for safety and keep it boiling for an hour. Stir the droppings a few times, till all the strength is out then strain off in can. Add one ounce of Iodoform. This will heal sores of any kind. You can have the finest salve by using pure lard or oils of any kind for stiff necks; it is penetrating. Good for stiff cords or rheumatism. Take machine oil 4 ounces, and 2 ounces of this, mix them together and grease the heads of your turkeys and take a feather and grease their throats. They will never have roup or any kind of throat disease. Feed unground mustard seed one third to any kind of grain food. Boil or mash this to be cooked. It is worth from fifty cents to a dollar a bushel to any one raising fowl. It has been cursed in this Canada of ours where we have so much land that we do not till it. The flowers of mustard are one of the finest table sauces that was ever got up. Use it as you would any other salad dressing. The time will come when it will be grown in our gardens for what God intended it, man's benefit. It takes us a long time to learn.

HAIR.

To grow hair after losing it from the effects of fevers or other troubles, or to cure baldness, wash the head thoroughly, using soft water, adding fifteen or twenty drops of liquid ammonia to each washing. Shower well, squeeze the hair, do not roll it or you will tangle it in a bad shape, then dry. When dry shut your eyes so that the next process will not bite them. Take methylated spirits, pour all over the scalp, rubbing briskly all the time. Then apply cocoanut oil or a mixture of it and olive oil, half and half. You need not ever be without a fine head of hair nor go bald by using this treatment. It has cured hundreds.

Fevers should not be allowed to have their own sweet way this Twentieth Century. It would do in the past. Take the Scale powders night and morning followed by the Sour Medicine and Liver Treatment every other day of mulberry leaf teas. Taking all the water you want. Bathe the brain, chest and shoulders with the methylated spirits. Keep the bowels open with the Sour Medicine.

SNAKE ISLAND, OSGOODE, Dec. 17, 1902.

MR. MORRISON,

DEAR SIR,—One year ago the top of my head was bald. I commenced using your Hair Restorer and now I have a good head of hair.

I recommend any person that is bald to try your treatment. I will gladly answer any questions regarding your Restorer.

Yours truly,

(Sgd.) WESLEY WOODS,

Hydrophobia or Hog Madness.

TREATMENT.—Steep Lobelia in water. One ounce to pint of water. Take two tablespoons in four quarts of milk. One desertspoon of cayenne pepper. Put all together, stir up and give every two hours till they are satisfied to lay down like pigs should, which will be in about four hours. This has been tested over and over again. Try it, Mr. Farmer, no danger of hurting them. This will stop the Anthrax troubles also.

LA GRIPPE.

To cure this common malady, take :

- 1 oz. of Laudanum,
- 1 oz. of Sulphuric Ether,
- 1 oz. of sweet Spirits of Nitre,
- 2 oz. Essence of Peppermint.

One-half to three-quarter teaspoonful to cup of warm water three or four times a day.

LINIMENT.

Oil of Whiskey 1 oz.
Camphor Tincture $\frac{1}{2}$ oz.
Urine, 6 ozs.

Bathe the animal's limb with good strong soap suds, dry by briskly rubbing them. Use the liniment by a brisk rubbing, again using plenty of the liquor. Bandage not too tight or you might blister it, which is not necessary. This will take down almost any swelling in a short time. If time is precious take and make a poultice of cedar boughs chopped fine enough to cover the swelling three inches deep. Rub thoroughly and keep from three to six hours. Then bathe in hot water as hot as the hand can stand. Rub on medicine again well.

Consumption Syrup.

1 peck of Tamarac,
1 peck of Sasaparilla,
2 quarts of Dandelion,
1 quart of Spignet,
1 quart of Blackberry,
1 quart of White Popple Bark,
1 quart of Burdock Roots,
4 ozs. of Hops,
3 lbs. of Honey,
4 ozs. of Licorice Root,
4 quarts of Best Rye Whiskey.

These barks to be put in a large kettle, cover with water over night. In morning boil down to a gallon and a half, then put in honey and rye whisky. Take a tablespoon three times a day.

STANLEY'S CORNERS, Apr. 1, 1899.

TO WHOM IT MAY CONCERN,

This is to certify that Mr. Morrison's Photo Chemical Herbaline is king of all medicines. After suffering with White Swelling for six months and trying all other cures and liniments that were ever heard of, this treatment and medicine relieved pain and took down swelling in less than three months. No aches or pains since.

Yours,

(Sgd.) DAN HALEY.

TREATMENT.—This was a case of White Swelling and Rheumatism combined with Grip and blood turning to water. I treated the limb first with oil. At the end of that time I treated it with my cedar poultice for three hours, keeping up the heat to a temperature of ninety degrees by placing warm bricks beside the poultice. You can get nothing better for that purpose. The internal medicines I gave were Sour Medicine, Blood Purifier, Liver and Kidney Medicine. Last but not least the Scale M. Powder which never fails in doing duty in preparing the way for the other work to be done.

Maternity Swollen Breast.

For common swollen breast give one teaspoonful of Sour Medicine to three of water every other day. Blood Purifier after dinner each day. Then apply a poultice of Black Alder Leaves pounded fine, enough to cover the swelling and breast, with plenty to keep moist for five or six hours at a time. If at a time of year that you cannot get the leaves, get plenty of bark and boil down to a strong liquor. Soak soft cloths and apply to breast as you would the poultice. This will reduce the worst case in a short time or a day or two at least the patient will suffer but very little. If the breast should be caked hard or cancerous, use cedar tips broken from limb cut fine and pounded well. Then put in a vessel and scald for fifteen or twenty minutes. This is an antidote for caked or cancerous breasts. It will dissolve them in a short time. Use either of these poultices as warm as can be borne with comfort, and keep at a normal heat to within an hour of taking them off. Then apply the Yellow Oil night and morning until relieved. This will remove the pain without the use of morphine.

MILK LEG.

Cedar is an antidote for Milk Leg poison. Take the evergreen tips of Cedar, cut and pound fine enough to cover the limb from foot to thigh about three inches thick. The poultice to be put in a vessel, scalding water poured over it until it feels slippery to the hands, stew from fifteen to twenty minutes. Put your patient comfortably in bed, also plenty of cloths to hold poultice and absorb the drip. Then place warm brick or flat sand-stone to keep the poultice up to a heat of about eighty or ninety degrees of steady heat for two hours and a half. Then have a nice bath prepared in this way, warm soft water with thirty to forty drops of liquid ammonia. Bathe the limb well and rub dry. Then rub the limb briskly with Black Oil and bandage. Next morning put on more Oil and bandage well and so on for a week. Then bathe the limb again in a good warm bath and continue this for four weeks. Then put up again in Cedar bath the same as the first, using the Oil as before but changing the Black Oil to the Yellow Oil, rubbing in briskly. Give the patient the following Photo Chemical Herbaline Medicines every day. This is what forty-six years of experience teaches and never a failure.

PILE CURE.

Take Sumach Bark one pound. Put in a kettle and boil down till it becomes milky and quite thick. Strain through a cloth. You then use it as an injection for blood and soft piles. For an inward application, if a bad case and hanging down, take a draham of burned allum to a gill of the Sumach liquor. Bathe fundament shoving it back to its place. Then make some pills of wild cucumbers. First bruise them up well and put them in a stone jar, cover with a pint of good rye whiskey and let them stand for eight or ten days. Strain and squeeze out all the juice into a large open pan, set it in the sun where it will evaporate without fire. You will find a yellow covering on bottom of pan. Make it into pills the size of a pea. Take one every morning to strengthen the bowels. If they come down, bathe well with Sumach preparation the same as for the blood ones and replace them in position and rest for a short time. The reason for them being there at all is constipation, from not chewing your food and taking your time at your meals. One-half hour is the time to masticate your food well, and you will not know anything about piles, taking plenty of drink after eating and that not liquor. Be temperate in all things. Live to be ninety or one hundred and twenty-five.

RHEUMATISM.

RUSSELL, March 30, 1902.

This is to certify that I have been a sufferer from Rheumatism and was unable to put my clothes on for three months and in forty-eight hours was perfectly cured under Morrison's skilful treatment with his Blood Purifier and Oils. My limbs have retained their natural size and am enjoying the best of health without pain or ache for the last eight years.

(Sgd.) A. BIRMINGHAM.

TREATMENT.—The treatment given in this case was four teacups of hot water with two teaspoons of pure alcohol and one-half teaspoon of cayenne pepper in each cup. I rolled him up in two sheets wrung out of hot water, covering him from head to foot, only leaving a breathing spot, piling blankets and clothes on that he might enjoy a good sweat. It took twenty minutes to start. Then I got in the nice work. Poured in two cups more of hot water with tablespoonful of good rye whiskey and twenty drops of lobelia in each cup. Spoonful at a time. After the sweating commenced I let him sweat only thirty minutes. At that time all the gray matter was standing out over the bedding. Then I commenced rubbing Lagrippe Rheumatism out of the body under the sheets. Then bathed the body and rubbed it with pure olive oil, gave a good toddy of alcohol and put him to bed. He had no thought of pains in the morning. All this just took me three hours. I have fixed hundreds of people in like manner. I never missed in accomplishing a cure in a day. The secret lies in getting the foul matter on the outside of the body. Do it in this way and you will never have a failure in any form. Get up the internal heat by taking two teacups of hot water with two tablespoons of

alcohol and one tablespoon of sugar and half a teaspoon of cayenne pepper and ten drops of lobelia. Keep filling the cups with hot water as the patient drinks them as many as four if they can take them. While the suffering one is taking his or her medicine get your two sheets and having the water as hot as you can, wring them out. Get your patient into them as hot as you can, roll them up from head to foot as soon as possible, applying hot bricks, stones, or hot bottles to feet and beside the limbs or wherever the pain has been the most severe, keep the most heat there. Prepare another cup of medicine in this form, two or four tablespoons of alcohol, one tablespoon of sugar, as they can take it. The more of liquor you can get in the better. If they vomit fill up again and give the pure alcohol slightly diluted which will do as well. Time your patient to see how long it takes them to begin sweating. It varies in most people. Some it will take an hour and some not as long. Keep the sweat going for thirty minutes. Then rub up gray matter off the breast the size of marbles. Now is your time to rub all the dirt off them under the sheets keeping from the air as much as possible. Put in a good warm bath with about twenty drops of ammonia, using the best soap, but not castile, any other is better. Dry them well and massage them with olive oil, rubbing lightly but briskly till they will fairly glow. Give them a light lunch and send them to bed from six to nine hours. Give a weak toddy of about three teaspoons of alcohol, no other liquor should ever be given a rheumatic. It is quality not quantity we want in this process. I never lost a patient yet or had any drawn up limbs or swollen bones. There need not be any. There is no one but can work this process all right. In all chronic cases they had to

be treated differently. Turn over to the next page and you will find what you want there, starting with the same process if the rheumatism is all over the body.

NEURALGIA.

Take 2 lbs. of green Thistles in a vessel, then stew them to a pint of tea. Drink a wine glass at a time, using the hair restorer, and you will wonder where it is gone.

SPOTTED TONGUE.

Hoist the horse up so that you can gargle the mouth well with Black Oil in good shape, allowing him to swallow half an ounce or so, giving a pint of linseed oil in half an hour. Do this as soon as you discover the pox on the tongue and mouth. Lose no time. Give the following condition powder :

- 1 lb. of Bonset,
- 1 lb. of Agrimony,
- 1 lb. of Golden Rod,
- 1 lb. of Mayweed,
- $\frac{1}{2}$ lb. of Lobelia,
- $\frac{1}{2}$ lb. of Smartweed,
- 4 ozs. of Red Pepper.

Grind altogether up fine, then add five pounds of Linseed. Steep well.

No farmer should be without it. It is a cure for all kinds of distemper in cattle, sheep, hogs and for horses it cannot be touched. If they have the pink eye, la grippe, or any distemper whatever, give a handful in their oats or mash every day for a week. The next week every second day and so on until cured. If you make a tea, steep well. Give to your fowl and they will not die of la grippe or roup. Here is a feed for all kind of fowl that was never beat yet : Take one-fourth of an ounce of unground mustard seed and give in their feed three or four times a week. Give as needed. If I was raising fowl I would give one dollar a bushel for it at any time. Try it and you will never be without it.

SWELLINGS.

OSGOODE STATION, Dec. 18, 1901.

I feel it a great obligation to give my testimonial in behalf of Mr. Morrison's Treatment by Photo Chemical Oils. Four years ago I had my foot and leg smashed to pieces and was laid up for twelve months. At the end of that time I was no better so my physicians sent me to Montreal Hospital for treatment. What they did for me was an injury instead of a betterment.

I resolved to send for Mr. Morrison and try his remedies so I sent for him to come and treat me and in three hours his treatment gave me relief and after a few applications I threw away my crutches and have never used them since, thanks to Mr. Morrison's Photo Chemical Herbaline and Oils. I would not be without them at any cost. It is a valuable oil.

If any person wants more particulars drop me a card and I will answer.

(Sgd.) SAMUEL BALDRY.

I found this limb full of inflammation and turning to blood poison or gangrene. I will give you the formula used in this treatment.

I took the green tips of cedar boughs, chopped them up fine, poured boiling water over them and let them boil for twenty minutes. Put leg and foot into poultice and covered it about four inches thick to the top of calf of leg. After bandaging up one-half hour put four bricks of ninety degrees temperature, one on the foot and the others beside the poultices to keep the foot and poultice warm to the end of the treatment, which is three hours. Bandaged the limb in warm water with thirty drops of strong Ammonia and then dried it well. Wet the bandage with Black Oil. Bandage up well so the oil will not come in contact with the clothes to destroy them. Bandage morning and night. After doing this I gave Powder for the bowels, which was one at night and the rest of powder

in the morning. The following night I gave one teaspoonful of sulphur and molasses mixed thoroughly. The next day gave one teaspoonful of Sour Medicine to three of water. I gave this three times a week. The next day I gave one tablespoonful of A.G.M. at noon. Then I gave the Liver and Kidney Medicine three times a week. This was followed by a wine glass of Photo Blood Purifier and Herbaline and continued this every day for four weeks. At the end of that time I treated the limb again. Four treatments in all and gave the medicines at the same time.

CASSELMAN, Nov. 16, 1901.

This is to certify that I, Violetta Daye, after suffering for five years with swelling, was cured by Mr. E. Morrison after all other treatments failed to do any good. It is now one year and six months since and no pain or swelling.

(Sgd.) VIOLETTA DAYE.

TREATMENT.—In this case I found the limb nearly all swollen and five ulcers running in different places. The knee had started to gangrene or blood poison had set in. Commenced by giving internally my Photo Chemical Herbs and following that up with my cedar poultice. I then used my Black Oil and put it on plentifully for the first two weeks. At the end of that time the gangrene began to disappear. The ulcers were still running. Treated with cedar again, still kept on my Black Oil. At the end of three months the ulcers had all healed up but one. At the end of four months ulcers all gone. At the end of five months completely cured. No scraping of bones or knife business. We are living in the first of the twentieth century and want to use good common sense.

SPRAINS OR BRUISES.

For sprains or swellings of any kind or bruises :

- 2 ozs. Spirits of Wine,
- 2 ozs. Spirits of Camphor,
- 2 ozs. Oil of Turpentine,
- 3 ozs. Sweet Oil,
- $\frac{1}{2}$ oz Sour Liniment,
- 1 oz. Spirits of Ammonia.

This will take down spavins or swellings of any kind
Tried for years with perfect success, since 1855.

OTTAWA, May 7, 1902.

In the County of Carleton are to be found many grateful people who cheerfully acknowledge a permanent cure by the use of the Herbalist Treatment by Mr. E. Morrison, among them being Ferguson Blair, who was residing at his home in the Township of Osgoode.

With great pleasure I give this tribute to the permanent cure of inflammation of the knee joint by the use of the Herbalist Treatment.

After being treated for three months I was sent by them to Montreal Hospital under the special care of a surgical doctor for seven weeks, after which being sent home again even worse than when I went, and being treated by the doctors again was almost discouraged at the thought of losing my limb, for the doctors decided the knee was gradually being effected at the bone, when one day a friend called and urged me to try Dr. Morrison's Herbaline Treatment, which I consented to do.

After the first application I had relief and gradually the pain scattered and within five weeks I was able to walk, which I had not done for seven long months before. I heartily recommend the Herbalist Treatment to anyone who may be suffering from inflammation and pain.

Sincerely yours,

(Sgd.) FERGUSON BLAIR.

TREATMENT.—In this case I used cedar poultice for reducing swelling. The Black Oil for extracting the inflammation from the limb, which it does without fail. Gave internally Sour Medicine, Kidney and Liver with Blood Purifier after dinner every day.

WHOOPING COUGH.

Coughing can be cured by using the following ingredients. Take two and a half pounds of white sugar or maple which is better, turn it into a syrup. Dissolve twenty grains in three ounces of water, pour on sugar, then add sixty grains of salts of tartar. Put this in a vessel to melt. Bring to a boil for ten minutes. Let it cool in a saucer or bowl and take a teaspoon every time you cough if it is fifty times a day. Take it right along you will find relief in a short time. I never found a case that would stand the effect of this treatment two weeks. It will not fail, try it. Use Yellow Oil along the bronchial tubes and breast at the same time.

CURE OF BOTS.

TREATMENT.—Give one pint strong Sage Tea as a drench. Lay the horses down, throwing them on their backs a few times, so that the upper part of the stomach will get the tea. Then give one pint of Molasses and one of Tanner's Oil. This will cure Bots in cows or horses no matter where the larva is.

SCARLETINA OR FEVER.

To cure, take :

2 ozs. Catmint, steeped or fused in soft water,
 1 teaspoonful of Liquid Lobelia,
 $\frac{1}{2}$ teaspoonful of Capsicum or Red Pepper,
 3 tablespoonfuls of Sugar or well sweetened.

Dose, four or five teaspoonfuls a day and all the water they can drink.

In Perth there was a case where three physicians had been called to a child who had been exposed for fourteen days. There was no sign of rash of any kind. The treatment was given. The result was soon apparent. The child was wrapped in a soft woollen blanket, in pack of warm water, for one hour, and at end of that time the child was covered with measles. It will bring the rash out of almost any disease that children have.

WEAK STOMACH.

Take Mountain Ash or Moose Missee or Slo. To use : Make a tea of the bark, or simply chew it. It will act like magic. For summer use, add a little rye whiskey, and sweeten when used.

Fevered Brow.

Bathe the neck and forehead with this mixture; $\frac{1}{2}$ ounce of Lobelia to one pint of Methylated Spirits. Inhale as well. This will relieve the brain as nothing else will.

To Make Gun Cotton.

1 lb. Sulphuric Ether,
 1 lb. Methylated Spirits,
 180 grs. Gun Cotton,
 180 grs. Spirit of Ammonia,
 90 grs. Bramid Potassium.

Cough Tincture.

2 ozs. Tincture of Blood Root,
 2 ozs. " Balsam of Tolu,
 1 oz. " Lobelia,
 1 oz. " Digitalis,
 1 oz. " Opium,
 1 oz. " Oil of Anise.

2 ozs. of Black Cherries,
 2 ozs. of Salts,
 2 ozs. of Bitter Aloes,
 2 lbs. White Sugar,
 4 ozs. of Licorice Stick,

One gallon of water boiled down to one-half gallon.
 Take a teaspoonful three or four times a day.

DIABETES.

To stop excess of urine use 2 ozs. of Lilac leaves or flowers, steeped or fused in one pint of water. Take a wine glass four times a day.

To Protect a Mad Person.

Take a Linen Bag, draw over the afflicted one's head, making a slit in the bottom for the head to pass through. Tie about the body to keep the arms and legs quiet. The patient can neither injure himself nor anything else and this simple form of jacket makes a protection for the body.

Chili Sauce or Appetizer.

Twelve large Ripe Tomatoes,
 Six Green Tomatoes,
 One large Onion, chopped fine,
 One teaspoonful of Salt,
 One pint of Vinegar,
 One teaspoonful of Cloves,
 One teaspoonful of Cinnamon,

Chop the Onions and Green Tomatoes fine. Put in a preserve dish and cook for fifteen to twenty minutes.

COUGH MEDICINE.

6 ozs. Ellicompain Root,
4 ozs. Skunk Root,
1 oz. Lobelia,
2 ozs. Licorice Root.

Put in half gallon of water and stew about four hours. Then strain off and reduce to one pint, add 4 ozs. of Alcohol and 4 tablespoonfuls of sugar. It is ready for use. One tablespoonful on sugar three or four times a day. It will ease the worst case of coughing in a short time. If you will follow with the Ellicompain Root in this way: cut the root into small pieces, chew them and swallow the saliva, and take cough medicine it will cure the worst cough that you will find. You can get the root beside the road. The Cough Medicine and chewing the Ellicompain Root will cure the most inveterate cough and using the Yellow Oil on the outside of the throat stops the tickling at once.

For Scours in Horses.

White Ash Bark burned to ashes, make into a strong lye. Add one-half pint of paint oil and one pint of warm water. Dose two or three times a day. This is good for scours in horses or cows.

EMETICS.

Take cupful of warm water or warm bonset tea. To one cup put one teaspoonful of liquid Lobelia. To each cup add red pepper enough to cover a ten cent piece, also enough sugar to sweeten well, adding two teaspoons of good rye whiskey. Giving all the bonset tea that they can take. Clean the stomach out two or three times. Put enough Lobelia in to make them sick, giving the bonset by the gallon if necessary, have it warm enough to be sickening. It is the easiest Emetic that can be given. Lobelia Emetic is the purest that ever was given for babes. Use Sage, Catnip, Bonset or warm water, using from 2 or 3 drops according to the age of baby. No putting water in the child's dinner bottle. Get the best milk possible, if poor put in a small quantity of cream, putting in from, if a tiny little thing, 1, 2 or 3, up to 5 or 6 drops of tincture of Lobelia. Half the children that die do so from starvation. Let it be said that our Canadian girls are the finest women that the sun shines on. God expects you, Canada expects of you and the end of this century is expecting great things of you girls. The future of this North American Continent is just what our women make it. We are a mixed race, gathered from every clime. Those living at this time may be the most useful and best living race that ever lived in this beautiful world. The Bible tells us that God gave leaves of the trees for the healing of his people. Keep the Commandments and I will pour you out such blessings that you will not be able to contain them." "His laws are not hard. He tells us that the sun by day or the moon by night shall not harm his children.

The Master is watching over us. We break physical laws and we are punished with cancers, diphtheria, typhoid and then we accuse the Great God and Father of being unjust to his own. This book will tell you how to regain your physical health. A kind of chart to lead you to regain health.

No. 2 A. G. M.

6 ozs. Agrimony,
 4 ozs. of Broom Tops,
 2 ozs. of Juniper Berries,
 1 gallon of Soft Water.

Boil down and strain. Then simmer down to half a gallon. Then add two cups of white sugar, one-half gallon of best gin, one oz. of salt petre and two ozs. of sweet spirits of nitre.

Blood Vomiting.

This is hard to beat for Blood Vomiting.
 Take two spoonfuls of nettles, then stop awhile and go on again until stopped.

Cure for Colic.

1 gill of Alcohol,
 1 oz. of Hemlock,
 1 oz. of Sweet Spirits of Nitre,
 1 drachm of Gum Opium.

Mix altogether. Dose teaspoonful to a tumbler of water. Sweeten to suit taste.

SNUFF.

1 oz. Blood Root,
1 oz. Baberry Bark,
1 drachm of Lobelia.

Take pinch at a time. It is a grand thing for cold. It will stop the worst cold in the head.

Cedar Poultices.

No. 1.—The king of all poultices is the Cedar Poultice. Take the tops of green cedar boughs, chop and powder fine enough to cover the limb and half the body if necessary. Put it in a vessel large enough to cover it two-thirds with water. Bring it to a boil for about twenty minutes till it feels slippery to the hands. It is then ready for use. Put on about three inches thick. Keep it warm on limb with warm bricks or hot bottles. Leave on for three hours. Bathe and bandage up. This is for blood poisoning or any kind of swelling.

No. 2.—Here is another for reducing swellings of any kind. Take the leaves of Black Alder and Tag Alder, enough to cover the swelling or enough to surround it at least three inches deep. Put on as warm as the patient can stand it nicely. You can leave them on for three hours or all night if you want to. And keeping up the heat it will draw the trouble out of man or beast. The Cedar Poultice or Alder is the best in the world. There is nothing like it for pneumonia or chest troubles. You can put them on and keep up the heat to any desirable temperature.

HOT DROPS.

3 ozs. Capsicum,
2 drachms Opium,
2 drachms Oil of Sassafrass,
4 ozs. Liquid of Ammonia,
2 ozs. Spirits of Turpentine,
2 ozs. Chloroform,
12 ozs. Alcohol.

Put altogether in a bottle and shake it. It is then ready for use.

Put one tablespoonful of sugar in tumbler of warm or cold water and you have the finest hot medicine without waiting for time. Keep it in the house. One teaspoonful to a tumbler of water. It will stop the chills in a short time. Keep it with you on the road journeying.

Gargle for Sore Mouth.

4 ozs. of Green Tag Alder,
 $\frac{1}{2}$ oz. of Allum or Borax.

Gargle the mouth well with it and if there is a softening of the bronchial tubes and throat take from a half to a teaspoonful internally. You will find the gums becoming solid and firm. After a short time throat canker will be cured. Instant relief. Use it weak or strong to suit your trouble.

Sour Medicine.

- 3 lbs. Epsom Salts,
- 2 lbs. Glauber Salts,
- 4 ozs. Rochelle Salts,
- 2 ozs. Alum,
- 2 ozs. Salt Petre,
- 4 ozs. Cherry Bark,
- 4 ozs. Dandelion Root,
- 4 ozs. Nitric Acid.

Take the bark and roots in one gallon of water, using agate or iron ware to boil it in. Boil for twenty minutes. Strain back into vessel then put all the above ingredients, putting in the Nitric last. Dissolve the whole together. You will have a gallon of liquor when done.

Strengtheners for the Lungs.

- 1 lb. of Black Cherry Bark,
- 1 lb. of Burdock Root,
- 1 lb. of Sarsaparilla Root,
- 1 lb. of Ellicompain Root,
- 1 lb. of Prickly Ash Bark.

Put in two gallons on water and boil down to one-half gallon. Then strain and add two ozs. of gum arabic. Stir till dissolved. Then add one quart of best rum and one pound of maple sugar. It is then ready for use. One tablespoonful three times a day.

To Make Oil.

1 quart Spirits of Turpentine,
 1 quart Raw Linseed Oil,
 4 ozs. of Gum Camphor.

Crush it fine, dissolve it over a slow fire. Never let the blaze come near it or it will explode. Add 2 ozs. of Cedar Oil, 1 oz. of Sassafras, 2 ozs. of Sweet Spirits of Nitre. Let it simmer for a short time, then can up. It is now ready for use.

Use for sore throat, lumps in throat, stiff neck and chest troubles. Bathe lungs with it or any part of the body. It is a grand medicine.

For All Cancerous Sores.

4 ounces of Alcohol,
 1 ounce of Hemlock Oil,
 1 ounce of Sweet Spirits of Nitre,
 1 drachm of Opium.

Mix all together. Shake well. Take one teaspoonful to tumbler of warm water adding two dessert spoonfuls of white sugar. This will stop any colic or diarrhoea.

BERWICK, November 28th, 1901.

MR. MORRISON,

DEAR SIR,—This is to let you know that I have used your medicines for the last four years. I find them invaluable especially the Black Oil that has never failed in any case.

Yours truly,

(Sgd.) JONAS RUTLEY.

CATARRH.

To heal the nose after a bad cold or catarrh, put 20 drops of Liquid Lobelia into a cup of water. Gargle the nostrils and inhale the fumes. It will take down the fever and heal the inflamed or diseased membranes.

For Softening Hoofs.

1 ounce of Verdigris,
 2 ounces of Rosin,
 2 ounces of Turpentine,
 $\frac{3}{4}$ ounce of Hog's Lard.

Nasal Gleet in Horses.

$\frac{1}{2}$ lb. of Rosin,
 $\frac{1}{2}$ lb. of Blue Vitrol,
 4 ounces of best Ginger Root.
 Ground fine. Spoonful twice a day.

FOR SWELLINGS.—Nettle tea and an outside application will take down swollen heads and posthumus gatherings. Pultice once a day, using methylated spirits, bathe well and rub briskly. Get all bad teeth and old stumps out and drink Thistle Tea. You will never have Neuralgia again.

To Protect from Mosquitos.

Take one pint of Methylated Spirits and into it dissolve 2 ounces of Camphor Gum. If exposed to these pests put some of this mixture on a handkerchief and tie about the neck, or rub a little in the hair, and the swamp songsters will leave you alone. If bottle is left open in the bedroom the mosquitos will not enter. To protect your horses rub the same mixture in the hair.

To FILL TEETH.—Mix Litherage and Glycerine to the consistency of butter, using iron filings and emery, fine or coarse, to suit the hole or spot. It makes a grand job.

To PATCH WOOD OR FURNITURE of any kind or color that you like use gum shellac liquid of any consistency, mixing sawdust of any color or kind. If the hole is deep or over a large surface drive in tacks, large or small, to suit. When dry you can plane over it. You can fix your instruments with this same cement.

The Elixir of Life used in those formulas is called Sulphuric Acid or Oil of Vitrol.
