28 Slain By Bomb Hurlled at Stolypin

Reds Explode Missile at Russian Premier's Reception, Spreading Death and Destruction

St. Petersburg, Aug. 27.—A bomb was hurled at M. Stolypin, Russian Premier, during a reception this afternoon at the villa on Aptekarsky island. Twenty-eight were killed and twenty-four wounded. The whole centre of the house was blown out. The Premier was slightly wounded on the face and neck by flying splinters. The killed and injured: Davidoff, M., Court Chamberlain; Fedoroff, Colonel, chief of the Premier's personal guard; Khovostoff, M., former Governor of the Province of Penza; Stolypin, M., the Premier's daughter who died after the amputation of both legs, necessitated by her injuries; Voronin, M., Court Chamberlain; Zamenin, General, personal secretary of the Premier, who during the war with Japan was Chief of Communications. Two revolutionists who entered the reception room, the driver of the carriage, the house porter and a policeman. Among the injured are: Shchegolev, Prince; Stein, Colonel, who was Chief of Police at the Taurida Palace, where the Lower House of Parliament held its sessions; Stolypin, M., slightly wounded; Stolypin, the Premier's three-year old son, who was hurled to the ground when the floor of the room which they were occupying was blown up by the explosion. Four revolutionists arrived at M. Stolypin's villa at twenty minutes past three P. M. to-day in a coach. Two of them were dressed in the uniforms of officers of gendarmes, the third was dressed as a driver and was on the box of the coach and the fourth man was in private clothes. Two of the men entered the villa under the pretext of making an important report to the Premier, but they were not permitted to enter his office. One of the men threw a bomb into the reception room and a terrific explosion followed. The house was nearly destroyed. The man who threw the bomb and his companion were killed, but the Premier was uninjured. His daughter had both legs broken and died this evening as a result of her injuries, and the Premier's three-year old son was severely wounded. Firmen who arrived on the scene immediately after the explosion found a horrible scene. Many lacerated corpses and a large number of wounded and mutilated persons were lying around the spot where the bomb exploded. The two revolutionists who remained in the coach were severely wounded by the explosion of the bomb. Two revolutionists, or at least one, appear to have been able to enter the room occupied by the Premier's private office, whereupon one of the men hurled a bomb at the wall separating the secretary's room from the Minister's private office, resulting in the house being almost completely wrecked. Flames immediately broke out among the wreckage, but the fire was soon extinguished by the firmen, who were hastily summoned.

Schooner Seized For Neglecting to Report

(Special Despatch to the Monitor.) Digby, August 29.—The schooner Beatrice was seized yesterday at Grosse Coque, St. Mary's Bay, by Collector Jones, of Weymouth, for failing to report, she put into St. Mary's Bay port where she landed some of her cargo and failed to report the fact to the local officers, and then proceeded on her voyage. Tug Springfield was called for failure to report at St. John where she entered with one tow and left with another on Sunday.

The Fruit Marks Act The Monitor has been asked to publish the following clauses from the Fruit Marks Act of 1901: 4. Every person who, by himself or through the agency of another person packs fruit in a closed package, intended for sale, shall cause the package to be marked in a plain and indelible manner, in letters not less than half an inch in length before it is taken from the premises where it is packed. (a) With the initials of his Christian name, his full surname, and his address, or, in the case of a firm or corporation, with the firm or corporate name and address; (b) With the name of the variety or varieties; and (c) With a designation of the grade of fruit, which shall include one of the following four marks, viz: 'Fancy,' 'No. 1,' 'No. 2,' 'No. 3,' but such mark may be accompanied by any other designation of grade or brand provided that such designation of grade or brand is not inconsistent with or marked more conspicuously than, the one of the said four marks, which is used on the said package. 5. No person shall sell, or offer, expose or have in his possession for sale, any fruit packed in a closed package and intended for sale, unless such package is marked as required by the next preceding section. 6. No person shall sell, or offer, expose or have in his possession for sale, any fruit packed in a closed package which represents such fruit as of— (a) 'No. 1' quality, unless such fruit consist of well grown specimens of one variety, sound, of not less than medium size and of even color for the variety, of normal shape and not less than ninety per cent free from seeds, worm holes, bruises and other defects and properly packed; (b) 'No. 2' quality, unless such fruit consist of specimens of not less than nearly medium size for the variety, of normal shape and of good color for the variety of normal shape, free from worm holes and such other defects as cause material waste, and properly packed; (c) 'No. 3' quality, unless such fruit consist of specimens of not less than small size for the variety, of normal shape and of good color for the variety of normal shape, free from worm holes and such other defects as cause material waste, and properly packed. 7. No person shall sell, or offer, expose or have in his possession for sale, any fruit packed in any package in which the faced or shown surface gives a false representation of the contents of such package; and it shall be considered a false representation when more than fifteen per cent of such fruit is substantially smaller in size than, or inferior in grade to, or different in variety from, the faced or shown surface of such package.

A Nova Scotian Fruit Grower Has Something to Say About the Orchards of the Valley

To the Editor of the Halifax Herald, Sir,—Some time ago there appeared in your columns an account of some extraordinary verbal antics by a certain English-American traveller named White. Since then, while waiting for some other pen than mine to get after the game, I have seen copies of said account in two of our local papers, without comment or protest of any sort whatever, and it strikes me very forcibly that the interests of our fruit growers, at least, demand that some one should "hit the trail" without further delay. Meanwhile, in talking the matter over with my neighbors, some of whom are quite prominent orchardists, I have picked up some useful information bearing on the subject. As stated in the preamble to your report, Mr. White was formerly interested in the fruit business in England, and thereby being a tale, it appears that a number of our fruit growers at first patronized him; but, became dissatisfied. It seems to have been a case of the fox and the grapes with Mr. White and the Nova Scotia apples. "Ten years ago," he says (when he was handling them) "Nova Scotia apples were held to be the best that came on the English market," but, since they were taken out of his reach they have been "going down" in his estimation until now he "could not give fifty cents a barrel for the entire crop." Judging by the appearance of the orchards in this part of the country, at least, I should infer that our friend in his recent tour of the provinces has cooked his imagination a good deal harder than his observation, although he is said to have observed closely. In my own orchard and those of some neighbors, clean show trees loaded down, as the English say, with apples of the variety, Golden Russets, etc., as one could wish to see; and as for caterpillars I have yet to see a single tree injured by them. About the only variety that show any black spot are Gravenstines and Kings. If this, however, in the case of the former variety at any rate, is confined to the lower limbs of the trees, those on the upper branches being fairly clean. Although we have two good sized vinegar factories in Bridgetown above, and a canning factory at Kingston, all of which are liberally patronized by our farmers, Mr. White is not satisfied with our disposition of the refuse apples. I sold a portion of mine last year to an agent of the English firm, so mentioned, supposing their destiny was vinegar, but afterwards learned that they were to be converted into "champagne." Query—Had Mr. White any champagne with him on his tour? An evaporating plant was established at Annapolis Royal some years ago, but not having capital enough to tick over a period of short apple crops that followed immediately after the enterprise failed. Had it started business any time during the past four or five years the result would doubtless have been different. Having no large cities or our doors to furnish reliable home markets for our produce we have to govern ourselves accordingly. Moreover, as chemists inform us that the feeding value of apples about equal to that of roots, it does not seem to predetermine a very profitable trade to feed the skins and roots of refuse fruit to stock instead of evaporating and sending them to France. The latter method is doubtless more "enterprising" as is also the utilizing carcasses of diseased cattle and those that have died by the hand of Nature for canned meats, the rendering of similarly diseased hogs into lard, instead of burying them as we slow-going people do. It is, however, just this excessive sort of enterprise which has its social and political, so well as its economic aspect that constitutes the great problem of the United States has to face at the present day, and her statesmen, philanthropists, and moral teachers aided and encouraged, do not actually led, by her heroes, and our working over time to make it the Nova Scotia love and admire our great neighbor in a general way. There is scarcely a family from one end of the province to the other that has not sons, daughters, brothers, sisters or relatives or family connections in some part of that country. Moreover, according to present indications, particularly in the political arena, there is more danger that we shall be up against the same snag ere long, than that our industry will languish for want of energy and ambition on the part of our people. The latter idea is just moonshine.

Government Will Continue the Restrictive Measures

St. Petersburg, Aug. 25.—At a session of the cabinet last night, which lasted several hours, the conclusion was reached that in view of the existing conditions, any relaxation in the rigor of the government's policy is utterly out of the question and that it is necessary to continue the battle against the revolutionary forces with all the means at command. It was also decided that the elections for members of Parliament should be delayed instead of over a period of several weeks, as was the case in the former elections, in order to prevent the opponents of the government concentrating their efforts in various districts in succession. Major Gibson, later, at General Huger's invitation, called at the ministry of war and showed the general suits of infantry and cavalry uniforms. The military authorities are also considering American accoutrements, including web cartridges belts and capry sables, with a view to their adoption. Okeana, Aug. 25.—Governor General Kaulbars yesterday, for the first time, used quap (quapuanoo) a papiannu tence. The case was that of a peasant named Rymba, whose punishment for a political offense was committed to ten years at hard labor. It is rumored that Kaulbars yesterday received a letter from the Pendants' Union threatening him with immediate death if he confirmed the sentence.

Maritime Women Agree On Basis of Union

This Was One of the Important Items of Business Transacted at the Recent Session of the W. B. M. U.

The twenty-second annual session of the Women's Baptist Missionary Union of the Maritime Provinces, which closed last Thursday evening, was the largest held in the history of that body. In all, over 250 delegates were present. Many important items of business were transacted, not the least of them being the adoption of the basis of union between this body and the Women's Free Baptist Missionary Union of New Brunswick. Financially the union is in an excellent condition. The reports of the officers showed that during the year closed had been raised the sum of \$13,242.55, an increase of over \$1300 over the last previous year. When it is taken into consideration that the running expenses of the union average but two-thirds of one per cent, it can readily be seen that the Union is far from being bankrupt. The first day was largely taken up with executive work, and the most important was the change of name made necessary by the union. This created much lively discussion, as it really is a difficult thing to find a name to suit all. The following resolution was moved: Whereas union is consummated between the Free Baptists of New Brunswick and the Baptist Missionary Union of the Maritime Provinces, it is decided that the Women's Missionary Union of the Maritime Provinces of the Maritime Provinces be dissolved. This did not meet with approval but an amendment changing the name to the United Baptist Women's Missionary Union passed unanimously. A committee consisting of the following met to report upon the basis of union: Mrs. N. C. Scott, St. John; Mrs. M. S. Cox, Annapolis; Mrs. Emma Hume, Halifax; Mrs. P. R. Wadman, Charlottetown; Mrs. G. M. Parsons, St. John; Mrs. J. N. Barnes, Antigonish; Mrs. M. E. Kinnon, Fredericton; Mrs. Perry, Fredericton. Miss C. Fuller, secretary. This committee recommended for adoption the following which passed unanimously: 1st.—That the joint organization be the United Baptist Women's Missionary Union of the Maritime Provinces. 2nd.—That the maximum sum of \$500 be guaranteed annually for the mission work, that is for Uganda, the orphan, Noble and Barnes, two students of the Balmaine schoolroom. 3rd.—That for the current year the expenditure of the new bodies be amalgamated to carry on the work of the new organization under the name of the executive board of the U. B. W. M. U. M. S. COX, Chairman. CLARA M. FULLERTON, Secretary. The report of the New Brunswick Union showed that that body had raised during the year \$1331.32 an amount over the previous year of \$636.38. It was very gratifying to the convention to learn that their official organ, 'Isings' had again such a good strike. The circulation had increased from 1500 to 5000 during the year, and for the first time in its history the receipts had equalled the expenses. A number of missives were introduced to the convention and the whole congregation arose to greet them, singing the Deology. They were: Miss Newcombe, from Balmatun; Miss Harrison, from Pictou; Miss Churchill, from Bobbitt; Dr. Clarke; Miss Gaudin; Miss Patton; Miss Elliott. Of this number, Dr. Clarke, Miss Gaudin and Miss Patton leave for their respective fields of labor the following day. Miss Elliott goes next year. Miss Gaudin formerly lived in India in the interests of the Free Baptist Union. On Wednesday afternoon an interesting event took place when Mrs. T. A. Blackadar, of Hillsburn, mother of one of the missionaries, was presented with a life membership certificate. Mrs. E. C. Young, of Bridgetown, read an address of welcome which was replied to by Mrs. D. H. Simpson, of Gilsbon, N. B. In the report of the financial secretary of New Brunswick it was shown that the Fredericton society was the honor society in the amount of contributions. In Prince Edward Island this honor is held by the Bobosque society and in Nova Scotia by the Amherst society. This was followed by a symposium on the W. B. M. U. conducted by Mrs. G. L. Pearson, of Paradise, N. S. In the evening there was a very interesting meeting which opened with the reading of scripture by Mrs. McKinnon, followed by prayer by Mrs. F. M. Young. The male quartette sang and Mr. Madick, of Regina, gave an address. Miss Harrison spoke of her work in India and Miss Ida Newcombe, another missionary, spoke rather more along spiritual lines than along scientific. Miss Harrison and Mrs. Churchill afterwards sang a hymn in Telugu. On Thursday morning the services opened with prayer by Mrs. A. C. Smith, of St. John West, followed by a memorial service led by Mrs. A. C. West, of St. John West. In this respect it may be interesting to note that the union has lost by death during the past year, thirty-five members in Nova Scotia, twenty in New Brunswick, and six in Prince Edward Island. Mrs. Clara Fullerton, of St. John West, gave a resume of the missionary work of the Free-Baptists of New Brunswick. The election of officers resulted as follows: President—Mrs. D. H. Hutchinsone, St. John. Vice President for Nova Scotia—Mrs. M. C. Higgins, Goldboro. Vice President for New Brunswick—Mrs. D. H. Simpson, Gilsbon. Vice President for Prince Edward Island—Mrs. David Price, North River. Corresponding Secretary—Miss Emma Hume, Dartmouth. Provincial Secretary for Nova Scotia—Mrs. G. M. Parsons, Paradise. Provincial Secretary for New Brunswick—Mrs. M. S. Cox, Annapolis. Provincial Secretary for Prince Edward Island—Miss A. A. Wadman, Charlottetown. Recording Secretary—Mrs. Henry Everett, St. John. Treasurer—Mrs. Mary Smith, Amherst. The afternoon was taken up largely with routine business, including the reception of the Band reports and the "Round Table" conducted by Mrs. P. F. Foster, of Berwick, as follows: (a) How shall our Band Officers be trained? Miss M. E. Archibald. (b) How shall we educate our members? Mrs. Gillies, St. John, N. B. (c) How shall we raise our money? Mrs. Buchanan, St. John, N. B. (d) The Ideal Band, Miss Alberta Patton. In the evening a missionary meeting was held. Miss Archibald, of Charlottetown, gave an animated address, during which she appealed for necessary funds required to send Dr. Clarke abroad. This was promptly responded to and \$323 was raised in a remarkably short time. Resolutions were passed thanking the transportation companies for courteous service, the citizens of Bridgetown for their hospitality, the press, etc., after which the convention closed. CARLETON CORNER. School opened Monday the 20th, with a full attendance. Mrs. Henry Morse is visiting her husband's parents, Mr. and Mrs. David Morse. Edward Daniels, of Lawrencetown, is visiting Charles Hicks. Miss Emma Dargie, of Lynn, Mass., is spending her vacation at her home here. Mr. and Mrs. Rockwell, of Kentville, are visiting their daughter, Mrs. F. A. Fowler. Miss Millie Dargie who has been visiting friends and relatives in Bonaville and Digby, returned home Saturday. Miss Alice Evans, of Waterville is visiting friends here. Mrs. Stephen Porter and son, of Summersville, Mass., accompanied by her sister, Miss Annie Jefferson, returned home on the 27th. Mr. and Mrs. William Woodland and Leonard Smith, of Waltham, Mass., are visiting friends here. Both visited our community early Sunday morning and claimed Samuel Peters, 74 years of age. The funeral was held on Tuesday. Mr. Peters, who lived with his son-in-law here in the spring and during his short stay among us won many friends.

MORSE'S TEA advertisement with logo and text: 'There isn't anything in the world much more refreshing than A CUP OF TEA; that is—if the tea is good quality. MORSE'S TEA is probably the best TEA sold on this market. Many people who are famous for the kind of tea served in their own house always use MORSE'S.'

NEW FALL MILLINERY advertisement: 'This stock has commenced to arrive and will be shown early next week. See the next issue of The Monitor for further announcements. MISS ANNIE CHUTE'

Philadelphia Financial House Fails With Liabilities of \$10,000,000

(Special Despatch to the Monitor.) Philadelphia, August 29.—Unable to meet its obligation because of the large amount of money loaned in sufficient curities by its president, now dead, the Realistic and Investment Company, Philadelphia, which up to last Saturday was considered one of the strongest financial institutions in the city, closed its doors yesterday. Soon after closing, George H. Barke, Jr., a prominent financier, was appointed receiver. The liability of the company are placed at \$10,000,000 against which there are assets of about \$3,000,000 and collateral about \$5,000,000 which is not negotiable and not really convertible.

Valuable Horse Dead at Toronto

(Special Despatch to the Monitor.) Toronto, August 29.—Guliver Rose, one of Lord Rothschild's horses sent from England to the exhibition died here yesterday from over eating. She weighed one thousand pounds. Some time through the night she got from her stall and got into a corn crib and early this morning was found there still eating. Illness and death followed.

The Same Old Story Again

(Special Despatch to the Monitor.) Beau, Russia, August 29.—The police did not drop yesterday surrounded a lodging house on St. Olivia street where a bomb had been discovered. The revolutionists inside fired with rifles from the windows on the troops and also threw a bomb, when the troops riddled the house with bullets killing and wounding all the inmates.

Train Collision Starts a Fire

(Special Despatch to the Monitor.) Montreal, August 29.—A collision of two freight trains at Berville Junction yesterday caused matches that were contained in one of the cars to ignite with the result that five cars filled with various kinds of merchandise were destroyed by fire. The loss to the C. P. R. is being from \$3,000 to \$4,000.

# Red Rose Tea

## "is good tea"

Just notice the color—a rich amber, which is always a token of quality.

### A BRETON WEDDING.

Picturesque Parade to Display the Household Furniture.

A typical Breton wedding is as curious as it is impressive. So poor often are the young pair that the only way they can set up housekeeping is by presents from their friends of food, fax, furniture and money. The youth desirous of matrimony simply offers his hand to the object of his choice. If she accept she must confirm her acquiescence by drinking wine with him. Her father's consent is asked by proxy, the deputy holding a piece of furze during the interview. The father usually offers an old woman, a young widow and a child before granting the request.

On the wedding day a cowherd leads round the village an ox wagon laden with the wedding furniture. On the top of this load the maidens are seated, one spinning hemp and the other fax.

The bride shows her face breeding by making her friends drag her to church. On either side of the altar burns a wax taper, and it is expected that whichever of the two is nearest to the least brilliant light will die first.

The bride on leaving the church is presented with a disaff to remind her of her duties. This butter, lard, wheat bread and cider from the marriage feast, toward which each guest pays his portion.

At nightfall, according to an ancient custom, the mother gives her daughter a handful of nuts. The happy pair are surrounded and are served with soup containing crabs threaded together, in symbol of unity.

### SPECTACLE LENSES.

How the Glasses are Ground, Polished and Finished.

In the manufacture of spectacle lenses the bit of glass to be formed into a lens is ground by means of pitch to a small block of lead rubber so that it may be held. It is ground by being pressed against a rapidly revolving cast iron disk on a vertical spindle and with curvature equal and opposite to that desired in the lens.

This is the "rough tool" and is kept moistened with emery and water. Several grades of emery are used in succession, changing from coarse to fine as the grinding proceeds.

The glass is then transferred to the "fine tool," made of brass, and compared from time to time to a standard curve in order to insure accuracy. In this second grinding the abrading material is rough.

Finally, the lens is polished by being pressed against a piece of cloth powdered with rouge and fastened to the rotating tool. The glass is now free from its block, turned over and the reverse side of the lens ground.

When this has been accomplished the lens is placed on a leather cushion and held firmly in position by a rubber tipped arm while a diamond glass cutter passing round an oval guide traces a similar oval on the glass below. The superfluous glass is removed by steel pinchers and the rough edges are ground smooth on Scotch wheels.

Major-General Sir Reginald Pole-Carew, since 1903 commander of the eighth division of the third army corps, and who distinguished himself in East Indian and African campaigns, has been retired with the rank of Lieut.-General.

# THE FARM

### FARM MANURE.

Exhausting Soil Fertility by Continuous Cropping and Growing.

By CHARLES E. THORNE, Ohio experiment station.

As the cereal crops approach maturity there is a partial separation of their chemical constituents, the nitrogen and phosphorus accumulating in the grain.

### THE HOG SUPPLY.

Light Hogs Scarce in Summer, When Most Wanted.

The supply of the different kinds of hogs on a market changes with the seasons. Most pigs are farrowed in the spring.

By the time winter sets in many of them are ready to go to market in a finished condition, and many more are sent in an unfinished condition for various reasons, such as lack of feed, lack of room, lack of thriftness and the need of money to meet pressing obligations.

The result is that light hogs and pigs are forced upon the market in undue proportion during the fall and winter. Hogs that are the heavy hogs? Pigs that were farrowed in the spring have not yet had time to develop into heavy hogs.

This causes a scarcity of heavy hogs in the late fall and early winter. In summer the conditions are reversed, giving more heavy hogs and fewer light hogs.

The hog that is sent to market in the summer usually is one that was farrowed in the spring or the fall of the preceding year and has developed into a heavy hog. Light hogs are scarce at this time because most of the pigs are farrowed in the spring.

These factors usually work together to make a narrow range in prices between heavy and light hogs during the summer months and a wider range during the winter months.

This variation in the supply of hogs from the normal demand also has a tendency to lower prices. If the hogs on the market of a certain class are not sufficient to supply the demand for that class of hogs this demand must necessarily be filled by hogs of another class.

These variations in the supply of hogs from the normal demand also has a tendency to lower prices. If the hogs on the market of a certain class are not sufficient to supply the demand for that class of hogs this demand must necessarily be filled by hogs of another class.

From the results it would seem that the nitrogen and potassium of the nature when that has been removed by phosphorus, have been fully as effective, pound for pound, as the same elements carried in sodium chloride and potassium chloride, and after land has been brought up to an average yield of fifty-seven bushels of corn per acre, the addition of wheat per acre will be made by the addition of a carrier of phosphorus.

When Lime is Needed. The need of lime may be determined by the growth of clover. If clover grows luxuriantly lime is not required, but when clover fails to grow on well manured land, dry rot, second season and being yellow, or when the soil is very hard, lime should be added.

Lime should always be received and followed by a good dressing of manure, for lime used alone, while it may stimulate the land to extra production for a year or two, will in the long run exhaust the soil.

The egg is laid in June, and the grub hatches and lives inside the green pea, and becomes mature by August. Occasionally some leave the peas in autumn, but most go through the winter inside the peas. When the peas are sown in the spring the weevils are carried to the field with them, and a few days after they eat their way out of the seed pea and remain in the field, feeding on the foliage of the young peas until the young pods are formed in June, when they lay their eggs on them, and the old beetles then die.

NEWS NOTES Kansas City has a very interesting new structure in a large warehouse of more re-erected with steel. It is said to contain not a piece of wood or combustible material of any kind. Molded in place, the building, with all its partitions and floors is a monolith.

Nothing short of railroad speed satisfies the American student in pursuit of knowledge. The latest in agricultural education is a traveling summer school lately organized by Cornell university.

The 1905 crop of castor beans in Illinois amounted to 71,500 bushels, harvested from an area of 7,100 acres. The bulk of the crop is raised in the southern part of the state.

Lawn mowers are now made and sold having the oscillating knife instead of the revolving wheel knife to which we have so long been accustomed, remarks an exchange.

If ever there was a time when fancy mills should sell in the Dakotas that time is now, said Professor Thomas Shaw in advocating the cleaning and grading of seed wheat.

The newly organized agricultural department is said to have in hand a fertilizer experiment that promises well. Native granitic rock, that runs high in potash, ground very fine or powdered, has given good results on tobacco crops in several sections. If this can be made to replace the imported German potash, it indicates an important development in fertilizer interests.

Is Great Demand The demand for Chamberlain's Colic, Cholera and Diarrhoea Remedy here has been great. I have scarcely been able to keep it in stock. It has cured cases of dysentery, here and all over the world. Frank Jones, Pikeville, Ind. This remedy is for sale by W. A. Warren, Elm. B.

### BUILDING GRAIN STACKS.

Value of a Properly Constructed Grain Stack Only Appreciated During Wet Season—How to Make One.

The value of a properly constructed grain stack is only appreciated during the wet season, says the American Agriculturalist. If the weather is dry, almost any kind of stack will do. The bottom of a grain stack should be started in the usual way as a round shock. Care should be taken to have the bottom of the stack perfectly round with the heart of the stack in the middle to insure settling on all sides. The bundles are all set on end in the bottom of the stack so that the heads of grain will not come in contact with the ground, as shown in Fig. 1, which represents a cross-section of bottom of grain stack, ready for the second layer of bundles.

One of the most important things to remember to keep the stack highest in the center and as solid as possible. Some make the mistake of piling loose straw in center. This will cause the center to settle more rapidly than the

outside, with the bundles slanting inward, a thing to be carefully avoided, for such a stack will take water. A level place should always be chosen. It takes an expert to put up grain stacks on a side hill.

The stacking should be done with a fork. The old way of going around on the knees and handling every bundle with the hands is out of date. Better stacks can be made with the fork and quicker work can be done, besides it is much easier. When the operator uses a fork it is not necessary for him to go close to the outside, thus leaving it loose with plenty of room to settle down. The harder he can tramp the center the better. This will cause the center to settle less than the outside, especially if a good-sized horse is made at the water part.

When the stack is high enough to begin drawing in, an extra layer of bundles should be laid, commencing from the inside of the outside row. This is necessary in order to make the center high enough to give the bundles the proper angle of repose, at least 20 degrees. A person with experience using a fork will never be able to give such a stack as much as 45 degrees, while he keeps well in towards the center.

Fig. 2 shows the bundle of upper half of stack with a slant of about 20 degrees. A little experience will enable the operator to strike the bundles of the outer row with the fork ends lightly into the course of bundles below. This will prevent the outer row from slipping out.

Topping out a stack properly is the most difficult part. I have found that 20 per cent. of all stacks that draw water take it midway between the bulge and the top. To insure this, a particular point in the stack should be very carefully constructed. Never draw the stack until the top is 14 feet across, which always has a tendency to cause it to take water. The last few feet of the stack should be drawn in by hand, and the top should be 12 feet across. If the good-sized horse is used, he may set good results put on a larger bulge, as it will improve the stack in setting, allowing the outer rows of bundles to slant at a considerable greater degree. But for the benefit of those who have

Table Linens. An excellent article in this department. One of the best in the market. Only 15 cents per box of 25 cakes for 25 cents.

### Mrs. J. E. Burns

GUARANTEED CLEAR FOR PILES. Itching, Blind, Bleeding, Protruding Piles. Druggists are authorized to refund money if PAIN-O-MENT fails to cure in 6 to 14 days.

### THE HUMAN BODY.

Composition of the Human Body. The composition of the human body is composed of 206 bones, covered with 522 voluntary muscles. The smaller blood vessels are so numerous as to be beyond the telling, but we have no fewer than about 1,000 arteries through which the blood is always flowing under the government of the heart.

The blood is composed of two constituents, termed by physiologists red and white corpuscles, numbering some thousands of millions.

Our house has something like 600 tin telegraph wires, called nerves, connected with the brain and spinal cord, and these little wires are always throbbing with messages which they telegraph to the brain office—the brain.

Besides these there are the sympathetic wires, or nerves, numbered by thousands, which help to govern the heart. The front of our bodies, the skin, has been measured up and found, if spread out, to cover 17,000 square feet.

The surface of our bodies, which we get our fresh air is built of such fine porous stuff that, if spread out, it would be found to cover a stretch of land the size of a certain African rainfall forest. We refer to the lungs. They have hundreds of millions of air cells.

Every square inch of the palm of the hand are 2,000 pores, while the number of sweat glands in the skin generally is 2,500,000. Their function is to deposit secretions upon the skin; hence the necessity of a daily tub to wash this stuff away, otherwise it clogs the sweat glands and prevents their proper working.

### SUNSTROKE.

Properly Speaking, It Should Be Called Heat Apoplexy. What is called "sunstroke" is the effect of great heat, should be "heat apoplexy." The misnomer leads the multitude to suppose that death from it is caused through being struck down by exposure to a special malvolence of the sun's rays. This is not so. For patients are with equal frequency found in houses and barracks and tents and at night as well as day and, whether in sun or shade, are generally those whose health is debilitated by dissipation, disease and overwork, and the evidences from all parts of the world show that exposure to direct intense sun rays is less to be feared in dry countries than in countries where the temperature is much lower, but the atmosphere is moist, and perspiration is consequently retarded.

People suffer more from a temperature of 87 degrees F. at Brussels than at 122 degrees F. at Cairo, owing to the moist air of the first and the extreme dryness of the air in the latter city.

The inhabitants of the eastern coasts of the United States bear with amazement of temperatures from 118 to 128 degrees F. being tolerated in the dry regions of Arizona and South Colorado without harm and that the ordinary avocations of farm and factory are pursued without inconvenience. This is due to the cooling effect of rapid evaporation from the surface of the body, and hence the sun's malignancy is unknown.—London Mail.

### Butter Paper

We have a stock of the genuine parchment paper for all purposes. Write for particulars.

2x12—one lb. size, printed, 200, \$1.25

The Weekly Monitor

M.K. PIPER Proprietor
J.A. WALLIS Editor and Manager
BRIDGETOWN, ANNEPOLIS CO., N. S.
WEDNESDAY, AUG 29, 1906.

The waste of human life that occurs year after year from drowning is enormous. The economic loss to the community and country is deplorable; the sorrow and misery of those left behind cannot be measured. Many of the drownings would not take place if everybody were obliged to learn to swim. Swimming is not a difficult accomplishment to acquire in childhood, and with facilities for practice, learning to swim is a pleasure, not a chore.

PORT LORNE

Miss Myrtle Starratt, of Newton, Mass., is spending her vacation with her parents, Mr. and Mrs. A. Starratt. Mrs. Melbourne Balcom and daughter are visiting at the home of Louis Balcom. Mr. and Mrs. Ralph H. Ensign, of Sunbury, Conn., spent last week with Mrs. J. C. Morse. Rev. H. I. Morse and family who have also been guests of Mrs. Morse, returned to their home in Lynn on Thursday.

TOURBROOK

Next Monday work will start laying rails toward the Wheelock shaft. Macdonald C. Foster was successful in securing his grade D certificate. The railway will soon be finished, and most of the men will leave for Canning, where they will build a mile or so of railway. D. E. Foster returned on Monday from a short trip to Yarmouth. Magdon Wheelock who broke his leg some days ago, is progressing favorably. Mr. J. H. Woodbury, Kingston Village, has been engaged as teacher for the public school. Rev. C. H. Haverstock has returned from his vacation spent at Margaretville. Unfortunately we admit that we are not possessed of a sicklist, what necessitates a country correspondent, and hence will be unable to report cases of illness until furnished with the so-called "list." When such the quill, and say in that glorious, but heady, style of the rural journalist, on the side list.

NORTH WILLIAMSTON

Our school opened last Monday with Miss May Banks, of Bridgetown, as teacher. Miss Margaret DeLaney was successful in securing her D certificate as a result of examination. Pay parties seem to be the order of the day. Mr. and Mrs. Oliver DeLaney spent the day recently with friends at Bridgetown and Dalhousie. Mr. H. P. Sargent and daughters, Mrs. E. P. Sargent of Berwick, and Mrs. A. Brown, of Wilburn, Mass., were guests of Mr. and Mrs. D. M. Charlton lately. Mr. and Mrs. A. Stevenson spent last Saturday with their son R. D. Stevenson of Bridgetown. We think it would have been well if W. N. White had visited some of the orchards here, before circulating such a malicious report. Mr. and Mrs. Malcolm Todd and Mr. and Mrs. E. S. Swaleson, of Bridgetown, were guests of the guest, Mrs. O. DeLaney recently. Mr. and Mrs. William Sinclair, of

Springfield visited their sister, Mrs. D. Pierce last Monday.

Miss Hatley Pierce of Wolfville, is spending her vacation with her parents Mr. and Mrs. David Pierce. J. A. DeLaney leaves this week for Montreal.

DEAFNESS CANNOT BE CURED

By local application, as they cannot reach the diseased portion of the ear, there is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running nose or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out of this tube restored to its normal condition, hearing will be destroyed forever. Some cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surface of the tube. We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circular, free.

F. J. CEBNEY & CO., Toledo, O. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

PHINNEY COVE

Mrs. Fisking is visiting her parents Mr. and Mrs. Alexander Turpel. Mrs. Hopson, of Halifax, is visiting her mother, Mrs. Beaks, at Forest Chase has arrived home from Somerville, Mass. W. R. Crisp spent Saturday and Sunday with friends here. Miss Velma Guest, of Mill Village, Queen's County, is spending a week with her cousin Enos Munroe and other friends. Mrs. William Bent and children of North Williamston are visiting Mr. and Mrs. Watson Bent. Miss Flossie and Master Hector after spending a delightful seven weeks vacation with their aunt, Mrs. Ena Munroe, and other friends, have returned to their home in Danvers, Mass. Fishing is still good. Some splendid catches have been reported lately.

PARADISE

Mrs. Croson, of Grandville, is visiting her grand daughters, Mrs. Fred Boley and Mrs. Harry Boley, of Paradise. Mr. and Mrs. Ritten Marshall, former residents of Paradise, who have spent the past week with their friends here, are visiting friends here. We are glad to learn that Mr. and Mrs. Marshall purpose remaining with us. Mr. and Mrs. T. E. Askeron, of Boston, and Mr. and Mrs. H. D. Gibson and daughter, of Halifax, have been recent guests of Mr. and Mrs. J. C. Phinney. Mrs. J. E. Bonaman and son Boyden of Millington spent Sunday with the former sister, Mrs. W. A. Shumway.

Dominion Exhibition

In a Scale of Magnificence

The great Exhibition at Halifax is now only two or three weeks in the future, and the plans of those who propose visiting it should by this time be pretty nearly completed. The Exhibition will undoubtedly be on a scale of wonderful magnificence, and the grounds, with their 37 acres and imposing buildings, will be taxed to the utmost to accommodate the display that will be made and the public thronging to see it.

In its departmental features the Exhibition will be replete with objects of interest, and amusement will be pleasantly combined with the more solid and substantial resources for a visit to the Fair Grounds. The Fisheries Building which has been erected this summer will be stocked with a great display of the Marine life and wealth of this part of Canada. The Yachting performance will be thrilling, wonderful and amusing, the pyrotechnical display will be magnificent, and the horse races are certain to be exciting, with the prospect of many new records. The track is in perfect order and has been made very fast. A visit to Halifax for the Exhibition will be well worth while, and the city itself, with its new paving, will be of special interest. The entries for the horse races close on the 10th of Sept., and those for Agriculture, Women's work etc., close on Monday Sept. 27th. The judging bureau is perfecting arrangements to comfortably provide for all comers. It would be well for anyone not having yet secured quarters to write to W. J. Butler, Lashing Superintendent, 138 Hollis St., Halifax, who will make a record of the names and secure accommodation. Full particulars, a call at the Bureau would be advisable after Halifax is reached.

The Dig's Centre says, Capt. L. D. Marton returned home Tuesday from Montreal where he witnessed the races. Kingsborough beat everything there. The big Montreal draftee, who won a lot of money to the delight of Kingsborough. They state that the drivers and jockeys were changed and everything possible done to defeat this fast young stallion, but to no avail for he proved himself a peer of the best class. Capt. Marton refused a cash offer of \$2,500 and will not consider anything less than \$5,000. Kingsborough starts next at Moncton on Labor Day and again in Halifax on the 15th. After that he goes to Prince Edward Island, but in no case will he start for a race less than \$500. We wish him continued success.

STRONG & WHITMAN

A CALIFORNIA TRAGEDY. California, the land of gold, sunshine, fruit, flowers and lovely women and young divines, has witnessed another tragedy. They state that the drivers and jockeys were changed and everything possible done to defeat this fast young stallion, but to no avail for he proved himself a peer of the best class. Capt. Marton refused a cash offer of \$2,500 and will not consider anything less than \$5,000. Kingsborough starts next at Moncton on Labor Day and again in Halifax on the 15th. After that he goes to Prince Edward Island, but in no case will he start for a race less than \$500. We wish him continued success.

W. W. CHESLEY

LOCAL AND SPECIAL: Bean social and fancy sale at Bensfield, See ad. Rev. Rupert Osmond Morse has returned from Gasperaux and settled at Westport. The balance of the pipe required for the water works extension, arrived last Friday night. The three thousandth consecutive weekly sermon by the Rev. C. H. Spurgeon was issued on the 9th inst. Com. Jas. DeWitt has recently sold his well known horse "Mendocaval" to parties in Sussex at a good figure. John Abbott, of West Paradise, while unloading grain at John Dargie's threshor on Monday, fell from the wagon and suffered severe injuries. For Labor Day the Dominion Atlantic Railway will issue excursion return tickets at single fare on Sept. 1st and 3rd, good to return Sept. 4th. N. E. Chute met with a severe accident at Weymouth last Friday, and as a result he will probably be laid up some weeks. He was standing in one of the stores then in conversation with another gentleman when a pile of bags of fertilizer fell knocking him down and pinning him to the floor. His right leg was badly strained and bruised. He came home next day on crutches but since then has not been able to walk. Attention is called to the posters around town advertising the concert that is to be held in the court house on Thursday evening, September 6th, under the auspices of St. James church, in aid of their new rectory. The names of the performers bespeak a full and entertaining program. To this special interest is added by the fact that in part II Miss Lydia Munroe will sing a song, the music to which is her own composition, and of which eminent critics have spoken most highly. The ladies of the Chesley section of Upper Granville recently formed a branch of the Women's Auxiliary of the Missionary Society of the Church of England in Canada, and are now proposing to hold a harvest tea and Chesley next Wednesday afternoon, picnic in the grounds of Mrs. Phineas September 5th, from 4 to 7.30, in aid of the work they have undertaken. The rendezvous is very delightful and being within easy distance of town three miles, we imagine many of our readers will take it in, especially as the sum asked is the modest 25 cents. If Wednesday be wet the tea will be held the first fine day. TAKE A DAY OFF next Monday and see the Sports in Annapolis Royal.

OBITUARY: WILLARD P. MORSE. At Paradise West on the 24th inst., Willard P. Morse passed peacefully away to the home beyond. Mr. Morse had been ill for some weeks, but the last few days he was entertained for his recovery, but on Friday morning he passed away very suddenly. He was 56 years of age, third son of the late Amos Morse. He was born at West Paradise and spent the greater part of his life there. When a young man he taught school for a number of years very successfully. Mr. Morse was a member of the Paradise Baptist church for a number of years, and lived a very consistent Christian life. He will be greatly missed in the community. A widow and nine children—four boys and five girls—are left to mourn a loving husband and kind parent. On Saturday afternoon the remains were interred in the cemetery here, Rev. H. H. Saunders officiating. The widow and children of the late Willard P. Morse wish to express after a visit to her parents and through the columns of the Monitor their deep gratitude to all friends and neighbors who kindly assisted them in so many ways in the great bereavement in which they have been called upon to pass through. S. J. PETERS. On Sunday morning at 1.30 Samuel Joseph Peters passed away of heart failure, aged 74, at Carleton Place. The deceased moved here with his family last April from Roxbury, Mass. and intended to make this his future home. For some ten years he has been gradually failing in health, and the end was not unexpected. He was highly respected by all who had made his acquaintance. Mr. Peters leaves a sorrowing widow, an only daughter, Miss Charlotte, with one son at home, two in the northwest, and one in Somerville, Mass., four sisters, one of whom came to see him last week, and a brother who is light house keeper at Sydney. Rev. E. Deley, who was at Liverpool being telegraphed for, arrived in time for the funeral which took place yesterday afternoon. Interment at the Whitman burial lot, Valley West cemetery. Undertaker Reed was in attendance.

Diamond Dyes

Made Especially for Easy and Successful Home Dyeing. Diamond Dyes are the only package dyes made especially for easy and successful home dyeing. They re-color fast-colored fabrics, dyed goods, scarfs, ties, hosiery, socks, silk, muslin, dresses, skirts, stockings and other articles of wearing apparel. It is so easy to dye a faded garment—small or large—with Diamond Dyes, as it is to wash it with soap, and the colors are forever fast in washing or sunlight. Bright and even year by year by the use of Diamond Dyes, which make old things look as good as new. Users of package dyes will please bear in mind that vile and worthless imitations of Diamond Dyes are sold by some dealers. Every time you purchase dyes be sure you ask for the "DIAMOND" Brand. All others make if you would avoid trouble and loss of money. Write to Wells & Richardson Co., Limited, Montreal, P. Q., for New Direction Book and Diamond Dye Cook Book. Sent free to any address.

BORN: MUNROE—At Bridgetown, Aug. 27, to Mr. and Mrs. H. I. Munroe, a son. ELLIOTT—At Bridgetown, August 28, to Mr. and Mrs. R. W. Elliott, a son. DIET MISS the Labor Day Sports at Annapolis Royal Monday, September 3rd.

Saunders, of Bridgetown, and formerly of the Union Bank staff, at Wolfville, has severed his connection with that bank and joined the staff of the Union Bank of Canada, Mr. Saunders, who is now located in Sydney, leaves for Winnipeg, the 17th of September, to take the position of teller in the Bank of the last named city there.

PERSONALS (continued): Accident at Nictaux Falls. Nictaux Falls, Aug. 27.—A serious accident happened here on Thursday last, John Bruce, of Brooklyn, while shingling on the barn of his son-in-law, O. Willott, fell from a stanchion some twelve or fifteen feet from the ground, striking on his head. He was picked up unconscious and remained partly so for several days. The blow produced severe concussion of the brain and for several days his condition was critical. Dr. Miller who is in attendance, thinks now the symptoms are favorable for recovery. The Apple Crop. On Wednesday, Dr. Borden ran over to Sackville from Avonport, N. S., returning thither on Friday. He reports the apple crop in Nova Scotia as deficient both in quantity and quality and says further that the apple growers have received from London advice to the effect that in consequence of large crops in other apple growing districts, the prices are going to be low. Sore Nipples and Chapped Hands are quickly cured by Chappell's Hand-Lotion. Try it. It is so simple. Price 25 cents.

THE HOUSEHOLD

A SMART COLLAR.

It is Pretty to Wear With Muslin Gowns.

The lace collar illustrated is exceedingly pretty and is useful to wear over a simple blouse or hot blouse. It is composed of insertion lace and flowered ribbon and can be very easily made if the following directions are carried out.

LAKE COLLAR.

sewed on invisibly under the border of the insertion. On each side of the center back strip of lace the ribbon is cut in rather longer pieces and arranged diagonally from the top downward.

Methods For Removing Stains.

Grease Spots—Hot water and soap generally remove these. If fixed by long standing, use chloride of lime or ammonia. Both of these must be used away from fire or artificial light.

Hints to Mothers.

Never feed a baby simply to keep it quiet. If the baby vomits don't put anything except water into his stomach for four hours.

The two farmers' organizations that control the province, the Society of Equiv and the Alberta Farmers' Association, met in convention at Edmonton, Alta., and voted for amalgamation.

When the Liver is out of Order

colic, ascara, salts, strong liver pills and purging mineral waters won't do any permanent good.

When a person is bilious, the liver is not giving up enough bile to move the bowels regularly—and some of the bile is being absorbed by the blood.

Now, purgatives don't act on the liver at all. They merely irritate the bowels, and afford only temporary relief.

FRUIT-A-TIVES are the one true LIVER TONIC. They act directly on the liver—strengthen and invigorate this vital organ—and put it in a normal, healthy condition.

FRUIT-A-TIVES also stimulate the glands of the skin—and regulate the kidneys and sweeten the stomach.

No other medicine known to science is so reliable and so effective in curing Biliousness as these fruit liver tablets.

FRUIT-A-TIVES are fruit juices with tonics added—and are free from alcohol and dangerous drugs.

FRUIT-A-TIVES LIMITED, OTTAWA

DAINTY SUNSHADES.

THE SUMMER PARASOL MY LADY'S PRESENT HOBBY.

Embroidered varieties first favored by the aristocracy.

Perlan Tears.

The Persians still believe that human tears are a remedy for certain chronic diseases. At every funeral the bottling of mourners' tears is one of the chief features of the ceremonies.

Beautiful Pearls.

The pearls found on the gulf coast of Lower California are said to exhibit a greater variety of colors than those of any other part of the world.

The Rest Test.

Even the man who says he doesn't care a rap what other people think hesitates about carrying a pair of his wife's shoes to the cobble to have them tapped without doing them up inside a piece of wrapping paper.

Hubbard—What has become of those indestructible toys you got last week? Wife—They are out on the scrap heap, along with the indestructible kitchen utensils.

MINNABY'S LINTMENT CURES GARDEN IN CROWS.

MINNABY'S LINTMENT CURES GARDEN IN CROWS.

Hump Back

SCOTT'S EMULSION won't make a hump back straight, but it will make a short leg long, and it feeds soft bones and builds dissolved bones and is strong for the few people who need recovery from rheumatism and other ailments.

JOY OF HOUSE BOATING.

Complete Freedom In Nature's Romantic Scenery. He who would live the simple nomadic life in complete freedom and independence in the very heart of nature's house-boat.

What an idle, lazy, innoxious, romantic life this is, to be sure! It is impossible to endure too strongly on the merits of such an unfettered existence.

There are those who prefer the joys of tramping through woods and over mountains, carrying their tents, canvas and supplies on their backs, but their labors are very much greater than those who are luxuriously carried about in their floating camp.

THE CAMEL.

He Has a Dangerous Temper, and His Bite is Vicious.

The camel is a dangerous animal to ride—a more dangerous animal than the horse—for the reason that, with his serpentine neck, he can reach round when annoyed and bite his rider.

A camel's bite is a serious matter. The strong teeth lock in the wound and a clever trick is given to the jaw, around and then back, before the teeth are withdrawn again.

Young man, I'll tell you how you can get a partial idea of what riding a camel in an African desert is like. Take an office stool, screw it up as high as possible and put it along with a savage dog into a wagon without any springs.

Perlan Tears.

The past page of honor to the sovereign does not carry with it, as it used to do, the right to a commission in the guards without examination of any kind, but it is still a coveted office, with privileges attached to it which are much appreciated by the sprigs of nobles who are lucky enough to receive the appointment. It is not, for example, an unpleasant experience for a fourth form boy at Eton or Harrow to be summoned up to London on a "whole school day" for a court at Buckingham palace or other state pageant while his schoolfellows are loafing at their books.

Beautiful Pearls.

The pearls found on the gulf coast of Lower California are said to exhibit a greater variety of colors than those of any other part of the world.

The Rest Test.

Even the man who says he doesn't care a rap what other people think hesitates about carrying a pair of his wife's shoes to the cobble to have them tapped without doing them up inside a piece of wrapping paper.

Hubbard—What has become of those indestructible toys you got last week? Wife—They are out on the scrap heap, along with the indestructible kitchen utensils.

**BEAR RIVER.**  
(Telephone)

Invitations are out for the marriage of Miss Nellie Betts Purdy to Rev. Arthur C. Archibald, M. A. of Wausonset, R. I., which takes place at the residence of the bride's parents Mr. and Mrs. Fred W. Purdy, on Thursday, August 30th at two o'clock p. m.

Okaloosa School re-opened on Monday with the following staff of teachers, only two changes having been made from last year. Lenest Ruzgles, principal, Curtis Denton, Misses Maude Chute, Margaret M. Harris, Blanche A. Ruzgles and Hattie Chisholm.

One of the greatest arguments in favor of incorporation is the terrible bad condition of the plank sidewalks. On the Digby side of the town the street commissioner says the road work is all used up and there is no money with which to make repairs, and in that case what are you going to do about it?

The several schools of this vicinity have been fortunate in securing the services of the following teachers for the ensuing term: Greenland, Miss Florence Ruzgles; Centrevale, W. K. Tibert; Milford Corner, Miss Lettie Easton; Lansdowne, Miss Myrtle Lambertson; Cross Road, Miss Mabel Hartson; Indian Reserve, Miss Laura Bortaux.

A number of friends gathered at the farm of John R. Chute, on Thursday afternoon of last week for a picnic, it being the anniversary of Mr. Chute's birthday. A general good time was enjoyed with lots to eat and everything else that goes to make up a picnic. Mr. Chute tried to make some of the ladies believe he was on sixteen, but things transpired which made them believe he was more.

A stampede of young cattle created quite an excitement here on last Saturday morning. There was a half dozen head in the drove which were being driven through town by Mr. Marshall Bridgetown, when near the bridge the took it in their heads to return to Mr. Ryan's pasture from which they had been taken. They made a rush through Mrs. Tupper's yard up back of the hotel, across the hills and hills being no obstruction to them. In coming down the road again they had to jump over several feet to the sidewalk, which they made in all shapes, some on their heads, others on their backs, and the wonder is how they got through without some broken limbs or necks. After a hard chase they were secured, and passed

JUST TRY IT

**Lime Juice**

through town all safe, the ring leaders being tied head and foot.

A very pretty home wedding took place on Wednesday morning, the 22nd at ten o'clock, at the home of the bride's parents, Mr. and Mrs. James Mullin when their daughter Alva Etta was united in marriage to Rupert Alexis Harris, the ceremony being performed by Rev. I. A. Corbett, pastor of the First River Baptist church, in the presence of about sixty invited guests. The couple stood under an arch of spruce, sweet peas and ferns, a further decoration of potted plants being carried out with pleasing effect. The couple were unattended. The bride was becomingly and quickly gowned in white silk with bridal veil and carried a bouquet of white asters and looked very charming as she entered the room leaning on the arm of her father, who gave her away. Little Miss Marion Roy, niece of the bride acted as ring bearer and looked very sweet in a dress of white silk with blue ribbon trimming. After the ceremony and congratulations a beautiful collation was served. The bride was the recipient of many beautiful and valuable presents, among them being over a hundred dollars in gold. At 11:30 the happy couple left in F. W. Purdy's up-to-date, bridal carriage for Digby to catch the train for a wedding trip to Scotland. The telephone joins their many friends in wishing Mr. and Mrs. Henry Rooney spend a part of last

**Make Hay While the Sun Shines**

There is a lesson in the work of the thrifty farmer. He knows that the bright sunshine may last but a day and he prepares for the showers which are so liable to follow. So it should be with every household. Dysentery, diarrhoea and cholera morbus may attack some member of the family, but a dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy, which is the best known medicine for these diseases, should always be kept at hand, as immediate treatment is necessary, and delay may prove fatal. For sale by W. A. Warren, Pharm. B.

**SUNSET AT HAMPTON.**

A ripple along the shore,  
The sound of the outgoing tide,  
And the sun sinks down beside  
The golden gate of the bay.

Till we behold him no more,  
The radiance on the sea,  
And the tifty ship to the north  
Tossing fitly back and forth H  
Hay in the captain's firm command,  
Oh the sight is fair to me.

**Unnecessary Expense**

Acute attacks of colic, diarrhoea and dysentery come on without warning and prompt relief must be obtained. There is no necessity of incurring the expense of a physician's services in such cases if Chamberlain's Colic, Cholera and Diarrhoea Remedy is at hand. A dose of this remedy will relieve the patient before a doctor could arrive. It has never been known to fail, even in the most severe and dangerous cases and no family should be without it. For sale by W. A. Warren, Pharm. B.

**GRANVILLE CENTRE.**

George Hutchinson, wife and two children, of Boston, spent last week with her aunt, Mrs. Samuel Bent. Miss Jennie Bent, who has spent the last year in Boston, Mass., returned home last week. Will Hutchinson, of Boston, is spending his vacation at his old home here.

**OUTRAM.**

Mr. and Mrs. Everett Healy, of Roxbury, it spending a few weeks with his parents, Mr. and Mrs. Norman Healy.

**MT. HANLEY.**

Mr. Irving G. Miller and family, from Lynn, Mass., have been the guests of his parents, Mr. and Mrs. C. Miller for the last few weeks.

**ALBANY CROSS.**

Chas. Connell is on the sick list. David Vinot, who has been in New Brunswick for the past year, is visiting his family at South Albany.

**PORT LOBNE.**

Percy Anderson, accompanied by his cousin, Henry Brown, of Winchendon, Mass., is visiting his home.

**SOUTH WILLIAMSTON.**

Messrs. Charles and Fred Keith are making quite extensive repairs on their residence. When completed it will improve the appearance and convenience very much. Messrs. Oakes and Bartons, of Sictaux Falls, are doing the carpenter work and Ingram Whitman, of Middleton, the masonry.
