## SCHOOL BOARD

FOR THE YEAR 1894.

---

CHARLES HAYWARD, Esq., CHAIRMAN,  
Term expires January, 1895.

HENRY SAUNDERS, Esq., " " " "

JOHN B. LOVELL, Esq., " " " "

WM. MARCHANT, Esq., " " " 1896.

GEORGE GLOVER, Esq., " " " "

EDWARD H. LEWIS, Esq., " " " "

SECRETARY TO THE BOARD,

B. WILLIAMS, Esq., 46 Fort St.

## **REPORT OF THE SCHOOL TRUSTEES OF THE CITY OF VICTORIA, B.C.**

In accordance with the requirements of the Public School Act the following detailed audited statement of the receipts and expenditures of the Victoria City School Trustees for the year 1894 is published for the information of the ratepayers and will, it is hoped, be found satisfactory.

Attention is drawn to the memorandum showing the relative cost of the High and Public School pupils, whereby it appears that the cost of the former based on average attendance is \$48.59 $\frac{3}{4}$  per capita per annum, while that of the latter is \$27.07, or only about one-half.

Although authority is given to the Trustees to levy a tuition fee on pupils attending the High School, they have not seen their way to do so without inflicting more or less hardship or humiliation upon poor but deserving parents. Some relief might be found if the Educational Authorities could be induced to materially increase the standard at examinations for entrance to the High School, so as to necessitate that the education obtainable in the lower schools be more advanced and complete, and which in most cases would be found sufficient for ordinary pupils intended for Agricultural, Mercantile or Mechanical pursuits.

An effort was made during the year to avoid the waste of time and general disturbance to the work of the teachers caused by having the entrance and promotion examinations three or four weeks prior to the end of the term; but it was only partially successful. It is thought that a permanent satisfactory

arrangement might be made with the Council of Public Instruction so that the existing rules may be amended, allowing the written examinations to be held during the last few days of the term and the result made known during the holidays or at the commencement of the new term.

### IRREGULAR ATTENDANCE.

The statement showing the per centage of pupils regularly attending, as compared with the number actually on the roll, is earnestly commended to the consideration of both teachers and parents. It will be noticed that on an average 277 children are absent every day. As the Government grant of ten dollars per pupil is based on the number actually present, it is readily seen that these 277 absentees have been the direct cause of a loss in money to the City during the year of \$2,770, besides the greater loss to the pupils themselves, by the breaks thus made in their progressive course of studies. It is hoped that in future when parents are tempted (perhaps for trivial causes) to keep their little ones at home they may think of these things.

### CITY INSPECTOR OF SCHOOLS.

While recognizing the importance of avoiding any additional expenditure, it is felt that the appointment of a duly qualified experienced teacher at a liberal salary to act as a City Inspector of Schools and as general adviser and confidential agent of the Board is a pressing necessity. When it is considered that there are under the control of the Board eight separate schools, with about 2,000 pupils in attendance, giving employment to 48 teachers, all of whom are practically without oversight so far as the Trustees are concerned, it is obvious that better results would be obtained if the services of a competent person

could be relied upon whose duty and interest would ensure a faithful report on the condition and progress of the pupils and the efficiency or otherwise of the teachers. The Inspector's duties might also include the examination and classification of new pupils, visitation of parents in case of absence or tardiness, and the preparation of all necessary statistics; beside which, his daily attendance at one or more of the schools would enable him to judge of the progress made by the pupils, the methods of instruction pursued by the teacher and the discipline maintained. He might also have general charge of the school buildings, furniture and equipments, attend all meetings of the Board, and report at regular and frequent intervals on all matters affecting the well being of the schools.

#### TEACHERS' SALARIES.

In the statement hereto are shown the salaries paid to the teaching staff; but whether these amounts should be continued requires careful consideration.

It has been suggested that as these salaries were in the main determined when the cost of living was unusually high, that it ought not to be regarded as a hardship if they were now adjusted to the greatly decreased cost of all the necessities of life. The principal point is, would a reasonable (say 10 per cent.) reduction impair in any way the general efficiency of the Schools? Would the teachers' zeal abate or their usefulness be seriously affected by it? We are inclined to think that the teachers themselves should recognize the necessity of cheerfully assenting to the change, so that the burden of taxation on the unfortunate rate-payers might be made as light as possible. In this important matter it would be well if the views of those interested, both as teachers and tax-payers, could be made known.

## NORTH WARD SCHOOL.

The new North Ward School Building has been erected from the plan of Messrs. Soule & Day, which in the public competition was placed first by the expert, the Board of Trustees confirming the selection. The edifice is substantially built of brick, and contains eight class rooms, each designed for sixty pupils. The basement, which is above ground, is divided into wet weather play grounds for boys and girls. The class rooms are distributed four on the ground floor and four on the second floor; the third floor space is taken up by a large Assembly Hall capable of seating easily six hundred people. Each class room is provided with a separate cloak room. There are two teachers' rooms on the second floor and a Principal's room on both the ground and second floor. There are five entrances; two to the basement and three to the ground floor. The corridors, 12 feet wide on two floors, run the entire length of the building. There are three stair-cases, each six feet wide from the basement to the hall on the third floor.

The building is heated and ventilated by steam by the direct indirect system which can be regulated by the teacher in each room.

The tower is a striking feature of the building and forms a landmark for the neighborhood.

## SOUTH PARK SCHOOL.

The South Park School as compared with that in the North Ward is generally speaking a smaller building, and, perhaps, in the opinion of some, less imposing externally, being a storey lower and lacking a tower or any specially prominent feature. It was thought that the money saved in this direction would be better spent in the very best and most durable construction; at the same time it must not be supposed that the comfort of the scholars is in any way interfered with. The class rooms, conveniences and covered play grounds are, if anything, more commodious in this building, the saving in space being obtained by fewer staircases and long corridors, the grouping of the several rooms round one central hall being so simple that the latter are unneeded.

The accommodation provided is, according to the request of the Trustees, for 480 scholars in eight class rooms of 60 each with one large room for general assembly. Each class room is exactly similar in every respect, allowing 240 cubic feet of air space per child; a special feature being that they are lighted on two sides by eight windows, so that in every instance the scholars have a rear and left hand light and no continuous glare direct in their eyes, the blackboards (which are of the best polished slate) being placed round the two remaining walls. Each room has also a recessed book case for the convenience of the teacher and a separate cloak lobby adjoining. There are also drinking fountains outside each class room on each floor and in each play ground. The large Assembly Hall, which will accommodate 600 persons, is situated on the ground floor, being thereby easy of access

access

and of exit in case of fire or panic, there being also three distinct means of exit apart from the windows, which are no great distance from the ground. It might also be mentioned that there are additional emergency exits at each end of the building on each floor making seven in all.

The system of Heating and Ventilation is that patented by Messrs. Smead, Dowd & Co., and which has been so thoroughly discussed and criticised on previous occasions that it seems hardly necessary to do so here further than to say that so far it has given the most entire satisfaction, keeping the whole building at a pleasant temperature, giving a continuous supply of warmed, fresh air, and at the same time drawing off the vitiated atmosphere.

The water closets are arranged on the continuous trough system with an automatic dump, flushing the trough with 25 gallons of water every 25 minutes, and doing away with any complicated mechanical arrangement which in a school is so liable to get out of order. This system has been found to work so well that an exact counterpart is being put into the North Ward School. The plans for this building were prepared by W. Ridgway Wilson Esq., Architect, under whose superintendence the work was carried to satisfactory completion. Mr. J. G. Brown was the contractor, and Mr. Thomas A. Bryden clerk of works.

The cost was as follows :

Site .....	\$ 7,000.00
Building .....	29,355.05
Drains .....	1,942.08
<hr/>	
TOTAL,	\$38,297.13

## THE PEMBERTON GYMNASIUM.

The three thousand dollars placed at the disposal of the Board of Trustees by the generous bequest of the late J. D. Pemberton, Esquire, has been entirely expended in the erection of the building known as the Pemberton Gymnasium. It is a building 36x76 ft. constructed of brick with sandstone foundation walls which extend to the floor line; the trimmings are of cement; the cornices of brick and galvanized iron, and the roof is shingled. The dressing rooms are provided with marble-topped lavatory basins. The gymnasium is amply lighted by windows in the side walls and also by a large skylight. All the interior walls are wainscoted, painted and hard finished and the entire interior wired for electric light. The total cost, exclusive of furniture and gymnastic apparatus was \$3,000.00. The building was constructed from the plans and under the supervision of Mr. A. C. Ewart, and it is to-day one of the best arranged and most complete buildings for the purpose to be found in any city on this western coast, and is designed to remain for succeeding generations a monument to the memory of the benevolent donor.

**Statement of Lands and Buildings held in trust by  
Corporation of the City of Victoria for  
Educational purposes.**

---

**HIGH AND CENTRAL SCHOOL**

Consists of High School and Boys' and Girls' Central School and the Pemberton Gymnasium Building.

**TOTAL NUMBER OF CLASS ROOMS, 22.**

**AREA OF GROUNDS,  $7\frac{1}{2}$  acres.**

**LOCATION :—**School Reserve bounded by School and Yates Streets, and Fernwood Road and in part by Fort Street and private property abutting thereon, as shown on the Victoria City official map.

**FIRE INSURANCE** on buildings and furniture \$30,000.00.

**SOUTH PARK SCHOOL.**

**NUMBER OF CLASS ROOMS, 8.**

**AREA OF GROUNDS, 150x203 feet.**

**LOCATION :—**Facing Beacon Hill Park, on the corner and north side of Michigan Street, James Bay.

**INSURANCE** on building, \$20,000.00.

## NORTH WARD SCHOOL.

NUMBER OF CLASS ROOMS, 8.

AREA OF GROUNDS, 2 acres.

LOCATION :—Lot 12 on Douglas Street, between Hillside Avenue and King's Road.

INSURANCE on building, \$20,000.00.

*All the foregoing Schools are built of brick, and those following of wood.*

## JAMES BAY WARD SCHOOL.

NUMBER OF CLASS ROOMS, 4.

AREA OF GROUNDS, 120X120 feet.

LOCATION :—City Lots 932 and 933, situate on the north side of Kingston Street, James Bay.

INSURANCE, \$2,500.00.

Not at present occupied for Public School purposes.

## HILLSIDE WARD SCHOOL.

NUMBER OF CLASS ROOMS, 4.

AREA OF GROUNDS, 100X133 feet.

LOCATION :—Lots 135 and 136, Map number 10, Block 10, Hillside extension of the Work Estate situate on the south side of King's Road.

INSURANCE, \$2,500.00.

Not at present occupied for Public School purposes.

### ROCK BAY WARD SCHOOL.

NUMBER OF CLASS ROOMS, 2.

AREA OF GROUNDS, 120X120 feet.

LOCATION:—Lots 10 and 12, Block H, Harbour Estate, situate on Turner Street, Rock Bay.

INSURANCE, \$2,000.00.

Re-opened as an adjunct to the North Ward School with two teachers on January 7th, 1895.

### SPRING RIDGE WARD SCHOOL.

NUMBER OF CLASS ROOMS, 5.

AREA OF GROUNDS, 135X119 feet.

LOCATION:—Lots 25, 26, 27, subdivisions of Sections 50, 51, 52, 53, 66, 67, Spring Ridge Map 205, situate on the east side of Chambers Street.

INSURANCE, \$2,450.00.

### VICTORIA WEST SCHOOL.

NUMBER OF CLASS ROOMS, 4.

AREA OF SCHOOL GROUNDS, 1 acre.

LOCATION:—Lot 33, Map 52A, Springfield Estate, Section xxxi, Esquimalt District, situate on the west side of Front Street, Victoria West.

INSURANCE, \$4,500.00.

The Baptist Mission Hall, Henry Street, Victoria West, is occupied by the Board at a monthly rental of \$10.00 as an adjunct to the Victoria West School for the accommodation of one class.

### DUTIES OF JANITORS.

1. They shall sweep out the school rooms, halls, stairways, etc., after school hours every day ; dust off the seats, desks, window sills, black board ledges and other places where dust may accumulate before school opens each day.

2. They shall wash out each school room, hall, etc., as often as required by the Principal, not exceeding ten (10) times each year.

3. They shall sweep out the closets daily when the schools are in session and wash them out as often as required and as directed by the Principal ; where dry earth closets are used they shall supply the pans with fresh dry earth and report to the Principal any neglect on the part of the scavenger. They shall also see that the water system in closets works effectually and report any failure promptly to the Principal.

4. They shall wash out ink-wells and refill the same as often as directed by the Principal.

5. They shall make fires during cold weather at such hours in the morning as to have the rooms heated to 65 degrees Fahrenheit half an hour before school opens.

6. They shall give timely notice to the Secretary when fuel is required and shall receipt for the same when delivered ; they shall keep in such places as may be designated a supply of fuel for the respective rooms for the day. Those in charge of schools heated by stoves shall remain in charge of the school building until the arrival of the Principal and resume charge when school is dismissed. They shall also clean all stoves and take down and clean all stove pipes as often as required.

7. Caretakers in charge of furnaces shall keep up fires whenever required by the Principal, attend to the regulators and radiators and do such other work as may be necessary, and not leave their respective schools during school hours, without the consent of the Principal.

8. They shall see that the windows, doors and gates are securely fastened when the schools are not in session, and promptly make such repairs as they are able to make, and report to the Principal all other repairs needed.

9. They shall have care of the school grounds and be responsible for their general appearance and condition. This care to include cutting weeds, grass, general care of trees and such other work in connection with the grounds as may be required.

10. They shall promptly report to the Principal any writing they may see (obscene or otherwise) on or about the school premises.

11. They shall do all the ordinary repairs in and about the schools, such as replacing broken panes of glass, fastening loose seats or desks, keeping window blinds and wall maps in order, etc. The materials for these repairs will be furnished on application by the Secretary.

12. They shall keep the snow clear from all approaches to the schools and other buildings, and remove snow when required from flat roofs, and shall do other such work as may be required of them by the Trustee Board.

By order of the Board.

B. WILLIAMS,  
Secretary.
