Financial Men Say That Task Undertaken Will Not Be Difficult.

[Canadian Press.]

New York, Dec. 20. - The information from Washington that the American Telephone and Telegraph Company has agreed to give up its interests in the Western Union, and to effect a reorganization to conform with the recommendations of the federal authorities, was no surprise to financial men, though unexpected at this time.

The telegraph and telephone combination has been under almost continuous attack since it was effected in 1909 through the purchase of the large Gould, Sage and Morosini holdings of Western Union stock by the American Telephone and Telegraph Company, in which the various Bell Telephone inerests have been consolidated.

Constantly Assailed.

Ever since that time the telephone combination has been under investigation by the department of justice. It has been constantly assailed by Clarence MacKay, because of the dis Company was placed in, through its alleged lack of the telephone facilities of its rival, the Western Union.

Independent telephone interests finding it arduous to compete with Bell companies, because brunk lines of the combination were losed to them, complained bitterly. embers of Congress from time time have proposed investigations, or urged the department of justice to act on general principles. "I have noticed Extra Men Join that the majority of deaths of children are among those of immigrant parents," he said. "I do not wish to insinuate that these children are not as rugged as the Canadian-born youngster, because that is not the case. In fact the child of the foreigner seems more rugged, and can endure more than the young child of he American continent.

"The cause of these deaths are the long sea voyage and other hardships that are trying on a grown person, and of course affect babies. The constant change and the cramped quarters that are experienced in many of the immigrant ships are not condusive to health. This will apply locally to almost the same extent as in a coast town," he concluded.

PAID \$400,000 FOR PAINTING BY TITIAN

Art Treasure Bought in England by Rich Cincinnati Woman.

[Canadian Press.] New York, Dec. 20. — A Titian with a notable history, one of the finest of the master's paintings, has been pur-chased by Mrs. Thomas J. Emery, of Cincinnati, from Sir Hugh Lane, the famous British collector, and sent to Mrs. Emery's home in Cincinnati, it was learned last night. The price paid

ls given as \$400,000. The painting is a portrait of the young son of Charles V. of Spain, afterwards Philip II. Titian kept the original until his death. It was for a time in the Padua palace collection, and later found its way to Munich, and then to London, so that although it was painted in 1550 it has had only four owners. Negotiations for its sale were begun in London only two months ago, and it arrived here reently on the steamer France.

One Thousand Londoners Will Work on Christmas Day.

The Christmas season means rush and hurry for many wage-earners, though most of them get respite in the joys of Christmas Day at home. But in the big cities an increasing number of toilers never get a chance to enjoy this "once a year" holiday.

A rough estimate shows that in London this year nearly 1,000 people will toil on Christmas Day perhaps harder than usual. They are made up thus: relegraph operators and messen-

Rev. Robert W. Norwood Says They Will Increase Church Attendance.

Declares That if Other Cities Can, London Can-Diversity of Opinion,

Diversity of opinion exists among ocal clergymen as to the relative advanages and disadvantages of the proposed project to have Sunday street cars in this city. The Advertiser secured the following views this morning:

Rev. W. J. Knox, First Presbyterian Church-If the citizens decided that they want Sunday cars, all well and good, but a guarantee should be given by the street railway company that all workmen engaged on the Sabbath will have one day in every seven off. Such privilege should not be left to the discretion of the employing company, it should be made compulsory.

Rev. Robert W. Norwood, Cronyn Memorial Church—I am very much in favor of Sunday street cars. I don't think it is fair that a wealthy man should use his motor car or carriage on Sunday and the poor man be forced to walk. I also think Sunday cars would increase Sabbath worship, as many churchgoers develop into absentees, if for no other reason, than that they live for no other reason, than that they live too far from their respective churches. When I was in Montreal I know our church would have gone behind, almost fatally, had it not been for the Sunday cars, which enabled the parishioners to attend. Opposition to the project has come from some quarters, and it was based on the fact that men would have to work on the Sabhath. In my opinion to work on the Sabbath. In my opinion that is a very poor argument. Ministers have to work on the Sabbath, and I look upon Sunday cars as a blessing. If Mont-real Toronto and Hamilton can have Sunday cars, London should too, Canon George B. Sage, of St. George's Anglican Church—I have nothing to say on the matter at present.

Professional Man Would Not Use Natural If It Was Possible To Secure Artificial.

FROM WALKERVILLE

Letters received by citizens with relatives in Paris and Walkerville, where the natural gas from Tilbury is used, do not make out a good case for the fluid.

The daughter of a prominent Londoner writes from Paris as follows: "You struck on a very sore subject when you asked about natural gas. Up until last Friday noon we had splendid gas for both lighting and heating. It had tremendous heat and I never used my oven with both burners turned full, and the light is a steady white light, and it also warms the room. It never blackened the silver or hurt plants, and I didn't find that it stained the ceiling any more than any other gas, but since Friday the company have turned on the new gas, which comes from Leamington or Tilbury, and is used in Walkerville and Chatham. It is horrible, unpurified stuff. The is horrible, unpurified stuff. whole of Paris is up in arms it. The smell makes you feel sick, hurts your throat, and causes dizzi-ness, and already big blotches are coming on my silver. I have the kitchen window open almost all the time I work there. I heard today two of the stores had to have their furnaces changed, the gas taken out, and people haven't used their grates since this gas was turned on.

Would Pay More.
"It is just a shame, so if the London gas is from the same well don't think of using it. It is much cheaper, 40 cents or 45 cents a thousand, and 5 cents cheaper when over 8,000 feet are used, but it is so strongsmelling I would rather pay more, and have artificial, any day."

Another letter from the same lady

"London would be doing a mad thing if it gets this gas. My throat is sore most of the time, and all the people here who can have it taken out are doing so. It really awful." The letter from Walkerville is writ-

ten by a well-known professional man and is as follows: "I will now endeavor to reply to your questions regarding natural gas as fully as I can. as I can.
"To begin with, the distance from Tilbury to London is not greater—if it is as great-as from Tilbury here. As you know, the same field has sup-plied Windsor and Walkerville for the last few years. Last year we had no trouble from breaks in the main, nor

were we bothered with low pressure.

"As far as the field itself is con-cerned, it doubtless will be very much shortened if the gas is carried to London, St. Thomas and Woodstock, as, I understand, is contemplated. The actual time that the gas will hold out no one is able positively to say.

"Regarding house lighting it is possible to light the house with natural gas, provided purifiers are used. These the local company install at their own cost, but I understand the company in London intend to charge for them, which charge will be in the neighborhood of \$10 to \$12 apiece. There is a very had odor from the gas, even with the smallest leak, and the chances are pretty good that there will be many leaks throughout the entire system in London, as the majority of pipes have been installed for such a long time. The pressure used with artificial gas is in the neighborhood of three ounces, while the pressure with natural gas is

Musc Change Stoves.

"The stove made for manufactured gas can be used with natural gas, but it has to be changed to a certain extent. This change will cost in the neighborhood of \$6 a stove. "Personally we would never have in stalled natural gas in the house if we had been able to continue with artificial gas. The natural gas tarnishes silver very rapidly, and increases work in this respect all over the house. The people who favor natural gas are of the poorer class who cannot afford to pay for the artificial gas, and the manufeturers, who can secure natural gas at

Provincial Scout Commissioner H. J Hammond, of Toronto, takes a most optimistic view of the future of the Boy Scout movement in Ontario. The coming year, he declared to The Advertiser on Friday, would see many marked developments clong the lines laid down by General Baden Powell for the furthering of the work, and he looked for a bright future, especially in London and Western Ontario, where the movement was still practically in its infancy.

'Are you finding a ready response to your recent appeal for men to take charge of the many new troops that are being formed?" he was asked.

He went into the other room, and determine the story of the station; would stand before the girl of the station; given himself the night to think. Soon he would stand before the girl of the station; soon he must answer her questions. What was he to do with the fortune that lay beneath the feet of the mayor of Reuton at this minute. He handled at this minute. He hardly knew.

He was ready to descend at last, and came into the parlor of his suite with greatcoat and hat. In reply to Mr. Car-gan's unasked question, he said: "I'm going up the mountain presently, to with our striking cook. "You ain't going to leave this inn, Ma-

They went out into the hall, and Mr.

and wraps.

"You must be nearly frozen," remarked
Mr. Magee, pityingly. "You and your maid

"Good morning," she said to Mr. Magee.
"Isn't it bracing? Have you been outside?

Miss Norton-Miss Thornhill," explain ed Magee. "Miss Thornhill has the sixth key, you know. She came last night with-out any of us knowing." With lukewarm smiles the two girls

shook hands. Outwardly the glances they exchanged were nonchalant and casual, but somehow Mr. Magee felt that among the matters they established were social resisting with a supplier with the social position, wit, cunning, guile and taste in dress.
"May I help with the coffee?" asked

"Only to drink it," replied the girl of the station. "It's all made now, you see."
As if in proof of this, Mrs. Norton appeared in the dining-room door with a tray, and simultaneously opened an end-

"A walk on the mountain in the morning," said Miss Thornhill quickly. "Splendid. I—"

"Wonderful," put in Miss Norton. "I, for one, can't resist. Even though I haven't been invited I'm going along." She smiled sweetly. She had beaten the other girl by the breadth of a hair, and she knew it. New glories shone in her eyes. "Good for you!" said Magee. The evil hour of explanations was at hand, surely. "Run up and get your things."

"Run up and get your things."
While Miss Norton was gone, Mr. Cargan and Lou Max engaged in earnest discourse near a window. After which Mr. Max pulled on his overcoat.

"Who am I," asked Magee, "that I should stand between you and health? Come along, by all means."

With the blue corduroy suit again complete, and the saucy hat perched on her blonde head, Miss Norton ran down the stairs and received the news that Mr. Max also was enthralled by the possibilities of a walk up Baldpate. The three went through the front door, and found under the snow a hint of the path that led to the shack of the postcard merchant. hack of the postcard merchant. "I do," replied Max, "and it nearly breaks my heart. But there's a little mattered in the more of the said of the ter I forgot to mention last night. Sus-picion is all right in its place."
"Where's that?" asked Mr. Magee.

Mr. Max tapped his narrow chest.
"Here," he said. So the three began the climb, Mr. Magee and the girl ahead, Mr. Max leering at their heels.

The snow still fell, and the picture of the world was painted in grays and whites. At some points along the way to the hermit's abode it had drifted deep; at others the footpath was swept almost bare by the wind. For a time Mr. Max kept so close that the conversation of the commonplaces of the wind and sky and

Covertly Mr. Magee glanced at the girl striding along by his side. The red flamed in her cheeks; her long lashes were flecked with the white of the snow; her face was such a one as middle-aged men dream of while their fat wives read the evening paper's beauty hints at their side. Far beyond the ordinary woman was she desirable and pleasing. Mr. Magee told himself he had been a fool. For he who had fought so valiantly for her heart's desire at the foot of the steps had falterdesire at the foot of the steps had fattered when the time came to hand her the prize. Why? What place had caution in the wild scheme of the night before? None, surely. And yet he, dolt, idiot, coward, had in the moment of triumph turned cautious. LONDON, SATURDAY, DEC. 20.

THE WESTERN UNIVERSITY. The Hon, Mr. Hanna, in his address at the medical students' banquet Friday night, made some pleasing refer- broke down, before friends turned cold ences to the Western University and its importance to the people of this section of the province. Particularly complimentary was he to the School of Hygiene and the work that was being sically better than these modern feasts done by that institution. Especially in of turkey and cranberry over furnacethe matter of analysis, and making tests of diseased products and material, he thought it fully the equal of the Government's department in Toronto. We have no doubt he was correct, and that work of this kind can be done as well in London as anywhere in Canada. His statement that so many physicians in Western Ontario passed by the London institute, and sent their work to Toronto, shows, however, a regrettable state of affairs. There is no reason why this should be done, involving, as it must, greater delay in securing reports-a matter of considerable importance at times. We have been told that one reason for this is that higher fees are charged in London than in Toronto. If this is true, it should be remedied; and the Government can apply the remedy, by requiring uniformity in this matter. The question of fees deserves consideration. While it is proper that suitable charges should be made for work done for the benefit of private interests, and commercial enterprises, there is no reason why any fee should be charged a physician for an analysis that is to assist him in his work of treating disease. In the case of poor people who can scarcely afford extra expenses when there is sickness in the home, it may result in their being deprived of needed help. Public institutions are and poor alike. And if there are fees eager to take advantage from fomentthat might hinder the work of the local institute in giving assistance in the treatment, of disease they should be

abolished. Another matter referred to by the Provincial Secretary leaves us in some doubt as to his meaning. He thought there was a waste of money and energy caused by the different universities in the province overlapping in their work. He seemed to think that tent that would be all right. It is Hanna would be correct.

But because a university becomes noted for one special line of study that does not mean that its other departments should be weakened. Such an institution is incomplete if it is only a classical or a mathematical school. If, for instance, Mr. Hanna meant to ing mayor of London. suggest that students might come to London for the benefits of the hygienic branch, and go to Toronto for a fuller arts course, and to Kingston for mineralogy, then so far as our own university is concerned we must take exception to the idea. We want the Western to be a fully-equipped educational centre in all branches. We want it to teach all courses with vigor and efficiency. We want private support and our share of the public money to make it a complete university. Not only in hygiene and physical research, but in arts as well. It has connected with it a good school of divinity, which the Anglican Church will take care of. It has a good medical school, which the profession of London has inaugurated, and brought into a high state of efficiency, and which the physicians in Southwestern Ontario will not allow to fail. But its arts department needs more help. There should be enough local patriotism to keep it in fair condition. But when there is a large amount of public money being expended each year by the Government for purposes of higher education, it is but right that the Western should not be neglected. Mr. Hanna was complimentary in his remarks last night. 'We shall look to him to implement his kindly feeling by using his influence in the Government to aid the Western towards its full development. We are quite willing to have it become noted for practical sanitation; but we want it to be a complete, all-round centre for education in all the arts and ciences.

WOMEN IN CIVIC AFFAIRS.

Militancy out of the question, London is to be congratulated upon the ganizations. For years the women entitled to vote on municipal affairs have failed to take advantage of their suffrages. This year the leaders of feminine thought in the city propose that none shall be negligent for want of active interest in municipal affairs

prompting. The influence women may bring to bear upon the seating or nonseating of civic representatives is a very considerable one. Several thousand of the gentler sex are entitled to him. vote for candidates and on various questions, and they will be urged by important, curacy. Only sovereign systematic means to come to the polls. pontiffs can pay such interest!

It has been said that a woman whose ruling passion is not vanity, is superior to any man of equal capacity. In their natures exist meekness, gentleness, wit, patience, faith and a finesse lacking in the male make-up. Their serious entry into public life will be a generous education for all and a development of civic high-mindedness. A home without a woman is no home, and a city with women in its public

affairs will be a better city. OLD TIME AND COMING TIME.

To the middle or older generations there is a magic in phrases like "oldtime Christmas," "old-time winter," 'old-time religion." Things used to be better somehow, before they had skinned their shoulder at the world's rough wheel, before the family broke up, or or departed.

And yet "the old-time Christmas with its blazing log, strong, fat goose, and frozen water jug was not intrinheated floors. A motor or even street car ride is better than grumbling at the window because of not enough or too much snow for sleighing. No doubt the Christmas of a hundred years from ganizations has been giving it as his now will be best of all. 'At any rate it will be different.

Santa Claus will have discarded his reindeer rig for a new model aeroplane. We shall all be putting on or off our wings like an overcoat or rubbers. Light and heat will be no privilege of the well-to-do, but a universal conquest over night and cold. Sun and moon may have become inessentiate in our New Jerusalem. War and poverty will be forgotten in a bigger and better Christmas, and the day will not be enjoyable to any merely because of being the only full feed and gambol of much.

Harriston Cigarette Bylaw.

To the Editor of The Advertiser:

Dear Sir,—I noticed in yesterday's daily papers that the council of Harriston had passed a bylaw fixing the license fee for the sale of cigarettes at \$75. The report concludes with this most important statement: "With the imposing of this fee it is doubtful if these seemingly harmless smokes can be purchased of this fee it is doubtful in the second ingly harmless smokes can be purchased in this town." The plain inference is, that the council of Harriston has power that the council of Harriston has power to make it impossible to carry on the sale of cigarettes in the town. If this may be done in Harriston, why not have a similar law in any other town, or city, in this province? I believe the members of our council in London are just as ready is fatal to all normal functions. So impressed by the evils of this habit were the members of our own Dominion Parliament that in July, 1908, an act to restrain the use of tobacco by young persons was passed. THE BROKEN TALE OF A DOG

Some Memories of "Mike" Hook and His Famous Canine Companion.

[Toronto Saturday Night.] Commercial and other travellers of decade ago must often recall, with mixed and vivid emotions, the personality of Michael Hook, once proprietor of the Tecumseh House, the leading hotel in London, Ont. Mr. Hook's idiosynerasies, o use a mild word, were many and varied, and were provocative of mingled amusement, inconvenience and indignation on the part of his guests, as for example when he would summarily turn out the lights in the reading and writing rooms at 9 or 10 p.m. and inform the occupants that it was time they went to their beds. Many stories are told of Mr. Hook's in-dulgence in similar tactics, but on one

occasion at least the tables were deci-

sively turned. Mr. Hook went to an up-

stairs room to reprove a party of revel-

Fifteen minutes later a passing police men heard loud cries and discerned a figure suspended from a second story window. With visions of suicide in his mind, he gave the alarm and with the night clerk went to the room in question, night clerk went to the room in question, where they were at once surprised and relieved to find Mr. Hook hanging out of the window at the end of the fire escape rope, which, however, encircled his rope, which, however, encircled capacious chest and not his neck. The unruly guests had overpowered the land-

piled all the furniture on the bed, and then decamped,
At some previous period in his rather diversified career, Mr. Hook had been on the stage, and at times he was wont to indulge in reminiscences of his histrioni rlumphs. A theatrical company, headed by an actor named Ned Howard Fowler, was stranded in London about twelve years ago, and Fowler left with Mr. Hook in partial satisfaction of his hotel bill, a nice little white dog. A few weeks later Fowler's troubles culminated in his suicide by poisoning in Cleveland. Seen through this mist of tragedy, the dog equired a new interest in the eyes of Mr. Hook, and in certain frequent moods

By a natural sequence of ideas, Mr. Hook would go on to speak of his own stage career, and particularly of a poem about a dog with which he had of thrilled vast audiences. But from excess of grief or some other cause, Mr. Hook's memory failed to recall the poem n its entirety, and he therefore supplied interjecting, "And some ch hiatus by thing." or, as he pronounced it, "An' sumpin'." Therefore his recitation would run somewhat as follows: thing." or, as he pronounced

Mount Brydges Man Leaves Judge

Macbeth Puzzling Case. Three wills, each naming different beneficiaries were left by John Williamson, of Mount Brydges, who died about two months ago. Now it is up to the county judge, Talbot Macbeth, to decide which of the documents will stand. The first will was made in 1902, the second on June 11, 1913, and the third on June 16, 1913. The beneficiaries in the first will are understood to be putting forward the claim that John Williamson was of un-

sound mind when he made the two later wills.

Judge Macbeth this morning ordered that all parties interested in the case be noticfid to prepare their claims, and as thirty days is allowed for the serving of these notices, the case will not come to trial until some time in February.

Almost two thousand years ago! Can we not pause for just five minutes in our busy day with all the bustle and cares that the preparation for a twentieth century Christmas entailslay aside all the duties and perplexities, sit down in an easy chair, close our eyes, relax our bodies, and let a little of the calm light of that first Christmas morning steal down through the dim centuries into the recesses of our tired hearts?

And what do we sampse as we sit thus with our heavy eyelids shut, and our minds determinedly quiet? First, a lowly manger with a tiny Babe lying therein, wrapped in "swaddling clothes"—a woman bending over him, her sweet, drawn face radiant with the joy of Motherhood. "And she brought forth her firstborn son and wrapped him in swaddling clothes, and laid him in a manger, because there was no room for them in the inn."

The scene changes. Out on the road that runs from Jerusalem to Bethlehem are three men mounted on swaying camels. All are gazing with intentness into the great vault of the Eastern sky, with its myriads of twinkling stars. Then swinnly one cries "I see the star!"—"and lo, the star, which they saw in the east, went before them till it came and stood over where the young child was. they saw the star they rejoiced -ith exceeding great joy."

Once more the scene changes. "And there were in the same country shepherds abiding in the field, keeping And all about the courtly stable watch over their flocks by night." Sim-Bright-harness'd angels sit in order ple, humble-minded shepherds they

Bare or Carpeted Stairs. to have your stairs covered with a carpet or to leave them bare, and should they be the same color as the woodwork if not covered?

ROSE RED. A .- The question of covering stairs is really one of individual preference for one sees them both covered and uncovered in the very best of houses. A good housewife says she prefers a bare stairway because it is much more sanitary and easier to keep the hall and stairs clean and free from dust. Another equally good housekeeper has her hall and stairs covered, "as it is so much more quiet." Velour stair carpeting is much in favor and runners (oriental) are frequently used when the flights are short. Stairways are done to match the woodwork and in a strictly colonial house the steps or treads would be mahogany and the back of the steps would be white, the spindles white and the hand rail mahogany.

Friends in Need.

Sincere gratitude is due to those who re giving their time and money providing food and raiment for those in want. The Lord Elgin Chapter of the Daughters of the Empire has generously supplied infants' outfits, clothing for adults, and a check for \$49.25 as a relief fund to be used by Miss Edwards (the senior nurse) specially for necessary nourishment and comforts when and where required. The Daughters of the Empire have always lent their aid and sympathy to the Victorian Order, and have aided materially in the growth of the work. Others who have most thoughtfully and generously contributed to the urgent needs are the Ladies' Aid of the First Presbyterian Church, the young ladies of the Bible class of the First Presbyterian Church, the mission circle of the First Presbyterian Church, the Helping Hand Guild, the Mothers' Union of Memorial Church, Miss Hamilton, Mrs. Vining, and many donations without names. Christmas in Many Lands

Christmas is celebrated in Norway, Sweden and Denmark to an extent unknown in many other lands. The celebration is not over until Jan. 13. In Norway Christmas Day is devoted to exchanging calls and good wishes. In every house a table is set with good things to eat, and every caller is expected to partake. There is a pretty custom of putting on the roof of a barn or on a pole near the house, a large sheaf of wheat for a Christmas dinner to birds, for the birds are loved and protected in Norway. Not a peasant will sit down to a Christmas dinner within doors until he has first raised aloft a Christmas dinner for the birds in the cold snow without,

In Spain the customs and ceremonies of Christmas are those of the Catholic countries, and are of deep religious significance. children of Spain are not familiar with the gorgeous Christmas tree nor do they hang up their stockings for gifts on Christmas Eve. Their substitute for these pleasures is that of the Nacimiento—the hiding of shoes and slippers. None of the Spanish children have Christmas trees, neither do the poor, their only Christmas toy being the Child Jesus in the cradle with animals of the stable, and the wise men or angels, perhaps made of some painted clay.

To make the Russell completely comfortable was our aim. That we have succeeded is shown by the wide-spread adoption of many features which we pioneered a year ago.

By a clever, exclusive arrangement, we utilize the heat of the exhaust gases to warm the tonneau. The value of this feature in our severe Canadian winter is apparent.

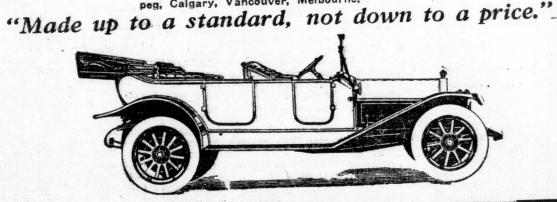

"I was at the rugby match at Ottawa," said a prominent owner of a Russell Six. "It was a bitter day. My friends could not see how we were able to sit in comfort in our open car, while they found it unbearably cold in their limousine. I explained the Russell Heating Systemhow by running the engine slowly the car was most comfortably warm the whole afternoon."

The Russell rear windshield, too, is a wonderful help in protecting the tonneau occupants from dust and biting winds. It is an original Russell feature-now widely copied.

Nothing less than complete comfort, as embodied in the Russell-Knight should satisfy. Russell owners-not merely pleased, but enthusiastichave voluntarily written these fine letters.

Gentlemen-

It may be of interest to you to know that I am very pleased with my Russell Knight "28," purchased from your Company last spring. All being well, I hope to have a second car of your make next year.

One cannot say too much of the comfort of your "28"; it surely has no superior, is a very smooth operating car and easy riding.

I desire to express my fullest recognition of the quality of the Russell-Knight Car, and bespeak for you continued success.

Yours truly, (NAME ON REQUEST.)

Players After Money Now.

The time is coming when professional booken with invade every aity and town.

The passing of Harry Lecky, the local O. H. A. star, to the professional ranks, may influence several other local hockey stars to make the jump. Considerable pressure is being brought to bear on a couple of London's fast intermediate players by Toronto N. H. A. teams, and flattering offers are being made daily to them.

The passing of Harry Lecky, the local playing in an amateur league.

Despite the fact that hard times are threatened there seems to be all kinds of hockey money floating around, and some of the offers made to local players are exceedingly attractive. It is a great temptation to an amateur player to make the jump when he is offered \$700 or \$800 for two or three months' work on the ice. It looks like pretty soft money

H. G. Hammond, of Toronto, provincial H. G. Hammond, of Toronto, provincial secretary of the Boy Scout movement, addressed a large number of the Scouts of this city at a Christmas rally held in Cronyn Hall Friday evening. A splendid series of slides, illustrating the doings of Scouts in other cities in Ontario was shown, and was the means of arousing much enthusiasm among the boys.

Following the rally a business meeting of the local association was held, and Mr. Hammond addressed the scout-masters on the necessity of training for scout officers if good results were to be obtained from the boys. The rector of the cathedral, Rev. Canon Tucker, also spoke a few words of help and encouragement.

of Stores Finds Buying

Fully as Good.

Mercantile conditions in London as re-ported by R. G. Dun & Co. are excep-tionally good. Its weekly report has this A canvass of the principal retail stores shows that holiday goods have been sold fully as freely as last winter, but those lines known as seasonable winter wear have not moved off owing to the continued mild weather. The purchasing power of the people in this section, of which 25 per cent come in from the country, shows very little diminution; the complaint of poor retail trade seems directly attributable to the unseasonable weather, and is confined to clothing, fur and shoe firms principally. Manufacturers are operating on short time in some lines, but few hands have been laid off. Collections fairly good. One small

failure this week.

London reports to Bradstreet's business conditions are unchanged. Peo-ple are buying early for Christmas needs, and sorting orders have been satisfactory at wholesale drygoods and grocery houses. Produce markets have been active and firm. London industries are in a healthy condition though not quite as active as might be desired.

A sad feature in connection with the death is that the wife may be unable to attend the funeral. At this season of the year the boats, which connect Manitoulin Island with the mainland are discontinued, and the inhabitants necessarily must wait for the formation of ice before they can cross channel. A telegram was sent to his evening and funeral rangements will not be completed, pending a reply. One son survives.

The temperance leaders, he said, had refused to accept the proposal of the Government to make a fifty-thousand minimum vote a condition of the plebiscite. When proposal to make the minimum vote forty thousand was made, their consent was so grudgingly given that he feared they would enter the fight with faint hearts, which would be an un-

necessary handicap upon the plan.

The Government supporters agreed to the withdrawal of the bill without question, but E. C. Tate, Lumsden, a. Opposition member, expressed strong disapproval of the Government's action. The Legislature prorogued this evening.

New York, Dec. 20.—A London cable to the Herald says:

The feeling in shipping circles here is absolutely approach to an Atlantic retains. solutely opnosed to an Atlantic rate war. Inquiries show fears are entertained that this will be the result of the attitude of the two big German steamship companies, the Hamburg-American Line and the

North German Lloyd.

All the steamship lines engaged in the ransatlantic trade may be involved in a suicidal rate war early next year. A prominent official of one of the largest Liverpool lines in the Atlantic trade said yesterday that although the situation is undoubtedly serious, he is not without hope that the level-headed businessmen who are managers of the various transatlantic steamship companies will recog-nize the futility and foolishness of such a cut-throat procedure as a rate war.

The heads of the shipping companies declined to make a statement. A conference between the companies concerned will be held in Paris next month, when it is hoped some way out of he difficulty may be found.

Petatoes a Slow Offering-Egg Prices Firm-Hay Quiet.

The local market was a recordbreaker today. Previous to nine o'clock this morning the greater part of the square was covered with wagons and trading was brisk. The offering in all lines is large, particularly in poultry.

Chickens are a large offering at 14 cents, ducks are 15 cents, turkey 19 to 22 cents, old fowl, 11 to 12 cents; geese, 13 to 14 cents. The demand for fowl is heavy, the low prices being mainly responsible.

Potatoes are a rather slow offering

today, when compared with other fast-selling commodities. They are selling at 90 cents to \$1 wholesale and \$1.05 retail. Other vegetables are as listed. to 42 cents. The demand is unusually heavy, and this fact has caused the prices to advance a little. It is expected that by noon with an increased offering the price wil drop to yesterday's mark of 38 to 40 cents.

Butter is firm, and an average offer-Offerings in all grades are good. Prices are as listed. Oats are steady since the temporary easing of Wednesday. They are selling for \$1 to \$1.03. Wheat, as usual, is firm at 85c to 86 per bushel.

Apples are somewhat brisker this

week than for some time past. They are selling for \$1.75 to \$3 per barrel. No change has been recently felt in the price of dressed hogs. They winnipeg Railway are selling at \$11.25 to \$11.75. Hollinger Railway dressed meats as listed.

Live hogs have been quiet on the will likely result Monday, when there will likely result Saturday, when there may be an increase in activity. This week's price is \$8.00. Cranberries are selling at 12 to 15 cents by the quart. Walnuts are 20 cents: hickory nuts, 10 cents, and

chestputs 15 to 20 cents. Christmas decorations are much in evidence. Trees are selling for 25 cents to \$1.50. Holly is a large offering at 15 to 20 cents per pound. Other prices are as listed: Grain, Per Cwt.

[Special to H. C. Becher.]

New York, Dec. 20.—A renewal of bullish activity, engendered in great part by the more friendly attitude of the Administration, as evidenced by the decision to

tration, as evidenced by the decision to permit the American Telephone and Tele-graph to divest itself of its holdings of Western Union, and to conform to the We have felt for quite some time that any encouragement from Washington would be quickly reflected by a marked change for the better in sentiment, not only in financial circles, but also in commercial and industrial spheres. Shorts have covered rather freely but the outstanding ered rather freely, but the outstanding interest continues large, and signs are not lacking of a disposition on the part of investors to take hold of good securities. Of course, reactions will be witnessed from time to time, but we believe that the cur-rent has been definitely turned insofar as the stock market is concerned, and that a new order of things is in the process of

MAY ENTER COUNCIL

T. G. Turnbull, of Komoka, Being Urged to Run for County Honors. T. G. Turnbull, of Komoka, is likely o become a member of the county council for 1914. He is at present the county representative in the hospital trust, and was for several years a member of the council under the old system. His friends are exerting considerable pressure to have him run again this year, and it is probable that he will accede to their request.

Reeve John McGugan, of Lobo, has announced his intention to retire from municipal life at the end of this year. Deputy Reeve McDougall will be a candidate for the reeveship, and far no opposition has materialized. The vacant deputy reeveship will in all probability be contested by Councillors J. McNab and D. Campbell.

Personal Mention

George Ironside has returned from ronto, and will spend Christmas with his parents in London Township "Open House." - The Hermitage Club kept open house on Friday evening. Following an enjoyable dance in the ballroom of the Dominion Savings building, lunch was served in the club rooms, where there was a Christmas tree, with gifts for the members and their friends. Presentations were also made to two members of the club, Dr. Moore and Victor Smith.

Brauly-Bemley.-Rev. S. Anderson vesterday afternoon united in marriage at the Memorial Methodist parsonage, Arthur Lewis Brauly, of Stony Mountain, Manitoba, to Miss Ethel Winnifred Bemley, of London. The couple will make a short honeymoon to Toronto, and then proceed to Stony Mountain, where they will make their future home.

ONE LETTER PER PERSON.

Some faint idea of the amount of work involved in the operations of the London postoffice may be gained, when it is stated that on ordinary days be-tween 50,000 and 60,000 letters and parcels are handled daily. this number, Postmaster Macdonald is of the opinion that slightly the greater number are represented by incoming mail Letters make up, of course, the greatest proportion of both incoming and outgoing mail. On some ordinary days as many as 70,000 pieces of mail, not including periodicals, are handled, and at Christmas and other holiday imes the amount is sometimes doubled or nearly trebled. On the average, however, it is estinated that slightly above one letter or parcel is received or sent out in the local postoffice for each man, woman or child. resident in the city.

Inspector Piper, in Statement Issued Today, Shows That Increase Over Last Year Is Already \$643,512, and More Permits To Come In.

Building Inspector A. M. Piper issued a statement today showing that Dec. 31 will end a record year for the building trades in the history of London. Last year was the record year up to that time, but this year's business steps completely away. Up to today, 1,445 permits have been issued during the year, totalling \$1,779,620, and there are yet a number of small permits to come in. The total in 1912 was \$1,136,108, so that the net increase to date is \$643,512. It is expected that by the end or the month permits will run very close to \$1,800,000. which was the goal set at the beginning of the year. follows:

This year's permits were issued as January February 22,945 March 82,899 August September 191,340 October 165,746 as follows:

ber of additions, barns, garages, and other small buildings were made up Factories and warehouses, 9 permits\$438,500 Stores and office buildings, 7 Hospital additions, 1 permit ... 13,000 Dwelling houses, 335 permits ... 733,091

HELEN KELLER COMING

When Helen Keller made her debut as a public speaker, the press of the country announced the event as one of the greatest achievements of recent times. The girl whom Mark Twain had bracketed with Napoleon as "the other most interesting character of the nineteenth century"; whom Edwin Markham had hailed as "the most interesting being on the planet"; whom Edward Everett Hale, Dr. Alexander, Graham Bell, Richard Watson Gilder and Oliver Wendell Holmes Watson Gilder and Oliver Wendell Holmes watson Glider and Oliver Wellider Folkies had claimed as "the marvel of the day in which we live," suddenly added another to her list of accomplishments and appeared as a public lecturer. That she has been successful in her attempt has been proven by the advance demands for section of the provinced public hearing seats at every announced public hearing and by the return engagements made as soon as the first appearances have been recorded. Miss Keller's first appearance is announced for Jan 10 in London, under the auspices of the London Froebel Society.

COMING PLAYS AT GRAND

At the Grand this afternoon at 2:30 Perry's Players will present the comedy uccess, "The Travelling Salesman." This play requires no introduction to ondon theatregoers, as it was presented ere last season to a delighted audience. Tonight they close their engagement with that comedy drama, "A Royal Prisoner.

This company have been playing hroughout Canada and the United States this season, and they certainly have pleased their audiences with the clever offerings they present. Funny Dan Malloy and dainty little Hazel Corinne will appear with the company in the leading roles, and they are supported by a very capable company of well-known players who put the plays on complete in every detail, and it is positively the played anywhere at popular prices. New and novel vaudeville specialties will be presented between the acts by different members of the company.

"Les Miserables."

Accounts of the Two Municipalities.

Peace has at last been declared between the city and London Township in regard to the annexation of Pottersburg, Ealing and Knollwood Park. The treaty was ratified at a meeting of the finance committee of the city council and a special committee of the township council at a meeting in the county buildings Friday afternoon after five hours of strenuous contention. The terms of the agreement reached Friday afternoon are as follows:

The city is to pay the township \$1,400 for the Ealing school, the city to assume the debenture debt, \$1,400.20 for the Potters-school under the same conditions. To offset this, the township is to pay to the city a pro-portion of the cash on hand at school section No. 23, amounting to \$615.55, and a similar sum of \$650.04 from Knollwood Park school, making a total of \$1,265.39. This, deducted from the amount payable by the city, leaves a balance of \$1,534.81, which the city will pay over to the county to square ac counts. The other sums in dispute were found to very nearly offset each other, and were arranged as follows:

Riley Will Not Be Overlooked During Holiday

More Than Sympathy at Christmas.

From present indications it seems certain that Thomas Riley will receive something more than sympathy at the Christmas season. The man who is at present in the county jail awaiting trial on a charge of having murdered George Blackburn has made many friends during his imprisonment, who Other Claims Met by Contra will see to it that he is not overlooked at this time of general goodwill.

Although the seriousness of the situation in which he is placed precludes his enjoyment of the Christmas season in the way of others more fortunately situated, Riley has adopted a most cheerful attitude, and his optimism is the subject of comment among the jail officials. Governor Carter states that he is a model prisoner, and gives

absolutely no trouble. He apears to be much more cheerful than when he was first imprisoned. He likes to see visitors, and frequently holds friendly chats with people who visit the county jail. The members of the county council and the grand jury all held a little friendly talk with him when looking through the jail during the eary part of this

Rev. H. H. Bingham, his spiritual adviser, visits him regularly, and frequently brings him books and periodicals, which Riley spends much of

his time in reading.

The prisoner's cheerfulness under distressing circumstances, has won great sympathy for him throughout the city, and the hope is expressed by many that the charge against him may be reduced to one of manslaughter.

London Organists Arrange Splendid Christmas Music Services for City Churches

Will Present Best Programs Ever Heard in Music-Loving City On Christmas Day and the Two Christmas Sundays That Will Mark Christ's Anniversary.

have the church organists and choral directors of London arranged so excellent musical programs as London church-goers will be privileged to hear this Yuletide. Several of the Anglican churches are holding their special musical services on Christmas Day. Dec. 25. Severat of the other churches will observe Dec. 28 as Christmas Sunday, but the majority of them will hold special Christmas

Bervices: tomorrow. Christmas decorations, wreaths of holly and mistletoe, crimson ruscus, Christmas vine, greeneries of cedar and other evergreens, lilies, paims and flowers will make fairylands of the auditorium of many of the churches. Augmented choirs, special musical numbers, including in some cases anthems and other choral numbers never before heard in London, will make the Christmas services especially attract-

Chords of Infinite Soul. What heavenly music of the spheres, singing together is said to have been heard that night, human imagination cannot fancy, cannot reconstruct, but minor chords, minor perhaps in the symphony of that historic night, but yet paeans of celestial harmony to human ears today, have been caught from the great Infinite soul of music by master componers of subsequent times, and many of the finest Christmas compositions of Mendels-Saint-Saens. Handel. Schumann, Beethoven, and others have been selected by London organists and choirmasters for their Christmas services this year, and Londoners who are fortunate living in a city widely noted for its church music will no doubt fully ap-

preciate this advantage, and turn out en masse to the services on Christmas Day and the two Christmas Sundays. St. Paul's Cathedral. F. G. Killmaster, B. A., Mus. Russian Class Reception. The members of the Epworth League

of the Hill Street Methodist Church entertained the young men and young women of the Russian class, who are receiving instructions in English in connection with the church, on Friday evening. The regular English class was held first, and the Leaguers, who were present, were much surprised to hear the young Russians read page after page of the Canadian "Primer with fluency, showing the splendid progress they are making.

After the class an interesting pro-

gram of solos, addresses, recitations, and duets was given. Then came refreshments, tasty and abundant. And before the meeting closed each member of the class was presented with a good-sized bag of Christmas comfits. In this practical fashion are the young people of Hill Street looking after their own "Santa Claus" work, bringing cheer into the spirits of "The strangers within our gates." class is growing in numbers, and the English lessons will be resumed early

Just What Stores Come Under Provisions of Law Seems Doubtful.

250 SELL GROCERIES

Of This Number, However, Only 196 Are "Straight Line" Grocery Shops.

Just how the grocers' early closing bylaw, put through at the last meeting of the council, is to be enforced is a matter that is troubling a large number of grocers in the city. Under the bylaw, all grocery stores are required to close at 7 o'clock each evening, in-cluding Saturday, and not to reopen until 5 the next morning. According to the city clerk, there are

196 grocery stores in the city, and the petition asking for the early closing bylaw was signed by slightly more than 75 per cent. of them, this percentage being necessary in order to Council Rushed It Through.

Although Ald. J. G. Richter, Frank Glass and one or two others wished further information on the subject, and desired that some of the tangles of the proposal be unravelled. before final action was taken, the council put the measure through, with many features of the puzzle remain-

ing unexplained. Though there are but 196 stores in the city which may be correctly term-ed grocery stores, there are in the neighborhood of 250 shops which sell few cases, sign the petition for early groceries. This latter figure includes closing, and were not taken into ac-

The flooring was made of split logs, and the roof of clapboards. We had no nails to fas-ten them down, and so young saplings were used. Glass was out of the question for windows. There were just holes covered with cloth and blankets were hung for doors. The climate was not as cold then as now. The great bush broke the force of the wind and kept the snow from drifting. But many a morning I awoke to find a fall of the beautiful on top of the blankets.

A Hard Life.

"The settlers had anything but an easy task to clear off the land. Giant trees were chopped down and burned. Then between the big stumps a little corn, wheat and potatoes were grown. The timber burned in those days would be worth a fortune now. But such is life. The wolves were a terror in those days, and showed an extra liking for cancken and sheep. The dogs were afraid to tackle these brutes, and would come flying under the blanket in the doorway into the house when chased. Bears, foxes and wildcats, too, were numerous, but were not so venturesome nor so destructive as the

METHODS WON RIGHTS FROM CZAR

How Ways of Militants Were Successfully Used by Russian "Politicals" Long Before the Day of the Suffragettes.

STORY FROM INSIDE TOLD ADVERTISER BY ONE WHO WAS THERE

Mr. S. L. Davis, of this city, is probably as familiar with and well versed in the Russian revolutionary movement as any Canadian, having been connected with it since his childhood. He has spent nearly two years in Russian prisons because of his activities in the fight for freedom. About eight years after effecting his escape from the last prison he was confined in Mr. Davis came first to the United States, and some four years later to Canada, since which he has resided in London for the last three years or more. One of the experiences which Mr. Davis has gone through was a hunger strike that lasted for six days. It is often erroneousv supposed that the hunger strike

practiced many years earlier by Russian political prisoners. Libraries in Prisons.

Some of the Russian prisons fairly comfortable, and the prisoners are confined in fair-sized rooms, with libraries of good books to read, the chief hardship being the isolation from their fellows and the poor food which is supplied them. Usually their friends are allowed, however, to bring them food. The hunger strike which Mr. Davis went through was called because following the escape of a pris-Take another case and a very simple oner, the privileges hitherto allowed fore it ended by the restoration of the you would have a revolution in Eng-land tomorrow, and rightly so. privileges which had been cancelled, several of the prisoners, totally exhausted by lack of food. had been taken to the hospital.

Won Their Fight.

According to Mr. Davis it was a highly exciting moment when one of announced, "Well, gentlemen. I think we are going to meet all your demands." The strike was over, and the prisoners, almost too weak to speak, and scarcely able to stand on their cumstances, that won for you and for realization of victory, embraced each and shouted. COMPARES SELF-SACRIFICE

The clamorings and violence of the British suffragettes have found an eloquent advocate in Israel Zangwill, the gifted romancer of the Ghetto. In the English Review he treats their imprisonments as martyrdom and compares their self-sacrifice to that of the Japanese patriot who commits harakiri, or the women who welcome the suttee as the shortest way to reunior with the object of their love. In Mr Zangwill's eyes they are heroines, stoned and beaten, ducked in horseponds, obscenely maltreated, imprisoned with drunkards and pickpockets, sentenced to penal servitude, loath-

ance and practical genius of a St. Catherine of Siena with the determination of a hustler and the logic of a bachelor of laws. There is, perhaps, something of Manchester in her machinelike rigidity. But it gives her the invaluable quality of decision. And never was this quality exhibited more finely than in her handling (from her Paris exile) of the problem of bringing out the Suffragette when printer after printer was warned off by the Government. Her refusal to let the Labor party print it was a master-stroke. Christabel's Creed.

"Inferior to her mother as an orator, despite her vivacity and charm, and only occasionally touching the same high note of religious simplicity, she seems to have carried away the graver and greater figure by her cocksureness. It is the young generation kicking at the door. 'When should the Government give us the vote?' 'Today!' That is the note of Christabel. That the Government would risk an internal crisis that might overthrow the still unstable results of many sessions, that the Irish and Labor parties are only pursuing the same single-eyed system as herself, does not diminish her resentment at not being served first. There is nothing she despises so much as the M. P., she has told us. nor is Parliament a career she would ever contemplate. That sounds like a touch of masculine inconsequence, the one breach in the relentlessness of the female logic."

Of their contempt for suffering, their defiance of death, their daring and persistency, Mr. Zangwill says:

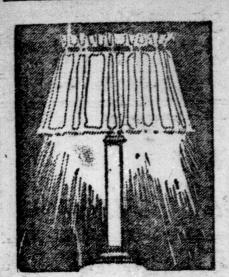

"Hari-kiri, the one resource of the suffragettes, turns out to be their strongest weapon. Englishmen are not so brutish that they can bear the sight of martyred innocence. heroic suicide of a lady of wealth and station on the public doorstep of the Derby is worth a wilderness of fires, and the cross that was borne before her body at the great funeral was a more victorious symbol than the hammer. LADY FESSENDEN

The Game of Fighting the Commonplace Turns Romance Into Reality.

BY GELETT BURGESS

(Copyrighted, 1913, by the Newspaper Enterprise Association.)

As Myra stood, her hands behind her, her back to the long wall, awaiting the confusion of the rush hour, the sordidness of the restaurant struck her anew. This pause, after the butter pats were arranged, the pies quartered and the salt-cellars filled, while she waited for the hurried, fretful throng to pile her tray with orders, gave her plenty of chance for disgust.

So, as she waited, she took up her game and fought the Commonplace. It was a child's game, but through this last, slow year of poverty, she had developed it with so much detail and fancy that it had been something of a resource against despair. The finespun, fair brown mass of hair that tumbled about her low brow, the wondering gray eyes, the absurd little nose, the dewy, parted lips and triangular have the name put to her, audibly, chin made up the wistful face of Myra Long, the quickest and deftest of all the black resumed her and deftest of all plied. the black-gowned waltresses at Hepp- plied. ner's Quick Lunch, the only one whose whimsical droll face did not attract the flirtatious familiarity of the bolder customers. But it was not Myra Long who now stood with her back to the

wall. She had gone off in a day-dream. It was Lady Fessenden, instead, who, seeking diversion and sociological material, bored with her estates in Kent, her servants and her circle of society, had taken up the absurd whim which brought her into contact with the Lower Middle Classes. It was Lady Fessenden, also, who, after having taught school at North Summit, had come to New York to seek for a place on the stage, and who, sinking lower and lower in her ambitions, had at last found a position where she would not,

at least, have to starve.

And so, in New York, in her little hall bedroom on West Twenty-fourth street, she still bravely kept up the pantomime that went on in front of her wobbly mirror that were impossible here in the restaurant. But even at Heppher's Lady Fessenden was not She was watching for a champion to rescue Myra from the dragon of the prosaic. She had been captured by the Commonplace. It was time for a rescue, and so, as she waited, with her back to the long wall, she scanned the crowd for her errant knight.

That he did come, as she hoped, to her very table at Heppner's, and that she recognized him at a glance, proved Fessenden to be of the bloodroyal of Romance. He came in with an old man. He came in, to be plain, upon the front page of the Morning Dispatch in the form of a printed interview and a half-tone portrait of Hall Payson Prince, a South American explorer and archaeologist. The paper was left on the table, and Lady Fessenden pounced upon it and bore it

into the pantry.
With his light, drooping mustache, his firm, straight mouth and his sunwrinkled eyes, she felt as if she had known him for years. She read the interview avidly. In two minutes she had his story by heart, and his portrait in the bag at her waist.

She went on duty at 11 o'clock next day. At half-past ten she entered a public telephone booth and hesitatingly called for Mr. Prince's number. He answered himself-her beating heart told her that at his first word. Gasping for breath, trembling with sudden alarm at her impertinence, it was all she could do to speak aloud.

"Oh, Mr. Prince," she managed to say, "I do hope I'm not interrupting you-please tell me if I am. But I have something I'd like very much to say to you."
"Whom have I the pleasure of talk-

ing to?" he asked pleasantly.
"Well, if you must know, I'm Lady Fessenden," was her hesitating an-

"Lady Fessenden? I'm afraid you

have the advantage of me." "You're quite right, Mr. Prince, but I intend to keep it. I'll have to quite throw myself on your mercy, really." "What can I do for you, then?" There seemed to be a trace of amuse-

ment in his tone.

"It's a most extraord'n'ry proposal have to make, Mr. Prince. Really, I don't know how I dare. It would be, by dress, and her homespun manners of course, impossible at home, for a person of my position. But you Amer-icans have the name of being so chivalrous and romantic, I'm really curious to see if it's so. Of course, it's a highunconventional thing I'm doing, and all that sort of thing, but I'm depending upon your gentility not to misconstrue my motives. You see already strue my motives. You see already what sort of an opinion I've formed of you. I do hope you won't disappoint

"But I don't quite understand?" There was a ring of impatience in his

understand!" (Myra got that, almost verbatim from Henry James.) "I most beautifully don't understand myself how I can permit myself ever in the world to do it! That's the charm of it, isn't it?"

"Oh, it's charming! I perfectly agree!" Mr. Prince had at last begun

to play up.

Myra smiled in triumph. This was quite what he should say! Henry James was right. "Well, if it seems unconventional for you, an American, fancy what it must mean to me, an Englishwoman! You simply can't and mustn't on any possible account, ever in the world, meet me. That's the condition, the only one, on which I'm will-

ing to talk to you."
"Talk to me! Can't I see you about -whatever you wish to say?" "Am I quite, then, too barefaced about it? Am I an adventuress, do you think?"

"I'm sure I don't want to show any lack of gallantry," he replied. But, even yet, I don't quite get what you "Merely to talk to me. Is it too ab

"Oh, Lord Fessenden has been dead two years. It's quite safe as to HIM!" "I'm simply dying of curiosity al-

ready." "I can easily imagine that, seeing

now much I have myself."
"Then you really don't know me?" "I have never even seen you. How could I do anything so atrocious, else?" "Then just what, may I ask, IS to nappen?

'You're simply to talk to me whenever I ring you up." "Oh, if you only WILL!"

"I shall, tomorrow. Good-by!" The next morning Myra was again at the telephone booth. Mr. Prince bad evidently awaited her coming with some curiosity. His "Is that you, Lady Fessenden?" delighted her, though to

For fifteen minutes she was a lady -the lady of her dreams. Her audience inspired her with flights of fancy She grew delicately jocose, she rallied him playfully, she even taunted him with her advantage. Oh, she had him on the hook, surely enough, now! The surety of it went to her head. It was perilously exciting to have him take her at her own valuation.

"But just exactly why can't I be permitted to know you?" he asked. "My DEAR Mr. Prince," she answered, "it's simply not to be thought ofmuch less discussed. No matter how risk. As long as you don't meet me, quest. I'm safe. But fancy how it would compromise

"You might at least describe yourself!" he insisted.
"Well, I'm tall and willowy, a pronounced brunette. Oh, I suppose you'd admit I had a certain carriage and the grace of a woman of my station. Today I have a green velvet suft with military frogs of bronze and a picture hat. White gloves. An emerald necklace—but really not a bit gaudy." "It's your eyes I want most to know

"Oh, they're indescribable, my eyes. Green, of course-we're all wearing green eyes, this season. But I must positively go to my hairdresser's. Good-by!"

Such was the beginning. Every day, after that, she rang him up and they had a haif-hour's sprightly converse. Their talk soared to all heights of persiflage and fancy, and, as her confidence and her familiarity increased, she became more and more picturesque, holding his attention during en-

trancingly whimsical monologues. She had been buoyed so long by her dream, the excitement of this secret life had been so stimulating, that she had not noticed how the enmity of her fellow waitresses had been aroused. She simply did not regard them, except as supernumeraries in a drama where she played the leading part. It was long since she had even spoken

to them, except in the way of business. They had begun to resent it, and she was made the victom of all sorts of petty annoyances. A series of apparent accidents gave her the reputation, with Heppner, of being careless. This continued through the strategy of the other waitresses, till the proprietor, scenting mischief, and desiring to get out of it as easily as possible, summoned her to him and gave her her discharge. She walked out of the restaurant with seven dollars in her bag. The next day Mr. Prince was more

than usually eager. "See here!" he exclaimed. "Hasn't this thing gone far enough? You must have found out by this time that I'm a gentleman, and any experiment you have wanted to make must have been satisfied. I'm simply crazy to see you. Won't you, at least, come to lunch with me? You don't know how I admire you, and how much I want to see you, face to face Surely I deserve it, after the heroic

way I've behaved!" Again came the fierce temptation to have him to herself, if only once. Then the thought of her snub nose, her shabstrengthened her resolution. But she sighed before she answered:

"You poor, SILLY boy! It's no use simply CAN'T do it! If any of my friends should see me! A woman in my station of life can't afford it, even once. And the fact is. I've got to say good-by, today I've been called back to England. The earl positively insists upon my being there to settle some matters concerning the estate.

"Oh! You're really not leaving Nev York!" he cried. "And you!" she replied firmly. "Not till I ask you one question!"
"As many as you like," she said un

uspectingly. "Will you marry me?" She gasped. Then a smile illumined ner face, and she drew a deep breath.
"Oh, don't joke," she said. "It's goodby forever, I'm afraid." "But I MEAN it!" he wailed. "It's

one way of forcing you to reveal yourself, but I'm in earnest-I'll write it to you, if you like."
"You don't really mean to say-

she brokenly began. "Let me see you for ten minutes, and I'll convince you!" he exclaimed. "Oh, I'm quite convinced that—tha you're absurdly romantic."

Mr. Arch himself fell on evil days, and was preserved from extreme poverty by the efforts of his political friends. He retired from Parliament in 1900. "And I that you're charming, and adorable and sweet and—most possionately to be desired."
"And invisible!" she taunted. "Never mind the rest. Good-by!"

The Westminster Gazette has been calling out for action, and I notice that one of your local papers, the Man-chester Guardian—(laughter)—well, I will say this, the Manchester Guardian has been at times sufficiently offensive to myself, which I am able to bear, but I notice that for some time past they have seen the seriousness of the situation, and I give them credit for it. I notice that they say today that the Government are going to proclaim the importation of arms into Ulster. It is a good while since I drew attention to the fact that they have disarmed the Boy Scouts. (Laughter.) I don't know whether the pronouncement of the Manchester Guardian is correct. I desire to state tonight, so far as seriously. A few propositions. In the first place, there are three great parties you have to satisfy. You have first to bear in mind the United Kingdom its greatness by reason of the fact that it is the United Kingdom. And you have to remember that the Unionist party, of which at all events the ma-jority of you are members, has as its cardinal faith the maintenance of that union which they believe to be so essential to the greatness of the country. That is why Mr. Bonar Law has boldly declared that under existing circumstances and unless the people affirm this bill, the whole weight of Unionist party-in whatever course we are driven to adopt - the whole weight and power and force of the party will be cast in with the scales of Ulster. (Cheers.) Then you have secondly to consider Ulster itself. I have said something about it already, but, at all events, you will admit this; I think that as far as past history-goes Ulstermen have never shown themselves cowards. I leave the subject there. You have to consider the loyalists throughout the rest of Ireland. ships sailed every year for Spain. It (Cheers.) Do not forget them. They are even in a more difficult position on either side of the harbor mouth, and, than the people of Ulster. The Army's Duty.

There have been gross tures were made which Mr. Bonar Law misrepresentations of all our actions, but I think nothing more gross than and I entirely agree with him-that the way they try to represent our now they have been withdrawn, our dealings with the British army. No. I have said before and I say now-and in doing so I am merely associating myself with what fell from Lord Derby last evening or the evening before-I say this, that it would be a bad day for the country if the army under any circumstances were to refuse to obey the lawful orders of those who are put in command over them. (Cheers.) Of course they must. But it is for that very reason that statesmen and politicians ought to look ahead. It is for that very reason that statesmen and

politicians ought to know to what their acts lead. No one will blame the army for shooting upon Ulstermen. But the country will hold the Government that (Cheers.) You can control the Government. Recollect, the army is not the army of the Government; it is yours. (Cheers.) I have no doubt— and this is the real point -that our cause is so just, so unanswerable, so plain to the humblest man,

that the first time the Government goes and Scotland will arise and declare "You cheers.) I say to the Government that after all the army are human beings. Even today Sir Henry's raids and hoards have ships, as everyone supposed they would, not been forgotten, for just recently a party of Kansas City men set out on an expedition to Sabine Pass, Texas, where the bucaneer captain is said to have buried some gold a few centuries ago. Henry Morgan did not like home and therefore ran away to sea, but he was

sold into bondage in America by the ship's master. He soon escaped, however, from Barbadoes and went to Jamaica. It was there he started in the bucaneering business, and eventually demonstrated what W. S. Gilbert later announced that, "It is, it is a glorious thing to be a pirate king." After a trip or two on other men's ships and thriftily saving his share of the booty, Morgan went in with a number of other ambitious young pirates and bought a ship of his own. He was elected captain, and from that day on he continued to be captain of every expedition he attended.

Stormed Porto Bello.

His first big success came at Porto Bello. Porto Bello was a large Spanish town in Panama, whence the treasure was strongly fortified by two castles, one on either side of the harbor mouth, and, sorted races, he did not tell even his captains where he was going. A secret wasn't a secret if more than one man knew it, the astute captain believed. Not until the coast of Central America was reached did he pass around the word that Porto Bello was to be taken.

The ships themselves were left in a under cover of dusk, the pirates moved stealthily upon the doomed town, in long boats and canoes. At midnight, when no human sound disturbed the chorus of after England had concluded peace with the southern jungle, they reached Porto Spain, and as Morgan bore the title be-They seized a Spanish sentry-so Bello. him that he had no chance to cry out the ships of war in Jamaica," Spain deor to fire his flintlock. Governor Refused to Surrender. But this was only one of many castles. The fighting continued from dawn to noon of the next day. The Spaniards de. fended themselves gallantly. When Morgan's men tried to set fire to the doors o their castles, they hurled down great jars packed with powder. The governor of the town commanded the last castle that fell. Morgan tried time and again to take it; then he had great ladders built, so wide that three or four men could scale a ladder at once. These he forced the nuns and monks whom he had captured in Porto Bello to drag up and

place against the wall. "Then the pirates," runs an old accoun written by one of the pirates himself, mounted in great number, and with not less valor, having fireballs in their hands and earthen pots full of powder; all which things, being now at the top of the walls they kindled and cast in among the

Spaniards. "This effort of the pirates was ver great, insomuch that the Spaniards could no longer resist nor defend the castle, which was now entered. Hereupon they all threw down their arms and craved quarter for their lives; only the governor of the city would crave no mercy, but killed many of the pirates with his own hands, and not a few of his own soldiers because they did not stand to their arms. And, though the pirates asked him if e would have quarter, yet he constantly answered, "By no means. I had rather die as a valiant soldier than be hanged as a coward.' They endeavored as much as they could to take him prisoner, but he defended himself so obstinately that they were forced to kill him, notwithstanding all the cries and tears of his own wife and daughter, who begged him on their knees to demand quarter and

visit within a year. As a matter of fact, it was three years before he made good his boast. The capture of Panama was a far more renarkable achievement than that of Porto Bello. For Morgan and his men marched nine days through tropical jungles before they reached the city. Most of the time they had no food, for the Spanlards, who knew they were coming, drove every cow out of the country and burned or carried away every sack of grain. So reduced were Morgan's men that they ate strips of rawhide bags, softening the leather in between stones, then broiling it like

But the bill has been killed without prayers in aid.' Slap at Asquith.

Mr. Zangwill concludes with a slap at what he calls the shilly-shallying of the British Prime Minister:

'The errors of political novices adventuring in unmapped territory but offering their life for their cause will seem small to posterity in comparison with the Liberal leader's sin against Liberalism. That the protagonist of the people, the historic overthrower of the lords, should be genius of the woman's movement, is a tragic paradox. Mr Asquith is a statesman of grave and lofty conceptions and otherwise unblemished honesty, but his latest pose that there is little to be said on one side or the other is more amazing than his ancient antagonism. That was self-stultifying, but dignified; this is unpardonable frivolity. A recent cartoon in the Suffragette represents Justice as saying to him: 'Why not give them the vote, and release me from tasks that are an outrage on my name?' And Mr. Asquith replies: 'Now, enough of that, my woman. I've suspected all along you were on their side.' If he did not suspect it all along, he suspects it now. And the public at large suspects it, and is more ready to receive women's suffrage than many a project which politicians palm off upon it. That women's suffrage will pass over the body of Mr. Asquith is one of the few certainties of the near future."

To sterilize is to kill all forms of germ life without distinguishing between harmless or placed at the purser's table, from harmful germs. Anything which is whence we, i.e., roses and myself, were sterilized is free from germs—at least free from living germs. But disinfection means killing harmful germs only Many harmless germs are much tougher than the ordinary disease germs, and it often happens that we may disinfect, Mrs. Boomer was, unfortunately i. e., kill the harmful germs, without enough, obliged to occupy a stateroom sterilizing, i. e., without killing the with two other women, but with the cheery optimism that is invariably a harmful and harmless, here, merely those of the cheery optimism that is invariably a harmful and harmless, here, merely her, she endeavors to look on those that produce disease and those the bright side: "It might have been that do not. a sufficiently good reason?

Answer.-Hypochlorite is our friend, chloride of lime, or chlorinated lime, or bleaching powder; at least, it is the principal active ingredient in it. Its chemical formula is Ca C12O2. It is practically slacked lime, CaO2H2, with chlorine in it instead of hydrogen. When this is exposed to the air or mixed with organic matter, especially in acid solution, the chlorine escapes, attacks something with oxygen in it, and sets free the oxygen in a form closely resembling, if not identical with, ozone. Thus ozone then kills the more delicate germs in the water, if it is weak, and the tough

germs, too, if it is strong enough. In practice, the object of the hypochlorite treatment is to kill the actualdangerous germs; and fortunately they are so much more delicate than the other germs that a very small amount is necessary, an amount too small to affect the value of the water for drinking purposes. If enough hypochlorite were put into the water to kill all the germs, harmless as well as harmful, so much would be required that the water would yield disagreeable odors and tastes to the consum-

A MONG the less-known writers of the nineteenth century was Samuel Rogers. He kept open house and frequently entertained Dickens, Macaulay, Carlyle, and other celebrities of the time. Rogers was a notable wit, but unfortunately his thrusts were not always tempered with kindness. Irving, in a letter, says: "I dined tete-a-tete with him some

YOU want to know, my child, here in the midst or the sweet Christmas spirit of give and take, with the accent on the take, why your little friend's papa, who was a proofreader, s no more?

Then climb up on father's knee and ne will tell you the story. There was a society editor who was lmost scholarly and was afraid this fact would not be discovered and ex-

The house was decorated in shamrock, heather, and other things typical of the outer edges of the British

So the society editor anxious to show erudition spoke of all these things learnedly, saying:

"There was the very breath of the Gaelic about everything in the house.' That was the way she wrote it, my child. Sit close and let father hold you tight, for now comes the horrible part of the story.

The next morning eight pink-faced Hibernians came storming up the stairs, with blood in their several optics. They cried out with one husky voice, so that they might be heard for several blocks on a dark night: "We want you to know that the breath av th' garlic niver was about annything in that house! Imperial Federation Scheme Not Popular in Dominions

London Nation Believes There Is Little Desire To Drop Any Part of Self-Government in Order To Enter a Closer Political or Commercial Union.

vision of a closely-federated British Empire with which Mr. Herbert fresh from his semi-official tour through Canada, has just been entertaining the members of the National Liberal Club. Here is one of our self-governing dominions passing with our assent unjust and oppressive laws directed against a section of their fellow-British subjects, and administering these laws by methods which outrage public sentiment, and provoke a dangerous state of feeling among the largest of our subject populations. Yet so little unity of political structure or of common feeling exists inside the British Empire that even the informal communication between the viceroy and Gen. Botha was regarded as a matter of extreme delicacy. Anyone at all familiar with South African sentiment must be aware that the faintest endeavor either on the part of the Imperial Government or of the Indian Government to remonstrate aganist the treatment of Indians in Natal, will arouse bitter resentment. Though South Africa may find it impossible to refuse the explicit demand for an impartial committee of inquiry pressed upon it by our Government and that of India, even this measure of interference will arouse a strong feeling of antagonism in the breast alike of Boer and Briton. The indignant tone of Lord Hardinge's address, thoroughly justified as it is in our opinion, will not ease the situation in South Africa. For Gen. Botha has a very difficult part to play. Any concessions he may personally be disposed to make to Imperial pressure will be represented by the Hertzgoites as a betrayal of South African nationalism, and though the recent convention showed that the extremist wing was in a considerable minority he cannot afford to give to his enemies even an appearance of truckling to the Imperial Government. Other Instances.

This instance of South Africa is particularly tlagrant. But it does not stand alone. On the contrary, it is strictly representative of a sentiment and policy common to all our self-governing dominions. The regulations of the Canadian Government regarding immigration at the present time actually discriminate in favor of Japan-ese and Chinese as compared with Indian immigration. And this for the simple reason that special treaties India possesses no treaty-making power, and the Imperial Government wields no effective substitute. So it comes to pass that in a British state British subjects are treated worse all good Austrians will deem it an effective recordingly, last May the can are change it. Accordingly, last May the can are change in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she has been danger—could be considered in a war—and she British subjects are treated worse than foreigners. The Other Side. Hitherto the movement has virtually ignored this all-important problem. Our Imperial Federationists have been scheming by conferences, imperial defence committee, and so forth, to perial conferences of the past that her lay the foundations of some future legislative and executive body which shall represent the union of self-gov-erning states in the empire. They seem placidly content to hand over to such an Imperial Government, if it can be framed, the teeming millions of our Indian Empire, to be disposed of as its imperial wisdom may see fit. Now, it has always seemed to us extremely improbable that the democracies of our dominions would be willing to take upon themselves a task so onerous and so unprofitable. We frankly believe the suggestion that the eople of Canada or of Australia are proud to be in some sense the possessors of India and of great slices of tropical Africa, and that they would be glad to associate themselves with tries. > But should we be mistaken in our forecast, and should the current of events set towards Imperial Federation, is India, with her large educated population, her civilized traditions, stretching far into the azure of her past, her great commercial interests, her enlarging powers of self-government, to have no voice in this Imperial Government? It has been a conspicuous defect in the so-called imrepresentatives have not been sum-moned, and that her interests have only been indirectly taken into consideration. It would, indeed, be a pretty unity of empire which should intrust our anti-Asiatic colonies with a joint control of India, and instill into the Government of the country, wherein three-fourths of our subjects reside, the present temper of the Transvaal and Natal! A plain demand ought to be formulated to the effect that any enlargement of the factors of imperial government by representatives of the dominions, whether through conference, imperial defence committee, privy council, or some new organ of imperial government, should make provision for the direct and sufficient participation of the representatives of ished at dawn and none but an expert India, with a number and a standing eye could have told the difference be-

EXPERT AGITATOR IS GANDHI LEADER IN BATTLE FOR INDIANS' CIVIL RIGHTS

cussion, you might have met at many gatherings in London, a quiet-mannered Indian, a man of 40, small and to talk; deeply in earnest (you could see with half a glance), but conspickindly, sweet-tempered-and, as you would guess, tenacious almost beyond anybody you had ever known. This barrister-at-law, attorney of the supreme court in the Transvaal, and leader of the South African Indians in their struggle for civil rights; organizer of passive resistance; a man you checkmate or get round, though you can, of course, put him for a time out of the way. He is at present in jail, condemned to 12 months' prisonment, with hard labor, for leading a company of his own people into the Transvaal across the frontier from Natal, in defiance of the new immigra-

tion restriction law.

The two decades of almost unbroken conflict slight; unobtrusive, but always ready have been full enough of varied incident for Mr. Gandhi. Twice he has had experience of warfare-in the early uously reasonable, patient, persuasive; stages of the Boer war, when he was never ruffled or combative, always at the head of the Indian Ambuiance Corps which did good service on the Natal battlefields, and in 1906, when he organized a corps of Indian was Mohandas Karamchand Gandhi, stretcher-bearers during the native rebellion in Natal.

Twice at least his life has been in danger-once when he was set upon in the streets of Durban on landing from India (the report having got that he was introducing skilled Indian labor into the colony), and when he had, like more famous men in similar circumstances, to escape in policeman's garb; and another time when an infuriated Pathan tried to kill him under the impression that he was traying the Indian cause to the Transvaal Government.

Expert Agitator. He is an expert in scientific agita tion. Never was there a popular leadati, by religion a Hindu, and by caste er more uncompromisingly hostile to a Bania or merchant. He comes of an militancy. There is no tolerance in ations with Porbandar, a little native sembling violence. The South African Indians give him an unlimited allegiance. His character commands their reverence; they obey him like children; they believe in his wisdom. With Mr. Gandhi on the field, the struggle proceeds without bloodshed. Remove him, and the furies are abroad.

A Born Leader. He has shown astonishing gifts of leadership and diplomacy, and an equally astonishing grasp of affairs and knowledge of men. But fundamentally M. K. Gandhi is a recluse, a devete of mystic the speculative devotee, a mystic. His speculative standpoint is unreservedly Tolstoyan. He is an alien in the modern world, an enemy of what we call western civilization. It is not, he will tell you, the British people, but western civilization, mechanical and material, that is governing India, and cities like Calcutta and Bombay are merely plaguecentres. Increase of material wealth and of comfort is inimical to moral growth. East and west can never meet until the west has thrown over its civilization, and India's only way to salvation is to unlearn all that she has been learning under the tutelage of the west during the past half-century. Our modern world is the Inferno, and the only right thing for man to do is to get out of it into silence, solitude, poverty, and peace. And yet with it, ere is Mohandas Karamehand Gandhi, the spiritual Nihilist, sacrificing himself wholly in order to secure for his compatriots a little measure of civil rights in a dominion which will never willingly accept them as free citizens.

me on the way. At the mausoleum found the custodian, a typical Scotch man, intelligent, keen, deeply interest-ed in the life of the illustrious countryman over whose tomb he keeps watch and ward. He pointed out to me that there was a mistake in the record on the tomb; Burns was put as a year younger than he was when he died. And then, quite casually, he gave me a piece of information which There at once set me in a flutter. were, he said, some descendants of Burns in Dumfries today. I knocked with some trepidation and some keen expectancy at the small and modest door; there was a long pause, and then the door was opened, and at once I forgot the narrow, close and the small staircase and the modest little flat at the top of the dark staircase. there stood before me a woman whose beautiful, open, sweet infectious smile seemed to flood everything with her own sunshine. The custodian was right: here was a real Burns before me in the flesh. The short, round face the short nose, the dark eyes, the laughing look, as it were the outward expression of that joyousness of life, which was part of Burns' temperament amid all its frequent gloom, all spoke of the descent and of the blood of Burns. He lived before me again.

Miss Burns. Miss Burns Brown, for she it was who received me, is what the Scotch call a sonsy woman, with a fine full figure, great vitality of movement, an infectious laugh in her great black eyes and in her round almost chubby face. There is nothing about her of the forlorness which I had expected; is vital in every movement and in every look. Auburndale, Mass., May 21st, 1913

Boston, Mass.

Gentlemen—I want to tell you that the "MOLASSINE MEAL" that I hought and commenced to feed some two mouths ago has proved to be the best food I have ever used. It certainly has proved wonderful results in our cows, calves and horses. Each one of our horses has gained more than fifty lbs. and it has given them the slickest coat they have ever word. It certainly has put the bloom on the cows and calves. Our cows never kept up so well in their milk supply as they have this spring. "MOLASSINE MEAL" keeps their system in the pink of condition.

Vaura were truly.

Yours very truly. (Signed) Frank H. Pope, Manager

Burns at Dumfries.

First, perhaps, I should tell the southern reader-I need not tell it to Dumfries from 1791, when he received his appointment as a gauger, till 1796-the year of his death. It is an important period of his life-not so much for its productiveness as for its final overthrow of his health and the gradual descent through ill-health, over-indulgence, flattery and neglect, in which he finally ended. In some respects it is the period of his life to most regret. On the other hand, ninety pounds a year, and it was for ment him; he was settled down with wives; and all his little flirtations, except one, were platonic. He was usu-
