Up to midnight eight bodies had been recovered. Most of them were

their brother-Britishers. Among them have been 125,000 casualties. The Canadian Government is now committed to the policy of raising another 100,000 men. I would like to offer a suggestion to all inclined to criticize those carrying the burden and doing their best, namely, be careful that you are in possession of the facts."

Walter Long, who spoke next, dwelt on Sir Edward's appeal for criticism to be based on fact and knowledge.

"Some day, when the history of the war is written." continued Mr. Long, "you will hear of thousands of tons of goods remaining unshipped in the dominions, which meant to the dominions great financial loss. This was part of their share of the common war burden."

There were cries for Winston Churchill at the finish, who delivered a few eloquent sentences descriptive of Canada's progressive war efforts.

Conditions in Austria. But if disapproval of the German Government's handling of the Russian negotiations is pronounced in Germany, it is even more so in Aus-tria, where the demand for peace is constantly becoming more intense. Strikes are of a serious nature. An Austrian cabinet has fallen within the Austrian cabinet has failen within the last week. Food control is marked by incompetent and maladministration. Hungary is so concerned over her food supply that she is not permitting the export of supplies to Austria. German domination of Austria has been efficient since the war began, but no foreign nation likes to be tuled by foreigners, and so long. he ruled by foreigners, and so long be ruled by foreigners, and so long as Germany has been able to manage well the distribution of food and funds, there has been little complaint, but German management of Austria is breaking down, and it is to Austria tria-Hungary, therefore, that members of the Entente are looking for a sudden throwing off of the German yoke, and a joining with the Russians in obtaining a general peace, or at least the adoption in the negotiations

turbance. What seemed at first an easy detachment of Russia from the Entente, and the quiet annexation of territory at the expense of the infant democracy, is recoming a boomerang. Political currents and crosscurrents in Germany, for instance, are much more confused than they have been since the war began. Sentiment against the avowed plans of the annexationists is growing, not only because of inherent opposition to the militarist party, but because it is beginning to be understood that annexation of Russian territory will block the way to a general peace, and prolong the war. Just how powerful is this influence no one here can judge, but the Brest-Litovsk party, which it was the Entente's disposition at first to ignore, are proving the keystone of the political situation in both Germany and Austria. It is a kind of test, unexpected and unlooked for, of Germany's own war aims, and by showing their hand the militarists have in a sense contradicted the slogans of a defensive war on which they have been rallying the masses to great sacrifices.

*Higher Development.

R. Down's claimed that grocers and butchers should close early in order that they might have time to give to matters of culture and education. Under existing conditions the hours were too long for the proper development of the intellectual and family sides of life. T. Stevenson, speaking on behalf of organized labor to the number of 35,000, said he was prepared list of defaulters are actually to the early closing bylaw. With reference to female employes he said that no man would desire his own daughter to work 14-16 hours a day, especially the late evening hours.

Experience Successful.

Secretary J. M. Balley, of the Toronto branch of the Retail Merchantes Association, said he had had experlence throught western Camadian distance and that early closing bylaw. While, J. Hynes spoke as a consumer and experlence through western camadian close of the commands of the Service.

J. Rutcliffe and D. W. Clark, also spoke in savor of the bylaw, while, J. Hynes spoke as a consumer and expressed the belief that the proposition was a scheme of wholesalers to force small dealers out of business and control prices through the late redealers.

A letter was received from G. A. Smith, senior principal of high schools, asking for additional rooms and lavatory accommodation in Parkdale Collegiate Institute. Chairman McTaggart explained that the money had been appropriated for this purpose some time ago, but as there was not enough land space at that time the addition could not be built, but now that the land had been obtained he thought it advisable to build. The matter was recommended by the committee and referred to the board.

Street City..... State.....

These are the Facts

-The Truth

We are \$1,030,968 short of the objective of \$3,000,000—And we're not holding anything back for a grandstand finish. So far, the citizens of Toronto have not given as they should.

And it's the multitude that are falling behind with their giving. Those who can give in their thousands are giving, and they are increasing and even doubling their gifts of last year. The multitude are not giving as much—let alone doubling on last year.

Toronto Must Not Fail

Think what the men in the trenches would FEEL if Toronto fell down. Think what our Allies would FEEL.

One lady, when called upon to give again, replied, "But, my dear, I've given from my feet up." "Then go home and take your boots off," replied the sister. To her everlasting credit, the giver saw the point, and promptly DOUBLED HER LAST YEAR'S SUBSCRIPTION.

That's what we must all do. Go home and take our boots off (figuratively speaking), and double what we have already given, and then make it our business to see that our friend next to us at work, or our next door neighbor—also gives again.

It isn't a matter of giving from your superfluity. It's a matter of giving from your heart-from the real man and the real woman in you, that can visualize, What Others are Giving-What Others are Suffering.

Don't say I can't give. Don't say I'll try to give again. Say, I WILL GIVE.

We've got to play the game. We've got to see this thing THROUGH. Toronto must lead Canada straight through. Toronto has always done it,

-and by the immortal Spirit of our dead in Flanders-

The pessimist is never an offender against the law, and therefor he must be treated circumspectly, but he must be met. Up to this time the European countries have entrusted the prosecution to politicians and to jingo journalists, who have succeeded in making the pessimists stronger than ever. In England the press, in France the politicians, in Germany both, have mystifled and misled the people to the extent where pessimism becomes a real political danger. The political crisis in England, which upset Mr. Asquith and that which cast out M. New York, Jan. 23.—Opposition to waste and extravagance in dress but equally strong objection to "false economy" were voiced in resolutions adopted here today by the national association of clothiers. Hearding of money by the public may ruin the clothing business, it was asserted. Raising of more sheep to produce more wool was advocated.

The ethics of army uniforms also was discussed. Some of the speakers declared it was undemocratic for rich men's sons to wear expensive uniforms when other officers, just as brave and patriotic, could not afford to buy clothing of as good quality. Standardization of fabric and tailoring with a price fixed by the government was urged. Samuel Wile, of Rochester, was elected president of the association.

London, Jan. 23.—The peace agitation in Austria-Hungary is receiving a great deal of attention in Germany. The socialist newspaper, Vorwaerts, of Berlin, emphatically declares the solidarity of the German proletariat with Austrian labor in the peace struggle, and maintains that events in the dual monarchy must have a deep reaction in Germany. ufacture of steel products on a large scale in Canada. London, Jan. 23.—M. Karahan, secretary of the Russian delegation at Brest-Litovsk, has announced, says an Exchange Telegraph despatch from Petrograd, that the Russian delegation has made an official protest to Dr. von Kuehlman and Count Czernin, heads of the German and Austrian delegations, regarding the omission from the official German reports of the declaration of Leon Trotzky at the latest sitting of the peace conference respecting the attitude of the central powers. Trotzky said that after a fortnight's negotiations Germany and Austria were insisting upon terms contrary to the principles they acknowledged in their announcement of Dec. 25 respecting peace without annexations or indemnities. ment of Dec. 25 respecting peace without annexations or indemnities

Rumors Arise in Ottawa Over Deadlock Between Manufacturers and Publishers.

Ottawa, Jan. 23.—There is a good deal of discussion here as to the possibility of the government taking over a couple of paper mills and furnishing the newspapers with the needed supply of newsprint on account of the seeming impossibility of the Canadian Press Association and the manufacturers of newsprint coming together and adjusting by agreement differences as to price. The government has the authority under the War Measures Act, and it is recognized that the newspapers are bearing a very heavy burden from the ITALIAN PRISONERS nishing the newspapers with the

OTTAWA SURPRISES MONTREAL OUTFIT

Score a Victory Right in Canadiens' Hatbox Rink -Clean Game.

Montreal, Jan. 23.—Something of a sur-prise to the Canadiens was the victory of Ottawa at the Jubilee Rink here to-night, when the visiting team won the National Hockey League scheduled game by 4 to 3. The Senators outplayed the Frenchmen from start to finish. The Canadiens, apparently keeping in view the fact that they have clinched the hon-ors in connection with the first half of the season's schedule, and are likely to play off the winner of the second half, if either Toronto or Ottawa should come in this category, did play in form tonight, but seemed rather listless. They were without the services of Newsy Lalonde, too. Couture "subbed" for Lalonde to-night.

too. Couture "subbed" for Lalonde tonight.

An early lead was secured by the Senators, but the Canadiens evened up it
the first part of the third period. The
tying of the score came within five minutes of the calling of time. Then Ottawa recalled to the fee Denney and
Gerard, who had been resting, while their
places were taken by the subs. Lowery
and Boucher, and again the visitors assumed the offensive, and Hyland broke
thru the local defence and scored the winning goal.

thru the local defence and scored the winning goal.

The Canadiens' third tally, which temporarily tied the score, in the second period, was a "lucky" goal, won by Malone. Shore, in his effort to clear after Benedict had stopped a shot of Pitre's, passed the puck out so that Malone had an open chance to make the shot and score.

The game was devoid of rough play, and only three minor penalties were handed out, Berlinquette, Hyland and Corbeau being penaltzed for tripping. Hyland scored three goals for Ottawa, and Malone two for the Canadiens.

The teams:

Canadiens—Goal, Vezina; defence, Hall, and Corbeau; centre, Malone; wings, Pitre and Couture; substitutes, Laviolette, Berlinquette and Bell.

mining but the champion's early lead easily gained him the decision.

The R. F. C. uncorked a good one when they sent Pte. Harling against Russell in the 115-lb. class. Russell started with his usual grand stand display and the crowd got after him and he was hooted and hissed. Harling is a good two-handed fighter and soon had the crowd with him. Russell had a slight lead in the first, but after that Harling went to the front and gave him a good lacing, whick pleased the crowd greatly. Frankie Bull, the ex-amateur champion, spoiled what had all the earmarks of being a great bout in the second round when he faced Pte. Jones, of the R. F. C. Jones started with a rush and the first round was a hot mixup from gong to gong, and the second was the same for about half the journey, when a succession of rights and lefts to the jaw made the soldier groggy, and as it was an easy matter for Bull to land the right to the jaw that ended the bout.

Scotty Lisner and Harry Westerby put upp a great argument for three rounds, with Lisner having the better of the milling, when Westerby broke his arm and had to retire.

Ptc. Grant made a chopping block of Ptc. Carol, 1st Brigade, 2nd C. O. R., in the 145-lb. class.

Albany, N.Y., Jan. 23.—Professional boxing, which has been illegal in New York since last November, again would be legalized under the terms of a bill introduced today by Assemblyman Martin G. McQuw. The measure would create a state commission to regulate the sport, would provide for licenses for clubs and would require that during war-time part of the license fees should be devoted to furnishing athletic supplies for army training camps. It would restrict the number of clubs to not exceeding seven in New York, three in Buffalo and two in any other part of the state.

BARROW'S SUCCESSOR

New York, Jan. 23.—Arthur A. Irwin is the latest candidate for the presidency of the International League. The Irwin bcom originated in Newark yesterday, with the assertion that already he is able to command the votes of four of the eight clubs. Irwin, who is the business manager of the Toronto club, has been identified with baseball for more than thirty-five years, but this is the first time that he has been named for the presidency of any league. So far three candidates have been suggested for Edward G. Barrow's place, Irwin, James R. Price and Edward Hanlon.

VETERAN JOCKEY DIES.

New York, Jan. 23.—Jacob Pincus, one of the most famous jockeys and trainers on the American turf, died suddenly of heart disease in the Mount Vernon Hospital today. He was 80 years old. Jacob Pincus was known on nearly every race track in the world. He was a turf follower of international reputation. He rode all of his races on the American tracks, but as a trainer he developed and saddled winners in all parts of the world. He was the only American trainer to win an English Derby with an American bred horse. This he did in 1881 when Pierre Lorillard's Iroquois defeated the best horses in Europe in the historic classic.

Warden of Wellington Advocates th Erection of More Snow Fences.

Special to The Toronto World. Guelph, Jan. 28.—Reeve John Gregson, the newly elected warden of the County of Wellington, in his inaugural address to the county council this morning referred to the heavy expenditures which were necessarily incurred this winter in order to keep the roads in the country open for traffic, and recommended that more snow fences be erected. He also recom-mended that the council consider care-

catch Miss Nellson-Terry before luncheon, I entered the elevator.

Luck was with me, for the minute I stepped into the upper corridor an unseen hand, or, rather, voice, was leading me. Somewhere down that never-ending hallway behind one of those non-committing doors was the subject of my quest, singing "do-rame" in a lovely lyric soprano. I walked bravely on until I came to the very last door, the soft notes coming more distinct and pleasing at every step. I hesitated, listened and knocked gently. But the voice continued on its bridlike flight up the well-known scale. So I opened the door very quietly and there she was seated at a desk with her back to the door in a pose truly reminiscent of the "Triky" days.

Alarmed Over Voice.

"Do you know, I can't sing a bit this morning. Why, I'm losing my voice." said Trilby—I mean Phyllis—with mingled comedy and tragedy in her eyes. She wasn't a bit annoyed at my unconventional entrance—in fact, she quite fancied the situation, especienced in getting a doctor to locally the "Trilby" episode, for, as I explained to her, if k hadn't been for the voice that she thought she was losing I shouldn't have had my story, most likely.

"Do you know, I believe it is the weather, here; but I really am having worries over my voice." confided Miss Terry. "And I do love Canada, so. I hate to blame the climate, she added gracefully. "Don't woith in Maggie' has something to do with the trouble?" I ventured.

"Yes, you are quite right," she replied in finest Irish-American, slipping into her new role almost under the stiffing distance.

HOW HOTELS COULD HELP.

"P. Q. Foy, editor of The Daily Market Report, testifying in New York."

"Yes, you are quite right," she replied in finest Irish-American, slipping into her new role almost unconsciously. "I believe it is the way I have to yell—shouting at the flunkies and poor 'Dinny' in turn. It can't be the best treatment for my vocal the best treatment for my vocal to the property of the country serves at least three potatoes with each meal.

In spite of her modest assertions
Miss Neilson-Terry is in no danger of
spoiling her lovely voice. It is one
of her many natural gifts—she can't

More Scared Than Hurt.

Letter from a reader dealing with a popular condition—Everybody's Aliment:
"We find much pleasure in reading your column, and have come to place great reliance on your medical judgment. (My husband is a professional man.) Yet I am coming to you for advice on a subject that has caused me no end of worry since our daughter was born. She is now thirteen years old. She has always been constipated. For months no natural or unaided evacuations occur: I have to employ enemats or laxatives. Then been constipated. For months no natural or unaided evacuations occur: I have to employ enemata or laxatives. Then for weeks at a time the bowels will act naturally, only to be succeeded by another period of months of obstinate constipation, We have had the advice of some excellent physicians without any appreciable benefit. An X-ray picture (or several of them) threw no light on the trouble. We have tried about every scheme of diet, exhaustal the mineral oils, and faithfully followed courses of the various mild laxatives. We have insisted upon regular habit of answering or helping the call of nature, as suggested in one of your talks, but all in vain. I am terribly worried. I know that troubles of this kind lead to about everything else. The little girl is perfectly well, aside from this trouble—is doing fine work in school. Is there no relief?" QUESTIONS AND ANSWERS. Do Cats Have Ringworm?

My four-vear-old son has seven sore places on his scalp, which the doctor has pronounced ringworm. The largest spot is an inch across, round, raised, and covered with a brown crust which comes off when I wash it, leaving a reddened patch covered with pinhead spots of white pus. These places start as a whitish pimple. The boy plays with a neighbor's kitten which we have been told has ringworm. Could that be the source of infection?

The usual causes of insanity are (1) syphilis, (2) alcoholism, (3) bad heredity and bad home environments, (4) war, (5) disturbances of ductless gland function, and (6) the toxemia accompanying Bright's disease, arterial degeneration, autointoxication and other conditions due to bad hygiene. The wool question is of intense interest to women at the present time. "Save the wool for the soldiers" appeals to the mother instinct within every womanly heart. The wool conservation propaganda will spread, and we will all very soon be wearing the substitutes as another wartime sac-

with a minimum amount of wool; the whole process of tashion is toward the elimination of wool and the introduction of satin, silk, foulard and crepe gowns and suits. These gowns are known in the shops as "economy gowns." If there still remains a woman who clings to the fancy of a skirt about instep length, then I can find it in my heart to pity her. Not a skirt offered in the shops today is ankle length.

JAPANESE EDUCATE OYSTERS. Big Farm, Where Oysters Are Educated and Made to Work for Man.

In Japan there is a great oyster farm, where the bivalves are taught to make pearls. It was Dr. Mikimoto, a well-known scientist, who conceived the idea that oysters might be educated and made that oysters might be educated and made to work for man.

After many years of costly experimentation he discovered the method in use today. The farm has an area of about 50 square miles, and the water. Not only the water, but the air has been charged with a suffocating gas, odorless but irritating to the larvae of oysters are most numerous and then he plants small rocks and stones. These are soon covered with oyster-spat. They are then removed and placed in special beds, where they lie undisturbed until the third year. An oyster will not produce a pearl unless it be irrigated by some foreign substance. As soon as it feels this it proceeds to cover it with nacre, layer on layer, until after a few years it has made a pearl. When large enough the oysters are taken from their beds and carefully opened; a tiny speck of some foreign substance is introduced into their bodies, and they are replaced in the sea. By the end of from three to five years the oyster has coated the foreign substance with nacre and this has become a pearl.

OIT FOR SUFFRAGE Political Organization Takes Place of Win-the-War Women's League.

As was stated by Mrs. Huestis at a recent meeting of the Win-the-War League the many branches thruout Canada were waiting to see what Toronto women intended to do before they decided upon any definite action. The first province to take action is that of British Columbia. The Vancouver women have evidently been waiting for the action of Ontario, as they have now decided to be known as "The League for Good Government." This is of particular interest to Toronto women, as they favored the same name for the permanent organization which it is intended shall take the place of the "Win-the-War Women's League."

The League for Good Government has officers as follows:

President, Mrs. Clare Fitzgibbon; first vice-president, Mrs. H. C. Carey; second vice-president, Mrs. Irene H. Moody; secretary, Mrs. John Dickson; treasurer, Mrs. Patterson; organizer, Mr. M. J. Crehan.

The work of the talented Hambourg combination is so well known to Toronto audiences that all that is needed is to say that they played in their usual artistic way, their contributions being the "Trio B. Flat. Opus II.," by Beethoven, and St. Saen's "Trio F. Major." Georges Vigneti, violinist, contributed a varied group of form numbers a Choppin group beof four numbers, a Chopin group being given by Austin Conradi. "Song of the Minstrel," by Glazounow, and "Humoresque," Arensky, were the offerings of Boris Hambourg.

Harold Jarvis, an old-time Toronto

avorite, had two stirring songs, "Up favorite, had two stirring songs. "Up From Summerset," and "The Land of Long Ago." The "Aris La Wally," and a group which included "Prelude," by London Ronald, and "Beneath Her Window," Spencer Johnson, were charmingly given by Miss Marguerite Fleury. Mrs. Blight and Mr. Colin McPhee were the always satisfying accompanists.

OF INTEREST TO ANIMAL

The yearly meeting of all workers and those interested in humane work will take place on Thursday evening, 24th inst., at eight o'clock, at St. George's Hall, Elm street. This meeting is the thirtieth annual meeting of the Toronto Humane

Society, and a brief outline of the year's work will be presented. This meeting promises to be most interesting as Miss Marshall Saunders, author of "Beautifu:1 Joe" and other works, and Mr. H. Clay Pres-ton, general manager of the Buffalo Humane Society, are expected to be present and give short addresses. During the evening musical selections will be rendered by Miss Alma Wynn and Mr. Frank Oldfield.

The president and officers of the Toronto Humane Society extend cordial invitation to all those interested in the welfare of animals.

recently to the effect that a number recently to the effect that a number of text books now in use in Ontario were to be discarded. Hon, Dr. Pyne, minister of education, stated yesterday that the conclusions arrived at are premature and not based on facts. "The statements recently made respecting school text-books, are based upon a complete misconception of the facts, and are entirely without foundation," he said. "There is no intention whatever, as has been stated, of discarding 12 authorized text-books, forcing the copies now in use out of discarding 12 authorized text-books, forcing the copies now in use out of the schools, and rendering publishers' or dealers' stocks of such copies valueless. It is true that the text-book regulations for 1917-18, issued last June, announced that the contracts for 12 books in the list would expire in July, 1918. That was giving all persons concerned a year's notice of the actual facts, so that they could govern themselves accordingly.

govern themselves accordingly.

Contracts Expire Soon.

"As the contracts for printing these books expire at an early date, new arrangements for a supply of them must necessarily be made. Arrangements have already been completed for renewing many contracts, and negotiations are now under way to renew others, where publishers are willing to renew, or to make other aring to renew, or to make other arrangements where publishers are unwilling to continue the books, or new willing to continue the books, or new editions of them, upon the fortmer terms. The government has resolved mot to allow higher prices for the authorized text-books at this particular juncture, when higher prices for everything else make the consumer's burden heavy enough. In point of fact, of the 12 books above mentioned, the department hopes shortly to complete the renewal of the contracts for ten. No reasonable person will ask the department, in the middle of negotiations, to make announcements of its precise intentions, Such a course would be neither business-like nor in the public interest. We have still several months

terest. We have still several months in which to finish our plans.

New High School Books.

"The question of new editions of two high school books, which absolutely need revision, have been under consideration, but should such new editions be decided upon school boards may pass resolutions to retain old editions for another year, and care will be taken that no unnecessary waste is incurred and no extra bur-

dens placed on the public.
"As I have already said, the people of Ontario may rest assured that if terms cannot be made with the put lishers for next year at the present prices, the government itself will pub-

lish the books."

Skin on Fire With Eczema

The Most Torturing of Skin Diseases—Few Doctors Have Satisfactory Treatment to Offer, But This Ointment Cures.

St. Thomas, Ont., Jan. 23.—Eczema's itch is torture, the skin seems on fire with the burning, stinging humor; at times it becomes almost unbearable, and in desperation you dare not exercise for fear of aggra-vating the itching, neither can you sleep, for no sooner does the body become warm than the trouble regins, and instead of restful, refreshing sleep, it is scratch, scratch, scratch, scratch all night long. There is scarcely a moment's respite from this naddening malady at any time. course, you have tried nearly all the washes, salves, lotions and medicated soaps, but, like thousands of others, have been disappointed and disgust-

The Fenwick Girls are entertaining young ladies. The Four Dancing Demons are masters of practically every style of dance ever They have the modern dances, classical, and the dances of the south, together with the old favorites. Hart and Graham, black-faced comedians, are also included in the bill.

Gayety-Dave Marion at the head of his own show, comes to the Gayety Theatre next week for a week's stay, in the second edition of the "World of Frolics," which is the name of the Marion production, and it is said to be the best thing that Marion has done in his long line of successful productions. S. H. Dudley, Charles Raymond, Henry Plunkett, Huran and male support for Marion. The temate principals are Agnes Behler, Inez de Verdier, Nellie Watson and Mile. Bartoletti. There is a big chorus of pretty girls who can sing and dance and who wear some wonderful costume creations.

The "Army and Navy Girls," is the title of a two-act musical comedy which will be presented at the Star Theatre next week, the production, costumes and musical numbers are entirely new. The cast is headed by

Star.

Digestive Pills

A Warning to Dyspeptics.

The habit of taking digestive pills after meals makes chronic dyspeptics of many thousands of men and women because artificial digestents, drugs and medicines have practically no influence upon the excessively acid condition of the stomach contents which is the cause of most forms of indigestion and dyspepsia.

The after dinner pill merely less the sensitiveness of the stomach ner and thus gives a false sense of free and thus gives a false sense of freedom from pain. If those who are subject to indigestion, gas, flatulence, belching, bloating, heartburn, etc., after eating would get about an ounce of pure bisurated magnesia from their druggist and take a teaspoonful in a little water after meals, there would be no further necessity for drugs or medicines because bisurated magnesig instantly neutralizes stomach acidity, stops food fermentation and thus insures normal, painless digestion by enabling the stomach to do its work without hindrance.

War Trade Board for Canada

THE industrial interests of Canada received the first suggestion, through THE GLOBE, that a War Trade Board was to be established. Canada's National Newspaper is first with the big domestic news, just as it is first with reports from overseas—and tens of thousands of people now appreciate the fact that its exclusive cable services make THE GLOBE indispensable.

THE Business and Industrial pages every Tuesday are a part of the Plus in THE GLOBE'S Super-service. They record the big things in Canada's onward march to industrial power.

Canada's National Newspaper

keeps at the head of the procession by keeping its readers posted. In the issue forecasting the Dominion's War Trade Board and the "blue-sky" legislation to protect industry, THE GLOBE'S Industrial Section also told of the opposition of sheep men to the lifting of export licenses, of the history of oleomargarine, of the commercial possibilities of Canada's new oil fields and of the shipbuilding revival in British Columbia.

THE Imperial Munitions Board placed fifteen million dollars' worth of orders for wooden ships on the Coast last year. Altogether Canada is building \$46,000,000 worth of ships—that was another special story of THE GLOBE'S. This Tuesday feature, accepted as an authority by both Canadian and foreign Governments, is in itself worth the full subscription price of THE GLOBE.

WASAPIKA MINE PROMISES TO BECOME GREAT GOLD PRODUCER Development Work in West Shining Tree Yields Rich Results

Original prospector's cabin at Wasapika.

The Timiskaming and Northern Ontario
Railway.

It is now abundantly proved that the greatest resources of northern Ontario

The new gold region of West Shining Tree is 50 miles due south of Porcupine, 65 miles west of Cobalt, and the same distance north of the great nickel copper ranges of the Sudbury mining district. On the east it adjoins the Gowganda sliver region, which is now coming into considerable prominence owings to the success of the Miller Lake-OB rien and the tentative operations of a night of the big sliver mining companies of the big sliver mining companies of the big sliver mining companies of the big sliver mining tree.

Access the west Shining Tree is most conveniently reached from the properations of the mines. In fact it has been use of the most successful railways in the whole Dominion.

A hyper of the big sliver mining tree.

A branch of the T. & N. O. Railway has been made to serve Porcupine. But it is a roundabout route, in all 485 miles of Sudbury. The distance from the railway to the gold fields is about 21 miles. The government of Ontario has completed a wagon road for the entire distance, and in the summer there is an auxiliary water route and gasolise launches make the trip from the railway in about seven hours.

Better Railway Facilities.

West Shining Tree, however, occupies a strategic position in reference to the development of the rich hinterland of new Ontario, and there is now no doubt.

In northern Ontario begins a vast area of metal-bearing rocks of pre-Cambrian age, which exto as northeastward, as well as northwestward, for many hundreds of miles, on both sides of Hudson Bay. In early geological ages this region was the seat of great mountain ranges, and the nucleus of the continental mass. But eternal time has laid its corroding hand on the mountain tops, and has finally brought them to a much lower level. Weathering and erosion have proceeded thru countless acons, and the total degradation is now many thousands of feet, and only the remnants of the Ribble vein.

ancient ranges remain.

Elevation of West Shining Tree.

The general elevation of West Shining Tree is now about the same as that of Porcupine, or, approximately, 10.0 feet above the sea. The region as a whole is one of low relief, and few of the veins have outcrops more than 50 feet above the permanent water level.

Wood and Water Plentiful,

The Montreal River passes thru the

there are, besides, many lakes. In fact,
the supply of water is greater and more
accessible than in any other of our gold accessible than in any other of our gold regions. And there is also an abundance of wood for some years' operations, together with the other necessaries for rapid and economical mining. that the close of the war will see a wonderful transformation in this favored region. It seems destined to advance by leaps and bounds. Its merits have been long recognized and with a railway located to secure its thoro development it will soon rank with Porcupine and Kirkland Lake.

The Timestermine and Northern Contains.

Source of the Gold. According to our provincial geologists the gold of northern Ontario is geneti-cally connected with granites, to which the name Algoman has been applied. These granites belong to the younger generat on and are found at Porcupine, West Snining Tree, Kirkland Lake and the other gold regions of northern Ontario. The older or basement granites

The Timiskaming and Northern Ontario Railway.

It is well-known that the Timiskaming and Northern Ontario Railway was primarily a colonization road, intended to give access to the great clay belt. But in this enterprise the government builded better than they knew. At the very gateway of the broad belt of fertille land, the road stumbled onto Cobalt, the richest silver region that the passing centuries have known. While mines in other parts of the wo'ld rarely raise ore running even 100 ounces, the Cobalt mines have yielded ore carrying several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several thousand ounces per ton, and in a short time their producting several the same the world and the region from Sudbury north to procupine, and the region from Sudbury north to procupine, and the region from Sudbury north to procupine the production several tracks even in the mine real regions, where mixed

as yet we are far from the end. Every mining man now believes that there are other metalliferous worlds still unconquered.

Chance Discoveries.

The Canadian Pacific Railway inadvertently cut its right of way, over a nickel-copper mine now valued at ten millions of dollars, and now being operated by a strong company in which the British Government holds the controlling interest.

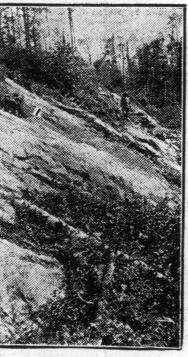

Cobalt was born as the child of chance, with a silver spoon in either hand. And in its more or less intermittent mining operations, New Ontario has already produced over \$400,000,000 in gold, silver, nickel and copper. And incidentally we

Ribble vein. From 104 determinations of values there is not a single blank. These constant tenors are unusual in northern Ontario. Surface assays, the often high, are often spotty. but on the Wasapika, 18 samples taken at intervals over a length of 150 feet and a width of 40 inches gave \$10.40 per ton in gold. Fiftyeght carefully moiled samples were also taken for a width of 49 inches, on another section of the vein, 280 feet in length, and the average values were \$8 per ton.

Sampling by Engineer Dixon,
George W. Dixon, E. M., consulting engineer of the Buffalo Mines, of Cobalt,
also examined and sampled the property. Also examined and sampled the property. Mr. Dixon traced the outcrop of the great ve.n for its total length of 2000 feet. He took many samples at intervals along this entire outcrop. The lowest assay was \$1.20 and the highest \$261.50 in gold. Results equal to this are seldom, if ever, obtained from surface samples in the gold fields of northern Ontario.

Rolls in the Ribble Vein.

In studying the accompanying plan, it is necessary to bear in mind that the course of the Ribble vein is nearly north and south. The smaller of the two sections into which it has been divided is on the south, and the larger, or mainly folded section, on the north. The break between the two is about 150 feet wide. Apparently the upheaval of the diabase compressed or crumpled the vein into the rolls or folds shown on the sketch. The diabasic dikes were also vehicles of heat and they opened sufficient channel for the ascension and infiltration of the gcld-laden solutions.

Indeed, it is more than probable that the gold itself came in with the diabase,

the gold itself came in with the diabase and is, therefore, of a later generation than the mass of the vein, tho the Andes itic lava and the granite were, no doubt, the main sources of the precious metal.

Section in Which Rolls Occur. It will be noticed that the principal rolls occur in the northern portion of the vein, and that apparently a portion of the vein has been displaced and pressed into the northern section. Here the ore body has been considerably widened, and not withstanding the cut off the original rolls. notwithstanding the cut-off, the original quantity of vein matter does not appear to be in any way diminished

Mr. Rogers then began a very there investigation of the various mining districts of northern Omtario, and finally came to the conclusion that the best opportunity for substantial profits lay in the development of that portion of the great Ribble vein, now owned by his company.

Sampling the Ribble Vein.

As a preliminary to the organization of the Wasapika Gold Mines, Limited. Mr. Rogers made a systematic and very thoro sampling of the outcrop of the Ribble vein. From 161 determinations of values there is not a single blank. These constant teners are unusual in northern (Intario, Surface assays the often high grade ore will be found in the vicinity of the outer walls of the outer walls of the deposited wherever physical and chemical conditions are suitable, can deposite of the nature of the autrespective of the nature of the autre of the autre of the autrespective of the nature of the walls of the fissure or cavity thru which the autrispective of the sum and the experience thus gains of the fissure or cavity thru which the autrispective of the fissure or cavity thru which the autrispective of the sum and the experience the same suitable, the strongest single vein as yet found the fissure or cavity thru which the autrispective of the sum and the experience the same suitable, the strongest single vein as yet found the fissure or cavity thru which the autrispective of the sum and the experience the same suitable, the strongest single vein as yet found the fissure or cavity thru which the autrispective of the same suitable, to carry values of \$12 over a width of the carry values of \$12 over a width of the carry values of \$12 over a width of the carry values of \$12 over a width of the to carry values of \$12 over a width of the carry values of \$12 over a width of

position. The shape of this vent, whether circular, square, lo ngitudinal or merely irregular, is immaterial, so long as it has sufficient dimensions, tho, of course, any marked irregularity adds greatly to the cost of mining.

Evidently the eruptions of the diabase created openings, which facilitated the migration of the solutions, and if the gold then came in it must have been in contact with both the walls of the diabasic dikes.

The vein at the famous Silver Islet mine intersected a single dike, and this led to the accumulation of one great borreceding. It is believed that the meetmigration gold then came in it is contact with both the walls of the contact with both the walls of the basic dikes.

The vein at the famous Silver Islet mine intersected a single dike, and this led to the accumulation of one great bonanza, yielding over \$2,000,000. But here there is only a zone of compression caused by the upheaval, while, at Wasapika, there is, in addition, a strong, well-defined vein. There are, besides, two dikes of diabase, and also a well-marked line of contact between two different types of rock,

Great Importance of Rolls.

These folded veins are due to dynamic metamorphism, and wherever found they carry high-grade ore. There is a limited development of this type at the Porcupine Crown in Pograpine, and in some of the gole mines of California. ONTARIO STEEL FIRM IN MONTREAL MARKET

Trading broadened out somewhat in the local mining market yesterday, but there was no clearly defined price trend, m nor gains and small recessions being mingled. One of the points of interest in the gold group was the strength of Kirkland Lake, which sold at 31. The upward movement was accompanied by reports that the property, operations upon which were suspended some weeks ago, may be the scene of renewed activity, as it is stated that an offer to work the mine has been received. Newray remained sleady at 33½ and McIntyre at 137, but Hollinger was easier, going back to 5.00 Dome Lake was strong at 15½ porcupine Crown, whose annual meeting was held yesterday, an unfavorable statement of earnings being presented, sold at from 25 to 24.

In the Colait group Timiskaming was steady around the high level of 27½, and Beaver was firm at 25½. McKinley dhowed the effects of further pressure. IN MONTREAL MARKET

Montreal, Jan. 23.—Ontario Steel was again a feature of the Montreal stock market today. Opening at 24, the close of the day before, it worked up by fractions to 25. Civic Power was another active stock, but its Tuezday price, 75, was unchanged.

Condition of Mine Does Not Appear to Warrant Cessation of Activities.

Up to the first of April, 1917, the Dome Mines Co. had produced \$7,781.-669. The production for the year ending on that date was \$2,171,784 and the net profit \$952,448, while the ore reserves were estimated at \$11,979,000. The development work during the year was satisfactory so far as it went. A seventh level at a point 765 feet east of the eastern end of the big "glory hole" or open pit, so that the new ore body lies about half-way between the shaft and the western boundary of the Dome Extension mines. The first section gave a core length of 61 feet and average values of \$16.61. Then came 13.5 feet of waste, followed by 14 feet having the same appearance as the 61 feet assayed, but unfortunately the core was mislaid in the assay office. The diamond drill continuing on the same course afterwards penetrated 28 feet of waste and then 304 44.5 feet of ore averaging \$20.37. Aphole" or open pit, so that the new ore

V. B. WADSWORTH, Manager.

Totonto, December 4th, 1917.

According to figures compiled by E. A. Haggen of Vancouver, British Columbia's mineral production in 1917 was only about \$1,000,000 less than the banner year of 1916. This is despite the loss of production brought by strikes at Trail smelter and in the coal fields. Placer gold production shows an increase, lode gold a decrease, silver a decrease, copper an increase, and zinc a decrease. The total for the year is placed by Mr. Haggen at \$41,299,688, against \$42,290,462 in 1916. Heavy Shipments of Ore, Despite

Ore shipped from Idaho mines during 1917 had a gross value of \$50,000,000, according to the annual report of Robert N. Bell, inspector of mines. The ore values were divided as follows:

Gold, ounces, 35,000; silver, ounces, 10,
\$2,288,000, an increase of nine per cent. over the value in 1916. There was a decrease in the production of gold, silver, opport and zinc, but an increase and the higher prices of metals in 1917 gave the output a value slightly above that of 1916, which was \$2,048,350. \$2,288,000, an increase of nine per cent.
