MILL, ENGINE AND

AGRICULTURAL WORKS.

Special Motice to Saw Millers.

The undersigned are now manufacturing a

Combined Bolt and Lath Machine,

FOR THE

CUTTING OF LATH OUT OF SAW MILL SLABS.

This machine has taken the lead for some years in large mills in the Ottawa region, and recent practice shows that it can be worked with equal success and advantage in a small mill. For full particulars apply to the undersigned.

General Mill Furnishings.

We have constantly on hand a good stock of Iron Tubings, with Cocks and other fittings, also of Oil Cups, Pet Cocks, Guage Cocks, and other engine brass work. Engine brasses cast on the shortest notice on the premises. Shaftings and gearing with pulleys, hangers, couplings, &c., of best style and proportions.

IMPLEMENTS.

y.

SS,

German Box Straw Cutters, Price \$22. Plows from \$11.50 to \$20, including the famous Hill Plow with steel board and land side, the Plate of Mould Board thickened at bottom. Also Paris Straw Cutter for horse power. Farmers' horse powers, (Pitt's double-geared for two or four horses), Sawing Machines, Root Cutters, Land Rollers, &c., &c.

THE

COUNTYJOF PERTH: CANADIAN ADIANAC

FOR THE YEAR OF OUR LORD

rk.

Being the third after Bissextile or Leap Year, and until the 20th June the thirty-eighth Year of the Reign of Her Majesty Queen Victoria.

Calculated for the Meridian of Montreal, in Latitude 45° 30° 26" North, and Longitude 73° 24° 22" West from the Royal Observatory, Greenwich, but arranged so as to serve without essential variation for all parts of the Dominion of Canada.

Entered according to Act of Parliament, by ROBERT MILLER, in the Office of the Minister of Agriculture.

STRATFORD:

PUBLISHED BY ALEXANDER MATHESON,

" BEACON " OFFICE.

EXPLANATION OF CALENDAR PAGES.

The Publisher of this Almanac, with a view to increase its circulation and usefulness, has adapted its calculations for the whole country. The Moon's changes are given for five different places, viz.: Quebec, Montreal, Perth, Toronto, and London. The rising and setting of the Sun are given for Montreal and Toronto. The rising and setting of the Moon are given with sufficient exactness for all practical purposes. The weather prognostications are again calculated according to the table of the celebrated Dr. Herschel; and for extraordinary accuracy Hart's Almanac retains its wordenful repularity. wonderful popularity.

Feb wary.—It is a great mistake to suppose that the business of the farmer requires less care and judgment than any other pursuit. Some have talked in a way that shows how deficient they are in knowledge of the true qualifications of a good farmer. If a man fails in other pursuits it is suggested that he had better take to farming. Such a man might possibly succeed, but there is hardly a chance of his so doing, simply because a successful agriculturist requires first, a real taste and preference for it. He must have sound judgment as respects times and places and methods of working. He must have and exercise discrimination about soils and seeds and their relations. Then it demands a good deal of skill and experience in all matters relating to cattle, horses and sheep. In short, a farmer should have a first-class intellect.

MARCH.—Farmers in Ontario and Quebec have a great many difficulties to contend with, but if they will just consider how much worse off their confreres are in many other countries, they will find sufficient reasons for thankfulness. We have sometimes short crops and early frosts, curtailing our incomes and increasing our expenses. But let us look at Minnesota and Manitoba with their periodical plague of grasshoppers. The stories of the past seasons are almost incredible. It appears the creatures came in clouds so dense that the sunlight was entirely shut off. These, in one day, in one district of Minnesota, utterly devoured three thousand one hundred acres of wheat. Two years ago hallstorms destroyed the crops, and for two years in succession the grasshopper. Hard times there.

April.—A word about health. In rural districts there is often a good deal of intermittent and other fevers, by which the lives of many are destroyed. How is this? Is not the country healthier than the city? As a general rule it is, but in the country there is too frequently a careless inattention to the laws of health. During the day there may be exposure to heat, producing perspiration. When the cool breezes of the evening spring up there is great temptation to sit down, and quietly enjoy the delightful atmosphere. This is done without putting on any additional clothing. The effect is a chill. It is thought nothing of, and the same foolish course is followed another day, and another. The whole system in this way becomes disordered and the foundations of fevers are laid. Beware of chills, avoid cold drafts and regulate your clothing according to circumstances.

MAY.—It is generally agreed that bread made from wheat flour is more strengthening than bread made from barley or oats. The reason is thus stated; because, as gluten, albumen, and caseine are the only substances in the bread capable of forming blood, and consequently sustaining the strength and vigor of the body, they have been appropriately called the food of nutrition, as a distinction from those which merely support respiration. Wheat contains eight hundred and twenty-five parts of starch, three hundred and fifteen of gluten, albumen and caseine, and sixty of sugar and sum, while barely contains 1,200 of starch, 120 of gluten, albumen and gum, while barely contains 1,200 of starch, 120 of gluten, albumen and caseine, and 160 of sugar. Wheat is, therefore, much richer in the food of nutrition.

JUNE.-A very short arithmetical calculation will enable any one to apply the statement of the Rural World to this Canada of ours That valuable journal says: When we consider that less than one-third of the area of the United States, and less than a fifth of the entire domain of the United States is mapped into farms, and remember of this farm area, only one-fourth is tilled or mowed; and when we further reflect that the average yield per acre could be doubled if the many could be brought up to the plain of the few in the practice of intensive culture; then we begin to realize what numbers our country is capable of feeding, and what waste of toil and effort comes from neglect of the economic lessons taught by the statistics of scientific agriculture. The misfortune is, that so few think on this subject, and many who think and know, will not practically exert themselves.

JULY.—Why do so many farmers treat their horses and colts so much better than their cows and heifers? Care is taken of the former in regard to stabling and feeding, while the cows and heifers have to shift for themselves and are often exposed to severe storms, fed on coarse straw. A cow that is poorly fed cannot give much milk, nor milk of a good quality. Milk is among the most nutritious of all the substances we consume, and cannot be manufactured from food that does not contain nutritious substances. We have heard of farmers telling their wives not to give corn to the cows, because it dries them up. It is not so, and the women show proper sense when they give good food to the cows, even though the husband should grumble. Good feeding to milch cows pays quite as well and better then almost any other animal well and better than almost any other animal.

August .- On the subject of profit arising from the proper treatment of milch cows, let it be remembered, that the average value of milk in town and country is six cents a quart. Suppose a cow to give three gallons a day, that would bring 72 cents, or nearly 22 dollars per month, as the value of her product. What other animal will make such generous returns for food, care, and generous feeding. Sound policy, therefore, demands cleanliness, good food, and proper shelter. Besides, every farmer knows, or ought to know, that the quality and quantity of manure which the farm requires depends on attention to the matter on which we have here written. An Englishman says, the more we feed the more we can produce, but he certainly means we should do the feeding on our own land or premises, and not on the king's highway. That is absolute folly and

SEPTEMBER. - An agriculturist has just given us his opinion about potatoes and their planting. He says he was educated to plant three or four good sized potatoes in a hill. Now, he knows better, and recommends cutting. Have the ground in good condition, plant at the right time, and then give them proper attention. He says, three years ago I planted one bushel each of Early Rose and Brigham seedlings, and dug of each kind thirty-two bushels of marketable potatoes. Have been in the habit of cutting my seed as I would to plant, yet I think it would be better to cut a few days before using, so that they may become glazed. Of all the varieties I have tried, I prefer the Early Rose. They are not only better in quality, but equal in quantity.

October.—There have been great differences of opinion concerning the virtues of orchard grass. This, like m st other things, is settled by experiment. A writer in the Philadelphia Press says that he has had a field of orchard grass over 30 years, that still gives bounteous crops breast high at maturity. The soil is strong, sandy loam. It was originally seeded in connection with red clover and timothy, which were long ago run out. There is now annually some white clover and blue grass which aids to make a thick bottom growth. The orchard grass, however, maintains the ascendancy, and he knows of nothing, alfalfa excepted, which will yield annually so much cattle food. But it is even superior to alfalfa or lucern as it is sometimes called, because better adapted to the rigorous temperature of northern latitudes. The facts herein recited, are worth remembering.

NOVEMBER.—Theory, based on experience, respecting raising pork, has been furnished by a correspondent, who says, during the hot summer months I would give very solid food, such as corn in the ear or uncracked. months I would give very solid food, such as corn in the ear or uncracked. I would keep hogs on green food constantly, either grass, oats, or rye; and feed them at regular intervals, once or twice a day upon mashed food, either shorts, chopped oats, or rye, or buckwheat, &c., fed in troughs. When fed in this way and at the same time allowed access to water and shade, then they will make flesh. This also puts them in good condition for corn feeding, which should commence about the first of September, when the new crop is new and tender. Treated in this way, there is no doubt about boost flourishing. doubt about hogs flourishing.

December.—Various opinions have been expressed about the uses and advantages of lime as applied to the soil. Some maintain that lime should be applied as soon after harvest as possible and upon wheat stubble. This is said to help the grass crops, puts the ground into good condition for corn, and does not make oats ripen unevenly. Another practical man says he obtained most profit by applying lime on the sod, the winter before the corn is planted. Another says, crisply, "Get it on, never mind where, but get it on." Another says he applied a handful of airslacked lime to the hill of corn after it was up, with marked benefit. The same, also says, he made a mixture of 50 bushels of lime, 10 bushels of plaster, and 6 bushels of salt. He dissolved the salt and slacked the lime with the brine. He sowed the mixture on twelve acres of grass in the spring and had a fine crop on land poorly set.

THE QUEEN.

VICTORIA, of the United Kingdom of Great Britain and Ireland, &c., Queen, Defender of the Faith. Her Majesty was born at Kensington Palace, May 24, 1819; succeeded to the throne June 20, 1837, on the death of her May 24, 1819; succeeded to the throne June 20, 1831, on the death of her uncle King William IV.; was crowned June 28, 1833; and married February 10, 1840, to his late Royal Highness Prince Albert. Her Majesty is the only child of his late Royal Highness Edward Duke of Kent, son of King George III. The Children of Her Majesty are:—

Her Royal Highness Victoria—Adelaide-Mary-Louisa, Princess Royal of England and Prussia, born November 21, 1840, and married to his Royal Highness Frederick William of Prussia, January 25, 1858, and has issue five

sons and three daughters.

His Royal Highness Albert-Edward, Prince of Wales, born November 9, 1841; married March 10, 1863, Alexandra of Denmark (Princess of Wales), born December 1, 1844, and has issue three sons and three daugh-

Her Royal Highness Alice-Maud-Mary, born April 25, 1843, married to H. R. H. Prince Frederick Louis of Hesse, July 1, 1862, and has issue three daughters and two sons.

His Royal Highness Alfred-Ernest-Albert, Duke of Edinburgh, born August 6, 1844.

Her Royal Highness Helena-Augusta-Victoria, born May 25, 1846, married July 5, 1866, Prince Frederick Christian of Schleswig-Holstein, and has issue two sons and one daughter.

Her Royal Highness Louisa-Caroline-Alberta, born March 18, 1848, married March 23, 1871, to the Marquis of Lorne.

His Royal Highness Arthur-William-Patrick-Albert, K. G., born May 1, 1850.

His Royal Highness Leopold-George-Duncan-Albert, born April 7, 1853. Her Royal Highness Beatrice-Mary-Victoria-Feodore, born April, 14, 1857.

ADVICE IN CASE OF DROWNING.

The following rules are adopted by the New York Board of Health :-

RULE I. Upon the nearest dry spot expose the patient to a free current of air, strip the clothing away from the waist, and give a stinging slap upon the pit of the stomach.

[If this fails to arouse the patient, proceed to force and drain away the water which has entered the chest and stomach, according to Rule II.]

DRAINING THE WATER FROM THE CHEST .- RULE II. Turn the patient upon his face, the pit of the stomach being raised upon a folded garment above the level of the mouth. For a moment or two make steady pressure upon the back of the stomach and chest, and repeat it once or twice, until fluid ceases to flow from the mouth.

RULE III Quickly turn the patient on his back, with the bundle of clothing beneath it so as to raise the lower part of his breastbone higher than the rest of the body. Kneel beside or astride the patient and so place your hands upon either side of the pit of the stomach, upon the front part of the lower ribs that the fingers will fall naturally into the spaces between them, and point towards the ground,

Now grasping the waist and using your knees as a pivot, throw your whole weight forward, as if you wished to force the contents of the chest and stomach out of the mouth. Steadily increase the pressure while you count one—two—three—; then suddent ego, with a final push which brings you back to an erect kneeling position; remain erect upon your knees while you count one—two—then throw your weight forward, and proceed again as before. Repeat the process at first five times a minute, gradually increasing it to about fifteen times a minute, and continue it with the regularity and rhythm of the natural breathing which you are imitating, if necessary, for about an hour.

If another person be present let him with the left hand hold the tip of the tongue out of the left side of the mouth with the corner of a pockethandkerchief, while with the right hand he grasps both wrists and pins them to the ground above the patient's head.

AFTER TREATMENT.—When breathing first returns, dash violently a little cold water occasionally on the face. As soon as breathing has been perfectly restored strip and dry the patient rapidly and completely, and rap him in blankets only. Give hot brandy and water, the first half hour a teaspoonful every five minutes, and tor the next hour a tablespoonful every fifteen minutes. Apply friction to the limbs if cold. Secure a free supply of fresh air, and let the patient have perfect REST.

PRACTICAL SUGGESTIONS WHAT TO AVOID AND PREVENT.—AVOID DELAY.—Promptness is the first consideration. A moment lost may be a life lost. Waste no time in gaining shelter; it oftener harms than helps the patient.

Prevent crowding around the patient, and everything which interferes with a free current of fresh air. However difficult this may be, it must be possibly enforced. The anxious efforts of kind friends to engage the patient in conversation when he is rallying and everything else which tends to increase his exhaustion, must be interdicted.

Avoid giving fluids before the patient is well able to swallow. When given too soon they must obstruct breathing, and may choke the patient.

Avoid hurried and irregular motions. The excitement of the occasion is almost certain to induce this. Move a flickering candle carelessly and it goes out; and the heart, when its beating has almost ceased, needs but little interruption to stop it. All the movements of Rule III. should be performed with steadiness and rhythm, and especially so when the compression is made as an adjunct to help the first natural gasps, and deepen them into long drawn breaths.

Avoid an over-heated room. The animal heat which is needed must be generated from within by the respiration of the air and by stimulants, and retained by blankets.

Avoid giving up too soon the patient to death. Any time within one or two hours you may be on the very threshold of success, though there be no sign of it. The author has several times succeeded after a half an hour of apparently useless effort. Do not neglect the patient too soon after apparent recovery; rest and care should be maintained for a few days, or pulmonary troubles may ensue.

Wintering Cabbage.—To keep cabbage through the winter, pack in sawdust in the barn, and allow the whole to freeze, the sawdust being such a non-conductor of heat that once it becomes frozen through, it will not thaw out until well into April, and cabbage will come out almost as nice as when put in.

MONEY ORDERS.

Every money order office in the Provinces of Quebec, Ontario, New Brunswick, Nova Scotia, Prince Edward Island, Manitoba and British Columbia, issues money orders on every other money order office in these Provinces, as well as on every money order office in the United Kingdom. Every money order office in the United Kingdom also issues money orders on every money order office in these Provinces.

All the money order Post Offices are authorized to draw money orders on each other for any sum up to \$100, and for as many orders of \$100 each, as the applicant may require, upon the following term, viz.,

On	Orders	up to	\$4 \$10				ents.	1107

MONEY ORDERS ON THE UNITED KINGDOM.

The money order offices throughout the Dominion also draw upon all the money order offices in England, Ireland and Scotland, and the Channel Islands, for any sum up to £10 sterling, and grant as many orders for £10 sterling each as may be needed to make up the amount to be remitted. The terms are as under:

.On	Orders	up to	£2			25	cent
	66	over	£2 and	up to	£5	50	66
	- 66	over			£7		66
	1146	over	£7	"	£10	1.	00

MONEY ORDERS ON THE LOWER PROVINCES.

The money order offices in Canada draw also upon all money order offices in Newfoundland. Orders like those of the United Kingdom, are made payable in sterling money, and for sums up to £10 sterling. The terms are:

For orders up to £5, 25 cents.

over £5 and up to £10, 50 cents. No half cents can be introduced into orders.

No money order exceeding \$100 in amount can be granted in any office in Canada; but Postmasters are at liberty to grant two or more orders for \$100, or for any lesser sum.—They cannot, however, grant two or more orders for sums of or under \$30 on the same day to the same applicant in favor of the same payee.

Mark Your Tools.—You can easily mark your name upon steel by a process called etching. Coat over the tools with a thin layer of wax or hard tallow, by first warming the steel and rubbing on the wax, warm until it flows, and let it cool. When hard mark your name through the wax with a graver and apply by aquafortis (nitric acid); after a few moments wash off the acid thoroughly with water, warm the metal enough to melt the wax, and wipe it off with a soft rag. The letters will be found etched into the steel.

POST OFFICE SAVINGS BANK.

1. The direct security of the Dominion is given by the Statute for deposits made in the Post Office Savings Banks.

2. Any person may have a deposit account, and may deposit yearly any number of dollars, from \$1 up to \$300, or more with the permission of the Postmaster General.

3. Deposits may be made by married women, and deposits so made, or made by women who shall afterwards marry, will be repaid to any such

4. As respects children under ten years of age, money may be deposited-

FIRSTLY-By a parent or friend as Trustee for the child, in which cas the deposits can be withdrawn by the Trustee until the child shall attain the age of ten years, after which time repayment will be made only on the joint receipts of both Trustee and child.

SECONDLY—In the child's own name—and, if so deposited, repayment will not be made until the child shall attain the age of ten years.

5. A depositor in any of the Savings Bank Post Offices may continue his deposits at any other of such offices, without notice or change of Pas Book, and can withdraw money at that Savings Bank Office which is mos convenient to him. For instance, if he makes his first deposit at the Savings Bank at Cobourg, he may make further deposits at, or withdraw his money through, the Post Office bank at Collingwood or Quebec Sarnia Brockville, or any place which may be convenient to him, whether he continue to reside at Cobourg or remove to some other place.

6. Each depositor is supplied with a Pass Book, which is to be produced to the Postmaster every time the depositor pays in or withdraws money, and the sums paid in or withdrawn are entered therein by the Postmaster receiving or paying the same.

Each depositor's account is kept in the Postmaster General's Office. in Ottawa, and in addition to the Postmaster's receipt in the Pass Book, a direct acknowledgment from the Postmaster General for each sum paid in is sent to the depositor. If this acknowledgment does not reach the depositor within ten days from the date of his deposit, he must apply immediately to the Postmaster General, by letter, being careful to give his address, and, if necessary, renew his application until he receives a satisfactory reply.

FEEDING VALUE OF RYE .- The Maryland Farmer says :- "The use of growing rye for feeding sheep, cows and calves, may be very advantageously availed of when it is necessary. It would be well to give the crop full chance for fall and winter growth, but towards spring, when the ground is dry enough, it may be moderately grazed until the 10th or 15th of April. The manure of the stock, if fed to any extent with grain at the same time, would amply atone for any diminution of the mass of green crop. The value of an early supply of green food for stock of every sort is not generally appreciated, except by professional graziers. They will know that a few weeks of green feeding in early spring tells largely on the profits of the whole year's grazing. In the raising of spring lambs especially, the value of such pasturage to give to the ewes a full flow of milk will be apparent."

8. When a der ing to the Postn for the amount, tor may have na

When a depositor wishes to withdraw money, he can do so by applying to the Postmaster General, who will send him by return mail a cheque for the amount, payable at whatever Savings Bank Post Office the depositor may have named in his application.

9. Interest at the rate of 4 per cent. per annum is allowed on deposits, and the interest is added to the principal on the 30th June in each year.

10. Postmasters are forbidden by law to disclose the name of any depositor, or the amount of any sum deposited or withdrawn.

11. No charge is made to depositors on paying in or drawing out money, nor for Pass Books, nor for postage on communications with the Postmaster General in relation to their deposits.

12. The Postmaster General is always ready to receive and attend to all applications, complaints, or other communications addressed to him by depositors or others, relative to Post Office Savings Bank business.

13. A full statement of the Regulations of the Post Office Savings Bank may be seen at the nearest Post Office.

THE STAMP ACTS.

These Acts impose a duty on every promissory note, draft, or bill of exchange, not exceeding \$25, 1 cent; not exceeding \$50, 2 cents; less than \$100, 3 cents; not less than \$100, if executed singly, 3 cents per \$100, or fraction thereof; if executed in duplicate, 2 cents per \$100, or fraction thereof on each part; if executed in more than two parts, 1 cent per \$100 or fraction thereof on each part.

Any interest payable with note at maturity must be counted as part thereof. The duty is to be paid by bill stamp, on which the date is to be written. Bank notes, checks, and money orders are exempt. These Acts mpose heavy penalties for violation.

VALUE OF BROOD MARES.—A paragraph in a late number of the Live Stock Journal mentioned the fact that E. Dillon & Co., of Normal, Ills., had sold our colts, the produce of one brood mare, for \$5,500; and we now allude to it or the purpose of stating that this is not, by any means, an exceptional asse. On the contrary, it has been demonstrated over and over again, that it is scarcely possible for the general farmer to keep any kind of stock a his farm that will prove so uniformly profitable as a good brood mare. tustances are numerous where a single brood mare, well and fashionably I red, and coupled for a series of years with popular sires, has, by her produce, made a handsome fortune for her owner; and in almost every neighborhood can be found mares of more than average value. The prudent, wide-awake farmer will be on the look-out for such mares; and whenever he can purchase them at reasonable prices he will not fail to do so. Such an investment cannot fail to do better than money at compound interest, if the mares be coupled with the right sort of stallions. Good horses always find a ready sale at high prices—the scrubs only are a drug in the market—and a colt can be raised as cheaply as a steer. To make horse-breeding profitable, you must start right. Horses are not sold at so much per pound in the market, like cattle and hogs, it is the quality that determines the price, and quality is a thing of inheritance, derived from the sire or dam, or from both. If the foal, when dropped, has not inherited those characteristics which give value to a horse, no amount of after care and attention can compensate for the lack of organic quality. It costs no more time or money to raise a good colt than a poor one excepting, perhaps, in the original investment-the difference in cost of a good brood mare and a poor one, the service of a first-class stallion and a scrub—and herein lies the secret of success.

THREE RIVERS.—Maskinongé, St. Maurice, (including City of Three Rivers,) Champlain and Nicolet. Held at Three Rivers from 28th March to 3rd of April, 28th June to 4th July; 28th September to 4th October; 28 December to 4th January.

SALT AS A FERTILIZER, -An inquirer of the New York Tribune wants to know how much salt can be used per acre with benefit, to which Prof. S. W. Johnson gives the scientific answer as follows :- "As to the quantity that may be applied per acre, that depends upon the crop and the climate. On asparagus several hundred bushels may be used without harm. On sugar beets, and tobacco, large applications will often promote growth, sometimes wonderfully; but the beets will not yield their sugar, and the tobacco will not make good smoke. On grain crops five to fifteen bushels per acre, and in England larger quantities have been used. More can be safely employed in moist climates or seasons than in dry. Ten bushels is perhaps the happy medium adapted for an experimental trial."

BEAUHARNOIS.—Huntingdon, Beauharnois, and Chateauguay. Held at Beauharnois from 16th to 21st March, 30th May to 4th June, 23rd to 28th November.

A CHEAP Well.—A correspondent of the Massachusetts Ploughman writes:—"Having been troubled with toads, bugs, worms, leaves and most everything else in my well, I thought I would try a new plan for a well. I dug a well about eight feet across the top, and twelve feet deep, that being as deep as I could get, on account of a ledge. I then took a section of cement pipe, two feet in diameter and three feet long; this I placed on the ledge, and filled in on the outside with cobbles as high as the top of the large pipe. I then covered the pipe with a flat stone in the centre, the size of a three-inch pipe, and piped it to the top of the ground, then filled the dirt back again. I then put in a common deep well pump; the whole costing me, when done, just thirty dollars. I now have the cleanest, coolest, and cheapest well about here."

June and September. Megantic County Circuit, held at Inverness, 13th to 17th March, June and December.

SAVE YOUR OWN SEED.—Every intelligent tiller of the soil will admit that "whatsoever a man soweth that shall he also reap." If one sows or plants inferior seed, he cannot expect a bountiful crop of either roots or grain. Small and half-matured kernels of wheat, oats, rye and corn cannot be expected to yield large panicles and ears filled with plump and heavy kernels. If one plants the seeds of carrots, parsnips, turnips and cabbage which grew in small pods and the half-matured panicles on the planter of the soil has been slender stems, he cannot produce large roots, even if the soil has been brought to an excellent state of fertility. This suggests the great importance of raising seed of the choicest quality. It will cost no more to raise one thousand bushels of beets or turnips, per acre, than three hundred, if plump and heavy seed has been properly saved. In order to produce large, heavy seed of garden vegetables, select a few large carrots, a few turnips, parsnips and beets, and plant them in rich soil early in the growing season. They should be planted about thirty inches apart, that the tops may have ample room to spread. When the blossoms begin to appear, clip off all the small side branches, leaving only four or five appear, clip off all the small side branches, leaving only four or two central stocks, which will yield seed of a much better quality than one can usually purchase. Every kernel of such seed, when planted, will produce a large root. Turnips and carrots may grow in close proximity; but turnips and carrots designed for seed should be transplanted several rods apart. One cabbage will yield as much seed as one family will care to plant, unless a crop is grown for market. A superb head should be transplanted as it grew. The top of the head should be cut open, so that sprouts or seed-stalk may readily spring up through the centre. cut open, so that sprouts or seed-stalk may readily spring up through the centre. As soon as the panicles of carrots and parsnips begin to turn brown, and when the pods of cabbage and turnips begin to lose their green color, let the stalks be cut off close to the ground and hung up in some out-building. When the pods, leaves and stems are quite dry, let them be spread on a clean floor, or on a large blanket, and the seed threshed off either with a flail or by crushing the pods with one's feet.

COURTS.

Oourts of Law and Equity.

COURT OF ERROR AND APPEAL.—Constituted for the hearing of appeals in civil cases from the Courts of Queen's Bench, Chancery and Common Pleas and appeals in Criminal cases from the Courts of Queen's Bench and Common Pleas. From the judgment of this Court, an appeal lies to Her Majesty in Privy Council, in cases over £1,000, or where annual rent, fee or future pleas and appeals in criminal cases from the Courts of Queen's Bench and rights of any amount are effected.

COURT OF QUEEN'S BENCH .- The jurisdiction of this Court extends to all manner of actions, causes and suits, criminal and civil, real, personal and mixed, within Ontario, and it may proceed in such, by such process and course as are provided by law, and as shall tend with justice and despatch to determine the same, and may hear and determine all issues of law, and also with the inquest of twelve good and lawful men (except in cases otherwise provided for) try all issues of fact, and give judgment, and award execution, thereon, and also in matters which relate to the Queen's Revenue (including the condemnation of contraband or smuggled goods) as may be done by Her Majesty's Superior Courts of Law in England.

COURT OF CHANCERY.—This court has the like jurisdiction as the Court of Chancery in England, in cases of fraud, accident, trusts, executors, administrators, co-partnerships, account, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performance, discovery, and to prevent multiplicity of suits, staying proceedings at law prosecuted against equity and good conscience, and may decree the issue, repeal or avoidance of letters patent, and generally the like powers which the Court of Chancery in England possesses to administer justice in all cases in which there is no adequate remedy at law.

COUNTY COURTS.—Presided over by a resident Judge in each County. Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed £50; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant, to £100; and to all bail bonds and recognizances of bail given in the County Court, to any amount; but not to cases involving the title to lands, validity of wills, or actions for libel, slander, crim. con., or seduction. An appeal lies to either of the Superior Courts of Law.

SURROGATE COURTS .- The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting or revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effects in Ontario, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Court of Chancery. The County Judges are also Judges of the Surrogate Courts. Chief Surrogate Clerk at Toronto, Sir J. L. Robinson, Bart.

Court of General Sessions.—The County Judge in each county holds a Court of General Session in his county semi-annually on the second Tuesday in June and December, except in the County of York, in which county said Court is held three times, commencing on the second Tuesday in March, June and December, for the trial of cases of felony and misdemeanor, but treason and capital felonies are exempt from their jurisdiction.

Terms of the Courts.

Court of Error and Appeal.—This Court holds its sittings twice a year at Toronto, in the months of January and June, upon such days as it may by rule or order from time to time appoint, and may adjourn such sitting from day to day, or for any such longer period as it may deem expedient, and may also appoint days for giving judgment or for disposing of business as in its discretion it shall see fit.

Law Terms.—Hilary begins first Monday in February, and ends Saturday of the ensuing week; Easter begins third Monday in May, and ends Saturday of the Second week thereafter; Michaelmas begins third Monday in November, and ends Saturday of the second week thereafter. By the Act 29

of the ensuing week; Easter begins third Monday in May, and ends Saturday of the Second week thereafter; Michaelmas begins third Monday in November, and ends Saturday of the second week thereafter. By the Act 29 and 30 Vic., cap. 40, Trinity Term, hitherto commencing on the Monday after the 21st August, is abolished; but the same statute gives power to the Court of Queen's Bench and Common Pleas, at their discretion, to hold sittings in banc in time of vacation (except long vacation), by virtue of a rule or order of the Court, respectively to be made in or out of term, for the hearing of such special cases or rules for new trials as shall be named in a list to be attached to any such rule or order, and for giving of judgments in cases previously argued, and for disposing of such other business as the Court in its discretion shall see fit. Novice of such rules to be given in form and manner prescribed by the Act, six clear days before the day appointed.

CHANCERY TERMS.—Examination Terms.—From 1st Tuesday of February to the Saturday after the 2nd Tuesday of April; and from 1st Tuesday of September to the Saturday after 1st Tuesday of November. Hearing Terms—From 4th Monday in April until Saturday of the following week, and from 3rd Monday in November until Saturday of the following week. The Court also sits every Tuesday (except during the regular vacations) throughout the year, for hearing motions for Decrees, motions for or to dissolve special injunctions, and appeals from the reports of the Master or Deputy Masters.

COUNTY COURT TERMS.—The several County Courts in Ontario hold four terms in each year, to commence on the first Monday in January, April, July and October.

GILT-EDGED BUTTER.—Farmers often speak, sometimes sneeringly of "gilt-edged butter," meaning that which brings the highest market prices, but complain when perhaps a third or half of the gilt-edged price is offered them for theirs. The high price is simply the return for the exercise of proper care and attention which they, in preparing their butter, failed to give. There are many more customers in town and city who will pay almost any price for the best quality of butter that can be supplied, and there is no excuse for the production of an inferior quality.

BUSINESS LAW.

- 1. Ignorance of the law excuses no one.
- 2. It is a fraud to conceal a fraud.
- 3. The law compels no one to do impossibilities.
- 4. An agreement without consideration is void.
- 5. Signatures made with a leadpencil are good in law.
- 6. A receipt for money paid is not legally conclusive.
- 7. The acts of one partner bind all the others.
- 8. Contracts made on Sunday cannot be enforced.
- 9. A contract made with a minor is void.
- 10. A contract made with a lunatic is void.
- Contracts for advertisements in Sunday newspapers are invalid
- 12. Principals are responsible for the acts of their agents.

- 13. Agents are responsible to their principals for errors.
- 14. Each individual in a partnership is responsible for the whole amount of the debts of the firm
- A note given by a minor is void.
 Notes bear interest only when so stated.
- 17. It is not legally necessary to say on a note "for value received."
- 18. A note drawn on Sunday is void.
- 19. A note obtained by fraud, or from a person intoxicated, cannot be collected.
- cannot be collected.

 20. If a note be lost or stolen, it does not release the maker; he must pay it.
- 21. An endorser of a note is exempt from liability if not served with notice of its dishonor within 24 hours of its non-payment.

THOMSON & WILLIAMS

AGRICULTURAL IMPLEMENTS, &c.,

MITCHELL FOUNDRY.

WE RECOMMEND THE

JOHNSTON SELF-RAKING REAPER

AND THE

Cayuga Chief Jr., Mower,

As the best Reaping and Mowing Machines in use. A trial of either or both offered to those who intend purchasing. We also build

THE OHIO COMBINED MACHINE,

WITH JOHNSTON SELF-RAKE,

AND GUARANTEE SATISFACTION.

We offer this year the celebrated Esterly broadcast seeder and cultivator, also the Farmer's Favorite or Superior Seed Drill and Sulky Horse Rakes combined, which every farmer should have,

WE HAVE FOUND WHAT EVERY FARMER WANTS!

TT IS THE

TWO-HORSE POWER SAWING MACHINE,

The power of which is supplied with strong fly-wheel, suited to driving a STRAW CUTTER, GRAIN CRUSHER, and other Machinery, with no extra charge, except for the belt. This machine is well suited to every farmer's own use, as he can with two horses and from three to four men or boys, cut from 20 to 30 cords of wood per day. Our machine has been thoroughly tested, and is strong enough for all we recommend it to do. It is supplied with friction flanges, by which the SAW is stopped when caught or pinched, before it would be possible to stop the horses. As A trial offered.

We also build the STRONG & GRAY PATENT 2 HORSE SAW-ING MACHINE, which took first-prize at the Provincial Exhibition, 1873.

We are building great numbers of the Cumming's Straw Cutter, for hand or horse-power. Large Straw Cutters with two knives and three changes of feed for horse-power. Also, Grain Crushers, with iron and wood frames, Fanning Mills, Horse-powers of all kinds, Gang Ploughs, Steel Ploughs with wrought iron beams, wood beams, and cast-iron beams, Horse Hoes, Weeders Cultivators, Land Rollers, &c. &c. Repairs of all kinds done promptly.

Orders by mail or otherwise solicited. Address,

THOMSON & WILLIAMS,

Mitchell, Out.

For Price List of Implements and Chause Machinery see 2nd Page.
