At a subsequent meeting of the Directors the Hon. J. B. Robinson, was chosen President and Henry M. Jackson, Esq., Vicc-President and Chairman of the Board in London, England.

JOHN B. ROBINSON, President. THOS. HAMILTON, Secretary.

REPORT OF THE CANADIAN DIRECTORS.

To the Proprietors of the Northern Railway of Canada :

TORONTO, Friday, 7th March, 1873.

1. The Canadian Directors have the honor to submit their Report for the year ending 31st December, 1872, with the usual appendices in detailed explanation thereof; observing that in consequence of the absence, in England, and on the business of the Company, of the Managing Director, it seemed to be expedient to postpone the Annual Meeting until the present date.

2. The Gross Traffic Receipts for the year have been \$894,774.40 (£183,857–15s. 0d. stg) as against \$777,498.94 (£159,760–1s. 1d. stg.) in 1871, shewing an increase of 15:08 per cent. By reference to "Account No. 1," it will be seen that this increase has arisen in each important class of traffic, viz.: on the Passenger, Local, and Through Freight accounts, respectively.

3. The ordinary "Working Expenses" of the year have been \$528,509.88 (£108,897 18s. 4d. stg.) as against \$461,316.44 (£94,791 0s. 11d. stg.) in 1871, giving for the year 1872 a rate on the Gross Traffic Receipts of 59.06 per cent. as in comparison with 59.33 per cent. in 1871, and showing a reduction of 0.27 per cent. in the rate. Having regard to advances in the wages of labor, and in the price of most articles of Railway supply, a rise in the rate of working expenses might have been expected, and would probably have occurred, but that the condition of the Permanent Way, the stock of rails on hand, and the expedient of local re-rolling, enabled the Directors to avoid any large purchase of rails at the high prices recently ruling; and although the larger the gross earnings, the lower the rate at which they may be earned, it may be prudent to anticipate some advance in future expenditure.

4. The expenditure upon necessary extensions and additions to works, buildings, rolling stock, and general equipment, has amounted to \$185,723.48 (£38,162 7s. 2d. stg.) as against \$138,478.76 (£28,454 10s. 9d. stg.) in 1871. The details of this expenditure will be found (in Appendices L. M. and N.) to represent very important, although quite insufficient, additions to the traffic equipment of the Line. The station buildings and wharves have been extended in number and capacity—upwards of $2\frac{1}{2}$ miles of new sidings have been laid down—five locomotive engines have been added to the stock—and 120 new cars of all classes (chiefly freight) have been placed upon the Line; and yet the Executive is obliged to acknowledge that the equipment of the Railway does not keep pace with the increasing demands of the traffic.

5. The Net Revenue carried to the account of Interest on the Company's Debentures (see Account No. 2.) with the balance brought forward from 1871, amounted to the sum of \$182,762.47 (£37,553 18s. 7d. stg.) and all Interest accrued due to date has been paid, and a balance of \$3,532.87 (£725 18s. 7d. stg.) has been carried forward to the credit of 1873.

6. The Leased Lines of "The Northern Extension Railways Company" now in Traffic operation represent a mileage of 45.34 miles, viz., from Barrie to Atherly 24.84 miles, and from Collingwood to Meaford 20.50 miles, and their earnings have already been sufficiently satisfactory to establish a certainty that they will be self-sustaining; whilst, as "feeders" to the Main Line of this Company, they have exercised a very palpable and beneficial influence upon its earnings in extending the sphere of commerce tributary to the City of Toronto.

7. In presenting this satisfactory review of the operations of the past year, the Directors have nevertheless to express their conviction that much remains to be done before the Railway can meet the pressing demands of the Trade of the District, or secure the profits of it.

There is scarcely an item in the Equipment Service in which (relatively with the trade and revenues offering) serious deficiencies ought not at once to be supplied, whilst the Directors only await additional financial powers to engage, as they propose to do without delay, in the changing of the gauge of the Line necessary to put it and the District in unbroken connection with the Western Peninsula of the Province, and with the American Railway System.

But with a capital account constituted as is that of this Company it is simply impossible to keep pace with the demands upon Δ

Notice has accordingly been given of the intention of the Company to apply at the present Session of the Dominion Legislature for such amendments to its Acts as may authorize the creation of new Capital for the purposes referred to.

The Directors invite the concurrence of the Proprietors to measures so obviously beneficial to local interests, observing that the adoption of the amended Act will of course be subject to their authority before being put in operation.

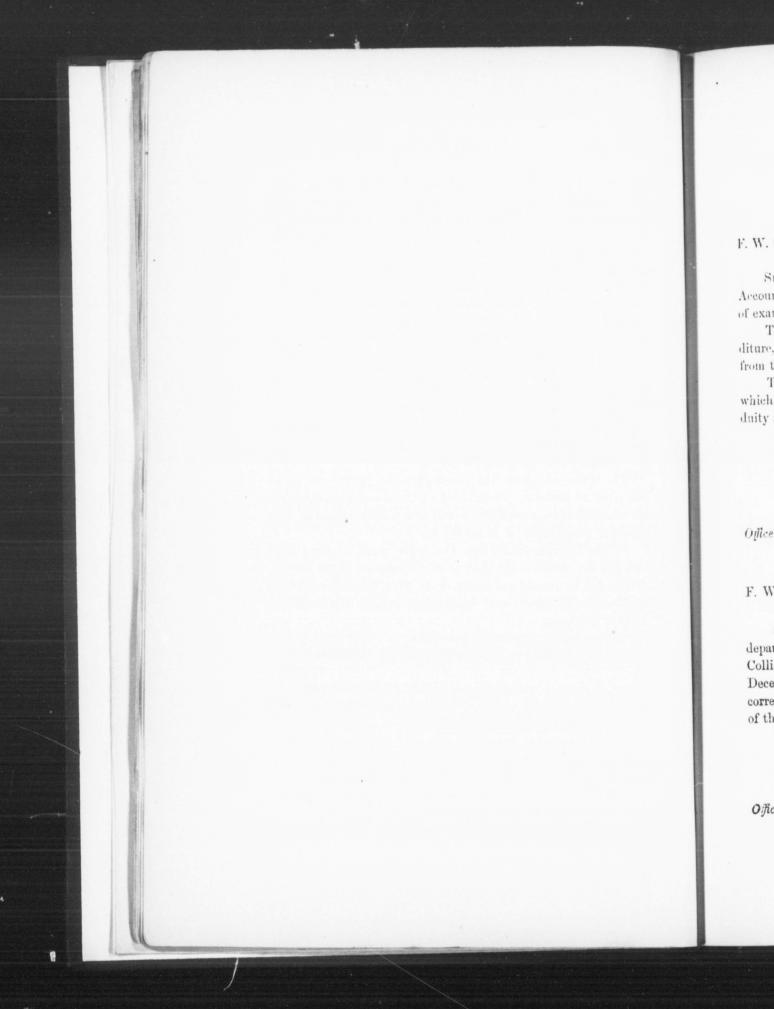

8. The Directors cannot close this Report without bearing testimony to the continued efficiency of all Departments of the service, and therein to the zeal and ability of the Chief Executive Officers, and to the satisfactory and harmonious working of a contented body of employees.

All of which is respectfully submitted.
