With these words, taken from the Gospel of St. Luke, Father Rvan opened his sermon on Wednes agents are concentrated that sin should be destroyed, then surely sin was worth while considering. Sin, although great, though terrible, though awfal in its effects, is very difficult to understand. One of its effects is the falling away from God's Church and the peril which that meant to the soul. The greatest triumph of the devil is the loss, the obliceration of the idea of sin. We hear about sin as an external impro-prietv as a personal and as a social evil. That is rue so far as it goes. But it leaves the real nature of sin out of the greatest it leaves out God. ne of the problems of the day is the labor question. What is wanted is a fair day's wage for a fair day's work. Leo XIII, who loves to be called the Pope of the people, has descended from his Papal throng and mingled amongst the working men, and written powerful letters in advocacy of fair treatment for the habores. But a greater that Leo has solved the labor question for ever. Christ came down from his habares of His brow and His alreadv dignifying labor. Christ has a frequentation of the secraments. To go to communion once a year, at faster time, to keep barely within the Church's fold, is surely not muse of not strates and refore the the say laid. But and defined it. It is the laborer who standis in need of do dask for having come down and a frequentation of the secraments. To go to communion once a year, at faster time, to keep barely within the Church's fold, is surely not in the Church's fold, is surely not muse a gifted, noble youth 'i the sais and did for us; that gave fim a new right of purchase. A JUBILEE GIFT.

Rev. Matthew A. Taylor, rector of the Church of the Blessed Sacrament, New York, whose silver jubiless is soon to occur, has been presented by his parishioners with \$30.-000 to pay for a new parochial residence. The people wished to make a personal present, but Father Taylor asked that it take the form of rectory.

GOLDWIN SMITH On the Progress of Religious Thought. 

#### A REVIEW BY "CRUX."

In last week's issue I analyzed a Bruno, on the spot of his martvr-bortion, especially the introduction, age which he foresaw.' " portion, especially the introduction, of Professor Goldwin Smith's contribution on "Religious Thought in the Nineteenth Century," to the "New York Sun." I have left aside for a bridf space the serial essay on 'Irish Endurance," in order to take up this important work. As the Professor's article fills twelve solid columns of the "Sun," it stands to reason that I could not do it justice in less than a dozen issues of the "True Witness." However, I cannot allow his expressed views concerning the Catholic Church in Europe, and in the Province of Quebec, to go unchallenged; and as his closing, re marks-which constitute a summary of the whole article-are of para mount importance, I will have to crave indulgence if I continue, next week, this review, and follow the able writer to the end of his story.

While it would be absolutely impossible for me to go step by ster along the lengthy road traversed by Goldwin Smith in this elaborate exposition of his personal views, still, for obvious reasons, I desire to quote one paragraph, which deals with a man whose name once rang through out all America-I mean James Anthony Froude. Smith says of him :-

"James Anthony Froude had been follower and fellow-worker of Newman. But on Newman's secession he not only hung back, but violently recoiled and produced a highly scep tical work, "The Nemesis of Faith," which entailed his resignation of a clerical fellowship in an Oxford col-lege. Then he exemplified the strange variations of the age by coming out as an historian in the colors of Carlyle,"

It is evident that there was "no love lost" between Goldwin Smith and Froude. Of course, the personal jealousies of rival professors may account for the somewhat uncomplimentary manner in which one ex-Oxford teacher deals with the lifework and influence of another one; but, it is impossible, in tracing the progress of religious thought in America, to disassociate Froude and Father Tom Burke, O.P. Yet Smith finds a way to slap Froude a little sharply, while absolutely ignoring the historian's great rival, opponent and conqueror. In this do I perceive, still more strongly than in his actual work, the animus of the Professor against aught that was good. great, or grand in the Catholic Church

Possibly Mr. Smith is honest, that is to say, that he does not believe himself to be swaved by any unfounded and unjustifiable prejudices: yet, no man can read the following without a feeling akin to amusement :--

"The Roman Catholic Church has and suffered from criticism, histori-al, literary, or scientific, in the mame way as the Protestant

This all proves nothing. The scene in Rome, Naples, Loretto, Lourdes, and other shrines of Catholic pilgrimage during the Holy Year just closed, constitute facts that crush into powder this assumption of the unbelieving professor. Not the"poorer classes," but the representatives of every social grade, in every land which the sun shines, flocked upon to these scenes of faith-inspired de votion. After attempting to establish the existence of a division the Catholic Church, and failing most signally to do so, he explains

"The Jesuit has ruled at the Vati-an. Under his guidance the Papacy has proclaimed the infallibility of the Pope and the Immaculate Con-ception of the Virgin, thus breaking completely and finally with reason completely and finally with reasor and with all who, like the "Old Catholics" in Germany, remained in some degree within that pale. It has gained in its own despite in respect-ability and influence by deprivation of its temporal power, against which the prisoner of the Vatican still hopelessly protests."

everything this wise

At first glance I could scarcely be lieve that the writer of "pure English'' par excellence, could have couched such an amount of pure

nonesense in so few words: but when I perceive the "Jesuit" bounding upon the scene, conjured into a fan ciful existence by the magic pen of the wizard professor, I am forced to the conclusion that this is but a fragment of his ill-conceived theory regarding the influences within the pale of Catholicity. Firstly, the Jesuit did not rule at the Vatican, nei-

ther on the Pontifical throne, nor in the conclave, nor in any of the No more did any congregations. other of the religious orders of the Church rule there. It was the direct inspiration of Pius IX. unsuggested by any special religious or secular body, that brought the promulgation of the pre-existing dogma of the Immaculate Conception, before the Council. The dogma of the Infallibility was only taken up as an item of that Council's programme, after the Council had met and had completed more than half of its pre-arranged work. In both cases the necessity, or advisability of a promulgation came in such a spontaneous manner, that the working and inspiration of the Holy Ghost were obvious. The "Old Catholics in Germany-Dollinger and others-did not "remain in some degree within that pale" of the Catholic Church. It is not possible to remain therein "in some degree ; none better than Goldwin Smith knows that you must accept all the

teachings of the Church, without excal. literary, or scientific. in the same way as the Protestant churches, that is, internally, because it depends not so much on intellec-tual conviction, as on ecclesiastical organization/ and rests comparative-ly little on the authority of the Bible. Its priesthood has not been affected like the clergy of the Church of England or the ministries of the Protestant churches. But it has everywhere been losing the educated classes, or retained a part of them ception, or else be outside her pale He who is not with Me is against Me; " there is no compromise, no half measures, no degrees -Truth is one and indivisible. Consequently he is wrong to say that the "Old Cath olics" remained, in any way; within the pale of the Church. Perfect and entire submission is exacted: other-There was no "breaking with reason" in the promulgation of these dogmas. If they conflicted with reason after their promulgation so must they have conflicted for all time before. Moreover, reason, in matters of faith, must submit; human reason is fallible, the Church is infallible. But apart from this stand, both of these dogmas are most rational. The Divinity of Christ presupposes the Immaculate Conception; if He had been conceived in sin, or in aught that was tainted, His very Divinity might be challenged. His Divinity again necessitates infallibility otherwise His omniscience would vanish, and with it His Divinity Then mr. Smith says :-- "It has gained in its own despite in respectability and influence by deprivation of its temporal power, etc.' For a master of "pure English" this is a very sorry specimen of his style. What he means, very likely, is this "In spite of itself the Church has gained in respectability and influence in being deprived of its tem-If this is his mean poral power.'

have in this phase of the question. However, I will attempt to briefly direct his unfairness towards French and Catholic Canada. He says :-"In French Canada. He says — "In French Canada the Catholic Church has reigned over a simple peasantry, her own from the begin-ning, thoroughly submissive to the priesthood, willing to give freely of its little store for the building of churches which tower over the ham-let, and sufficiently firm in its faith to throng to the fane of St. Anne de Beaupre for miracles of healing. She has kept the 'Habitant' ignor-ant and unprogressive, but made him, after her rule, moral, insisting on early marriage, on remarriage. a early marriage, controlling his habits on remarriage, s and amusements with an almost Puritan strict-ness. Probably French Canada has been as good and as happy as any-thing the Catholic Church had to

-

show This is the same old, narrow, bigoted and prejudiced story. A man of Goldwin Smith's intellectual calibre should be above such petty methods That "simple peasantry" in throng ing to the fane of Ste. Anne de Beaupre has done exactly what one milof other races from other provinces, and from the United States, have lion six hundred thousand pilgrims done during the past ten years. Faith dr?w them, and miracles un contestibly avouched confirmed that faith at the shrine. It is even some thing that Mr. Smith admits the moral character of the "Habitant," under the Church's influence- more than can be said of his own fellowcountrymen (if he can claim any special country in his erratic migrations), or of his own co-religionists if any such exist).

Now, we are treated to something eally new, in this form :

"The priesthood was of the Galli-"The priesthood was of the Galli-can school. It lived on good terms with the state, though in French Canada the state was a conqueror. From fear of New England Puritan-ism it had kept its people loyal to Great Britain during the Revolution-ary War. From fear of French athe-ism it kept its people loyal to Great Britain during the war with France. It samg 'Te Deum' for Trafalgar. So things were till the other day."

The priesthood was no such thing. If he means of French extraction from Gaul, I'll admit he is correct; if he means that the Cana dian priesthood was tainted with Gallicanism, I deny the assertion and defy him to substantiate it. The French hierarchy and clergy preached loyalty to the people, not on ac count of Puritanism, nor of Atheism, but because (as Mgr. Briand so well explained) the Church exacts from all Catholics respect for and loyalty to the constituted authority under which they live. On principle; on Catholic principle; on• the Church's precept and invariable practice; and not for any other reasons or motives, were the Catholic episcopate and clergy loyal; and for the same reasons, as well as for others additional, are they more oyal to-day than is Goldwin Smith.

But here comes the perpetual Jeuit! What a haunting phantom! How he disturbs the dreams of the sage ex-Professor of Oxford, the Yankified Englishman with anti-Canadian proclivities. He says :--

"Bur then came the Jesuit. He got back, from the subserviency of the Candian politicians, the lands which he had lost after the conquest and the suppression of his order. He supplanted the Gallicans, captured the hierarchy and prevailed over the great Sulpician Monastery in a struggle for the pastorate of Montsup the

The Jesuit did not come "then." He came in 1511 ; he came before Quebec was founded; he established in 1635 the first college on the continent-one year older than Harvard -he evangelized the native before Montreal was visited by De Maisonneuve; he discovered the great lakes and the Mississippi; he died at the stake; he perished on the frozen prairies; he taught, he suffered, he labored, he civilized, he Christianized; he acquired, under these conditions, his estates; he was robbed of them; he had them restored to him: he came into his own: and Canada is the greater, the better, the more prosperous, the more glorious, be ause of that awful Jesuit. He did not "supplant the Gallicans; " he supplanted no one- much less non-existant persons. He did "capture the hierarchy : " we not doubt if there is a single Jesuit Bishop in Canada. Members of other orders-several Oblates, for example -have received the mitre; but the Jesuit not only has not usurped any episcopal honors, but his mission and his rules both constitute barand his rules both constitute bar-riers to his probable advancement in that direction. Then again, there is no such thing existing as a "Sulpician Monastery." The Sulpicians are not monks; they are not cloistered; they are known as the "gentlemen of the Seminary; " their mother-house is the Grand Seminary-for theological -combined with the Montreal-College-for regular classical education-and, thereto do they add parochial work wheresoever the Episcopal authority requires it of them. Next week I will have more to say concerning Goldwin Smith and his Progress of Religious Thought.

IMPORTANT STATISTICS .- The "Catholic Transcript" says :- The-clerk of the Health Board tells us that there were 1,883 births in the city of Hartford during the year 1900. The records of the parish egisters of the city which are faithfully kept in the Diocesan Chancery. show that there were baptized in the various Catholic churches of the city during the year no less than 991 souls, or ninety-nine more than one half of the entire births in the city The population of Hartford, ac-cording to the latest census, is about 80,000, or, in exact figures, 74,850. Of these, not quite one-third are Catholics. If we reckon them at just one-third, we shall be able to make some striking combinations. Thus, we will allow that there 26,-616 Catholics and 53,232 non-Cath-olics in Hartford. From 26,616 Catholics, 991 children 'were born ; from 53,232 non-Catholics, 829 chil-dren were born. A striking disparity The population of Hartford, ac-

dren were born. A striking disparity it will be confessed. The birth-rate among Catholics for the year just closed was about 39 to

the thousand. The birth-rate amon the thousand. The birth-rate among non-Catholics for the same time was about 17 to the thousand. From which it appears that in the matter of fecundity people of our way of thinking are twice blessed when com-pare wth their dissenting neigh-bors. Thus far, Hartford.

It is impossible at the present It is impossible at the present time to obtain returns from the whole state for the year 1900, but it is safe to predict that when the number of births shall have been re-turned to the Capitol, it will not be twice as large as that which records the Catholic births in the Chancery office of the diocese of Hartford, al-though Catholics are barely one-third of the population. In the year 1899, there were in the State of Connecticut 20.855

the State of Connecticut 20,855 births. The Catholic baptisms for the same period were 10,262, or the same period were 10,2 about 600 less than one-half entire number of births. In 1900, th entire number of births. In 1900, the Catholic baptisms of the state were 519 more than the previous year, or 10,781, which makes it allowable to conclude that more than half of those born within the confines of the commonwealth during the last year of the old century were hentized in

the old century, were baptized in Catholic Church. hese figures should be interesting These Catholics to Catholics and non-Catholics Cal alike. Could we call a citizen of this ter state who passed to his reward sixty years ago and read to him the fig-ures quoted above, would he not question and doubt and dismiss question and doubt and dismiss them as altogether fabulous? Those of us who are given to forecasting of us who are given to foreca the future may well ask what wil the next sixty years bring. It is a singular fact that one-half of the children born in Connecticut' during the last year of the 19th century when at the opening of the same century not one in a hundred was of that faith. Food for speculation lies under these eloquent figures and those who are interested should not fail to take thought

nore fundamental sense than it be-longs to its parents. As so often happens in French legislation, public opinion is slowly burrowing its way down to first principles. Danton's de-testable doctrine will prove too much even for a French radical. Human nature could never endure it. As the Comte de Mun was careful to point out in his most recent speech on the measure. M. Waldeck-Roussen is "not likely to succeed where Napo-leon and the convention failed."

METHODISTS ARE RESTIVE -METHODISTS ARE RESTIVE. — The Western "Watchman" asks :— Are the Methodists going to yield on the question of card playing and dancing? At a conference in Brock-lyn last week Rev. B. M. Adams, of Bethel, Conn., declared that his young ladies were falling away from the church because of the prohibi-tion to indulge in these worldly am-usements. His statement was ap-plauded by the conference, showing that other ministers had the same experience. He said that because

that other ministers had the same experience. He said that because the Methodist young ladies did not dance or play cards they could not mingle in the best society and were unable to make favorable matrimo-nial matches. With Methodist par-sons and Methodist spinsters the greatest commandment of the law is to get married, and anything that is an obstacle to this must go.

A SIGN OF THE TIMES. -Boston is ceasing very rapidly to be the city of the Puritans, remarks the "Sacred Heart Review. A writer in the "Congregationalist" says that in a certain school district in this city. of 2,700 children 2,650 are known not to be Protestants. The seating capacity of the Protestant churches in Boston exceeds the needs of their worshippers. The same writer says that if all the Protest-ants able to attend church should be present at one service, the Protest-ant churches in Boston would still have 21,625 empty seats. in a certain school district this

LAST WILLS .- Wills should be made with care and deliberation, says the Cleveland "Catholic Unisays the Cleveland "Catholic Uni-verse." Many postpone the making of their wills until their last sick-ness. As few know what sickness will be their last, many die intes-state. Dying in this condition, oblig-ations of justice are frequently un-provided for, and foundation laid for expensive and acrimonious litig-ation.

Many people look upon a will as binding or almost as binding as a deed, and hesitate to make one un-der the impression that the would der the impression that the would thereby sign away their rights. While the testator is living, the will, though signed and sealed, is dead ; the will gets life only by the testa-tor's death. A new will can be made at any time, and the last will dis-poses of any or of all other wills made by the testator.

In making a will, be mindful your parish church or school and of the charitable institutions. These provisions may make amends for some shortcomings and neglect. Be-fore you go to meet God, write in your will something for His greater o meet God, write in ething for His greater honor and glory.

#### CHAIS TO YOUNG MEN.

The story printed by one of the New York papers that the salary of Mr. John A. McCall, president of the New York Life Insurance Company, New York Life Insurance Company, is to be raised an additional \$25,-000 a year, recalls the incident that many maint in Mr. Me-000 a year, recalls the incident that proved a turning point in Mr. Mc-Call's career. It reads like a chap-ter from the books that used to be published for good little boys, and incidentally shows that it pays to do more than your mere duty. In the seventies, Mr. McCall, then a young man with a wife and two children, received an appointment in the New York State Insurance De-partment in return for work done

"As a result, the notice to Mr. Mc-Call, advising him that his services were to be dispensed with, was withdrawn, and he remained in the Insurance Department, in various successive capacities, until 1883, when he was appointed by Governor Grover Cleveland as Insurance Com-missioner. After his term expired he accepted an offer from the Equit-able Life Insurance Comput to act at its controller, and when the New York Life was reorganized he was, by the unanimous vote of its direct-ors, elected as president.-Philadel-phia Saturday Evening Post.

Reasoning false; facts inexact! The Catholic Church has not suffered from criticism; but ecclesiastical organization is not the reason. She has suffered no loss of strength and influence, because she is the "Pillar and Ground of Truth," her doctrines are immutable, her foundation was Divine, and she enjoys the exceptional advantage of the perpetual prece of Christ to prevent "the gates of Hell" from "prevailing against her." In support of his as. sertion that she has been losing the educated classes, he can only cite the case of St. George Mivart - a very poor and isolated case when trasted with the Newmans, Mannings, Brownsons, and scores other eminently educated men that have been attracted to her standard the light of Truth within her. He then says :--

UNITY NECESSARY. — The Mil-waukee "Catholic Citizen" in refer-ring to the Catholic College Conferheld in Chicago last week, say ence held in Chicago last week, says: The central idea of these confer-ences is unification of the higher educational system among Catho-lics. It is well that Catholic educators have awakened to the necessity of system. The individual Catholic col-leges and high schools have given excellent results, but the absence of rescellent results, but the absence of co-operation and the lack of a pro-gressive system leading from school to college and to the university has been the weakness of our higher education.

education. It is not only the w?avness of our higher educational system, but much more of our parochial schools. In most dioceses there is a total lack of unity or co-operation in these schools. Each school is a law unto itself. They lack unitormity in chools. Each school is a law unto tself. They lack uniformity in me-hod, in text books and are scatterd units working for the same end without connection or co-operation

appointed to succeed the Der crat under whom Mr. McCall neld

Things looked pretty black for the young clerk. Out of his salary he had been able to save little or noth-ing after providing for his family, and the prospects for getting an-other place were almost hopeless. But the fact that he was going to lose his job did not apparently in-terfere with Mr. McCall's conviction that he ought in the meanwhile to earn the salary he was still draw-ing. Therefore it happened that the new Insurance Commissioner, in passing the Capitol late at night, noticed on half a dozen occasions that lights were still burning in a room of the Insurance Department. This made him curious, and he con-cluded to investigate. So he went upstairs and found young McCall bending over ladger and regard and Things looked pretty black for th-

Unfortunately, I again must say it there are no homes, or scarcely any. The wealthy do not care to contend perpetually with the vexed question of domestics. The servant girl is now mistress of the house, and the real mistress is a figure-head, or drudge. The servant man dictates terms, as well as details of work to the master. To get rid of this intolerable nuisance, homes are being broken up, winters are spent abroad ummers at the sea-side, or else the whole family takes up board in are separated by so narrow a ma some fashionable hotel. But it is amongst the middle and cities? In fact, is there such a thing the laboring classes that the home is becoming extinct. Take a child as "home" to be found in the world and at the dawn of this twentieth that was born in one of our most century? When John Howard Payne comfortable flats, ten to one he will composed the imperishable "Home Sweet Home," although he was have lived in four or five different homeless himself, he had an appreciplaces before he is old enough to understand the full meaning of a home ation of the meaning of that for which he longed and which he was And when he awakes to the reality he discovers that he is and has been destined never to enjoy. When the Irishman speaks of "Home" he has a homeless being. There is not one reference to the land of his birth, house that his parents had occupied in which his spirit lingers, no one and in some cases to the land of his place filled with objects of a refining to him, no matter on what part of the earth he is to be found. And side by side with the eyidences of these straitened circumstances are ac-counts of individuals amassing vast sums of money and becoming mil-lionaires. It seems to us that Pro-testantism, which practically puts hardly any restraint on the exercise of men's natural qualities, good and of men's 'natural qualities, good and bad, will never succeed in producing that equality of condition, or at

that equality of condition, or at least that approach to it which so-cial justice demands. It is the aim of the Socialists to do so. Their schemes are, however, chimerical. The true secret of general prosperity lies in the Catholic principle which, whilst encouraging individual efforts prescribes that so long as people are in want of the necessaries of life no man may enjoy superfluities. Mr. Samuel Smith himself fails not to recognize that the increase of life no man may enjoy superfluities. Mr. Samuel Smith himself fails not to recognize that the increase of wealth and luxury in England has led to lower standards of life and duty. To the members of the Chris-tian Endeavor Union he expressed his regret at the disappearance of the prophets who struck the keynote of righteousness and the pain he felt in finding that they have left no suc-cessors. They have been followed by mere politicians and opportunists, and the dominant note of the pub-lications of the press is favorable to materialism. This is but the natural trend of the Protestant theory of prosperity as it actually works out. The spread of infidelity is one of the fruits which Mr. Smith assigns to "priests and Sacraments." Mr. Smith's prejudices have been carry-ing him away. The extent to which unbelief prevails at the present day is no doubt deplorable, but surely in that matter Protestant are not en-titled to cast reproaches at the Catholic Church. The sum thus given amounted to \$150,000. It was provided that the college should be forever free to students of the state of Nebraska. When the buildings were completed, the management was turned over to the Society of Jesus. THE IMMIGRANT MONUMENT .-It is announced that on Sunday, May 5, at 2.30 p.m., in the basement of St. Gabriel's Church, Centre street, a meeting, in connection with the removal of the "Immigrant Monument" at Point St. Charles. will take place. The meeting will consist of three delegates from each of the Irish societies of Montreal. We hope that this meeting will reach some satisfactory and practical conclusion in this very important matter. The stone, which has - become recognized as a national monument. has attracted considerable attention of late, and differences of opinion regarding its removal have been met; but we trust that this time the subject will be settled in a manner satisfactory to all.

A MYSTERIOUS DEATH. - One night last week a very sad event took place on a St. Denis street car. An elderly lady boarded the car at Marianne street; the man paid the three fares. He and his companion left the car at Ontario street, leaving instructions to the conductor to see that the elderly person should get off at Ste. Julie street. When this street was reached, to the surprise of all present, the old lady was dead. This is one of those striking incidents that stand out in broad relief upon the page of each day's story, and which should serve as lessons and warnings to all who hear of them. Last week he went to St. Ann's parish, where he administered the Sacrament of Confirmation to a great number of young persons. though there are yet many months between us and the next municipal elections, still we deem it proper to do, as we have done in the past, and "taking time by the fore lock" raise a warning note. We have heard rumors already to the effect that next year an attempt will again be made to juggle the Irish-Catholic element out of their regular turn for the mayoralty. It is yet too early to say much on the subject; but we would advise our people

not to fall asleep in a dangerous security. As a rule, we allow matters to take their course until the very last moment, and then we come along wh<sup>2</sup>n it is too late. The last contest proved this. Had our advice, given as early as May of that year, been heeded, an Irish Catholic would have been Mayor of this city during the present year. We hope that energy like that displayed at the eleventh hour, on the last occasion, will be noticed from this moment forward. If so, there can be no question as to the result. Silence reigned again within the temple, where so recently thousands thronged One grand object had they all in view; namely, the fulfilment of the jubile conditions. As we contemplated that vast concourse of various ages sexes, conditions, races, and from different parishes, coming and going, bent upon one grand central purpose, and accomplishing the processional duty of visits, we could not but think of the Church which was thus so positively represented. This is the manner in which the hundreds of millions of Catholics, scattered all over the earth, move by one grand impulse imparted to them by the infallible head of our Holy Religion. Never such a sermon was preached in our city; never before such an edifying evidence of the faith that is in the hearts of our people.

THE CHINESE WAR. -We have not yet done with the troubles in China. It was thought for a while that a peaceful solution of the problem had been reached, but now, with Russians driven out of one section of the country, and an army of 27,-000 men marching out of nowhere to shake the hold that the "strangers" have upon the Empire, it would seem as if China was going to give the world a season of great sensations. What will be the result?

#### A BIGOTED JUDGE. - There ar bigots who are not the descendants of patriots, and in this connection we find the following editorial comment, from an American exchange, quite appropriate :--

It is not unusual for those who sell their birthright for a mess of pot-tage to spit venom in the face of their spiritual Mother, and boast of their American citizenship as though it was incompatible with Catholic life and principles. Judge Solders has written himself down as a nar-row-minded bigot, too weak to live the robust life of Catholic faith and too shallow to sound the depths of of pot-face of boast of thouse shallow to sound the depths of olic truth. Unless he voiced the sentiments of the Homeopathic College of Medicine he proved himself boor by insulting his audience and taking advantage of the courtesy of the College to do so."

EDUCATION IN IRELAND. - A very important vote was taken or Monday night last in the Imperial House of Commons. It was on the question of education in Ireland. While the motion made by Mr. Roche was rejected, still the large number of votes cast in favor of it, goes to the cause is gaining strength. When we find the leader of the Government, Mr. Balfour, supporting the motion in a strong speech, and 147 members-or about 67 apart from the solid Irish party -voting in its favor, we cannot but conclude that the hour is fast approaching when Ireland's needs will be duly recognized. The despatch telling of the vote reads thus :--The House of Commons this week debated a motion made by Mr. John Roche, member for East Galway, de-manding facilities for a university education for Catholics in Ireland without restrictions violating their religious feelings. Mr. Arthur Bal-four, Government leader in the House, whose personal attitude on the question is well known, his views being at Variance with those of the question is well known, his views being at variance with those of a majority of his party, earnestly sup-ported the motion. A young man who had a few dollars in his pocket and no one to guide and, watch over him would surely fall in with bad companions, and after in-temperance, would come other evils which would drag him down in a short time to an abyss of impotent manhood. When this result had tak-en place it was too late to look to the cause. The reverend preacher con-demned as pernicious the practice of some parents to exact from their some parents to exact from their sons a small amount as board and leave the young fellows free the what they liked with the remain of their salaries. #### MISSIONS TO NON-CATHOLICS.

Unmistakable signs of the growing interest in the conversion movements are manifesting themselves everywhere. Both the Rev. Father Quinlivan and the Rev. Father Ryan referred to the grand jubilee procession which to the grand jubilee procession which took place on Sunday. The pastor of St. Patrick's Church said it was a very edifying spectacle, not only by the number who took part in it, but by their conduct throughout. PAPINEAU AGAIN .- Of course we are aware that the direct descendant of the great Papineau, the present seigneur of Montebello, has, for reasons of his own, seem fit to abandon the Church of his fathers and link his future to one of the many sects of Protestantism. In a letter to the "Star," on the nucstion of the proposed monument to Montgomery at Quebec, Mr. Papisaid heau "Montgomery, like Franklin, and the priest, Carroll, of Baltimore, came to offer us liberty and independence, etc." The words "the priest Carroll" indicate the narrowness of the mind that conceived them. The wonder is that he even admitted that Bishop Carroll, being a Catholic prelate, have offered us anything but slavery and ignorance. But the closing part of the sentence explains it all : "but

Lord Bathurst, the Colonial Minis-ter, who was consulted by the Earl of Dalhousie, declared himself op-posed to the formation of two dis-tinct and separate royal institu-tions, but admitted at the same time the timeliness of creating two man-aging boards, one Catholic and one Protestant, with a single corpora-tion for the two boards. Mgr. Panet concurred in Lord Bathurst's views and made certain observations on the formation of the Catholic board, its composition, its working and its relations with the Royal Institution. The contemplated organization and the remarks of the Bishop of Que-bec were the subject of discussion by the Committee of the Royal Institu-tion, which adopted the resolutions that the Governor had transmitted to Mgr. Panet. The latter, in re-ply, expressed his suprise at not-ing that the Royal Institution de-sired to retreat from its position and asked the Earl of Dalhousie for permission to adhere to the terms of his letter. In the following year, Mgr. Panet Lord Bathurst, the Colonial Minis report to comment upon the results for the year that has expired, but we will reserve a careful study and

Naturally he is obliged to step rapidly along the highway of one hundred years, yet, in his brief summary of the progress and deve-lopment of education and of educa-tional institutions in this province, since 1800, he sets forth in a very clear, consecutive, concise and logic-al manner the leading facts that mark that phase of our history. Apart from the tables of dates and statistics, with which we will have to do in future articles, when touching upon the details of the educational situation in Quebec, we give the introductory letter in full. In the following year, Mgr. Panet In the following year, Mgr. Panet wrote to Sir James Kempt, the ad-ministrator, at the Chateau St. Louis to inform him that His Lord-ship (the Bishop) would be always prepared to accede to the proposals of 1827. But the matter rested there

It will be noticed that Mr. De La It will be noticed that Mr. De La pruere starts out with the confisca-tion of the Jesuit estates in , 1801, and presents, in very exact and com-prehensible terms the history of the educational system that has so won-derfully developed and which owes its initial workings to two of our Catholic bishops. The splendid ex-ample of religious toleration set by the Catholic element is admirably explained, and the founding of the great, leading, higher educational in-stitutions is given in more detail I have laid some stress on this his I have laid some stress on this his-torical point because, half a cen-turv later. in 1875, Hon. Mr. De Boucherville, the Premier of the Province of Quebec, recognized the necessit. of establishing a Council of Public Instruction composed of two committees, one Catholic and the other Protestant, in order to further secure to the minority the control of its schools and to contribute to the maintenance of harmony between the religious beliefs. elig If

Mc-Gill and Laval come first in im-portance; then follow the many col-leges that have sprung into exist-ence within the last half century es-pecially. The story of the different Normal Schools is told in few words, but sufficient for us to form an idea of their origin and progress. One of the most important paragraphs is religious beliefs. If a comparison be made between the year 1825 and the year 1875, it will be seen that the Catholic ma-jority in our province endeavored to act with justice towards the Pro-testant, minority, thus setting to Upper Canada, in the first place, and then to the provinces of Confedera-tion, the finest example of religious tolerance and respect for the con-science of others. In 1829, the Legislature in order the most important paragraphs is that which tells how in 1859, and subsequently in 1875 the Council of

In this last half of the nineteenth century the progress of education has been marked and well sustained. In 1854, Sir George Cartier introduced two new bills respecting higher and primary education, and the year 1857 was rendered noteworthy by the foundation of three normal schools, one of which was Protest-ant, the MGGill School at Montreal. and two Catholic, the Laval School at Quebec and the Jacques Cartier School at Montreal. In 1859, a Council of Public In-struction was appointed, composed of eleven Catholics and four Pro-testants, which lasted until 1875, when its constitution was modified by a law which divided it into two autonomous committees. Besides the increase of the primary schools, the foundation of a number of houses of higher education has been witnessed under the union of the Canadas and since the Confeder-ation of the provinces : The Jesuits' College at Montreal, the Joliette, Three Rivers, Levis, Rigaud, Sher-brooke, Rimouski, Chicoutini, Ste. Marie de Monnoir and Valleyfield colleges and a second Jesuits' Col-lege at Montreal, the Loyola. To this list we should add, Bish-op's College, founded at Lennoxville in 1851 under the supervision of the Anglican Church. This institution was erected into a university and its

It has been before the Academy of Medicine and medico-legal societies of New York. Societies to safe-guard these dangers have been form-ed in London, New York and else-where. The reflective reader would like to know the causes and extent of these dangers, what the law may do as a protection and what indivi-duals and families can do to safe-guard themselves in the absence of law.

It is proper to explain at the out-It is proper to explain at the out-set that it is natural for organized living beings to become torpid or apparently dead and revive again from causes that are natural, patho-logical, or from violence. In the lower creatures there are the fami-liar states of hibernation and the torpor from freezing and climatic dry heat, which pass away with the changes of season. Mankind on ac-count of their complicated anatomy more easily fall into torpor or ap-parent death. Any one whose vital machinery is thrown out of gear by excesses, strains, or depressing causes may pass into and out of this machinery is thrown out of gear by excesses, strains, or depressing causes may pass into and out of this transitory state if they have a re-serve ol strength. Shocks cause ap-parent death, such as from gunshot, strokes of lightning, charges of elec-tricity, concussion, heat and sun-stroke, fright, intense excitement, etc. So do exhaustions from mental and physical exertion, especially in the badly nourished, asphyxia from various causes, intense cold, anaesvarious causes, intense cold, anaes-hesia, intoxicants, hemorrhage, nar-

arious causes, intense cold, anaest thesia, intoxicants, hemorrhage, narcotism, convulsive disorders, so-called heart failures, and apoplectic seizures, epilepsy, and syncope. The above cases are quite plain, and many are saved by medical aid. But there are other forms of this mysterious state that may defy the highest medical skill and all known tests and signs. These are the constitutional cases, due to some warp of temperament, as seen in trance, catalepsy, cholera, auto-hypnotism, somnambulism, etc., which, like hiberation, are inexplicable to any principles taught by science. We know but little of these idosyncrases except that they are usually hereditary, and that their victims at resuscitation should be kept up until putrefaction appears, lest they be mistaken for dead and disposed of accordingly. Quain's "Dictionary of Medicine" says: "The duration of trance has varied from a few hours br days to several weeks or months."

In the other States mentioned they are physi-cians of standing, also qualified. They must decide the cause and fact of death and register a certificate of verified death before a burial per-mit can be issued or the body dis-turbed in any way with the view to embalming, autopsy, burial or cre-mation. The underlying principle of these laws is well expressed in the Austrian imperial law thus : "That the only sure sign of death being general decomposition, which as a Turbed in any way with the view to embalming, autopsy, burial or cre-mation. The underlying principle of these laws is well expressed in the Austrian imperial law thus : "That the only sure sign of death being general decomposition, which as a rule comes late in the case, the ex-aminer of bodies, in the absence of this proof, must not be guided by any single sign, and must base his conclusions on an assemblage of all signs that point to death, and to any injuries that may involve the vital apparatus." These laws framed, both in the in-terests of the State and the indivi-duals, are supported by the legal and the medical professions, and have always given satisfaction to the authorities and comfort and a sense of safety to the people, except-ing in France, where the period al-lowed before burial is only twenty-four hours, and the inspections are thought to be rather perfunctory, especially in Paris. The German and Austrian systems are alike, except-ing in the former all bodies must go to the waiting mortuaries; in the latter this is voluntary, as it is in the other States named. The German system is best seen in Munich. This city of 48,000 people is divided into twenty-one burial dis-tricts, in each of which there is an inspector of the dead, with an alter-

She is also qualified by a technical examination. The at-tending physician is always present at the death crisis. He gives his verdict of death, but the law does not trust his unsupported opinion, however famous he may be. In fine, the report is quite bulky, but the introduction is worth a whole volume, and reflects credit up-on the pains-taking superintendent. Without further preface we will now introduce Mr. De La Bruere's admir-able letter, and we truet that give able letter, and we trust that our readers may glean as much informa-tion from its perusal as we have:

THE PAST CENTURY.— We are at the dawn of a new century, and it may be interesting to glance back over the century which has just gone out, in order to contemplate the pro-gress made in the field of education by the people of the Province of Ouebec. This retrospect must necessarily be a very succinct summary of that his-toric epoch.

Una burst into tears as she gazed upon the desolate home of her fathers, but Honora drew her aside and whispered to her to restrain her grief, lest the soldiers who had at-tended them to their destination, should suspect any personal reason for her sorrow. It had taxed the ended woman's patience and ingenufor her sorrow. It had taxed the good woman's patience and ingenu-ity to baffle their curious interest in the shy servant maid during the jowrney, and now that they had ar-rived at the end, a very slight indis-cretion might undo all their care-fully arranged plans. Fortunately, however, there was no accommoda-tion for the escort in the tower, which was to be the dwelling-place of the little family-so, grumbling at the necessity, they turned the heads of their tired horses towards Dror-heda, and rode off as quickly as faand rode off as quickly as faheda

heda, and rode off as quickly as fa-tigue would allow. Una, before she would consent to appease her hunger, made a survey of the tower rooms. She found them stripped of almost all their furnish-ings—certain evidence that the troopers Sir William Kendricke had left to guard his possessions until left to guard his possessions until the coming of Humphrey had avail-ed of their custodianship to appro-

ed of their custodianship to appro-priate everything of value. One room only was untouched, be-cause undiscovered — the priest's room—to which she introduced Bed-ingfield, explaining to him the se-cret of the spring lock, and of the flight of steps that led to a passage way underneath the building. "It was here Father Donogh liv-ed," she said, "and it will be neces-sary for you to remember what I

sary for you to remember what I have told you, since it is likely enough that he will follow us before ong

bong." Donora, with true housewifely ap-Honora, with true contentedly to Honora, with true honsewifely ap-titude, settled down contentedly to her new conditions of life. In a short time she had made the place fairly habitable, and but for the gaping walls of the castle and the huge stones that lay in fragments all around there was little sign to show that a marguing army had show that a marauding army had so lately ravaged that smiling counhad show

Una had regained some of her Una had regained some of her roung fresh bloom, though her eyes had not lost their sadness. She pent most of her time about the uins; wondering on what spot her ather had fallen and seeking care-ully among the stores for some ully among the stones for some hance memento of him. She was anxious, too, of news of her lover. O'Hanlon, who, with his people, was under sentence of banishment into Connaught. He had not ventured

She felt restless and unhappy in the dread that she had unhappy in the dread that she had brought trouble upon Humphrey and Honora. Then the household wcre —this was the question of their re-ligion. It would be difficult to ac-count for their non-attendance at the Protestant worship at Drogheda, even though Sir William Kendricke even though Sir William Kendricke had voluntarily tried, when ques-tioned on the subject, to explain it by a statement that his steward, Humphrey Bedingfield, was a fol-lower of the "true faith" and would lower of the "true faith" and would in due course frequent church like any other God-fearing Protestant, but that at present, being a sufferer from rheumatism, he was unable ei-ther to walk or ride, and the way was too long and too dangerous for his women-folk to travel unprotect-ed.

## MISERY AND HEALTH. A STORY OF DEEP INTEREST TO

#### ALL WOMEN. Relating the Sufferings of a Lady Who

#### Has Experienced the Agonies That Afflict So Many of Her Sex-Passed Through Four Operations Without Benefit

Throughout Canada there are housands and thousands of women who undergo daily pains-sometimes bordering on agony-such as only bordering on agony—such as only women can endure in uncomplaining silence. To such the story of Mrs. Frank Evans, of 33 Frontenac street, Montreal, will bring hope and joy, as it points the way to re-newed health and certain release from pain. Mrs. Evans says: "I feel that I ought to say a good word for Dr. Williams' Pink Pills, in the hope that my experience may be of hope that my experience may be of benefit to some other suffering wo man. I am now twenty-three years man. I am now twenty-three years of age, and since my eleventh year I have suffered far more than my share of agony from the ailments that afflict my sex. At the age of sixteen the trouble had grown so bad that I had to undergo an oper-ation in the Montreal General Hos-pital. This did not cure me and a little later I underwent another operation. From this I received some benefit, but was not wholly cured, and I continued to suffer from pains and I continued to suffer from pain and I continued to suffer from pains in the abdomen and bilious head-ache. A few years later, having with my husband removed to Hali-fax, I was again suffering terribly and was taken to the General Hos-pital, where another operation was performed. This gave me relief for two or three months, and again the old trouble came on and I would old trouble came on, and I would suffer for days at a time and nothing seemed to relive the pain. In February, 1894, I was again obliged February, 1894, I was again obliged to go to the hospital and underwent a fourth,operation. Even this did not help me and as the chloroform ad-ministered during the operation af-fected m<sup>\*</sup> heart, I would not permit a further operation, and was taken home still a great sufferer. In 1899 I was advised to try Dr. Williams' Pink Pills; and decided to do so. I have used the pills for several

This terrible increase in numbers of the savage animal was solely due to the wars and the wholesale massacres that had taken place by Cromwell's orders, and as the dead were per-mitted to lie in heaps unburied the wolves had, in consequence, fine feasting. Captain Piers, on his way to the hunt one blustery November day, thought it would be neighborly to pay his devoirs to the new stew-ard of Castle Carra, whose relation-ship with Sir William Rendtricke he was aware of.

## NOTES FOR FARMERS.

Last week the spring work com-menced at the Central Experiment-al Farm which is twelve days earlier than last year, counting from when the first seed was sown, says the "Ottawa Free Press." The first crop last year was wheat sown on April 28th. Oats commendedithe seed-ing this year seventy varieties hav-ing been already placed on the expe-rimental plots, one fortieth of an acre in size each. The other grains are being sown in the same manner' for testing purposes and the work is proceeding briskly. By getting the seed in early a good chance for the necessary experiment-al work is insured. This summer the plots will be of special interest to observers as a number of new varie-ties are being tested. Early in the selsson Professor Doxrud of Christi-ana, Norway, wrote Director William Saunders requesting an exchange of

ana, Norway, wrote Director William Saunders requesting an exchange of grain varieties. A few days ago a number of samples arrived from the northern part of Norway. As they have grown in a high latitude it is expected they acquired an early rip-ening habit and will consequently prove a useful Canadian grain. Pro-fessor Saunders in return has sent three sets of valuable samples of oats, barley and wheat. A number of varieties have been received from the United States De-partment of Agriculture being part or a collection made by the officials in Russia and one of the other north-

I have never been able to prove that there is any advantage in this me-thod other than giving a supply of good fodder at a time of the year when this is sometimes short. The chief objection to sowing so late as the end of September is that, as a rule, the plants have not time to make vigorous roots and tone so as

The only excense apart from labor would be a scale to weight the milk daily. Mr. Grisdale undertakes to furnish the necessary blanks each month for keeping the records. A large number of responses have already been made and the agriculturist is still receiv-ing communications relating to the matter.

the end of September is that, as a rule, the plants have not time to make vigorous roots and tops so as to withstand the cold of sovere winters. This however, is seldom true, and in a great number of experiments, even at Ottawa, I have frequently found that good crops can be obtained from wheat sown much after the first of October, and while the Heasian fly is abundant, I be lieve that it is the very best policy for farmers to sow their fall wheat rather by the first of October than by the first of September, for although they may get a slightly smaller yield, it is better for them to be content with this and to be sure of it than in the effort to get a bigger crop, perhaps run the risk of flosing half or even more from the attacks of the Hessian fly is of interest: "I think the proper time to sowing fall wheat, the following from Prof. F. M. Webster, the State Entomologist of Ohio, who for a great many years has made a special study of the Hessian fly, is of interest: "I think the proper time for sowing fall wheat is late in September. Early sown wheat will surely invite the attacks of the fly, and, while in years when this is not abundant the wheat is not abundant the wheat is a tat or dinarily this will not be the case."
Another question which is a different in better condition than that sown later, I believe it at ordinarily this will not be the case." "My daughter, sir," said Humph-rey, curtly. "I thought as much. Well, Master Bedingfield, I envy you such a daughter. A charming maid, and, I have no doubt, an obedient one. I hope to have the pleasure of paying my daty to her before long. He smirked complacently, while Humphrey only registered a vow that his neighbor of Dunboyne should not see Una again if he could help it.

that his neighbor of Dunboyne should not see Una again if he could help it. But he reckoned without under-standing the character of the man. Piers began to haunt Carra Castle, coming at all unexpected times on trivial excuses, so that it was im-possible for Una to avoid him. Besides, his cheerful air of consi-dering himself quite at home made it difficult to show him that his fre-quent appearance was an intrusion. His frank admiration for Una was a serious embarrassment to her, but Humphrey counselled her to refrain from exhibiting any displeasure. as he suspected there might be some secret motive underlying the cap-tain's apparent friendship. He thought it might be a menace to Sir William Kendricke, but Una held a different opinion. "He is a wolf-hunter, guardian," Another question which is at pre-sent taking up the time of the ento-mologist and botanist is the distri-bution of seed of grasses and fodder plants. Samples of Awnless Brome Grass which was introduced into Am-erican agriculture by the botanical department of the Central Experi-mental Farm is now grown on thou-sands of acres in the Northwest and Manitoba. This grass has practically solved the question of providing a large supply of fodder on the vast areas which without this grass could hardly be used for successful agri-culture.

the whole cost of the Dominion ex-perimental farms from their estab-lishment. Regarding the cultivation of Brome Grass it should not be sown with moisture from the young plants. It is consequently better to sow it acre. The seed being light the only practicable method is sowing by and and then a calm day must be select. The first crop of hay may be

He kissed his hand gaily to the shrinking girl as he went out. Honora's motherly bosom pillowed Um's tear-wet face as she sobted out her story. "He means to work evil on us." she said when the tale was ended. "He suspects you are not our daughter, and God grant he does not guess you are the child of O More. I must cast aside my weak-ness now and be ready to guard my treasure as a mother should. Better death—aye, a thousand times over death—aye, a thousand times over —than that you should fall into the power of such a man.'

here." In the priest's room of Carra Cas-tle a little group was assembled on the Eve of Christmas. Humphrey and Honora were there, and Una, too, kneeling beside a stalwart youth whose dark head was bowed in prayer. Standing before the im-provised altar was Father Donoeh Heggerty-no longer a miserable mendicant-but the venerable minis-ter of God, clad in his sacred vest-ments, with hand uplitted to give the blessing of the Midnight Mass. When it was over. Una and the tall youth approached and knelt toge-the ads-the brown and the black - the old priest murmized slowly the words of the marriage service. Una's silvery response came like a whisper, but O'Hanlon's deep voice echoed through the room, while from her place beside the fair bide Dame Honora's sobs mingled with the wild soughing of the wind outside. "Tis a wild night for your jour-mey," said Humphrey to the bride-groom, when their congratulations had been bestowed upon the wedded pair.

had been bestowed upon the wedded pair. "The wilder the better." he re-plied. "Few will care to be about, and though I flinch not at fighting, I had rather not leave my bride for the battle on sur wedding-day." "How came you to be so late ?'j "muphrey queried. "We had almost given up hope of a Midnight Mass when your whistle sounded." "It was a terrible journey through the snow," answered O'Hanlon; "and

your Holy Mother." The little maiden was delighted, and it became her daily care to deck the image gaily. True, she had no offering of gold and gems; but she found the fairest flowers of the mea-dows, and brier-roses of pure, pale, tint from the hedgerows, to twine fround the humble shrine of her queen, and even in winter she could make it wreaths of evergreen and holly.

Gueen, and even in winter she could make it wreaths of evergreen and holly. The girl had neither parents nor friends, and so she made a humble cot under the spreading branches of the old oak, and here she dweit in poverty and want, unthought of, un-cared for, but by God. A length the priest from the dis-tant village was summoned to the dwelling of the sliepherd maiden, for the people found her ill and near death. But when he reached the door he paused in silent wonder, for a lady stood by the lonely bedside, fair, majestic, with a band of costly gems round her forehead and a blue mantle covering her figure. With the gentle care of a mother she bent over the girl, wiping the dew of death from her forehead, pressing her lips on the cold, thin, cheeks, speaking to her in words whose sweet tone the priest had never heard or imagined before. "See, my child." said this lovely visitor, "the priest is here, bringing thy Jesus to thee. He will bear thee safely home." Then the priest entered the hut. Trembling and on his knees he heard the last confession of the dying girl, and the lady raised her in her-arms, while sweet strains of angel

Thus it is seen that there are, with the leichenfrau, four independ-ent expert inspectors. All are on the gui vive in carrying out the sys-tem, which is popular and under-stood by all classes. The waiting mortuary consists of a main hall, where the bodies lie in open cofins, embowered by plants in the midst of light, warmth and ven-tilation. There is also a laboratory equipped with apparatus for resusci-tation, post-mortem room, separate rooms for infectious cases and accitation, post-mortem room, separate rooms for infectious cases and acci-dents, a chapel, and quarters for the physician and attendants and office.

There is no law in force anywhere in America that requires either phy-sician, undertaker, or embalmer to employ any specific means to decide that life has left the body before it is placed in the ice, embalmed, bur-ied, cremated or submitted to au-topsy. As a rule, the appearances of decid are accorded as conclusive of death are accepted as conclusive. This laxity is not astonishing when it is considered that no special in-struction upon death counterfeits struction upon death counterfeits and the dangers that may occur from mistaking apparent death for actual death is given in any medical school in our country. Consequently, the medical profession is not specially on its guard against these dangers. Young physicians go out upon their careers knowing scarcely anything about these matters, and even old practitioners sometimes declare that they have never seen a case of ap-parent death. In the absence of protective laws.

In the absence of protective laws: which long experience in the Old World has proved to be necessary, it is possible for a physician to give a certification of death to any one without his knowing anything about the case whether there was actually a case of death or not, or whether a case of death or not, or whether it was a case of homicide, contait was a case of homicide, conta-gion, poisoning, or malpractice. He need not see the body he certifies as dead. A lethargic dose may be giv-en, embalming done without the knowledge of the attending physi-cian, and if an autopsy be undertak-en in the interests of science or jus-tice, the chemicals employed in the operation would disguise the poison, and render it impossible to estab-lish the guilt or innocence of the parties accused. Some provinces, however, instead of show-ing an increase in their population, have lost considerably owing to the enormous current of emigration con-stantly flowing towards America from the principal Italian ports. from the principal Italian ports Piedmont and Basilicata head th list from the emigratory point view, the latter region having lost 20,000 inhabitants as compared to

20,000 inhabitants as compared to the returns of the census taken in 1881. Taking the rate of emigration as a standard of prosperity, we find that Tuscany, Aemilia, and the Marches are the most favored re-gions of Italy, while hundreds of thousands are driven out of their homes in the remaining provinces by want and poverty.

WHOLESALE MARKET REPORT.

THE CATTLE MARKET- According to cable advices from Glasgow this week the market for Canadian and American cattle was weak, in and American cattle was weak, in sympathv with the break in prices in Liverpool and London on Mon-day; consequently shippers stated that the prices realized on both lost them considerable money, and the prospects are not very encouraging for the future. for the future. Receipts of live stock at the East

Receipts of live stock at the East End Abattoir market on Thursday were 500 cattle, 50 sheep, 50 spring lambs, and 800 calves. Although the supply of cattle was larger than that of Monday's, yet the undertone to the market was very firm, and prices were fully maintained. The at-tendance of buyers was large, and as the most of them wanted a few cat-tle an active trade was done, and tle an active trade was done, the supply was well cleared up by noon. Really choice beeves were scarce and some buyers found it dif-

Association for the prevention of these dangers are easily formed among relatives, friends or by mem-bers of clubs by written agreements that on the appearance of death in any member strenuous efforts to re-store animation shall be made, and failing in this, that no steps toward embalming, autopsy, burial or cre-mation shall take place until gener-al decomposition takes place and is certified to by two physicians of standing.

The execution takes plate and is certified to by two physicians of standing. The copy of the agreement should be retained by the signer himself — separate from his will, which is often opened only after the funceral. Another should be kept by a trusted member of the family and a third deposited with the records of the ascitation. The extensive literature of this subject will be found under the heads indicated among the above causes of apparent death. The library of the Surgeon-General's office, Washington, is rich in this kind of matter. —Edward P. Vollum, M.D., Colonel United States Army, in the Washington Post.

The best stock sold at  $4\frac{1}{4}$ c to  $4\frac{1}{4}$ c, good at 4c to  $4\frac{1}{4}$ c, fair at  $3\frac{1}{4}$ c to  $3\frac{1}{4}$ c and lower grades at  $2\frac{1}{2}$ c to 3c per lb. The demand for sheep was good, and as the supply was small, prices ruled firm at  $3\frac{1}{4}$ c to 5cper lb. Spring lambs met with a good demand also at prices ranging from 82 to 55 each. The market was gutted with calves, the offerings be-ing for the past two days 1,500 head, in consequence prices to-day were weak, and the demand only fair. Some good stock sold at  $\frac{4}{4}$  to 56 each, and the common at  $\frac{4}{10}$  to  $\frac{53}{3}$ . The market for hogs was steady, with a good demand at  $6\frac{1}{4}$ c to  $6\frac{3}{4}$ c per lb.

and

FEED-The tone of the market for feed is steady. with only a small trade doing; Manitoba bran, in bags, \$18; shorts, \$19.

CHEESE-Quite a lot of white cheese has been cleared up around bit to 91c, and the amount left on spot is now exceedingly small. White seems to be in chief demand, and it is doubtful if colored would bring over 91c. Further sales of April cheese are reported, with 8c to 85c the ruling figures.

BUTTER-The market still has decidedly heavy tone owing to the continued heavy daily receipts. The demand is by no means large, and in manv instances prices continue to be shaded, finest creamery being quoted at 18c to 18kc.

EGGS-The demand continues good and the movement is large at 11c to 114c per dozen.

MAPLE PRODUCT-A fair busi-ness was done in maple product, and the market is moderately active, with no change in prices to note. We quote : New syrup, 65c to 75c per

of wine gallon, and at 90c to | tin 95c per imperial gallon; in wood at 64c to 7c per lb.; new sugar at 9c to 10c per lb.

HONEY-Business in honey is chief-ly of a small jobbing nature. We quote: White clover comb, 13c to 14c; white extracted, 8½c to 10c; buckwheat, in comb, 9c to 11c, and extracted, 7c to 8c.

POTATOES—There continues to be a steady demand for potatoes, and as receipts are small, prices rule steady. 42c to 43c per bag, in car

BEANS—In beans trade is quiet, the demand being only for small lots at \$1.40 to \$1.45 for primes.

ONIONS-A fair business was transacted in onions, and value are unchanged at \$3 to \$3.50 per barrel.
