The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➡ (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➡ signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Changes of the Moon.

Many persons understanding that the mean time between one new Moon and another is 29 days, 12 hours, 44 minutes and a fraction, imagine that to find the full or quarters of the Moon, they have only to add a half or fourth part of that time; and when they do not find the changes marked in the Calendar to correspond with this method, they impute it to mistake in the calculation of these changes. It is therefore, necessary to put them in mind, that the great inequality of the Moon's motions renders the above rule extremely inaccurate, so that nineteen times in twenty, it must fail in giving the true conjunction or change.

LIGHT HOUSE on Pointe DES MONTS.

Keeper, - - Jas Wallace,

Will show a light every evening from sun-set to sun-rise, between the first of April and the thirty-first of December inclusive.

The following Notice was published by the Light House, relating to this Light House :

NOTICE TO MARINERS.

That a Light House has been erected on Pointe DES MONTS. (or Cape Monts Peiés) on the north-west side of the River St. Lawrence, nearly opposite Cap Chat, the Lantern standing one hundred feet above the water.

The Light House lays with the outermost part of CARIBOU POINT N. 52°. East and S. 52°. West, by the compass, and it can be seen over that point to the Eastward of it.

Ships approaching the light from the Eastward, when they draw towards Caribou Point must bring it to bear W. by S. ; they will then be in a good fair way, and if necessary, they can near the land by the light.

After passing Caribou Point, and as they draw towards the Light House, they must come no nearer than 12 fathoms water to avoid two ledges of rocks, one of which lays E. S. E. from the Light, with only 12 feet water on it ; the other lays S. W. from the Light, and E. S. E. from the Western extremity of Pointe des Monts, with 16 feet water on it ; but the rocks do not lay farther from the shore than half a mile at low water.

The Light House lays with the western extremity
Pointe des Monts N. 64°. East and South 64°. West,
and distant about one mile; and when ships
to the Westward of the Point, the Light House
in one with the outermost rocks off the Point; and
day time it forms a bold distinct Land Mark, and
this line of bearing ships are in the best possible
way for the general purposes of Navigation, whether
bound up or down.

For any particular purposes of Navigation, ships
safely stand to the Northward, until the Light
E. by N.; they will then be drawing near the
Land; and when it bears E. $\frac{1}{2}$ N. it is time to
; for when it bears East it will shut in with the
Land, and cannot be seen to the Southward of
it, and then they will be only one mile from the
Land, and if they are off Godbut River, Pointe des
Monts will bear from them E. by S. two leagues
distant.

When ships are off Saint Nicolas Harbour, and the
bearing E. by N. they are in a good fair way
to the North Land. The S. E. spit of Manicoua-
gash Shoal, the ship and the Light House are
all in one line of bearing.

LIGHT HOUSE ON S. W. POINT OF ANTICOSTI.

Keeper—Mr. William Hall.

A Light House having been erected on the South
Point of the Island of Anticosti, Notice is
hereby given that a grand Revolving Light, on the
same principle, was shewn thereon for the first
time, on the 25th of August 1831—and that the said
Light will continue to be shewn every night from
Sun-set to Sun-rise, from the 1st April to the 15th
September, in each year. inclusive,

LIGHT HOUSES.

When ships are to the Eastward of the Light House, they may safely stand towards the Island until it bears N. N. W. by Compass—they will then be in a good fair way—and if they wish to, make more free with the land, they can do so by their lead. The land trends from the Light House S. E. by S. or nearly so.

When ships are to the Westward of the Light House, they may safely stand towards the Island until the light bears S.S.E. $\frac{1}{4}$ E. they will then be in a good fair way from the land, and as before mentioned, they can make more free by their lead.

Nearly East and West, with the Light House, and about three-fourths of a mile from it, is the outermost part of a *Reef of Rocks* which joins the S. W. Point. These are dry at low water and are the only dangers near the Light House; therefore a berth of a mile from the Point, is a good fair way.

Sixteen leagues to the Eastward of the Light House, at Shallop Creek, and sixteen leagues to the Westward of the Light House, at Grand Bay, and at the Light House itself, are Depôts of provisions for the use of Mariners in distress, or other shipwrecked persons.

A Light House has been built on Heath Point at the East end of the Island of Anticosti, but has not been put in operation for want of sufficient funds invested in the Corporation of the Trinity House.
