Winner of Robb Medal, highest in public schools-Alan King | Ward, the three being between the (588 marks), age 14 years 8 months.

Of the 399 candidates only 18 wrote for the second time. Average age of successful candidates was 14 2-5 years. Each candidate will get by mail a certificate, or if he fails a record of marks obtained.

Inclosed in each letter is a circular issued by the board of education, setting forth the kind of education offered in the Collegiate Institute, the commercial and the industrial schools.

The "plucking" subject was as usual arithmetic, the girls finding it more trying than the boys do. A few-very few-failed to reach the minimum-40% in spelling. The total was 650 marks, the minimum for passing being 390. Those who got 488 marks are entitled to honors, having obtained 75%.

The confidential reports sent in by each principal have been found to be in nearly every case, very accurate in estimating the ability of the students in each subject. Principals were asked to state in each case if the candidate would, if successful, attend a high school. About 80% (from the public schools) were reported

## BURNT TO DEATH IN THEIR HOMES

Before Being Noticed By Inmates.

Victims Were All Sleeping Upstairs and Had No Chance To Escape.

[Canadian Press.]

Toronto, July 21.—Earl Hill, Harry Hill, brother and sister, and children of George Hill, and their cousin, Velma ages of 10 and 16 years, were burned to death in a fire which started from an unknown cause and destroyed the residence on George Hill's farm, a mile from Fesserton, at 1:30 Sunday

The children were sleeping upstairs, nd their parents and an uncle, Chas. Hill, were on the ground floor. It is said that the blaze started in the ice nouse, in connection with the residence and the whole building was in flames when the adults downstairs awoke to the situation and made attempts at rescue. Hattie Hill, a daughter of 16, was saved, though badly burned, and is in the Midland hospital in a prearious condition. Charles Hill, uncle of the children, also sustained very erious injuries in his efforts to sav their lives. An inquest will be held, i

## City Engineer On the Road's Situation.

"I have been sufficiently long in the employ of the council to realize that the city is sadly in need of immediate action being taken along progressive lines relative to drainage and good roads particularly. These items must call for the expenditure of hundreds of thousands of dollars. In the absence of proper data I must decline to accept responsibility for the construction of piecemeal additions that are and have been rushed through.

"Indifferent construction, lack of systematic planning, skilled inspection and care in layout, as well as the construction of private connections without the required gradients, has much to do with the present condition. I must warn the council against delay. A thorough overhauling is necessary. The system is in serious shape as a result of indifference to construction in past years, and the carrying out of abuses contrary to the advice of the council's previous experts.

"Works which have not the advantage of appearing on the surface as being reproductive, have evidently met with relatively scant consideration, with the result that drainage, which should have been the first consideration of a city, appears in London to have been neglected, and the question of adequate sewage disposal ignored."

### May Copy Canada's Hospital System

[Canadian Press.] London, July 21.—Sir William Osler, regius professor of medicine at Oxford, has been voicing the opinion of the medical profession at the inadequacy of the hospital accommodation in England and comparing unfavorably the voluntary system in vogue here with the system in America and Canada, where all hospitals accept paying patients. Throughout the United Kingdom the hospitals accept no pay from their patients, with the result that they are crowded with those who cannot afford to pay, and in many cases are partially closed because the lack of funds will not allow all the beds to be occupied, while people who could afford to pay something have to go to nursing homes, which are in most cases very expensive, or be nursed at home. The result, according to doctors with large practices, is that only the very poor or the very rich get proper med-loa' attention,

## WAS A CONFIRMED DYSPEPTIC Now Finds it a Pleasure to Enjoy Meals

Here is a case which seemed as bad and as hopeless as yours can possibly be. This is the experience of Mr. H. J. Brown, 384 Bathurst St., Toronto, in his own

"Gentlemen-I have much pleasure in mentioning to you the benefits received from your Na-Dru-Co Dyspepsia Tablets and can cheerfully recommend them. I simply had confirmed dyspepsia with all its wretched symptoms, and tried about all the advertised cures with no success. You have in Na-Dru-Co Dyspepsia Tablets the best curative agent I could find. It is now such a pleasure to enjoy meals with their consequent nourishment that I want to mention this for the

benefit of others." The fact that a lot of prescriptions or so-called "cures" have failed to help you is no sign that you have got to go on suffering. Try Na-Dru-Co Dyspepsia Tablets and see how quickly this sterling remedy will give you relief and start your stomach working properly. If it doesn't help you, you get your money back. 50c a box at your druggist's. Compounded by the National Drug and Chemical Co. of Canada, Limited, Montreal.

#### LONDON, MONDAY, JULY 21.

#### AN OLD STORY.

The Stratford Herald thus chides this great home journal and the Tofonto Globe for daring to protest against the centralizing influences behind the Borden policy and the attitude of the admiralty:

"Globe and Advertiser language i not justified by any abuses such as they picture, but it is part of a propaganda instigated by Sir Wilfrid Laurier to breed dissatisfaction with British connection and gradually prepare Canadians for another move of which nothing is at present heard and which would be denied if it were charged, as the (American) 'patriots' prior to 1776 denied desire for separ-

#### LOSSES BY FIRE.

Statistics published in insurance papers show a condition of affairs no very creditable to Canada. The losses by fire in the Dominion are not only enormous in themselves, but out of all proportion to other countries. The figures are worth considering. For the month of June last, the gross amount was \$3,069,446, or about 40 cents for each inhabitant-at the rate of \$4.80 per capita for the year. This may not, of course, keep up each succeeding month, but the records for last year show that the loss for the entire twelve months was \$2.88 per capita.

The statement for 1912 is not in itself encouraging. Canada was second highest on the list, only Argentina's loss exceeding ours. The following comparison between different countries, showing the rate per capita for the year is instructive: Argentine Republic \$3.58; Canada, \$2.88; United States, \$2.55; Italy, .90; France and Russia .84; Belgium and Norway, .69; Ireland, .57; England, .54; Scotland, .49; Austria, .30; Germany, .20; Sweden, .13; the Netherlands, .12, and Switzerland,

It is further to be noticed that the reports above summarized do not take into consideration the destruction of forests by fire. This cannot be very well estimated, but we know that these forest fires occur regularly each season, and that the loss to the country as well as to individuals must be great. This loss seems to be peculiar to this continent, for while in some European' countries-Germany, for instance-there are extensive forests, we hear very little of fires there. Why is it that in Canada millions of feet of valuable timber are destroyed by fire every year, while in Europe a forest fire is practically unknown?

We have never had any explanation of this unenviable pre-eminence in disaster. We might be disposed to think the preponderance of fire loss in Canada was more apparent than real, that the statistics were imperfect, and that the losses simply represented those on insured property, and attribute the apparent condition of affairs to the fact that insurance was more general in the United States and Canada than in Europe. But this is not the case. The figures represent all losses reported, whether of property insured or not. So of education. that while something may be due to our better facilities for obtaining reports in this continent than in Europe, and the actual figures for the latter may, therefore, be somewhat in excess of the reports, yet the disparity is still \$200 great, making all allowances that

Why should this be? All our cities and kicking all that time? and towns are well equipped with fire apparatus; they all have efficient fire brigades. But our own exone city building sometimes means a people to read his poetry. In that case

ore consideration than it has received. nsurance companies, personally interested, make all sorts of regulations thich they require municipalities to adopt. But they look on matters soley from their own point of view. There hould be concerted action by the peoole themselves through their representatives, either municipal or parliamentary. Our governments, which are apparently very fond of appointing commissions, might find here a use for them. A commission of experts and experienced men could find very useful employment in inquiring into the cause of the excessive fire losses, and in devising some remedy.

#### A THEATRE OF HORRORS.

A pitiful havoc is going on in Thrace. ast week the Bulgarians were committing the most horrible outrages in Macedonia and doubling rumor has no doubt inflamed the Turkish soldiery marching to Adrianople. We may suppose the Turks to seek satisfaction or the massacre of Doiran. If the curtain could be lifted from the doings of the past few days in Thrace, what a horror would be revealed. It would beggar imagination to realize the light of the peaceful non-combatants, the cry of the women and children, the devastation of crops, property, homes life and honor, perhaps the utter ruin of all. Thrace like Macedonia has supped full of horrors.

The Bulgarian nation in Bulgaria it-stands first among the nations for self faces destruction. One-tenth of the skilful utilization of her inland its manhood was killed or disabled in waterways. Porches are largely patronized by young lovers, grandmothers, mandolinflends, neighborhood gossips and hammock aerobats.

Ye who gasp at the feats of the aerial families in the circus, consider the young lady who can balance herself in a nervous porch hammock while coddling a fluffy dog, a fan, a pound of chocolates and a pound and a half of "A

Sleeping porches are popular throughout the length and breath of the land. It's a grand thing to escape from confining brick walls and snooze in the open air, wrapping oneself in a blanket and an Arctic sleeping bag. At 2 a.m. you wake up with a stiff neck, a sore chest and a cough like a motorboat. You feel your way into the house, attempting to do so quietly. Instead, two barks ring out. One is the bark of a dog, the other bark is on your shin. It has attempted to bat a piano over the foul line.

The porch is one of the greatest accomplices of Dan Cupid. Some of this country's most successful and lasting bethrothals have been sealed in the shady nook of a nice, broad porch. This applies to summer resorts, where, however, the percentage of broken engagements pulls down the average like cake of ice on the toes of a thermometer. Here also navigates the Rocking hair squadron, under command of the flagship Gossip.

Some wealthy parents leave the home daughter provided for, but in very many cases, where means do not permit, where the parents have lived on pension, or an annuity, the daughter's olight is a sorry one.

Still more awful is it for her to wake up to the fact that she is stranded, absolutely penniless. It may happen that by will the furniture is to be sold and the proceeds divided equally among surviving children, and the brothers, who have done well for themselves, and the married sisters, who at least have someone to protect them, get their share of the family heritage. No one seems to think that the home daughter-who has borne all "the burden and heat of the day"-should reieve a specially large share in reognition of her life's devotion. It was the last act in the drama entitled "Getting Even With St. Thomas," and the ending was most pleasing to the largest crowd of London fans that has witnessed a game at Tecumseh Park this season. The official figures must have been close on to 3,000. The score 10 St Thomas 6 of the game was, London ELEVEN STRAIGHT FOR LONDON.

As we mentioned before, it was the last act, and probably the best of the three which were staged in this city the last part of the week. It marked the eleventh straight win for the Deneau aggregation, which is something to be wholly proud of in this league, and which will act as a record for maybe some months to come. The Saints made it slightly interesting by sending three runs over the counter as a curtain-raiser, but the locals were not long in catching up, and after that it was the same old procession, with George Ort's cang lagging along in the rear about seventeen removes from a possible victory.

FANS CAUSED RIOT WHEN "BLOOMER" GIRLS WERE MEN IN DISGUISE

[Canadian Press.]

Washington, July 21.—One policeman is in a hospital, two others are nursing bruises and awaiting new uniforms, and part of the Union League baseball park is a wreck today as the result of a riot at a Sunday baseball game, when 4,000 enthusiasts discovered that a team of "bloomer" girls were reall men in disguise. The team was taken to an eastbound train under police pro tection. A half hour before the storm broke the manager of the "girls" aggre gation had acquired the gate receipts and had disappeared.

CENTRE FIELDER GAVE IT AWAY.

The team was so successful here four weeks ago that it returned for a second appearance, the opposing team being an amateur organization from Laurel, Md. The trouble started when the "girls" centre fielder, a husky young blonde, threw a ball from deep centre to home plate, catching the run-

A moment later a small boy slipped up behind the supposed divinity that presided at third base, and gave her golden locks a vigorous pull. They came away in the form of a wig, revealing a chunky young man with an elaborate make-up ending just above his eyebrows. The team fled through a storm of bottles and bricks to the shelter of the clubhouse, where the police massed.

The crowd then stormed the ticket windows, demanding their money back venting their ire on the park property. Several persons were hurt in the melec and a number of arrests were made.

# CARS RAMMED FREIGHT OFFICE

C. P. R. Ballast Train Runs Away and Wrecks a Building.

GIRL'S NARROW ESCAPE

The C. P. R. freight office was broken into about 8 o'clock on Sunday evening. Entrance was gained by battering down a heavy brick wall at the rear of the building, the intruder being a C. P. R. freight car. Three other cars essayed the same stunt, but the room would only hold one, and they were crowded out, one of them overturning

completely on the roadway outside,

Train Ran Away,

The accident occurred when a ballast train in the yards at East London ran away down the grade towards the depot. The runaway cars took the main line, and, gathering speed, went off before anything could be done to stop them. Fearing a serious wreck, the yardmen sent a hurried message to the switchman at Waterloo street, advising him of the coming runaway and telling him to throw the switch and get it off the main line at all hazards. At this point a number of side-tracks oun into to freight sheds, on all of which cars were standing. Hardly had the switch been turned, when the uncontrolled ballast train hove in sight. It made the turn safely enough and glided down the track nearest the freight sheds, where a string of cars were standing ready to be unloaded. The resulting bump shoved two of the cars right over the bumping-post at the end of the track. The first car landed right side up and continuing down the roadway for about 25 feet, encountered the rear of the brick building, used as a freight office. It entered without ceremony, and this morning was still re posing amid disordered bookshelves and scattered freight records. Probably never before were so many re cords smashed in so short a space of time. The second car overturned. The two cars following left the track, but were not much damaged.

One side of the house is occupied by Mr. Whittaker, the freight agent. Not three minutes before the crash his daughter had been in the kitchen getting a drink of water. She had no more than left the room when the freight car poked in the side wall.

# THE CADET CAMP

Splendid as Character Builder, Pastor of New St. James' Tells Says the Rev. W. C. Riddiford.

hays Behavior of the Boys Was

Every Respect Most

Exemplary.

In an eloquent sermon at the Egerton Street Baptist Church Sunday evening Rev. W. C. Riddiford praised the cadet camp which has just closed. Mr. Riddiford was chaplain of the Y. M. C. A. during the camp, and was under canvas with the boys during the whole five days they were there. His sermon contained the observations made during that time. In nearly every particular he had nothing but the warmest praise for what he saw there. He paid a glowing tribute to Col. Hodgins, the camp commandant, as a man, "soldierly, sensible and saintly." "The cadet movement under such commanders," he said, "linked up with the Y. M. C. A., will be the best molding shop for Canada's coming men, and the dom, one of them being intellectual sin-Government of Canada, as well as the cerity. It was possible that this man citizens of London, should do all in their power to encourage it."

Some Called to Arms.

Mr. Riddiford stated, in commencing his sermon, "My text says, or implies ordinances of the church. He was a in the latter part of it, that God man of moral integrity, and this kept chooses some men to be soldiers, just him near the kingdom. He may have as much as he calls others to be doc- lacked a sense of sin, he may have had tors, lawyers, bankers or preachers. So some idol in his heart that he could not that settles the soldiering business for cast out. me, and gives me the assurance that and necessary parts of a nation's to a certain odorless flower which, if per equipment and therefore should be kept to their highest efficiency and

fighting power." The preacher then dwelt upon the love and admiration St. Paul had for the soldiers. "St. Paul loved the soldiers and owed much to them, and so do we. No sane, sensible, spiritual man can scan the pages of England's history kingdom, without realizing that her soldiers have been a great factor in the securing of that religious and civil free-dom which is characteristic of the kingdoms within the empire of Great

Lesson of Discipline.

St. Paul in the text drew attention to two things in the good soldier's life discipline and endurance, continued the speaker. The soldier, as disciplined, knows his master, and is servant, because he knows to whom he has committed himself. "And if there is one lesson the average church member needs to learn above all others, it is this lesson of discipline to the commands of Jesus Christ, and ready obedience to his expressed will along al lines of conduct and deportment," said

"The average boy in the average Canadian home, is suffering today because of the lack of wholesome discipline in the home, and the average Canadian girl gads the city streets, flirting flippantly with some vampire fool, instead of listening to the wholesome advice of her mother, and thus both boy and girl become ready victims for the work of the saloon and the spiderlike tactics of the white-

slaver." stated Mr. Riddiford. "Yes, we need discipline both in our homes, schools and churches. The cadet movement, then, in my humble judgment, is destined to become, under wise and efficient management, the greatest asset in the national life of Canada. There are always, and always deeds he had done and of how he had will be, some poor fool to cry, 'Wolf! obeyed all the laws set forth by Cod the case of the absconder it was usu-Wolf!' when there is no wolf, but let us not mind that. There was nothing that barof discipline and endurance, cannot be that he was justified in the eyes of God red the way to God so successfully as underestimated, as an asset in the life and had paid back to Him all that he impurity. The awful thing about sin,

Speaking of the boys themselves, Mr. Riddiford stated that he found them bright, boyish and brave - bright in dress, manners and speech. "Profanity was a rare thing," he said. "Cigarettes were seen only in the mouths of regulars and a few teachers, and I regret to have to say that I heard more profanity among the two companies of school teachers than I did among the whole four battalions of cadets, I may

## BANKS GAINING GOLD SLOWLY OUTLOOK GOOD

Situation Abroad Is Steadily Improving With Balkan Crisis Practically Past.

Mexican Situation and Eastern low the establis Railway Trouble Are Disturbing Features.

[Special to The Advertiser.]
New York, July 21. — The situation abroad is somewhat improved. Acceptance of finance bills, now beginning, ndicates this, with belief that the Balkan crisis is now past for good. But this does not release hoarded gold; evival of confidence must come first. At any rate, for five or six weeks we shall probably see a lull in the demand for gold, and the stock market vill have its chance. Then will come again tightening money and crop scarcs. But by that time the European situation may be further cleared, the tariff bill passed, the currency nearer perfection, and the crop, notwithstanding scares, pretty well as-

Copper has become active and strong, with European buying revived at a high level of volume. Cheerful consumers are waiting for easier financing before putting orders, and new contracts are declining, with steel mills busy on old business.

American foreign trade for fiscal year 1913 shows big increaseover \$420,000,000-in totals. Both exports and imports show gains over all past years. The excess of exports was \$653,000,000.

Banks Gain Gold.

The banks of England and Germany both gained gold last week. The Bank of France is gaining only slowly, and IN NICARAGUA mostly by importations from this side. In figures the English bank added \$4,000,000 the French Bank \$3,000,000, and the German Bank \$9,800,000, to their stock of gold. With the German English, French and German Bank this is a continuation of its remarkable gain in strength since April 1, when its stock was \$54,000,000 smaller than now, and this week its note circulation and loans together have been reduced over \$105,000,000. This is a remarkable picture of what a Secretary Bryan to Discuss strong central bank can do, especially with its note circulation. The last week in June the notes rose to \$579,000,000, or \$165,000,000 more than the same day one year ago. The supply of gold has risen with the circulation; it is now \$94,600,000 higher than at the end Washington, July 21. - Now that

With the fall of Porfirio Diaz the old revolutionary fires, not smothered by his indomitable will, broke out afresh and in full flame. The country is now too deeply afflicted by the different revolutionary factions to allow the establishment of real peace in

A Difficult Task.

It will take a long time to mold such a country into a democratic republic. Mexico has not yet developed a large middle class, which forms the back-bone of every prosperous nation, a middle class created from the good stock of its Indian population, and added to by encouraging immigration on a large scale, as is done with great success in Southern Brazil and Argen

This is the condition that confronts President Wilson, and that he goes slowly in recognizing what is much like a temporarily dominant revolution is not to be wondered at. He is probably better informed of conditions than the numerous amateur advisers, who are heard from every hour. The return of Ambassador Wilson with even more intimate information perhaps enable him better to decide what to do. An ingenious solution has been sug-

gested of a somewhat practical turn. It is that the United States purchase, at a reasonably liberal price, and annex, views of steel prodominate, although the four northern states of Mexico. An enormous immigration of substantial people would flow into these nev and immensely rich states under United States Government protection, and would soon put their restless pop ulations in order. Supplied with ample funds in this way the provisional government, which would then be recognized by the United States, might be able to put down and control what was left of heterogeneous Mexico.

BITTER ATTACK ON FREE TRADE MADE IN SENATE

Failure of the New Tariff Is Prophesied by Senator Burton.

The Tendency, He Says, Is for Nations to Restrict Their Markets.

[Canadian Press.]

Washington, July 21. - Denunciation f free trade as a timely policy for the inited States, apprehension of failure of its purpose for the Underwood-Simmons tariff bill, and an attack on an ad valorem tariff system, were voiced by Senator Burton, of Ohio, today when tariff discussion was resumed in the Senate.

Senator Burton declared he was no worshipper of protection as a 'fetish,' but that he approached the subject of he tariff "rather with the conviction that whenever there shall be an era of comity and mutual concession in trade among nations, and our country shall have reached a point when its productive capacity had been finally developed free trade might be a national pol-

Restricting Trade.

Such, he said, was not the case, the disposition "to restrict trade among nations and to grant access to mar ets only on rendering concessions in return," being on the increase.

Averring that a free trade policy only is applicable on the theory that it universally can be applied, the Ohio senator declared:

"The attempt on the part of a free trade nation to apply the theory in practice, without the concert of other notions revealed the serious disadeport published some days ago in trade vantage of such a position. Mains at Berlin Were Blocked With Napthaline Refuse. [Canadian Press.]

Berlin, July 21.—There was a gas famine on wash day here between 7 and 19 o'clock today. It was caused by a rice between the gas tank and the city main becoming blocked with naphthaine refuse from manufacturers of coal gas. Only early risers were able to enjoy a warm breakfast.

THE FOSTER-MOTHER OF EVIL. [Mail and Empire.]

Senator Vardmann, of Mississippi says that he is fighting to eliminate the bonds or by direct cash payments for improvements by the citizens. The twin evils of American civilization, namely, negroes and whiskey. If the senator would concentrate on whiskey he might find that after it had been eliminated most other evils had disappeared.

The streets have been neglected all this summer as a result. There are few streets upon which work of any kind has been done, and the rain. storms of Saturday night caused quagmires in many sections and flooded the usual number of cellars. Such a prominent thoroughfare as Central avenue was two feet deep in water over its whole width in some places. The water mouted from the manholes; sewers ere choked, and in South London the water poured into the cellars, filling them with filth and menacing the

health of the occupants. Protection Must Be Given.

Then there is the eternal menace in West London. All sorts of professions have been made by the advocates of the electrification scheme. They would see that West London had its breakwater, and that the vote would be taken at the same time as the electrification vote, if not before. They foresaw total destruction for the Por Stanley idea unless they could assuage the ratepayers who were demanding that adequate protection be provided

## After Importing For Years Are Now Starting Their Own Fisheries.

Experts From British Columbia Are Taking Charge of New Canneries.

[Special to The Advertiser.] Ottawa, July 21.-The Japanese, afer having for many years practically mported all their canned salmon from Canada and the United States, have reently commenced the industry themelves in Japan and are producing at a price that will be a great factor for anada and the Pacific coast particu-

arly to deal with af ew years hence, This gathered from an interesting tem in a report published in the weekly bulletin of the trade and comnerce department today. The British onsul at Kakodate draws the attention of the British Board of Trade to the beginning of the industry, and it is said that Japanese who worked in British Columbia canneries and have made machines are superintending operations in the new canneries.

New Canneries. Two years, says the report, only two three persons were interested in the industry, but since that time several canneries have sprung up in Nemuro and Karafuto, and the tinned ood dealers in Tokio, Yokahama and Cobe are selling large quantities. The canners are able to obtain their ish very cheaply as salmon and sal-

mon trout exist in large quantities in Japanese waters. The market prices recorded were \$3.40 per box of forty-eight pounds of Kamohatka red salmon, and \$2,40 for trout. The prices showed signs of increasing towards the end of the season, the supply being far short of the demand.

### Japs Influencing Western Canada

Montreal, July 21. - That Eastern Canada is unconsciously being influ enced by the Japanese, and if it fails to Christianize them, it might be that they would do something towards paganizing us, was the statement made on Sunday by the Rev. Dr. Coats, of Tokio, who addressed a large congregation in St. James' Methodist Church, Unhappily, he said, the messages that the missionaries gave forth from their pulpits was largely neutralized in the east by the lives of westerners, who were classed as Christians. One feature of American and European life which very much impressed the Jaon October 10 panese, was the home life, but on the other hand western civilization was no being accepted by them as an unmixed Soethels, chief engineer in charge of good.
