DEPT.

MR. A. J. JOHNSTON, Sarnia, sheriff of Lambton, addressed the congregation in Trinity church at last Thursday evening's service, interpreting the Forward Movement from a layman's standpoint. His talk was of deep interest and inspiration. He spoke of the different schemes that the funds raised would be put to. The monetary end of the question gave him little concern, the spiritual accomplishment being the real goal. He was listened to most attentively and deeply impressed his hearers.

We have 11 real smart Coats for Young

Mr. Leo Sedwick, son of Mr. and Mrs, Wm. Sedwick, formerly of Watford, was successful in passing the Michigan State Board for a Registered Pharmacist. Mr. Sedwick is back in his old position with Mr. W. Sylvester, Port Huron.

#### PRESBYTERIAN W. M. A.

The regular monthly meeting of the Presbyterian Women's Missionary Auxiliary was held on Tuesday evening, Jan. 20th, at the home of Mrs E. H. Sawers, with a very good attendance. Mrs. R. McGregor, of Saskatchewan, gave a very interesting address on work among the Indians at the Crowstand School. Indians at the Crowstand School. Indians at the Crowstand School. A very pleasant part of the evening's program was the presentation from the Auxiliary of a Life Membership in the W. M. S. of the Presbyterian Church in Canada to Mrs. W. P. McLaren, she having been a charter member of the first Auxiliary organized in connection with Wastford church and having coating the state of the first Auxiliary organized in connection with Wastford church and having coating the state of the first Auxiliary organized in connection. first Auxiliary organized in connection with Watford church and having continued in active service ever since. Rev. Mr. Sawers in a few appropriate words made the presentation and also closed the meeting with prayer. This Auxiliary had a very successful year during 1919, the work having gone forward in nearly every department. A Life Membership of \$25, was obtained from the mite-box savines of the members. The Home of \$25, was obtained from the mite-box savings of the members. The Home Helpers, by means of these mite-boxes, contributed over \$31. \$2 The annual thank-offering amounted to \$110, and these with the mouthly collections and fees brought the total to upwards of \$200. The ladies also sent a bale of new clothing valued at \$18.00.

The officers for 1920 are as follows.

President Mrs. 1. \$2 Theorem: Let vice.

The officers for 1920 are as follows:— President, Mrs. J. C. Forster; 1st vice-president, Mrs. E. H. Sawers; 2nd vice-pres., Miss M. McLeay; 3rd vice-pres., Mrs. W. P. McLaren; Secretary, Miss an the previous year, yet a substantial ship balance of \$10,725.00 remains on the bal

#### **LAMBTON CORN SHOW**

Poultry Exhibit Will be Held Concurrently at Petrolia

Concurrently with the Lambton Corn Show this year the county poultry show will be held, and in addition an important live stock sale. The first named events are scheduled for February 11, 12 and 13, and the breeders' sale will be held on the 12th. On Friday morning, February 13, the annual meeting of the Corn Growers' Association, for transaction of general business and election of officers, will be held.

The secretary, Mr. W. P. Macdonald, is now distributing the corn show prize lists and asks that all exhibits for the show be shipped to reach Petrolia by Monday, February 9.

The Hanna trophy is given to the competitor judged to have the best four acres of corn in Lambton. Entries have to be made by May for this event. Mr. John McRae, of Sombra Township is the present holder. The trophy has to be won three times to become the permanent property of the successful competitor.

#### DANCE IN ARMORY TUESDAY

H. KERSEY.

#### Concert in Aid of Armenians

The concert given under the auspices of the two local chapters of the LO.D.E. in the Lyceum on Monday evening, to raise funds to assist the stricken Armenians, was one of those pleasant, old-time affairs with a program furnished by local talent that are much too rare these days. affairs with a program furnished by local talent that are much too rare these days. The attendance was good, every number on the program was enjoyed, and the talent responded willingly to the numerous encores. Chairman John Farrell was in his usual happy mood and kept things moving smoothly. The program he introduced consisted of well-balanced choruses, a solo by Miss Cameron with violin accompaniment by Miss Kinnell; solos by Mr. Rayner and Mr. Connolly; duets by Mrs. Shugg and Miss Romelda Clark, and readings by Miss Jewett, of Wyoming, and Miss Fortner and Mr. Rayner. Every number was warmly received. The proceeds amounted to \$165.00; some of this amount being donated in excess of the admission fee by sympathizers.

#### BROOKE

LET us charge your storage battery this winter. We will keep it charged and filled for 50 cents per month.—RAY

Mr. W. G. Willoughby attended the annual meeting of the Industrial Mortgage and Savings Co., at Sarnia on Wednesday last.

The dwelling house of Frank Trowbridge, Sutorville, was burnt to the ground about 12 o'clock on Tuesday, the fire having caught from a chimney. Mr. Trowbridge was sitting by the stove when a neighbor ran in and told him the upper part of the house was in flames. Most of the contents were also consumed. He had recently opened a grocery store but most of the stock was saved.

Battery service station coming! We are installing a storage battery service station and will be able to overhaul any make of battery at the least notice. We will be carrying a stock of new Pres. Lite batteries on hand also will have vice batteries to rent while your old one is in for recharge or repair, Pres-O-Lite are equipment on seventy-five per cent of cars made in Canada this season. -R. MORNINGSTAR.

An interesting event took place on Monday 12th., at the home of Mr. and Mrs. William Johnson, concession 9, Brooke, when their golden wedding anniversary was celebrated. Mr. and Mrs. Johnson were married at the residence of the bride's parents, Mr. and Mrs. Sampel Maddock in Brooke by Rey, Johnson were married at the residence of the bride's parents, Mr. and Mrs. Sampel Maddock in Brooke by Rey, Johnson were married at the residence of the bride's parents, Mr. and Mrs. Sampel Maddock in Brooke by Rey, Johnson were married at the residence of the bride's parents, Mr. and Mrs. Sampel Maddock in Brooke by Rey, Johnson were married at the residence of the bride's parents and Mrs. Sampel Maddock in Brooke by Rey, Johnson were married at the residence of the bride's parents and Mrs. Sampel Mrs uel Maddock, in Brooke, by Rev. John Gibson, of Warwick. The bridesmaid of 50 years ago was Miss Fanny Slater, and the groomsman Mr. Robert Johnston of Euphemia. Guests to the number of 100 attended the celebration. Row. S. P. Irwin of Watford, presided over a musical program, at the close of which an address was read by Mrs. Edward Totton, and a presentation made by Mr. Wm. J. Johnston on behalf of the family. The diningroom was decorated in white and gold, with clusters of Ophelia roses. Euphemia. Guests to the number of 100

It is with feelings of sorrow that we are called upon this week to chronicle the death of Mary Pearl, beloved wife of Mr. Harold Chittick, which occurred on Monday last at her home on the 10th concession after a brief illness. Mrs. Chittick was the daughter of Mr, and Mrs. D. G. Maddock and was married in February of 1919. On Saturday last a little daughter came to them stillborn. Mrs. D. G. Maddock and was married in February of 1919. On Saturday last a little daughter came to them, stillborn, The shock was too much for the young mother who passed away on Monday. Her death came as a shock to her famly and many friends. The bereft husband and other relatives have the sympathy of all in their affliction and we trust that as

the days pass strength to bear their sorrows will be found by them in Him who is "acquainted with griet," The funeral was held on Weduceday afternoon to the Alvinston cemetery, service being held at the house by the Alvinston Baptist minister.

#### Editor Wm. Dawson of Parkhill Passes

Parkhill, Jan. 20.—Mr. William Dawson, editor of The Parkhill Gazette, died at his home here on Sunday morning, aged 62, from acute heart trouble.

The late Mr. Dawson was born at Sylvan, West Williams, and was cierk of that township for 36 years. For 21 years had resided in Parkhill and had served as chairman of the school board. Schools chairman of the school board. Schools and business places were closed to-day during the funeral as a mark of respect to one long and actively identified with the public life of the community.

Besides his widow he is survived by two sons and four daughters.

The annual meeting of Ross & Son's Warwick Creamery will be held in the Town Hall, Warwick, on Thursday, Jan. 29th, 1920, at 2 p.m. for the election of officers, receiving reports and any other business. Good attendance requested.—

I.E. COLLIER Secretary. business. Good attendance J. E. COLLIER, Secretary.

The Rev. W. L. Armitage, rector of St. James Church, London, will (D. V.) preach morning and evening in St Mary's Church, Warwick, and afternoon in St. Paul's Church, Wisbeach, next Sunday, Jan. 25th, on the forward movement of the Church.

ment of the Church.

We will be carrying a stock of new Pres-O-Lite batteries on hand also will have service batteries to rent while your old one is in for recharge or repair. Pres-O-Lite are equipement on seventy-five per cent of cars made in Canada this season.

—R. MORNINGSTAR.

Some fifty to sixty people gathered at

Some fifty to sixty people gathered at the home of Mr. and Mrs. J. H. Robinson of the Egremont Road, for the purpose of expressing to Mr. Geo. Moore some appreciation of his services at the front in the recent war. An address was read by Mrs. E. Morris and Miss McRorie presented Mr. Moore with an envelope containing thirty delices to which Rorie presented Mr. Moore with an en-velope containing thirty dollars to which the recipient though quite taken by sur-prise, replied in a very suitable manner. Mr. Charles Hawkins in a very genial manner performed the duties of chair-Mr. Charles Hawkins in a very genial manner performed the duties of chairman. Mrs. Shore, Miss McRorie, Mr. Wm. Watson and Mr. Hawkens contributed music, Miss Bell, a humorous reading, while some of the men responded to a call for a speech. After the singing of the National Anthem a dainty lunch was served by the ladies. Before the gathering dispersed the chairman tendered a well world your of thanks to the heat well worded vote of thanks to the host and hostess.

#### REV. I. W. PIERCE COMING TO WATFORD

The Rev. I. W. Pierce, Secretary The Rev. I. W. Pierce, Secretary of the Armenian Relief Association of Canada, has consented to come to Watford to tell the thrilling story of the "Sorrows of Armenia." He is coming on Thursday next Jan. 29th, and will address a mass meeting in the Lyceum at 8 p. m. He will also show the thrilling lantern pictures of actual conditions in Armenia. The pictures were taken last summer by the Rev. S. T. Bartlett, manager of the of the Methodist Art. Department of Toronto, who travelled through Armenia. Rev. Mr. Pierce is a Canadian Congregational minister and has been a mission-

Rev. Mr. Pierce is a Canadian Congregational minister and has been a missionary in Armenia for a number of years, serving under the American Board of Missions. During the war Mr. Pierce and his family were prisoners in the hands of the Turks for many awful months, and was only able to return to Canada early last summer. Mr. Pierce has been an eyewitness of many of the terrible atrocities committed on the defenceless Armenian men, women and children by the cruel Turks.

Let the people of Watford crowd the

#### HOCKEY

A few of the boys pulled together a scrub team on Wednesday and struck for Forest for a friendly exhibition game. As there were many of the regular team off the line-up, they went down to detent according to the line-up.

BOOKS WERE BANISHED.

Chinese Emperor Was Jealous of Collection of Wisdom.

More than two thousand years ago there was in China a splendid royal library—thousands of volumes of his-tory, of geography, of poetry, of philosophy and of works on the arts and sciences.

There came to the throne the Em-There came to the throne the Emperor Shih Hungti, who conceived himself to be the greatest man who had ever lived. But when he looked about and saw the great collection of wisdom in this library and in 120 other libraries owned by feudal princes, he despaired of ever mastering it all.

So Shih Hungti ordered that all

So Shih Hungti ordered that all the books in the royal libpary be burned, except the "Yi Chang," or "Book of Changes, and works on agriculture, medicine and divination. It was then ordered by the Emperor that the literati be exterminated, and wherever one was reputed to possess the wisdom of the ancients, him the emperor's vassals slew. And so in the provinces and principalities, as far as the authority of Shih Hungti was recognized, there was a burning of books and a slaying of wise men. And when he had come to the end of these and found there were still dukes and princes who held their lands and their libraries as independent of the emperor, upon those he made war until he had conquered their provinces or they yielded to his authority, and their libraries he also burned and had their literati was recognized, there was a burning also burned and had their literati

put to the sword.

Thus it came to pass that in the Thus it came to pass that in the Celestial Empire there was none acclaimed so wise as the great Emperor Shih Hungti. And they called the empire which he thus founded China, or the Empire of Ch'in, that being the name he took, signifying his greatness and his wisdom.

Now there was in that time in China a man named Liu Pan. He was a soldier and unlearned in books, but it was to him a great scandal that wisdom should be possessed by one man. To the Emperor Ch'in he one man. To the Emperor Chili he refused to yield his sword, but made war upon him; and in forty-three years he had conquered all the provinces of the Celestial Empire, and him the princes and the dukes acclaimed as emperor in place of Shih Hungti. And he called himself Han, signifying one who conquers, and to him came the wise men, for not all had 'fallen under the sword of Shih Hungti. They asked the emperor to restore the royal library, for many

restore the royal library, for many books had been hidden away.

"I won my empire on horseback and not by books," replied Liu Pan.

"Yes, but you cannot rule it on horseback," responded the wise men. So Liu Pan, who knew he was not the greatest and did not desire to be the wisest man who ever lived, rethe wisest man who ever lived, restored the libraries. And the dynasty of Han lasted 400 years and wisdom and poetry flourished in all that time.

Ronmania Is Now a Power.

The war has humbled some great nations and exaited several small ones. Chief among the latter is Roumania. Only to those who have studied the peace terms carefully have the facts with reference to this Balkan power been apparent. Rou-mania has benefited largely, as Frank H. Simonds points out in the

Frank H. Simonds points out in the Review of Reviews.

The truth is, of course, that Roumania is neither a little state nor is she acting off her own bat. As a consequence of the changes in her frontiers, incident to Austro-Hungarian defeat and Russian collapse, Roumania has become a nation with an area as great as Italy, with a population to-day of 16,000,000, living on a territory capable of sustainan area as great a factor and a

She has an excellent army, organ-ized by the French General Staff, battle-trained, an army which despite opening disasters due to Russian treachery and later surrender due to Russian collapse, displayed admirable courage and skill and remains one

or the considerable minrary forces in Europe, actually taking rank after the armies of the five great powers. In addition, by her position Roumania controls the Lower Danube

and, as recent events have shown, Hungary is completely at her mercy. What I am trying to make clear is What I am trying to make clear is that Roumania is herself henceforth a nation whose military and econo-mic resources, whose army, whose grain, whose oil, whose minerals, whose her a position quite unlike that give her a position quite unlike that which she occupied when she was only the largest of the minor Balkan states. Actually she is greater to-day and infinitely more powerful than were all the Balkan states together at the outbreak of war.

Crown Has Many Vicissitudes The Hungarian crown, which is reported to have been stolen lately by revolutionists, has suffered many vicissitudes. A King of Bohemia once stole it, but Otto of Bavaria subsequently recovered it. He, in sending it back to Hungary, packed it in a cask, but it was nearly lost on the journey, because the jolting of the wagon threw the cask into a ditch. At a later period Elizabeth, widow of King Albert, appears to widow of king arbert, appears to have thought it rather a good thing to have with her when she fled to Germany, in case she should ever be financially embarrassed—a piece of foresight which stood her in good stead, since she eventually pawned it to the Emperor Frederick. During the revolution, 200 years later, the unfortunate crown was again in danger of being unlawfully appropriated, and so it was buried in a forest.

After remaining in this dim security for fifty years it was subsequently re

Women and Asthma.—Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kelloggs's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. doubtful and experimental preparations. Your dealer can supply it.

A Euphrates Valley.

A Euphrates Valley.

The Euphrates Valley, we are told, is to be the granary of the world, and this makes the construction of a railway linking it with the Mediterranean an imperative necessity. The difficulties from an engineering point of view are not great. It is hardly realized that from the coast of the Mediterranean at the mouth of the Orontes to the River Euphrates is a distance of but 130 miles, only forty miles of which are more than 1,000 feet above sea level. Thus there need be no tunnels and no heavy gradients, and once the Euphrates Valley is reached all is comparatively easy, for the ground is as fat as the proverbial panake.

The distance saved would be im-The distance saved would be immense. Take, for example, the carriage of goods between London and Mosul (Nineveh) or Bagdad. By the

Mosul (Nineven) or Bagdad. By the present route it works out as: London to Busreh by sea, 6,700 miles; Busreh to Bagdad by rall, 300 miles; Busreh to Mosul by rall, 500 miles. Now, assuming that there will be a railway from Antioch or Alexandretta Mosul or Bagded the distances. to Mosul or Bagdad, the distance work out as: London to Alexandretta by sea, 3,400 miles; Alexandretta to Mosul by proposed rail, 400 miles; Alexandretta to Bagdad by proposed rail, 50 miles. It will be seen at a glance that on the rail journey there is not much to choose either way, but on the sea transport 3,200 miles but on the sea transport 3,300 mile would be saved, to say nothing of eliminating the cost of the Suez Canal dues.—The Near East.

Where He Excelled.

In an Irish village there is a grocer's shop, which is also licensed to sell beer and spirits. The proprietor of the shop prides himself on his skill

of the shop prides himself on his skill in making up packets.

One day a farmer of the district bought a pound of coffee.

"I'll bet," said the shopkeeper, "that I can put a pound of coffee in a smaller package than any other man in Ireland."

"I believe it," was the reply, "for I know you can put a quart of whisky in a smaller bottle than any man I ever saw!"

For Asthma and Catarrh.-It is one of For Asthma and Catarri.—It is one of the chief recommendations of Dr. Thom-as' Eclectric Oil that it can be used in-ternally with as much success as it can outwardly. Sufferers from asthma and catarrh will find that the Oil when used according to directions will give immedi-ate relief. Many sufferers from these ailments have found relief in the Oil and

PLANT TREES ON PRAIRIES.

Attain Sufficient Growth In Five

Years to Hide Buildings. To trace what one might call the evolution of Western agriculturethat indefinable change characterized by some of the old-timers as devolution with a big "D" and a couple of robust adjectives — would require space far beyond that permitted in a letter of this nature. Indeed, a vola letter of this nature. Indeed, a voi-ime might easily be written describ-ing the wax and wane of "free rang-ing on a great scale, the slow but inevitable introduction of pasture systems and the inauguration of irri-gation in definite "dry" areas. How-ever, taking it by and large, certain very distinct symptoms betray this very distinct symptoms betray this slow-acting metamorphosis, and of these one of the most striking, if not most general, is the appearance here and there on the bald landscape of groves and windbreaks formed from hand-plantings of trees indigenous to this fertile prairie soil.

Perhaps this feature is most ap-

parent in the Province of Alberta, where a certain roll in the land may in itself suggest to homesteaders the desirability of a small amount of arboriculture. It is not surprising that tree-planting has made great progress in irrigated areas, where artificial watering, possible during a greater part of the summer, conduces to rapid growth even under unfavorable climatic conditions. On irrigated farms all through southern Alberta may be seen homes whose setting is enhanced by long rows of poplars or heavy comps of soft maple and willows.

One of the most striking illustra-tions of the beautification of the prairie by tree-planting is to be seen at Strathmore, the headquarters of the western irrigated block of the canadian Pacific Railway. As the train swings in a wide curve from the great open space beyond, where trees are not and the very grass this year has been parched and sere, there comes into view at the skirts of the little town a vista of rare health. beauty — brown gables of painted buildings, with red-brick chimneys and white trimmings, evergreens that sweep the sides of curving driveways, clumps of willow and poplar that hide the utilitarian features of a farmyard and stray bits of soft green lawn that charm the tures of a farmyard and stray bits of soft green lawn that charm the eye tired with the endless roll of bare boundless prairie. It might be, this little spot, a town in old Ontario, with its abundance of shade trees and its profusion of flowers. Yet it was, six or seven years ago, a mere staked square in a wilderness of level monotony, a bit of bald prairie ungraced by a single tree or shrub.

shrub.

"Money did that," I imagine I hear the reader remark. Not at all; probably the actual money cost of the whole ensemble would not run over a few dollars. It is something more than money that brings greenness and beauty and the blessing of shade and velvety lawn to treeless tracts of prairie. Ofttimes, indeed, in these Western lands one finds the most trees and the prettiest flowers and the most inviting homes on farms where money is least thought of, where a far more treasured possession is the memory of an elm-fringed field "down east," with a long lane marked by cedars and bal-sams, or a great cool maple grove where robins twittered in soft sum-

mer noons. The ordinary man on the ordinary homestead out here is beginning to think in terms of trees and flowers. On the Robson farm near Strath-more, on the Vidal farm near Dalroy, score of farms on the Suther at a score of farms on the Suther-land block and at a dozen other places I saw whole avenues and groves that have been created within a decade. Your Westerner does not set out a tree here and a tree there as does his contemporary who beau-tifies the surroundings of his On-tario home. Instead, he orders his slips or cuttings by the thousand and plants them by the acre, in wind-breaks five or six rows in depth and breaks five or six rows in depth and a mile or two long, or in groves that measure rods on either side, with trees set two feet by two feet all the way across. For, mark you, he need not plant a tree to grow a tree; it is necessary only thether ways. it is necessary only that he make a hole in the ground with a poker and insert therein a willow slip or a cutthing from a poplar. There is some-thing in prairie soil that causes really phenomenal growth in these soft-wood trees. On the Canadian Pacific wood trees. On the Canadian Pacific Demonstration Farm at Brooks I saw acres of trees, literally, that were planted less than five years ago, and that had attained sufficient growth to hide buildings such as ordinarily group themselves around a barn. At the same place I saw a row of Russian poplars over ten feet in height that had been planted as cuttings in 1916, three years ago. These Russian poplars do unusually well in all three prairie provinces, and, with Manitoba maples and willows, are most popular among tree-planting farmers, although the common spruces and balsams seem to make great headway and to endure the extreme winter weather quite as well as in the eastern provinces.

The Brazilian city of Babia has re-placed its old telephone service with an American system.

#### \*\*\*\*\*\*\*\*\*\*\*\*\* Dictator of

the Ukraine

NE of the most frequently heard of yet least known personalities of contemporary Russia is Gen. Petlura. the Ukrainian Directorate, the previsional government of the independent republic of the Ukraine. The Ukraine 'itself, although a country the size of France and Italy taken together, with the population of the latter, is a veritable terra incognitz of Europe. Yet, among other things, it should be noted that one of the primary reasons for the German collapse in the war was the failure of the Prussian command to replenish the granaries of the Fatherland with the wheat stores of the Ukraine, the richest part of the former empire of the czar. This failure was due to the desperate resistance of the Ukrainian peasantry to the Teutonia conqueror.

In the general rising that, following the armistice of November 11, 1918, has rid the Ukraine of the German overlords, the leading part was assumed by Gen. Petlura, whe has since become the legendary here of his people and country. The Paris newspaper "Eclair" publishes the following sketch of the Ukrainian

generalissimo:
"Petlura was born in 1879, in the

heart of that Ukraine to whose cause he vowed his life.

"Son of a poor family of Ukrainan Cossacks, Petlura entered life a a time when the czaristic regime reached the climax of despotism and corruntion. His extraordinary inreached the climar of despotism and corruption. His extraordinary intellectual gifts opened for him the gates of the Academy of Theology, theretofore closed to Ukrainian peasant offspring. But, animated by a burning love for his unfortunate country, Petlura organized a group of students for the propagation of Ukrainian literature and popular songs. He was expelled and refused admission to any other school in the Russian empire.

Russian empire.

"From this moment dated his desperate struggle against the Russian tyranny—/a perilous task that made him a wanderer and an outlaw. He went to live in the Carcasus, in the Ukrainian country of the Kuban Cossacks, and worked there in behalf of the co-operative movement. Later he came to Moscow, entered journalism and became editor-in-chief of the Ukrainian Review there.

"When this publication was sup-pressed at the beginning of the war, Petlura devoted himself to the ser-vices of the League of Zemstova (provincial assemblies), which con-centrated all its activities on assist-ing in the conduct of the war. He soon forged his way to the forgrous soon forged his way to the foremost rank. After the revolution of March, 1917, Petlura was elected chairman of the Committee on Military Or-ganization of the Congress of Sol-

diers' Councils "His principal endeavor now was to concentrate in the Ukraine all soldeers of Ukrainian origin, in order to defend the country against Teu-tonic invasion. In the course of events he decided to form a first pro-

events he decided to form a first previsional government of the Ukraine.

"But he met with resistance in
Petrograd; Kerensky, the Socialista
and the bourgeois reactionaries opposed his plans. It was at this juncture that Bolshevism gained foothold in Great Russia. In vain Petlura pleaded that the defence of the
Ukraine should be intrusted to
Ukrainian troops exclusively. It was
too late; Kerensky refused to listen,
and was soon downed by Lenine and
Trotsky. Followed the disastrous
rout of the Russian armies, the collapse of the eastern front.

"On entering Kiev, holy city of

"On entering Kiev, holy city of the Eastern Slav world, whence in A.D. 980, under the rule of St. Vladi-mir, the first missionaries departed to convert Russia Patiers power

mir, the first missionaries departed to convert Russia. Petlura, now commander-in-chief, addressed the inhabitants and his troops in the square of St. Sophia as follows:

"Now that the Ukrainian capital has been delivered, I wish to tell you that the Ukrainian people responded to our appeal without hesitancy and without dispute. The sarcrifices, the blood shed for the Ukrainian republic, affirm eloquently the will of the Ukrainian people.

"But at the same time these sacrifices entail on us a great duty.

"But at the same time these sacrifices entail on us a great duty. We must combat anarchy for the sake of the nameless heroes who have embodied in themselves the spirit of the Ukraine. Whoever can carry a gun must follow their example and struggle against the rule of disorder, whether it comes from the Left or the Right."

#### PRIME BEEF OF CANADA

EXCELLENT CATTLE ARE RAIS-ED OFF GRASS.

A More Stable Outlet Is Needed Than Exists at the Present Time-More Trade Within the Empire Necessary on Account of the Uncertainty of the American Market for Feeders.

Future requirements of the beef-cattle raiser as regards a market for his best-finished cattle indicate the need of some provision for handling an exportable surplus of first-quality meats in such a manner that top prices for the same may be obtained in the British market, if the policy of strengthening the Empire by en-couraging production of all neces-sary supplies within its borders is to be adhered to. be adhered to.

be adhered to.

At present many of our best cattle-breeding stock, as well as feeders, are going to the United States, breeders there recognizing their value and taking full advantage of the bargains they secure, and in the meanwhile Canada is gaining a reputation as a non-producer of prime beef. Pure-bred beef sires and females, bred and raised to a safe age in this country, invariably make good when taken to the United States, while feeders in that country recognize the fact that feeder cattle raised here respond more quickly to feed here respond more quickly to feed when taken to a slightly warmer cli-mate than do the animals bred and raised there, and on this account are willing to pay a premium for Canadian-raised feeders. Yet this country does not get the full benefit of the good stock that is raised here. Furthermore, the inferior grades choke our home market to the disgust of the killer and the consumer and with the killer and the consumer and with

resulting loss to the producer.

The sooner a steady and paying market for finished cattle is perman-The sooner a steady and paying market for finished cattle is permanently established, the sooner will the average cattle owner in the East respond to the advice to feed his stock to a finish, and it will not be long after that point is reached before he will begin to look for animals that will use their feed to best advantage. This will naturally result in benefit to the breeder of good pure-breds, and in the keeping of the better feeder-cattle within the country. Prices for scrubs at the leading markets for some time past have been such as should have discouraged farmers of attempting to sell such animals as beef, but with feed prices as they are, the price distinction between these half-fed cattle and the best finished ones has not been sufficient to encourage production of the latter, and the worst feature of the situation is that the man who has only inferior stock, or stock that is under-fed, is disposing of them, not with a view to securing a better kind or for the sake of changing his cash back into feed for a few good animals that he might retain, but with the distinct

sake of changing his cash back into feed for a few good animals that he might retain, but with the distinct intention of getting out of the business and staying out.

It is naturally looked for by the average consumer who fails to realize the economy of good, fully-finished cattle, that the lower prices paid for animals on the hoof should result in lower prices for beef. Some reduction in beef prices has been accomplished in beef prices has been accomplished of late, it must be admitted, but if good dressing quality in cattle stands for anything worth while, it is hard to understand how the butcher can be the gainer by using stuff that is of the lowest quality on the hoof, even after the price he has paid has even after the price he has paid has been such as to guarantee a loss to the raiser of the cattle. With good, well-finished cattle and only such offered on a dependable market, there is little doubt that the price per pound of meat could be kept at a level satisfactory to the consumer without loss to the butcher while the consumer would be a further cause. without loss to the butcher while the consumer would be a further gainer owing to the quality of the meat.

If it is necessary in order to each other than the common in meat production, that only well-finished cattle be offered on the market, it is further necessary that the feeder and incidentally the breeder of the cattle be assured a necessary.

dentally the breeder of the cattle be assured a permanent good demand for his animals. If the present number of cattle raisers in the country should all turn to the keeping of good stock only and the proper feeding of the same, the home market would not provide this demand in sufficiency. Therefore, it is necessary that provision for the disposal of a possible surplus supply be made at once; that if there is a general feeling of faith in the ability and willingness of the producers to respond to a fair promise of success in their undertaking.

The matter of providing for an ex-

The matter of providing for an export trade in chilled meats, together with others affecting the cattle industry, was discussed by the agricultural committee of the Edmonton Board of Trade, at a meeting held this past summer, and a resolution was unanimously needed by the tion was unanimously passed by the council of the Edmonton Board of Trade, as follows:
"Resolved, that this council is of

the opinion that, having in mind the future requirements of the meat export trade, together with the present port trade, together with the present and prospective requirements of the dairy industry, it is in the interest of the live-stock industry of Canada that the Dominion Government should be urged to provide for the erection of adequate cold-storage facilities at Montreal and such other Atlantic ports as may be deemed secessary; and that this resolution, logether with a conv of the report.

or the committee on agricultural development of this Board of Trade referring to this matter, be forwarded to the Hon. the Minister of Agriculture for Canada."

Right Drainage Is Needed.

Fight Drainage is Needed.

Few people can stand wet feet.
Exactly the same thing is true of
most crops. Wet, soggy swamp land
never produces fine crops. There are
may farms all over the country
which could be made to produce
bumper crops if they were properly
drained. The farmer, who has a farm
on which both he and his crops can
keep feet out of the wet, has land
that will grow splendid crot.

#### POINTERS FOR BEEKEEPER.

Not Always Easy to Determine Whether Cellar Is Satisfactory.

It is often difficult for the beekeeper to know whether his bee cellar is giving the best results, for he may not have been able to determine from reading or observation of other cellars whether it is satisfactory. Below are given a few measures which the beekeeper may apply to his apiary and his cellar, so that he may be able to decide whether his methods of cellar wintering should be improved.

methods of cellar wintering should be improved.

(1) During the winter a thermo-meter inserted in the entrance of the hive should show a temperature of at least 50 degrees Fahrenheit.

(2) There should never be any condensed moisture on the covers of the hives, and certainly never any on the bottoms. the bottoms.

(3) While the cellar should be

kept dark at all times, if a candle is held of January it should be several

#### Well-Arranged Bee Hives.

econds before any of the bees break cluster. Frequently the cellar doors may be opened in March without dis-turbing the bees.

(4) There should never be many

dead bees on the bottom of the hives. The live bees should be able to push them out as they die during the winter. The bees thus carried out will be found on the cellar floor just be-low the entrances. If there are bees all over the floor, it shows that these bees have flown from the hives—

bees have flown from the hives— an indication of poor wintering.

(5) The bees should be quiet dur-ing the late winter. Noise at this time indicates that the bees are dis-turbed by an accumulation of feces, caused by low temperatures or poor

(6) If the bees were in good condition in the fall and have been wintered well, the loss during the winter will have be more than oneter will never be more than one-sixth of the total population of the hive. Such a loss is excessive, how-ever, and in a well-wintered colony it may be as low as a hundred bees. This probably depends to a large ex-tent on the age of the bees which go into winter, and if the temperature is right; and the stores good there will be almost no loss of vigorous bees.

(7) The bees should not leave the hive while they are being carried from the cellar. If they do, it indi-cates that they are excited by an accumulation of feces.

cumulation of feces.

(8) Before removal from the cellar there should be no spotting of the hives from dysentery. There may be a little spotting after the bees have had a free flight outside, but if this is small in amount it does not indicate a serjous condition.

(9) When the bees are taken from the cellar there should be no moldy combs, for the cellar at the right temperature will be too dry for the growth of moids.

growth of moids.
(10) There should be no brood when the colonies are taken from the

cellar. Brood-rearing in the cellar is proof that the cellar is too cold or that the food used by the bees is

(11) Enough brood should be in ach colony at the opening of the main honey-flow to fill completely 12 Langstroth frames.

(12) The population of the hive should not decrease appreciably af-ter the bees are removed from the cellar. Such a condition, known as spring dwindling, is an indication of poor wintering. For three weeks af-ter the hives are set out no new bees will be emerging, but the loss of bees during the time should be so small as not to be noticeable.

Children Cry FOR FLETCHER'S CASTORIA

#### PURE-BRED SIRES.

The List of Stallions Enrolled for 1919 Totals 1,729.

The List of Stallions Enrolled for 1919 Totals 1,729.

The annual report of the Stallion Eurolment Board of Ontario, recently issued, will prove of special interest to horsemen on account of the information given regarding the breeding of horses. The secretary of the board points out in this connection that it was not possible to include all breeds this year. But his selection of the Clydesdale as the breed to start with will be generally popular, since horses of that breed are more widely distributed and largely owned than those of any other breed in the province. Another, item of the report that deserves mention is the article by C. D. Mogilvray, V.S., M.D.V., principal of the Ontario Veterinary College, on hereditary unsoundness in horses; the information contained in this article being most important to stallion owners, in view of the fact that as the writer points out, since the enrolment of stallions for public service has for its attainment the improvement of horsebreeding through a has for its attainment the improve-ment of horsebreeding through a standard of qualification for sires, the enrolment requirements are designed so as to eliminate as far as possible from public service stallions of undesirable type and poor conformation, and to discourage the use

of undesirable type and poor conformation, and to discourage the use of unsound sires likely to transmit their defects.

In submitting its report the board calls attention to the fact that the number of stallions enrolled for 1919 is 1,729, and as these are all purebred it shows an increase of enrolment of purebred sires of 194 over the year 1918. In addition to the regular enrolment certificates issued there were 25 interim certificates by reason of the fact, that the owners failed to secure proper transfer of ownership. There are also ten stallion owners who did not furnish the registration certificates, therefore no enrolment certificates, therefore no enrolment certificates could be issued.

The analysis of the table of breeds The analysis of the table of breeds shows approximately 80 per cent, of the horses enrolled belong to the heavy draught breeds, and of the heavy draught breeds 71 per cent, are Clydesdales. Of the light horse breeds approximately 80 per cent, are standard-breeds.

In providing information regarding the breeding of famous Clydes, dale sires, the Enrolment Board has drawn up two tables; one giving a list of the great sires in Scotland (proved by the winnings of their get at the great horse shows of that country), the other showing the breeding of the animals listed in the first table. Added interest in these tables is provided in the photographs of 48 of the sires mentioned.

#### Soy Bean Very Profitable.

Soy Bean Very Profitable.

The soy bean is a very profitable crop when grown for seed, and the seed-growing industry is being developed in many cotton-growing sections and in the southern part of the corn belt. The character of growth, its uniform maturing habit, and its large yield of grain recommended the soy bean for seed production. The many disadvantages which attend the harvesting of cowpeas are not common to the soy bean. The increased demand for seed for planting purposes and the utilization of the died beans as food and for the the dried beans as food and for the

Gathering Soy-Bean Seed.

oduction of oil and meal have ought about greatly increased ought about greatly increased rices. The seed of the best varieties prices. of soy beans is selling for \$2.50 to \$4 per bushel of 60 pounds. As the merits of the crop are better appremerits of the crop are better appreciated, the demand is not likely to diminish. Utiliz: g soy-bean seed as feed is distinctly profitable. In addition to the value of the seed, the benefit to the land on which the beans have been grown and the use of the threshed vines as a source of feed must be taken into consideration. tion.

Animals and Environment.

Many otherwise profitable animals are ruined by a change of environment and management. All animals that dwell long under certain conditions become homesick when their ditions become homesick when their home is changed. While time erases all outward sign of dissatisfaction and discontentment among such stock many never produce as liberally in their new situation. To obviate the possibilities of these occurrences, better treatment must be accorded the animals in their new home than was afforded them before the change. Better quarters, more palatable foods, greater care and some of the luxuries of life will do much to oversome the detrimental effects to bring them back to liberal yielding again.

WATFORD, JANUARY 23, 1920.

#### THE FORWARD MOVEMENT

The leading Protestant churches in Canada are now in the very midst of the Forward Movement in their respective churches. It is sometimes asked What is the Forward Movement? Through this movement it is hoped that the Church will learn her shortcomings, her needs, and realize her opportunity, and thus awakened and repentant, equip herself with workers and means to carry on with renewed spirit the work God is calling her to do in this New Day. It is also asked, Why a Forward Movement? It is necessary because the church has to face after war conditions in Canada and abroad, also the problems and responsibilities of peace.
The future freedom of the world, from war, depends upon the faithful and efficient work of the Church. Let Watford and vicinity respond very nobly to the call of the New

#### The Old Order Changeth

Our trustees held conclave in Ottawa last week and one of the interesting recommendations arrived at was that the entrance examination should be abolished. This, we are told, was carried almost with unan-

It appears that this examination, in the case of some pupils, is a barrier to entrance to the High School. The logic of removing the barrier is perfect. The old guy who said twenty centuries ago that there was no royal road to learning was not only in error, but, as well, is much out of

Here we have a plan to make the road royal, but it does not go far enough. Why should there be any impediment, not to learning, but to educational distinction? Why may not the youth saunter in his unimpeded way, up through the high school, the university, and later the colleges of law, medicine, theology, pharmacy and dentistry without ever being placed in the embarrassing position of having to set down in black and white evidences of what he knows and what he doesn't know? A path wholly smooth is surely much better than one but a little smooth.

Obviously the next point of attack is the high school, and we advise the boys and girls there to see to it that they are no longer annoyed by the bothersome examinations that mar the beauty and serenity of every passing summer.—Welland Telegraph.

#### AN EXCELLENT MEDICINE FOR LITTLE ONES

Baby's Own Tablet are an excellent medicine for little ones. They are a mild but thorough laxative which sweeten the stomach and reg-ulate the bowels thus bringing relief in cases of constipation, indigestion, colic, colds and simple fevers. Concone, colds and simple levers. Concerning them Mrs. L. J. Chiassion, Paquetville, N. B., writes:—I have found Baby's Own Tablets excellent for my young baby in the case of constipation and colic and it gives me great pleasure to recommend them to other mothers." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville,

Mr. Henry Canneff, a pioneer mer-chant of Petroles, died last week. He hell been a resident of the town since 1865, in the early days of the oil boom.

#### A TONIC FOR THE NERVES

The Only Real Nerve Tonic is Good Supply of Rich, Red Blood.

"If people would only attend to their blood, instead of worrying themselves ill," said an eminent nerve specialist, "we doctors would not see our consulting rooms crowded with nervous wrecks. More people suffer from worry than anything else.

The sort of thing which the specialist spoke of is the nervous run down condition caused by overwork and the many anxieties of to-day. Sufferers find themselves tired, morose, low spirited and unable to keep their minds on anything. Any sudden noise hurts like a blow. They are full of groundless fears, and do not sleep well at night. Headaches, neuritis and other nerve pains are part of the misery, and it all comes from starved nerves.

Doctoring the nerves with poison ous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich, red blood. Therefore to cure nervousness and run-down health Dr. Williams' Pink Pills should be taken. These pills actually make new, rich blood which strengthens the nerves, improves the appetite gives new strength and spirits, and makes hitherto despondent people bright and cheerful. If you are at all "out of sorts" you should begin curing yourself to-day by taking Dr. Williams' Pink Pills.

You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

#### CHOP STUFF

Michael Gallagher, well-known Ecfrid resident died last week.

The penitentiary population of Canada increased 500 in the last two years. Hamilton journeymen plumbers work a 40-hour week and are paid 90c an hour. Saturday is a full holiday.

A woman who recently died near Bag-nor, Eng., had the rooms of her house papered with old postage stamps. Miss Violet Bliot and A. A. McTavish have been appointed municipal auditors at Parkhill at a salary of \$25.00 each.

On account of the advance in news print, some Western Ontario Weeklies have cut down the size of their paper.

The village council of Lucan is submitting a by-law to the ratepayers for the purpose of raising \$3,000 by debentures to pave the main street with con-

Mrs. John L. McPhee, aged 86, one of the pioneer settlers of West Williams, died on December 26th. Her sister, Mrs. Alex. Ruthertord, of Strathroy, who attended his funeral, was taken ill and died on Jan. 1st, aged 82 years.

Plympton Tp. officers for 1920:—Audisors—P. J. McEwan and Albert Mintelly, \$20 each. Clerk—Thos. Nesbet \$250. Treas.—Andrew Lunham \$175; Assessor—W. B. Smith \$85; M. O. H.—Dr. P. McG. Brown.

A press report states that Major-Gen.
A. D. McRae of Vancouver, son of Mrs.
McRae of Glencoe, has offered \$10,000
for the building of a half-million dollar
armory in Vancouver, provided other
public-spirited citizens make up the balance of the amount.

County Engineer Talbot believes that Middlesex county will have two and possibly three Government roads, and that the Longwoods road will be one of these and the Sarnia gravel road the the other. Work will no doubt be commenced on one of the roads westward from London in the spring.

Work has been commenced on the

Work has been commenced on the transmission line to connect Glencoe with hydro-electric power. Poles have been erected for a distance of two miles east from Bothwell and another construction gang now working at Streetsville is ex-pected to begin on the Glencoe end of the line about the first of February.

#### Value of Egg Laying Contest

Experimental Farms Note

There is at the present time a great wave of interest and enthusiasm in poultry production sweeping over practically the whole world. Unpractically the whole world. Un-doubtedly the necessity for increased production of all foods has been a great factor in this awakened interest but before this necessity arose the wave had begun, so that it but in-creased rather than started it.

While there are a great many fac-

tions more or less responsible for the awakened interest, the greatest of all has undoubtedly been laying contests

The primary value of laying con-tests undoubtedly was the advertising and stimulus they save to the breeders who entered their flocks, but the greatest value to the poultry industry was and is the public attention that they have attracted to the production end of poultry keeping and the establishing of confidence in records made under public supervision

The shows and exhibitions that had been held in the past attracted attention and stirred interest from the love of beauty of formand feather but with the coming of laying contests the general public—the keen business man and the dissatisfied city worker realized that here was a business man that was more than a fad, a hobby, that here was a business capable of returning a good profit on investment or a good independent liv-

The man of means invests in a farm, employs an experienced poultry man and goes into the business. The city worker has not sufficient capital for this, so he starts a small back-yard flock, learns how to handle it with profit, gradually expands, looking forward to the time when he can stop his city work and depend entirely on poultry for a living.

It is this awakening of public interest in poultry production that has so far been of first importance but while this, no doubt, will continue ultimately the greatest value will come from the establishing of Records of Performance that will be above reproach.

In the past, records have been published that were made solely unde the supervision of the owner. Many of these needed to be taken with a grain of salt but when records are made in public contests, government supervision creates a confidence that

not felt in home records.
With the establishing of an Official Record of Performance, the door to breeding for greater egg production will be opened in a way that has

never been possible before. With a view to stimulating inter est in production, the Dominion Experimental Farms have established Egg Laying Contests throughout Canada. The first of these was started at Charlottetown, P. E. I., on November 1st, 1918, and created so much interest in that province that on the following November 1st six other contests were started as follows:

The Canadian Egg Laying Contest at Ottawa with fifty pens competing Federal contests of twenty pens each at Nappan, N. S., Cape Rouge, Que. Brandon, Man., Indian Head, Sask. and Lethbridge, Alta.

These latter, while not strictly confined to the provinces in which they are held, are intended to be more or less of a provincial nature, while the Contest at Ottawa is international in

It is expected that next year not only will the capacity of the present contests be increased, but that new contests will be established in other

districts throughout Canada. GEORGE ROBERTSON,

Poultry Division, Experimental Farm, Ottawa, Ont.

#### Secret of Greatness.

It is Emerson who somewhere says that the average run of men fret and worry themselves into nameless graves, while here and there a great unselfish soul forgets itself into immortality.

Many hundred years before, a much wiser man had said: "For whosoeve will save his life shall lose it; and whosoever will lose his life for my sake shall find it."

A rather cryptic utterance; so contradictory in sound that the majority of men pass it by unheeding.

But now and then there comes a man who, sensing its truth, harnesses his life to it, forgetting every selfish thought and purpose.

Often he knows himself to be a little man: or, at best, only medium-sized But the world, beholding the marve of his influence, remembers him and calls him great.-Bruce Barton, in Red

#### Fortunate Land Purchase.

A tower built by Michael Angelo in 1567, at the edge of the Mediterranean surf, is now a mile inland. In 1830 the Roman government sold to the Marchese Guglielmo of Civita Vec-chia a bit of land surrounded by two arms of the Tiber river. There were no stipulations as to increases by deposits, but the fiscal authorities in 1895 found that the surface of the island had been increased almost half again the dimensions the marchese

### Queen Maud.

Queen Maud.

Queen Maud of Norway often wonders when she will get back to England again to visit her mother, Queen Alexandra, says Tit-Bits. She is the happiest of married queens, and is as fond of her adopted people as they of her. Like a sensible woman, she took up sleighing, ski-ing, and skating to please the Norwegians, whether it pleased herself or not. The Queen still cycles when she gets the chance, and was the first of royal ladies to go a-wheeling. Incredible as it may now seem, lots of people were shocked when first she started riding her blcycle in the Sandringham lanes. King Haakon proposed to her, by the way, when they were cycling together one fine morning.

### ALL SHUN THE PIRATES

HALIFAX VISITED BY FIRST GER MAN SHIP SINCE WAR.

Hun Captain Tells Harrowing Story of Hardships — Although the Barque Called for Aid When Im Distress, Ships Passed By In Silence on Learning That They Were Teutons — Englishman Played Good Samaritan.

THE first German vessel to enter Halifax harbor since the war was the barque Paul, owned in Hamburg and commanded by Herr Kapitan Wulf Kreuger, who during the war was pilot of a German seaplane operating in the North Sea. She arrived on November 30, bringing an inter-

esting story of battles with the sea. The Paul left Hamburg on October 18, in ballast, for Philadelphia, and had a succession of fierce storms. She was reported in distress, and it was current talk that passing ships refused to render any assistance beyond taking off the crew in case they proposed to abandon the vessel. No one would take her in tow.

The Paul, a four-masted barque, sailed from Hamburg, October 18, in ballast, for Philadelphia, where she was to loaded by Sonneborn Sons with barreled oil for Hamburg. On November 1, Captain Kreuger says, in longitude 18,00 w., latitude 46.00 n., a heavy storm sprang up, which broke off the foretopmast and forced the vessel to lay-to for four During the storm one of the

buring the storm one of the sailors was on the foremast, making the lower topsail fast, when the main top broke, and the man was thrown to the deck, breaking one of his legs, an arm and also receiving severe internal injuries. The British steamer Idaha soon after arrived on steamer Idaha soon after arrived on steamer Idaho soon after arrived on steamer raano soon after arrived on the scene and took the injured man off. The Paul then proceeded on her way for Philadelphia, but on November 19 fell into another gale, blowing from the southeast. They were forced to heave-to again, this time the main topmast was carried away Later in the day the mixton away. Later in the day, the mizzen topmast came down. Two days later the Furness liner, Southwestern Miller, hove in sight and the Paul asked for a tow. The Miller replied she would take the barque in tow, but after coming alongside, sailed away without sending further word. but after coming alongside, sailed away without sending further word to the disabled barque. The next steamer to pass was the Furness liner Manchester Merchant, in charge of Captain Musgrave, who during the war had his ship torpedoed by the Germans, and when his crew took to their boats, the enemy submarine rose to the surface and fired on the

rose to the surface and fired on the helpless sailors.

Notwithstanding this bitter experience, Captain Musgrave, realizing the plight of the German barque, did all in his power to help them.

The captain of the Paul spoke of Captain Musgrave as a splendid

seaman who did all that he could, sending messages to his owners in Hamburg and his agents in New York, and scattering messages broad-cast over the ocean. The Manchester Merchant went on her way, and the Paul started for Cape Race. She

Paul started for Cape Race. She had lost twenty-one sails and now had only one lower topsail, one mainsail and one foresail.

On November 25, the Paul ran into a calm, but suddenly a terrific electric storm broke out. After this a coastal steamer passed so close that the captain says he almost could have "spit on her deck." The Paul was showing distress lights, but the coastal steamer passed by, taking no notice of the barque. Apparently. Captain Krueger says, "those on watch were asleep."

Alcohol Developed from Wood Waste. A bulletin has been issued by the Honofary Advisory Council for Scientific and Industrial Research in Scientific and Industrial Research in the Dominion of Canada on the subject of the manufacture of ethylalcohol from wood waste. The article is from the pen of G. H. Tomlinson, B.A., who states in an appendix that, while he has no recent information regarding developments of the manufacture in either the United States or Canada, it has been reported that several plants for producing ethyl alcohol from wood waste were installed in Germany during the war. ethyl alcohol from wood waste were installed in Germany during the war. Their output of alcohol was relatively large, though, as far as he is aware, no details of the development in Germany have been made public. Further expansion in this direction cannot be looked for, but, as the demand for industrial alcohol is rapidly increasing, he predicts that it must soon be utilized to supplement the gascline supply. Mr. Tomlinson states that in British Columbia alone sawmills produce from 10,000 states that in British Columbia alone sawmills produce from 10,000 to 15,000 tons of wood waste every day, representing sufficient raw material to produce from 30,000,000 to 50,000,000 gallons a year, or enough to operate 100,000 motor cars. In the course of his article, Mr. Tomlinson deals chiefly with plants which have been constructed in the United States during the last ten years, and which have been producing the highest grade of ethyl alcohol at a reasonable cost.

## THE Demand Will Exceed the Output-Place Your Order Now!

The Ford Company advise that, on account of the shortage of raw material, they entertain no hope of supplying the demand for Ford Cars during the coming season.

Our allotment of cars will be small compared with the demand that will exist in this territory. In order to obtain this allotment it will be necessary to show the Ford Company the actual orders.

As Ford Dealers in this district we are anxious to serve the community to the best of our ability. By placing your order now you will assure yourself of getting your car at a later date.

### The Trouble Listener

By R. RAY BAKER

(Copyright, 1919, by the McClure News-

He stood at the park entrance, a dark-haired, fashionably garbed man of slender build, and allowed his cane to swing repeatedly against the wall that embraced the terrace. Beneath a small, dignified mustache his lips twitched nervously, and his black eyes, set in a pale, almost emaciated face, roamed restlessly over the throng that was enjoying a late afternoon siesta.

From his position at the gate he could see two old men smoking corncob pipes contentedly, chatting aimless-ly as they rested on a bench, against which a pair of crutches leaned. Near-by was a languid young woman with yellow hair shielded by a red parasol, gazing dreamily into space and now and then calling methodically: "Ed-ward, come here," to a bare-legged youngster romping, heedless of her admonitions, on the lawn in the vicinity of "keep off" sign.

A grimy laborer, clamping his jaws placidly on plug and carrying a dented dinner pail, his shoulders hunched forward and his feet dragging after him, slouched into the park and paused near the entrance, where the wind had sep-arated an abandoned newspaper into its several folios and scattered them

over the grass. The laborer glanced furtively about, stepped gingerly on the lawn, and a moment later moved out of sight along the walk, whistling listlessly no tune in particular, the newspaper folded compactly and protruding from a cont pocket.

Two girls passed near the observer with the cane. One was chewing viciously on gum, punctuating her remarks with frequent smacks of the lips. The other evidently had been weeping, for there were traces of tears in her eyes and she carried a wilted

handkerchief.
"I'd tell 'im where tuh get off at," snapped the gum chewer. "Don't let 'im put anything like that over on yuh. The idear dockin' yuh a whole dollar jes 'cause yuh busted one meas-ly li'l fift'-cent vase. Well, gon'by, I gotta hurry home 'p' get fed."

She hurrled off through the park,

while the other girl walked on down the street, soaking up more salt water with the tiny lace-fringed square of linen. All this ceased abruptly at linen. All this ceased abruptly at the next corner, where she was joined by young man and a ripple of laughter

floated back. The man with the cane smiled somewhat grimly and adjusted the

stick on his arm. "The inhabitants of this old world certainly do have their troubles," he sighed, and as he turned he collided

with a tall, thin, blond young woman chad in pink. "Pardon," he murmured, and then as he recognized her:

"Oh, hello, Evelyn. This is a surprise. What are you doing, that you can't see where you're going? Studying astronomy?"

Evelyn smiled sadly and took him by the arm. "You're just the man I need," she as-

serted. "I'm in awful trouble-and it's all on account of my no-good husband. Joe, I wish I'd married you. Come in the park and I'll tell you all about it, maybe you can advise me.'

With an air of resignation he allowed himself to be piloted along the park walk. They were just in time to see and hear the amiable discussion of the two old men with corncob pipes break up in an angry, sputtering argument over the effect of the peace treaty on the map of Europe, or the high cost of living, or the batting percentage of the major league catchers.

As the man and the girl passed the

young woman with the yellow hair, the youngster who had been romping on the lawn came running up to her, splitting the air with shrieks.

The young woman manifested great annoyance, stopped gazing at distant nothings, seized the bare-legged child by the arms and dumped him unceremoniously on the bench beside her. "Now, what's the matter?" she demanded angrily. "Can't I have a min-ute's peace? What are you roaring

"I bit my finder," he wailed, and let loose another torrent of tears.

"Shut up!" she commanded, and gave him a slap across the face. He became silent immediately, except for some half-suppressed sniffles, evidently through fear. She looked up as Evelyn and her escort were passing and

"Oh! How do you do, Mrs. Benjamin," she said. "Did you ever see such a kid? I don't have a second of

comfort. I wish he'd never been born. He's driving me crazy."
"She thinks she's baving troubles."

said Every to ner companion, as mey went down the walk. "But her troubles are nothing compared to mine. Wait till I tell you. Come over to this

As they were being seated slip re-

"Where have you been the last thing years? I heard you went West. you look so pale. You must have been

reply, simply moistening his dry lips reply, supply with his tongue,

"I heard you were engaged to marry
"She raftled on. "Well, I got

He nodded but did not vouchsafe a

out there," she rattled on. "Well, I got married soon after you left; and we lived so happily till—"
Tears came to her eyes and a chok-

ing sob halted her conversation. She blaw her nose and resumed:

"Ain't it queer, to see people like Mrs. Haines back there fretting and worrying about that little boy and thinking she's in-misery; while here I am with something real to worry about. Oh, Joe, it's awful, that's what it is! Who would have thought two years ago-Oh, that husband of mine is a brute! Do you know what he's been doing? Well, he-he's been going out with another woman, that's what.'

She broke down completely and the man placed a sympathetic hand on her

"Don't feel so badly," he advised. "It can't be helped. Men sometimes do those things. Anyhow, it isn't as bad

She looked up and said almost sav-

"Oh, it ain't? That's all right for you to say, Joe Carson-you who never had a care in your life, and loaded down with cash, too. I can't tell you how I'm suffering because of Walter's actions.

"You see, Walter never comes home to lunch; but I phoned his office at noon yesterday to see about some things for dinner, and the office girl told me he went out to eat with some woman. It made me furious, but I didn't say a word to Walter. I called again just a little while ago and the girl told me the same thing. So I came out to take a walk and decide whether to get a divorce or just leave

one of those vampires." Another flood of tears broke forth and Carson looked about uneasily, hesitating to speak lest he say the wrong

thing again The languid young woman and the bare-legged boy who was such a trial were passing. The youngster was laughing up at his mother as they tripped along, his hand in hers.

Evelyn looked after them and re-

marked sneeringly:
"Well, Mrs. Haines has got over her spell and the kid's finger ain't bother-ing him now. Ain't that the limit?" She did not observe a middle-aged man and an elderly lady with gray hair who were sauntering through the park until they were close to the

"Evelyn!" exclaimed the man in astonishment as he and his companion halted. "Why, how do you happen to

Evelyn leaded to her feet in surprise and confusion. However, in an instant she had regained her compo

ure and was all smiles.

"Mrs. Wilcox," said the man, "allow me to introduce my wife. Evelyn, you remember me speaking about the buyer for the Clayborn milliners—our

best customers. Well, this is she." Evelyn beamed on Mrs. Wilcox. "So pleased to meet you," she said warmly. "My husband has often spoken of you. Can't you come up to the house for dinner tonight? Oh, by the way-Mrs. Wilcox and Walter, dear-meet Mr. Carson, an old friend

I happened to meet while getting some air and sunshine." Carson acknowledged the introduction and presently excused himself. Slowly he walked out of the park, swinging his cane, and entered the ho tel across the street. He noticed in passing that the two old men again

were smoking in peace.
"Troubles, troubles," he soliloquized. "Everybody has them, and yet event-ually they seem to work out all right. But mine—there's no chance."

He nodded to the clerk, who hand-

ed him a telegram. With nervous flugers Carson fore open the envelope. "Come home, Joe," it read. "Parks confessed to embezzlement. You are cleared. I'm ready for the wedding,' Carson looked out the window at the hurrying crowds, which he did not

"The world's just about all right," he murmured. "Dear girl, she stuck to me through it/xil."

Small but Potent.—Parmelee's Vegetable Pills are small, but they are effective in action. Their fine qualities as, a corrector of stomach troubles are known to thousands and they are in contant demand everywhere by those who know what a sate and simple remedy they are. They need no introduction to those acquainted with them, but to those who may not know them they are presented as the best preparation on the market for disorders of the stomach,

#### CHARM OF COZY SUN PARLOR

Fresh Air and Sunshine Room Popular With All—Furnishing Is Chief Difficulty.

There is something contagious about the desire to have sun parlors. It seems to sweep over the whole com-munity at once. The big house on the hill with its many wings and gables acquires one or rather one of the wings is transformed by means of many additional windows into a sun parlor. Then some of the smug houses on the avenue acquire them, the new little cottages that are just being built in the new section blossom forth with a giddy showing of window glass where a decade or even two years ago they would have had a "front porch." And the people that mortgaged the house to buy their car are mortgaging it again to add a sun parlor to it. Not that they are such devotees to sunshine or that the docter has suggested that they have more of it in their lives, but, well, it doesn't seem as if they could keep up appear-

ances without a sun parlor. But for every sun parlor there is the important question of how it is going to be furnished, what sort of curtains it will have. Now, sun par-lors are seldom the only sitting or living room in the house and it is quite a mistake to treat them as such. Remember that all those windows were put there so that sun could come in, and to swathe them with a multiplicity of curtains is really foolish. When you want to breathe behind many curtains go into another room.

Moreover, the windows in any sun parlor ought to be often open, and for this reason you should not drape those windows with starched or perishable curtains that will be hurt by the moisture. Many persons have roller shades for the windows, but that is really a mistake. One indefatigable housewife even had green shades added so that they could be pulled down when the sun shone bright, so as not to fade the chintz covers to the wicker chairs.

#### USEFUL ITEMS

Milk jugs require careful washing if the milk is to keep sweet. The best plan is to scald the jugs with boiling water, then fill them with cold water and add a teaspoonful of salt. Leave the salt water in for about ten minutes before emptying it. In this way you are sure that the jug is perfectly clean and the milk not likely to turn

To make cut glass shine put a little ammonia in the water in which it is

rinsed. A simple way to remove inkstains from linen is to soak it as soon as the ink is spilled in milk. As soon as the milk becomes discolored, change it and repeat if necessary. Wash first in warm

water without soap, then in the usual Rust and ironmold stains will generally yield to a treatment of lemon juice. The stain should be soaked in the juice for at least 24 hours. The stained place should be laid on a plate and the juice squeezed over it; then put the piece of lemon on the top of

the stain and leave it. Wash first without soan, then in the usual way, Tapestry-covered furniture may be cleaned by rubbing well with hot bran,

then with a clean cloth. Sweater Knit Blouse. The sweater-knit blouse makes its appearance in a hip band model, with

long waist striped and wide belt plain.

Shuck Protection for Corn.

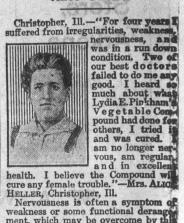

Most corn growers fail to realize that by improving the shuck covering on their corn by selection they may reduce the amount of damage done to the grain. Growers generally consider nothing but the ears and bears when selecting seed in the contract of the service when selecting seed in the contract of the service when selecting seed in the selecting seed in the service when seed in the service when selecting seed in the service when consider nothing but the ears and kernels when selecting seed. In wee-vil-infested sections in particular, variation in the damage of ears is frequently observed, but if the matter is considered the cause is usually attributed to valiation in the hardness of the grain. Weevils attack corn of all degrees of hardness, and their process is comparish. their progress in consuming the hard corn is only slower than that in the soft. Some observers have concluded that since weevils are able to eat the hardest corn, they would also cut their way through the most resistant their way through the most resistant shucks in order to feed upon the grain, if sufficiently urged by hunger. Others have observed that earworms may cut holes through a large percentage of the protecting shucks and that weevils will enter through these holes, and they have concluded from this that shuck covering cannot be made a practicable means of protection. Then, too, there is a sentiment on the part of some against a large amount of shuck.

Benefit of Shade Trees.

It doesn't cost much to plant trees, yet they add a great deal to any property. The New Jersey forester says the shade trees of New Jersey are worth \$20,000,000. Still, there are not nearly enough trees even in New Jersey.

stead of their having decimed in popuarity after several seasons of atten-tion, quite the contrary has happened. They are more in the limelight than

little conspicuous change in the line of the gowns, it is upon these "little dresses" that some of the most artis-tic touches have been lavished. The inconspicuous, unassuming gown for morning or for afternoon can have about it much genuine feeling. At each of the couturiers the same story true; each one has outdone himself in presenting new reasons for the continued life of this popular gar-

Materials have for their leader one that has the sanction of ages behind it-blue serge. Then there are all of soft surfaced fabricsrusella, burella, and the allied fabrics. For afternoon there are charmeuse, of which there are a great many models to be seen, taffeta, and velvet which has lost none of its vogue. There was nothing smarter then than a black velvet gown and there is nothing smarter now.

The trimmings and touches on these dresses for daylight wear are fascinating in their variety. It is not so much the thing that is done as the way it is done. When one sees the clever little bits of hand-made braid and the inserts of bead work, the facings and the edgings, one wonders there can grow so many new ideas in the course of a single season. But there they are, to be copied interminably by less ingenious Ameri-

Not so much hand work is to be seen about these dresses as was the case in former seasons. The little girls who used to do this work have learned by their connection with the war-time munition factories that

Gown of Black Taffeta and Velvet Forms Charming Combination.

female is entitled to more of daily sustenance than it was possible for her to attain by doing embroidery. the new frocks show the strain. But the Parisian designer gives us some thing quite as lovely even though it has but one-fourth its former embroidery for adornment, yes, even though there be no hand work at all and the decoration is found to be a product of the good old American machine. Rows of braid and bits of bright ribbon do their part in producing an attractive effect.

Leather Frocks and Trimmings. A trimming that has taken first rank is leather. It is handled in un-heard of ways and the result is charm-Sometimes it is a narrow strip of belt colored in a happy contrast to a gown. Again it is used as satin would be for outside facing on cuffs and skirt pockets. Sometimes it is pieced into an all-over pattern and sometimes it is gotten up into whole suits. An extravagant suit was made of pink leather and trimmed with a high collar of fuzzy black fur. Then there was an attractive gown of white leather in the cut pattern. This was trimmed with rows of black nail heads and some strips of black patent leather. It, too, was bizarre but attractive, perhaps a thing more for Paris than for an American city.

While the sleeves on most of these dresses for day wear are short—often extremely short—they are time and again trimmed or finished with flowing cuffs which give an interesting line to the silhonette. The cuffs are

An Attractive Tailored Suit of felours de Laine and Kolinsky.

sleeves, and sometimes they even finish, in a thoroughly well done manner, the ends of sleeves that are of the shortest.

Fur is used sparingly on frocks of any sort. When it is seen there are apt to be narrow strips of it used as ugh they might be strips of em breidery. For this purpose moleskin is popular, while kolinsky and seal come in for their usual attention.

Blue Chiffon, Blue Leather,

By way of using two materials possible to obtain one designer showed with dark blue leather (or kid) trimmings You will wonder, if you have not seen it, how this could possibly be and what would be the effect produced. Well, it was as pretty as anything that could be imagined. The leather was used as a wide edging for the full peplum and it was worked into the bodice as well as making cuffs on the ends of the flowing sleeves. Not a little of the charm of this gown lay in the fact that the whole was built over a lavender founda-

fall gowns are interesting because they are quite different from anything we have seen for some time. I mean those which are cut in a V and which are finished with frilled or shaped collars standing up quite high at the back of the neck, graduating in width as they reach the front, and gradually tapering off into nothing in a point somewhat below the bust. These are sometimes made of silk or satin to match the material of the gown in color and sometimes they are composed largely of lace or organdie in a plaited frill.

There are many varieties of blue serge. One has a plaited waistcoat made of crisp white organdie and a high collar tied with a pert black bow under the chin. This frock, for a very young person, has a little flat apron effect at front and at back and the panels are edged all around, with the serge done into a knife plaiting about two and a half inches in width. The panels, it may be added, are extensions of the waist and the skirt is a tight and short thing by itself.

Black Velvet Gowns. A black velvet gown which attracted attention was made with a round neck and cut practically in one straight piece. For trimming there ran up the back in a straight line at either side, from hem to neck, rows of little white crocheted roses. They were continued round the neckline. By this method all of the trimming was confined to the back, the only hint in front being the inconspicuous

neck edging.

A black velvet gown was made with two puffs over the hips. They were not overly sumptuous in appearance, just large enough to show that pan-niers were in fashion. From these the gathered skirt dropped straight to the hem, and the bodice was slightly

Many of the afternoon dresses show a strong Louix XIV influence. There are upstanding collars and frills, and even high necks with plaitings that stand out underneath the chin. The frills often form themselves into a

in medicines, as in every other necessity, the public is satisfied with nothing but the best! This explains the ever-increasing demand for Zam-Buk. Not only is this great balm the best household remedy to-day, but it is also the most economical.

remedy to-day, but it is also the most economical.

Zam-Buk's superiority is due to the fact that it is all medicine, containing none of the coarse animal fats or harsh mineral drugs found in ordinary ointments. Again, the medicinal properties are so highly concentrated that they centain the maximum amount of healing, soothing and antiseptic power, so that a little of this balm goes a long way. Another reason why Zam-Buk is most economical. It will keep indefinitely and retain to the last its strength and purity. Best for skin

#### LAND FOR NATIONAL FOREST

Presidential Proclamation Adds Many Acres in Wyoming to the Public Domain.

The president, on July 10, 1919, signed a proclamation adding 76,260 acres to the Wyoming national for-est. This increase in area was authorized by the act of August 16, 1916, which provided for the addition of which provided for the addition of 5,760 acres, known as the Fontenelle addition, in the southeastern part of the Wyoming forest, and by the act of February 25, 1919, which provided for the extension of the Western boundary of the forest to the Idaha-Wyoming state the by the Inclusion. Wyoming state line by the inclusion of 70,500 acres.

The lands added are rolling, well watered and pretty well covered with a forest growth of aspen, Douglas fir and Engelmann spruce. The Wyoming national forest now has a total acreage of 975,988.94 acres.

In former days one of the most au-merous of our American game animals was the "prong-horn" antelope. It has been well-nigh exterminated. though there are some in the Wichita forests and other national game preserves, they are sadly few. It is feared that this beautiful species must inevitably pass away. Wherever there are mountain sheep, on federal reservations utmost efforts are made to protect them. Their shyness is prover and and yet in the Uncompagre National forest (Colorado) they have acquired such confidence that actually they come into the town of Ouray in

N. Herbert, extra work and expense for Nomination.

Children's Aid Society grant.

Sick Children's Hospital, grant.

Clerk and Treasurer, financial statement.

Thomas W. Weyburn on Tuesday paid Fred Vincent, of Barrettville, \$82.03 for a load of hay. The price was \$26 a ton. A few years ago this would have been the price for a whole load of wheat.

An accident occurred in Brigden on Tuesday of last week, when the westbound Michigan Central passenger train No. 101, struck the horse and cutter of Harry Bunyan, a farmer living north of Brigden. The horse was instantly ktiled, being hurled about forty feet, crashing through the crossing fence, and reducing the cutter to spinters. Mr. Bunyan escaped by jumping when he saw what the certain result would be, and admitted to Conductor Huntley that he saw the train approaching and heard it whistle, but, in some manner, misjudged its speed and attempted to make the crossing shead of the train, with the above disastrous results.

### **BULBS FOR THE WINTER**

ADVICE TO PEOPLE WHO LOVE FLOWERS.

Many Varieties of Beautiful Plan May Be Forced So as to Produc Attractive Blooms Out of Se me Roots Cannot Be Treated

Everyone loves flowers, but during the winter everyone cannot afford to buy the lovely blossoms which, like everything else, have become so

everything else, have become so expensive.

With a little care more people are able to grow the bulbous flowers, which do so much to brighten up a room on cold, grey days.

The Christian Science Monitor recently gave an excellent article on growing bulbs for winter use, from which some extracts are quoted below:

By choosing bulbs of the proper kinds and bringing them into the light at short intervals, it is easy to

ingnt at short intervals, it is easy to have a constant succession of flowers all the winter through.

When you come to buy your bulbs for winter forcing, you will find that they, too, cost more than in former times, yet the cost is not to be reckoned, when compared with the pleasure and satisfaction which the flowers will give If the higher releases sure and satisfaction which the flew-ers will give. If the higher price causes you to be a little more careful in your buying no harm will be done. Do not, however, be induced to buy inferior bulbs, because they are cheaper than the others. Only the best are suitable for forcing. If you have grown bulbs in past year, no doubt you are familiar with the dainty Roman hyacinths and will order a supply of them.

and will order a supply of them. Probably you will be disappointed, for a ruling of the French inspectors has barred practically all shipments this season. In spite of their name they really come from the south of France. The same section also pro-France. The same section also produces the paper white narcissus, and, under the circumstances, this is the built to plant most freely for indoor use this season. It is not expensive, it grows, rapidly, and it flowers within a few weeks. Get a good supply of bulbs now, store them in a dark, cool place, and start forcing them at intervals of two or three weeks. You can grow them in pots if you like, but a better plan is to flower the bulbs in bowls filled with pebbles and water. Dainty little bowls have been designed especially for this purpose. but any shallow bowl or France. The same section also propurpose, but any shallow bowl or deep saucer will serve. Even the yellow kitchenware bowls take on a yenow kitchenware bowls take on a drawing-room aspect, when they support several blooming bulbs. And it is always better to have more than one bulb, unless a small bowl is used. The dish should be two-thirds filled with pebbles and the bulbs made to nestle securely in them. Then keep enough water in the hard so that it will track the secure of the se the bowl, so that it will touch the bottom of each bulb at all times. Set in a secluded corner of the room

bulbs in a light place and regrowth will take place. The war the room, the more rapid the growth the room, the more rapid the grow
There are several varieties
narcissi which force readily a

pernelle.
Now with the tulins, hyacinfi

Now with the tulips, hyan and narcissi, the same methods must be used and it is important that the are not overlooked. The bulk should be potted in good soil as there should be good drainage at the bottom of the pots. The bulk should be just covered and it is but ter to fill in the soil around them should be just covered and it is better to fill in the soil around them rather than to press them into place. Do not quite fill the pot or them will be no place for watering. Notate the pots to the cellar and set them on a layer of earth or coashes several inches deep. Next cover them entirely with sand or ashes, but first give them storough watering. Choose, if possible, a place away from the heates to that the bulbs will be kept coal if no cellar is available, you can dia a trench for them out-of-door. Cover the spot with straw or litte to keep our early frosts. The or secret of getting good flowers will these bulbs is to obtain a strong root growth. Several weeks will be required, but it is impossible to give any reliable rule. Occasionally did out a pot and, if necessary, remove the ball of earth will drop into the hand. If this is done with the hol inverted and one hand held over the top, the ball of earth will drop into the hand. If the bottom of the ball is covered with a network of white roots, the bulb is ready for taking to the livwith a network of white roots, the bulb is ready for taking to the liv-

ing room. Sometimes these roots may be seen through the hole in the bottom of the pot.

When the bulbs are ready for fore-When the bulbs are ready for foreing, take them to a room which is not very warm nor very light. They will probably have made a little togrowth, which will be white. When this growth has changed to green, the pots may be taken to a window or any other light location to develop the flowers. It is important that they be kept from sudden blasts of either cold or hot air, and they are best at a little distance from the radiator. Water freely, but do not keep the soil water soaked. None of the bulbs mentioned can be forced a second time, but the hyacinthat tulips, and common narcissi may be set in the open ground when summer comes.

#### \$30,000 Paid for Hog.

Thirty thousand dollars was paid recently by a Omaha, Neb., breeder for "Desiger," a yearling Poland Chino boar. This is said to be the record price for a single hog. When a few weeks old "Desiger" was sold for \$5,000, the original purchaser has now make \$25,000 on his investment in less than a year.
