

General News.

A party of young ladies entered a Methodist church at Waverley, Wis., and began a light frolic with whiskey and cards. As there was no police force that could be called in, the pastor wrapped himself in a sheet, emerged from behind the pulpit, and spoke in such a ghostly fashion that the intruders fled in dismay.

The question "How long is it necessary to keep children away from school after an infectious disease?" was answered by the Academy of Medicine, Paris. With scarlet fever, diphtheria, measles and small-pox, isolation is to be maintained for ten days after the patient has been discharged from the contagious power after twenty-five days.

A most extraordinary and painful phenomenon has occurred in Warsaw. A lady died under somewhat peculiar circumstances, which gave rise to a report that her death had been caused by her husband's ill treatment. Hence, several weeks after the interment her body was exhumed for post-mortem examination, when it was found that in the grave a perfectly healthy child had been born.

A boy named Robert McKinnon was run over and killed by the local train on the Pictou Branch, on Tuesday, near the Iron Bridge, New Glasgow. The boy was on his way to school at the chapel with some other children, and on meeting the train, he did not step far enough off the track and was struck on the head by a projection on the engine, killing him almost instantly. He was over nine years of age.

The New Steamer—Howard D. Troop, E. Q., who has been visiting Boston, New York and Baltimore, with a view of securing a steamer to succeed the "Cedar Grove," returned home on Thursday. During his absence he inspected several steamers that were in the market, but none of them were satisfactory to him, the majority of them showing too many signs of wear and tear. Mr. Troop is not in a pessimistic state of mind, and he will take until another meeting is held—St. John Globe.

Capt. Scott, who was appointed to inquire into the loss of the "Cedar Grove," is said to have reported that the loss is due to a current setting strongly to the southwest along the coast of Nova Scotia. After passing Cape Race this current takes a westerly direction, rendering navigation very dangerous. No mention is made of the chart in the inquiry and it is said to have been of great velocity. At the time the "Cedar Grove" was ashore she was thirty-six miles west of her supposed position, the captain being doubtful as to the force of the current setting across her course.

A meeting of the Kings County branch of the Y. S. Institution Society was held at Kentville last Wednesday evening. Although a severe storm was predicted, a good attendance was secured. The committee from the Kings County districts attending in a body and becoming members of the Society. A deep and hopeful interest in the scheme was manifested by all present, and the matter was thoroughly discussed and approved. A committee was elected to manage the Society, and it was decided to hold meetings at Kentville, Channing and Berwick at early dates.

BRASS KILN NEWS. Mill Valley—On Saturday, 23rd inst., wind came to the village that a bar and cold here in a den some two and a half miles from here. The wind, and the cold, were in readiness with gun, horse and sleigh to capture brain. The cold bar was a very large one, but Mr. Mack being very accurate in his aim, soon smothered the bar with the luminous. The cub tried to escape, but was not allowed the privilege as it was a victim to the same marksmanship—Lancaster Progress.

COAL AND IRON.—Somewhere near Medicine Hat a large manufacturing city—the Pittsburg of the North-West—will be built. Specimens of the coal and iron are fully equal to the best Pennsylvania coal. It is of a bright black color, so hard and solid that it can be cut and polished, and burns readily with a clear yellow flame. This district has long been noted for its iron, and with fuel near by to reduce the ore to malleable shape, a promising industry is to spring up in the near future. The only drawback is the lack of limestone. Search has been made for the wherewithal to make lime, which is required to be used in reducing the ore, but in vain. About forty quarries are located in the vicinity of Medicine Hat.

NEWS FROM DRYER. Dwyer Brothers have won \$74,725 on the American turf last year. William England has leased a challenge to fight any man in England for \$500 a side—a hostile race for a purse of \$5,000 to take place in England in the spring.—Lewis T. Fry has challenged John S. Prince to a bicycle race for \$200 a side and the championship of America.—The losing matches for prizes offered by Bill Madden, which recently took place in England, was won by Charles Mitchell over thirty-two others. Madden will bring Mitchell to America, and talk of matching him against Sullivan, Max and Stade for \$5,000 a side.—St. John News.

The Dominion Parliament is summoned to meet on Thursday, January 18th. It is not expected that the session will be a lengthy one. The Montreal Gazette, speaking semi-officially, intimates to be presumed, gives the following intimation of the business to be done: "What measures will be introduced of course is not known. The decision of the Privy Council on the Scott Act, declaring the regulation of the liquor traffic to be a Dominion matter, will be considered, and probably read measure on that subject, if necessary. The active measures which Mr. Cochrane, the Minister of Finance, is taking to ascertain that the Dominion will be the subject of the trade on the subject of the Inspection Law and the duty of tobacco makes the probability that there will be some legislation on those subjects. The large surplus in the Treasury may make some changes in the tariff necessary, or may induce a removal of taxation in other directions. The City Council will be called upon to deal with many new subjects."

An Ice Palace.—One of the attractions of the coming winter carnival in Montreal is to be on the ice palace, which is to be erected on Dominion Square. The main tower will be 120 feet high. All the walls and the tower to a height of over 50 feet will be built of solid blocks of ice. The palace is to be illuminated, and is expected to be a grand sight.

STRAIGHT CAPSULES.—In the year 1881, 284 steamships and large steamboats were lost. The aggregate tonnage was 320,000 tons. Of these the British vessels numbered 192, with a total of 236,516 tons. American 18, and 13,972 tons. Of the list 141 were standard, 33 were sunk by collision, 55 foundered, 3 exploded, 2 were abandoned in a sinking condition and 23 are missing. The total number of lives lost was 2094.

OUR OBITUARY.—Our obituary list to-day records the death of Lady Young, wife of Sir Wm. Young, and daughter of the late Hon. Michael Toole, who passed away yesterday morning about one o'clock, after a long illness. She was 78 years of age. Her husband had been a invalid for some months, and her death was not therefore unexpected. Few ladies in Halifax were more generally known or more sincerely respected than Lady Young, and we feel sure that this notice of her demise will be read with deep regret by the whole community. She was a life-long contributor to all the public charities of the city, and her many active years were prominently connected with every benevolent undertaking. We offer Sir William Young our sincerest sympathy in his loss.—Chronicle.

AS REPORTED BY A FEW YEARS AGO, during the period of commercial depression, it was so disastrous to many of the leading Canadian houses, the firm of Messrs. F. Fisher & Co., of McGill Street, was forced to suspend. The house had a large number of creditors both in England and Canada. With the former a compromise was effected, while the latter were left to their own devices. There had been a large number of creditors both in England and Canada. With the former a compromise was effected, while the latter were left to their own devices. There had been a large number of creditors both in England and Canada. With the former a compromise was effected, while the latter were left to their own devices.

OUR HERITAGE.—Starting with Rev. C. B. Pitblado's Thanksgiving Sermon last week, Mr. Coleman of Lunenburg, Cornwallis, writes to the "Waters Chronicle" a very striking picture of our heritage as a fruit-growing country. He predicts that in another half century the population of Nova Scotia will be a million and a half—no mean an extravagant estimate. Mr. Coleman says that our great need of immigrants of the right sort is a fact which is becoming more and more apparent to all who are interested in the welfare of the province. He says that the population of Nova Scotia is now about 400,000, and that in another half century it will be a million and a half. He says that the population of Nova Scotia is now about 400,000, and that in another half century it will be a million and a half.

Mr. Coleman adds: "I intend speaking at the meeting of the Agricultural Society on the 23rd inst., and I intend to speak of our heritage as a fruit-growing country. He predicts that in another half century the population of Nova Scotia will be a million and a half—no mean an extravagant estimate. Mr. Coleman says that our great need of immigrants of the right sort is a fact which is becoming more and more apparent to all who are interested in the welfare of the province. He says that the population of Nova Scotia is now about 400,000, and that in another half century it will be a million and a half."

Mr. Coleman adds: "I intend speaking at the meeting of the Agricultural Society on the 23rd inst., and I intend to speak of our heritage as a fruit-growing country.
