The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

HERSCHEL'S WEATHER TABLE.

The following Table (ascribed to DR. HERSCHEL, and revised by DR. ADAM CLARKE,) constructed upon philosophical considerations of the attraction of the Sun and Moon in their several positions respecting the Earth, and confirmed by experience of many years actual observation, furnishes the observer, without farther trouble, with the knowledge of what kind of weather there is the greatest probability of succeeding, and that so near the truth, that in very few instances will it be found to fail.

NEW AND FULL MOON	SUMMER.	WINTER.
If it be New or Full Moon, or the Moon entering into the first or last quarter at 12 noon or between 12 and 2.	Very rainy	Snow and Rain
2 and 4 afternoon.....	Changeable	Fair and Mild.
4 and 6, evening.....	Fair.	Fair.
6 and 8, do.	Fair, if wind at N. W.	Fair & Frosty, if wind N or NE
8 and 10, do.	Rain, if wind at S. or S.W.	Rain or Snow, if wind S or SW
10 and 12, night.....	Do. do.	Do. do.
12 and 2, morning	Fair	Fair and Frosty.
2 and 4, do.	Cold, with frequent showers	Hard frost, unless wind S or SW
4 and 6, do.	Rain.	Snow and Stormy.
6 and 8, do.	Wind and Rain	Do. do.
8 and 10, do.	Changeable	Stormy weather.
10 and 12, noon	Frequent Showers	Cold rain if wind W; Snow if E
		Cold, with high winds.

Explanation of Weather Table:

It will be seen from the table, 1st, That the nearer the time of the Moon's change, First Quarter, Full and Last Quarter; is to *Midnight*, the fairer will the weather be during the seven days following; the space for this calculation occupies from ten at night till two next morning.

2.— That the nearer to *Mid-day*, or *Noon*, these phases of the Moon happen, the more foul or wet the weather may be expected during the next seven days; the space for this calculation occupies from ten in the forenoon to two in the afternoon. These observations refer principally to summer, though they affect spring and autumn to a considerable extent.

3.— That the Moon's Change, First Quarter, Full, and Last Quarter, happening during six of the afternoon hours, *i. e.* from four to ten, may be followed by fair weather; but this is mostly dependent on the *wind*, as it is noted in the table.

Though the weather is more uncertain in the latter part of autumn, the whole of winter, and the beginning of spring; yet, in the main, the above observations will apply to these periods also.

Explanation of Calendar Pages.

At the head of the respective pages for each month are given the ordinary tables of the changes and quadratures of the Moon. The 1st and 2nd columns show the mean times of the rising and setting of the Sun. The quantities are only set down to the nearest minute, the uncertainty of the observed times of the rising or setting of heavenly bodies on land, caused by the varying amount of horizontal refraction and the general liability to the intervention of terrestrial objects in such observations, renders a closer approximation unnecessary for ordinary practical purposes. The 3rd column contains the mean times of the rising or setting of the Moon. The quantities are only set down to the nearest minute, for the reasons mentioned above in respect to the Sun.
