TEN THOUSAND PEOPLE PASSED THE TURNSTILE.

The Record For the Fourth Day of Last Year Slightly Surpassed--Competent Judges Praise the Fruit, Poultry and Flour Displays.

Thursday was a great day. Crowds besteeped the ticket takers and the turnstiles scarcely stopped. When the last admission had been recorded the grand total for the day was 10.516. It was in excess of the corresponding day of last year by 25 people. And the big crowd had enjoyment of the exhibition at its best. The amusements were largely patronized and in fact it was a most profitable day for all departments. A very fine display of fireworks was made in the evening and Marsh made a most successful dive amid the applause of thousands.

Smith, of Smith & Tilton, were occupied in a careful testing of the exhibits of flour ground in New Brunswick mills from wheat grown in this province. It was the first competition of the kind and was of first competition of the kind and was of interest as showing the great advance made in what is a new and growing industry in New Brunswick. The judges made their award last night. They say: "We have carefully tested the flours in respect of color, dress, texture and strength and taking all into consideration have awarded as follows: Ist prize, the J. W. Hall Milling Company, Edmundston; 2nd prize, J. M. Fripp, Woodstock; 3rd prize, M. McLaughlin. Buctouche; entitled to honorable mention. Wm. Richards Company, Boiestown, and W. W. Doherty, J.

"Samples of patent flour made from imported Manitoba wheat by the J. W. Hall Milling Company, Edmundston, and M. E. Riley & Co., St. John, are deserving of notice, ranking well with the best imported Manitoba patents. The flours, however, being of a different class and character are not entitled to compete against the flours made from domestic wheat."

Following is the substance of the magis-

trate's judgment:
This is a case against one Godfrey, a motorman on the St. John Street Railway Company, for violation of the act to prevent protanation of the Lord's day commonly called Sunday, in that he, Godfrey, did work at his ordinary calling of a motorman on Sunday.

Some may think there is no necessity whatever for such legislation, others may think there is. Some may think the proisions of the act in question are too far eaching; again others may think the excoptions to the application of this law are

Doubtless the intention of the legisla ure was good and reasonable; its inten-ion was that there should be a general essation of all work of one's calling from Saturday night till Monday morning so that every man could spend sunday as a day of rest and as the particular individual thought fit. So far inder this act complaints have been made gainst three Chinamen, four widows hree cigar dealers, and now 26 mo am sorry I was not consulted as to the now being considered, was made. I do not notice either of the three leading police constable present at the trial, the chief and the captains of the north and south divisions, are all absent from the court. I think if the police constable reports all persons who are exercising or doing worldly labor, busin of their ordinary calling on Sunday, such onstable is but doing his duty under the xisting law, which duty he has taken a olemn oath to perform and no power on arth can free him from the respon of the performance of such duty. Whether the law is ultra vires or not is not a question for the constable, neither is it any of his business to consider the kind of law

tion, or until it is repealed by the legislature that passed it, every good law-abidng citizen must see the necessity of observing it; and every police constable should report all violaters of such law. Everybody, aside from the moral, the legal spect of the case desires to see Sunday a lay of rest, not a sad day, but a joyful day to the old as well as the young; a good day, a pleasant day, so that everyone may look forward pleasantly to the coming again each week of the Lord's day. This s a law-abiding community, and legis-atures and courts in the making and onstruing of laws should be careful that no nct of theirs is calculated to bring the law generally into disrepute. I do not think ferry hand engaged on the ferry boat nveying citizens from the east or west ides comes within this law neither do I nink this defendant, a motorman in the alway company carrying passengers from one end of the city to the other, comes within the law. If such a forced construcion were put upon the act, would not the coliceman who made the report be liable or working at his ordinary calling.
Under the evidence and the law I have o hesitation whatever finding the defend-

Washington, Sept. 11.—From the formal statement giver out today it appears that the state department is not yet ready to egin direct negotiations with Li Hung hang. It does not question his credentials as a p'enipotentiary, but simply leaves the matter in abeyance. Probably this is because all of the powers have not yet returned their responses to the Russian state of the power and make the power of the po sian note and it is desired to avoid making the United States the first among the owers to abandon the hope of harmonious action and strike for itself toward the settlement directy with China. Minister Wu was twice at the state de partment today. It was understood that his first call was in part, at least, to secure transportation for Li Hung Chang from Shanghai to Taku on a United States ressel. His later call was to receive the answer of the department to that applieation, as well as to the communication respecting Li Hung Chang's functions. The answer returned by the state department to the letter of communication apparently made it unnecessary at this time to pursue the inquiry as to the ship; if Li may not enter into negotiations at present there is no occasion to transport him to Taku.

Verdict of The Coroner's Jury on the Bridge Disaster.

Pursuant to an adjournment made on August 27 inquiry was resumed at Belleisle Creek September 10, 1900, at 11 o'clock

Mr. George A. Appleby said to Mr. Barnhill: I have been engaged in bridge building for the last 20 years. I am now should be from eight to twelve years. I engaged in putting in side tracks and freight shed in St. John at the I. C. R. think the trestle was about six or seven years old when I examined it. I examined terminus. I have built quite a number of bridges all over New Brunswick and repaired quite a number. At the time of the accident that the bents all fell forward. From the description it would seem the landslide at the Cantilever bridge in St. John I made the repairs on the bridge on the west side. It was a hard job and we had to go down 30 feet to get a foundation. Trains were crossing the bridge dent would be the lack of horizontal bracecontinuously. It was in my opinion of ample strength for the work for which it was intended. Before the work of returns the swaying forward of the bents would be a supple strength of the strength of ample strength for the work of repairs commenced, I think it was of ample strength to carry the trains. The worst feature I saw was that they had cut off the old stringers and let them fall carelessly and broke the side braces in a great many places. The track stringers they had put in were not sufficiently bolted to the caps, nor together. They were not side bolted. I found very few bolts in the train went down by what I see in the part standing. All the piles that I saw broken were broken off above ground and were only sap rotten but not sufficient to cause any break. If the break had ocurred by reason of rotten structure the train would have gone right down and train would have gone right down and the bents would not have gone ahead with it. In my opinion the accident was caused by lack of bolting and the braces being knocked off. I made a bridge. After the work was done the government of the braces being knocked off. I made a bridge. I have seen other trestle bridges as high as this and higher. Have seen them eighty feet. I am satisfied that the bridge before the repairs commenced was of sufficient strength to carry the trains. The principal part of the piling was princess pine and hacmatack and was very little sap rotten. The stringers are generally the first to give out in a bridge. The fact that the being proceeded with was responsible for the accident it was the duty of the jury in all fairness to the company to exonerate them from all blame. If I had considered that any further strengthening was necessary I would have said so. There are lots of trestles higher than this one. It is not an uncommon thing to have trestles fifty feet high.

I evening, during the heavy gale, the house was blown off its supports and was shifted to the rear of the lot, a distance of about five feet. When the building dropped there was a great crash. Nearly all of the windows were broken and a large part of the retaining wall in front of the house was torn away and the house was badly twisted. A number of persons were attracted to the place by the noise. Braces were put at the back of the house to keep it from falling any farther. The house was unoccupied. THE FIELDING TARIFF.

The Sun tries to lesson the effect of the gard to Mr. Fielding's tariff by stating that it was changed in its passage through tariff that was not subject to some change in not very long before he was driven from office, which was so transformed by ets passage through committee, that he must have had some difficulty in recognizing his own offspring. There were a few alterations made by Mr. Fielding for the purpose of making his tariff more equitable, and certainly this was a very proper proceeding on his part, and one for which he should receive due credit. But we have never heard that these alterations caused the Conservatives in the house of commons to support the measure, or that ister predictions which they made in regard to its effect applied as much to the amendments to the tariff as they did to the original bill, yet all their predictions were falsified by the result of the Fielding tariff. Instead of being ruinous and in-Canada an era of prosperity such as it never experienced before.

The Sun seems to be of the opinion that it can win the elections by showing that

POLITICAL NEWS.

Montreal, Sept. 13-(Special)-Hon. Mr. Tarte, speaking at the inaugural meeting for the season of the East End Liberal Club last evening, announced he had no intention of resigning. "I will remain in the cabinet." he said. "Those who asked my seat shall not have it." Mr. Tarte declared the date of election was now very near and asserted the Liberal party was in a splendid state of preparedness. maritime provinces and Ontario and I have ambition to take 55 seats in Quebec." As to-Hon. Hugh John Macdonald, Hon. Mr. Tarte said he was a gentleman but that he had reached power only by exploiting the school question against Mr. Greenway. He predicted the Manitoba premier would be beaten in Brandon.

Summer Hotels at Narraganset Pier Destroyed-A \$350,000 Fire.

Narragansett Pier, R. I., Sept. 12-The ummer season came to a sudden and disastrous end this afternoon with complete destruction by fire of the great Rockingham Hotel, Sherry's beautiful Casino, the Hazard block, the Knights of Pythias hall and a score of smaller buildings. The fire started from the upper part of the Rockingham shortly after noon and within a few hours nearly all the adjacent build-ings, including the Casino, had been de-stroyed. The loss is estimated at about \$350,000, half of which is covered by in-

No one as yet knows just how the fire owned in Norway and is uninsured. The captain's 17-year-old daughter was on moned from Peacedale, and with the assistance of nearly the entire population of the Pier, an heroic effort was made to stay

The great Rockingham, six stories high

Every effort was made to save the Casino, but the intensity of the fire in the Rockingham was too much for the local department and within an hour the southern portion of the Casino was on me and soon the entire building was wrapped in flames. About the same time the Hazard block to the west of the Rockingham caught and that building together with the Knights of Pythias hall, and the small buildings on Exchange place, were soon swept away. Here a heroic stand was made by the department and the progress of the flames to the north and west was stayed

and the rest of the town saved.

The Rockingham Hotel was owned by J. G. Burns & Son and was valued at \$200,000, being insured for \$75,000. The Casino was built some 15 years ago and during the past five years had been under the management of Lewis Sherry of New York. The building was valued at \$100,000 and insured for \$75,000. The Hazard block, with its numerous stores and offices, was valued at \$35,000 and the building itself was fully insured. Other smaller losses bring the aggregate to fully \$350,000.

Halifax Exhibition.

Halifax, Sept. 12-(Special)-The Nova Scotia provincial exhibition was formally opened this afternoon by Lieutenant Governor Jones. The weather proved rather unfavorable. A heavy gale was blowing all day with indications of rain which made the attendance exceedingly small. The weather promises to be fine for tomorrow.

Who Will Be the Liberal?

Truro, Sept. 12—(Special)—Since the nomination of Mr. S. E. Gourley as the standard bearer of the Liberal-Conservative party for Colchester county political interest has somewhat died out. The nomination, though successfully "wire-pulled" does not meet with the approval pulled" does not meet with the approval of prominent men of the Conservative party and much dissention is in evidence. The only hope grasped at by some of the strongest party heelers now is that there may be strife in the Liberal ranks for candidature. This, they prophesy, will disorganize the Liberal party and prove the salvation of the county to Conservatism. The Liberals are, so far, keeping "num" as to their nomination, but a move will soon be made to give their man the field. Besides the name of Mr. McClure, the present member, that of Alfred Dickie. Stewiacke, is heard; and it is even suggested in quarters that Hon I'. A. Lawrence may receive the choice:

Marvellous Marsh.

made his first high dive here Tues lay afternoon, and the performance was of a rature never before experienced in the maritime provinces. It is most sensational and people almost dare not breathe while he goes through the thrilling act. A struc-ture of appalling height has been erected. It is a steep incline terminating in space 30 feet from a well of water sunk in the ground. The lowest end of the incline is also far above the tank. Between it and Marsh the water is stretched a canvas. Marsh of and his bicycle betook themselves up the giddy height while every eye watched every provement of the man with intense interest. He mounted the bicycle and waved his hand to the crowd, then with shout his awful ride was begun. The bicycle coursed down the narrow incline portion of a second. Just as bicycle and ider reached the end and people wonder ed how it all would terminate, Marsh flew over the handle bars, inade a graceful rush through the air, cleared the and dove into the tank of water, arising streaming to receive the plaudits of the people. The bicycle fell into the canvas. people. The bicycle fell into the cauvas. Marsh received an ovation, and every one felt be had seen au act hard to equal for daring and skill. It was found that Marsh after clearing the water, touched the end of the tank and therefore some five feet

C. Flood & Sons.

As usual this firm leads in beauty of display, artistic arrangement of exhibit and in the high grade of pianos which they have placed at the exposition. The firm's exhibit is in the annex and is one of the most attractive and beautiful of the big show. The decorator, Mr. Thomas Flood, certainly has an eye for pleasing artistic effects. Quiet. restful, green tones predominate, interspersed with harmonizing tints. Onyx tables on which rest palms and other potted plants are placed here and there. Pictures and rugs add to the effectiveness and the whole is lighted by a circle of incandescent lights, nestling in the ceiling decoration of fragrant cedar.

who is a composer of high standing, his productions being popular the world over.

Every bicycle rider, and their name is legion, has heard of Dunlop's and knows the value of having his wheel fitted with Dunlop tires. The Dunlop Company this year, however, are only showing carriage tires both solid and pneumatic. In solid rubber carriage tires, the company are showing several sets of carriage wheels of different sizes, fitted with their tires. They also show an exhibition wheel with the wires exposed, showing the manner in which they are brazed or fastened to hold the tire in its place. A wheel is shown on which the tires are in the course of being fitted. This will more particularly interest the carriage men as it illustrates how the work is done. The Dunlop company claim that their solid rubber carriage tire is the simplest fitted and that it will hold on tighter and last longer than any other in actual use. The tools needed to fit are few and simple tools needed to fit are few and simple and no expensive plant is required, they can be fitted by any carriage maker in his own shop after a very little instruction. Pneumatic carriage and automobile tires are shown. The system used with these is the same as with the celebrated bicycle tire and they can be taken off tire and they can be taken off or put on with ease and yet remain perfectly tight on the rim when inflated. It is understood that the company has fitted the ambulances in the principal cities of western Canada with their pnuematic carriage tires. The exhibit is in charge of Mr. F. H. HOW to TREAT CATARRH

Dr. Sproule was born about forty years ago, in the North of Ireland, of the sturdy, in telligent Scotch Irish Presbyterian stock. To the sound and liberal early religious and secular training which he received is doubtless due much of his subsequent maryellous

secular training which he received is doubtless due much of his subsequent maryenous success.

He early determined to become a Specialist in Chronic Discases. This idea he held in mind during the six years of his stay at Trivity College, Dubliu; then while travelling as surgeon in the British Royal Naval Service, and still later, while working in the great hospitals of the world and among his private patients. As a result he stands to-day preeminent as a matter in all forms of Chronic Discase.

Since coming to America he has devoted himself largely to that curse of this land, the Consumption-breader—Catarrh. Always alert and energetic, he works from morning till night over his vast correspondence, diagnosing, prescribing, sympathizing, curing.

He knows that success only comes from deep thought and conscientious care given each sufferer. No two patients can be treated alike. For previous conditions, parentage, age, sex, occupation, all bear upon each case.

Dr. Sproule is a writer of note among medical men, and in a late contribution says:

"Catarrh, as I have shown, is due to the presence of a foreign germ. These germs fill the air in summer as well as in winter. They are thus constantly entering the system. During the summer, because of the thinner state of the blood, they do not cause so much mucous, and their presence is not recognized, although it may be felt, in a general languor, and in a tendency to stomach and liver troubles.

"But, concurrently with the return of cold weather, and the consequent thickening of the blood, the old symptoms return, and the sufferers imagine that they have caught a fre h cold.

"I hold, therefore, that summer is one of the most favorable times for eradicating Catarrh from the System The sluggish condition of the germs makes them easy victims, and after proper treatment the patient finds himself able to face the rigors of the next winter boldly and unharmed.

"No one who during the previous winter has had Catarrhal Trouble should be allowed to enter upon the next winter without having cleansed the disease from his Catarrh of the Head and Throat. The most prevalent form of catarrh, and results from neg'ected colds. results from neg'ected colds.
Do you spit up slime?
Are your eyes watery?
Does your nose feel full?
Does your nose discharge?
Do you sneeze a goo l deal?
Do crusts form in the nose?
Do you have pain across the eyes?
Does your breath smell offensive?
Is your hearing beginning to fail?
Are you losing your sense of smell?
Do you hawk up phlegm in the morning?
Are there buzzing noises in your cars?
Do you have pains across the front of your head?

Do vou feel dropping in back part of throat?

If you have some of the above symptoms your disease is catarrh of the head and throat.

If you had some of the above symptoms last winter, and were only cured by warm weather, rest assured that the Catarrh still lurks within. It will not fail to come forth again at the next approach of cold weather. Take it now while it can be so easily cured. Cut out the above symptoms, mark them, and send them with information as to your present condition of general health to Dr. Sproule (Graduate Dublin University, Ireland, formerly Surgeon British Royal Naval Service), English Specialist in Catarrh and Chronic Diseases, 7 to 13 Doane Street, Boston. He will diagnose your case free.

CALVARY'S ORCHARD THREE TREES PLANTED WHICH

BORE VERY DIVERSE FRUIT. THE REDEMPTION OF THE RACE.

The Tree on the Right Bore Poison, That in the Middle Apples of Love-A Strange Grove in the Opinion of Rev.

Dr. Talmage. Washington, Sept. 9 .- The famous paintings in the picture galleries of Munich seem to have suggested the topic of this discourse, which Dr. Talmage sends from the quaint Bavarian town, but the theme which inspired the painters awakens in the great preacher thoughts of the redemption of the human race, which was the supreme design of that scene of suffering and death. The text is Luke xxiii, 33, 'There they crucified him and the malefactors, one on the right hand and the other on the left."

Just outside of Jerusalem is a swell of ground, toward which a crowd are ascending, for it is the day of execu-tion. What a mighty assemblage! Some for curiosity to hear what the malefactors will say and to see how they will act. The three persons to be executed are already there.

Three crosses in a row-an upright piece and two transverse pieces, one on the top, on which the hands are nailed, and one at the middle, on which the victim sat. Three trees just planted, yet bearing fruit—the one at the right bearing poison and the one at the left bitter aloes, the one in the middle apples of love. Norway pine and tropical orange and Lebanon cedar would not though there may be some exaggeration, it is impossible to doubt that in the main make so strange a grove as this orchard of Calvary. It was in some such hate that Voltaire in his death hour, be-cause he thought he saw Christ in his bedroom got up on his elbow and cried out, "Crush that wretch!" What had the middle cross done to arouse up this right hand cross? Nothing. Oh, the enmity of the natlumber market is still practically at a ural heart against Christ! The world likes a sentimental Christ or a philanthropic Christ, but a Christ who comes to snatch men away from their sins—away with him! When a man in the same taken as the ing another master! When a man is convicted of treason, he is brought out; a regiment surrounds him, and the command is given: "Attention, company! Take aim! Fire!" And the man falls with a hundred bullets through his heart. There comes a time in a man's history when the Lord calls up the troop of his iniquities, and at God's command they pour into him a concerted volley of torture.

You say "I don't feel myself to be unbelieving. I showed you the left hand cross that you might see what it is to repent. Now I show you the middle cross that you might see what Christ has done to save your soul. Poets have sung its praise, sculptors have attempted to commemorate it in marble, martyrs have clung to it in the fire, and Christians dying quietly in their beds have leaned their heads against it. This left hand cross was a believing cross. There was no guesswork in that prayer, no "if" in that supplication. The left hand cross flung itself at the foot of the middle cross, expecting mercy. Faith is only just opening the hand to take what Christ offers us. The work is all done; the bridge is built strong enough for us all to walk over. Tap not at the door of God's mercy with the tip of your fingers, but as a warrior with gauntleted fists beats at the castle gate. This left hand cross was a pardoned cross. The crosses were only two or three yards apart. It did not take long for Christ to hear. Christ might have turned away and said:
"How darest thou speak to me? I am the Lord of heaven and earth. I have seen your violence. When you struck down that man in the darkness, I saw you. You are getting a just reward. Die, in darkness—die forever." But Jesus said not so, but rather, "This day thou shalt be with me in paradise," as much as to say:
"I see you there. Do not worry. I see you there worlds of leght and gather the trophies for Jesus.
