anipule of the Water of the Georgi I have made a careini quantitative unalysis of a quantity of this Water sent me by the Proprietor of the Spring, Captain Kaina. It is a baline Water, containing earthy Chiorita, with portions of Bromits and Indids, thus resembling the Plantagenet Water, from which it differs chiefly in the presence of a portion of Sulphales, which are not often met with in Waters of this class in the Province. It has a specific gravity of 100s. 78, and contains in one pound avoirdupois, the affixed quantities of the following substances:—
