IF YOU buy the best bargains in boots, suits or hose.
You must get it at A. D. Farrah & Co's.

Other Sayings will be published later.

Don't Miss Our 28th Anniversary Sale--Now On

GRADUATE NURSES HOLD CONVENTION

The New Brunswick Association of Graduate Nurses held its fifth annual convention in the city hall at St. Stephen, beginning on Tuesday afternoon and lasting until Wednesday evening. Miss Margaret Murdoch, the president, was in the chair and forty members were in attendance.

An address of welcome was read at Tuesday afternoon's session by Miss J. Branscombe, the president of the St. Stephen chapter. Miss Murdoch responded.

Very interesting reports were read by the vice-presidents of the several provincial districts and there was also an interesting paper on standardizing the curricula in training schools by Miss E. R. Scovill, the pioneer nurse of New Brunswick. The convention decided to raise the fees for general nursing from \$21 to \$25 to be effective as of August 1.

A report on the annual meeting held in June in Quebec of the Canadian National Association of Trained Nurses, with which the New Brunswick association is affiliated, was read by Miss A. Whyte who was a delegate at the meeting.

Cars called at the hotel where the nurses were staying at six o'clock on Tuesday afternoon and took the delegates to St. Andrews where at the Algonquin Hotel they were guests at a banquet given in their honor by the St. Croix Medical Society. Covers were laid for seventy-five at the banquet. At the conclusion of the banquet there was a dance given at the Casino.

The new council was appointed at the session on Wednesday morning, the elections resulting as follows: President Miss Margaret Murdoch; vice-presidents, St. John district, Miss Lila Belding; St. Stephen district, Miss A. Branscombe; Moncton district, Miss A. J. MacMasters; Fredericton district, Miss E. Samson; Newcastle district, Miss E. Keyes; treasurer, Miss E. J. Mitchell; corresponding secretary, Miss Martha Fraser; recording secretary, Mrs. L. Dunlop; additional members of the council, Misses S. Brophy and Maida Hoyt; registrar for the province, Miss A. Whyte. Other officers appointed were: Public health convener, Miss S. Brophy; Canadian Nurse convener, Miss Eva Craig; examining board, Miss A. Branscombe, Miss E. Samson and M. E. Retaillick; delegates to the St. John local council of women, Miss E. J. Mitchell, Miss M. Murdoch, Miss E. R. Scovill, Miss E. A. Addy and Miss M. E. Retaillick; delegates to the Canadian National Association, Miss E. R. Scovill, Miss M. Murdoch, Miss A. Branscombe and Miss S. Brophy; councillors to the Canadian National Association, Miss M. Murdoch, Miss E. R. Scovill, Miss A. J. MacMasters and Miss E. Samson.

A hearty vote of thanks to the St. Croix Medical Society moved by Mrs. J. H. Vaughan, was passed.

The nurses were then taken on a visiting trip through the hospital where Mr. Whitlock, secretary of the hospital board, presented each of the guests with a bouquet of pansies and on behalf of Ganong Bros. with a box of chocolates.

The nurses were then taken in auto mobiles to the city hall where they were guests at luncheon of the ladies of the St. Stephen hospital advisory board. The room was decorated beautifully for the occasion and a huge basket of crimson roses reposed in the centre of the table. Mrs. Manford Robinson, the president of the board and Miss Bogue presided at the luncheon tables. The members of the board and St. Stephen nurses served and the music was furnished by Mrs. Vernon Grimmer and Miss Alva Granville. Miss Maida Baskin sang sweetly. A hearty vote of thanks was tendered the ladies of the board by Miss Alberta Burns.

The visiting delegates to the meeting at St. Stephen were as follows: St. John district, Mesdames Leonard Dunlop, Fenwick McKelvey, J. H. Vaughan and Allenby Mahony and Misses M. Murdoch, E. Swim, E. Cambridge, E. McGaffigan, M. Wallace, G. Horgan, M. Fraser, M. Whyte, L. Belding and E. Craig; from Moncton, Mrs.

FOREST FIRES CHECKED BY RAIN

The last new fire to be reported was one about five miles east of the Bald Mountain lookout. It broke out Thursday afternoon and crews were at once organized at Newcastle and sent in, a distance of forty miles. A short time later the outlook reported rain, and it was very fortunate that the rain came just when it did. The only way to get men into this locality is by portaging, and the outbreak was in the midst of a soft wood forest, in which the fire would prove very difficult to fight.

The extreme heat, dry weather and winds have rendered many of the fires serious, and the rain is a great benefit. Special investigations are to be made into the causes of all the fires, it was announced by Chief Forester G. H. Prince.

Lookouts of Great Value

Great credit is to be given to the men stationed in the various lookouts all over the Province. Of these there are three main ones, at Bald Mountain, Penniac and Plaster Rock. The service rendered by these stations has been of great value and it is expected that now that the public are satisfied as to this, several more will be erected in the near future. The station at Plaster Rock has been very valuable, and the lookout at Penniac has reported over one hundred fires since it came into use on May 1st. There is a small one at Canterbury and several minor stations throughout different parts of the country some of which are maintained by the licensees.

No Great Loss in Timber

Generally speaking, the loss of timber has not been great so far as can be ascertained. A considerable area has been previously burned over and thus the loss was not great. The Counties of Gloucester, Restigouche, Madawaska, Victoria, Carleton and Westmorland have escaped with very little loss from fire this year. It is worthy of note that not a single habitation in a village, town or settlement has been damaged in any way by the flames, and a public debt is owing to the men who have labored so strenuously and whole heartedly in the work of combatting the fire menace.

Telephone Connection Completed

A telephone line has been completed today between Newcastle and Wayerton, a distance of sixteen miles by means of which direct connection is secured between Fredericton and the lookout at Bald Mountain. This lookout is located some sixty miles northwest of Newcastle in the heart of the province. This line has been built by the co-operation of the New Brunswick Telephone Company, and the Forestry Department along with some of the licensees. It will be very valuable not alone to the Forestry Department, but also to persons living along the line, with whose homes connection is made.

58 HORSES HAVE SUCCEMDED TO HEAT IN MONTREAL

Montreal, July 12—During the last ten days of the heat wave here at least 58 horses have succumbed in Montreal as a direct result of the excessive temperature. These are the numbers reported but it is probable that there are others unrecorded. Since many of these horses are highly bred animals, an estimate of \$20,000 in respect of losses sustained is regarded as a low figure.

Many of these could have been saved if the advice of the S. P. C. A. had been heeded.

Hoder Currie and Misses A. J. MacMasters and A. Burns; from Fredericton, Misses E. Samon, M. Hanson, E. Groom and H. Stewart; from Newcastle, Miss E. Keyes; from Doaktown, Miss A. White; from Woodstock, Miss B. Budd and from Gagetown, Miss E. R. Scovill.

The next annual meeting will be held at Moncton.

HEAVY RAINFALL GREATLY WELCMED

Newcastle was visited by a severe thunder and lightning storm last Friday evening. The storm began at 7 o'clock and lasted until 9.30 o'clock. It was accompanied by a heavy rain mixed with hail and it came down in torrents. The thunder was very heavy and the lightning in bright flashes. It was the severest storm experienced here for years. So heavy was the rain that the streets were turned into running streams of water and in some cases the catch-basins were overflowed. The down pour extended nearly all over the province and was welcomed by the farmers, whose crops were about burned up for the want of moisture, while the long spell of dry weather had caused rivers, lakes and streams to fall very low, and in a great many cases wells on the farms had dried up, the farmers being obliged to haul water for some distance from rivers or streams. The rain was worth thousands of dollars to the community, while a great number of residents were greatly alarmed by the lightning. The rain also proved a great boon in extinguishing the many forest fires which were raging in different sections of the province, and the situation was beginning to reach alarming proportions. Considerable damage and trouble with telephone and telegraph wires was sustained, which for a time greatly hampered communications.

COMMISSION ISSUES LIST OF VENDORS' PRICES

On Friday Hon. J. F. Tweeddale, chairman of the New Brunswick Liquor Commission, issued a price list of liquors which will be sold by licensed retail vendors throughout the province. This list is issued under the provision of an order-in-council and must be posted by each vendor in a prominent place where it can be inspected by the public. The maximum prices which may be charged by vendors are contained in the list.

Duty Included

Hon. Mr. Tweeddale stated today that the prices in practically all instances are lower than have been paid for some time by the public but that even under these circumstances it must be remembered that the new customs tariff imposed by the Federal Government increased the duties on liquors one hundred percent. The prices in the list are made up on the basis that on each bottle \$1.60 is paid to the Federal Government in duty.

The liquors handled by the Commission are all standard case goods and under the system now being followed the public is protected against inferior grades of liquors and exorbitant prices.

Price of Alcohol

With regard to the price of alcohol Hon. Mr. Tweeddale stated that the Commission purchases alcohol 65 per cent over proof. Duty is charged on a basis of ten dollars per proof gallon which makes the duty on alcohol \$16.50 per gallon. When the original cost, duty, sales tax, other incidental expenses with a fair margin of profit to the vendors is taken into consideration it makes it impossible to sell alcohol lower than \$26.25.

The tariff on alcohol makes provision for a rebate of ninety-nine per cent in duty on alcohol distilled in Canada and consumed by hospitals. The hospitals must pay the full duty however, rebate being allowed upon application.

The Prices

The price list provides the following range of prices:—Scotch Whiskies: \$450 to 5.50;—Canadian Rye Whiskies, \$4.00; Brandies, \$4.50 to \$8.00; Gins, \$3.00 to 4.50; Jamaica Rum, 4.00; Wines, 3.00 to 5.00; Alcohol per imperial gallon, \$6.25; Ale and Stout per dozen pints, 2.75 to 3.00.

TUESDAY, JULY, 19th 1921

Summer Feeding Of The Lamb Crop

There are many advantages at the hand of the intelligible farmer who practises summer feeding of his lamb crop. Every farmer breeding sheep, either for the block or for the pure-bred market should realize that his net profit is measured by his degree of success in raising a lamb crop fit for market when the market demands are greatest.

If we stop to consider that in recent years the highest prices have been paid on the market for lambs in the early part of the season; that over two-thirds of the lambs have been marketed between September 15th and November 1st; and that the method of selling lambs by grade, both for slaughter and as breeders, is fast coming into practice, we can readily see that the man who has his lamb crop developed to meet the market requirements early in the season has a decided advantage over the man who has not done so. It is not meant from this that every farmer should adopt the practice of raising early lambs, as this is impracticable on many farms owing to lack of housing facilities etc., but the point is this:—the lambs should be better fed during their growing season than is generally the case.

Lambs raised under favourable conditions should at least weigh sixty-five pounds at four months of age, but a large percentage of the lamb crop of the country finds its way to the market every fall at five and six months of age weighing less than sixty five pounds. This indicates that the lambs have been neglected during the summer months. The practice of feeding lambs just as soon as they will take feed has been followed in many districts and undoubtedly has given good results, especially if the ewes are fed their grain in a low and have a small milk flow. If the ewes have lambed in poor condition trough, the lambs will generally begin to eat with their dams at about two weeks of age. As soon as they are noticed doing this a portion of the pen should be set apart as a feeding place for them in which they will find a grain ration of equal parts by weight of wheatbran and oilcake. When the flock is put to pasture, if the pasture is good, very little is gained from feeding grain to the ewes, but a little grain fed to the lambs will give very good results. A sheltered place where the flock is in the habit of gathering should be selected and a small pen or creep constructed into which the ewes cannot get, where the lambs can eat. At the age of one month they will eat and use to advantage about half a pound per day of equal parts by weight of bran and oilcake, and it should be borne in mind that liberal feeding is the source of liberal growth. It is possible to over

force lambs by injudicious feed with such foods as cornmeal, but it is seldom, if ever, that this results from feeding the above mixture.

Lambs that have been fed a little grain before weaning will not only have put on a few pounds extra weight but they will be accustomed to grain feeding and when changed to the fall fair or to the market, as the case may be, they will experience no bad effects from the change. It is at this particular time, that he will realize the advantages of summer feeding.

Pale And Nervous School Children

Need Rich, Red Blood To Regain Health and Strength

Many children start school in excellent health, but after a short time home work, examinations, hurried meals and crowded school rooms cause their blood to become weak, their nerves over-wrought and their color and spirits lost. It is a mistake to let matters drift when boys and girls show symptoms of nervousness or weak blood. They are almost sure to fall victims of St. Vitus dance, or drift into debility that leads to other troubles. Regular meals, outdoor exercise and plenty of sleep are necessary to combat the Lethargy wear of school life. But it is still more important that parents should pay attention to the school child's blood supply. Keep this rich and red by giving Dr. Williams' Pink Pills and the boy or girl will be sturdy and fit for school. The value of Dr. Williams' Pink Pills in cases of this kind is shown by the statement of Mrs. Watson, Grand Falls, N. B., who says "In the spring of 1919 my daughter Thistle, then 12 years of age, began to show symptoms of nervousness which developed into St. Vitus dance. She seemed to lose control of her limbs and at times every muscle in her body seemed to be twitching and jerking, and the trouble seemed to be growing worse. We finally decided to give Dr. Williams' Pink Pills, and the result was better even than we had hoped for, and she is now enjoying the best of health."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

N. B. PROVINCE OF BEAUTY AND OPPORTUNITY

The poet who wrote that beautiful hymn about singing birds, ringing words, dancing waters and nature's other inspirations, must surely have tasted of the summer delights of our own little province down by the sea. Its broad rivers romantic beaches and water stretches, lakes and mountains, fields and fountains, reversing falls, its smooth roadways, with their borders of sweet smelling flowers and shrubs, its deer and moose and other forest game, and its other natural resources possess a charm and attraction, that certainly mark New Brunswick as a most delightful and alluring summer vacation.

Possessing these allurements, the New Brunswick Tourist and Resources Association, which is now a provincial organization, is appealing to the town and county councils, the boards of trade, commercial clubs, and public-spirited citizens from end to end of the province to interest themselves in making these advantages better known to the out side world, and for promoting plans for provincial and local improvement and beautification. One of the greatest necessities in many attractive localities would seem to be improved hotel and housing accommodation. At the late meeting of the Association in Sackville, it was decided to publish a provincial pamphlet setting forth the attractions and advantages of the provinces a summer camping ground as well as a permanent abiding place. On this point, the Association secretary, Mr. C. B. Allan, of St. John, would be pleased to receive suggestions and information, as to the best routes to be followed in reaching specially attractive areas, the hotel and housing accommodation available, and such local resources or attractions as would prove most interesting. Our increase in the dollar membership is also desired, with a view to strengthening its influence and enabling it to carry on an exten-

Catarrahal Deafness Cannot be Cured

Catarrahal Deafness requires constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy by local applications, as they cannot reach the diseased portion of the ear. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and restoring normal conditions. Circulars free. All Druggists. F. J. Cheney & Co., Toledo, Ohio.

sive propaganda covering all sections of the province.

The Association, since becoming provincialized, has held meetings in St. John, Dalhousie and Sackville. Next season it is booked to meet in Edmundston, Madawaska, when it is hoped there will be a large representation from all parts of the province. Our readers who are interested in promoting the welfare of the province, are asked to lend their aid in building up this provincial organization.

How the Immigrant is Received in Canada

The Canadian Pacific Liner Melita Brings Thousands of Immigrants.

The writer has recently put himself in the place of an immigrant, travelling with a shipload up the St. Lawrence from Father Point to Quebec; joining the procession down the gangway to the big Government Immigration Hall; watching them, pass in review before customs officers, Health Department doctors and inspectors, and experiencing the services rendered by a number of helpful voluntary agencies at the port of disembarkation, while standing by the money changers and ticket sellers and finally boarding an immigrant train bound for the West. And this is how the immigrant is received in Canada; courteously, fairly, helpfully, expeditiously—that is, all except the few who ignorantly or wilfully have disregarded the regulations and must needs be firmly dealt with, for the sake of Canada as well as themselves. The last leg of the ocean journey is made over one of the most beautiful rivers in the world and amid the attractive scenery of the white little French Canadian villages and a background of their long narrow canals and the farther hills of blue. St. Lawrence makes a dramatic approach to the newcomer to Canada. All are eagerly drinking in the scene, facing with keen anticipation the new land for which they are heading, in some cases fulfilling the dreams of a lifetime; in others, it is a home-coming after a visit to the motherland and the old folks at home. Grosse Ile must, however, be

WEDDINGS

McKay—Flett

Edmonton, Alta July 16—Many Edmonton friends will be interested in the marriage which occurred at the home of Mrs. James Quinlan, 9934 106th street, on Wednesday, when Miss Helena Flett of Edmonton became the bride of Joseph Clifford McKay of Irma, Alberta. The wedding was very quiet owing to recent bereavement in the bride's family. The ceremony was performed by the Rev. W. G. Challis, of Dodsland, Saskatchewan, brother-in-law of the bride.

The bride wore her traveling suit of navy serge with pink georgette blouse and hat to match. Her corsage bouquet was of opelia roses.

Mr. and Mrs. McKay left for the coast where they will spend their honeymoon, and later will make their home on their farm near Irma.

The bride was a popular member of the teaching staff of the Alex. Taylor school.—Edmonton Journal

Beers—Mather

The home of Mrs. Phoebe Mather was the scene of a very interesting event at eleven o'clock Monday morning when her youngest daughter, Janet became the wife of Mr. Lionel Beers, of Moncton. The parlor was prettily decorated for the occasion and Rev. Mr. Bishop, pastor of the United Baptist church, performed the ceremony. The bride who was unattended wore a travelling suit of blue with hat to match and carried a shower bouquet of sweet peas and carnations. Miss Florence Price played the wedding march. After the ceremony dinner was served and Mr. and Mrs. Beers left on the Ocean Limited for a trip through the maritime provinces. They will reside in Moncton. The bride was for a number of years night operator in the New Brunswick Telephone exchange here and a popular young lady.

DeMoranville—Matheson

A very pretty home wedding took place Saturday afternoon at 2 o'clock at the home of Samuel Matheson, Courtland street, when his daughter, Miss Nellie May Matheson, was married to Gordon Earle DeMoranville, son of Mr. and Mrs. Harry A. DeMoranville, Forest street, Middleboro, Mass. In the presence of immediate relatives and friends, Rev. C. R. Chappell performed the ceremony, using the double ring service in the living room, which was tastefully decorated for the occasion with ferns,

palms, hydrangeas, pink roses, and carnations. The bridal party entered the room to the strains of Mendelssohn's wedding march, played by Mrs. Harry R. Belmont and Miss Isabel Keith on violin and piano. The bride was attended by Miss Eliza Johnson of Lawrence, maid of honor. The bridesmaids were Misses Sophia MacDonald, Mildred Whitty, Mildred Weeman and Eileen Simmons. The best man was Allan Matheson, a brother of the bride. The bride wore a handsome white georgette gown, trimmed with white satin, and a veil caught back with orange blossoms. She carried a shower bouquet of brides roses and maiden hair fern. Her attendants wore orchid and white organdie gowns with picture hats to match, and the maid of honor carried a bouquet of pink roses. Following the marriage a reception was held at which guests were present from Attleboro, Wollaston, Lawrence and Toronto, Ont. Refreshments of ice cream and cake were served. Mr. and Mrs. DeMoranville were the recipients of many beautiful gifts. Saturday night the newly married couple left amid a shower of confetti for a short honeymoon at Portland, Me. They will reside in Middleboro, where Mr. DeMoranville is employed at the George E. Keith Co. factory.

SIR SAM HUGHES SINKING RAPIDLY

LINDSAY, Ont. July 15—Suffering a severe relapse early last night the condition of General Sir Sam Hughes, former Minister of Militia, was reported at 1.30 this morning to be very serious and any hopes entertained during the past few days for his recovery have been given up.

Interviewed by the Canadian Press early this morning, Dr. J. McAlpine, Sir Sam's physician, stated that the intense heat was mainly responsible for the critical turn in the famous soldier's illness. He was worse yesterday morning, but during the evening his condition became very serious and he is sinking rapidly. He is delirious.

The former Minister of Militia has suffered for some months from pernicious anaemia, and heart weakness has brought him to his present critical condition.

HARVESTING THE HAY CROP

There is no operation on the farm so dependent upon weather conditions as that of hay making, and the farmer who can always gather in a crop of juicy fodder, neither too young nor too ripe which will come out of the mow fragrant and palatable, needs to exercise his best weather wisdom with good judgment, and lots of snap when the work is rushing.

All grasses and clover make the best fodder if cut while the stalks, having obtained their largest growth, are yet full of sap. If a large area is to be cut, it will be necessary to cut some part before it is ready, to avoid having a large quantity grow too old and woody before it can be reached.

In the maritime provinces, where many mornings are apt to be overcast and there may be some doubt up till eleven o'clock what the afternoon will bring forth, weather wisdom is especially required and frequently use can be made of the meteorological service to advantage. It must be borne in mind, however, that even the official forecasts on the sea-coast cannot be as accurate as at inland points because no reports are available as to weather prevailing far out from shore; therefore the meteorological Bureau only knows what is happening on one side of the district instead of all around it.

In the early part of haying and especially during the first part of a week it is generally good policy to cut down well in advance of the housing strength of the hay crew so that the largest possible quantity of hay may be housed before Saturday night.

The preferable times to cut grass are after the dew is off until, say, eleven o'clock and again after 4 p. m. When cut late in the evening the grass will be green and the night's dew will not blacken it. The best fodder cannot be made without cutting the hay for one night before it is housed. Very many men are content to leave their hay in windrow, or even lying flat, over night and save all the

ABLE TO DO HER WORK

After Long Suffering Mrs. Peasey Restored to Health by Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I suffered with irregular menstruation, was weak and run down, could not eat and had headaches. The worst symptoms were dragging down pains, so bad I sometimes thought I would go crazy and I seemed to be smothering. I was in this condition for two or three years and could not seem to work. I tried all kinds of medicines and had been treated by physicians but received no benefit. I found one of your booklets and felt inclined to try Lydia E. Pinkham's Vegetable Compound. I received the best results from it and now I keep house and go out to work and am like a new woman. I have recommended your Vegetable Compound to my friends and if these facts will help some poor woman use them as my pleasure."—Mrs. J. F. PEASEY, 387 King St., Toronto, Ontario.

If you are one of these women do not suffer for four or five years as Mrs. Peasey did, but profit by her experience and be restored to health.

OTHER TABLETS NOT ASPIRIN AT ALL

Only Tablets with "Bayer Cross" are Genuine Aspirin

If you don't see the "Bayer Cross" on the tablets, you are not getting Aspirin—only an acid imitation.

The "Bayer Cross" is your only way of knowing that you are getting genuine Aspirin, prescribed by physicians for over nineteen years and proved safe by millions for Headache, Neuralgia, Colds, Rheumatism, Lumbago, Neuritis, and for Pain generally. Made in Canada.

Handy tin boxes of 12 tablets—also larger sized "Bayer" packages can be had at drug stores.

Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monoaceticester of Salicylic acid.

While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company, Ltd., will be stamped with their general trade mark, the "Bayer Cross."

ROYAL YEAST CAKES RICH IN VITAMINES

MADE IN CANADA
The importance of Vitamines in food is being recognized at the present time to a greater extent than ever before. It has been conclusively demonstrated that yeast is rich in this all important element. Many people have received great benefit physically simply by taking one, two or three Royal Yeast Cakes a day. Send name and address for free copy "Royal Yeast Cakes for Better Health."

E. W. GILLE COMPANY LIMITED
WINNIPEG TORONTO CANADA MONTREAL

labour of colling up and opening out the coils next morning, but such methods may blacken 50% or more of the hay and damage both its palatability and nutritive qualities as well as lower its sale value.

In heavy grass with a smooth bottom the side delivery rake and the tedder are two worth while implements. The binder is not likely to be found of use except when the crop is to be cut into the silo, for sheaves of grass cut as young as it should be, will never in our Maritime climate dry through molding badly. Cotton caps for coils can be used in bad seasons with great advantage, but it is doubtful if they will ever come into general use on account of the expense involved. A hay loader in a small crew may be of great advantage; in a large operation its use is problematical, but unloading in the barn by horse power greatly increases the man power of the crew. The wise hay maker will put his hay in the mow green, sappy, but well cured after an night's standing in the coil, and he will make every effort to prevent its becoming wet with rain. In bad seasons it will often pay to spread salt in the mow while the hay is unloading at from 25 to 50 lbs per ton.

Trying To Find Cure For Elephantiasis

Vancouver, July 12—In order to study the terrible tropical disease of elephantiasis, an unnamed Canadian physician in Samoa has just had himself inoculated by bites of mosquitoes that had fed on men suffering from the malady. Captain David Ritchie of the Canadian-Australasian freighter Wairuna, told on arrival here of his talk with the plucky Canadian scientist who has dedicated his life to find a cure.

In the tropics the natives of many countries are subject to the terrible elephantiasis. Science has striven for many years to find the remedy, but to no effect.

Carried by Mosquitoes
It has been learned that the germs are carried by mosquitoes, and that inoculation occurs when a mosquito feeds on its victim. The disease carrying pests are confined to those that have first fed off an elephantiasis sufferer and transmission of germs can only take place on the twenty-first day after the insect has bitten the diseased person. Life of many mosquitoes is no that long; still there are enough whose span of existence permits them to carry the deadly germ.

The doctor told Captain Ritchie that he would be better able to study the progress of the malady if he were suffering from it himself. He could watch every phase of development and would thus be in better position to find a cure. It takes from nine to ten months to develop. If the scientist can not solve the problem he has set before himself he will eventually suffer the terrible end that comes to all elephantiasis victims.

It's hard to say no to a persistent salesman sometimes. If you do manage to say it he doesn't take you seriously.

GET DOWN TO BRASS TACKS

We challenge the Hon. T. A. Crerar and the Hon. Mackenzie King—if they want to be fair to the people—to discuss the public issues squarely instead of talking in a circle.

The discount of our dollar in the United States is the biggest question in Canada today, yet both these gentlemen are silent about it. We insist that they discuss it. As leaders of political parties and would-be Premiers, the people have a right to demand an expression of their views; have a right to know their opinion as to the effect their policies would have on exchange with the United States.

We challenge both of them to dispute:—

1. That under free trade or lowered tariff the importations from the United States would be larger.
2. That increased importations from the United States would mean an increased balance of trade against us, especially in view of the raising of the U. S. Tariff walls against our food products, which have constituted our main exports to that country.
3. That an increased balance of trade against us would necessarily mean an increased discount of our dollar and a corresponding increase in the prices of nearly all commodities to the Canadian people.
4. That by importing less from the United States of the goods we can produce at home we would help to restore the rate of exchange, and at the same time give additional employment to Canadian workmen.
5. That if their policies were carried out the discount of our dollar in the United States would become greater and greater and would be absolutely ruinous to the country.

We have another request to make of these gentlemen. We ask them to take the National Financial Statement in hand and tell us definitely, and especially in detail, how they, or either of them, would construct the National Budget; how they would raise the necessary revenue, what amount, if any, from Customs, what from Excise, to what extent, if any they would restore the Business Profits Tax, what expenditures they would lop off, what they would do with the railways? The public have a right to know what these gentlemen and their parties think about these matters. The public have had a bitter experience with the former Government in Ontario, which has doubled the expenditure and ruined the credit of the Province, and they do not propose to take any chances in the far larger and greater Federal field.

It will not suffice for Mr. Crerar to talk land tax, the idea of which was exploded even by his own advisers. The people want something definite and concrete. The big problem of the Canadian people is how to make bread and butter and keep the Nation's head above water, and the very least that can be expected from men who aspire to the Premiership is that they explain how they would accomplish these objects, and that they do their explaining in such a manner that the people can understand.

No Time For Change

We would respectfully ask Mr. Crerar and Mr. King to discuss on the public platform the essentially sensible proposition put forth by the Government that in view of the very abnormal and economical trade situation of the world this is the worst of all possible times to consider a revolution in our fiscal system such as these gentlemen advocate.

Just about the time a suburbanite feels as if he would like to spend an evening sitting in the porch swing the lawn needs mowing.

HAY CROP IS ABOUT FIFTY PER CENT IN QUEBEC

Quebec, July 12—Reports from the provincial experimental farm state that rains were of considerable benefit to the crops but fell short of what was needed. Though conditions at the farm were characterized as good, in view of the usual drought, figures were given which indicated that prospects for this year are the worst for a period of 20 years.

The hay crop is but 50 per cent of the average while the grain crop is about seventy-five per cent below the average.

THE BOY SCOUT ASSOCIATION

The Boy in the Man meets the Man in the Boy

There is only one way to be reasonably sure that we are going to see our sons safely over the rough places in their lives, and that is by becoming their chums. We must not allow our waking hours to be so full of business that we shall lack time to help the boys fight those battles every lad must face. The boy within the man must come out to meet the man who is within the boy and they must walk, talk and play together.

Charlie's Case

The following anecdote, though usual, contains a note of warning to which every father should give heed: A prominent Canadian Judge of a Juvenile Court tells of a visit which he made to a place of detention, where he became interested in two bright looking boys of about sixteen years of age. In conversation with one, he said: "Charlie, how did you come to get into this trouble. I knew your father well. He was one of the best ministers in Canada. It must have broken his heart to see you going wrong. Why didn't you take him into your confidence when you found yourself slipping?" The boy hung his head and mumbled: "I never could get within forty feet of my dad. He was always too busy."

Jim's Case

There was a wonderful similarity between Charlie's case and that of the other boy, Jim, whose father was a writer of legal books. Jim complained that several times when in trouble he had tried to have a talk with his father but was always greeted with "Run away Jim, my boy. I am just in the middle of a very important chapter and I cannot take the time just now to talk to you."

Your Case

Perhaps at this time you are saying: "Yes, I know and I only wish I had more time to devote to my boy, but I seem in that respect to be tied hand and foot. My business takes

WHEN USING
WILSON'S FLY PADS
READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

There is only one way to kill all the Flies

This is it—Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water but not flooded) on the window ledge where the light is strong, leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below.
Put the plates away out of the reach of children until required in another room.

The right way to use Wilson's Fly Pads

me away from home a great deal, or I must attend meetings at night, or I work long hours in the office. My life just now is peculiar."

It was to meet such cases as yours that the Scout Movement was devised by Sir Robert Baden-Powell, who spent years studying every phase of the different movements among boys.

What Scouting is

Baden-Powell says: "Scouting is a game in which elder brothers can give their younger brothers healthy environment and encourage them to healthy activities such as will help them to develop CITIZENSHIP.

"Its strongest appeal is through Nature Study and Woodcraft. It deals with the individual and not with the company. It raises intellectual as well as purely physical or purely moral quantities. At first it used to aim for those ends, now by experience it is known that, where properly handled, it gains them."

Convicts in Portsmouth penitentiary at Kingston are to be given an allowance of tobacco in future. In the past convicts have been punished for having tobacco in their possession and many guards were dismissed for supplying it to them. Now a small quantity is to be supplied to the men each week and those who misbehave are to be deprived of it as a punishment.

Probably nothing makes a girl so angry as the failure of another girl to notice her new engagement ring.

Teach Your Children the Value of Money

Open Savings Accounts for each one of your children. Insist upon regular deposits from pocket money. Thrift will gradually become a strong trait in each child's character.

There is a branch of this Bank near you and a Savings Department at every Branch.

OLD HOME WEEK PLAN FOR EXHIBITION

One of the special features of this year's exhibition in St. John will be a "Back to the Old Home" movement. Efforts are being made to attract former St. John residents to the city the first week in September, just when the surrounding country is at its loveliest. In the advertising campaign, several national mediums are being used with the idea of bringing before the people advantages of planning their vacation for this time so as to include the Exhibition in Old St. John.

Special railway rates will be allowed, as in pre-war days, and this fact will probably influence many to take the trip.

Busy Days at Grounds

It has been found necessary to increase the number of men working at repairs on the grounds in view of the short time in which to complete improvements. Extensive repairs are being made to the cattle sheds and other alterations are being made with the object of better utilizing space.

The prize list is to be more generous than ever and several cash prizes have been put in the place of cups, which were presented formerly.

H. A. Porter, secretary and manager, recently returned from Ontario where he visited Waterloo County, the home of the Brown Swiss cattle. Mr. Porter was informed by officials of the Brown Swiss Cattle Association that they had received most favorable reports of the accommodation at the St. John Exhibition and that it was stated to them the sheds are the equal of any in Eastern Canada. Mr. Porter assured the officials that if the herds were brought to St. John they would be included in the

Demand For Space

Space in the halls is pretty well taken up. The number of ice-cream and soft drinks and their places will be filled with industrial exhibits from substantial business houses.

In the Women's Department, the tea room has been done away with there because of the increased interest taken in women's work. This will give space for larger and more varied exhibits.

The Exhibition Association will deal direct with the amusements this year, having been greatly disappointed last season in the amusements provided. Several "stunts" and good aerial acts are already contracted for and it is promised that this feature will be better than ever.

PRESS OPINIONS ON THE SOCIAL WORK OF THE ARMY

"London Daily Telegraph"
 There is hardly a plague spot under the sun which is not the main concern of one or other of the branches of The Salvation Army, and the past decade has been a time of extraordinary development in regard to many of these. More and more the authorities of civilized communities, faced with presumably insoluble problems, are having recourse to the elastic organization, the business acumen, and the great moral and spiritual driving force of the world institution which looks to Queen Victoria Street for its policy and its inspiration.

"London Daily Chronicle."
 So far as those activities known as 'social work' are concerned, The Salvation Army has become at once the servant and the advisory expert of every nation. The office of advisory expert represents a side of the work that is not so obvious or so well known. The Army is a group of specialists. When some problem or other arises in one of the lands where it is at work, it selects a man who already knows something of that problem, or whose experience suggests him as the best man to study it, and he makes it his life-work to learn all there is to be known on the subject. So it has come about that when the nations find that some particular problem has refused to be exercised by bus forms or terrified by red-tape they call in The Salvation Army expert.

THE PLAIN TRUTH ABOUT MEDICINE HAT

As the Quebec Liberals did not put up a candidate in Medicine Hat they can, of course, extract no satisfaction from the result. They left it to the National Liberal and Conservative Party to fight single-handed what was virtually a battle in favor of sound government and Protection. This may be cheap political tactics, but it is a betrayal of the welfare of Canada, and these men are: live to curse the day that ever they entrusted the fortunes of their organization to the control of Wood, the Missourian, and Alex. T. Crerar—the first, and let us hope, the last exponent of business and politics in Canada.

The issue was fought out on straight, unadulterated Free Trade versus reasonable Protection and Free Trade won. It is useless analyzing the result. Ivens and the wild crowd of labor Bolsheviks pandered to the basest elements of labor; Crerar acted the part of demagogue whose horizon is bounded by wheat, and the candidate himself was Wood's man—Wood, whose henchman, Harris, speaking at Medicine Hat exclaimed, "We are solidly behind H. W. Wood, President of the U. F. A., and we will not admit any one to membership who is not actually a farmer!" For drawing the attention of the business men of the East (whose whole future depends on the maintenance of Protection) to the menace of the Agrarian party, the Globe hypocritically rebukes Mr. G. G. Scott, the member for South Waterloo. It was ill-advised. Were it not for such business men as Mr. Scott where would the Globe be?

It lives on their advertisements, and if they go down the Globe will go with them. Perhaps it will go before. Let the East clearly understand that the Northwest farmers are out after absolute Free Trade. Medicine Hat proves it. There will be no holding Crerar and Wood back. The people have spoken, and "the voice of the people is the voice of God"—so Crerar has just jubilantly informed us. Already he envisages himself in the seats of power. The law is to go forth from Winnipeg and the Head Office of the L. G. G. We wonder what the "business men of the East" think of the situation? It should give them furiously to think One thing is certain: the chasm is unbridgeable. It must be a fight to the finish. Free Trade, with every other nation piling on Protection (even Britain) would produce utter ruin and confusion. The business men of Canada have their backs up against the wall and must fight for their very existence. King will be in no position to help them. Should Crerar, Wood, Drury ever get into power (which God forbid they would dictate the fiscal policy of the country. Their hatred of the manufacturing East may be irrational and unjustifiable, but it is intense

WRIGLEY'S NIPS

NEW Candy Coated Chewing Gum

Now comes the new candy-coated chewing gum—Wrigley's Nips—to delight our old friends in a new way.

Try them— You'll enjoy them

Peppermint flavoured candy coating and chewing gum center afford a long-lasting treat, at the same time benefiting teeth, appetite and digestion.

Local and General News.

BANK INSPECTORS
Bank of Nova Scotia inspectors were in town last week making an inspection of the local office.

RAIN FOR 40 DAYS
Friday, 15th inst was St. Swithin's Day. According to an old adage if it rains on that day, it will rain for 40 days. This year it rained, so we may look for a 40 day period of wet weather.

FELL FROM BUILDING
While painting the exterior of Mr. Charles Maroney's store on Castle street last Thursday morning, Mr. William McCormack fell from the staging to the ground below and sustained minor injuries.

WILL ATTEND DIVINE SERVICE
Miramichi L. O. L. No. 79, Redbank N. B. will attend Divine Service at English Settlement, Trout Brook, on Sunday, July 31st, at 2 o'clock p. m. Rev. Mr. Scott of Millerton will conduct the service.
29-2 pd.

HYDRO-ELECTRIC MATTERS
C. O. Foss, Chief engineer of the New Brunswick Power Commission, went to Bathurst on Thursday in connection with hydro-electric matters there. He was joined at Moncton by K. H. Smith, federal government engineer for waterways in the Maritime provinces.

FOREST FIRE
A forest fire of large dimensions broke out last week between Eight Mile Brook and Beaverbrook. The provincial fire-wardens secured the services of two hundred men equipped with shovels and picks and used every effort in fighting the fire. The rain of Thursday night greatly assisted the men in their work.

TRY IT
Every one has heard during the winter months "that when your feet are cold, you are all cold." Believing this phrase to be true, some of our residents during the hot spell took a water bottle filled with cold water to bed with them and placed it at their feet. Those who tried the experiment claim that it worked wonders and now have no worry about sleeping on hot nights.

PARTNERSHIP
A Partnership between Messrs. John and James W. Paradis, of Quebec has been formed to carry on a general lumbering business in all its forms. The name of the firm is The Maritime Forest Products Company with head office at Newcastle. The above gentlemen are also largely interested in the Maritime Hide and Produce Co of this town, of which Mr. John Russell is the energetic manager.

FIRE AT NELSON
Nelson was again visited by fire early Friday morning when the two large barns on the Flett Homestead, which was burned on the preceding Sunday, were completely destroyed. The fire was not discovered until the buildings were a mass of flames. A large quantity of mill supplies, wagons etc. the property of Mr. William Sullivan were destroyed. The lumber at Mr. Sullivan's Mill became ignited several times, but was extinguished before much damage was caused.

AS ODORIFEROUS INSECT
For several days past citizens have noticed throughout the town a very pungent odor of a disagreeable type and many have been the theories as to the cause. Some thought it was due to high tide backing up the sewers. Others thought the odor came from the sewers and was due to lack of flushing on account of the dry weather. Still others claimed it was due to leakage in gas pipes.

What is now thought to be the cause has been found. It would appear that a little insect, about the size of the common small black bug, is responsible for the disgusting smell. The little stranger is very dark red in color, slightly less than a quarter of an inch in length. On crushing it an intensely offensive odor is emitted. The latest theory is that numbers of these insects the crushing of one of which is enough to permeate a large room have lately been crushed under foot by pedestrians, the odor being distributed through the air.

CASTORIA
For Infants and Children
In Use For Over 30 Years
Always bears the Signature of *Dr. J. C. Watson*

FALSE ALARM
A Fire Alarm was sounded on Sunday afternoon about 3 o'clock. The Fire Department was advised that there was a fire at the station but on arrival there, were unable to locate such.

SECURED CONTRACT
Messrs. Lee Buckley and Murdoch Wedden have secured a contract for the construction and clearing of about 20 miles of the transmission line between Newcastle and Nepisiguit Falls. A large crew of men will be engaged and work will start at once.

SHOCKED BY LIGHTNING
Two residents of Chatham Head named Voutour were electrically shocked, on Thursday evening during the heavy storm which was experienced in this district. The bolt of lightning struck near their home and after a lapse of some time both sufferers recovered.

ENJOYABLE SOCIAL
The L. O. Lodge No. 47 gave an enjoyable social last Tuesday evening, 12th inst in their lounge rooms. A large gathering of friends were present, who enjoyed the evening and the good things to eat. The members of the lodge proved themselves to be genuine hosts, and the guests were loud in their commendation of the treatment received.

CHURCH SOCIAL
The young people of the Methodist Church held a social in the basement of the church on Friday evening. Considering the inclement weather a large number patronized the event and thoroughly enjoyed the evening. Throughout the evening excellent music was furnished by the church's orchestra. A substantial amount was realized.

WATER THE BIRDS
During the continued drought, even the little birds found difficulty in getting their supply of water. Numbers of them were noticed helping themselves with water put out in pans for hens in the hen coops of residents in town. It would be an act of kindness if all would place water in a receptacle in their back yards, so the little creatures could easily procure this necessity.

BEACH PARTY
The Miramichi Hospital Aid of Chatham will hold a Beach Party, in aid of the Miramichi Hospital, at Burnt Church, on Wednesday, 20th inst. Meals and Afternoon Tea will be served on the grounds, and Needlework, Candy and Cold Drinks will be on sale.
The Str. Alexandra will arrive at Burnt Church at 11.30 a. m. returning about 3.30 o'clock in the afternoon.

R. S. V. G.—Miss Mary Delano
L. S. V. G.—Mrs. L. Ingram.

LARGE FIRE ON SABBIES RIVER
Mr. Ellis Mersereau of Doaktown was in town today and in conversation with him, he stated that he had just returned from Sabbies River, where a large forest fire had been raging. This fire started at the big forks of Salmon River and worked its way over to Sabbies River which is a branch of Cains River. The fire has devastated about 45 square miles two thirds of which was heavily timbered green woods. Five different camp crews were engaged fighting the fire, one crew alone having 125 men in it. This crew was in charge of Messrs. James Fraser, Robert Berry and Ellis Mersereau.

Mr. Mersereau reports that this fire was one of the largest fires ever seen in this section of the province and a vast quantity of lumber has been destroyed.

The fire is now under control and the fire fighters have returned to their homes with the exception of about twenty men, who remained to do patrol work.

25 YEARS AGO JULY 12TH
Newcastle—About 500 Orangemen and three bands took part in the demonstration here. H. B. Maltby, of Newcastle, was marshal. The speakers included Donald Morrison, Newcastle; P. E. Heine, Moncton; Rev. Jos. Pascoe, Petitcodiac; Rev. James Crisp, Rev. G. Swim and Westmorland's county master, W. D. Martin.

Guard Baby's Health In The Summer

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic diarrhoea and dysentery come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them. No other medicine is of such aid to mothers during the hot weather as is Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Grade IV. (b)—Katie Foran.
Grade III.—John Murphy, Anna Somers, Guy Murphy.
Highest average in school—Lena Tozer.
Highest attendance in school—Stafford Blackmore.

STORY OF A MARRIED VAMP

(Boston Globe)
The "vamp," which is the shorter and uglier word used to designate what Mr. Kipling called "a rag, and a bone, and a hank of hair" usually operates without a wedding ring. This however, is not always the case and vamps sometimes get married. The story of a married vamp has been laid bare in a Brooklyn court. Two years ago, this lady married a sailor possessed of a tidy little property. He got a job ashore and was a good provider, but the vamp was a better spender. She borrowed money from his folks, and ran up bills besides. One day the husband came across a file of dunning missives which showed that she had charged goods amounting to \$16,292.
It almost cleaned the poor man out to pay for his wife's extravagances, but he managed to get square with the shops. A few months later the lady had returned to the charge and accumulated \$1,292 more of debts. The husband was obliged to turn two mortgages over to a department store.

About that time he consulted an attorney and was advised that he was not liable for anything above his wife's necessities. A learned judge has just sustained him and ordered his mortgages returned.

Foreign observers of American life are of the opinion that the husband in this land of the free is frequently the slave. It is true that a good many men are unable to get money as fast as their wives spend it. This decision seems to mean that a load had been lifted from many a henpecked back.

Convicts in Portsmouth penitentiary at Kingston are to be given an allowance of tobacco in future. In the past convicts have been punished for having tobacco in their possession and many guards were dismissed for supplying it to them. Now a small quantity is to be supplied to the men each week and those who misbehave are to be deprived of it as a punishment.

PILES
Do not suffer another day with itching, bleeding, or protruding Piles. No surgical operation required.
Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 50c a box, all dealers, or Edmanison, Bates & Co., Limited, Toronto. Sample box free if you mention this paper and enclose the return to day postage.
