very kindly to the acquisition of the To. ronto, Grey and Bruce railway by the Canup process? When Mowat and Pardee in Where are the enterprising men who will officer should direct his attention. the local house the Midland and Nipissing amalgamation bill, also other bills expressly designed to cripple the Great Western and force its surrender to the Grand Trunk, what had the Mail to say on the subject? Just nothing at all. Now, however, it has a few salt tears to shed over the disappearance of the Toronto, Grey and Bruce from the list of independent roads.

But while the Mail pursued a course of dumb and undignified neutrality on the critical occasion referred to, the Globe and its leading directors were active partizans of the Grand Trunk-Midland gobble all through. Without the determined pushing of the Globe and the Mowat government in favor of Grand Trunk schemes, this iniquitous "gobble" would never have had the ghost of a chance of being carried in any assembly of Ontario's representatives. And the motive of the Globe and the Mowat government for taking this unpatriotic course is something that they will never be able to explain to the people of this province. No defense of this most indefensible act has yet been attempted by either of them; and it is safe to say that

none ever will be. When the Globe expresses regret because the Toronto, Grey and Bruce has been captured by the Canadian Pacific, it means that he represents a Canadian factory as schually the road had better have been given over closed, and the Globe weeping crocidile tears to the Grand Trunk. All talk about the over the event. The crocidile part of the Toronto, Grey and Bruce remaining independent is the merest bosh; the Globe understands perfectly well that, as things now are, the road had inevitably to be annexed overproduction scare has been mostly in by one or the other of the two great companies. And the reasons why it is better for the public interest that it should belong to the Canadian Pacific instead of to the Grand Trunk, are clear and satisfactory:

The Grand Trunk now holds possession of the upper lake ports of Sarnia, Goderich and Midland, to which may be added Southampton and Wiarton, though not of much account at present, may be added. Would better informed, he would know that all ready the scare is predically over; and that all the large cotton companies are rapidly effecting such changes as will enable them to increase the number and variety of their makes of goods, instead of running too much on one particular line as heretofore. The same thing is going on in the lost only is sold by the Li-Quor Tes company at 39 cents per lb. panies. And the reasons why it is better account at present, may be added. Would the woollen factories too, notably in the it have been a nice thing to add Owen Sound | knitted goods branch. to the Grand Trunk list, and so keep its great rival from getting on the northern side of the peninsula a proper foothold for competition. The voice of the people will surely be a most emphatic no-on this point. The neutral link should be built and controlled by an independent company, says the Globe. Were this plan adopted the people would soon realize to their sorrow that an independent company was one not to be depended upon. The independent company or companies talked of are got up by privateers with the well understood esign of selling out to the best advantage ossible; a scheme by which a few indiviluals expect to make many thousands. Of this let the people of Ontario be well assured—an independent company means of the union and of the strength of their a company got up for the express purpose of selling out; with a probability of a hundred to one that the Grand Trunk will be the buyer. We say, beware of all such schemes; the Northern offers the only guarantee that the people can depend upon.

A conservative paper the other day expressed a hope that, following the lead of the Globe, the chief Tory organ would add its voice towards encouraging respect for the impersonality of journalism. The tory hack fulfils the expressed hope by declining to sit in sackcloth and ashes. Catarrh—A New Treatment.

From the Weekly (Toronto) Mail, Aug. 34.

Perhaps the most extraordinary success that has been achieved in modern medicine has been attained by the Dixon treatment for catarrh. Out of two thousand patients treated during the past six months fully ninety per cent have been cured of this stuborn malady. This is none the less startling when it is remembered that not five per cent of patients presenting themselves to the regular pracjitioner are benefited, while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissue, Mr. Dixon at once adapted his cure to their extermination—this accomplished, he claims the catarrh is practically cured and the permanency is unquestioned, as cures effected by his two years ago are cures still. No one else has ever attempted to cure catarrh in this manner, and no other treatment has ever cured catarrh. The application of the remedy is simple and can be done at home, and the present season of the year is most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment. Sinderers should correspond with Mr. A. H. Dixon, 305 and 307 King street west, Toronto, Cauada, and enclose stamp, for his treatise on catarrh.

BOLT AND IRON

OF TORONTO, LIMITED, AT PAR.

This is one of Toronto's most important manufactories, giving employment to a large number of men and attracting to the City a large trade that formerly went elsewhere.

The New Works are fireproof and cover an acre of ground. The men and machinery therein are all in sight of the manager.

A Railway siding runs along the front of the works to facilitate the receiving, handling and shipping of goods.

The estimated saving in labor alone will be ever \$5000 a year.

The works being fireproof may afford a saving in insurance of \$4000 a year.

Rent, water rates, city taxes, gas, etc., a saving of \$3600 a year.

Fuel, that has heretofore been delivered ex-yard, will be delivered ex-cars, at a saving of nearly \$2500 a year.

The Building being specially constructed for the business, every evil attaching to other premises in which leakage, waste and tinkering expenses were unavoidable, will effect a very large saving that cannot be fully estimated in figures.

Every convenience exists for doing more and better work, as well as greater variety, than heretofore, at a less cost of production and with more satisfaction to all converned.

The Company have on hand extensive orders from the following Railways:

The Canadian Pacific Ry.
The Great Western Ry.
The Michigan Central Ry.
The Kingston & Pembroke Ry.
The Manitoba & Northwestern Ry.
And Other Companies.

The permanent, fixed and steadily increasing portion of the business is with Hardware chants and other manufacturers all over the Dominion in Carriage, Stove, Tire, Fancy

The capacity of the works now aggregates 30,000,000 bolts a year, one car load of railway Bolts and Spikes per day. This extent of trade slackens some portions of the year, but with the opening of the Northwest it will largely increase, and the track renewals with repairs will alone constitute a large trade.

The Works are a necessity in the country, almost as much so now as the Telegraph or Telephone Companies, the Railways being in absolute need of the Works, without which Railways would not be built as fast as they are now being rushed through the

which Railways would not be built as fast as they are now being rushed through the country.

The Agricultural Implement Works throughout the Dominion depend for their supplies upon this Factory, other Works also look to this Factory for their supplies, making its products as staple as cottons; and each kind of Bolts are sold in every town in all the Provinces of the Dominion on the name alone without call for samples, which are now rarely ever asked for.

The Company own over 200 acres of land, bought at a low price, within the proposed city limits, portions of which have siready been sold at Four Hundred per cent profit, and sites as well are allotted for three other factories about to be erected.

This is the only available property fronting the Humber Bay or west of the too much crowded Esplanade, that is available for use by railways. It combines advantages not possessed by any other property in or near Toronto in having lake and river frontages for wharfs and docks with safe open harbor all the year round protected by Mimico and Parkdale points. The property is also well situated as a pleasure resort, having parks on three sides with the lake in front.

The annual meeting was held on the 13th instant for the first six months' business of the Company, at which a Dividend was declared at the rate of ten per cent per annum for the half year ending on the 1st of May last. Applications for stock to the office of the undersigned, where the Report and Statement of the affairs of the Company may be seen.

Whether the writer be Mr. Withers or Mr. Wheatley his opinion is sound. Punish the men if you will, but let the horse go on ministering to the sport of the people. The ministering to the sport of the people. The great horse Barcaldine belonged to a man ruled off the English turf, but in Mr. Peck's hands is allowed to run where he pleases. Our jockey club cannot afford to bar a mare so speedy as Lady Reveller (Miss Moulsey), from their autumn meeting. It keeps off the two-legged offenders and forces them to sell their horses. The club's object is then accomplished, which is to improve the breed of horses by encouraging the sports of the turf, and by punishing fraud in connection with them.

CATARRH

A NEW TREATMENT WHEREBY A PERMANENT CURE

A. H. DIXON & SON

305 King St. West. 'TORONTO, CAN.

What the Rev. E. B. Stevenson, B.A., a clerryman of the London Conference of the Methodist church of Canada, has to say in regard to A. H. Dixon & Son's new treatment for Catarrh:

Oakland, Ont., Canada,
March 17, 1883.

Mesers. A. H. Dixon & Son: Dear Sirs—Yours of the 13th instant to hand. It seems almost too good to be true that I am cured of catarrh, but I know that I am. I have had no return of the disease and never felt better in my life. I have tried so many things for catarrh, suffered so many things for catarrh, suffered so much and for so many years, that it is hard for me to realize that I am really better.

I consider that mine was a very bad case; it was aggravated and chronic, involving the throat as well as the nasal passages, and I thought I would require the three treatments, but feel fully cured by the two sent me, and I am thankful that I was ever induced to send to you. You are at licerty to use this letter, stating that I have been cured at two treatments, and I shall glady recommend your remedy to some of my friends who are sufferers.

Your with many thanks,

From the Woodstock Sentinel Review The aristocratic swindler to whom we al luded last week as the "Hon. Hugh Lesslie Courtenay" deserves a fuller notice. This was the name under which he crossed the

Atlantic in '75 and by which he was known shortly afterwards when put into Buffalo jail for swindling. He arrived in Woodstock about two weeks ago and stopped at the Royal one day, giving his name as the "Honorable F. G. Drummond Hay, son of the Earl of Kinoul." He next found his way to the residence of a well-known his way to the residence of a well-known gentleman near town, where he wished to find something to do. This gentleman being very good natured, allowed the aristocratic stranger to remain over night, after which he, the Honorable, seemed to think that he could invite himself to remain indefinitely. He made frequent visits to town, and was seen by a business man who at once recognized him as the swindler of '75. Some of his yarns, too, "gave him away." Among other things, at the Royal he claimed to have been in the 11th Hussars (therrypickers) as lieutenant. Ingersoll on Death. The following lines are an extract taken from a letter recently written by Col. Ingersoll from Long Beach to a personal friend who had suffered a beleavement in the

death of his mother: "After all there is something tenderly appropriate in the serene death of the old. Nothing is more touching than the death Nothing is more touching than the death of the young, the strong. But when the duties of life have all been nobly done—when the sun touches the horizon—when the purple twilight falls upon the present, the pass, and future—when memory with dim eyes can scarcely spell the records of the vanished days—then, surrounded by kindred and friends, death com s like a strain of music. The day has been long, the road weary, and we gladly stop at the inn.

"Life is a shadowy, strange and winding road, on which we travel for a little way a few short steps, just from the cradle with its lullaby of love to the low and quiet wayside inn, where all at last must sleep

and where the only salutation is 'good-night.' Nearly forty-eight years ago, under the now in the little town of C z novia, my or nother was buried. I was but two years old. I remember her as she looked in death. That sweet, cold face has kept my heart warm through all the years."
